

General Information

? What is the purpose of Schedule NR?

Schedule NR allows you, a nonresident or part-year resident of Illinois, to determine the income that is taxed by Illinois during the tax year and to figure your Illinois Income Tax.

You **must** attach Schedule NR to your Form IL-1040.

? What if I was a nonresident of Illinois during the entire tax year?

If you were a nonresident of Illinois during the entire tax year, you must complete and file Form IL-1040 and Schedule NR if you

- earned or received income from Illinois sources or
- are entitled to a refund of Illinois Income Tax that was withheld from your pay in error.

Note → If you were **not** a resident of Iowa, Kentucky, Michigan, or Wisconsin, you **must attach** a statement from your employer indicating that your wages were not earned in Illinois and Illinois tax was withheld in error. In this case, you must first complete Form IL-1040. Then, complete Schedule NR, Steps 1, 2, and 5, writing zeros in Step 5, Lines 45 through 51.

? What if I was a resident of a reciprocal state during the tax year?

If you were a resident of Iowa, Kentucky, Michigan, or Wisconsin, which are Illinois' reciprocal states, and earned income in Illinois, you are exempt from paying Illinois Income Tax on income you earned from salaries, wages, tips, and other employee compensation. You are exempt because Illinois has a reciprocal agreement with these states. You must file Form IL-W-5-NR, Employee's Statement of Nonresidence in Illinois, with your employer to be entitled to this exemption.

If you are a resident of a reciprocal state, you do not have to file Form IL-1040 or Schedule NR unless you

- earned income in Illinois from sources **other than** wages paid to you as an employee or
- had Illinois Income Tax withheld from your pay in error. In this case, you must first complete Form IL-1040. Then, complete Schedule NR, Steps 1, 2, and 5, writing zeros in Step 5, Lines 45 through 51.

? What if I was a nonresident professional athlete?

If you were a nonresident professional athlete during any part of the tax year, you may be liable for Illinois Income Tax, depending on your team's state of residency.

For more information, call the Illinois Department of Revenue at **1 800 732-8866, 217 782-3336**, or TDD (telecommunications device for the deaf) at **1 800 544-5304**.

? What if I was a resident of Illinois during part of the tax year?

If you were a resident of Illinois during part of the tax year, you are considered a part-year resident and must complete and file Form IL-1040 and Schedule NR if you

- earned or received income from any source while you were a resident,
- earned or received income from Illinois sources while you were not a resident, or
- are entitled to receive a refund of Illinois Income Tax.

As a part-year resident, the rules you use to determine Illinois income and tax depend on whether or not you were a resident of Illinois when you earned the income.

If you were a **resident of Illinois** when you received the income, you will (within certain limitations) be taxed on 100 percent of the

income you received while you were a resident, regardless of the source.

If you were a **nonresident of Illinois** when you received the income, you will be taxed only on the income you received from Illinois sources.

When completing Schedule NR, you must add the income you received during the time you were a resident, and the Illinois income you received during the time you were not a resident. Refer to the Step-by-Step Instructions for part-year residents.

Use the same method of reporting that you use for filing your federal return. Report your income when you receive it and your deductions when they are paid. However, if you use the accrual method, "received" means "earned or received." Income that you received through partnerships, S corporations, trusts, or estates is considered received on the last day of the business' tax year.

? What if I received income from a business or a farm during the tax year?

If, while you were not a resident of Illinois, you received

- business income earned both inside and outside Illinois or
 - farm income earned both inside and outside Illinois,
- you must complete the Business or Farm Income Apportionment Formula (IAF) Worksheet on Page 8.

The IAF Worksheet allows you to figure the Illinois portion of your business or farm income. Be sure to keep a copy of this worksheet with your income tax records.

? What is business income?

Business income is income you earned or received from any activity that you took part in during the regular course of your trade or business. It includes income you earned or received from tangible or intangible property if you acquire, manage, and dispose of this property as an essential part of the regular operations of your trade or business. This **does not** include wages you received as an employee.

? What if I received income from partnerships, S corporations, trusts, or estates?

If you received income from an Illinois partnership or S corporation, that entity is required to send you an Illinois Schedule K-1-P, Partner's or Shareholder's Share of Income, Deductions, Credits, and Recapture. Also the entity is required to send you the partner's and shareholder's instructions for properly completing Schedule NR.

If you received income from an Illinois estate or trust, that entity is required to send you an Illinois Schedule K-1-T, Beneficiary's Share of Income and Deductions. Also the entity is required to send you the beneficiary's instructions for properly completing Schedule NR.
