

A medical appliance is defined as an item which is intended by its manufacturer for use in directly substituting for a malfunctioning part of the body. See 86 Ill. Adm. Code 130.310(c). (This is a GIL.)

May 28, 2010

Dear Xxxxx:

This letter is in response to your email dated May 17, 2010, in which you request information. The Department issues two types of letter rulings. Private Letter Rulings ("PLRs") are issued by the Department in response to specific taxpayer inquiries concerning the application of a tax statute or rule to a particular fact situation. A PLR is binding on the Department, but only as to the taxpayer who is the subject of the request for ruling and only to the extent the facts recited in the PLR are correct and complete. Persons seeking PLRs must comply with the procedures for PLRs found in the Department's regulations at 2 Ill. Adm. Code 1200.110. The purpose of a General Information Letter ("GIL") is to direct taxpayers to Department regulations or other sources of information regarding the topic about which they have inquired. A GIL is not a statement of Department policy and is not binding on the Department. See 2 Ill. Adm. Code 1200.120. You may access our website at [www.tax.illinois.gov](http://www.tax.illinois.gov) to review regulations, letter rulings and other types of information relevant to your inquiry.

The nature of your inquiry and the information you have provided require that we respond with a GIL. In your letter you have stated and made inquiry as follows:

We are a management company for a for profit surgical center operating in the state of Illinois. We purchase the PowerPort Implantable port, which are devices implanted into the patient. Following is a description of the product as provided by the manufacturer:

The PowerPort Implantable port is an implantable access device designed to provide repeated access to the vascular system. The port system can be used for infusion of medications, IV fluids, parenteral nutrition solutions, blood products and for the withdrawal of blood samples.

We have been unable to determine what tax rate applies to this item based upon your description of medical appliances under Title 86, Part 130, Section 130.310. We think that if a patient needs to have this device implanted, something within the body is not functioning properly. Please advise.

**DEPARTMENT'S RESPONSE:**

All gross receipts from sales of tangible personal property in Illinois are subject to Retailers' Occupation Tax unless an exemption is specifically provided. Medicines and medical appliances are not taxed at the normal State rate of 6.25% plus applicable local taxes. These items are taxed at a

reduced State rate of 1% plus applicable local taxes. See 86 Ill. Adm. Code 130.310. Items subject to this lower tax rate include prescription and nonprescription medicines, drugs, medical appliances, and insulin, urine testing materials, syringes, and needles used by diabetics, for human use.

The definition of a medical appliance is "an item which is intended by its manufacturer for use in directly substituting for a malfunctioning part of the body." "Medical appliances" may be prescribed by licensed health care professionals for use by a patient, purchased by health care professionals for the use of patients, or purchased directly by individuals. See 86 Ill. Adm. Code 130.310(c)(2). Please note that not all items prescribed by or used by physicians or other licensed health care professionals qualify for the low rate.

Medical appliances that qualify for the reduced rate include such items as artificial limbs, dental prostheses and orthodontic braces, crutches and orthopedic braces, wheelchairs, heart pacemakers, and dialysis machines. Other examples of items that qualify for the reduced rate are corrective medical appliances such as hearing aids, eyeglasses and contact lenses. As a general proposition, diagnostic, treatment, and rehabilitative equipment items do not qualify for the reduced rate of tax as medical appliances because such items are not "for use in directly substituting for a malfunctioning part of the body," 86 Ill. Adm. Code 130.310(c)(2).

As you can see, in order for a medical appliance to qualify for the reduced rate, the medical appliance itself must be used in a manner that directly substitutes for a malfunctioning part of the body.

I hope this information is helpful. If you require additional information, please visit our website at [www.tax.illinois.gov](http://www.tax.illinois.gov) or contact the Department's Taxpayer Information Division at (217) 782-3336.

Very truly yours,

Debra M. Boggess  
Associate Counsel
