Discharge of Indebtedness Worksheet and Instructions

- | | | |
|--|----------|-------|
| 1 Enter the amount of the reduction to your federal net operating losses that was carried over to the tax year of the discharge (See federal Form 982). | 1 | _____ |
| 2 Multiply the amount on Line 1 by your income allocation ratio. | 2 | _____ |
| 3 Enter the total amount of Illinois net loss carryovers from all loss years available to be carried to the taxable year of the discharge. | 3 | _____ |
| 4 Enter the lesser of Line 2 or Line 3. This is the amount of your loss carryover reduction. | 4 | _____ |

Line 2 — Your income allocation ratio is calculated by dividing the amount of debt cancellation income excluded from your gross income that would have been allocated or apportioned to Illinois under the IITA if it was not excluded by the total amount of debt cancellation income excluded from your gross income. If all of your debt cancellation income would have been business income, use the apportionment factor you calculated on the return for the tax year of the debt cancellation.

Line 3 — This is the amount of any net loss reported on Schedule NLD for a taxable year prior to the year of discharge that has not previously been carried back or forward. In determining this amount,

if you had positive base income allocable to Illinois in the tax year of the debt cancellation, you may first use any NOL carryovers available to be carried to that year in order to claim an Illinois NLD. Only the remaining unused loss carryovers to such year, if any, should be included on this line.

Line 4 — If Line 2 is less than Line 3, apply the loss carryover reduction from Line 4 to reduce (but not below \$0) the net operating loss carryover beginning with the earliest loss year, and continue in order until the entire loss carryover reduction has been applied. If Line 3 is less than Line 2, all of the net loss carryovers you reported on Line 3 are reduced to \$0.
