

Illinois Department of Revenue Schedule SA Instructions (IL-990-T)

General Information

The purpose of Schedule SA, Specific Accounting, is to provide a means for calculating your income and tax at separate rates, due to an income tax rate decrease in the middle of the tax year. The Schedule SA allows you to figure your tax based on the specific accounting method.

- **Specific accounting method** - The specific accounting method allows you to treat your net income or loss and modifications as though they were earned in two different taxable years.

For corporations, the amount earned prior to January 1, 2015, is taxed at 7 percent. The amount earned on or after January 1, 2015, is taxed at 5.25 percent.

For trusts, the amount earned prior to January 1, 2015, is taxed at 5 percent. The amount earned on or after January 1, 2015, is taxed at 3.75 percent.

In both cases, the two tax amounts are then added together to figure the total tax liability.

Who should use Schedule SA?

You must use Schedule SA if you elect not to use the blended rate method of computing your tax when the rate changes in the middle of the tax year. The blended rate method taxes your income as if you received it evenly throughout the year.

If you actually earned more of your income during the period to which the 5.25 or 3.75 percent tax rate applies, electing to use the specific accounting method on Schedule SA to determine how much of your income is taxed at the 5.25 or 3.75 percent rate and how much is taxed at the 7 or 5 percent rate will reduce your tax liability. The election is made by attaching Schedule SA to your timely-filed original return. Once the election is made, it is irrevocable.
