DISCLAIMER

This audit manual is a guideline for assisting and training auditors in the completion of their audits. Every audit is an independent review of a particular taxpayer's books and records. Every audit requires cooperation from taxpayers. If the taxpayer fails to maintain or provide the books and records required by statute or regulation or fails to timely comply with any reasonable request for documents or additional information, the auditor is authorized to use any reasonable procedure or method necessary to obtain the information necessary to determine the correct amount of a tax liability and to apply his or her best judgment in making that determination.

The failure to follow a suggested procedure or method, deviation from a suggested procedure or method, or any additional investigation outside the scope of a suggested procedure or method is at the discretion of the Department and shall not be grounds for invalidating any audit finding. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. The Department reserves the right to update, revise, or rescind this manual or portions thereof without notice.

Any references to statutes, regulations, case law, private letter rulings or general information letters are for background purposes for assisting the auditors. Nothing in this manual constitutes an official policy, legal position or interpretation of law sanctioned by the Department's Director, General Counsel or Legal Services Bureau.

This manual is intended for internal use only and if disclosed outside the Department for any reason shall not constitute written legal advice or guidance from the Department for purposes of the Taxpayers' Bill of Rights

1 CHAPTER 1 – GENERAL AUDIT INFORMATION

1.1 DEPARTMENT OF REVENUE MISSION STATEMENT

It is the mission of the Illinois Department of Revenue to collect state and local taxes as authorized by Illinois laws, to assist as directed with the tax matters of other units of government in this state, and to administer tax related programs as assigned. To achieve this purpose, and to instill public confidence in the integrity and efficiency of the State's tax programs, the Audit Bureau will pursue the following goals:

- Encourage and achieve the highest possible degree of voluntary compliance with Illinois tax laws.
- Work for the adoption of tax laws that are fair, simple to understand, and cost efficient for both the Department and taxpayers.
- Accurately and efficiently collect, deposit, process, and allocate tax revenues.
- Establish clear, concise, accurate and timely communications with the public (taxpayers, legislators, practitioners, employees, etc.).
- Maintain a workforce that demonstrates the highest standards of integrity, efficiency, and performance.

1.2 SAFEGUARDING CONFIDENTIAL AND SENSITIVE TAXPAYER INFORMATION

In the course of fulfilling their official duties, Revenue auditors have access to sensitive taxpayer information which must be kept confidential and safeguarded. The care of official documents is regulated by state law. All records and documents in the custody of Department employees, contractors, or contractor employees are for official use only. The Department has established guidelines which must be adhered to. The Employee Handbook sections on "Care of Official Documents" and "Confidentiality of Information" and PUB-19, Keeping Tax Information Confidential detail these guidelines.

Section 6103 of the Internal Revenue Code (IRC) and the disclosure agreement between the IRS and the Department authorize the IRS to provide federal tax returns and return information to the Department to be used in the administration and enforcement of state tax laws.

IRC Sec. 6103 regarding the confidentiality and disclosure of returns and return information states the following:

(a) General rule.--Returns and return information shall be confidential, and except as authorized by this title--

(1) No officer or employee of the United States,

(2) No officer or employee of any State, any local child support enforcement agency, or any local agency administering a program listed in subsection (l)(7)(D) who has or had access to returns or return information under this section, and

(3) No other person (or officer or employee thereof) who has or had access to returns or return information under subsection (e)(1) (D)(iii), paragraph (6), (12), or (16) of subsection (l), paragraph (2) or (4)(B) of subsection (m), or subsection (n),

shall disclose any return or return information obtained by him in any manner in connection with his service as such an officer or an employee or otherwise or under the provisions of this section. For purposes of this subsection, the term "officer or employee" includes a former officer or employee.

Internal Revenue Publication 1075 - TAX INFORMATION SECURITY GUIDELINES FOR FEDERAL, STATE, AND LOCAL AGENCIES - *Safeguards for Protecting Federal Tax Returns and Return Information*- is intended to provide guidance in ensuring that the policies, practices, controls, and safeguards employed by recipient agencies or agents and contractors adequately protect the confidentiality of the information they receive from the IRS. Publication 1075 can be viewed on the IRS website at www.irs.gov/pub/irs-pdf/p1075.pdf

1.2.1 DEFINITION OF FEDERAL TAX INFORMATION (FTI) – IRS PUBLICATION 1075

Safeguarding FTI is *critically important* to continuously protect taxpayer confidentiality as required by the IRC 6103. FTI may consist of returns or return information and may contain personally identifiable information (PII).

FTI is any return or return information received from the IRS or secondary source, such as SSA, Federal Office of Child Support Enforcement or Bureau of Fiscal Service. Examples include:

- copies of returns,
- Revenue Agents Reports (RAR),
- transcripts, or
- any information received in electronic format such as extract files (IMF, IRMF, IRTF, BMF, LEVY Source, etc.).

FTI also includes any information created by the recipient that is derived from return or return information received from the IRS such as:

- screen prints
- detailed reports with specific taxpayer information, or
- audit workpapers created from FTI.

In addition to the paper and electronic information that we receive or produce directly from the IRS source information, the Department will also use FTI to match, verify and update information within our tax system. When FTI and non-FTI data reside on the same paper, electronic media, or data center, the information is considered to be commingled. If the IRS sourced information replaces some of the taxpayer-provided information in GenTax, then the information becomes commingled FTI. Commingled information must be treated like FTI with the same security provisions in Publication 1075.

FTI does *not* include return information provided by or through the taxpayer or taxpayer's representative. While the information itself may be the same, the key determining factor is the **source**. If the source is the IRS, then it is FTI. If the source is the taxpayer or the taxpayer's representative, then it is NOT FTI. It is considered state tax information (STI), which must still be treated as confidential, but it is not subject to the federal penalties for improper disclosure of FTI.

1.2.2 REQUESTING FEDERAL TAX INFORMATION

When Federal tax return information vital to an audit cannot be secured from the taxpayer, a copy of the information can be requested from the Internal Revenue Service (IRS).

1.2.2.1 EXCHANGE AUTHORIZATION

Internal Revenue Code (IRC) Section 6103(d) outlines the disclosure agreement between the Internal Revenue Service (IRS) and State Audit Agencies and authorizes the IRS to provide federal returns or return information to the Illinois Department of Revenue to be utilized in the administration and enforcement of State tax laws. In order to maintain the privilege of receiving federal returns or return information from the IRS, it is imperative that the following procedures be followed.

IRC Section 6103(b)(1) defines the term "return" as "any tax or information return, declaration of estimated tax, or claim for refund required by, or provided for or permitted under, the provisions of this title which is filed with the Secretary by, on behalf of, or with respect to any person, and any amendment or supplement thereof, including supporting schedules, attachments, or lists which are supplemental to, or part of the return filed."

IRC Section 6103(b)(2) defines the term "return information" as "a taxpayer's identity, the nature, source, or amount of his income, payments, receipts, deductions, exemptions, credits, assets, liabilities, net worth, tax liability, tax withheld, deficiencies, over assessments, or tax payments, whether the taxpayer's return was, is being, or will be examined or subject to other investigation or processing, or any other data, received by, recorded by, prepared by, furnished to, or collected by the Secretary with respect to a return or with respect to the determination of the existence, or possible existence, of liability (or the amount thereof) of any person under this title for any tax, penalty, interest, fine, forfeiture, or other imposition, or

offense, and any part of any written determination or any background file document relating to such written determination which is not open to the public inspection under IRC 6110."

IRC Section 6103(p)(4) outlines the safeguards to be taken with federal return information. IRC Section 6103(p)(4) provides that,

> "... any agency, body, or commission ... shall, as a condition for receiving returns or return information--
>
> (A) establish and maintain, to the satisfaction of the Secretary, a permanent system of standardized records with respect to any request, the reason for such request, and the date of such request made by or of it and any disclosure of return or return information made by or to it;
>
> (B) establish and maintain, to the satisfaction of the Secretary, a secure area or place in which such returns or return information shall be stored;
>
> (C) restrict, to the satisfaction of the Secretary, access to the returns or return information only to persons whose duties or responsibilities require access and to whom disclosure may be made under the provisions of this title;
>
> (D) provide such other safeguards which the Secretary determines (and which he prescribes in regulation) to be necessary or appropriate to protect the confidentiality of the returns or return information."

Employees should be aware of the penalties imposed for unauthorized disclosure or unauthorized use of "FTI." These civil and criminal penalties apply even though the unauthorized disclosure(s) may have occurred after their employment with the agency was terminated.

1.2.2.2 CRIMINAL PENALTIES FOR UNAUTHORIZED DISCLOSURE

Unauthorized disclosure of federal returns and/or return information, in any matter, that could identify a taxpayer constitutes a felony under IRC Section 7213 and is punishable, upon conviction, by a fine not exceeding $5,000 and/or up to five years imprisonment, plus the costs of prosecution.

1.2.2.3 CRIMINAL PENALTIES FOR UNAUTHORIZED ACCESS OR INSPECTION

On August 5, 1997, the Taxpayer Browsing Protection Act was signed into law. The Act provides a criminal misdemeanor penalty for the willful, unauthorized access or inspection of "FTI". Tax information includes all returns and return information in either paper or electronic format.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The penalty for unauthorized access or inspection is a fine of up to $1,000 and/or imprisonment up to a year. This applies to all federal employees, state employees and contractors who receive federal tax information under provisions of IRC Section 6103.

1.2.2.4 CIVIL DAMAGES FOR UNAUTHORIZED INSPECTION OR DISCLOSURE

In addition to the criminal penalties, IRC Section 7431 permits a taxpayer to file suit for civil damages for willful or negligent disclosure of federal tax information. The court may award actual damages sustained as a result of such unauthorized disclosure, as well as punitive damages in the case of willful disclosure which is the result of gross negligence, plus the costs of the action. However, in no instance will the award be less than $1,000 for each act of unauthorized disclosure for which the defendant is liable, plus the costs of the action. The taxpayer has up to two years from the time the unauthorized disclosure is discovered to file suit.

The Act also provides a cause of action for civil damages for unauthorized inspection or disclosure. For each act of unauthorized inspection or disclosure, upon a finding of liability, those damages could amount to $1,000 or actual damages, whichever is greater. In the case of gross negligence or a willfully unauthorized inspection or disclosure, punitive damages may also be assessed. When an employee is indicted for unauthorized access, inspection or disclosure of tax information, the IRS is required to notify the affected taxpayer.

Per IRC Section 7432, upon a finding of liability on the part of the defendant, the defendant shall be liable to the plaintiff in an amount equal to the sum of-

(1) the greater of-

(A) $1,000 for each act of unauthorized inspection or disclosure of a return or return information with respect to which such defendant is found liable, or

(B) the sum of-

(i) the actual damages sustained by the plaintiff as a result of such unauthorized inspection or disclosure, plus

ii) in the case of a willful inspection or disclosure or an inspection or disclosure which is the result of gross negligence, punitive damages, plus

2) the cost of the action.

1.2.2.5 REQUESTING FEDERAL TAX INFORMATION

Every attempt should be made to obtain FTI in the following order:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a. From the taxpayer. Unless the taxpayer is a true non-filer, the taxpayer should be able to provide their federal return information.

b. From the Data Warehouse. The auditor needs to thoroughly research the information available in the warehouse. Field staff who does not have access to the warehouse must contact the Income Tax Audit Planning Technical Support Supervisor (ITAPTS) for warehouse information.

- When checking records in the warehouse, need to change "Default" view from the "View 1" to see everything available in each file.
- Most often what is available in the warehouse provides more detail than a transcript will provide.

Note: Anytime that a number is taken from the Data Warehouse (Federal information) and transferred onto Audit documentation (i.e. EDA-25), it is then considered Federal Tax Information (FTI) and must be protected with a Federal folder and tracking sheet. However, if Line 1 AGI is only being verified through the Data Warehouse (without changing the taxpayer source information or printing it for an audit file), it is NOT considered FTI and does not require the folder/tracking sheet. In such a case, auditors should state that the taxpayer's filings have been verified using "available IDOR resources" not the federal warehouse.

c. From the Disclosure Officer. IRS Form 8796-A should only be completed and submitted to the disclosure officer as a last resort to obtain federal information.

- Transcripts can only be ordered for the last three years. Information often provided in a transcript does not help in an audit.
- Copies of returns can be ordered, but can take a considerable amount of time (6 months is not uncommon).
- The Disclosure area is under new, more stringent IRS security measures which include new requirements in tracking the requests that are handled. On the next IRS review, it is important to show that the Department is not continually ordering transcripts for information that is already available (such as on the warehouse).

REQUESTS GUIDELINES

- Current individual returns (U.S.-1040's) due on April 15th should not be ordered until July 15th or after. Current corporate returns (U.S.-1120's) due on March 15th with an extended due date of September 15th should not be ordered until December 15th or after.
- Actual copies of prior year returns (both U.S.-1040's and U.S.-1120's) which precede the current year by more than six years may not be available.
  - If needed, the auditor should still request returns that precede the current year by more than six years.

- If the IRS is unable to provide a copy of the original return they may still be able to provide a microfilm printout of the return.

In either case, the IRS will respond with whatever information is available.

1.2.2.6 FORM 8796-A, REQUEST FOR RETURN/INFORMATION

IRS Form 8796-A, Request for Return/Information, should only be used as a last resort by the Audit staff when requesting FTI. This form can be accessed in the Audit Work Area on the sp●IDOR web. Form 8796-A (as shown below) is available in the Work Area as a "fill-in" PDF file, which can be filled in, saved and printed.

Request for Return / Information

(Federal/State Tax Exchange Program - State and Local Government Use Only)

SECTION A

Return to
Internal Revenue Service
Disclosure Scanning Operation
Stop 93A
Post Office Box 621506
Atlanta, GA 30362-3006

I am requesting the following identified return(s) / return information under terms of the Federal / State Tax Coordination Agreement. I understand disclosure or use of the information received for other than authorized tax administrative purposes is subject to criminal and civil liabilities under sections 7213 and 7431 of the Internal Revenue Code.

SECTION B

1. Name of Taxpayer — SSN / EIN
Address

2. Information Requested — Tax periods — Type of return forms
Copy of return(s) ☐ Yes ☐ No
Check the appropriate block
☐ Transcript
☐ Audit Workpapers
☐ Outstanding balance of assessments including penalties and interest computed to ____ *(date)*
☐ Other *(Specify below)*

3. Reason requested *(Check the appropriate block)*
☐ Pending Examination ☐ Criminal Investigation
☐ Pending Collection Activity ☐ Other *(Specify)*

SECTION C

1. Name of employee making request — Date request made
2. Group Manager Signature — Group Manager phone number — Division / Branch / Group
3. From *(Signature / Authorized Representative)* — Date signed — Telephone number
4. Requesting Agency
Agency name

Attention
Alison Wrona
Street address
101 West Jefferson Street, MC 1-214
Street address
City, State, ZIP code
Springfield, IL 62702

Instructions for Form 8796-A, Request for Returns/Information under Federal/State Exchange Agreement

The form may be used by state and local tax agency personnel requesting return(s) or return information from IRS.

Complete Sections A, B and C. After signature approval, forward to the pre-printed address in Section A. State the agency's need and use for the requested data as specifically as possible in section B-3. A general statement that it is needed for tax administration is insufficient.

Note: Do not send expedite requests or other requests that require local handling to the address in Section A. Contact your local Disclosure Office. If the office agrees to expedite or otherwise handle your request locally, you will submit it directly to that office.

Form **8796-A** (9-2011) Catalog Number 58558D www.irs.gov Department of the Treasury-**Internal Revenue Service**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.2.2.7 COMPLETING FORM 8796-A

The following information should be entered on Form 8796-A:

In order to become compliant with the IRS safeguard review recommendations, it will be necessary for the request for transcripts or other federal information to have the audit tracking #, legal docket #, CID case #, or the most current FSEU letter ID #, placed on the top of the request. The request must also be signed by a supervisor or manager.

Section B

All of Section B should be completed. When entering the taxpayer's address, the zip code MUST BE entered as the IRS uses zip code information for research purposes.

- In Section B – 2.Information Requested, multiple tax periods (years) may be requested on a single Form 8796-A.
  - If you check the box for copy of return, you will receive a complete copy of the ORIGINAL return including all of the schedules and statements attached to the ORIGINAL return by the taxpayer.
  - If you check the box for copy of transcript, you will receive a transcript that shows the original return and all of the adjustments (i.e. math. errors, amended returns, RAR's, etc.) that have been made to the original return.
  - If you check the "other" box, you must give a detailed explanation as to the information required. The "other" box may also be used for ordering a copy of an RAR, but this must be specified.

It is important to realize that multiple boxes may need to be checked in order to receive the appropriate tax information for a given taxpayer.

Example: An auditor needs any and all tax information available pertaining to a taxpayer's U.S.-1120 return. The following boxes may need to be checked:
1) Copy of Return- provides copy of the original return including all schedules and statements that were attached to that original return,
2) Transcript- provides a transcript that shows the original return and all adjustments made to that return, and
3) Other- provides the option to specify ordering a copy of an RAR, or to specify ordering either U.S.-1040 or U.S.-1120 returns as a computerized printout only.

- In Section B - 3.Reason Requested, check the appropriate box, for audit purposes – "pending examination". The "Federal Tax Information" may be used ONLY for the purpose described here.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If a court date is involved, requests for certified data should be made six to eight weeks prior to the court date. The actual court date must be indicated on the form 8796-A. Use the “other” box, and specify “court case” with the date.

Section C

In Section C, the name of the employee making the request and the date should be completed. The requester’s supervisor must affix their signature as the “group manager” and include the division, branch, and /or group applicable.

Additional Information Required

The IRS will disclose returns or return information only to the extent that its need and use are satisfactorily justified for an authorized statutory purpose. For this reason, a detailed explanation of the reason for your request should be submitted with Form 8796-A.

A minimum of 150 days should be allowed for processing a request for copies of the original returns. If no response is received within 150 days, another Form 8796-A should be submitted with "Second Request" and the date of the original request written at the top of the form.

1.2.2.8 ROUTING THE COMPLETED 8796-A

Once Form 8796-A has been filled in, the form should be directed to the requester’s supervisor for signature. After completion by the supervisor, three copies should be printed; one copy should be retained for the requester’s records, while the other two should be forwarded to the Revenue Disclosure Officer (see address in the next section).

1.2.2.9 SAFEGUARD PROCEDURES – HANDLING FEDERAL TAX INFORMATION

Upon receipt of the information from the IRS, the Authorized Exchange Representative will perform the necessary recordkeeping and prepare the “FTI” for transmittal to the requester. The information is placed in a file folder that is clearly identified (i.e., stamped in red) as containing “FEDERAL TAX INFORMATION”. The Authorized Exchange Representative will transmit the FTI folder attached on Form EDA-79 (FTI Transmittal Form), along with Forms IDR-487, Federal Form 8796-A and EDA-80. The Department of Revenue forms are as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

EDA-79 (revision date 07/2015) is a “triplicate” form.

   Illinois Department of Revenue
   101 West Jefferson Street, 1-214
   Springfield, IL 62702

2. The requester and **all** other employees with access to the file *must* initial and date Form-487 advising of disclosure limitations. This form will be attached to the IRS data in the FTI folder. This would include the auditor, supervisor, clerical staff, reviewer, etc.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

IDR-487 (shown below) should be utilized whenever an employee reviews the FTI contained in the folder.

THIS FILE CONTAINS

FEDERAL TAX INFORMATION

DISCLOSURE LIMITATIONS

Unauthorized disclosure, printing, or publishing of federal tax information is punishable by fine or imprisonment. Persons with access to this file must enter information below.

Reviewed by		Forwarded to

IDR-487 (R-7/91)
IL-492-0804

Precautions must be taken to safeguard "FTI" obtained from the IRS pursuant to the Federal/State Exchange Agreement. As a reminder, a checklist (Form EDA-80) of the requirements for safeguarding "FTI" will be included in the FTI folder.

EDA-80 (revision date 07/2015) provides this checklist.

Illinois Department of Revenue

Federal Tax Information

Because of the confidentiality laws of the Internal Revenue Service, it is necessary that the Department of Revenue take some extra precautions to insure that federal tax information is secured properly. The following checklist has been developed and should be utilized whenever federal tax information is a part of the Department's workpapers. If additional information concerning the handling of federal tax documents is desired, please contact the Disclosure Office (217 524-7738).

Check-Off List

- ☐ Federal tax information is being stored in a secured manner at all times.
- ☐ Federal tax information is being kept in a stamped federal tax data folder.
- ☐ Federal tax information contained herein has not and will not be photocopied.
- ☐ Federal tax data folder has been placed on the top of the audit file.

EDA-80 (R-07/15)

1.2.2.10 CONFIDENTIALITY

"Federal Tax Information (FTI)" obtained under this agreement is subject to specific rules and guidelines to protect and ensure its confidentiality. Those employees having access to the information are responsible for assuring that it is not misplaced, disclosed to unauthorized persons or used in any manner, or for any purpose, not consistent with the authorized use. "FTI" cannot be given to other states or state agencies.

The potential for improper disclosure will be minimized by restricting access to designated personnel. Accordingly, files containing "FTI" **must be** stored in a locked area, desk or cabinet overnight (with keys properly secured). The same security standards apply to all "FTI" regardless of the media on which it is recorded.

To ascertain that adequate controls are being exercised, the IRS conducts on-site reviews of agency safeguards at least once every three years. Any employee with knowledge of a possible violation of confidentiality standards should report it immediately to his/her supervisor.

NOTE: IITA Section 917 contains the confidentially provisions for all information received by the Department from returns filed under the IITA, or from any investigation conducted under the provisions of the IITA. In addition, the confidentiality guidelines for Federal and State tax information, official documents and manuals are specifically outlined in the Department of Revenue Employee's Handbook.

1.2.2.11 CARE OF FTI

FTI in the Audit Work Environment -
When “FTI” is being used, care should be exercised to ensure that it is not left open on desks and unattended during break or lunch periods. When leaving the office, personnel are to make sure all desks and filing cabinets which contain “FTI” are securely locked.

“FTI” furnished to the Department by the IRS continues to be “FTI” subject to safeguarding **even though it is transcribed onto another document**, such as a workpaper or report. Consequently, workpapers meeting this criteria *must* be labeled as “Federal Tax Information” and *must* be retained in the stamped FTI folder with the original information obtained from the IRS.

All users of the “FTI” are responsible for keeping it in the FTI folder. “FTI” may **not** be photocopied. The FTI folder *must* be placed at the top of the audit file. It must be stored in a secured manner at all times to protect its confidentiality. Any audit file containing a FTI folder must be clearly marked to show that the file contains “Federal Tax Information.” The audit file *must* have an 8 ½ by 11 sheet of paper with the statement **“This file contains Federal Tax Information”** placed on top of the audit file.

FTI Taken Outside of the Work Environment -
Employees who take "FTI" out of the office are individually responsible for maintaining its confidentiality. Whenever "FTI" is transported, it should be in a **locked** briefcase and stored in a **locked** trunk and if the vehicle does not have a trunk, the briefcase should be placed out of view and the vehicle locked. Employees who do not return to their office at the end of the day should store **locked** briefcases containing "FTI" in their personal residences.

Employees on overnight travel status should use their discretion in determining the best method of storage for "FTI." Good judgment is imperative, as the employee will be held accountable for any loss, disappearance or theft of "FTI" which is attributable to negligence or carelessness. In the absence of a more secure alternative, employees should store **locked** briefcases containing "FTI" in a **locked** hotel/motel room.

Any time FTI is transported from one location to another, care must be taken to provide safeguards. In the event the material is hand carried by an individual in connection with a trip or in the course of daily activities, it must be kept with that individual and protected from unauthorized disclosures. For example, when not in use, and definitely when the individual is out of the room, the material is to be out of view, preferably in a locked briefcase or suitcase.

FTI Being Shipped or Mailed -
All shipments of FTI (including electronic media and microfilm) must be documented on a transmittal form and monitored to ensure that each shipment is properly and timely received and acknowledged. All FTI transported through UPS must be double sealed; that is one envelope within another envelope. The **inner envelope** should be **marked "CONFIDENTIAL"** with some indication that only the designated official or delegate is authorized to open it. Using sealed boxes serves the same purpose as double sealing envelopes, and prevents anyone from viewing the contents thereof. Please refer to the Income Tax Audit Manual, Chapter 20 for information on Audit File Tracking.

These safeguard requirements cease to apply to any return or return information ONLY to the extent they are disclosed in the course of any judicial or administrative proceeding and to the extent they are made a part of public record thereof.

1.2.2.12 DISPOSAL OF FEDERAL TAX INFORMATION UPON COMPLETION OF USE

If an audit is completed, all the "FTI" should be kept inside the FTI folder and placed at the top of the audit file. When the audit is concluded, the FTI folder is maintained with the audit file indefinitely in the Department's records section. An 8 ½ by 11 sheet of paper with the statement **"This audit file contains Federal Tax Information"** should be placed on top of the audit file. The "Original Federal Income Tax Information" box on the R.O.T. Audit Index (Form SC-135) or the "Fed Tax Info" box on the Income Tax Audit Index (EDA-51) should be checked if the enclosed Federal information was obtained pursuant to a request to the IRS. If the information was obtained from other sources (e.g., copies provided by the taxpayer or the taxpayer's accountant) the box should not be checked.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

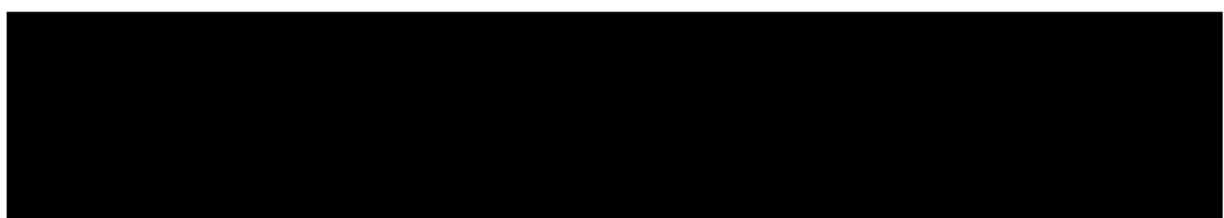
If no audit is ultimately performed using the "FTI," the FTI folder *must* be returned to the Disclosure Officer for shredding at the following address:

Disclosure Officer
Illinois Department of Revenue
101 West Jefferson Street, 1-214
Springfield, IL 62702

The office or unit returning the FTI folder will **not** have the option of shredding the FTI folder. The office or unit returning the FTI folder is *required* to maintain records showing that the FTI folder was returned to the Disclosure Officer. These records *must* be retained for a minimum five years.

1.2.3 GENTAX FEDERAL TAX INFORMATION (FTI) BANNER

As of Monday, February 29, 2016, a new message (below) will be displayed in Gentax when data is presented that contains Federal Tax Information (FTI).



The message will include a link (i.e. click here) to the IRS required procedure (see steps below) that must be followed if the screen is printed. Therefore, it is highly recommended that screens only be printed when absolutely necessary.

If you print a screen from GenTax that has FTI on it, you must take the following steps:

1) Print the IDR-487-G and staple it to the front of the page containing FTI.
2) Complete the Tracking Log and email it to the Disclosure Officer at REV.DisclosureOfficer@illinois.gov immediately.
3) Security measures must be taken for this screen-print by storing it in a secure area such as a locked desk or filing cabinet, vault, locked room, etc. when not being worked. Any document, report, form, or correspondence that is FTI or contains Social Security numbers, banking information, or entity-specific tax return data should be treated as a confidential document and should be secured at all times.
4) Add an entry on the IDR-487-G any time an individual views the FTI information. Each time an individual looks at the information must be documented.
5) When you are finished with the screen-print, it must be destroyed immediately (placed in a blue locked shred bin for destruction). You must email the Disclosure

Officer the log again indicating the date the document was placed in the locked shred bin.

1.2.3 GENERAL INFORMATION

Information received by the Illinois Department of Revenue (IDOR) from taxpayer returns is confidential. As Department employees, auditors are entrusted with the responsibility of maintaining taxpayer confidentiality. Failure to do so may result in discipline up to and including discharge. Additionally, unlawful disclosure of confidential taxpayer information is a criminal offense punishable by a fine or imprisonment or both. Virtually all information concerning a taxpayer is confidential and should not be disclosed except when provided for by specific authorization.

Generally, information from returns may be disclosed only within the Department for official purposes as provided for by official procedures for the collection of any state tax or for an official investigation, including internal investigations of employee misconduct.

The Department’s policy and procedure manuals **(including audit manuals)** are strictly confidential, and their contents may not be disclosed.

Illinois statutes authorize disclosure of Illinois taxpayer returns and return information to the IRS and the tax-collecting arms of other states, provided reciprocal privileges are granted to the Department. Illinois statutes also allow disclosure of certain tax data to qualifying units of local government. A taxpayer or his or her duly authorized representative may review and copy his or her own returns. The Director of Revenue may authorize the release of taxpayer information to various Illinois state agencies. Certain other tax records may also be disclosed at the discretion of the Director.

Public access to many public records is guaranteed by the Freedom of Information Act; however, tax returns and return information are exempt from Freedom of Information Act disclosure, as are the department’s policy and procedure manuals (including audit manuals).

1.2.4 BUSINESS USE OF GENTAX

Auditors must be aware that when signing into the Department's tax system (GENTAX) a warning message appears which details that the user must have a legitimate business use to observe or obtain taxpayer information. The message is as follows:

"Information contained within or generated from the Individual Income Tax and Business Income Tax areas of this system and from the data warehouses contain Federal Tax Information (FTI) that is protected under federal law and may subject you to federal penalties for its misuse. Further, any information contained in GENTAX or received by the department is protected under state law and may subject you to state penalties for its misuse. Unauthorized use of this data is prohibited.

Looking at information that would be considered FTI that you do not have a business purpose for accessing can subject you to fines and possible jail time under federal law. If you disclose taxpayer information to any employee that does not have a business purpose for the information or to someone outside of the department, you can be subject to fines and possible jail time at both the federal and state level. In any situation described above, you may be subject to disciplinary action up to and including discharge. See the details of the potential legal penalties below.

Inspection of taxpayer information received from the federal government except as expressly authorized by federal law may subject you to a fine of up to $1,000 and imprisonment of up to one year. Unauthorized disclosure of taxpayer information received from the federal government may subject you to a fine of up to $5,000 and imprisonment of up to 5 years under federal law. Unauthorized disclosure of any taxpayer information may subject you to a fine of up to $2,000 and imprisonment of up to one year under Illinois law.

Your use of this system will be monitored to assure compliance with the laws. By clicking "Logon" on the Login page you are consenting to the monitoring of your activity on the system.

Unauthorized access or disclosure should be reported immediately to your supervisor and the Disclosure Office at 217-524-7738. Your supervisor must report the incident to Internal Affairs at 217-782-3151 once notified."

1.2.5 USE OF CELL PHONES, CAMERAS, PDAS AND VIDEO EQUIPMENT

The Audit Bureau recognizes that cell phones and personal communications devices have become valuable tools in managing our professional and personal lives. However, use of these devices in the workplace can raise a number of issues involving safety, security, and privacy. To safeguard its confidential information and to reduce the opportunities for illegal harassment, the Audit Bureau and other sections are regulating the use of electronic equipment used to capture images such as camera phones, camera PDAs, video equipment, cameras, handheld scanners, flash drives, and any other device capable of capturing or storing an image or data in its facilities. This policy does not apply to equipment without imaging capabilities. Therefore, Account Processing, Information Technology, Collections, Audit and Taxpayer Services have adopted the following rules regarding the use of such personal devices in the workplace during working hours.

1. Except in cases of emergency, reasonable time for union stewards to engage in union business, and matters which cannot reasonably be attended to during your break time or lunch, employees should conduct non-departmental business during lunch and breaks. Use of personal cell phones, texting devices or personal communication devices even under these exceptions should occur away from the work area so the devices are not out around confidential information or so as not to disturb co-workers.

This includes the use of personal devices (including cell phones) for personal business (including but not limited to personal phone conversations and text messages, personal e-mails, and use of the Internet for personal reasons). Employees should be considerate of their co-workers and keep ring tones and alerts on vibrate or silent while at work. Personal phone calls made during an employee's lunch or break period should be made away from any work area so as not to be out around confidential information or so as not to disturb co-workers.

2. When attending a meeting with customers, clients, or co-workers, employees should turn off or silence their personal cell phones and personal communications devices. Except in extraordinary circumstances (e.g., family emergency), employees may not respond to personal calls during a meeting.

3. Employees are prohibited from using any electronic device's camera to take photographs in the workplace without permission from Internal Affairs. Phones and other devices with cameras or recording capabilities are strictly prohibited from being out in all Account Processing, Information Technology, Collections, Audit and Taxpayer Services work areas in order to protect confidential documents. Camera phones and other devices with photographic or recording capabilities may not be used in restrooms, locker rooms, nursing mother's room, or other private areas in the workplace.

4. Personal cell phones with cameras and other devices with cameras or recording capabilities shall not be left out on a desk in Account Processing, Information Technology, Collections, Audit or Taxpayer Services, and shall be holstered with the camera covered or put away while in Information Technology, Account Processing, Collections, Audit or Taxpayer Services, such as in a desk drawer, brief case, purse or pocket.

5. Unauthorized use of the camera function on any electronic device on Illinois Department of Revenue property is strictly prohibited, and any violation will be grounds for discipline up to and including discharge.

6. Any person using a personal cell phone with a camera or other personal devices with cameras or recording capabilities within the jurisdictions of the Illinois Department of Revenue for photographing, copying, recording or by any means accessing taxpayer, Department, co-worker or any other information without a specific work related purpose or authorization, are subject to discipline up to and including discharge.

Employees are to report any violations of this policy immediately to their supervisor. Supervisors are to report immediately any violations of this policy to the Program Administrator, or their designee, who in turn may notify Internal Affairs.

Employee's electronic devices that are brought into Account Processing, Information Technology, Collections, Audit or Taxpayer Services work area are subject to inspection by

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Internal Affairs if the Department has reasonable cause to believe a picture or other recording may have been made with the device, to ensure compliance with this policy. Any unauthorized recording taken or present relating to the Department is considered Department Property. Any recordings found in violation of this policy are subject to confiscation.

The handbook sets forth the policies for the entire Department. Program Area Directives provide the policies applicable to a program area, division, bureau or unit as designated in that directive. Program Area Directives and Handbook Policies should be read and construed together to give full force and effect to all directives and policies. However, Program Area Directives approved by the Director take precedence over the Handbook to the extent there is any conflict.

Violation of this policy may result in discipline, up to and including discharge.

1.3 GENERAL AUDIT POLICIES

Audit contact is of great importance to efficient administration of Illinois tax laws. Audit activity helps to insure that taxpayers pay their correct tax liability, detects and aids in the timely correction of reporting errors and promotes the timely filing of returns. In addition, audit contacts are responsible for a large portion of self-assessed tax that would not otherwise have been paid without this improved reporting. Department management has the responsibility to carry out the policies set forth in this manual. They will issue necessary instructions to implement policies.

1.3.1 PURPOSE OF AUDIT ACTIVITY

The taxes administered by the Department require self-assessment by the taxpayer. An audit program is essential to provide for the following objectives:

1. Promote voluntary compliance and deter tax evasion at minimum cost through systematic selection of accounts and efficient compliance techniques.
2. Educate taxpayers to insure proper completion and filing of various tax returns.
3. Administer fair and equitable treatment of overpayments and refunds, as well as deficiencies and delinquencies.

1.3.2 TAXPAYER RELATIONS

All taxpayers are entitled to equitable treatment under the law. Many legal issues are involved in the administration and enforcement of the Revenue Acts which govern the activity of the Department of Revenue.

It is in the best interest of the Department that the auditor always remember to be of service to the taxpayer. In many cases, the auditor will be the only representative of the Department with whom the taxpayer will have personal contact. Most taxpayers are fully cooperative even

though tax matters are seldom regarded as welcome aspects of business activities. The auditor's objective with the few taxpayers who do not, or will not, recognize their responsibilities, is to make a courteous but persistent effort to bring them into compliance.

During all work activities the Department expects the auditor's conduct to be beyond reproach. It is important that careful attention be given to presenting a neat and professional appearance when calling on taxpayers, or at any time when in the public view, performing official state business. The impression that an auditor makes on taxpayers will be determined not only by personal conduct and appearance, but also by a thorough knowledge of all Revenue Rules and Regulations and the manner in which they are applied.

There is never an occasion for audit personnel to harass taxpayers or to impress them with the thought that the objective is to find something wrong. The taxpayer should be assured that an auditor's function is to determine whether the correct amount of tax has been reported. The auditor is expected to aid the taxpayer in gaining a correct understanding of the law and should demonstrate that the Department is willing to acknowledge overpayments or errors which benefit the taxpayer. Care should be taken to inform taxpayers of their rights and privileges. Keep in mind it is the Department's policy to administer the law fairly and uniformly, with minimum inconvenience to taxpayers' business affairs.

1.3.3 CREDENTIALS

All auditors have been provided with official Department credentials. **Present them to every taxpayer for positive identification before asking to see any books and records**. Credentials are for official use only. Any unauthorized use may result in disciplinary action.

If an auditor's credentials are lost or stolen, the auditor must immediately notify his or her supervisor. The supervisor will contact and notify the Personnel Office and the Internal Affairs Office. The auditor will be required to complete form **RPS-53, Badge Replacement Application.**

1.3.4 PROFESSIONALISM

Auditors are engaged in professional assignments and are asked to exercise the highest skills and impartial judgments while performing their official duties. The assignments should be worked in accordance with approved procedures and techniques. Under all circumstances, auditors are expected to observe the rules of conduct of profession and to perform the duties with dignity and courtesy.

1.3.5 COOPERATION WITHIN AGENCY

Revenue Collection Officers, Revenue Auditors and Criminal Investigators are encouraged to exchange information. When auditors anticipate an unagreed or an agreed audit without payment, the financial data secured during the audit must be documented on form EDA-8-A.

Similarly, the Collection Officer may be able to provide information about previous dealings with a taxpayer. Likewise, auditors should always be cognizant of potential violations involving fraud or potential criminal activities. The auditor's observations and findings should be discussed with Investigations personnel. Communication and coordination between Collections, Audits, and Investigations can save time and improve overall compliance.

1.3.6 DEPARTMENT PROPERTY

In order to perform the duties of an auditor, Department property such as ~~manuals,~~ credentials and equipment will be assigned to the auditor. Auditors are responsible for maintaining all Department property assigned to them and will be required to return it when leaving the Audit Bureau.

Promptly report the loss or theft of any State property (e.g. laptop computer) to the Revenue Audit Supervisor. Auditors must also report the loss or mutilation of any official record or document such as tax returns, informal letters, or audit reports and must report damage or loss of state equipment such as state vehicles or office machines. The Revenue Audit Supervisor will contact and notify the Internal Affairs Office.

1.3.7 PUBLIC SPEAKING POLICY

Department personnel are not allowed to make public appearances on behalf of the Department until they are cleared for such assignments by the Director or his/her designee. All requests for audit personnel to speak should be routed through the Program Administrator

1.3.8 WRITTEN OPINIONS

Verbal opinions from Department employees are not binding on the Department. 86 Ill. Adm. Code 130.1001(a), When Opinions from the Department are Binding, states the following:

"Taxpayers may not rely on verbal opinions from Department employees. For Department rules concerning the binding effect of Private Letter Rulings and General Information Letters, see 2 Ill. Adm. Code 1200."

The Department issues two types of letter rulings; Private Letter Rulings and General Information Letters.

Private Letter Rulings ("PLRs") are issued by the Department in response to specific taxpayer inquiries concerning the application of a tax statute or rule to a particular fact situation. A PLR is binding on the Department, but only as to the taxpayer who is the subject of the request for ruling and only to the extent the facts recited in the PLR are correct and complete. For that reason, it is the policy of the Department that written opinions regarding laws administered by the Department are to be rendered only by the Legal Services Bureau.

Persons seeking PLRs must comply with the procedures for PLRs found in the Department's regulations at 2 Ill. Adm. Code 1200.110.

Beginning July 1, 2002, every private letter ruling is revoked on the date that is 10 years after the date of issuance of the ruling or July 1, 2002, whichever is later. No ruling may be cited or relied upon for any purpose after the date of its revocation, and the ruling will cease to bind the Department after the date of revocation. Taxpayers, entitled to rely on the opinion contained in a particular letter ruling, must apply for a new letter ruling prior to the aforementioned revocation date. For more information see 2 Ill. Adm. Code 1200.110. Each PLR contains a paragraph explaining that the Private Letter Ruling is revoked and will cease to bind the Department 10 years after the date of that letter.

The purpose of a General Information Letter ("GIL") is to direct taxpayers to Department regulations or other sources of information regarding the topic about which they have inquired. A GIL is not a statement of Department policy and is not binding on the Department. (2 Ill. Adm. Code 1200.120.)

These letter rulings are published and are available on the Department's website. Taxpayer and business names are removed from the letters before they are published and are only available for the 10 year period. Auditors are not to give taxpayers letter rulings which have other taxpayer names in them or are older than 10 years.

1.3.9 CARE OF TAXPAYER RECORDS

Extreme care should be taken with respect to the books and records and other material presented by taxpayers for examination. Auditors should not write or mark on original documents and records presented to them by the taxpayer. Auditors should always return all records to the taxpayer when they have finished reviewing them. The examination of the records should not prevent the taxpayer from conducting normal business operations. If a taxpayer allows an auditor to remove records from the normal place of business, then the auditor must give the taxpayer a receipt at the time they are removed. The auditor must also ask for a receipt when returning the records.

1.3.10 AUDIT FILE TRACKING PROCEDURES

A. Mailing of Audits to Revenue Offices:

It is the Department's policy that the mailing of audit files be processed through UPS. When an audit file is sent through UPS, a tracking number with expected date of delivery should be obtained. This information (any tracking number and expected delivery date) should be included in the email required when mailing an audit file.

Note: This shipping/mailing policy provides for the use of the UPS on-line account established for the Audit Bureau at the Department of Revenue. When this shipping account is used, the sender needs to put their name on the shipment as "sender". This provides quick

verification for the Department when reviewing the UPS bills that have been charged to the Audit Bureau/Department.

Auditors should **not** ship items via overnight or next day air. The only exception to this is if a file has to be sent due to statute issues, or a computer needs to be exchanged. With these two exceptions, all other shipping should be done by ground transportation.

In order to use the UPS on-line account, the auditor must do the following:

1) Go to www.ups.com to begin the process.
2) By registering a user ID and password on this site, the auditor can ship on account numbers already established for the Audit Bureau. These account numbers are

   When either shipping account is used, the sender (auditor) needs to put their name on the shipment as "sender".

   When registering, the auditor will be able to save to an address book, making future shipments to the same recipients quicker and easier.
3) When setting up the account to access these Shipper Numbers, there will be some information required that the auditor will not know. The auditor will be asked for information linked to the specific account that is being accessed. The auditor must call at so that can provide the proper information required.

   Beth receives a weekly billing for each of the accounts that are used by the staff in the Audit Bureau. She monitors and reviews all activity on these bills to make sure all charges are legitimate and then denies or approves for processing. Thus, in using these accounts the auditor should not see an actual bill or have to pay for it out of pocket. And, no one should be using the accounts for anything other than Department of Revenue business.
4) Once the online form is completed, the auditor should print out a label and affix it to the package. A pickup can be requested or the package can be taken to a UPS location.

Proper shipping procedures **must** be followed. Any taxpayer information being mailed / shipped should be double sealed. Documents must be placed in an envelope (or box, if needed) and then sealed prior to being placed in the mailing box for shipment. This inner packaging needs to be labeled "Confidential". The shipping address information must be included on the inner packaging. If the mailed box is damaged during shipment, the 2nd seal and inner address information provides additional security.

Note: When packaging audits for shipment, it is essential that each audit be **individually** sealed and properly labeled before being placed in the shipping box. This allows for easier identification, by both the sender and the receiver, as to the audits in that shipment. All audit

files must be marked as CONFIDENTIAL and double sealed per IRS Publication 1075, Section 4.5.

B. Audit Movement between Revenue Offices:

Whenever an audit file is sent or transported between two Revenue offices, an email is required stating the date that said audit is being sent. This email should have the scanned transmittal attached.

The receiving office should then email a response back to the sender when the audit is in their possession. This email trail is required to ensure that audits can be properly tracked between these offices.

All audit files must be marked as CONFIDENTIAL and double sealed per IRS Publication 1075, Section 4.5. The package should be taken to the mail room with instructions that the package is to be mailed via **UPS**. Audits containing Federal Tax Information or State Tax Information (FTI/STI) are no longer allowed to be sent via the CMS truck.

Delivery may take up to ten (10) business days depending on the mailing location.

C. Determination that an Audit File is Missing:

If the audit file fails to reach the intended recipient within the expected delivery date(s) as stated in the email, the intended recipient should first verify with the sender that the audit file in question was actually sent on the date originally intended. After such confirmation, the intended recipient should email the appropriate Supervisor, Assistant Division Manager (ADM) and Division Manager (DM) that the audit file was not received and is missing.

Once it is determined that the file is missing, the Program Administrator, the Director (of Revenue) and Internal Affairs will need to be contacted about this matter. The Division Manager, who is over the staff that sent the audit file, will be responsible for informing the Program Administrator, and then the Director and Internal Affairs that an audit file is missing. The Division Manager will then need to contact the Department's Disclosure Officer for proper notification of the IRS and the Treasury Inspector General for Tax Administration based on the following:

Any file that has been determined to be missing that may contain confidential Federal Taxable Information (FTI) will require **immediate** notification to:

(1) The IRS, through the Disclosure Officer, under the provisions of IRC Code (26 U.S. Code Section 6103(a)) as documented in IRS Publication 1075, Section 4.5. The Director and Internal Affairs will also need to be informed that this missing file may contain FTI.

(2) The office of the appropriate Special Agent-in-Charge, Treasury Inspector General for Tax Administration (TIGTA), also through the Disclosure Officer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The TIGTA Field Division serving Illinois is located in Chicago with the contact phone # (312) 886-0620 X 104.
- Mailing address: Treasury Inspector General for Tax Administration, Ben Franklin Station, and P.O. Box 589, Washington, DC 20044-0589.
- Complete procedural details for TIGTA and IRS notification should be followed at http://www.irs.gov/uac/Reporting-Improper-Inspections-or-Disclosures
    - Per these notification details, the IRS and TIGTA need to be contacted immediately, but no later than 24 hours after identification of a possible issue involving FTI. The affected agency should not wait to conduct an internal investigation to determine if FTI was involved. If FTI may have been involved, the agency must contact the IRS and TIGTA immediately.
    - The Division Manager should be the party responsible for writing the Data Incident Report required by the IRS (see link above). However, the Disclosure Officer should be the contact person for the IRS and TIGTA.

If it is later determined that no FTI was in the file, the Disclosure Officer would need to be informed so that proper notification is made to the IRS and TIGTA.

Note: Although this section addresses when an audit file is missing, it is important to realize that FTI may be contained in other Department documentation beyond just an audit file. The above procedure should be utilized with any lost (or missing) FTI.

D. Audit Transmittal Form in GenTax:

It is important to realize that not all audit staff may have rights in GenTax for changing the audit stage or generating an Audit Bureau transmittal form. Auditors conducting the audits cannot generate the “Bureau Transmittal Form”. This report can **only** be generated by those staff members whose responsibilities include changing the Audit Stage on the Audit Springboard.

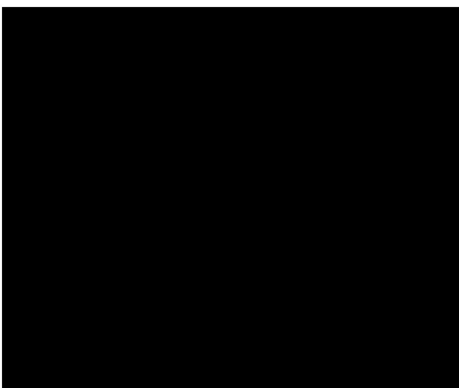
1. CHANGING THE AUDIT STAGE IN GENTAX

Before an Audit Bureau Transmittal form can be generated in GenTax, the audit stage **must** be changed first. The stage would be changed to reflect where or to whom the documents are being moved / mailed to.

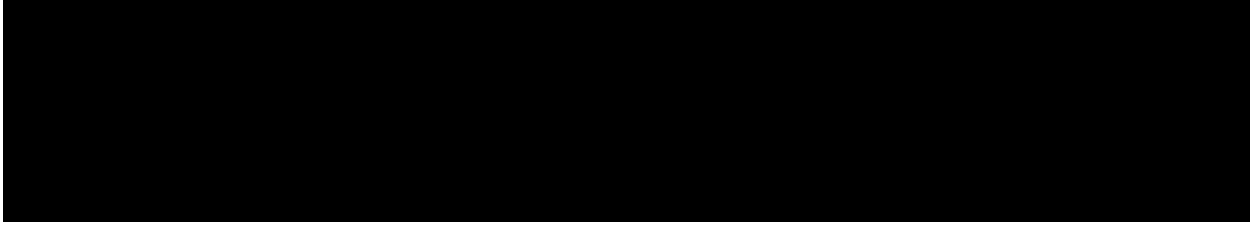
2. GENERATING THE AUDIT BUREAU TRANSMITTAL FORM

The Audit Bureau Transmittal Form is a descriptive listing of the audit files that are being moved (or mailed). This form can be generated (and saved) within GenTax in

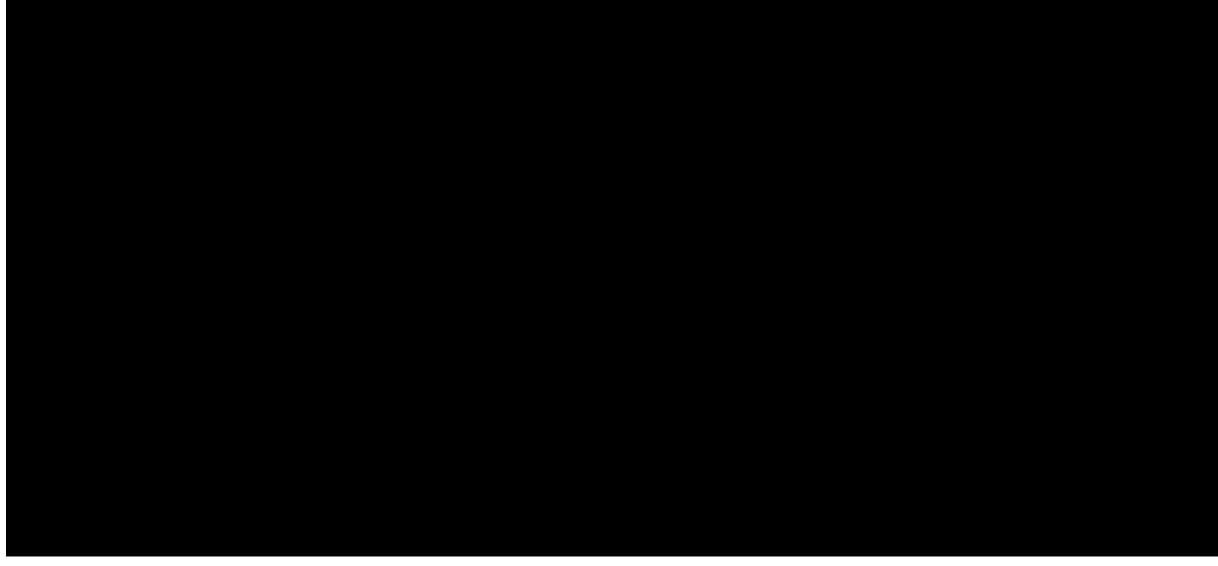
the Report Manager and should be used when sending audit files. Click on the Report Manager icon in the New Manager to open.



Click on the “Report List” Tab. By entering “bureau transmittal” in the green search line (then hit enter), the Bureau Transmittal Form will show under *Title*. Click on that form title.



The Bureau Transmittal Form Details box will open allowing for information to be entered for generating the transmittal form.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- The “From” box allows free form typing to enter either the person or area sending the audit files.
- The “To” box has a drop down listing of different areas. The most appropriate area should be chosen. Examples would be - to “Audit Review MC 3-355” when sending audits in from the field, or to “Field Office” when returning audits for field correction.
- In the “Stage” box drop down, the appropriate stage should be selected. The audit stage appearing in GenTax must match the stage being selected in the transmittal “Stage” box, in order for that particular audit information to appear on the transmittal. Example: the stage “Passed to Clerical” (a new drop down choice) may be used when sending audits to the individuals (Chicago/East Coast staff) who enter the PROD-1s, then the stage would be changed to “Transmitted to Technical Review” when shipped on to Springfield.
- The “Date change From” and “Date change To” boxes should be the date the transmittal is being completed (or if started one day (from) and completed the next (to)). It is **important** that the day that the transmittal is being generated, is the same day that the audits will be mailed (or moved). The required email must also be sent that same day.
- In the “Tax Groups” box, either Income Taxes, or Sales and Misc Taxes should be selected dependent on the tax type.
- The “Account Type” box provides a listing of tax forms and adjustments, but will not be accessed if either Income Taxes, or Sales and Miscellaneous Taxes have been selected in the “Tax Groups” box.
- The “Poster” box has an entire listing of audit staff. The person who changed the stage in GenTax (and who is also generating the transmittal) will be the “poster”.

Once the boxes have been filled, click on the “Generate” tab to generate the transmittal.

The completed transmittal form should appear on the screen. Select the appropriate printer and print two copies. One copy goes in the shipping box with the audit files, and the other is retained for a record of shipping.

If multiple audits are being mailed in more than one box, cases listed on each transmittal should correspond only with the contents of each respective box.

The transmittal can also be "exported" as a pdf and attached to an email. Since an email is required per this procedure, attaching the transmittal (as a pdf) informs the receiver as to what audit files should appear in the shipment. The transmittal can also be saved to an electronic file, if desired.

Note: It cannot be stressed enough that to ensure accurate tracking of audit files, the stage in GenTax must be changed before the transmittal is generated.

1.3.11 ACH CREDIT PAYMENTS

ACH Credit is an electronic payment method in which the taxpayer instructs their financial institution to transfer funds from their account to the Department's account. The tax payment received by the Department is then applied to the taxpayer's tax liability. For taxpayers who are paying audit liabilities electronically, this is the preferred method for electronic payments.

In order for the taxpayer to pay audit liabilities using ACH Credit, the following information should be provided: (**Note: The Treasurer's Office has asked that the bank account information not be placed in unencrypted e-mails going outside the IDOR firewall. Therefore, the ACH Transaction Detail listed below is not to be e-mailed to taxpayers.**)

ACH Transaction Detail Instructions:

Format:
Bank Name:
Routing Number:
Account Name:
Account Number:

Addenda Info:

In the addenda record there is room for 40 characters of identifying information. The first four spaces should be used for the last four digits of the Treasurer's Clearing account number. **The last four digits of this account number are . Enter these four digits in the first four spaces.** The next space should be left blank. The remaining 35 spaces can be used to identify the taxpayer originating the ACH. See the example below for a properly formatted addenda.

Example

ABC Services Company International

In this example, the "[redacted]" represents the receiving agency's clearing account number and "ABC Services Company International" represents the name of the vendor (taxpayer) originating the ACH.

Once the taxpayer is given the ACH Credit information, the auditor will need to know the exact amount of the payment that will be submitted and the date the payment will be submitted (the settlement date) for the payment.

The auditor must send an e-mail addressed to the following people immediately after being notified from the taxpayer of the payment amount and the date the payment will be submitted. This needs to be done to guarantee that the payment will post correctly on GenTax. This also needs to be done for investment purposes.

Address the e-mail to:

- [redacted] (IDOR Financial Control)
- [redacted] (IDOR Financial Control)
- The Audit Perfection Supervisor for Income Tax or the Audit Review and Perfection Supervisor for Sales Tax. (This supervisor will check Gentax to ensure that the payment was posted and applied appropriately).
- The auditor's own supervisor

The e-mail must contain the following information:

- E-mail subject line: Audit payment submitted by ACH Credit

- The text of the e-mail:

Identify the taxpayer: give the taxpayer's name exactly as shown on GenTax, the taxpayer's address, the tax type for which the payment is being made (income tax, withholding tax or sales tax), provide the account ID and provide the Audit ID number.

State the exact amount of the audit payment that was made.
Provide the date the payment will be submitted (the settlement date) as provided by the taxpayer.

State the APE (income tax) or period (sales tax) for which the payment was made. Also, give the correct APE or audit period to identify where this payment should be posted. If the payment is for multiple APEs or audit periods be sure to clearly identify the amounts and APEs or audit periods for which the payments should be applied.

Request that a reply be sent confirming that the payment has been correctly posted.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In the audit file, the auditor should provide a copy of the e-mail sent and copies of any replies received based on this e-mail.

As mentioned above, ACH Credit is the method of payment for audit liabilities. If the taxpayer is not able to use ACH Credit, the Treasurer's Office must be contacted for approval of a Wire Transfer. The auditor or Revenue Auditor Supervisor must contact the ROT Technical Review and Audit Perfection Supervisor for Sales Tax or the Income Tax Perfection Supervisor for Income Tax regarding Wire Transfers.

Please contact Technical Support with any questions concerning ACH Credit payments.

1.3.12 RECEIPT OF A SUMMONS OR OTHER LEGAL DOCUMENT

In order to preserve the Department of Revenue's legal rights, all personnel who receive a summons or any other legal document pertaining to Department business must notify a Supervisor of receipt. The document must be forwarded to the Director's office (Chicago or Springfield) immediately. Any summons received in regard to personal affairs such as jury duty, wage garnishment, etc., should be forwarded through normal channels.

1.3.13 INTERNET USAGE

State of Illinois computer systems are for government use and not for personal use. The policy of the Illinois Department of Revenue is to promote internet use that enables employees to perform Department missions and encourages its employees, volunteers, and contractor personnel to develop internet skills and knowledge. The entire IDOR Internet policy can be found on the Department's Sp-IDOR Web intranet under "Core Resources" - "Policy & Procedures".

The following Department users are covered by this policy:

- Full or part-time employees of the Illinois Department of Revenue.
- Volunteers who are authorized to use Department resources to access the internet.
- Department contractors who are authorized to use government-owned equipment or facilities.

When certain criteria are met, Department users are permitted to engage in the following activities:

- During work hours, access job-related information, as needed, to meet the requirements of their jobs.

- During working hours, participate in news groups, chat sessions, email discussion groups, and list servers, provided these sessions have a direct relationship to the user's job with the Department. Only those employees or officials who are expressly authorized to speak

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

to the media or to the public on behalf of the Department may represent the Department within any news group or chat room. Other personnel may participate in news groups or chat rooms in the course of business when relevant to their duties, but they must do so as individuals speaking for themselves and must include a disclaimer in their comments similar to the following: "This contains the thoughts and opinions of (employee name) and does not represent the official policy of the Illinois Department of Revenue."

RESTRICTIONS

The following uses of the internet, either during work hours or personal time, using Department equipment or facilities, are not allowed:

- Access, retrieve, or print text and graphics information which exceeds the bounds of generally accepted standards of good taste and ethics. For example, accessing, posting or sharing any racist, sexist, threatening, obscene, erotic and pornographic, or otherwise objectionable material (i.e., visual, textual, or auditory entity) is strictly prohibited.

- Engage in any unlawful activities or any other activities that would in any way bring discredit to the Illinois Department of Revenue.

- Engage in personal commercial activities on the internet, including offering services or merchandise for sale or ordering services or merchandise from on-line vendors.

- Engage in any activity that would compromise the security of any government host computer. Host log-in passwords will not be disclosed or shared with other users.

- Engage in any fund-raising activity, endorse any product or services, participate in any lobbying activity, or engage in any active political activity. Active political activity includes utilizing the internet in any fashion to promote or support a candidate for political office. This activity may be distinguished from accessing a web page that may be sponsored by a political organization in order to obtain information relevant to an employee's duties. For example, it is permissible to access the campaign web site of a member of the Illinois General Assembly in order to obtain information concerning a taxing proposal of the member.

- Employees must not intentionally use the internet facilities to disable, impair, or overload performances of any computer system or network, or to circumvent any system intended to protect the privacy or security of another user.

- Engage in any type of internet-based gaming activity.

It is expected that employees will use the internet as part of their official duties; to improve their job knowledge; to access tax, technical, and other information topics that have relevance to the Department; and to communicate with their peers in other government agencies, academia, and industry. Users should be aware that when access is accomplished

using internet addresses and domain names registered to the Illinois Department of Revenue, they might be perceived by others to represent the Department. Users are advised not to use the internet for any purpose that would reflect negatively on the Department or its employees.

1.4 REVENUE AUDITOR STANDARDS AND PERFORMANCE EVALUATIONS

1.4.1 JOB KNOWLEDGE

Knowledge of duties and responsibilities as required for current job or position.

Standard: Utilizes accounting, auditing and financial skills to examine records, conduct interviews, develop facts, and prepare audit schedules. Displays knowledge in and keeps current with changes in the tax law, regulations, rulings, bulletins, and procedures. Has a working knowledge of independent research sources. Understands and fully develops audit controls. Displays knowledge and skills in computer functions, operations, applications, usage and management information systems to assure the proper examination of books and records. Demonstrates ability to understand business principles, law and operations in making decisions. Makes appropriate judgments which are based upon facts utilizing the skills expected for the position. Knows the duties and responsibilities as required for the current position and current developments that relate to the position.

1.4.2 PRODUCTIVITY

Amount of work generated and completed successfully as compared to amount of work expected for this job or position.

Standard: New, productive and significant issues are being raised and developed. Displays resourcefulness when developing issues and arriving at a correct determination of tax due. Makes valid audit referrals disclosing additional liabilities with appropriate documentation. Tasks and special assignments are accomplished with the desired results. Audit turnover is reasonable considering assignments. Hours on cases and the amount of work successfully completed when compared to others doing similar work and when compared to the objectives established.

1.4.3 QUALITY

Correctness, completeness, accuracy and economy of work.

Standard: Audits are technically and procedurally correct, using proper audit procedures and applications of the tax laws. Audits contain sufficient detail and work papers to show correctness of determination. The work product is neat, logical, clear, concise, and supports the conclusion and correctness of the determination. Work is logically organized and systematic with adequate cross references, detailing, labeling, and source identification. Necessary processing documents are included in the file and properly prepared. Areas of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

non-compliance have not been overlooked. Legal interpretations are appropriate and consistent with Department policy. Frequency of returned audits is within reasonable limits considering experience, complexity of assignments and level of audit turnover.

1.4.4 INITIATIVE

Self-motivation, amount of direction required, seeks improved methods and techniques, consistence in trying to do better.

Standard: Ability to be effective when working independently. Maintains updated audit manuals, bulletins, procedures, etc. Develops and utilizes independent research sources. Accepts diverse assignments with a positive attitude. Is adaptable and accepts changes. Contributes to the improvement of the Department operation. Demonstrates a sense of responsibility regardless of the assignment. Accepts and performs travel responsibilities as required and assigned in a timely manner. Takes steps to keep current with changes in technology and procedure changes when necessary.

1.4.5 USE OF TIME

Uses available time wisely—is punctual reporting to work—accomplishes required work on or ahead of schedule.

Standard: Ability to keep schedule full, keeping office time to an acceptable level. Audit schedules are necessary, suit the purpose intended and utilize Department developed programs whenever practical. Displays efficient utilization of audit time. Determines proper audit methods, techniques, and procedures to pursue in accomplishing audits, including means of verification, test periods, and extent of test checking. Spends time pursuing significant issues versus insignificant issues. Does not disrupt others when completing assignments in office. Individual is punctual and leave time is scheduled according to Department guidelines. Displays proper application of auditing tools and techniques.

1.4.6 PLANNING

Sets realistic objectives—anticipates and prepares for future requirements-establishes logical priorities.

Standard: Prioritizes assignments in accordance with Department guidelines or needs. Avoids excess aging of assigned cases. Exercises proper control over the statutes of limitations of cases assigned. Avoids excessive time lapses on work in process. Deadlines are established and monitored. Prepares adequate work plan to make a quality examination. Performs pre-audit research to ensure effective utilization of time on significant issues. Requests payment verification and compliance information so that completed assignments may be submitted without delay.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.4.7 FOLLOW-UP

Maintains control of workloads—allocates resources economically—insures that assignments are submitted timely and accurately.

Standard: Audits are timely submitted upon finalization with the taxpayer. Thorough audit history worksheets are in all audits submitted. Adheres to deadlines established in work plan schedules. Log in/log out sheets are completed daily. Submit timesheets and travel vouchers on a timely basis. Postings to the Outlook calendar are also timely. Accurately and completely documents all actions taken on each case. Document requests are included in the audit file. Written reports clearly state the facts, describe the circumstances and clearly reflect the Department's position and procedures used. Unusual items and items of any controversy are well documented and explained in detail. Completed work is thorough.

1.4.8 HUMAN RELATIONS

Establishes and maintains cordial work climate—promotes harmony and enthusiasm—displays sincere interest in assisting other employees.

Standard: Is courteous and helpful in personal contacts displaying a sincere interest in assisting others. Is neat in personal appearance and dressed appropriately for the situation. Valid complaints from others are infrequent. Employs effective personal communication skills which are successful in obtaining the desired results without unwanted confrontation. Exercises skill and control in stressful situations. Contributes to improvement of Department operations enhancing the image of the Department. Is a positive force in enlisting the cooperation of others in facilitating change. Displays a professional and ethical approach in interacting with taxpayers and other workers.

1.4.9 LEADERSHIP

Sets high standards—provides good managerial example—encourages subordinates to perform efficiently—communicates effectively.

Standard: Provides leadership by example. Exhibits the ability to plan, organize and supervise the activities of an assigned team of Revenue Auditors engaged in performing complex assignments. Exhibits the ability to accomplish tasks and accepts additional responsibilities to a high degree through cooperation. Makes sound and logical decisions. Has gained the respect and trust of fellow workers and taxpayers. Acts in a professional manner and instills the confidence of others. Employs two way communication skills listening as well as talking. Keeps superiors informed of critical issues and developments.

1.4.10 SUBORDINATE DEVELOPMENT

Helps subordinates plan career development—trains potential replacements—gives guidance and counsel.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Standard: Cooperates in subordinate development and training. Shows a high degree of interest in helping others. Effectively functions as lead auditor. Acts as an instructor when required developing training programs, materials and making presentations. Supplies advice and feedback to others when necessary. Accurately evaluates and critiques the performance of trainees and assigned subordinates when asked. Needs of trainees and assigned subordinates are determined and action is taken to initiate personal growth and improvement. Encourages growth through open communication.

1.4.11 POLICY ON PERFORMANCE EVALUATIONS

It is the policy of the Illinois Department of Revenue and the Audit Bureau to conduct periodic, which includes quarterly and annual, employee evaluations on an employee's performance.

Written evaluations shall be prepared by the immediate supervisor and/or an employee in the same or higher position classification which has historically performed such evaluations who either has first-hand knowledge of the employee's work or has discussed and received recommendations from someone who does and reviewed by the ADM prior to discussing with the employee. The evaluation shall be limited to the employee's performance of the duties assigned and factors related thereto. The evaluation shall be discussed with the employee, and the employee shall be given a copy immediately after completion and shall sign the evaluation as recognition of having read it.

The performance evaluation will be reviewed and may be adjusted by upper levels of supervision. Any adjustments will be discussed with the employee.

The benefits of the evaluation process are as follows:

- The evaluation provides counseling helpful to the employee in becoming more effective and more valuable to the organization.
- It provides the basis for legitimate commendation and recognition; and
- It identifies goals and objectives that the employee and supervisor set together.

The Audit Bureau can improve the evaluation system by:

- Becoming more uniform in application of job standards;
- Reaching an understanding of expectations through communication between the supervisor and the auditor;
- Providing a means of recognition for work well done, and
- Helping an employee to improve in areas where necessary.

The forms to be used in the evaluation process are:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Performance Evaluation Form (CMS-201) and attachments
- Completed Audit Evaluations (EDA-72)
- Field Visitation Worksheet (EDA-73)
- Performance Improvement Plan memorandum (if applicable)

The evaluation process consists of the following steps:

- Set and communicate appropriate objectives.
- Prepare a list of objectives with employee. Discuss work objectives for the evaluation period.
- Approve plans of action for achieving work objectives and review with higher management.
- Review progress. Make adjustments as required. Provide coaching and assistance.
- Do quarterly reviews, providing feedback to improve performance.
- Evaluate performance and results for annual appraisal using form CMS-201 INDIVIDUAL DEVELOPMENT AND PERFORMANCE SYSTEM. Prepare list of objectives for next period.

Supervisors must follow the general guidelines on the CMS-201 in completing the evaluation. The supervisor and employee should complete the evaluation together and develop new objectives consistent with the needs of the employee and the Department.

The standards defined in Sections 1.4.1 through 1.4.10 describe the criteria on which a Revenue Auditor will be evaluated. Each supervisor is responsible for effectively communicating these standards to his/her staff members. Each standard is designed to provide the supervisor with objective measurable criteria from which the performance of the employee can be evaluated. Revenue Auditor IIIs will also be rated in areas 9 and 10 (leadership and subordinate development).

The evaluation process provides for the comparison of actual employee performance to an objective standard over the entire 12 month evaluation period. The supervisor's work file should be examined along with other pertinent information. The auditor's performance should be discussed in comparison to the standard and other specifics to arrive at a mutual understanding.

A field Revenue Audit Supervisor must document the auditors' performance on specific audit assignments during the year. There are two forms provided for these purposes: 1) Completed Audit Evaluation (EDA-72) and 2) Field Visitation Report (EDA-73).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The EDA-72, Completed Audit Evaluation Worksheet, is to be completed by the supervisor on every audit assignment completed by the auditor. On team audits, assisting auditors should receive evaluations where significant time has been charged. The supervisor retains a copy and sends a copy to the auditor for review and to provide any comments about the evaluation.

The EDA-73, Field Visitation Worksheet, should be completed once a month in conjunction with all field visits to the auditors. The EDA-73 should be completed at the time of the visit. The auditor should sign the form and receive a copy. This is not intended to limit the documentation to field visits or completed cases. Field auditor Log in/log out sheets, timesheets, Audit Review correspondence, taxpayer questionnaires, e-mail and other documented communications, etc., should also be sources of documentation used for performance evaluations.

The EDA-72 and the EDA-73 should be included in the supervisor's file and not included in the completed audit file.

Exit evaluations are also conducted for auditors who are retiring or leaving the Department. The period covers the last evaluation date thru the date of retirement/exit.

1.5 ORGANIZATION OF THE AUDIT BUREAU

The Audit Bureau consists of a Program Administrator and three divisions, the Field Compliance Division, the Discovery and Recovery Division., and the Criminal Investigation Division (CID).

The Field Compliance Division is responsible for the Bureau's field activities related to Income Tax and Sales and Miscellaneous Taxes.

The Audit Discovery and Recovery Division is responsible for the Bureau's in-house activities related to Income Tax, Sales and Miscellaneous Taxes, CAA and Computer Support.

The Criminal Investigation Division (CID) is responsible for the enforcement of related revenue tax laws. Special agents handle a wide range of investigations, including those involving tax fraud, tax evasion, and other acts that circumvent revenue laws.

All three divisions report to the Program Administrator.

1.5.1 PROGRAM ADMINISTRATOR

The Program Administrator is responsible for the overall direction and performance of the Audit Bureau. The Program Administrator establishes, in conjunction with the Director and other divisions, the goals, objectives and staffing required to implement the Audit Plan and to administer the audit portion of the Department's tax enforcement programs.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.5.2 FIELD COMPLIANCE DIVISION AND DISCOVERY AND RECOVERY DIVISION

1.5.2.1 FIELD COMPLIANCE DIVISION MANAGER

The Field Compliance Division Manager is responsible for directing the activities of Assistant Division Managers and Revenue Audit Supervisors. The Field Compliance Division Manager is responsible for ensuring that the Field Division's activities comply with all statutes, regulations, auditing principles and legal opinions. The Field Compliance Division Manager is responsible for establishing Division goals and objectives which are required to meet the Departments' goals and objectives of its tax enforcement programs.

1.5.2.2 ASSISTANT DIVISION MANAGERS

Assistant Division Managers are responsible for planning, directing, and coordinating auditing activities of a geographical region within and/or outside the State of Illinois. They interpret the proper application of tax laws, rules and regulations, policies and procedures within their assigned areas of responsibility and ensure that supervisors and auditors are operating in compliance with them. Assistant Division Managers monitor and reassign work based on priorities established by higher level management. They also conduct conferences with taxpayers involving cases of a highly controversial or sensitive nature.

1.5.2.3 FIELD REVENUE AUDIT SUPERVISORS

Field Revenue Audit Supervisors plan, supervise and direct field audit staff engaged in auditing tax returns and tax records of taxpayers subject to one or more taxes administered by the Department of Revenue.

1.5.2.4 FIELD REVENUE AUDITORS

Field Revenue Auditors conduct audits of corporations, businesses, partnerships and individuals involving taxes administered by the Department of Revenue.

1.5.2.5 DISCOVERY AND RECOVERY DIVISION MANAGER

The Discovery and Recovery Division manager is responsible for the daily activities of the in-house Income Tax and Sales and Miscellaneous Tax support units. These units include, Audit Planning, Technical Support, Discovery, Federal and State Exchange, Computer and Hardware Support, CAA, Technical Review and Perfection and Clerical Support. The Discovery and Recovery Division Manager also oversees the duties of in-house Revenue Audit Supervisors as well as Revenue Auditors.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.5.2.6 IN-HOUSE REVENUE AUDIT SUPERVISORS

In-House Revenue Audit Supervisors supervise auditors conducting the following functions for Income Tax and Sales and Miscellaneous Taxes: post technical review activities, audit planning and selection, technical support, computer support and computer assisted audits.

1.5.2.7 IN-HOUSE REVENUE AUDITORS

In-House Revenue Auditors perform Income Tax or Sales Tax audit planning and selection activities, discovery activities, technical review of completed audits or technical support activities.

1.5.2.8 AUDIT PLANNING

The Audit Planning Sections, through utilization of the Audit Plan as their guideline, are responsible for carrying out the day to day operations of the audit planning and selection process. Selected taxpayers are evaluated to identify audit potential; if selected, they are assigned to the appropriate Revenue Audit Supervisor for assignment.

In areas where there are multiple supervisors covering the same territory, the audits available for selection will be pre assigned to the ADMs and will show in the ADMs’ inventory.

Requests for audit assistance from other offices are to be forwarded to the appropriate Assistant Division Manager.

1.5.2.9 TECHNICAL SUPPORT

The Technical Support sections are responsible for keeping auditors informed of new policy issues, updated auditing procedures, issuing Audit Manual Updates, and updating Audit Manual chapters. Technical Support is responsible for answering requests for information and clarification on issues received from Revenue Auditors, Revenue Audit Supervisors, ADMs and other audit staff. The Technical Support sections are responsible for review of proposed legislation that would affect the Acts pertaining to their corresponding taxes. Proposed regulations and proposed private letter rulings are also reviewed. The Technical Support sections are also responsible for reviewing tax settlement cases prior to being presented before the Tax Tribunal or Administrative Hearings to ensure the audit was conducted according to Department policy and the tax liability is correct.

1.5.2.10 DISCOVERY

Income Tax Discovery reviews key information from returns filed due to Revenue Auditor's Reports (RARs) then perform additional research to determine if assessments should be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

issued. Auditors in the Income Tax Discovery section also conduct audits, complete special projects and Lead assignments.–

Sales Tax Discovery captures and reviews key information from transactional returns, customs reports, motor vehicle dealers/retailers, referrals, aircraft dealers, watercraft dealers, Secretary of State, and other resources to identify non-filers and under-reporting taxpayers. Auditors then perform additional research to determine if assessments should be issued. Sales Tax Discovery Auditors also conduct limited scope audits as well as traditional IFTA audits, special projects and Lead assignments.

1.5.2.11 FEDERAL AND STATE EXCHANGE UNIT

The Illinois Department of Revenue and the I.R.S. have entered into a Federal/State information exchange agreement to share certain income tax information on taxpayers. The Federal/State Exchange Unit identifies individuals who are under-filers or non-filers from IRS tape matches and issues Income Tax assessments on these individuals when appropriate.

1.5.2.12 COMPUTER AND HARDWARE SUPPORT

The Computer and Hardware Support section provides Audit Bureau staff with the required computer and hardware support. This includes maintaining and updating computer software and automated audit programs. It also includes the initial issuing of computer equipment and phones to new auditors, as well as, replacing broken equipment.

1.5.2.13 COMPUTER ASSISTED AUDITING (CAA) GROUP

The Audit Bureau position is that statistical sampling is the preferred method in large case auditing. Cases where the taxpayer has a large volume of transactions or the case took a large number of hours in the prior cycle, are prime targets for Computer Assisted Audit techniques (CAA). The goal of using CAA is to effectively utilize limited audit resources to produce more accurate and sustainable audit results. The Computer Assisted Auditing Group's function is to provide the auditor with the necessary CAA sampling information so that the auditor can complete the audit as quickly and accurately as possible.

1.5.2.14 REVENUE COMPUTER AUDIT SPECIALIST

Revenue Computer Audit Specialists provide extensive technical assistance to the Audit Bureau Staff by providing direction and guidance regarding specific situations involving computer assisted audit (CAA) methods and statistical sampling. They assist auditors in conducting highly complex tax audits involving computerized systems using special audit software. Revenue Computer Audit Specialists provide the auditor with the necessary CAA sampling information so the auditor can complete the audit as quickly and accurately as possible.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.5.2.15 TECHNICAL REVIEW AND PERFECTION

The Technical Review and Perfection sections are responsible for processing audit payments, reviewing submitted audit packages, inputting the required processing documents, issuing NTL's, NOA's, NOD's or claim denials and sending the completed audit packages to stores.

1.5.2.16 CLERICAL SUPPORT

This unit provides the Audit Bureau with support services which include mail delivery, data entry, file maintenance, etc.

1.6 AUDIT COVERAGE PLAN

On an annual basis, the Audit Bureau establishes a 3 year plan of desired audit coverage. This plan is intended to enhance voluntary compliance using a well-researched cross section of all taxes. The purpose of the plan is to allocate human resources and to assure representative audit coverage on a nationwide basis. The plan is developed using prior audit results and desired coverage levels to best utilize the available resources.
Data Analytics has been an increasing contributing source to the audit plan.

1.7 WORK HOURS AND REPORTING REQUIREMENTS

The Audit Bureau has established standard work hour schedules for both the in-house and the field staff. In-house staff also have the ability to request certain alternative work schedules that must be pre-approved by management using an Employee Alternate Work Schedule request form (RPS-72). These alternate schedules are not available for the field staff. In order to monitor the location of staff, to determine certain Bureau-wide production statistics for the Budget Office and to meet the requirements of the Fair Labor Standards Act, there are several reporting requirements that must be completed on a regular basis by employees. These topics are discussed in the following subsections.

1.7.1 WORK HOURS

- In House work hours are generally from 8:00 am – 4:30 pm, unless on a pre-approved alternative work schedule. There are optional four-day and nine-day schedules listed on the RPS-72 form. The employee may request one of these, but approval is contingent upon management's discretion. It will be based on whether the employee has a valid reason for being unable to work the standard hours, and how operational need is impacted by the alternate schedule.
- Field work hours are from 8:30 am – 5:00 pm. Deviations from these hours cost the Department money in lost productivity and resultsin Internal Audit findings.
  - If a taxpayer or their representative requests an arrival after 8:30 am, or departure prior to 5:00 pm, you must obtain a written statement from the taxpayer or

representative requesting the deviations. This statement **must** be included in the audit file and scanned and attached to the audit in GenTax.

- The work day cannot be shortened for both the start time and the end time. The maximum deviation that can be requested by the taxpayer is a total of ½ an hour.
- Supervisors must be informed in advance if an appointment is not going to start until after 8:30 am, or if you must leave prior to 5:00 pm.
- The supervisor or ADM should contact the taxpayer to discuss the scheduling for the audit if the taxpayer cannot accommodate our work hours and requests deviations of greater than ½ an hour.
- Alternative work sites cannot open later than 9:00 am.
- Field work hours for **out of state** Revenue Auditors are 8:30 am-5:00pm. However, for the out of state auditors only, these hours can be adjusted if the travel commute exceeds approximately 1 hour or about 70 miles such that auditors would not leave their residence before 7:30 am. and would be expected to be home by 6 pm.

1.7.2 OUTLOOK CALENDAR - 30 DAY REQUIREMENT

Purpose: The Outlook Calendar is used to assist auditors in planning their work flow for the month. It is a readily accessible, up-to-date itinerary indicating the auditor's **physical location for appointments and contact numbers** throughout the day.

The following Memorandum of Understanding between AFSCME Council 31 and the Department of Revenue concerning the 30 Day Calendar Requirement for Audit Bureau was effective as of July 1, 2010:

1. The field auditors must maintain a monthly calendar in Outlook. The calendar must be completed for the following month by the 25th of the current month. Revenue Computer Audit Specialists and in-house personnel must utilize the calendar in Outlook when they have meetings scheduled or are scheduled to be off.
2. Supervisors will maintain weekly calendars in Outlook. The supervisors must complete their calendar for the following week by 12:00 PM on Friday of the current week.
3. Field auditors and supervisors are required to keep their calendar as current as possible. Timely and documented changes will not lead to discipline or downgrade to evaluations. If the auditor is going to change their work location during the current workday or if they are changing their work location for the following day after 3:00 PM of the current workday, the auditor must call their supervisor, next level of management, or designee to inform them of the calendar change before moving locations. Once at the new location, they will be responsible for updating their calendars as soon as practicable. If a change is required before 3:00 PM for the following day or a change is required for a future date in the month, the staff can make the change to their calendars without prior notification.
4. The calendar will be viewed as an itinerary, subject to changes. Field auditors are expected to plan their schedule and prepare their calendar accordingly. It is understood

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

that last minute changes can and will occur due to cancelations by taxpayers or other issues related to audits. It is still a requirement to update the calendar as soon as practicable after becoming aware of the change.

5. Supervisors will have 3 business days from the 25th of the month to review field auditors' monthly calendars ensuring that the correct information appears on the calendar and to verify that each employee has completed the monthly calendar in a timely manner. ADM's will review supervisor calendars by 12:00 PM on Monday of the week. The following identifies the information that must be placed on the calendar in Outlook:

   a) Revenue Auditors
      a. Field appointments:
         Taxpayer's Name (Practitioner's/Attorney's Name)
         Address of Work Location
         Telephone Number
         Contact Person
         Auditor's Cell Phone Number
      b. Alternative worksite, this must be pre-approved per the alternative worksite policy and must include:
         Alternative Worksite Name
         Alternative Worksite Location
         Auditors Cell Phone Number
      c. If working at the office, the calendar must include the Taxpayer's names that the auditor is working on.

   b) Revenue Computer Audit Specialists
      a. Field Appointments:
         Auditor's Name that the RCAS is working with
         RCAS' Cell Phone Number
      b. Alternative worksite, this must be pre-approved per the alternative worksite policy and must include:
         Alternative Worksite Name
         Alternative Worksite Location
         RCAS' Cell Phone Number

   c) Revenue Audit Supervisors
      a. Field appointments
         Auditor's Name supervisor is visiting
         RAS' Cell Phone Number
      b. Alternative worksite, this must be pre-approved per the alternative worksite policy and must include:
         Alternative Worksite Name
         Alternative Worksite Location
         RAS' Cell Phone Number

6. Questions regarding documentation to the 30 day calendar should be addressed with the Revenue Audit Supervisor or the Assistant Division Manager (ADM).

Please note: For field staff, since the purpose of the Outlook Calendar is to reflect the auditor's physical location for appointments, please do NOT use the Calendar as a listing all the audits the auditor is working on for the day, unless the physical location for the auditor changes. Allocation of hours on other audits should be done on the GenTax Timesheet. For example, Auditor is physically located at ABC Cake Shop for the day, but is waiting on the taxpayer to provide records. Since the auditor is unable to go further with the audit, he takes the 2 hours of wait time and finalizes his Auditor's Reports and Audit Narrative on 123 Car Repair Shop. The auditor's Outlook Calendar would only show the physical location of ABC Cake Shop since the auditor did not physically change locations. The auditor's GenTax Timesheet would show 5 hours on the audit for ABC Cake Shop and 2 hours on the audit for 123 Car Repair Shop. The auditor's Log In/Log Out should have a comment that they are physically located at track #A (for ABC Cake Shop) while working on track #B (for 123 Car Repair Shop).

1.7.3 RECORDING DAILY ARRIVALS AND DEPARTURES

The Fair Labor Standards Act (FLSA) requires that employers keep accurate records of hours worked by their employees. In order to comply with the FLSA, all Audit Bureau personnel are required to accurately record their work hours, overtime, compensatory time, etc. The procedures in the following subsections ensure that all Illinois Department of Revenue Audit Bureau personnel are in compliance with the FLSA.

Reference: Section 1.6 of the new Employee Handbook, IDOR Administrative Directive - Time and Attendance: Time Keeping, provides the details of the Department's policy on signing in and out.

1.7.3.1 IN-HOUSE STAFF DAILY TIME RECORD

Purpose: The Daily Time Record acts as the in-house staff's "punch card" for a true recording of their start/stop times as required by the FLSA.

In-house staff are required to physically sign in and out daily to record their arrivals and departures on paper Daily Time Record sheets. These are the official record of the times the employees start and stop work and are maintained by the Supervisor in their work area. Expectations for sign in/out include:

- The following times are to be recorded on the Daily Time Record: signing in at the start of the day, signing out for lunch, signing in after lunch, signing out at the end of the day, as well as any other in/out times during the course of the day as a result of using benefit time for partial days.
- Full day use of benefit time does not require sign in/out since a record is shown in e-Time.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Starting times should be the actual time (hour and minute) the employee arrives at the office. However, the initial sign in is not permitted prior to the start of the employee's work shift, unless on pre-approved overtime.
- Departure times should be the actual time (hour and minute) the employee leaves the work location. However, the sign out for the end of the day cannot be after the end of the employee's regular shift, unless on pre-approved overtime.
- Sign in/out for partial day benefit time must be the same as shown on the e-Time request.
- Sign in/out is not required for the morning or afternoon break periods.

1.7.3.2 FIELD AUDIT STAFF LOG IN/ LOG OUT SHEET

Purpose: The Log In/ Log Out sheet acts as the Field Audit staff's electronic "punch card" for a true recording of their start/stop times at the taxpayer location as required by the FLSA.

Since field staff are not located in an office on a daily basis to physically sign a paper record, an electronic method of recording start and stop times had to be developed. In order for field staff (field auditors and Revenue Audit Supervisors) to accurately report time usage through an electronic means, the Log In/ Log Out sheet located in the Audit Manager in GENTAX **must be completed on a daily basis**. The electronic entries for field staff are the equivalent to the paper Daily Time Record sheets required for in-house staff.

It is understood that there may be issues with connecting into GENTAX remotely. Therefore, if there are connection issues, log-in and log-out times should be recorded on paper and then transferred into GENTAX as soon as the auditor can establish connection. They must be completed no later than **by noon of the Monday (or first workday) of the following week. However, regularly completing an entire week of entries on Monday of the following week, without having a connectivity issue, is not acceptable. Daily completion is expected when there is no connectivity problem.**

Logging In:

Field staff **are required to use the Audit Log In/ Log Out** in GENTAX to report the time they start work on a daily basis, when returning from their unpaid lunch hour, and when returning to work after using unpaid time or benefit time.

The following factors must be taken into consideration when recording the log-in time in the Audit Log **In/ Log Out**:

- Normal field auditor work hours are 8:30 a.m. to 5:00 p.m.
- The time entered for log-in should be the **actual** time the auditor arrives at the work location. However, the initial log in entry is not permitted prior to 8:30 a.m., unless on pre-approved overtime.

- Starting times should not be rounded. The actual hour and minute should be recorded.
- The log-in time when returning from benefit time (personal time, vacation time, sick time, etc.) must be the same time as shown on the e-Time request

Logging Out:
Field staff are **required to** use the **Audit Log In/ Log Out** in GENTAX to report any times on a daily basis that they ceased engaging in official business, such as when leaving at the end of the work day, starting the unpaid lunch period, or when leaving for absences due to doctor appointments, personal business time, etc. The end time must be recorded as the time work activities were ceased. Lunch and breaks may not be used to leave early. The end time must reflect the actual time that work was ceased, and may not be extended because the auditor did not take any breaks or lunch hour.

The following factors must be taken into consideration when recording the log-out time in the **Audit Log In/ Log Out**:

- The log-out entry at the end of the day should be the actual time the auditor leaves the work location. However, the log out entry at the end of the day cannot be after 5:00 p.m., unless on pre-approved overtime.
- Log-out for lunch break must reflect the actual time the lunch break started.
- Ending times should not be rounded. The actual hour and minute should be recorded.
- Log-out for benefit time (personal time, vacation time, sick time, etc.) must be the same time as shown on the e-Time request.
- Field staff are not required to log out for breaks.

Requirements for Comments:
When circumstances are different from the norm, comments are required. Below are numerous situations that require a comment in the Log In/ Log Out sheet. Comments are to be brief, but informative. The box has a limited number of characters that will display when the report is run in GENTAX.

- **Deviation from Normal Schedule**
  A comment must be entered in the comment box any time that there is a deviation from normal field work hours (8:30 a.m. – 5:00 p.m.). This includes such circumstances as when taxpayers have different business hours than our field hours, or when the auditor unexpectedly arrives late due to weather, heavy traffic, road construction, or re-routing due to an accident, etc.

- **Time Worked at an Alternative Site or at Home**
  A comment must be entered in the comment box whenever time is worked at an alternative site (AWS) or at home (WAH). If the AWS does not open at the start of

your work day (8:30 AM) a note must be made as to the time the facility opened. Reminder: At no time may an AWS be used if it does not open until after 9:00 AM.

- **Benefit Time**
  If benefit time is used for a partial day, then the Log In/Log Out comment should reflect the number of hours and the type of time used (i.e. 3 hrs vacation). If full days of benefit time are used, for sick leave, vacation, personal time, etc. please make an entry in the comment box. One entry with applicable dates would be sufficient (i.e. vacation 7/3 through 7/7).

  Log In/Log Out sheets are generated at the beginning of each week for that current week. If benefit time is scheduled in advance, but within the current week, please record your comment in advance. (For example, on Monday you schedule a doctor's appointment for Thursday. The Log In/Log Out sheet is available on Monday to make your comment entry for Thursday that week.) This poses a challenge if you are scheduling your time in advance. Consequently, if your benefit time will occur in the future after the current week, or if it is unexpected so you are unable to enter it before you take it, please make the comment entry upon returning to work. (For example, on Monday you complete a vacation leave request for three weeks later. The Log In/Log Out sheet will not be available for you to enter your vacation comment since it is not generated until three weeks later.)

- **Work on a Different Audit**
  While an auditor should not visit the workplace of Taxpayer A with the sole intent on working on other audits, there are situations where work on a different audit is warranted. If the auditor is physically located at Taxpayer A, but exhausts all work on Taxpayer A's audit, or experiences delays in receiving audit data from the taxpayer, it is permissible to work on other audit work for up to ½ a day if the audit is a local audit. For this situation, a **comment is required** on the Log In/Log Out that the auditor is "Physically located at Track #A, but worked on Track #B." Make sure to use the track number rather than the taxpayer name. If it is a travel audit, the auditor should contact their supervisor for guidance on how to proceed if there are continued delays in receiving audit data for the taxpayer where the auditor is physically located.

LOG IN/LOG OUT EXAMPLES

Example 1: Taxpayer business hours different than auditors'

If the auditor arrives at the taxpayer's place of business and the business hours start at 9:00 a.m., log-in should be 9:00 a.m., with a comment in the comment box that the taxpayer's business hours are from 9:00 a.m. – 5:00 p.m.

Example 2: Late arrival

A taxpayer has business hours from 8:00 a.m. – 5:00 p.m. and the auditor was running late and did not arrive at the taxpayer's location until 8:45 a.m. Log-in should be at 8:45 a.m. with

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a brief comment that the auditor was late due to the specific reason such as "traffic delay," "weather delay," "re-route for road constructions".

Example 3: Use of benefit time during working hours

An auditor arrives at the work location at 8:30 a.m. and logs in, but has to leave at 9:30 a.m. to go to a doctor's appointment and then arrives back at the work site at 11:00 a.m. The auditor will log out at 9:30 a.m. and log in at 11:00 a.m. with a comment that the auditor had a doctor's appointment for that time period.

Example 4: Travel

The auditor leaves his/her designated travel headquarters at 8:30 a.m. to travel to an out-of-state taxpayer and arrives at the taxpayer's location at 1:30 p.m. The auditor will log in at 1:30 p.m. and make a comment that the auditor was traveling from 8:30 a.m. to 1:30 p.m.

Example 5: Changing taxpayers during day

An auditor arrives at Taxpayer A's location at 8:30 a.m. and logs in. Auditor leaves at 10:00 a.m. to go to Taxpayer B and arrives at Taxpayer B's location at 10:30 a.m. The auditor does not have to sign out for this travel time, but has to comment that he/she changed taxpayer locations.

Example 6: Changing taxpayers during lunch hour

An auditor arrives at Taxpayer A's location at 8:30 a.m. and logs in. Auditor leaves at 12:00 p.m. to go lunch, but will go to Taxpayer B's location after lunch and arrives at Taxpayer B's location at 1:30 p.m. The auditor will sign out for lunch at 12:00 p.m. and in from lunch at 1:00 p.m. The auditor will make a comment that he/she changed locations and arrived at Taxpayer B's location at 1:30 p.m.

FIELD LOG IN/LOG OUT SHEET INSTRUCTIONS

The Audit Log In/Log Out manager is accessed from the My Work manager. Choose the Log In/Log Out hyperlink which will bring up the current day sign-in sheet.

Once this selection is made, the sheet for the current day appears:

To complete the sheet for the day, choose the change button at the top and all editable fields will turn green.

Once the fields are green, complete the necessary information & click the “save” button at the bottom of the screen.

Note: When entering times that are single digits, (i.e. 9:00 a.m.) be sure to enter the zero first. (Example: 09:00 a.m.)

If any Log In/Out sheets need to be entered for previous work days when the employee did not have access to GENTAX, or if an entry needs to be completed or changed, choose the “Prev Sheets” button at the top of the entry screen.

Click on the day needing to be changed or completed.

Click the change button.

After making the needed entries or changes, click Save.

Field staff are responsible for ensuring that all Log In/Out sheets for the week are completed no later than noon of the Monday (or first workday) of the following week. Supervisors will be checking the Log In/Out sheets when verifying Time Sheets (formerly called Field Reports), e-Time leave requests and Travel Vouchers.
Field staff will have the opportunity to complete any missing Log In/Log Out sheets. If benefit time is used for a partial day then the Log In/Log Out sheet must reflect that time off.

Time sheets in GENTAX and Leave slips in e-Time should be consistent with the time reported on the Log In/Log Out sheet.

1.7.4 GENTAX TIMESHEETS

Purpose: The GENTAX Timesheet allocates the actual number of working hours spent to various specific direct or indirect activities, or to benefit time. These hourly allocation numbers feed into various managerial statistical reports which are used to provide information to the Budget Office, so they need to be as accurate as possible.

The Timesheet must be completed on a daily basis. It is accessed within GENTAX by using the ***My Work*** manager, the ***Audit*** navigation bar, and the ***Timesheet*** hyperlink. For each week's timesheet, there are individual ***Tasks*** that can be selected which are groupings for various in-house work locations, non-work, indirect, or direct time for specific audit assignments, Under these ***Tasks***, time is further sub-divided into ***Activity*** based upon the various types of work activities in that area. A separate timesheet is automatically generated for each week. The reports are due by noon on the first workday following the reported week. Once the employee completes and submits the timesheet, it is automatically assigned to their supervisor for review and approval.

1.7.4.1 NUMBER OF HOURS TO ACCOUNT FOR EACH DAY

Depending on the employee's work schedule, there will be different numbers of hours to account for on the GENTAX Timesheet. In addition, Timesheets do not take the morning and afternoon breaks into consideration because they are not spent working. In general, the full amount of working hours less breaks should be accounted for each day. Following are the specifics for each work schedule.

- Normal field and in-house five-day work shifts will account for 7 hours per day.
- In-House four-day work schedules will account for 9 hours on the long days and 8 hours on the short day.
- In-House nine-day work schedules will account for full day work hours less 30 minutes for breaks on all days, except the short day. The short day will account for a full day work hours less one hour (for breaks for the short day and breaks for the day off.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.7.4.2 ACCOUNTING FOR NON-WORK HOURS

When completing the GENTAX Timesheet, non-work hours (time taken off) must be accounted for first. The time is recognized here so that this time off is not reflected as working hours in the statistical information that goes to the Budget Office. However, the time off is actually approved via e-Time as explained in Section 1.7.5. The actual number of hours of benefit time taken must be accounted for in the Timesheet, unless that number of hours exceeds the limits explained in the previous section for the number of hours to account for each day. In this case, the limit is used instead.

Under the Non-Work ***Type***, there are six ***Activities*** listed in the sub-spreadsheet: Comp/Hol, Holiday, Other, Personal Leave, Sick Leave, and Vacation. The last three are self-explanatory. The first three require some additional information.

- **Comp/Ho**l: This activity category is for compensation time that is used by any employee, or for earned Holiday time that is used by those on a four-day or nine-day work schedule for a day that is different from the scheduled holiday.
- **Holiday**: This is to record the time for scheduled State Holidays
  - Five-day work schedules account for 7 hours
  - Four day work schedules account for 7 hours, if the state scheduled holiday falls on the scheduled day to work. The remaining time balance for that day will be accounted for on one of the other applicable lines.
  - Nine-day work schedules account for required short day hours or required long day hours, if the state scheduled holiday falls on a scheduled day to work. On the long day, the remaining time balance will be accounted for on one of the other applicable lines.
- **Other**: This is used to account for miscellaneous time taken such as blood donor, jury duty, authorized leave, unauthorized leave, other paid time away, etc.

1.7.4.3 ACCOUNTING FOR WORK HOURS

After completing the Non-Work portion of the Timesheet, the remaining balance of the work hours to be accounted for should be allocated to the other ***Tasks*** that are related to work hours***.*** Within each of the work area ***Tasks***, there are sub-spreadsheets that require time allocation to the appropriate specific ***Activities***.

The following ***Tasks*** and their ***Activities*** are only used by appropriate in-house staffs:

- Audit Perfect – used by Audit Perfection staff
- Planning – used by both the Income Tax Planning and Sales Tax Planning staffs
- Inc Tax Disc – used by Income Tax Discovery staff. This will include direct time that is spent on leads from the Discovery Tool projects in Gentax conducted by the unit. If an employee works on more than one project or audit during the day, time must be accurately split between the various projects and audit assignments.
- Sls Tax Disc – used by Sales Tax Discovery staff. This will include direct time that is spent on leads from the Discovery Tool projects in Gentax conducted by the unit. If an

employee works on more than one project or audit during the day, time must be accurately split between the various projects and audit assignments.
- Tech Support – used by Income Tax Technical Support and Sales Tax Technical Support staffs

The following ***Tasks*** and their related ***Activities*** are used by both field and in-house staffs:
- Supervisor – used by both in-house and field supervisors
- Indirect – used to account for working time not spent working on specific taxpayer audits or Discovery projects. It is used for such things as attending staff meetings, conferences, or training, researching issues, conducting union business as an elected union officer or steward, or “other” indirect activities such as a special project requested by management that is not tied to a particular taxpayer assignment. Anytime “other” is used, a comment is required in the Comment area. Do not use the note function of the Timesheet.
- Specific audit assignments added to the ***Task*** list through the ***Add Audit*** button: This is where most of the field staff’s direct time and in-house direct time for traditional audits will fall. Timesheets must accurately account for the number of hours worked on **each** individual audit assignment. Field staff will use ***Add Audit*** to select their individual field assignments that they worked on for the week. In-house staff will use ***Add Audit*** for traditional audit assignments. Time must then be categorized under the proper ***Activity*** for that audit. If an employee works on more than one audit during the day, time must be accurately split between the audits. Do NOT simply record all of the hours on one audit for the sake of convenience. This skews the number of hours that are fed into statistical reports used for planning purposes.

1.7.5 E-TIME AND LEAVE REQUESTS

Purpose: The Illinois Department of Revenue utilizes the Electronic Timekeeping System (E-Time) which allows employees to manage and account for their benefit time and attendance records. E-Time is different from the GENTAX timesheets in that its focus it to account for the use and availability of benefit time, rather than account for the specific work activities that are conducted on a daily basis. It provides information for Personnel and for the Timekeepers.

E-Time enables employees to submit leave requests on-line for approval from their supervisors. It allows employees and managers to track time and attendance information in a consistent and automated format by providing centralized storage of time and attendance records. It also provides employees with information regarding benefit time usage and what benefit time is available.

1.7.5.1 CALL IN- LEAVE REQUESTS

Auditors are required to call their supervisor within the first hour of the assigned shift to report an absence for that shift. It is imperative when an auditor calls in to report his or her absence

that the auditor talk to the supervisor or his or her designee, and not to any employee who happens to answer the telephone. The auditor must inform the supervisor or designee of the type of absence that is being requested (i.e. vacation, sick, personal or FMLA). Failure to timely report the absence could result in an unauthorized absence. A Leave Request is to be submitted via e-Time for the time and type of absence.

The procedures detailed in the Statewide Affirmative Attendance Policy will govern how unreported or unauthorized absences will be handled by the Department. This policy can be found under the Labor Relations area on the Department's intranet site.

1.7.5.2 ADVANCE LEAVE REQUESTS

Auditors and revenue audit supervisors must submit an E-time leave request to schedule vacation time and personal business time as far in advance as possible. An E-time leave request must also be submitted in advance for sick time when doctor or dentist appointments are known, or absence is required due to sick family, etc. Employees must e-mail their supervisor notifying them that time has been requested in E-time.

1.7.6 WORKING AT SITES OTHER THAN TAXPAYER'S LOCATION

Working at the taxpayer's location is the most efficient place to conduct a field audit. However, under certain circumstances field personnel may be allowed to work at their residence or an alternate work site after obtaining ***prior*** approval from management.

It is the Bureau's expectation that field auditors maintain direct audit time [redacted] in the field at taxpayer locations. Office time is to be kept [redacted] In our reporting environment, office time includes not only work in the office, but also alternative work site and work at home hours. Employees should monitor their office time to make sure they do not go [redacted].

Auditors are required to submit the **Request to Work at Home or Alternative Worksite** form to obtain prior approval to work at home or to use an alternate worksite. The **Request to Work at Home or Alternative Worksite** form is available on the Sp-IDOR web, under Work Areas/Audit/Forms.

The following sections outline requirements specific to working at residence or working at an alternative worksite.

1.7.6.1 WORKING AT RESIDENCE

Field personnel may be allowed to work at their residence upon obtaining prior approval from supervisors. Prior approval must be received **before** the workday commences. The immediate supervisor must give the approval. If the immediate supervisor is not available, the Assistant Division Manager must be contacted. Approval to work at home will only be given when it is in the Department's best interest. Therefore, supervisors and Assistant

Division Managers retain the right to deny field employees the option to work at their residence, even if prior approval is requested.

Working at the office or at the taxpayer's location is the most efficient place to conduct Computer Audit Specialist duties. However, Computer Audit Specialists may also be authorized to work at their residence in certain circumstances upon obtaining prior approval from their supervisor. Approval to work at home must be received before the workday commences. If the Computer Audit Specialist's supervisor is not available, then the Audit Discovery and Recovery Manager must be contacted. Approval will only be given when it is in the best interests of the Department. Therefore, the supervisor and Audit Support Division Manager retain the right to deny Computer Audit Specialists the option to work at their residence, even if prior approval is requested.

Employees' work at home hours will be tracked on the weekly timesheet. If a request would result in an employee working at home for more than 28 hours in a month, prior approval must be received from the Assistant Division Manager or, in the case of Revenue Computer Audit Specialists, from the Discovery and Recovery Manager. Such requests should be submitted to the immediate Supervisor, if available. If prior approval is not received, the employee is not allowed to work at home for the time period requested.

The following procedures are to be followed for all work at home requests:

- The employee **must** receive approval prior to working at their residence. Typically this approval should occur prior to the day that the employee is requesting to work at home. The supervisor, Assistant Division Manager or Division Manager must forward the Work at Home Request form to the appropriate timekeeper with documentation that the request was approved and must 'CC' the requestor to document the approval.

- The Work at Home Request form must be completed and submitted for approval. The information that must be completed on the form includes the dates and times, the track number and name of the taxpayer for the audit to be worked on (multiple audits can be included by using the Special Considerations area for the track numbers and names of the second and subsequent taxpayers) and the reason for the request to work at home. The approving party may ask that the requestor identify the work to be performed on the track. This gives management an understanding of the work to be completed in order to determine whether the request is in the best interest of the Department.

- If the Request to Work at Home is done at the last minute due to unusual circumstances, then the requestor must receive oral approval from their supervisor, Assistant Division Manager or Division Manager prior to working at home and this oral approval must be documented on the Work at Home Request form in the 'Special Consideration' area. The Work at Home Request form must be submitted immediately upon your arrival at your residence.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Under no circumstances should an employee work at their residence without prior approval from a Revenue Audit Supervisor, an Assistant Division Manager or Division Manager.

1.7.6.2 ALTERNATIVE WORK SITES

The alternative work site is not a substitute for your office, if you have one. If it is in the best interest of the Department to use the alternative work site, then management agrees that it is appropriate to do so. Most employees may need to use an alternative work site occasionally because of scheduling problems and the unavailability of their home or office space.

The alternative work site is a place that auditors can request to work at when research is necessary and required to complete an audit assignment or come to a conclusion on a specific issue. The alternative work site can also be used as a work location that is easily accessible to an auditor when he/she has completed all field-work regarding their taxpayer and are asked by that taxpayer to leave their premises. Although the alternative work site is available it should be stressed that every attempt should be made to remain at the taxpayer's place of business because of the confidentiality of the information we are working with and generally the business is a more secure environment for the auditor's work papers and equipment.

The alternative work site can also become a location to work at and re-locate to when appointments are cancelled by the taxpayer at the last minute and traveling to the field office would not be prudent in terms of productivity and cost. Lastly, the alternative work site can be used when your supervisor requests your presence to review any and all work related topics and a neutral meeting place is needed.

There is no basis to allow for a change in an employee's work schedule because they are working at an alternative work site. Normal work hours are 8:30 a.m. until 5:00 p.m. Beginning your day at an alternative work site that opens later than 9:00 a.m. is not acceptable. Remember, it is always important to use sound judgment when making decisions regarding working at locations other than the taxpayer's place of business, their representative's place of business or a Department office.

Multiple consecutive days at the alternative work site may not be appropriate or authorized. In these instances staff with an office should utilize these resources. If you do not have a field office or are remotely located from your office, these cases will be addressed on an individual basis and additional time may be granted. An individual's audit inventory, work assignments and work location may determine the amount of time that is requested to use an alternative work site. If employees are involved in audits of cash businesses or IFTA businesses, we recognize that these audit locations may not always be conducive to performing your audit work. For these auditors, it is expected that time at alternative work locations will be greater than other auditors and will be considered in approval decisions.

If it is an employee's intention to work at an alternative work site, then this should be discussed with their supervisor and approved in advance. The employee will need to provide their supervisor the reason why they want to go to the alternative work site and the work that will be performed. When scheduling the alternative work site, the Work at Home/Alternative Work Site Request form must be completed and submitted for approval. Your supervisor should not learn that you have reported to an alternative work site via the calendar without their prior approval. This is not acceptable. If the employee does not receive approval or denial from their supervisor in advance, then you must receive prior approval from your Assistant Division Manager (ADM) or Division Manager if applicable. If prior approval is not received, the employee is not allowed to work at the alternative worksite for the time period requested. Approval will only be given when it is in the best interests of the Department. Therefore, the Supervisor and Assistant Division Managers retain the right to deny the employees the option to work at an alternative worksite, even if prior approval is requested.

If a situation arises and the employee needs to go to the alternative work site immediately, then they should call their supervisor to notify them and receive authorization. When these immediate situations arise and your supervisor does not answer your call, then you should leave a voice message describing your request and the name and location of the alternative work site you will be working. If your supervisor is not working on the day in question, then you need to contact your ADM. You must insure that your Calendar is adjusted reflecting the change in work location. You can either change your Calendar yourself or contact the appropriate office staff if one exists. It is important that your Calendar is always accurate and up to date. As in all situations, your Calendar should be adjusted prior to your changing locations or as soon as practicable. You should also send an email to your supervisor regarding your request as soon as possible supporting your phone request. It is important to remember that cell phones may not be permitted at the alternative work site so the employee will need to provide an alternative contact number so that they can be reached.

A supervisor must take into account many different variables prior to approving an AWS or WAH request. Prior to giving consideration to time and cost efficiencies, the supervisor must ensure that the AWS meets the criteria for being a secure environment. A secure environment is one that ensures that confidentiality is not compromised.

Ex: A private room that can be locked at a library or at any location would satisfy this Requirement. Work must be in a location where no one standing in the vicinity can view the employee's computer or documents.

FOR EXISTING AWS LOCATIONS: If the supervisor has not yet visited the location to ensure that it meets these requirements, a visit should be scheduled as soon as it is practicable.

FOR NEW AWS LOCATIONS: If at all possible, the supervisor should approve the location prior to its use. If that is not feasible, a visit to the AWS must be scheduled as soon as it is practicable.

NOTE: Utilizing the office of a POA, accountant or lawyer as an AWS for work *other than for the applicable audit* is not acceptable.

NOTE: A supervisor must confirm approval of the Alternative Work Site by sending an e-mail to the employee. The Supervisor must maintain these e-mails in the employee's Supervisor file for documentation.

When considering the request for AWS or WAH, the supervisor needs to ensure that there is a benefit to the Department by saving the State travel money or time; the request must be in the *"best interest of the Department."* Each of the following should be considered when making that determination:

What is meant by in the "*best interest of the Department*"?

- **Time efficient** – more Department work can be accomplished by working at an alternative work site or at home rather than commuting through traffic during work hours to the office.
- **Cost effective** – the cost of traveling to a location should be considered, as well as the cost of lost work time.

IMPORTANT: Each request must state the reason(s) why it is of benefit to the Department.

The following are examples of situations when AWS or WAH requests would normally be approved, taking into account the underlying principle that approval will only be given when it is in the *"best interest of the Department"* to do so.

Example Situations:

1. If the employee's work at the taxpayer's place of business will not take the entire day, a request for an AWS or WAH for the other portion of the day may be acceptable if you are closer to your home than the office. This would result in having more time available to work.

2. If an employee is taking part of the day off, a request for an AWS or WAH for the remainder of the day may be acceptable.
3. If the taxpayer or POA makes a last minute cancellation and proximity to the office is not efficient, a request for an AWS or WAH request may be acceptable.
4. If an employee is remotely located, and they are participating in a staff meeting or a webinar, a WAH request is the only applicable option. Employees **must not** use AWS in these situations.

If a supervisor does not have an office (i.e. Dallas, Cleveland) the RAS may use an AWS to conduct a staff meeting. Acceptable sites would be a hotel conference room or another State of Illinois facility.

Request Requirements/Limitations:

- If the office is less than 30 miles from your residence AND it is for a FULL day, staff are required to go to the office.
- All Alternative Work Site and Work at Home requests must be approved in advance. The approval can be provided in an email from your supervisor. In those situations where immediate approval may be needed, you can obtain verbal approval from your Supervisor, Assistant Division Manager or Division Manager and note the verbal approval on the Alternative Work Site / Work at Home request when submitted.
- In all situations, the request must include information regarding what you will be working on. Sufficient explanation of tasks to be completed and track numbers should be provided to cover the number of hours to be worked. If the supervisor believes there are not sufficient tasks to be completed during the time requested to be worked at home, they will attempt to obtain additional documentation to cover the hours. If there are not enough tasks shown on the requests then the request will be denied.

Special Circumstance Requests: The following types of audits may be cause for approval of AWS and WAH requests. The Supervisor can approve blocks of time allotted for these special circumstances without interfering with the monthly 28 hour limitation for WAH requests.

1. Box or cash business audits with taxpayer records to be reviewed. Box audits are those where the taxpayer has no place for the auditor to work and the auditor is given hardcopy items to review by the taxpayer. These items may include invoices, receipts, ledgers, etc.
2. IFTA audits of trucking companies that may not have space for the auditor to review their records.

3. Travel audits or large taxpayer audits where taxpayers provide records to be brought back to Illinois or provide electronic records in response to IDRs.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.7.7 OVERTIME REQUESTS

Anytime in-state auditors drive in excess of 30 miles one way to an audit assignment, the auditor is granted overtime pay. Exceptions are as follows:

1) Travel to and from your designated work headquarters to another revenue facility.
2) Any travel in which per diem is claimed or allowed.
3) Trips to your designated work headquarters or another Revenue facility that are made other than your first or last stop of the day.

In order to calculate overtime, use the following formula:

Total Miles Driven Less Base Miles = Miles in Excess of Base	Miles in Excess of Base Total Miles Driven	= Excess Miles Factor

The above factor is then applied to the time it took to drive to the work location.

Driving Time Segment 1 + Driving Time Segment 2 = Total Driving Time	Total Driving Time X Excess Miles Factor = Base Overtime	Base Overtime Less Post 8:30 and Pre 5:00 time = Allowable overtime

An Excel worksheet application is available for auditors to calculate overtime. This application is in the Standardized Forms folder and is titled "Overtime Calculation Form". The calculated overtime must be reported on Form RPS-43, Overtime Report which is available on the Sp-IDOR Web under Core Resources/Forms/Human Resources Forms/ Timekeeping/Payroll. Any overtime that has been earned must be entered on form RPS-43 for the day in which it was earned. Anytime overtime is earned, the auditor must submit this form along with the corresponding travel voucher to his/her supervisor for approval. For timekeeping purposes, the actual overtime earned for a week will be rounded up or down in 7½ minute increments and posted to the last workday in the week earned. Form RPS-43, Overtime Report, is due weekly with the auditors' timesheets. A copy of the travel voucher for that time period is also needed to verify the time reported and the mileage.

Anytime an auditor is traveling to an audit work location after 8:30, he/she is not entitled to overtime from that point forward. The auditor is considered to be on the clock at 8:30 and must deduct any travel time after 8:30 from the base overtime calculation. If the auditor leaves before 5:00, the auditor must deduct the time left early from the base overtime computation.

NOTE 1: An auditor's normal work hours are 8:30 a.m. to 5:00 p.m. Overtime cannot be earned on leave time (vacation time, personal business, sick time, etc.) which causes the

auditor to arrive after 8:30 am or leave before 5:00 pm. This time must be deducted from the base overtime computation for that day.

NOTE 2: Auditors may be required to do a cost comparison if the mileage to the audit site is significant. This cost comparison would determine if it is more economical for the auditor to stay overnight at the audit site or to drive there each day.

1.7.8 PREMIUM PAY REQUESTS

In-state auditors are entitled to out-of-state premium pay when they work more than 1 day on an out-of-state job assignment during an audit. The auditor must stay overnight at the out-of-state location to qualify for the premium pay.

Once the auditor completes the assignment, the auditor must complete form ACC-40, Out-of-State Premium Pay. This form is available in the Standardized Form folder on the laptop. The form consists of the number of days the auditor was at the out-of-state site and how many nights he/she is to receive premium pay. The form is submitted to his/her supervisor for review and upon verification, forward to the ADM or DM for final approval prior to sending it to the payroll office.

The auditor is paid the premium rate for the number of nights at a **rate of 15%** of the auditor's annual daily rate. The annual daily rate is calculated as follows:

Employees monthly salary times 12 = annual salary divided by 261 (# of work days in a year) = average daily rate times number of nights times 15% = gross amount of premium pay.

Example: Employees monthly salary of $3401 X 12 = $40,812 (annual salary) divided by 261 (# of work days in a year) = $156.368 (average daily rate) X 4 (number of nights) = $625.472 X 15% = $93.821 (gross amount of premium pay).

1.8 AUDITOR TRANSFERS

Employees desiring to transfer to a different office or work unit must complete a Request for Transfer, Form RPS-65, and forward it to Human Resources with a copy to the Division Manager's office. The request will be valid for two years. This form is available on the Sp-IDOR Web under Core Resources/Forms/Human Resources/Other. The Audit Bureau will notify all auditors of open auditor positions which might be filled prior to the posting of these positions. This will allow current auditors the opportunity to request a transfer to an open position. Human Resources will review all transfer requests on file and determine a position filling sequence by seniority.

1.9 TRAVEL AND TRAVEL TIME

It is the policy of the state of Illinois to reimburse employees for reasonable authorized expenses incurred by them in the performance of their duties. Travel should be done by the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

most economical options and transportation mode available, considering travel time, work requirements and overall expenses.

Since Audit Bureau employees spend significant amounts of time traveling, employees need to be aware that there are many rules in place governing how the travel should be authorized, how it should be conducted, and how reimbursement for expenses should be documented and requested. Below are the reference sources for the various rules that impact employees' travel:

- The Governor's Travel Control Board has established a ***Travel Guide for State of Illinois Employees*** outlining state regulations for travel. It is updated annually and can be found on the website for Central Management Services (CMS).
- In addition to the Travel Guide from CMS, the Department has its own supplemental policy called ***Travel Rules*** that gives guidance on items that are specific to IDOR. This can be found in the SpiDOR web under Items of Interest/Travel/Travel Rules.
- Forms for IDOR travel discussed in the following sections can be found on the SpiDOR web page under Core Resources/Forms/Travel.
- In the Exhibits at the end of the Chapter, there are examples of the various forms related to travel, as well as a helpful ***Travel Voucher Checklist*** that walks through the process step by step with the Department's automated travel voucher. This checklist can also be found on the SpiDor web under Work Areas/Audit/Audit Bureau Bulletins (in the Reference section)/Audit Bureau Bulletins/ABB-2017-3 Travel Voucher Checklist.

The following sections outline the process for travel approval, making travel arrangements, changing travel arrangements, documenting travel expenses, preparing the travel voucher, and submitting the travel voucher.

1.9.1 TRAVEL APPROVAL

Audit Bureau management requires prior approval for all overnight travel by Audit Bureau employees. Before overnight travel can be authorized, the following general rules must be taken into consideration by the traveler when planning:

- Travel should not take place during weeks when there is a holiday. However, if an out of state assignment cannot be scheduled during a different week, management approval is required before scheduling that particular out of state audit.
- All trips which require overnight lodging should be scheduled for full work weeks (Monday through Friday) unless specific approval for deviation is given by the supervisor in advance.
- Generally a two-week trip applies to out-of-state assignments covering great distances from the employee's residence. One week trips will be authorized when the cost for returning home is less than the cost of staying the interim weekend

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Travel on authorized one or two-week trips will be on State time. Such travel should commence as close as possible to 8:30 a.m. on the first day of travel and end as close as possible to 5:00 p.m. on the last day of travel
- An employee must travel in the most cost effective manner.
- All travel in-state or out-of-state must be approved in writing on the authorized form prior to travel unless a specific emergency precludes and the appropriate verbal approval is given by the Program Administrator, Chief of Staff, or other delegate of the Director.
- If the traveler desires to return home during an interim weekend for a two-week trip, a cost comparison analysis must be made, and pre-approved. For approved trips home on interim weekends, the employee must attach a copy of the approval to their travel voucher, and they will be responsible for all expenses in excess of those which would have been incurred had he or she stayed near the jobsite. These trips will be made on the employee's own time and expense. It will be the responsibility of management to monitor travel time to assure the guidelines are followed. Managers may approve deviations when they deem the situation appropriate, but are not authorized to circumvent the Department's travel regulations
- An employee may be allowed to return home from an out-of-state assignment on state time and state expense if his presence at home is required due to a serious illness or death in the employee's immediate family. Once the employee reaches his home, he will be required to utilize accrued vacation, personal leave or sick leave to account for his absence from work. No overtime will be accumulated or credited for time spent in travel under this provision. For purposes of definition, the "immediate family or household" includes spouse, parent, sister, brother, child, or any relative or person living in the employee's household for whom the employee has custodial responsibility or where such person is financially and emotionally dependent on the employee. For bereavement purposes, that is for attendance at funerals, the term "immediate family" includes grandparents, grandchildren, parents-in-law, brothers- or sisters-in-law, and daughter- or sons-in-law. This expansion of term "immediate family" is for bereavement purposes only. Such trips must be approved by the Supervisor and a written explanation of the need for the trip must be attached to the travel voucher.

Management reserves the right to alter these general rules depending upon the worksite location, flight schedules, costs, length of assignment, and travel time.

Depending upon the type of travel needed, there are different forms that must be completed for authorization before travel can be conducted. These forms include the Travel Authorization, In-State Travel Request, the Out-of-State Travel Request, and the TAD-14 Attendance Request for Conference, Meeting or Training. They are each explained in the following sub-sections.

.

1.9.1.1 TRAVEL AUTHORIZATION FORM

Purpose: To facilitate Audit Bureau management approval of **all overnight travel**. Aids in monitoring that the most cost effective methods of travel have been used.

Submission Date: At least **one week before travel**, and prior to finalization of travel arrangements.

Attachment Requirement: Not required to be attached to the Travel Voucher since this is an Audit Bureau form.

For **all overnight travel**, a Travel Authorization Form must be completed and sent to the employee's supervisor immediately after travel cost information has been obtained through the Department of Revenue's Travel Office. It is best to request authorization as far in advance as possible, but at minimum one week before travel. This form is required for all types of overnight travel without exception – auditing, attending hearings or court proceedings, attending training, conferences, meetings, etc. No employee is authorized to travel unless approval has been secured. Employees should contact their supervisor at least one week in advance of scheduled departure if they have not received the approved Travel Authorization Form returned from their supervisor.

Supervisors should review requests for travel, giving the following considerations:

- Is the travel being requested necessary?
- In the case of travel audits, does the potential of the case justify the costs of making the trip? In many cases, there is no prior history to judge audit potential and audit issues are not apparent from the taxpayer's filed returns. It may be necessary for some additional research to be completed prior to the trip. Good judgment should be utilized in approving trips in these instances. Travel to conduct audits should include the name of the taxpayer on the Purpose of Travel line(s).
- Is the trip being planned in the most efficient and cost effective manner considering travel time and the work required to be done?
- If an employee has requested to fly to a destination, would driving be more efficient?
- Is the hotel rate reasonable considering the location?
- If car rental is being requested, is it necessary?

Supervisors should contact the Travel Office to check alternative travel arrangements, if deemed necessary. It is not the intent of this procedure to make travel uncomfortable or inconvenient for our employees but to ensure that travel money is being spent efficiently and effectively. Supervisors needing help regarding whether to approve a trip should contact their Assistant Division Manager. The Division Manager should be contacted in the case of Audit Discovery and Recovery section supervisors.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Supervisors should return the request marked either "Approved" or "Not Approved" and retain a copy for their files. When it is decided that a trip should not be taken, supervisors should initial the travel request at "Not Approved", note the reason in the comments lines of the form, return the form to the employee and retain a copy for their files.

When it is determined that a trip is necessary but travel arrangements should be changed, supervisors can do one of the following:

- return the travel request form to the employee and ask that appropriate changes be made and then resubmitted for approval
- make the changes on the request form, approve the travel as changed and return it to the employee with approval.

When completing the Travel Authorization Form, the following items must be submitted with the form:

- A printout from the Trip Cost Calculator on CMS's website to determine the most economical means of transportation. The calculator requires input of the number of days or hours and miles of upcoming travel. It then displays the associated costs. The calculator can be found at the following web address: http://www2/illinois.gov/cms/agency/vehicles/Pages/TripCostCalculator.aspx
- If the travel location is more than 60 miles from the employee's home, a cost comparison of all costs (mileage, hotel, per diem, etc.) for the trip is needed to justify whether it is more economical to stay in a hotel overnight, or to drive back and forth from the location. Cost comparisons should include hotels from the Preferred Hotel Listing on the CMS website. Rates for these hotels used in the cost comparison can be obtained through the Department's Travel Office.

A copy of the Travel Authorization Form can be found in the Standardized Forms folder on the auditors' laptops. See Exhibit A at the end of this Chapter for an example.

1.9.1.2 IN-STATE TRAVEL REQUEST FORM

Purpose: To encourage only essential in-state travel, this form used by all areas of the Department is required for approval through the supervisor, Program Administrator and the Budget and Planning Office to monitor the Department's travel budget.

Submission Date: At least **one week in advance** of travel, with approval granted before travel occurs.

Attachment Requirement: Approved form must be attached to each of the two copies of the Travel Voucher (Form C-10) that are submitted for reimbursement.

When an employee needs to travel outside his/her designated headquarters area, but within the state of Illinois on authorized state business, an In-State Travel Request must be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

completed. This form must be completed one week in advance for the following non-exempt situations:

- To attend staff meetings
- To attend Department training sessions
- To work at another IDOR facility, other than the employee's assigned headquarters facility

The In-State Travel Request form is not always needed for Audit Bureau employees. The following situations do **NOT** require the In State Travel Request Form because Audit employees have a blanket exemption for core/essential functions of the job:

- To conduct audit work on taxpayers
- To attend hearings, Court proceedings or litigation

This form is available on the Department's intranet website (the Sp-IDOR web) under the Core Resources/Forms/Travel Forms/Travel Requests. See Exhibit B at the end of this Chapter for an example.

1.9.1.3 OUT OF STATE TRAVEL REQUEST FORM

Purpose: To encourage only essential out-of-state travel, this form used by all state agencies is required to obtain approval from the agency Director and the Governor's Office of Management and Budget.

Submission Date: At least **42 days before departure (six weeks)** with approval granted before travel occurs.

Attachment Requirement: Approved form must be attached to each of the two copies of the Travel Voucher (Form C-10) that are submitted for reimbursement.

State business that involves out-of- state travel must have the Out-Of-State Travel Request form completed and approved by Audit management. This form must be completed when an auditor travels out of his/her state of residence for the following situations:

- Out-of-country travel **always** requires this form – **including** travel for the purpose of auditing
- Attending out-of-state staff meetings
- Attending out-of-state training sessions
- Working at an out-of-state office, if you are not assigned to that office
- Out-of-state travel that does not require an overnight stay (only Director approval needed. Governor's Office of Management and Budget approval is not needed.)

This form is NOT needed for the following out-of-state travel situations since Audit Bureau employees are exempt from filing the form for these core business functions:

- Auditing taxpayers (except for out-of-country)

- Attending hearings or Court litigation

This form is available on the Department's intranet website (the Sp-IDOR web) under Core Resources/Forms/Travel Forms/Travel Requests. See Exhibit C at the end of this Chapter for an example.

1.9.1.4 TAD-14 ATTENDANCE REQUEST FOR CONFERENCE OR MEETING

Purpose: To obtain approval to attend an outside conference or seminar sponsored by an organization other than the Department of Revenue.

Submission Date: At least 42 days prior to departure (six weeks) with approval granted before attendance occurs.

Attachment Requirement: Approved form must be attached to each of the two copies of the Travel Voucher (Form C-10) that are submitted for reimbursement
When an auditor wishes to attend a conference, seminar, or training sponsored by an organization other than the Department of Revenue, the TAD-14 Attendance Request for Conference or Meeting must be submitted in place of the In-State Travel Request Form. The following steps should be completed:

- **Complete** Form **TAD-14**, Attendance Request for Conference or Meeting, and attach it to the program announcement for the conference, seminar, or training. This form should be submitted at least six weeks prior to the event,
- Complete and attach the Travel Authorization and Out-of-State Travel Request form (if appropriate). (If the event is in-state, the In-State Travel Request is not needed since the TAD-14 takes its place,)
- Obtain the approval of the Revenue Audit Supervisor and Assistant Division Manager,
- Submit the completed forms for Division Manager and Program Administrator's approval.

The completed approved request will be sent to the Human Resource Division for additional approvals.

The request will be returned to the auditor indicating approval or denial. The auditor is responsible for registration and travel arrangements.

The TAD-14 form is available on the Department's intranet web site (the Sp-IDOR web) under Core Resources/Forms/Training. See Exhibit D at the end of this Chapter for an example.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1.9.2 MAKING TRAVEL ARRANGEMENTS

Cost information for travel arrangements should be obtained as soon as the employee is aware of a need to travel, so that the Travel Authorization Form and other appropriate forms can be prepared and approved in a timely manner.

All travel arrangements for authorized state business are required to be made through the Department's offices:

- The IDOR Travel Office makes arrangements for hotels, flights, rental cars, trains, etc. It is located on Level 6SW of the Willard Ice Building, or can be reached by calling [redacted] or emailing [redacted]. The Travel Office's mailing address is:

  Illinois Department of Revenue
  Travel Office
  101 West Jefferson, 6-515
  Springfield, Illinois 62794

- Pool cars are handled through the IDOR Motor Pool Coordinator of the Fleet Management Section of Operational/Special Services Division [redacted]

The Department has contracted to have a travel credit card for the Agency. This credit card is required to be used for most transportation and related expenditures (other than personal automobile travel or ridesharing services) as well as accommodations, unless an authorized exception has been granted. The credit card provides a means to directly bill the Department for the more significant expenses of state authorized travel. The Travel Office is the keeper and authorized user of the credit card. The individual traveler, however, is required to obtain receipts for the direct billed items and submit the receipts with their Travel Voucher for reconciliation to the credit card statement.

Employees must also send an email with attached copies of direct billing receipts (hotel, car rental, air travel, train) to [redacted] at REV. AuditTravelLiason @Illinois.Gov. It is a requirement by the Auditor General's Office that copies of all direct billed receipts are maintained by the Audit Bureau.

The following sections address various topics of concern when handling travel arrangements. **Refer to the State Employee Travel Guide from CMS, the Department's Travel Rules and the Travel Voucher Checklist in Exhibit E at the end of this Chapter for more specifics related to each topic.**

1.9.2.1 TRANSPORTATION ARRANGEMENTS

The CMS Trip Cost Calculator must be utilized to determine the most economical means of travel. The employee should travel by the most economical means as determined by the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Calculator. Transportation can be arranged through the Travel Office for airline flights, rental cars and Amtrak trains. State owned pool cars are handled by the employee through Fleet Management as indicated above. Ridesharing services and personal vehicle transportation methods are handled directly by employees.

1.9.2.1.1 RIDE SHARING SERVICES

Taxicabs, shuttle vans, Ubers, and Lyft can be used when conducting state business if they are the most economical means of transportation. Arrangements for these services are made by the employee, and are not directly billed to the Department. Reimbursement of the cost is requested through the Travel Voucher.

In order to get reimbursed for Uber and Lyft ridesharing services, auditors are required to use the lowest cost services that car sharing services offer such as “Uber X” and Lyft Standard”. Auditors will not be allowed to claim reimbursement for rides obtained by using “Uber XL”, “UberSELECT”, “UberBLACK”, “UberSUB”, “UberLIX”, or”LyftPlus”. Further, auditors need to be aware that both services charge users more during times of high demand. Uber’s “Surge Pricing” and Lyft’s “Prime Time” can go into effect anytime there are a large number of users. Both Lyft and Uber will let you know in advance when prime time or surge pricing is in effect. Rides obtained during these higher cost periods are not reimbursable and if taken must be paid for personally by the auditor.
Reasonable transportation tips for cabs or shuttle vans will be reimbursed.

1.9.2.1.2 AIRLINE RESERVATIONS

The Department operates a fully automated in-house travel service that must be utilized by employees when making all flight reservations for authorized business travel. The Travel Office will make the travel arrangements through an on-line reservation system and will direct bill the airfare charges to the Department’s credit card. Individuals responsible for making group travel arrangements shall also contact the Travel Office for assistance. Reimbursement claims for travel arrangements which are not made through the Travel Office may be rejected or delayed. .

Making Reservations

- The employee should specify what time he/she is required to be at their destination.
- The reservationist will advise the employee of flights meeting this requirement.
- The employee may specify a particular flight desired.
- The reservationist, in consultation with the employee, will make every effort to book the least expensive flight, taking into account departure and arrival times, logistical considerations in the cities of origin and destination, and ticket restrictions.
- When booking travel, employees are expected to account for full work days. Deviations from this may be brought to the attention of the traveler’s supervisor by the Travel Office.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- Employees must notify the Travel Office of any changes to travel plans.
- Employees must immediately report lost or stolen tickets to the Travel Office
- Non-refundable airfares will be booked only with the advice of the Travel Office management.

Ticket Delivery

The Travel Office does not deliver tickets. Tickets will be e-tickets which are stored in the on-line reservation system and the airline computer system. The employee will receive an e-mail which will provide the traveler with the required information and instructions on how to use the e-ticket.

Unused and Partially Used Tickets

- When reservations are cancelled and no portion of the e-ticket will be used, the traveler must notify the Travel Office no later than the next working day.
- Notify the Travel Office as soon as possible for any unused or partially used e-tickets so that credit can be obtained.
- If, per the instruction of the Travel Office, the employee purchased the ticket himself/herself and no portion of the ticket will be used, the employee shall be responsible for returning the ticket to the airline to receive credit.

  - When a ticket is partially used, the employee shall return the unused coupon(s) with the Travel Voucher (Form C-10), whether or not the employee is eligible for reimbursement of travel expenses. NOTE: The unused coupon(s) must be attached to the FRONT of the Travel Voucher.
  - Until partially used tickets are accounted for, any reimbursement due the traveler may be withheld. Payment is not made for partially used tickets until the credit for the unused portion appears on the airlines statement.

1.9.2.1.3 AUTOMOBILES

The Travel Office will make arrangements for rental cars if they are the most economical mode of transportation per the CMS Trip Cost Calculator. Agency owned pool vehicle or personal car arrangements are handled by the employee, if they are the most economical mode of transportation.

Rental Cars

- Travel Office arrangements for rental cars are directly billed to the Department, so employees must submit the rental car receipt with their Voucher.
- It is the employee’s responsibility when renting the vehicle to waive the collision damage and personal accident insurance. These will not be reimbursed. The state of Illinois is self-insured. In the agreement with the rental car company, $1,000,000 liability protection is included in the rental rate.
- It is the employee’s responsibility to inspect the renal before leaving the rental agency to ensure that all existing body damage is indicated on the agreement.

- GPS rental or Toll Pass rental will not be reimbursed. They are the responsibility of the traveler.
- Parking tickets or traffic tickets will not be reimbursed.
- Fuel receipts must be submitted with the Travel Voucher.

Agency Owned Pool Vehicles

- Agency vehicles are maintained out of the Willard Ice Building for employees who require a vehicle on occasion for conducting state business.
- In order to use a pool car, the auditor is required to submit form OSD-155 "Request for Use of Vehicle" to his/her Division Manager for signature. The form can be found on the Sp-IDOR under Core Resources/ Forms/Request for Use of Vehicle OSD-155
- All arrangements for scheduling, pick-up and drop-off are handled through the Fleet Management Section Motor Pool Coordinator at

Personal Vehicles

- Use of a privately owned vehicle requires that the employee certify on the travel voucher that he/she is duly licensed and carries at least the minimum required insurance coverage per the Travel Rules
- All travel must be by the most direct route. Expenses due to deviations for personal convenience are the responsibility of the employee.
- Reimbursement for the use of privately owned vehicles is on a mileage basis.

Reimbursable Transportation-Related Expenses to Note

- Automobile parking fees and tolls. Anything over $10 requires a receipt.
- Parking fees at a terminal or other parking area while the traveler is away from headquarters, but only to the extent that the fee plus mileage to and from the terminal does not exceed the estimated cost for use of a limo or taxi.
- Valet parking up to $30 per day. Anything above that amount must have an Exception Letter from the Travel Control Board.

Reporting of Vehicle Accidents

If an accident occurs involving a private vehicle while it is being used for state business, the insurance policy on the private vehicle is the primary coverage source. It is the responsibility of the auditor to ensure that the minimum required coverage is maintained. Liability amounts in excess of this primary coverage will be the responsibility of Illinois state government. A copy of any accident report (Form SR-1) and the Vehicle Accident Questionnaire (Form OSD-27) are to be sent to the Fleet Management Section **within 48 hours of the accident.** Drivers of any vehicle, whether privately owned, state owned, or leased, must have a valid driver's license.

If involved in an accident while driving on official state business, follow these steps:

1. Notify your insurance company as you would for any other accident.

2. Obtain and complete Form SR-1, Illinois Motorist Report, from the Illinois Department of Transportation.
3. Complete IDOR Form OSD-27 (Vehicle Accident Questionnaire). This form is available on the Department's intranet under Core Resources/Forms/Vehicle Forms.
4. Prepare a brief narrative, in your own words, of the facts concerning the accident and attach it to Form OSD-27.
5. Mail original Form SR-1 to:
   Illinois Department of Transportation
   Accident Records Section
   3215 Executive Drive
   Springfield, IL 62766-0001

6. Mail a photocopy of all accident reports, including Forms SR-1 and OSD-27, **within 48 work hours** to:

   Fleet Management Section 1-116
   Illinois Department of Revenue
   101 West Jefferson
   Springfield, IL 62702

1.9.2.1.4 TRAINS

Arrangements for Amtrak must be made by the Department's Travel Office, if this is the most economical mode of transportation, and the train schedule meets the employee's needs. State employees receive discounted rates for travel between Springfield and Chicago during the work week. Advanced reservations are required to receive the state rate.

1.9.2.2 ACCOMMODATIONS ARRANGEMENTS

Arrangements for hotel accommodations must be made in advance (with sufficient time for preauthorization) through the Department's Travel Office. Accommodations charges are directly billed to the Department's travel credit card, and the traveler must secure a receipt to be submitted with their Travel Voucher.

The CMS travel rules require that the lowest available lodging rate be obtained when traveling on official state business. The State of Illinois requires employees who are traveling on official State of Illinois business to **first** contact hotels listed in the Preferred Hotel listing maintained by CMS when seeking overnight accommodations. The Department's Travel Office will do this when making arrangements. If the Travel Office has to secure a hotel rate that is over the allowable limit, they will secure an Exception Letter from the Travel Control Board which must be attached to the Travel Voucher. When the employee has an Exception Letter, the state will pay for the higher rate. For specific rules for permissible lodging at a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

hotel that is not on the Preferred Hotel Listing, please see the Department's Travel Rules Subsection 3: Accommodations.

Non-Reimbursable Accommodation Expenses to Note

- If the employee makes their own lodging reservations, reimbursement will not be made for any cost greater than what the State's Travel Guidelines allow. The Travel Office will NOT obtain an Exception Letter from the Travel Control Board for employees securing their own lodging reservations that are higher than the allowable rate.
- Lodging at headquarters or residence will not be reimbursed.
- If an employee chooses to upgrade their room they will be responsible for the additional cost above the allowable rate, or lowest rate available.
- An employee will not be reimbursed for lodging if he/she chooses to stay at a private residence of a friend or relative.
- While the on line marketing site Airbnb may at times offer lodging within or lower than the maximum lodging rate in certain areas, the State of Illinois will not reimburse employees who choose to obtain lodging through Airbnb while traveling on State of Illinois business.
- Late check-out and room guarantee charges are not reimbursable.
- Any charges in excess of the allowable lodging rate including such things as room services, restaurants, movies, personal phone calls, and other personal expenses must be paid by the traveler upon checkout. These are not reimbursable expenses.

1.9.2.3 CHANGES TO TRAVEL ARRANGEMENTS

Whenever changes need to be made to established arrangements that were secured by the Travel Office, the Travel Office should be notified to assist in the modifications.

Changes to airline tickets or lost tickets that incur a fee will need to have the Travel Office obtain an Exception Letter from the Governor's Travel Control Board which must be included with the Travel Voucher.

Changes to hotel reservations MUST be secured in a timely manner through the Travel Office. For early departure, the Travel Office can assist in eliminating any early departure fee, or obtaining an Exception Letter from the Travel Control Board if the hotel does not remove it. Cancellations should be made by the Travel Office to avoid being charged for a "no show" room. If the employee is unable to reach the Travel Office in a timely manner to make the cancellation, they must contact the hotel themselves to cancel before a cancellation fee is assessed. They should keep the cancellation number for verification and send a copy of the cancellation information to both REV.AuditTravelLiason@IL.gov and to the Travel Office. If the Travel Office was timely notified of the cancellation request and is unsuccessful in their request for the hotel to remove the fee, the Travel Office will obtain an Exception Letter from the Travel Control Board. This Letter is required to be attached to the Travel Voucher for reimbursement for the cancellation fee. If the employee fails to notify the Travel

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Office to cancel a reservation or does not cancel the reservation themselves in a timely manner when unable to reach the Travel Office, the employee will be responsible for the cancellation fee.

1.9.2.4 ARRANGEMENTS FOR MEALS: PER DIEM AND MEAL ALLOWNACES

Travelers are responsible for making their own meal arrangements. Depending upon the type of travel and the timing of travel, either a per diem rate or a meal allowance may be permitted to help cover the cost of meals while on state authorized business. For current reimbursement rates and specific rules for when meal allowances and per diem are allowable, please refer to the CMS Travel Guide Subpart E: Per Diem/Meals, and the Department's Travel Rules, Subsection 4: Reimbursements & Allowances.

1.9.3 RECORDKEEPING DURING TRAVEL

It is the responsibility of the traveler to maintain documentation and original receipts for all state-authorized travel. Receipts and documentation for authorized expenses are to be submitted with the Travel Voucher for justification of the reimbursement claim.

1.9.3.1 RECEIPTS AND DOCUMENTATION FOR EXPENSES

Following are examples common items that must be submitted with the Travel Voucher:

- Original receipts for any reimbursable item over $10 paid by the traveler (if smaller than 8 ½" x 11", must be taped to an 8 ½" x 11" paper)
- Original receipts for gas for rental cars, regardless of the amount
- Original receipts for direct billed items such as for lodging, rental car, airline tickets, and train tickets
- Exception Letters for such things as fees for changes to tickets, fees for cancellation of reservations, authorized hotel room rates that are above the state rate, etc.
- Missing Receipt Statements – if a receipt was not provided for an expense over $10, or it was lost, the employee can complete a Missing Receipt Statement to take the place of the receipt. See Exhibit G at the end of this Chapter for an example.

1.9.3.2 RECORDING TRAVEL TIME FRAMES

Travel time frames must be recorded on the Travel Voucher for each day, so the employee is responsible for accurately keeping track of these times. Departure times recorded on the Voucher for the start of the day should reflect the actual time the employee leaves their home or hotel. Travel Voucher arrival times at the beginning of the day should reflect the actual time the employee arrives at the destination. Departure times at the end of the day should be the actual time the employee leaves the taxpayer. Arrival times at the end of the day should be the actual time the employee returns home or to their hotel. Travel to obtain meals for

lunch when meals cannot be procured at the taxpayer location should be separately stated on a line for “Vicinity” travel.

See Chapter 1 Section 1.7.3 Recording Daily Arrivals and Departures for how travel time frames should be recorded for purposes of other reports.

1.9.4 TRAVEL VOUCHER REQUIREMENTS

In order to receive reimbursement for authorized travel expenses, employees must complete a Department Form C-10 Travel Voucher. Following are some general points to remember when completing Travel Vouchers:

- Each travel voucher is limited to travel that occurs in the same calendar month. All trips on a travel voucher must have ending service dates in the same calendar month. Any trip that crosses over a month’s end must be included on the next month’s travel voucher.
- If the time frame of a trip requires two different voucher templates for different reimbursement rates, then the trip will need to be split into two vouchers based upon the templates for each rate.
- **Be sure to sign both copies of the travel vouchers**
- Direct-billed items must be indicated and deducted on travel vouchers. Supporting documentation must be attached.
- Original receipts for all reimbursable items must be attached.
- Required comments must be included in Box 30.
- Approved In-state Travel Request Form, Out-of-State Travel Request Form, or TAD-14 Attendance Request for Conference or Meeting must be attached.

The Department maintains a Travel Voucher form that is located on the Sp-IDOR under Items of Interest/Travel/Travel Forms. Make sure to select the Audit version as indicated by the word (Audit) in parenthesis. Also ensure the applicable version for the travel timeframe is utilized. New versions are created when reimbursement rates change.

1.9.4.1 TIMELY FILING OF TRAVEL VOUCHERS

Travel Vouchers must be filed **TIMELY** within the guidelines established by the Department. Both the Office of the Auditor General and the Department’s own Internal Audit Division conduct regular audits of the Department’s compliance with these guidelines. To avoid audit findings, make sure all vouchers are filed in a timely manner.

- Travel vouchers must be submitted to supervisors for approval and are required to be **in Springfield by the 15th (fifteenth) working day following the end of the month** in which the travel occurred, and
- Travel vouchers are due **in the Accounts Payable Division within 30 (thirty) days** after the end of the month in which travel occurred.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- If your reimbursable expenses are less than $50, wait to the end of the month to submit a voucher, unless no further travel is anticipated within the month. A statement of such should be written on the voucher in Box 30.

Since the Audit Bureau has the unique circumstances of having staff dispersed across the country, we have challenges in meeting these requirements due to mail time. Despite this, we are NOT granted any extra time to account for mailing. Both Internal Audit and the Office of the Auditor General still require that we meet these timeframes. Accordingly, we recommend the following to prevent future audit findings in this area:

- Travel Vouchers should be submitted to the supervisor as close to the end of the month as possible. Make every attempt to submit it by the third day after the close of the month. If weekly vouchers are prepared, please submit them on a weekly basis rather than holding them until the end of the month.
- Supervisors should quickly review the vouchers and return them for any needed corrections. Make every attempt to sign the Travel Voucher and mail it to the Audit Bureau no later than the 15th day of the month (rather than the 15th working day of the month). The earlier the better, since it is not unheard of for mail to take 10 days to reach Springfield. This will allow some cushion for mail time, since the voucher must go through another step in Springfield before going to Accounts Payable.
- Once the voucher is received in Springfield, it must be entered into the Audit Bureau's travel voucher system. Then it can be sent to Accounts Payable by the 30th day after the end of the month.

1.9.4.2 TRAVEL HEADQUARTERS DESIGNATION AND MILEAGE LIMITATIONS

Employees must take two "headquarters" into consideration when completing their travel voucher. They serve different purposes, and must not be confused:

Office Headquarters Facility

The office headquarters facility is shown simply as "headquarters" on the Travel Voucher Box 6. It is the facility that the employee's position with the Department is associated with in our organizational structure. Following is a summary for the various scenarios.

- In-house employees – This is the city and state where the employee's work facility is located.
- In-state field employees – This is the city and state where the employee's office is located.
- Paramus, NJ – This is the Paramus, NJ facility if the employee's position was hired to report directly to the Paramus, NJ office. This does not include those hired to be resident field auditors reporting to a NJ supervisor (see the next dot point.)
- Out-of-state resident field auditor/supervisor – This is the employee's city and state of residence.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Travel Headquarters

For purposes of completing the Travel Voucher, the travel headquarters is an important distinction since it plays a significant role in the amount of mileage that the auditor will be reimbursed. It is not necessarily the same as the office headquarters facility. The definition of an employee's travel headquarters designation was a part of an agreement between the Department and AFSCME on 06/01/1997. The following excerpts from that agreement define travel headquarters and mileage limitations:

- The parties agree that effective June 1, 1997, Revenue Field Auditors and Revenue Field Collectors shall have their home designated as headquarters for travel purposes only.
- Such Auditors and Collectors will not be reimbursed for travel expenses to or from their designated work headquarters, except for mileage in excess of thirty (30) non-reimbursable miles one way.
- The non-reimbursable miles traveled to and from the work headquarters will not exceed one hundred and eighty (180) miles per week.

It is understood by the parties that if an employee's residence or work area changes or if new employees are hired, the designation of travel headquarters will be dealt with on a case by case basis.

Given this agreement, the following will determine an employee's travel headquarters:

- In-house employees – This will be the same as the employee's office headquarters facility city and state since they are not field employees.
- In-state field auditors – This will be the employee's residence city and state.
- Out-of-state resident field auditors – This will be the employee's residence city and state.
- Out-of-state Paramus, NJ auditors – This will be the employee's residence city and state.
- Field supervisor with travel headquarters as home – This will be the employee's residence city and state.
- Field supervisor with travel headquarters as office – This will be the employee's office headquarters facility city and state.

Round Trip Commuting Miles (RTCM)

Travel regulations also require that round trip commuting miles (RTCM) from the employee's residence to the office headquarters facility be deducted in most situations from the total miles for reimbursement when driving a personal vehicle. Following will determine how RTCM will impact various employees on their Travel Voucher:

- Out of state resident field auditors and out of state resident supervisors have zero RTCM since their home is their office facility headquarters.
- In-state field auditors, out-of-state field auditors based from an office, CAA, and field supervisors (excluding out-of-state resident field supervisors) whose travel headquarters is their home must enter their RTCM from their residence to their office headquarters facility. They must only take RTCM into consideration when

they travel directly to the office, or from the office directly to their residence. They will not be reimbursed for travel to or from their office headquarters facility, except for mileage in excess of 30 non-reimbursable miles one way, up to a maximum of 180 miles per week.

- All in-house auditors, in-house supervisors and field supervisors whose travel headquarters is their office must enter their RTCM based on their commuting miles from their residence to their office. Per the Governor's Travel Control Board Travel Update 15-02, as a result of an arbitration ruling all AFSCME Council 31 represented employees are exempt from the requirement that they deduct their ordinary commuting mileage from otherwise reimbursable mileage for days that they **DO NOT** travel through headquarters. Any AFSCME Council 31 represented employee seeking mileage reimbursement for days when he or she DID NOT travel through headquarters should clearly indicate on all relevant travel vouchers in Box 30 that he or she is represented by AFSCME Council 31. To be clear, the requirement to deduct commuting mileage for days where they **DO** travel to or from headquarters is still in effect for AFSCME Council 31 members. Employees that are not represented by AFSCME Council 31 must follow the Governor's Travel Control Board Travel Update 14-06. They will always be required to deduct the full amount of their RTCM, regardless of whether or not they travel through their headquarters.

1.9.4.3 CODES USED ON THE TRAVEL VOUCHER

There are two types of codes utilized on the Travel Voucher to which all expenses must be allocated. Expense Object Codes are utilized by Voucher Processing to classify information for the Budget Office so that the expenses related to each category can be tracked. Audit Bureau Codes are utilized by the Audit Bureau to further categorize expenses for our travel budget.

Expense Object Codes:

- Code 1291 – In-State travel of state employee. All travel in the state of Illinois is considered to be code 1291. It does not matter if the employee's position is based in another state.
- Code 1292 – Out-of-state travel of state employee. All travel outside of Illinois is considered to be code 1292.
- Code 1295 – Travel mileage.

Audit Bureau Codes

- Code 100 – Used for regular audit travel and travel associated with regional meetings, staff meetings, regional training classes and hearings.
- Code 200 – Used for travel associated with training or curriculum classes developed by the Audit Bureau, and meetings called by Bureau Management (currently only used for RAT classes)
- Code 300 – Used for travel associated with special assignments or projects directed by Audit Bureau management (i.e. Business Plan project teams)

1.9.4.4 REQUIRED COMMENTS ON THE TRAVEL VOUCHER

There are many situations which require comments on the Travel Voucher in Box 30. Comments can also be made when there is need to explain or clarify specific charges. If the comments are not included, processing of the voucher can be delayed.

Following are some example situations:

- “Exempt from the in-state travel policy” must always be included when conducting audit related duties. This alerts Voucher Processing that the person is able to utilize the Blanket Exemption from the In-State Travel Request Form and provides justification for omitting it from the Travel Voucher when conducting a core audit function.
- Required when claiming mileage: "Please reference the agreement between AFSCME and IDOR travel policy for Revenue Auditors effective 06/01/1997 regarding mileage from their designated travel HQ (home) to work HQ."
- Normal work hours 8:30 am – 5:00 pm
- Rode with co-worker
- Stayed with family, friends
- Stayed at conference hotel (If lodging is over the allowable rate, this comment will replace the need for the Travel Control Board Exception Letter.)
- Dinner provided with conference on mm/dd/yyyy
- State pool vehicle used

1.9.5 TRAVEL VOUCHER CHECKLIST

Listed below in Exhibit F is a Travel Voucher Checklist. This Checklist has been developed to assist staff in the proper completion of travel vouchers. The Checklist is a reference document that outlines information relevant to Audit travel, and it walks through the electronic Travel Voucher completion indicating what is required for each box of the Voucher.

Please refer to this checklist and the Department Travel Rules when preparing your voucher to ensure you have completed it accurately. Managers should also refer to this checklist to ensure that vouchers are completed properly before approving and submitting for processing.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

EXHIBIT D: TAD-14 ATTENDANCE REQUEST FOR CONFERENCE, MEETING, OR TRAINING

Illinois Department of Revenue

For HRD Use Only
Sub-A ____________

TAD-14 Attendance Request for Conference, Meeting, or Training

File **all requests** six weeks in advance. **Form must be typed**

Step 1: Conference or meeting information

1 Attach copies of all attendance materials. (*i.e.*, program agenda, registration forms, attendee list)

2 Check the type of event. ☐ conference ☐ meeting ☐ training

3 Write the dates of travel. ___ ___/___ ___/___ ___ ___ ___ (Month Day Year) through ___ ___/___ ___/___ ___ ___ ___ (Month Day Year)

4 Tell us about the program and the sponsor.

a Program title ____________________ d Payee's FEIN ___ ___ — ___ ___ ___ ___ ___ ___ ___

b Program location ____________________ e Payee's name ____________________

c Sponsor ____________________ f Payee's address ____________________

5 Write the name, title, last 4 SSN, email address, and work area of each attendee. (If needed, attach an additional sheet using this format.)

Attendee's name	Title	Last 4 SSN	Email address	Work area

6 Why do you want to attend the conference, meeting, or training? (Specify agency benefits.)

____

Step 2: Registration fees

7 a Is prepayment of the registration fees required? ☐ Yes ☐ No

b Is this whole amount being paid by Publicus Federal Grant Funds? ☐ Yes ☐ No

8 What is the registration deadline? ___ ___/___ ___/___ ___ ___ ___ (Month Day Year)

9 Figure the total registration fees.

a Low fee rate (Date low rate ends ___ ___/___ ___/___ ___ ___ ___ (Month Day Year)) $ ________ x ____ attendees = $________

b Regular fee rate $ ________ x ____ attendees = $________

Step 3: Estimated travel and overtime expenses

10 a Transportation ☐ Airfare ☐ Train ☐ Car mileage ($0.565 per mile) $ ________ x ____ attendees = $________

b Hotel $________ x ____ nights = $ ________ x ____ attendees = $________

c Taxi to and from airport $ ________ x ____ attendees = $________

d Miscellaneous expenses (tips, car rental, parking, etc.) $ ________ x ____ attendees = $________

e Per diem* (**Not** paid for a quarter in which meals are provided) $ ________ x ____ attendees = $________

f Will the event and/or travel to the event result in overtime? If so, what is the estimated overtime cost? $________

g **Total travel and overtime expenses** (This figure does not include registration fees.) **Total** $________

*The rate for out-of-state travel is $8 per quarter. The rate for in-state travel is $7 per quarter.
Quarters: 12 midnight to 6 a.m. — 6 a.m. to 12 noon. — 12 noon to 6 p.m. — 6 p.m. to 12 midnight

Step 4: Approval of request

11 Forward your request to the following individuals for approval. (Please obtain signatures in the order listed below.)

Approved	Denied	Date	Signatures	
☐	☐	___ ___/___ ___/___ ___ ___ ___	____________	Division manager
☐	☐	___ ___/___ ___/___ ___ ___ ___	____________	Bureau manager

TAD-14 (R-03/14) IL-492-3692

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXHIBIT E: EXAMPLE OF TRAVEL VOUCHER COMPLETION FOR A REVENUE AUDITOR TRAINEE

For this example, the Revenue Auditor Trainee John Doe was hired to be a resident auditor in Orlando, Florida, where he currently lives. To attend the Revenue Auditor Training Class that is being held in Illinois, he drives his car from his house to the Orlando airport a distance of 4 miles, and parks his car for the week at a cost of $50. After landing in O'Hare Airport, he picks up his rental car for the week to use while he is in training. He has other expenses of $19.59 gas for the rental car for the week, $50 airline baggage fees ($25 each way), baggage handling tips ($2.00 each way), and per-diem for his meals for the week.

Following are some special items to note when completing the travel voucher:

PURPOSE OF TRAVEL
The purpose of travel that must be used for Revenue Auditor training is "Revenue Auditor Trainee Training". This would be placed in Box 29.

AIRLINE TICKET
The airline ticket was $500 round trip. The total amount of the airline ticket must be shown on 3-10-17.

The airline ticket was direct billed. Please make sure to answer YES in Column 13A of the automated travel voucher. With answering YES it deducts the airline amount from the reimbursement received by the auditor.

Even though the airline ticket was direct billed the e-mail showing the direct bill charge for the airline ticket must be attached to the voucher.

RENTAL CAR
The State of Illinois has a rental car agreement with Enterprise that has a set rate per day for rental cars in Illinois and all other fees and taxes are waived. The receipt will show the daily rate in one area and then also show fees and taxes, but the fees and taxes are credited back to the Revenue account monthly.

On the travel voucher, only show the total daily rate for the rental car.
The rental car total was $186.45, but the daily rate was $32.
$32 x 5 days = $160.00.

The total daily rate for the trip was $160 and must be shown on 3-10-17.

The rental car was direct billed. Please make sure to answer YES in Column 13A of the automated travel voucher. With answering YES it deducts the rental car amount from the reimbursement received by the auditor.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Even though the rental car was direct billed the Enterprise receipt showing the direct bill charge for the rental car must be attached to the voucher.

If the auditor rented a GPS, this could **not** be included on the voucher because the charges for a GPS are not reimbursable.

The auditor must make sure to re-fuel the vehicle before returning the rental car. No reimbursement is permitted if Enterprise re-fuels the vehicle.

LODGING

Lodging per day must be shown on the travel voucher. In the example voucher, the lodging rate was $137 per day plus $23.84 in taxes. So the amount being shown each day is $160.84.

The lodging was direct billed. Please make sure to answer YES in Column 14A of the automated travel voucher. With answering YES it deducts the lodging amount from the reimbursement received by the auditor.

Even though the lodging was direct billed the hotel receipt showing the direct bill charge for the lodging must be attached to the voucher.

See the example of the completed example voucher on the next page.

29 Purpose of Travel

Training

Revenue Auditor Trainee Training

I certify that I am duly licensed and have insurance in the minimum amounts as required by Illinois State Law.

This certifies that the travel shown above was required by official duties of the traveler named to my personal knowledge, or as indicated by records submitted to me. If applicable, the reporting requirements of section 5.1 of "An Act to create the Bureau of the Budget" have been met.

I certify that, in accordance with Section 12 of "An Act in Relations to State Finance", the above amount is correct and just; that the detailed items charged for subsistence were actually paid; that the expenses were occasioned by official business or unavoidable delays requiring the stay at hotels for the time specified; that the journey was performed with all practicable dispatch by the shortest route usually traveled in the customary reasonable manner; and that I have not been furnished with transportation or money in lieu thereof for any part of the journey therein charged for.

EXHIBIT F: TRAVEL VOUCHER CHECKLIST

Note: the items with the symbol indicate that this item must be attached to the Travel Voucher.

Step 1: Before Traveling

Travel Authorization – proper forms completed as needed, approved before travel, and attached to voucher when it is submitted.

- In State Travel Request Form (Use for attending staff meetings, training session, or for working at an IDOR facilities other than your assigned headquarters facility. **Not** needed for auditing taxpayers, for hearings or for litigation for those whose title is exempt from the In-State Travel Policy. See the Department's Travel Rules.)
- Out of State Travel Request Form (also for out-of-country travel. Requires Director and Governor's Office of Management and Budget approval **42 days before departure**. If out-of-state and does not require overnight lodging only the Director's approval is needed. This form is **not** needed for auditing taxpayers, for hearings, or for litigation for those whose title is exempt from the In-State Travel Policy. However, out-of-country travel always requires use of this form, even when for the purpose of auditing. Also use for attending out of state staff meetings, training sessions, or for working at an out of state office if you are not assigned to that office.)
- TAD-14 (for requesting attendance at an external conference, meeting, or training. Must be submitted for approval **42 days before departure**.)

Travel Arrangements – All travel should be done by the most economical options and transportation mode available, considering travel time, work requirements, and overall expenses.

- Contact the Department of Revenue's Travel Office [redacted] to arrange for hotels, flights, rental cars, etc. Pool cars are handled through the Motor Pool Coordinator of the Fleet Management Section of Operational/Special Services Division [redacted]. The State pool car license plate must be included on the Voucher.
- If a hotel room that meets the required state rate cannot be obtained by the Travel Office, the Travel Office will obtain an **Exception Letter** from the Travel Control Board. Print this off and it must be attached to the voucher to allow for the excessive rate.
- Utilize Trip Cost Calculator on CMS's website to determine the most economical means of transportation: http://www2.illinois.gov/cms/agency/vehicles/Pages/TripCostCalculator.aspx The employee should travel by the most economical means determined here.
- If private vehicles are the most economical mode of transportation, all travel should be by the **most direct route**. You may run MapQuest or Google Maps to determine the route. Justification of a different route should be provided if a substantially longer

distance route is used. Expenses due to deviations for personal convenience are the responsibility of the employee.

Step 2: During Travel
Changes to Arrangements

- Changes to airline tickets or lost tickets that incur a fee will need to have the Travel Office obtain an **Exception Letter** from the Travel Control Board. This must be included with the Travel Voucher.
- Cancellations to hotel reservations – (unused hotel room charges, early departure) Employees MUST notify the Travel Office to cancel a hotel reservation (or make the contact themselves) in a **timely** manner to avoid being charged for a "no show" room. Keep the cancellation number for verification. Send a copy of cancellation information to REV.AuditTravelLiason@IL.gov. If you made the cancellation yourself, send a copy to the travel office as well. An **Exception Letter** from the Travel Control Board must be attached to the Travel Voucher to be reimbursed if the hotel does not remove the fee. Otherwise, there will be no reimbursement for the cancellation fee.

Receipts

- Save all receipts for direct bill items. The **original** receipts must be attached to the agency copy of the voucher and a **copy must be sent to the Audit Bureau travel liaison** to complete monthly reconciliation of the credit card vendor statements. Receipts smaller than 8 ½ "x 11" must be taped to an 8 ½ "x 11" piece of paper:
  - transportation (airline, train, rental car)
  - lodging
  - gas for rental cars regardless of amount
- Save all receipts over $10 paid by the traveler. The **original** receipts must be attached to the agency copy of the Travel Voucher. Receipts smaller than 8 ½ "x 11" must be taped to an 8 ½ "x 11" piece of paper. If no receipt is provided, or if it is lost, then a signed statement from the employee certifying the details of the expense, purpose, date, and amount of the expense will be accepted.
- Remember what expenses will be reimbursed. Following are examples:
  - Reasonable baggage handling and storage tips
  - Reasonable transportation tips for cabs or shuttle vans
  - Automobile parking fees and tolls
  - Subway or bus fare
  - Only UberX and Lyft Standard with no Uber Surge Pricing or Lyft Prime Time (reference Governor's Travel control Board Travel Update #17-03)
  - Valet parking up to $30 per day. Anything above that amount must have an Exception Letter from the Travel Control Board.

- Parking fees at a terminal or other parking area while the traveler is away from headquarters, but only to the extent that the fee plus mileage to and from the terminal does not exceed the estimated cost for use of a limo or taxi.
- Faxing or copying for business purposes (Note: this goes on a C-13 form instead of on the Travel Voucher)
- Where the nature and location of work at a temporary duty station are such that suitable meals cannot be procured there, the expenses of daily travel required to procure meals at the nearest available place shall be considered a necessary transportation. A statement of the necessity for such travel shall be noted on the voucher. (80 IL Admin Code 3000.610(c)).
- Laundry and dry cleaning of $30 or less for trips of seven or more consecutive days. Self-service laundry would require a signed and dated statement with charges and dates.
- Telephone calls for official State business (three minutes or less) to announce arrival, delay or change of plans, or to secure lodging. Must be reflected on hotel receipt per the Travel Control Board. (Reimbursement for these calls is not applicable to those with State cell phones).
- Weekend or other early departure travel, if a comparison of airline costs, plus per diem, hotel, etc. show a savings to the State. Submit comparison with voucher.

• Remember what expenses will **NOT** be reimbursed. These must be paid by the traveler. Following are examples:
  - Collision damage and personal accident insurance on rental cars.
  - GPS rental or Toll Pass rental
  - Uber XL, UberSELECT, UberBLACK, UberSUV, UberLUX, or LyftPlus, Uber Surge Pricing, or Lyft Prime Time
  - Alcoholic beverages
  - Coat check
  - Entertainment
  - Late checkout and room guarantee charges
  - Room upgrade costs above the allowable room rate
  - Movie rentals
  - Parking tickets or traffic tickets
  - Weekend or early departure travel for personal convenience
  - Expenses due to deviations for convenience
  - Where suitable meals are available in close proximity to the lodging or temporary duty station, there will not be reimbursement for travel to procure meals.
  - Lodging at a private residence owned by the employee, employee's friend or relative
  - Lodging at an Airbnb location

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Recording Travel Time Frames

- Travel Voucher Times
  - Vouchers should reflect the time the employee leaves their home, and arrives at the destination, and then when they leave the destination and return home. If on overnight travel, record the time you left the hotel, arrive at your destination, leave your destination, and return to the hotel.
  - Vouchers should also have a **separately stated line for "in vicinity" travel** such as for lunch purposes when meals cannot be procured at the temporary duty station, or to obtain dinner when on overnight travel.
- Log In/Log Out (LILO) Times
  - LILO must be completed daily to reflect the **actual** time that the employee begins working at the taxpayer's or other work location, leaves for lunch, returns from lunch, and leaves the taxpayer's or other work location at the end of their day. This is a requirement of the Fair Labor Standards Act.
  - LILO **must contain brief comments** if the employee starts at the taxpayer location or other work location later than their 8:30 AM start time, leaves the taxpayer's location or other work location earlier than their 5:00 PM end time, incurs a delay in travel, changes taxpayer locations, or utilizes a longer than customary driving route for a valid reason. Comments should be brief such as "weather delay," "road construction/re-routing," "location change," "accident delay/ re-routing," "shorter driving time than most direct route," "alternative site opens at 9:00 AM," "work at home," etc. Comments are also needed when taking benefit time off.

Step 3: After Travel

Timeliness of Travel Voucher Preparation

- Travel Vouchers must be submitted **TIMELY**. We do not want to incur any more audit findings related to untimely filing of travel vouchers. It is the Department's policy that the **supervisor must approve the travel voucher by the 15th working day following the end of the month** in which the travel occurred. **The voucher must then be submitted to the Accounts Payable Division within thirty (30) days after the end of the month.**

  Since the Audit Bureau has the unique circumstances of having staff dispersed across the country, we have challenges in meeting these requirements due to mail time. Despite this, we are **NOT** granted any extra time to account for mailing. Both Internal Audit and the Office of the Auditor General still require that we meet these timeframes. Accordingly, we recommend the following to prevent future audit findings in this area:

  - Auditors should have their voucher to their supervisor as close to the end of the month as possible. Please make every attempt to submit it by the third day after the close of the month. If you prepare weekly vouchers, please go ahead

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

and submit them on a weekly basis rather than holding them until the end of the month.
- Supervisors should quickly review the vouchers and return them for any needed corrections. Please make every attempt to sign the travel voucher and mail it to the Audit Bureau no later than the 15th day of the month (rather than the 15th working day). The earlier the better since it is not unheard of for mail to take 10 days to reach Springfield. This will allow some cushion for mail time, since the voucher must go through another step in Springfield before going to Accounts Payable.
- Once the voucher is received in Springfield, it must be entered into the Audit Bureau's travel voucher system. Then, it can be sent to Accounts Payable by the 30th day after the end of the month.

Timeframe Included on the Travel Voucher
- If your reimbursable expenses are less than $50, wait to submit a voucher at the end of the month unless no further travel is anticipated within the month. A comment will be needed in Box 30 to indicate there is no further expected travel.
- Generally, only one month of travel should be included per voucher, unless you are on a trip at the end of the month. If your trip crosses over two different months, you must submit a separate voucher for only that trip that crosses over two months. All ending dates of travel must be in the same month.
- If your trip puts you on different voucher templates for different reimbursement rates, then you will need to split the trip into two vouchers based on the templates for the rates.

Completion of the Travel Voucher
The Department's automated Travel Voucher can be obtained on SPIDOR web page under the "Items of Interest" tab. Select the menu item for "Travel," "Travel Forms," and then select the appropriate Audit Travel Voucher for the period you are completing. **Make sure to select the Audit version as indicated by the word (Audit) in parenthesis.**

Personal Info Tab
Start your voucher completion with the **Personal Info tab**. **Make sure to use all capital letters for this tab**. Please pay careful attention to the information below on your headquarters, and travel headquarters, to complete them accurately so that we do not incur audit findings.
- **Social Security Number** – This box will automatically pre-fill **Box 1** of the final Travel Voucher. Use X's to mask the first five digits of your social security number. Enter the actual numbers for the last four digits.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- **Name and address information** – enter your full name and full **personal mailing** address. This name must be entered "last name, first name." This box will automatically pre-fill **Box 2** of the final Travel Voucher.
- Headquarters (city) – This box will automatically pre-fill **Box 6** of the final Travel Voucher. **PLEASE VERIFY YOU HAVE FOLLOWED THE INFORMATION BELOW**:
  - ➢ In-house – this is the city and state where your work facility is located
  - ➢ In-State Field – this is the city and state where the employee's office is located
  - ➢ Paramus, NJ – This is Paramus, NJ if your position was hired to report directly to the Paramus, NJ office. This does not include those hired to be resident field auditors reporting to a NJ supervisor (see the next dot point)
  - ➢ Out-of-State Resident Field Auditor/Supervisor – this is your city and state of residence
- **Division or Area** – This should already show "Audit Bureau." If not, click on the Audit button. This will automatically prefill the heading of the final Travel Voucher.
- **Address, City, State, Zip** – This is pre-filled with the WIB information for the Audit Bureau for the heading of the final Travel Voucher. Do not change this.
- **S/A** – This is pre-filled with a number used by Accounts Payable. Do not change this.
- **RTCM** – List your round trip commuting miles (RTCM) to your headquarters facility. If you are an out-of-state resident field auditor or a resident field supervisor, you will not have any RTCM because your travel headquarters and work headquarters are the same. Enter zero on this line. All in-house auditors, in-house supervisors, CAA, Paramus NJ field auditors, Paramus NJ supervisors, in-state field auditors and in-state supervisors must enter RTCM based on their commuting miles to the office. See Box 11 instructions for further explanation on how RTCM is used. This will automatically pre-fill the RTCM field in the **FOR EMPLOYEE USE ONLY** box on the final Travel Voucher.
- **Travel Headquarters** – This field must be manually entered since Audit has some special rules for travel headquarters. It is not necessarily the same as your facility headquarters. This field will automatically pre-fill the TRAV. HQ field in the **FOR EMPLOYEE USE ONLY** box on the final Travel Voucher. **PLEASE VERIFY YOU HAVE FOLLOWED THE INFORMATION BELOW:**
  - ➢ In-house – this will be the same as your headquarters facility city and state.
  - ➢ In-state field auditors – this will be your residence city and state.
  - ➢ Out-of-state resident field auditors– this will be your residence city and state.
  - ➢ Out-of-state Paramus, NJ auditors – this will be your **residence** city and state.
  - ➢ Field supervisor with travel headquarters as home – this will be your residence city and state.
  - ➢ Field supervisor with travel headquarters as office – this will be your headquarters facility city and state.
- **Headquarters** – automatically fills in based on your Headquarters (city). No need to change this.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- **Residence** – automatically fills in based on your residence city. No need to change this. This will automatically pre-fill **Box 7** of the final Travel Voucher.

Entry Sheet Tab
Next, move to the **Entry Sheet tab** on the automated travel voucher. There are a series of boxes at the top of the screen. Most of this will be filled out **after** you complete the details in the Travel Information Section. The only one to verify before entering the Travel Information section is to ensure that the correct fiscal year is listed in the "Fiscal Year" box.

Travel Information:
Start with the Travel Information section that requires your daily entries. Most of the boxes/columns on the Travel Voucher have a corresponding box/column on the Entry Sheet tab.

- **Box/Column 8 – Date:** Enter the month, day, and year of your first day of travel (01/01/16). The same date can be entered on multiple lines if you made several stops during the day, or had "vicinity" travel for lunch. A separate line is needed for "vicinity" travel. Leave a space between dates of travel for ease of review.
- **Box/Column 9 – Departed From:** Place: Enter city and state you departed from. Time: Enter the time of day you departed, including AM or PM.
- **Box/Column 10 – Arrived At:** Place: Enter city and state you arrived at. Time: Enter time of day you arrived, including AM or PM.
  - When traveling to the assigned office, the employee must make a separate entry on the travel voucher using the words "office" or "headquarters."
- **Box/Column 11 – Auto Mileage:** Use this box/column if you drove your personal vehicle. Enter the number of miles you drove your vehicle as indicated by your odometer or MapQuest/Google Maps. If you drove a state pool vehicle, took a plane, train, rental car, cab, subway or bus, **do not** enter anything in this box. Refer to Box 13 below.
  - Whole numbers must be entered here. Please round your mileage. If your mileage was 9.4 miles, you would enter 9. If it was 9.5 miles, enter 10 miles.
  - In general, employees seeking mileage reimbursement must deduct their ordinary round trip commuting mileage (RTCM), regardless of whether or not they traveled through headquarters. (See below for further explanation for Audit employees.) The applicable commuting mileage should be entered in column 11 "Auto Mileage Non-Reimbursable" of the automated travel voucher. The automated voucher will then deduct the RTCM from the total miles automatically.
    - Out-of-state **resident** field auditors and out-of-state **resident** supervisors will enter **zero** as their RTCM, since their home is their work headquarters as well as their travel headquarters.
    - In-state field auditors, out-of-state field auditors based from an office, CAA, and field supervisors (excluding out-of-state resident field supervisors) whose travel headquarters is their home must enter their

RTCM from their residence to their headquartered office. They must only take RTCM into consideration when they travel directly to the office, or from the office directly to their residence. They will not reimbursed for travel to or from their headquarters, except for mileage in excess of 30 non-reimbursable miles one way, up to a maximum of 180 miles per week.

- All in-house auditors, in-house supervisors, and field supervisors whose travel headquarters is their office must enter their RTCM based on their commuting miles from their residence to their office. Per the Governor's Travel Control Board Travel Update 15-02, as a result of an arbitration ruling all AFSCME Council 31 represented employees are exempt from the requirement that they deduct their ordinary commuting mileage from otherwise reimbursable mileage for days that they **DO NOT** travel through headquarters. Any AFSCME Council 31 represented employee seeking mileage reimbursement for days when he or she DID NOT travel through headquarters should clearly indicate on all relevant travel vouchers in Box 30 that he or she is represented by AFSCME Council 31. To be clear, the requirement to deduct commuting mileage for days where they **DO** travel to or from headquarters is still in effect for AFSCME Council 31 members. Employees that are not represented by AFSCME Council 31 must follow the Governor's Travel Control Board Travel Update 14-06. They will always be required to deduct the full amount of their RTCM, regardless of whether or not they travel through their headquarters.

- Field employees will not be reimbursed for mileage to or from their designated work facility headquarters, except for mileage in excess of thirty (30) non-reimbursable miles one way.
- The total non-reimbursable miles traveled to and from the work headquarters for field employees will not exceed one hundred and eighty (180) miles per week. Once you have traveled more than the 180 miles per week to and from the work headquarters, you may claim the excess mileage to the work headquarters.

- **Box/Column 12 – Auto Reimb. :** This travel voucher box will automatically calculate based on your total number of miles driven (less RTCM) in box 11 times the auto reimbursement rate. No manual entry required. There is no field for this Travel Voucher box on the Entry Sheet tab of the automated travel voucher.
- **Box/Column 13 – Transportation:** Use this box only if you traveled by state plane, commercial airlines, rental cars, and Amtrak. If the transportation was direct billed, you must type YES in **column 13a.** If it was not direct billed, and you paid for it, type "NO" in column 13a. For other modes of transportation, see Box 16. For state pool car, see Box 20. For riding with another employee, see Box 30.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Attach a receipt for direct billed or employee paid transportation.

- **<u>Box/Column 14 – Lodging:</u>** If lodging was direct billed, enter the dollar amount for the lodging expense. Enter “YES” in column 14a. If lodging was paid for by the employee, enter the dollar amount for the lodging expense. Enter “NO” in column 14a. If the employee did not incur lodging expense because they stayed with family, friend, etc, enter an asterisk in Box 14, and describe the situation in Box 30. For conference hotel lodging, see Box 30.
  - Lodging is not a reimbursable expense at headquarters or residence.
  - If an employee chooses to upgrade their room, they will be responsible for the additional cost above the allowable rate, or lowest rate available.
  - An employee will not be reimbursed for lodging if he/she chooses to stay at a private residence of a friend or relative.

  Attach a receipt for **<u>direct billed or employee paid lodging</u>** expense. Attach an exception letter if lodging cost exceeds state travel guidelines.
- **<u>Box/Column 15 – Meals or Per Diem:</u>** Enter the per diem allowance that you qualify for. Deduct the appropriate amount if any meal was provided. (Refer to Section 3000.500b of the Travel Guide for State of Illinois Employees.)
  - Meals and per diem are not reimbursable at headquarters or at residence.
  - Per diem shall be paid for travel that includes overnight lodging or is 18 or more continuous hours.
  - Per diem starts with the time the traveler leaves residence/headquarters and concludes when the traveler arrives back to residence/headquarters.
  - Per diem is based on a quarter system. Each quarter shall be 6 hours commencing at midnight, 6:00 am, noon, and 6:00 pm. One-fourth the allowance is allowed for each six-hour period.
  - Meal allowances are given when the traveler is on travel status, but is not eligible to receive per diem. The traveler must have worked at least 10 consecutive hours and worked at least two hours prior to or past their regular work day to be eligible for a meal allowance. Lunch is not a reimbursable expenses. If claiming breakfast or dinner allowances, please note your normal work hours in Box 30.
  - Receipts are not required to support meal allowances or per diem.
  - Meal allowance and per diem cannot be mixed on the same trip or day.
  - If meals are provided for conferences or meetings, the value of these meals must be subtracted from either the meal allowance or per diem. You must specify the date and what meal(s) were provided in Box 30.
- **<u>Box/Column 16 – Other Expenses:</u>** In the column that says “Item,” describe the type of reimbursable expense being claimed. See previous section in Step 2 on Receipts for examples of allowable and unallowable expenses. List the amount of the expense in the “Amount” column. Box/column 16 is also used for other modes of transportation

that are not direct billed or private vehicles. Examples include cabs, subway, buses, shuttle service, mass transit, etc. If you group items, please only group like items together. If the total for the group exceeds $10, but without any single charge exceeding $10, you must make a comment in Box 30. The comment should read “no single *charge* exceeds $10.” In your statement, you must specify the type of charge such as toll, cab fare, or bus fare.

Attach all receipts for expenses in excess of $10.00. If a receipt is not available, a written statement signed and dated by the traveler certifying the type and amount of expense is required.

- **Box/Column 17 – Line totals**: the totals are calculated automatically for columns 12 - 16.

Top Portion of Entry Sheet Tab:
After entering all the Travel Information section, go back up to the **top** of the Entry Sheet page. The boxes at the top will help complete the rest of the travel voucher. The references to box/column numbers below correspond with the travel voucher. However, the Entry Sheet tab does not have these sections numbered.

- **Box/Column 18 – Expense Object:** This box is on the Travel Voucher to list the code numbers. There is no entry required in the automated Travel Voucher because code numbers will appear automatically. An explanation of the codes to be used are as follows:
  - Code 1291 – In-State travel of state employee. All travel in the state of Illinois is considered to be code 1291. It does not matter if your position is based in another state. Enter the portion of your expenses related to travel in Illinois.
  - Code 1292 – Out-of-state travel of state employee. All travel outside of Illinois is considered to be code 1292. Enter the portion of your expenses related to out-of-Illinois travel.
  - Code 1295 – Travel Mileage (automatically calculated by the voucher program based on the mileage entered. This is pre-populated into the box on the Entry Sheet tab.)
- **Box/Column 19 – Expense Object Amount:** The automated travel voucher addresses this box/column just above the Travel Information section near the top of the page on the Entry Sheet tab. After you have entered all your daily details in the Travel Information section, the program will pre-fill the total expense line, and the Code 1295 with any mileage reimbursement amount claimed. The remaining total to be accounted for will show just above the red words “You Must Enter Exp. Obj.” The appropriate amount(s) will need to be manually entered next to code 1291 or 1292, depending on the type of travel that was conducted. If you have accounted for too much expense, the message will change to “Exp. Obj. is Too High.” Corrections are then needed. If you have accounted for all of the expense amount, the message will change to “Exp. Obj. OK.”

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- **Box 20 – State License Plate Number:** The automated travel voucher has a box on the Entry Sheet tab (above the expense object box) that requires the employee to enter the license plate number of any state vehicle that is used for this voucher. If you use a state pool vehicle, you must fill in this box.
- **Box 21 – Box 28** – these boxes automatically total on the automated travel voucher. There are no manual entry boxes on the Entry Sheet tab.
- **Box 29 – Purpose of Travel:** A manual entry will not generally be needed into the Purpose of Travel box located at the top of the Entry Sheet on the automated travel voucher. Instead, when dollar amount information is entered into the Traveler Comments/Explanation box next to the various travel codes, a corresponding automated message will automatically fill in a Purpose of Travel into Box 29 on the tb-Final tab. The total dollar amount that will need to be accounted for can be found just under the red words "Expense Code Amounts to be entered:" A running total will be kept as you allocate amounts to the various codes as appropriate. The message "You Must Enter Exp. Codes" will display until you have coded all the expenses. Once you have coded all of the expenses, the red message will change to "Exp. Code OK." If you allocate more costs than you have, the message will read "Exp. Code Too High." The codes are as follows:
  - Code 100 – Regular audit travel and travel associated with regional meetings, staff meetings, regional training classes and hearings. The purpose of travel message displayed on the tb-Final tab is "Auditing"
  - Code 200 – Travel associated with training or curriculum classes developed by the Audit Bureau and meetings called by Bureau management (currently used only for RAT classes). The purpose of travel message displayed on the tb-Final tab is "Training."
  - Code 300 – Travel associated with special assignments or projects directed by the Audit Bureau management (i.e. Business Plan project teams). The purpose of travel message displayed on the tb-Final tab is "Special Projects."
  - Code 400 – used for relocation costs. The purpose of travel message displayed on the tb-Final tab is "Relocation."
- **Box 30 – Traveler Comments/Explanations:** Use this box to enter any additional comments or explanations which will further clarify specific charges. No abbreviations or acronyms are allowed by the Comptroller's office.
  - If you are one of the following Audit Bureau titles, you will need to include a message that you are exempt from in-state travel form. By checking the box on the Entry Sheet (next to the purpose of travel box) that says "Exempt from In-State Travel Policy," this message will automatically fill into Box 30 in the voucher. You will not need to type it.
    - Revenue Audit Assistant Division Manager
    - Revenue Audit Bureau Manager
    - Revenue Audit Assistant Bureau Manager

  - Revenue Audit Division Manager
  - Revenue Auditor Trainee
  - Revenue Auditor I
  - Revenue Auditor II
  - Revenue Auditor III
  - Revenue Auditor Supervisor
  - Revenue Computer audit Specialist
  - Revenue Special Agent Trainee
  - Revenue Special Agent
  - Revenue Senior Special Agent
  - Revenue Special Agent Supervisors
  - Bureau of Criminal Investigations Manager
- Examples of comments for other clarifications:
  - Rode with co-worker
  - Stayed with family, friends
  - Stayed at conference hotel (Note: If lodging is over the allowable rate, this comment will replace the need for the Travel Control Board Exception Letter.)
  - Normal work hours 8:30 am – 5:00 pm
  - Dinner provided with conference on 9/01/2016
  - State pool vehicle
  - Delay due to weather
  - "Please reference the agreement between AFSCME and IDOR travel policy for Revenue Auditors or Collectors effective 6-11-97 regarding mileage from their designated Travel HQ Home to work HQ." This message is automatically listed on the Audit version of the automated travel voucher.

- Review the completed voucher for accuracy by viewing it in the tb-Final tab.
- Print the voucher from the Entry Sheet tab by clicking on the "Print" button to the right of the Expense Object box.
- The voucher must be signed, dated, and submitted by both the traveler and the traveler's supervisor within the time frames outlined at the beginning of Step 3. Signatures must be original, in blue or red ink.

Disclaimer

This audit manual is a guideline for assisting and training auditors in the completion of their audits. Every audit is an independent review of a particular taxpayer's books and records. Every audit requires cooperation from taxpayers. If the taxpayer fails to maintain or provide the books and records required by statute or regulation or fails to timely comply with any reasonable request for documents or additional information, the auditor is authorized to use any reasonable procedure or method necessary to obtain the information necessary to determine the correct amount of a tax liability and to apply his or her best judgment in making that determination.

The failure to follow a suggested procedure or method, deviation from a suggested procedure or method, or any additional investigation outside the scope of a suggested procedure or method is at the discretion of the Department and shall not be grounds for invalidating any audit finding. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. The Department reserves the right to update, revise, or rescind this manual or portions thereof without notice.

Any references to statutes, regulations, case law, private letter rulings or general information letters are for background purposes for assisting the auditors. Nothing in this manual constitutes an official policy, legal position or interpretation of law sanctioned by the Department's Director, General Counsel or Legal Services Bureau.

This manual is intended for internal use only and if disclosed outside the Department for any reason shall not constitute written legal advice or guidance from the Department for purposes of the Taxpayers' Bill of Rights

GENERAL AUDIT PROCEDURES

I. INTRODUCTION

This chapter is meant to be applied to all tax types and covers reasonable cause, amnesty, and procedures for technical support assistance and compliance checks.

It is the mission of the Illinois Department of Revenue to collect state and local taxes as authorized by Illinois laws, to assist as directed with the tax matters of other units of government in this state, and to administer tax related programs as assigned. To achieve this purpose, and to instill public confidence in the integrity and efficiency of the State's tax programs, the Audit Bureau will pursue the following goals:

- Encourage and achieve the highest possible degree of voluntary compliance with Illinois tax laws.
- Work for the adoption of tax laws that are fair, simple to understand, and cost efficient for both the Department and taxpayers.
- Accurately and efficiently collect, deposit, process, and allocate tax revenues.
- Establish clear, concise, accurate and timely communications with the public (taxpayers, legislators, practitioners, employees, etc.).
- Maintain a workforce that demonstrates the highest standards of integrity, efficiency, and performance.

II. TECHNICAL SUPPORT

A. AUDIT TECHNICAL SUPPORT ASSISTANCE

1. GENERAL INFORMATION

During the course of an audit, auditors may encounter situations where they are unsure whether the taxpayer is properly following the applicable laws and regulations. Before discussing the issue with the taxpayer, auditors can request guidance from the respective Technical Support Section on how to proceed.

Below are the procedures for requesting that guidance:

1) The first step for the auditor is to research the issue by reviewing the available reference materials such as the audit manual, regulations, statutes, previous Technical Responses, etc.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2) If the auditor is unable to resolve the issue on their own, the next step is to discuss the issue with their supervisor. The supervisor should also research the issue to see if they can find a solution.
3) If the supervisor is unable to discover a solution, the next step is to discuss the issue with their Assistant Division Manager (ADM). The ADM will work with the auditor and supervisor to identify whether they have enough information to make a decision or should request guidance from the Technical Support Section.
4) If it is determined that guidance is needed from the Technical Support Section, the supervisor should forward the information to the respective Technical Support Supervisor explaining the issue and describing the research conducted up to that point. The supervisor should carbon copy the ADM.
5) The Technical Support Supervisor will review the submitted information and then assign it to an appropriate Technical Support Section auditor for further research.
6) The Technical Support Section auditor who receives the assignment should contact the auditor to discuss the situation and should then conduct further research. If necessary, they should discuss the issue with the Legal Services Bureau.
7) After completing their research, the Technical Support Section auditor should formulate an answer and present it to their supervisor for approval.
8) If the answer is approved, the Technical Support Supervisor will forward the response to the field auditor and supervisor.
9) The field auditor and/or supervisor should use the guidance received from the Technical Support Section when discussing the issue with the taxpayer. If the taxpayer disagrees with the guidance, the issue will be evaluated and a determination will be made as to whether a formal Technical Request is warranted. If it is determined that a TR is necessary, auditors should follow the procedures for obtaining a Technical Request.

B. TECHNICAL REQUEST PROCEDURES

1. PURPOSE

A request for technical support should be submitted in order for the Department to reach a proper defendable position for the proposed audit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

issue(s). These are not to be used in place of research by the auditor and supervisor.

Before submitting a technical request, you must advise the taxpayer that you will be doing so and provide them the opportunity to provide their position on the issue to include with the request; the taxpayer will be given a 2-4 week timeframe/deadline to provide their position. They will also be granted the ability to review the technical request you create to ensure they agree that the issue is framed properly and that their position is also included properly; again, a reasonable timeframe/deadline should be given to the taxpayer to review the technical request in order not to delay the process.

You will provide the taxpayer the decision reached on the issue(s) and some explanation, but you do not provide the technical response memo. You may provide the legal provisions provided with the technical response to the taxpayer and use as support in your audit documentation.

The technical memo that is created to respond to the question is a discoverable item and will be made available during any litigation if requested. As a result, it is important to be cognizant of this in crafting the original technical request as well in the technical response.

2. TECHNICAL REQUEST SUBMISSION

The request for technical assistance must be in memo form. This memo is written by the auditor. As noted above, the taxpayer will be allowed to review the memo and provide any support for their position on the issue. The Auditor must document in the EDC-5 when their memo was provided to the taxpayer, when the Auditor requested the Taxpayer's position memo, when they received the Taxpayer's position memo, and the date that the Technical Request was sent to Technical Support. Document that the taxpayer has reviewed and agreed that we have properly framed the questions and issues. Also document when the response was received from Technical Support and when Taxpayer was informed of the decision as stated in the Technical Request.

The auditor will submit the completed technical request and the taxpayer's position memo to their supervisor. The supervisor will forward to the Technical Support Supervisor, to log the request and initiate the internal processes. The supervisor should carbon copy the ADM.

The Technical Support Supervisor will request confirmation from the supervisor that the taxpayer was allowed to provide their support for the

position on the issue and that they have agreed that the memo has properly framed the issue from their perspective. If the supervisor is unable to provide that confirmation, the technical request will be rejected until the request can be submitted with the proper confirmation by the supervisor.

3. REQUIRED INFORMATION

The following must be included in the submitted request:

- Taxpayer name
- Account ID
- Audit ID number (Track number)
- Statute date
- Audit periods
- Issue to be researched/addressed
- Relevant attachments – spreadsheets, taxpayer documentation, such as invoices, contracts, taxpayer's explanation, etc., that are important to the audit issue. Do not attach every document from the audit file.

A technical request must be submitted with sufficient statutory timeframe remaining to allow for the request to be properly analyzed and addressed to give an accurate response. You should request any waivers necessary to have sufficient statutory time before submitting the request. You will remain responsible for ensuring statutes are protected. If we are unable to secure a waiver, we will need to determine if the issue should be included in the audit or not.

Specific questions should be submitted concerning the audit issue(s). Care should be taken with the language used in the request, since the taxpayer will have access to the document.

4. TECHINCAL SUPPORT TIME FRAME

Once the request has been assigned, the Technical Support Auditor should formulate a response and have it submitted for approval, within the procedural 60 day time frame. Under certain circumstances, the time frame needed for approval may be extended. The response time frame includes:

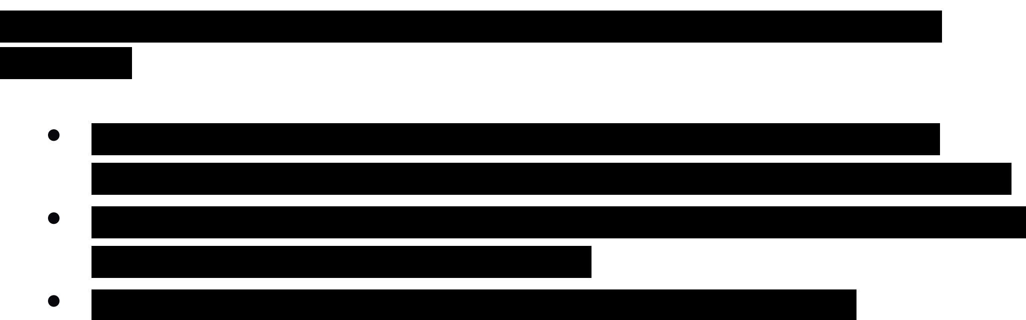
- Research of the audit issue

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Response write-up and possible meeting with Legal Services Office
- Approval by Legal, the Technical Support supervisor and Division Manager
- Distribution and placement on Sp-IDOR

Note: When formulating a response, Technical Support Staff should never refer to “draft” regulations as support for a determination/conclusion in the write-up of a technical request.

5. POST-REQUEST RELEASE



However, the auditor may do the following:

- Provide the taxpayer with the supportive authoritative provisions (whether from the Statutes, Department regulations, court decisions, etc.) that the Technical Request states. A copy of the actual technical response should **NOT** be given to the taxpayer.
- Utilize and reference the supporting authoritative provisions (whether from the Statutes, Department regulations, court decisions, etc.) that a Technical Request provides, for the defense of the audit position. Stating those supportive provisions is allowed in the EDC-5 or Auditor’s Comments, where warranted.

6. WHEN TECHNICAL REQUESTS ARE NOT ALLOWED

A Technical Request should not be submitted if:

- The auditor has issued the ICB letter;
- ICB has accepted jurisdiction of the audit case; and/or
- The audit is in litigation (Administrative Hearings, Tax Tribunal, or Court).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

In such cases, statutory support for the Department's position will be obtained by other means.

III. COMPLIANCE CHECKS

The uniform compliance approach, in general, is to assure that any taxpayer under audit is in compliance with all tax laws (both State and Federal); not just the tax presently being audited. Compliance checks should go back for **six** years. The six years applies to the actual current date not to the audit year(s).

Note: Any request to audit further than the six-year look-back period must be approved by the Assistant Division Manager (ADM) or the Division Manager (DM) for all tax types.

When completing an assignment, the auditor must determine and document that the taxpayer is properly filing returns under all appropriate tax laws administered by the Department and that there are no open periods. When the taxpayer is someone other than an individual, it is also necessary to determine whether the partners, beneficiaries or shareholders (in the case of a closely held corporation) are in compliance with Illinois' tax laws. All non-filing entities and individuals uncovered during compliance checks must be brought into compliance if the potential liability (which includes tax, penalty, and interest) is determined to be over the ████ tolerance. If a gross or intentional lack of compliance for a tax which is not being audited is found, make a referral by completing an SC-137, audit referral.

During the opening conference, the taxpayer should be informed that a compliance check of the business (unless unitary) and the owners (partners, shareholders, etc.) for all taxes administered by the Department (Income, Sales, Withholding, etc.) is a required part of the audit. The auditor must obtain copies of the Income Tax returns (both Federal and State) at this time.

If the required tax returns have not been filed, the Auditor should firmly encourage the taxpayer to prepare the returns and submit them before the close of the audit. If the taxpayer does not comply, the Auditor will refer the account to the Income Tax Audit Planning section for the review and possible establishment of an audit by filling out the SC-137.

A. TAX TYPES FOR VERIFICATON

The Department's uniform compliance approach requires that the Audit Bureau personnel verify individual income tax filing of all partners, shareholders, officers and sole proprietors during the course of routine audits of businesses.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor will apply the Uniform Compliance Approach to the following taxes:

- Business Income Tax (BIT)
- Withholding Tax (WIT)
- Sales Tax
- Individual Income Tax returns (IIT) for owners, partners, etc. of the entity being audited
- Any other miscellaneous taxes for which the taxpayer is liable

NOTE: WHEN LOOKING AT INDIVIDUAL INCOME TAX RETURNS IN GENTAX, THE AUDITOR MUST ENTER A CRM STATING THE REASON FOR THE INQUIRY.

There is no requirement for auditors to break out and separately account for audit hours spent on withholding or income tax compliance checks done in conjunction with ROT audit assignments. All hours devoted to reviewing these areas will be included in the hours charged to the primary assignment unless a liability is uncovered.

The auditor must make sure that the date of the compliance check is documented on the EDC-5 and the EDA-8, Audit Questionnaire. You should also document that you checked compliance in your audit narrative. This should include an explanation of what you checked, what you found, and the actions you took, if any, to bring the taxpayer into compliance. In STT the EDA-8, Audit Questionnaire, can be found in the STT Processing folder. The resulting two page report will be included in the audit package along with the EDC-5 and audit narrative.

1. TAX TYPES

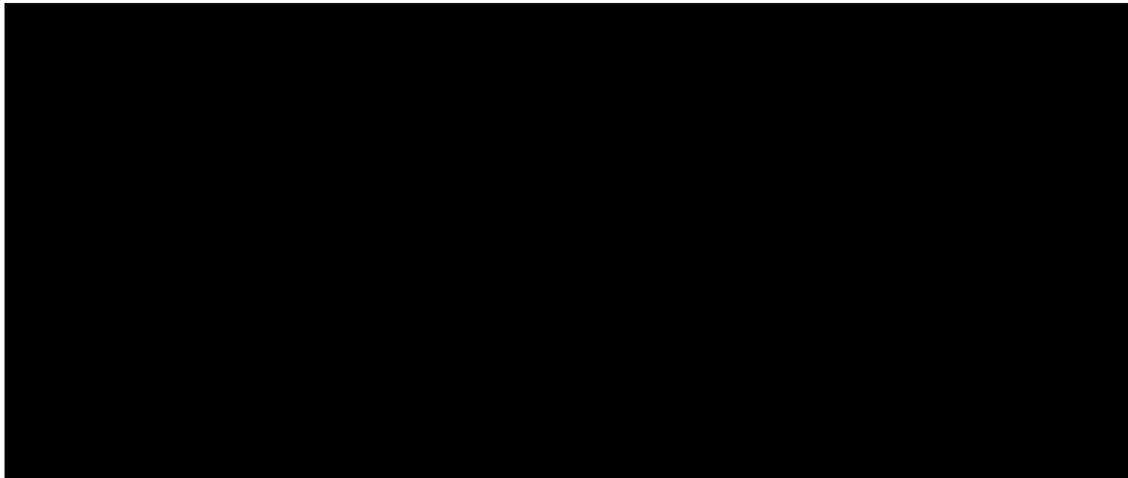
The Auditor must determine all of the tax types for which the entity is registered and the filing status of each type prior to the opening conference or very early in the audit. The filing status for both business entities and individuals must be verified for the same period as the audit. The Department's uniform compliance approach requires that Audit Bureau personnel also verify individual income tax filing of all partners, shareholders, officers and sole proprietors during the course of routine audits of businesses.

The Account column at the Customer Manager, lists all of the tax types for which the taxpayer is required to file returns. The objective of compliance checks is to verify that all returns have been filed. Reviewing the list of

returns in each Account Manager will show this. Within GENTAX, all of the taxpayer's accounts that have been converted into GENTAX can be found on the Customer Manager. The following table is an example of information that might be provided in the accounts panel:

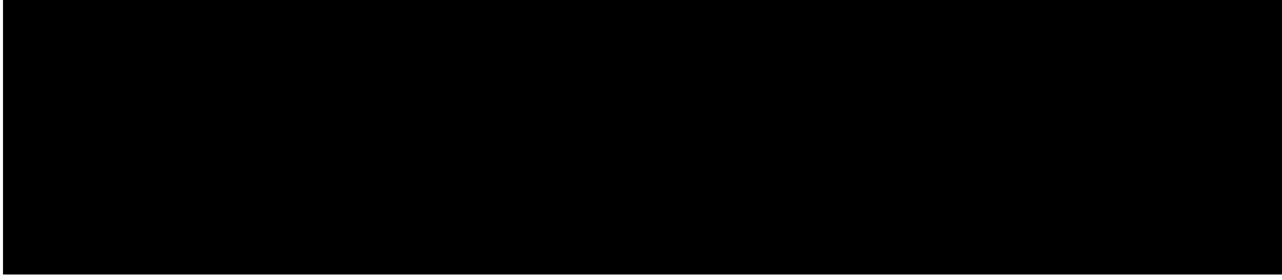
ID	TYPE	Filing	BALANCE
05XXX-88XXX	Business	Annual	
55XX-55XX	ST-1	Monthly	(3,319.49)
20-XXXXXXX-000	Withholding	Quarterly	(4.08)
55XX-55XX	ST-14	Monthly	
55XX-55XX	ST-8	Monthly	
55XX-55XX	ST-4	Monthly	
55XX-55XX	PST-1	Monthly	

- Within GENTAX, access the accounts from the Customer Manager
- Click on the account ID which will bring up the Account Manager for that tax type.
- Click on the returns tab to bring up the listing of returns by period.



- Click on the Export icon to export the listing to a Word or Excel file, rename and save the document. The exported file will look similar to the example below.

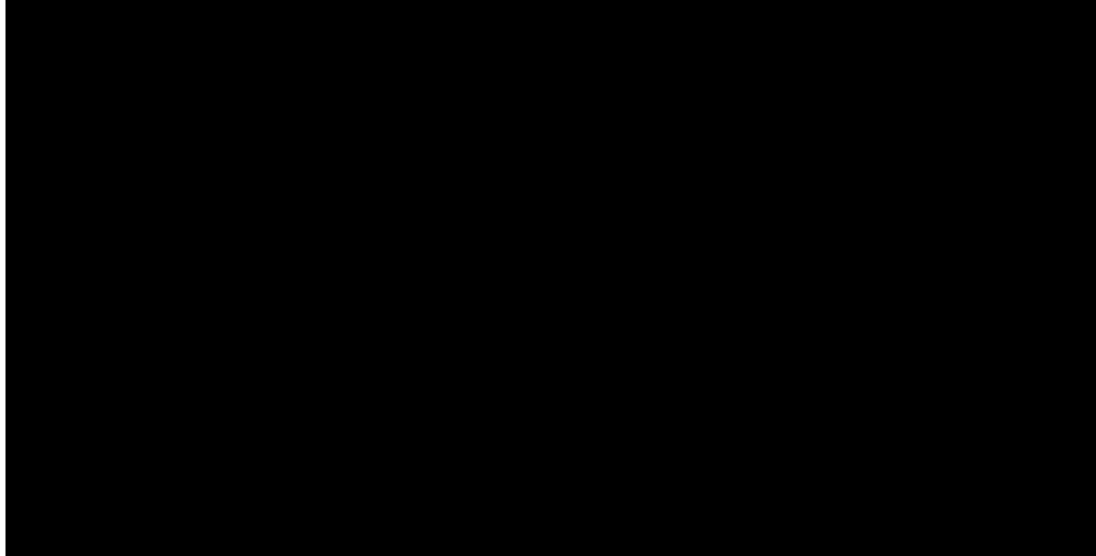
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



- Repeat these steps on the remaining account IDs
- When all accounts have been exported, all of the exported files can either be combined into one report or kept separately. Each report must have the taxpayer's identifying information entered on it. An example of a one page combined Compliance Report is shown below:

Qualified Innovation
0000-0000
A999996768

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



This compliance report can now be used to see if there are open (un-filed) periods. Each return will have a “status” which indicates if it has been filed on time, filed late, not filed or suspended due to some error. If the status shows “Late-Prcd” in the Sales Tax returns account, the auditor must look to see if there was a late filing penalty assessed on the original Sales Tax return. If there was a late filing penalty imposed, then the late filing penalty also has to be assessed on any additional liability for that period.

The auditor can use this report to identify open periods. However, any screen prints or other exported pertinent taxpayer information cannot be included in the CAF. The auditor must document in the EDC-5, EDA-8 and auditor narrative that the compliance check was completed on all tax types that the taxpayer is responsible for.

All Auditors are required to complete compliance checks as a part of their audits with the exception of unitary audits. As a result, other related non-filers may be uncovered from the following types of taxpayers earning income in Illinois:

- Sole Proprietorships;
- Shareholders of an S-Corporation;
- Partners of a Partnership;
- Beneficiaries of Estates or Trusts.

The Auditor should determine if the sole proprietor, shareholders, partners, or beneficiaries have filed individual income tax returns. Individual Income Tax (IIT) records may be checked through GenTax. Partners and shareholders could be included in a Composite return (IL-1023-C).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Individual income tax – IL-1040

Most of the non-filers uncovered will be individuals who are required to file IL-1040s. If the individuals have not filed at the time of the audit closing, it will be necessary to advise them on an individual basis and close the open periods, bringing the taxpayer into compliance by picking up any delinquent returns. When necessary, the IRS should also be notified through our Disclosure Officer.

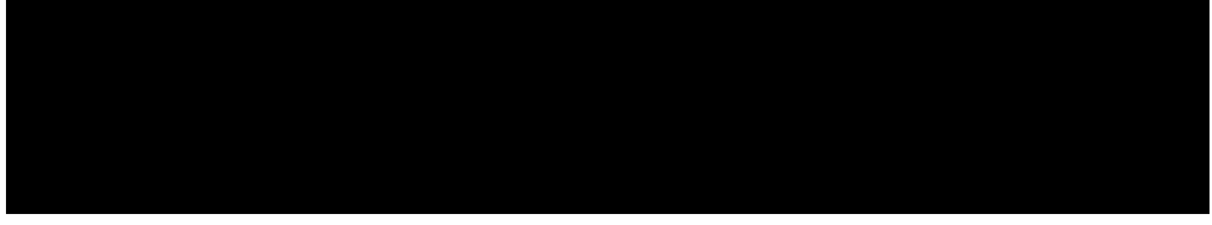
We will continue to pursue non-filers if the liability due is in excess of [redacted] in tax, penalty and interest for the audit period. Department policy is to "look back" six years on non-filers to check for any filing history in those years.

Abusive Tax Avoidance Transactions (ATAT)

There is a six-year NOD statute on these types of transactions provided for through PA 93-0840. This gives the Department a six-year statute from the extended due date of the return or the date the return was filed; whichever is later, in order to assess tax from an undisclosed reportable transaction.

The compliance check for individual income tax returns within GENTAX is basically the same as for BIT, WIT and Sales tax compliance checks.

- Bring up the Search Manager and enter the name (last name, first name) or SSN of the individual.
- Click on the taxpayer's name to access the Customer Manager.
- Click on the account ID to open the Financial Springboard in the Account Manager.
- Click on the Returns tab to bring up the Return-by-Period panel and then click the Export icon to export the listing to a Word or Excel file, rename and save the document. The exported file will look similar to the example below.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Repeat these steps on the remaining names and ID numbers

When all individual return information has been exported, all of the exported files can either be combined into one report or kept separately. **These files cannot be included in the CAF.**

B. PROEDURES FOR DETERMINING FILING STATUS

The filing status for both business entities and individuals should be verified for same period as the audit.

Business Entities

1) Owners, Shareholders, Partners or Beneficiaries

The Auditor must determine the identity of the owners, shareholders, partners or beneficiaries before verifying compliance. In order to do so, copies of the following documents, which contain the identity of owners, etc. may need to be obtained for each type of entity:

- S Corporation - IL-1120-ST and Schedules B and C or U.S. 1120S and Schedules K-1 for each shareholder - The schedules contain the names, addresses and SSNs or FEINS of the shareholders and each shareholder's income information.
- Partnership - U.S. 1065 and Schedule K-1 for each partner - The schedules K-1 identifies each partner and details each partner's distributive share of income, deductions, credits, etc.
- Trusts or estates - IL-1041 and Schedules D and E or U. S. 1041 and Schedules K-1. - These schedules identify the beneficiaries and detail each beneficiary's trust/estate income.

Composite Returns (IL-1023-C) and Pass-Through Withholding (IL-1000)

For tax years ending on or after December 31, 2014, both Form IL-1023-C and Form IL-1000 have been eliminated.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Starting as of that date, this required information will be included on the respective income tax forms (IL-1120-ST, IL-1065, or IL-1041 – Schedule B or Schedule D).

Beginning with taxable years ending December 31, 2008, S-Corporations and Partnerships were required to withhold tax from business income passed through to all nonresidents that are not included on a composite return and do not meet the criteria of specific exceptions. S Corporations and partnerships report the income passed through to each owner and the amount of tax paid on the owner's behalf on a composite return (IL-1023-C) or as pass-through withholding (IL-1000).

The Auditor can review Composite, S Corporation and partnership return information in GenTax (or Legacy PDF Display). However, the identity of the partners or shareholders included must be obtained from the actual list, which is attached to the IL-1023-C, the IL-1120-ST or the IL-1065.

- If the Auditor determines that all of the income, modifications, etc. reported on the S Corporation or Partnership return (IL-1120-ST or IL-1065) is included on the composite return, no further action is needed to verify the filing status of the partners and shareholders.

- If review of the composite, S Corporation and partnership return information reveals that all of the income, etc. is not reported, then the Auditor must obtain the list of partners and shareholders included on the composite return and compare it to the list reported as partners and shareholders on the IL-1120-ST or IL-1065. The filing status of the partners and shareholders not included on the composite return should be verified. If no returns were filed, then the Auditor must bring those non-filers into compliance.

2) Closely Held Corporations

For closely held corporations, IL-1040 filing will need to be verified when five or fewer individuals own at least 50% of the corporation's stock. If they are all Illinois residents, returns must be secured regardless of the level of tax. An owner who resides out-of-state may not be required to file an individual

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

income tax return (IL-1040).

Individuals

To estimate the individual income tax liability due per year, the sum of income plus additions minus subtractions should be multiplied by the apportionment factor, if applicable. The result should be reduced by one exemption and multiplied by the applicable tax rate. We use one exemption because we have no way of knowing the taxpayer's allowable exemptions.

Out-of-State Sole Proprietors

For out-of-state sole proprietors who have not filed individually (i.e.-construction contractor), the field auditor should refer to his/her supervisor, on a case by case basis, to determine whether the sole proprietor has frequented the state enough to subject him/her to Illinois income tax.

- Sole Proprietorship - U.S 1040, Schedule C - The income and expenses from the business will be listed on the Schedule C.

1. Procedures for Closing Open Periods – IIT/BIT

Due to confidentiality reasons, the non-filing partner, shareholder, etc. should be contacted individually to secure original returns. A time frame should be established for the taxpayer to comply.

- If the taxpayer does not comply, the estimated liability should be determined and if over tolerance, the Auditor should either establish the liability or submit an audit referral on the non-filer to Audit Planning.

- If the taxpayer representative comes forth and wants to close the non-filing partners and shareholders open periods with composite returns and they are eligible to do so, the Auditor can accept the original composite return or establish the liability through audit procedures.

- If the taxpayer submits original returns, the Auditor should perform a cursory review of those returns. At a minimum, the Auditor should make sure the returns contain a name, address, Social Security

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

number and signature.

- If the return is not signed, the Auditor needs to request the taxpayer sign the return, either while at the taxpayer's location or via correspondence providing an IDR-916, Signature Declaration.

  1) If the taxpayer provides the requested signature within 30 days of notification, the Auditor should close the track as paid (if payment was provided) and follow the procedures as outlined later in this chapter.
  2) If the taxpayer does not provide the requested signature within 30 days of notification, the audit will be close as "AL" and considered to be deemed assessed per IITA § 503(e).

- If a payment is attached, the Auditor should close the track as paid and follow the procedures as outlined later in this chapter.

- If the returns are not fully paid, the Auditor should inform the taxpayer that they will be receiving a bill from the Department once the returns are processed.

For any identified non-filer, the auditor should:

- Complete form SC-137, Audit Referral/Request, and submit (along with required attachments) to their supervisor for approval and the supervisor's signature.

- Once approved, the referral will then be sent to Audit Planning in Springfield [email to REV.G.ITAuditPlanning@illinois.gov] who will set up the audit track and email the track information back to the auditor and supervisor.

- A regular individual Income Tax audit should be conducted for the non-filing taxpayer. The audit assignment should be completed following normal audit procedures.

C. WITHHOLDING TAX ADDITIONAL COMPLIANCE CHECKS

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

All Income Tax and Sales Tax auditors are required to complete the following withholding tax compliance check. This compliance check is required on non-unitary and unitary taxpayers for income tax purposes.

In cases when the taxpayer is unitary, the focus will be on the nexus filers. For sales tax purposes, the focus is on whomever is paying the Illinois withholding tax for the taxpayer. If the taxpayer is not in compliance for withholding, ALL auditors will be required to complete the related withholding tax audit(s). If it is determined that a withholding tax audit will have to be completed, the auditor will have to request that Audit Planning set up the withholding audit so that it can be completed.

When completing the withholding tax compliance check, there are five required research items that must be identified in the audit comments for the Income Tax or Sales Tax audit. Additionally, it must be noted on the EDC-5 whether or not a withholding audit was necessary as a result of the research conducted.

The **six** required components are:

1) Commence date

2) Cease date

3) Filing compliance

a) Non-filer –
   i) Non-Filers are taxpayers that have never filed withholding tax returns or those that filed and then discontinued filing without ceasing the withholding tax account

b) Skip-filer –
   i) Skip-filers do not consistently file their withholding tax returns.

4) Payment compliance – for periods prior to January 1, 2017

a) Annual
   i) This payment schedule is for taxpayers with a withholding tax liability of $1,000 or less – payments are due annually. The annual payment is due by January 31st of the following year for amounts withheld the entire preceding year.

b) Monthly
   i) This payment schedule is for taxpayers with a withholding tax

liability of more than $1,000, but no more than $12,000 – payments are due monthly. The monthly payments are due by the 15th of each month for amounts withheld the preceding month. Taxpayers on a monthly pay schedule file quarterly returns.

c) Semi-weekly

i) This payment schedule is for taxpayers with a withholding tax liability of over $12,000 – payments are due electronically on a semi-weekly basis. The payments are due by Wednesday for amounts withheld on the preceding Wednesday, Thursday, or Friday and Friday for amounts withheld on the preceding Saturday, Sunday, Monday or Tuesday. Taxpayers on a semi-weekly payment schedule file quarterly returns.

ii) For semi-weekly payers the focus from auditor's standpoint is on the taxpayer being predominantly in compliance. Taxpayers that are predominantly in compliance have made more than six IL-501 payments (identified on GENTAX as Pym-Estimated) per quarter.

5) Inquiry on Federal withholding tax audit

a) The auditor needs to inquire on whether the taxpayer has had a federal withholding tax audit. If no, then this portion of the compliance check is complete. If yes, the taxpayer will need to identify the periods that were audited and provide the applicable federal audit documents. The auditor will then need to review the federal information provided to determine if the federal audit changes affect the withholding taxes paid to Illinois

6) Employee classification compliance (if warranted).

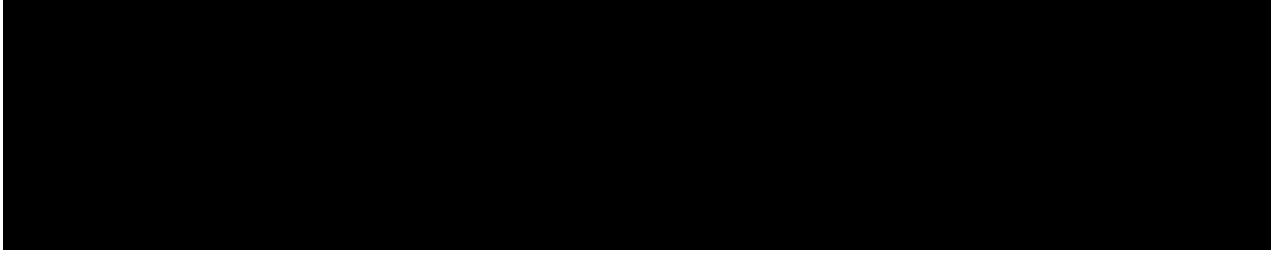
NOTE: Effective January 1, 2017, **all** taxpayers are required to file their IL-941 returns quarterly and pay their liabilities either monthly (less than $12,000/ quarter) or semi-weekly (liability more than $12,000/ quarter). For additional information, see Informational Bulletin FY 2017-07.

D. REQUIRED RESEARCH

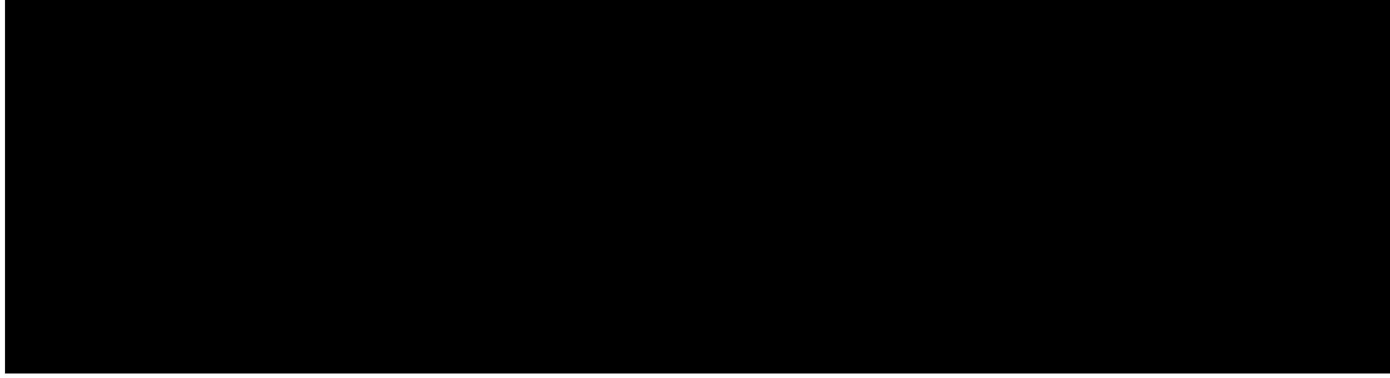
1. COMMENCE AND CEASE DATES

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

These are the start and end dates for the withholding tax account. The commence date and cease date can be found in GenTax on the same screen in the Withholding Account View. Click on the Withholding Account number.



The Withholding Account Information (View) screen opens as shown below. The commence date is the starting date for withholding, while the cease date is the end date for the withholding tax account. For active accounts there should be no information provided for the cease date. If a cease date is provided then no withholding tax returns would be expected for dates falling after the cease date.



This taxpayer shows a Commence date of August 1, 1969, and is currently active with no Cease date.

2. FILING COMPLIANCE

To verify filing compliance, an analysis of the taxpayer's filing history must be done. The withholding commence and cease dates establish a time frame for which the auditor should expect to see withholding tax returns filed.

The filing frequency for each withholding tax account should either be quarterly (4 quarters per year) or annually (1 year end return). These are the only two filing options.

Quarterly Filers – Withholding tax returns are due by the last day of April for January through March, the last day of July for April through June, the last day of October for July

through September and the last day of January for October through December.

Annual Filers – Withholding tax returns are due by January 31st of the following year for amounts withheld the entire preceding year. Effective January 1, 2017, all Illinois Withholding Income Tax filers will be required to file their IL-941 returns quarterly. The annual filing option will no longer be available.

Note: If a taxpayer is designated as an Annual Filer but begins filing Quarterly returns, the taxpayer may become subject to penalty and collection action. Once a Quarterly return is received, the taxpayer has changed his filing frequency to quarterly and is thus subject to the quarterly filing requirements for return and monthly payment due dates.

The current filing frequency assigned to the taxpayer should be noted in the audit comments. Each year must be checked and verified as to the frequency for that particular year, and also included in the comments. Current filing frequency can be seen on the Withholding Account Information screen. To access additional filing information, click on the Registration Tab.

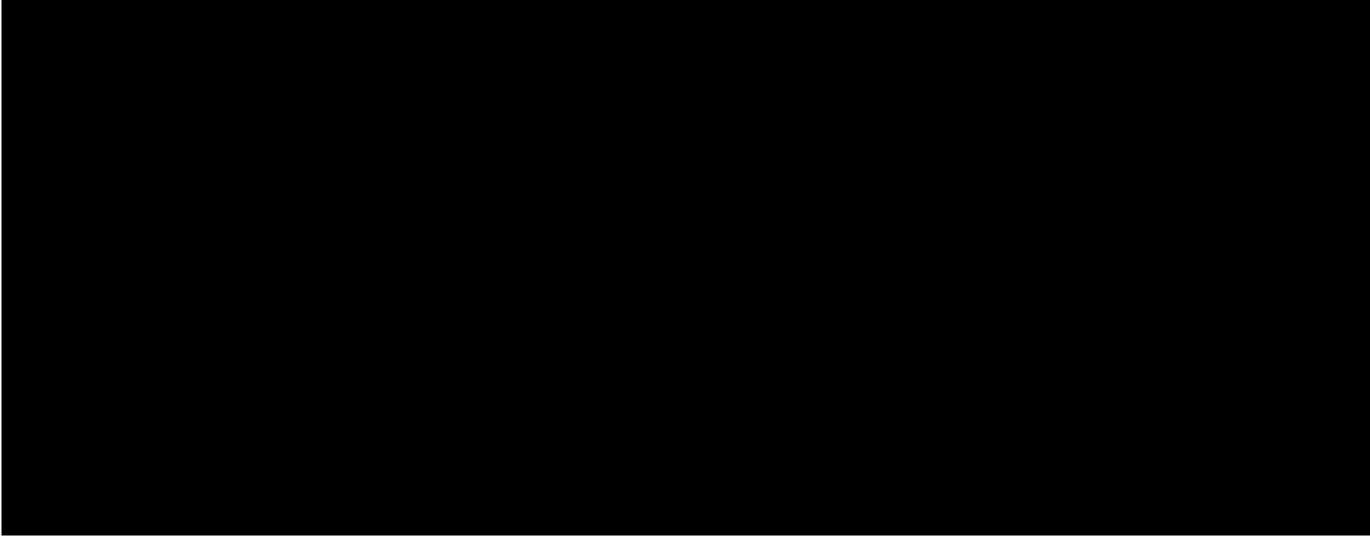
The Account sub-tab within the Registration Tab provides the following information:

- Tax filing frequency (Quarterly shown below)
- Date of the last time that a change was made (see batch date)
- Number of changes that have been made to the withholding attributes for this account (11 of 11 below). Arrows can be used to scroll through the changes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The filing compliance check should go back six years, and all six years must be checked independently since filing status could change in a given year.

Filing History in GenTax:
Filing history is found in the Returns sub-tab under the Financial Tab.



To export the full filing history that is available in GenTax, click on the Menu tab.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. ANALYZING FILING HISTORY

- If All Withholding Tax Returns Have Been Filed:

  A quarterly filer should have 24 returns filed (four per year). An annual filer should have 6 returns filed (one per year).
  If the taxpayer has filed all of their withholding tax returns, then the audit comments need to reflect this and the filing portion of the compliance research is complete. (Note: Late returns are assessed penalty in GenTax and are not a focus of the filing compliance check.)

- If Any Withholding Tax Return Is Missing:

  If the taxpayer is missing any withholding tax return in the filing history, the auditor will need to request additional information from the taxpayer for the missing period(s).

  a) What to ask for:
     - Ask for a completed, signed return for the missing period(s).

  b) If the taxpayer does not or cannot supply the return then:

     - Ask for Form W-2s issued for the period(s) that have the missing return(s). (Note that W-2s are issued by the taxpayer to employees annually.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the taxpayer does have W-2s for the period(s) with missing return(s) then the auditor will have to request a withholding audit for this taxpayer.

- Request a Non-filer Audit –
  Non-Filers are taxpayers that have never filed withholding tax returns or those that filed and then discontinued filing without ceasing the withholding tax account.

- Request a Skip Filer Audit –
  Skip filers do not consistently file their withholding tax returns. When this audit is requested the reason for referral on the SC-137 must specifically state the periods needed for the audit.

- If the taxpayer does not have W-2s then:

  - Ask for copies of their federal Forms 941, copies of their IDES (Illinois Department of Employment Security) Reports (if applicable), and copies of their in-house payroll reports (i.e. payroll ledger or report of Illinois tax withheld from payroll checks by pay period with both quarterly and annual totals).

    If the taxpayer has this information then the auditor will have to request a withholding audit for this taxpayer.

    Request a Non-filer Audit or a Skip Filer Audit
    (As per previously defined, the auditor must select the appropriate audit type for the current situation.)

    If the taxpayer does not have the federal Forms 941, IDES reports or in-house payroll reports then:

  - Ask for Form 1099s that have been issued. 1099s are forms used for taxpayers to report non-employee compensation for independent contractors, consultants, investors, etc.

    If the taxpayer has issued 1099s and can provide these forms for the periods in question then the filing portion of the compliance check is complete.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The audit comments need to clearly state a cease date for the withholding account, as taxpayers who only issue Form 1099s are not required to pay withholding taxes. A processing note is required to notify Audit Perfection that a withholding tax cease date must be added in GenTax at the time the Income Tax or Sales Tax audit is processed. The cease date identifies the last date of the tax period for which the taxpayer was required to file. The cease date provides information that will assist other users in future contact with the taxpayer's account.

- If there are multiple, consecutive returns missing in the filing history:

  - Ask the taxpayer if they outsource their employment tax function.

    If the answer is yes then the taxpayer needs to provide the name and FEIN of the PEO (Professional Employer Organization) that handles the taxpayer's withholding taxes. The taxpayer should also provide a copy of the PEO contract. This contract will show the start date for which the PEO will be responsible for the withholding taxes. In cases when taxpayers have proof of a PEO for withholding tax periods that are missing, this will conclude the filing compliance check.

    If the taxpayer cannot provide any of the additional information requested based on the filing compliance check, then refer to the immediate supervisor for guidance in this situation.

NOTE: Remember when dealing with a unitary business group, the taxpayers with the **ten** highest annual Illinois withholding liabilities should be checked for compliance, if more than one entity is paying Withholding tax.

a) FILING AND PAYMENT FREQUENCY

Effective January 1, 2017, all Illinois Withholding Income Tax filers will be required to file their IL-941 returns quarterly. The annual filing option will no longer be available. Also effective January 1, 2017, all Illinois Withholding Income Tax filers will be assigned to pay withholding income tax on a monthly or semi-weekly schedule. The annual payment option will no longer be available.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Beginning January 1, 2012, the Department added a new payment/return schedule, bringing the total to four. These four payment/return schedules are:

- Semi-weekly Payment/ Quarterly Return - Taxpayers are assigned this schedule when they have reported more than $12,000 during the “look-back” period. Beginning 1/1/2011, employers who are required to make semi-weekly payments must make all payments electronically.

- Monthly Payment/ Quarterly Return - Taxpayers who have been registered less than 18 months, or have a compliance problem (underpayment, missing returns, etc.), and reported $12,000 or less during the “look-back” period are assigned this schedule. New taxpayers are automatically assigned to the monthly payment/ quarterly return due date schedule.

- Monthly Payment/ Annual Return - Taxpayers who have been registered for the full “look-back” period, are in good standing, and reported more than $1,000 but no more than $12,000 in withholding, are assigned this schedule. Effective January 1, 2017, annual filing will no longer be an option.

- Annual Payment/ Annual Return - Taxpayers are assigned this schedule when they have reported $1,000 or less during the “look-back” period and are in good standing with the Department. Effective January 1, 2017, annual payment and annual filing will no longer be options.

Payment and filing requirements are determined by the total tax withheld during the “look-back” period, which is the one-year period ending on June 30 of the immediately preceding calendar year. (For example, for calendar year 2012, the look-back period is July 1, 2010, through June 30, 2011.) Note: The reason that the Department utilizes this period time-span for “look-back” is that letters are generated in October of every year indicating the changes in payment/filing requirements for taxpayers in the upcoming year.

For additional information on payment/ return schedules, see Publication 131, Withholding Income Tax Payment and Filing Requirements, on the IDOR website at www.tax.illinois.gov under Publications.

4. PAYMENT COMPLIANCE

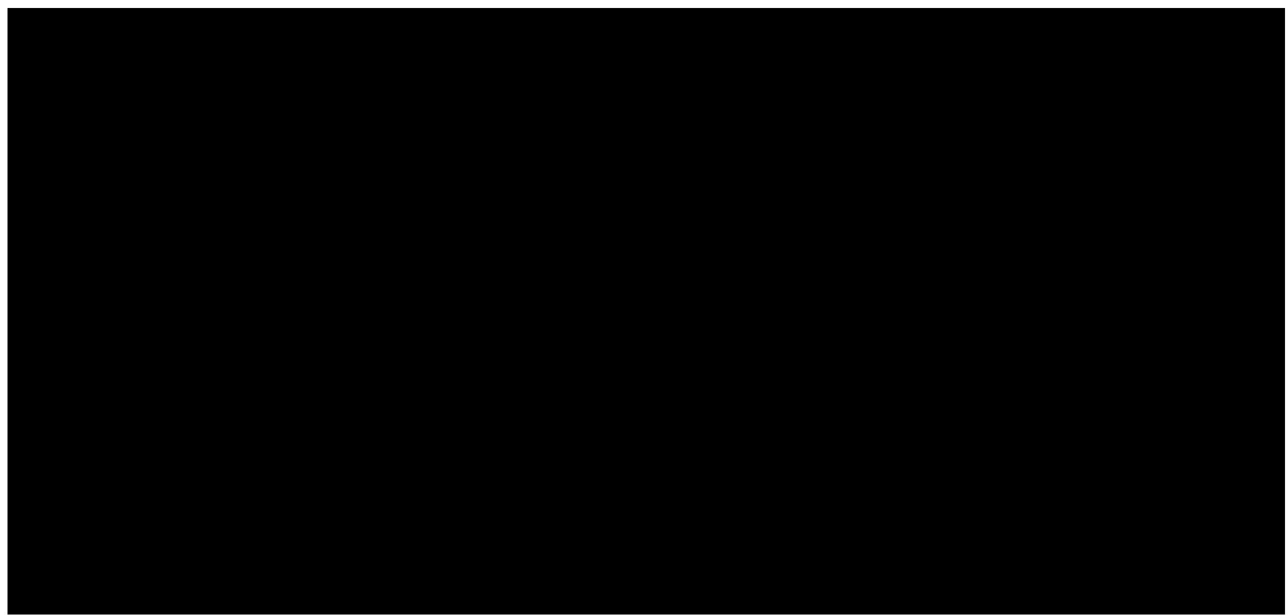
The withholding tax payment frequency must be verified to ensure that taxpayers are making the required payments timely. For payments not submitted timely, it is important to note that penalties and interest can only be assessed on the last three years, as previous years would be out of statute.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

NOTE: When reviewing payment history for timeliness, a *Trans Type* of "Adj – Unverified WIT Credit" could be indicated as shown below. If this payment type shows on the account, do not include that amount in the compliance check.

Taxpayers are assigned a payment schedule for each tax year and must be in compliance with that schedule. The assigned payment schedule (annual, monthly or semi-weekly) is determined by the amount of tax withheld during a "look-back" period, which is the one-year period ending on June 30 of the immediately preceding calendar year. (For 2014, the look-back period is July 1, 2012 through June 30, 2013).

The payment frequency assigned to the taxpayer is found in the Account sub-tab under the Registration Tab in the Withholding Account View (same screen as for filing frequency above).



It is important to realize that a taxpayer's payment frequency may change during the year. If the tax liability exceeds $12,000 in any particular quarter, the taxpayer would be required to switch to the semi-weekly payment schedule and continue

for both the remainder of the current year and for the following year. Analysis of both the total tax liability for the year and the total tax liability for each quarter must be made during the payment compliance check.

NOTE: For any payment information that needs exported, use the Menu tab to access “Export”. See additional instructions in the Filing Compliance section above.

a) ANNUAL PAYMENT SCHEDULE

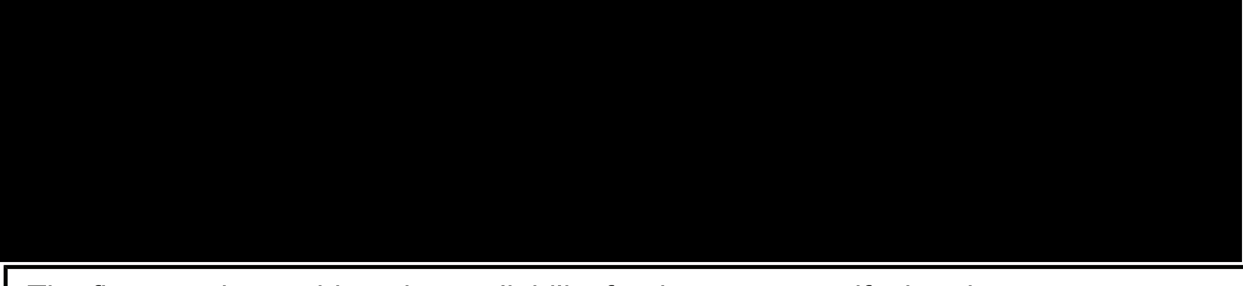
For taxpayers with a withholding tax liability of $1,000 or less – payments are due annually by January 31st of the following year for amounts withheld the entire preceding year.

Example – Taxpayer is assigned to the annual payment schedule and is in compliance.

Verify 2010 for the following taxpayer on an annual payment schedule. The taxpayer attributes indicate that at the time of the 2010 filing this taxpayer was assigned the annual payment and return schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The Transactions sub-tab below shows both the annual payment made and the annual return filed for the 2010 period.



The first step is to add up the tax liability for the year to verify that the correct payment schedule is being used.

The total tax liability for the year is $985.00 which is less than $1,000. The taxpayer should be using the annual payment and return schedule.

The second step is to verify that the taxpayer paid the tax due timely.

A payment in the amount of $985.00 was made on January 9, 2011 for this period, which is timely for an annual filer.

This taxpayer is in compliance for 2010.

Once all applicable tax periods are verified and found in compliance, then the payment compliance check is complete.

b) MONTHLY PAYMENT SCHEDULE

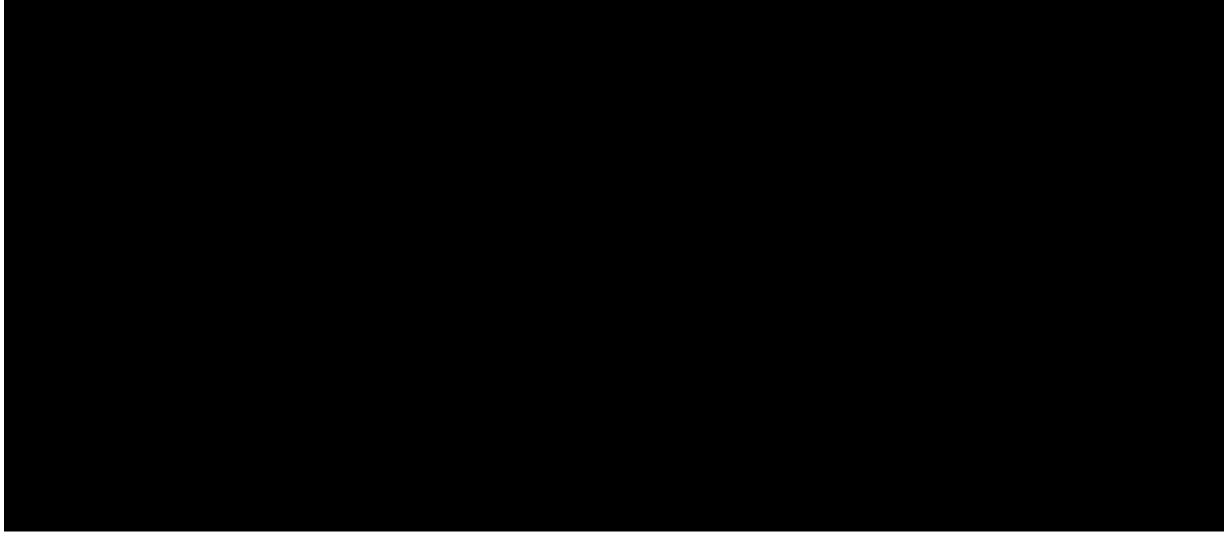
For taxpayers with a withholding tax liability during the look-back period of more than $1,000, but no more than $12,000 – payments are due monthly. The monthly payments are due by the 15th of each month for amounts withheld the preceding month.

Example 1 – Taxpayer is assigned to the monthly payment schedule and is in compliance.

Verify 2010 for the following taxpayer on a monthly payment schedule. The taxpayer attributes indicate that at the time of the 2010 filing this taxpayer was assigned the monthly payment and the quarterly return schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The monthly payments can be confirmed in the Payments sub-tab under the Financial Tab. All twelve payments show as timely, as indicated under the effective dates. The auditor needs to verify that all payments were made timely.



The payments will need to be compared to the Quarterly returns filed as shown in the Periods sub-tab under the Financial Tab below.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Using the Periods sub-tab above, add up the tax liability for 2010.
1st quarter 2010 $3,000
2nd quarter 2010 $2,500
3rd quarter 2010 $1,263
4th quarter 2010 $1356.90
Total 2010 tax liability is $8,119.90.

With a total tax liability for the year at $8,119.90 the taxpayer was not required to switch to the semi-weekly payment schedule during the year.

> NOTE: If at any time during the tax year the tax liability for a particular quarter exceeds $12,000, the taxpayer would be required to switch to the semi-weekly payment schedule and continue the semi-weekly payment schedule for the remainder of the current year and for the following year.

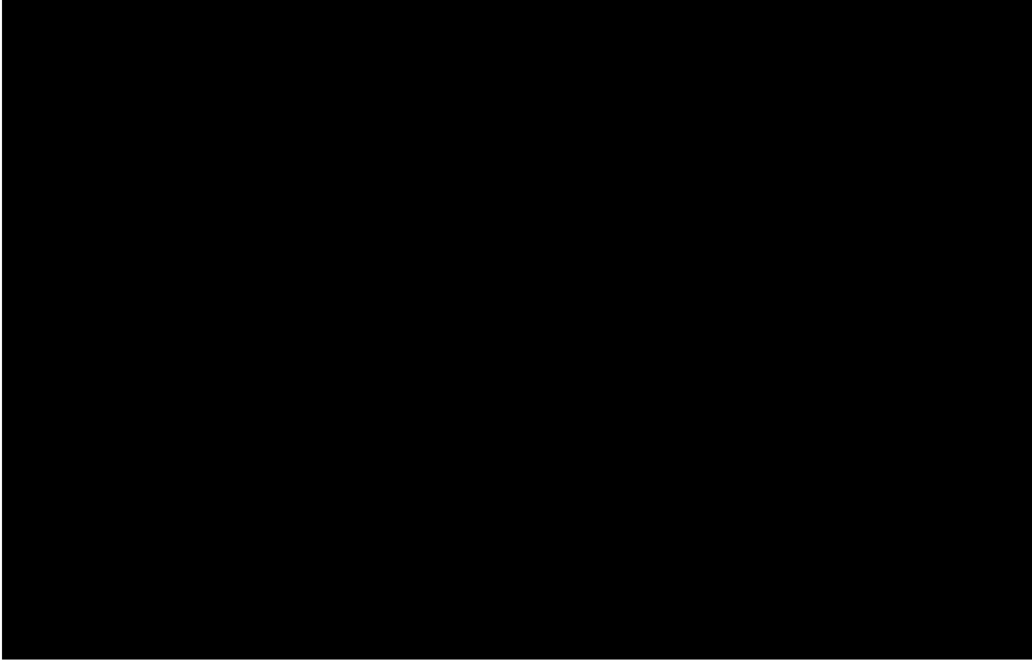
The auditor will need to review the payments made for the 2010 tax year to verify that these payments were made timely (see above Payments sub-tab). Payments are due by the 15th of each month for the amounts withheld on the preceding month.

The taxpayer has made each monthly payment timely and is in payment compliance for 2010. Once all applicable tax periods are verified and found in compliance, then the payment compliance check is complete.

Example 2 – Taxpayer is assigned to the monthly payment schedule and **not** in compliance.

Verify 2009 for the following taxpayer on a monthly payment schedule. The taxpayer attributes indicate that at the time of the 2009 filing this taxpayer was assigned the monthly payment and the quarterly return schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



The Payments sub-tab shows only one payment (return payment) for 2009.

The Periods sub-tab below shows activity in one quarter (period) only.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Using the Periods Panel, add up the tax liability for 2009.
1st quarter 2009 $0
2nd quarter 2009 $0
3rd quarter 2009 $440.05
4th quarter 2009 $0
Total 2009 tax liability of $440.05

With a total tax liability for the year at $440.05, the taxpayer was not required to switch to the semi-weekly payment schedule during the year.

> NOTE: If at any time during the year the tax liability for a particular quarter exceeds $12,000, the taxpayer would be required to switch to the semi-weekly payment schedule and continue the semi-weekly payment schedule for the remainder of the current tax year and for the full year following this year.

The auditor will need to review the payments made for 2009 to verify that the payments were made timely. Payments are due by the 15th of each month for the amounts withheld during the preceding month.

Obviously, this taxpayer did not make each monthly payment that is required for 2009, as only one payment was made and it was made after the last possible due date for payment for the quarter for which it was reported. This taxpayer is not in compliance for 2009.

Example 3 – Note: For this example only, screen prints from GenTax Version **8** will be used, as this WIT history presents an excellent example.

Taxpayer is assigned to the monthly payment schedule and in a single quarter the tax liability exceeds $12,000 in withholding. Once this happens in a single quarter, the taxpayer is required to switch to the semi-weekly payment schedule effective immediately for the remainder of the current year and for the Subsequent year.

Verify 2009 for the following taxpayer on a monthly payment schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Withholding Tax Account Manager, Periods Panel

In the Periods Panel it can be seen that the monthly payment schedule would be correct until the taxpayer files the second quarter return for 2009. At the time the second quarter return is filed the taxpayer exceeds the $12,000 liability amount for one quarter and is then required to follow the semi-weekly payment schedule for the third and fourth quarters of 2009. (See the semi-weekly payment schedule section for applicable rules)

Next, the auditor will need to view the payments for compliance.

Exported Payment Information

26-Jan-2010	15-Jan-2010	31-Dec-2009	Pym - Return	716.77	3rd and 4th q
26-Jan-2010	11-Dec-2009	31-Dec-2009	Pym - Estimated	400.00	
26-Jan-2010	11-Nov-2009	31-Dec-2009	Pym - Estimated	400.00	
26-Jan-2010	10-Oct-2009	31-Dec-2009	Pym - Estimated	450.00	
02-Nov-2009	06-Sep-2009	30-Sep-2009	Pym - Estimated	400.00	
02-Nov-2009	09-Aug-2009	30-Sep-2009	Pym - Estimated	400.00	
02-Nov-2009	11-Jul-2009	30-Sep-2009	Pym - Estimated	400.00	2nd q

24-Apr-2009	05-Apr-2009	31-Mar-2009	Pym - Estimated	450.00	1st q
24-Apr-2009	12-Apr-2009	31-Mar-2009	Pym - Return	958.44	
24-Apr-2009	13-Mar-2009	31-Mar-2009	Pym - Estimated	1,500.00	

Payments are due by the 15th of each month for the amounts withheld during the preceding month.

The taxpayer does not appear to be in compliance as they have not timely made each monthly payment that is required for the first and second quarters of 2009 and additionally they have not made the semi-weekly payments that would be required for the third and fourth quarters of 2009.

The auditor will have to request the taxpayer's in-house payroll reports (i.e. payroll ledger or report of Illinois tax withheld from payroll checks by pay period with both quarterly and annual totals). Upon review of the records and all other applicable periods, the auditor may have to complete SC-137 to request a monthly payment frequency withholding tax audit to complete.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

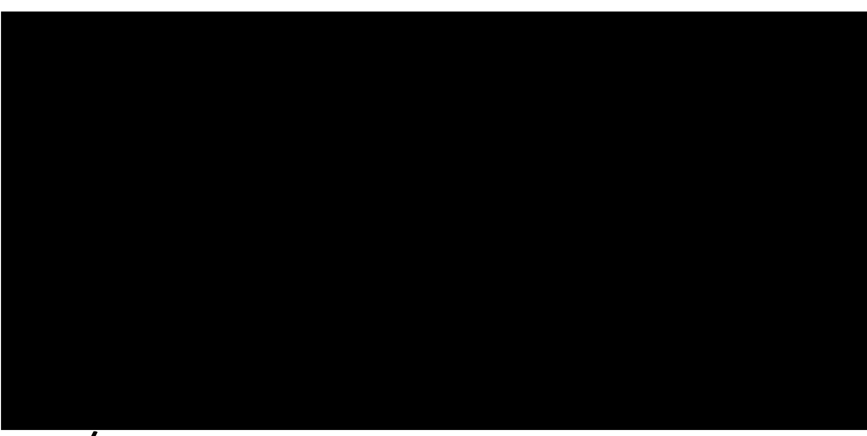
c) SEMI-WEEKLY PAYMENT SCHEDULE

For taxpayers with a withholding tax liability during the look-back period of over $12,000 – payments are due semi-weekly. Taxpayers on a semi-weekly payment schedule file quarterly returns.

If the paychecks are issued on a Wednesday, Thursday or Friday, the withholding payment is due by the following Wednesday. If the paychecks are issued on a Saturday, Sunday, Monday or Tuesday, the payment is due by the Friday following.

For semi-weekly payers the focus from the auditor's standpoint is on the taxpayer being **predominantly in compliance (PIC)**. If at least six payments show per quarter (based on the assumption that employees are paid twice monthly at a minimum), the taxpayer is PIC. Payments are identified on GenTax as "Pym-Estimated", as viewed in the financial data under the Transaction sub-tab.

►**Do not** proceed further for any tax years that have the following indicator on the Withholding Account in the Indicators sub-tab under the CRM Tab:



When the mouse is hovered over "WIT S/W Pmt Inq", it will identify the period that is included in the Discovery project for semi-weekly payors that are not in compliance.

Example above - the message reads, period from "31-Mar-2011 to 31-Dec-2011 Semi-Weekly Pym Inquiry WIT Discovery". Periods included in the discovery period must be noted in the audit comments and then the auditor can proceed with the other tax years in question.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

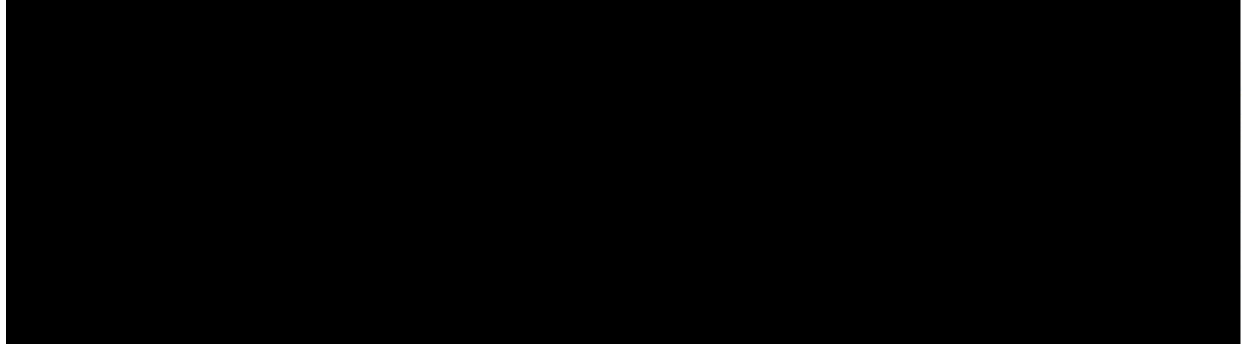
If for a particular quarter the taxpayer is PIC, then the payment compliance check is complete for that quarter. If the taxpayer is not PIC, then the auditor will have to further analyze the account and potentially request an audit. This would be a payment frequency (penalty and interest only) audit.

Example 1 – Taxpayer is assigned to the semi-weekly payment schedule and is in compliance.

Verify 2011 for a taxpayer on a semi-weekly payment schedule. The taxpayer attributes indicate that at the time of the 2011 filing this taxpayer was assigned the semi-weekly payment and the quarterly return schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Periods sub-tab below shows the activity for all four quarters.



Add up the tax liability for 2011.

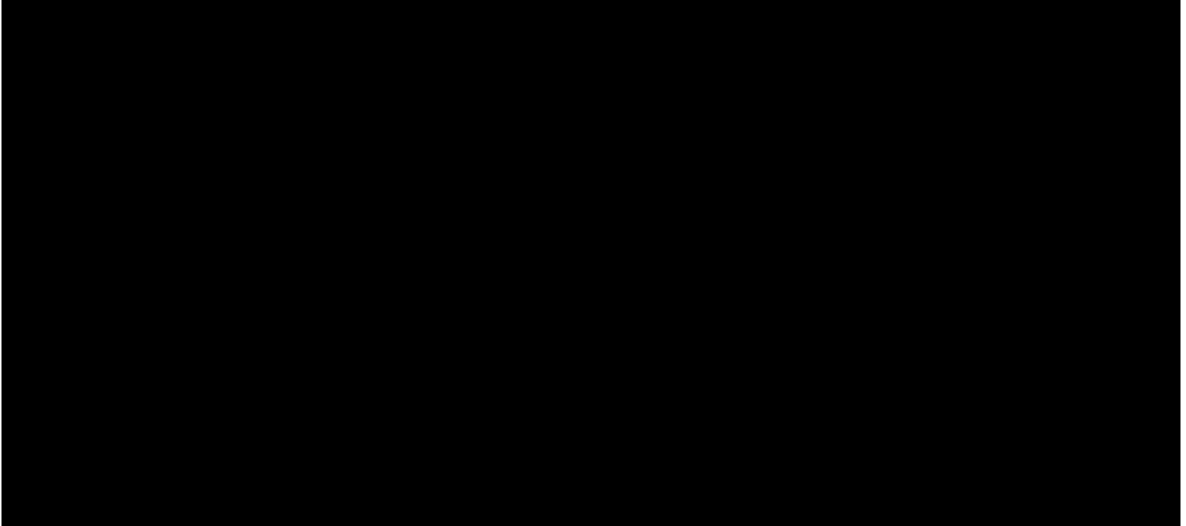
1st quarter 2011 $392,373.10
2nd quarter 2011 $338,197.45
3rd quarter 2011 $340,773.08
4th quarter 2011 $314,327.41
Total 2011 tax liability is $1,385,671.04

With a total tax liability for the tax year at $1,385,617.04 the taxpayer should be using the semi-weekly payment and quarterly return schedule.

Next, start with the first quarter of 2011 and click on 31-Mar-2011 to view the transactions for this period to verify that the payments made put the taxpayer predominantly in compliance.

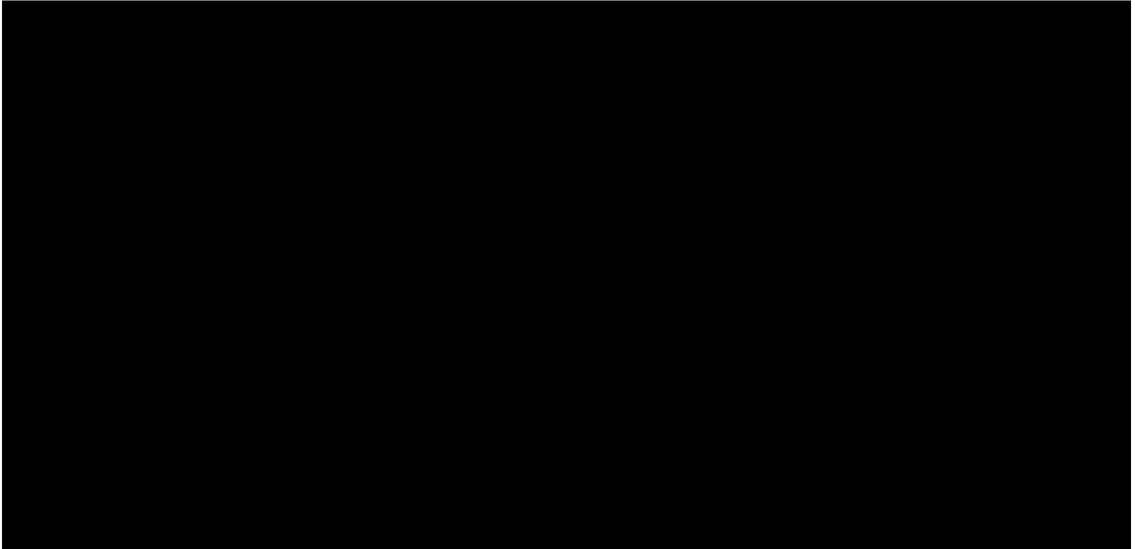
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Transactions sub-tab for 31-Mar-2011



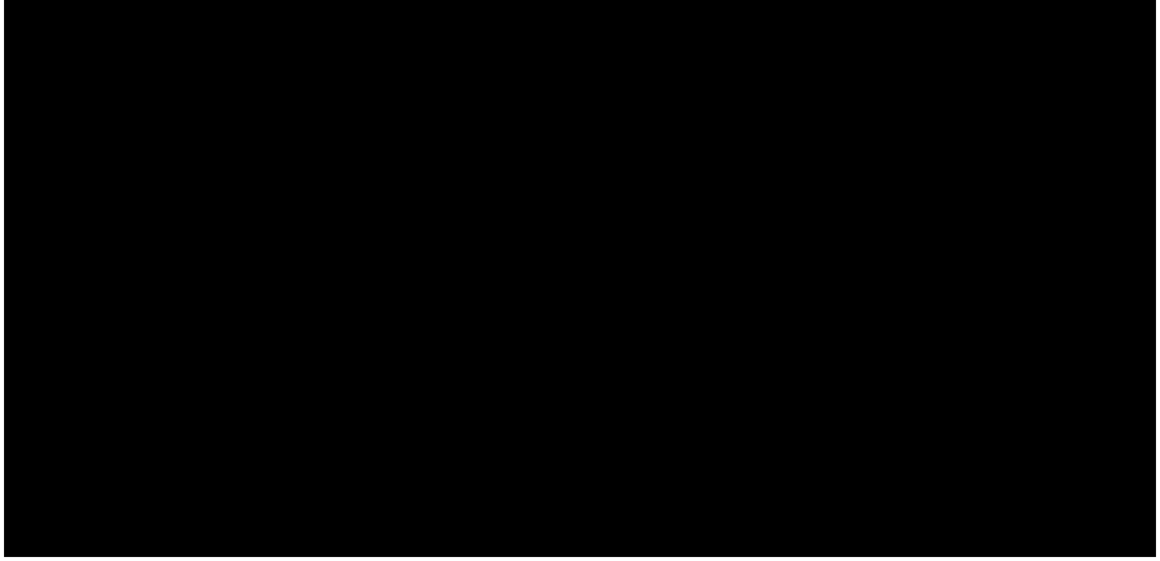
This taxpayer is PIC for the first quarter of 2011 as they have made twelve withholding tax payments for this quarter. Each quarter of 2011 will have to be verified for the auditor to know that the tax year is PIC.

Transactions sub-tab for 30-Jun-2011

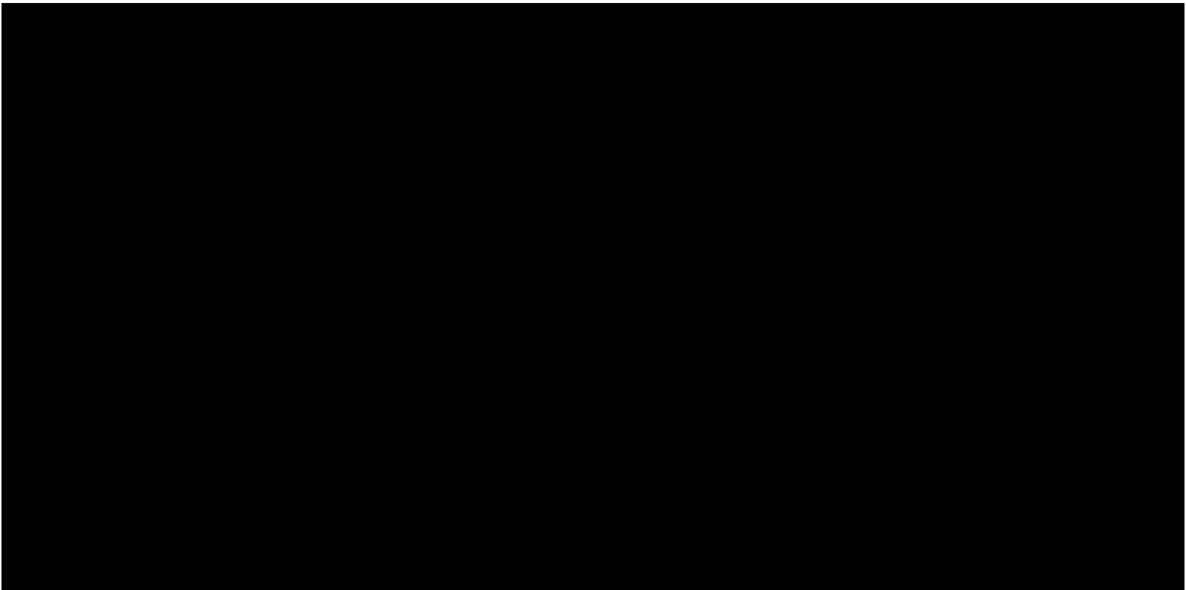


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Transactions sub-tab for 30-Sep-2011



Transactions sub-tab for 31-Dec-2011



This taxpayer is PIC for all of 2011 since more than six payments were made per quarter.

Once all applicable tax periods are verified and found in compliance, then the payment compliance check is complete.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example 2 – Taxpayer is assigned to the semi-weekly payment schedule and is **not** in compliance.

Verify 2012 for the taxpayer on a semi-weekly payment schedule. The taxpayer attributes indicate that at the time of the 2012 filing this taxpayer was assigned the semi-weekly payment and the quarterly return schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Periods sub-tab below shows the activity for all four quarters.

Add up the tax liability for 2012.
1st quarter 2012 $20,884.73
2nd quarter 2012 $20,988.16
3rd quarter 2012 $24,033.44
4th quarter 2012 $25,623.59
Total 2012 tax liability is $91,529.92

With a total tax liability for the tax year at $91,529.92 the taxpayer should be using the semi-weekly payment and quarterly return schedule.

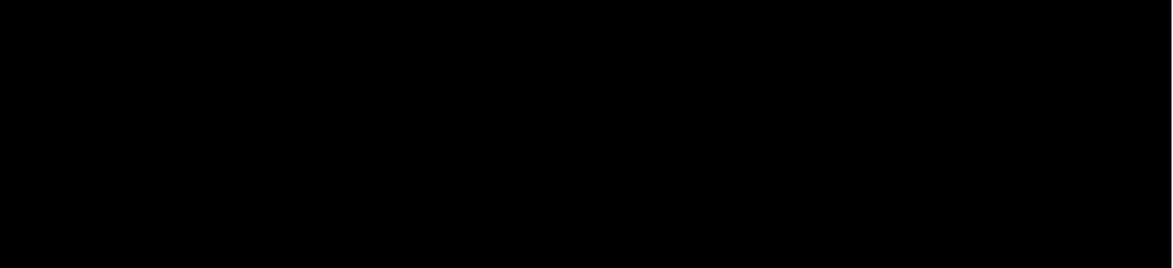
Next, start with the first quarter of 2012 and click on 31-Mar-2012 to view the transactions for this period. Here it can be verified if the payments made put the taxpayer PIC.

Transactions sub-tab for 31-Mar-2012

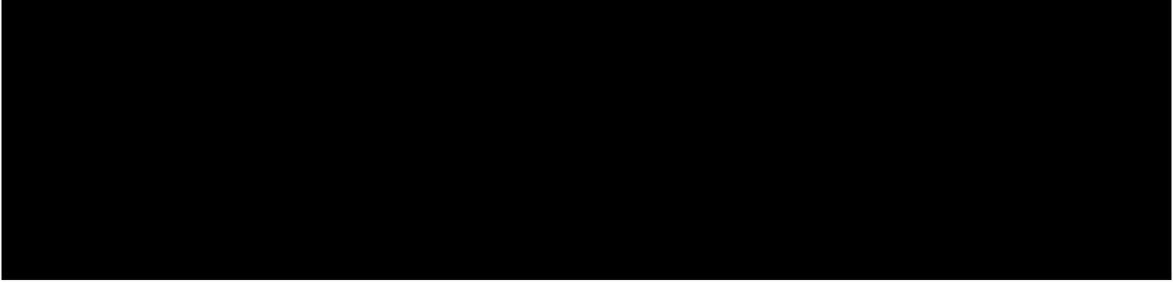
This taxpayer is not PIC for the first quarter of 2012 as they have only made three withholding tax payments for this quarter. To be PIC the taxpayer would have had at least six payments for the quarter. It appears that the taxpayer is paying as if they are on a monthly payment schedule.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Transactions sub-tab for 30-Jun-2012



Transactions sub-tab for 30-Sep-2012



Transactions sub-tab for 31-Dec-2012

This taxpayer is not PIC for any quarter of 2012.

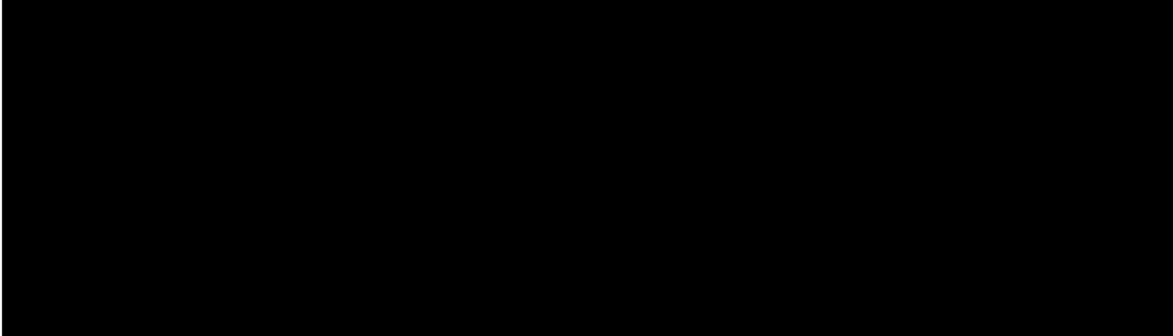
The auditor will have to request the taxpayer's in-house payroll reports (i.e. payroll ledger or report of Illinois tax withheld from payroll checks by pay period with both quarterly and annual totals). Upon review of the records and all other applicable periods, the auditor may have to complete SC-137 to request a semi-weekly payment frequency withholding tax audit to complete.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example 3 – Taxpayer is assigned to the semi-weekly payment schedule, is only making their withholding tax payments monthly, but is in compliance per the payroll records requested, which indicates that the taxpayer pays payroll once per month. Figures used in Example 2 above are being used for this example also.

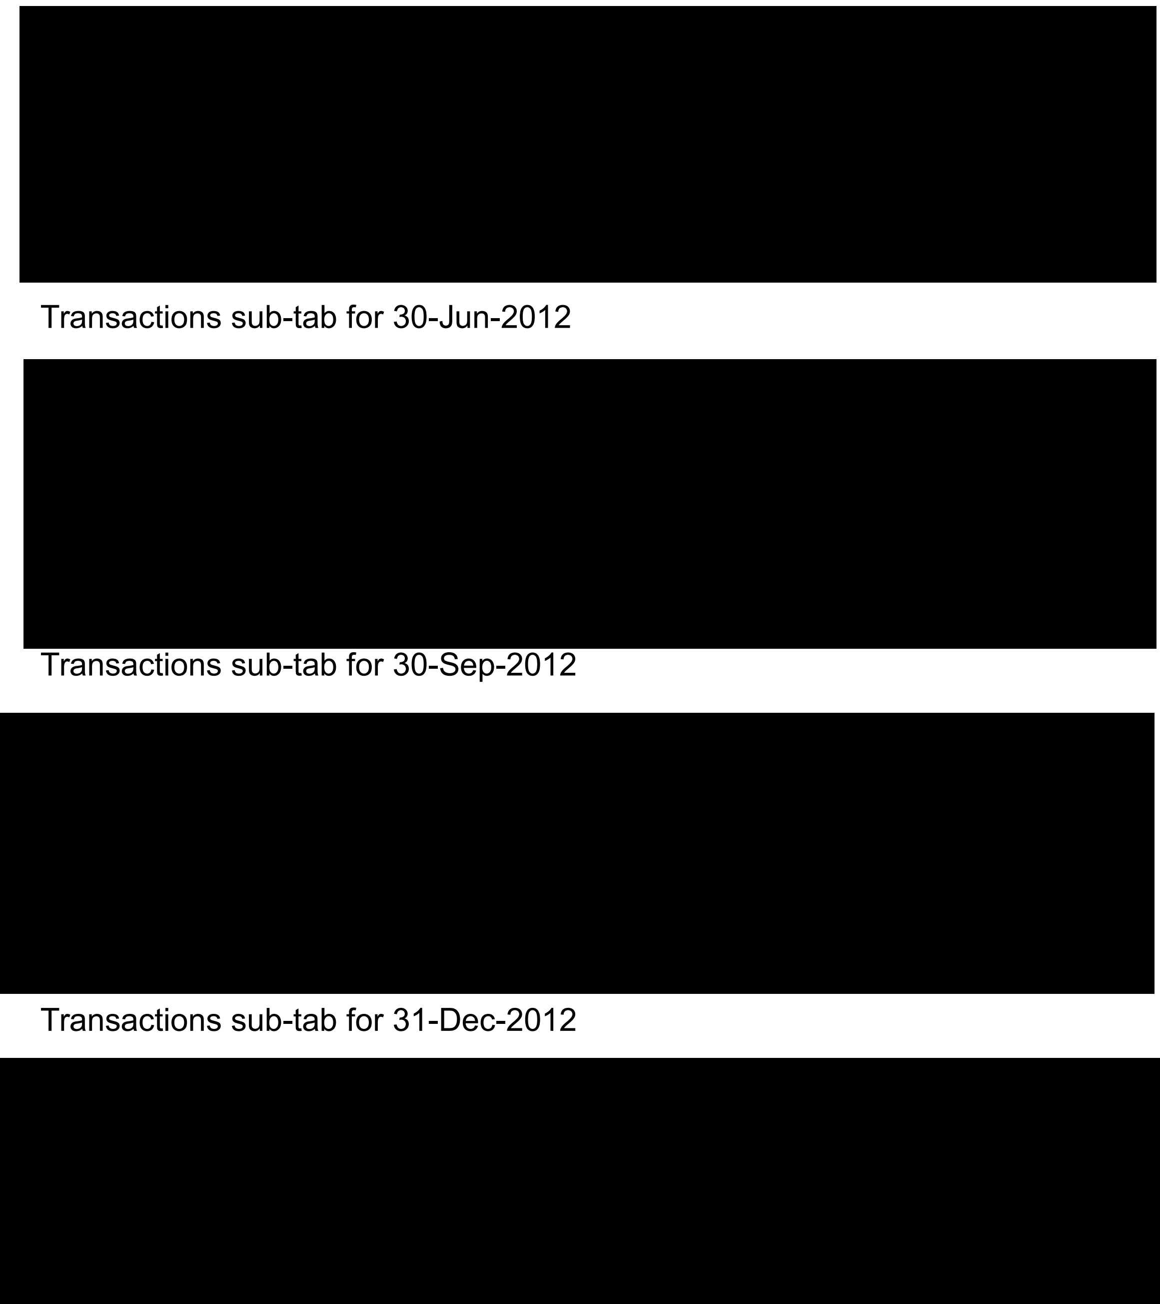
Verify 2012 for a taxpayer on a semi-weekly payment schedule. The taxpayer attributes indicate that at the time of the 2012 filing this taxpayer was assigned the semi-weekly payment and the quarterly return schedule.

The Periods sub-tab below shows the activity for all four quarters. With a total tax liability for the tax year at $91,529.92 (all four quarters totaled), the taxpayer should be using the semi-weekly payment and quarterly return schedule.



Transactions sub-tab for 31-Mar-2012

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



Transactions sub-tab for 30-Jun-2012

Transactions sub-tab for 30-Sep-2012

Transactions sub-tab for 31-Dec-2012

This taxpayer is not PIC for any of the quarters of 2012 as they have only made three withholding tax payments for each quarter.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor will have to request the taxpayer's in-house payroll reports (i.e. payroll ledger or report of Illinois tax withheld from payroll checks by pay period with both quarterly and annual totals).

However, in this case after reviewing the payroll records the auditor can see that the taxpayer does pay its payroll one time each month. Additionally, the auditor can see that the taxpayer pays its withholding tax due from its payroll timely, based on the requirements for the semi-weekly payment schedule. Therefore, the taxpayer is in compliance with the semi-weekly payment schedule.

It is important to note that not all taxpayers assigned to the semi-weekly payment schedule are required to have six or more withholding tax payments. The payroll frequency determines the total amount of payments that are needed for the taxpayer to be in compliance.

5. RAR COMPLIANCE – FEDERAL WITHHOLDING TAX AUDIT

The auditor needs to inquire whether the taxpayer has had a federal withholding tax audit. If no, then this portion of the compliance check is complete. If yes, the taxpayer will need to identify the periods that were audited and provide the applicable federal audit documents. The auditor will then need to review the federal information provided to determine if the federal audit changes affect the withholding taxes paid to Illinois. The changes made may affect employees that are nonresidents of Illinois and therefore may not impact Illinois withholding tax.

If the changes do affect Illinois, the auditor will need to determine whether the changes have been properly reported to Illinois. If the changes have been properly reported to Illinois then this portion of the compliance check is complete. Properly reported means IL-941-X returns were filed reporting the Illinois portion of the federal change.

If the changes have not been reported to Illinois, the auditor will need to obtain copies of all federal audit documentation and submit them with the SC-137 (see Section V) for a withholding tax audit to be done in-house.

A reminder that the federal return may be different than the Illinois return (especially with National or International companies) so depending on the federal RAR changes the federal changes may affect Illinois items differently.

Underreporting (Omission)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For any period beginning on or after January 1, 2013, if the taxpayer omits more than 25% of the total amount of withholding required to be reported on that return under IITA § 704A, a Notice of Deficiency (NOD) may be issued no later than 6 years after the return was filed. Ref: IITA § 905(b)(3).

6. EMPLOYEE CLASSIFICATION COMPLIANCE

This type of compliance is only necessary when an auditor is questioning a worker's status as an independent contractor verses an employee of a company.

The Internal Revenue Service (IRS) has established guidelines to aid in determining whether a worker is an independent contractor or an employee. This determination is important when an audit requires proof of withholding compliance.

IRS basic definition of employee:

> An individual who performs services for you who is subject to your control regarding what will be done and how it will be done. (Treas. Reg 31.3121(d)-1(c)(1))

On the state level, this same issue of whether a worker is an independent contractor or an employee may surface during a withholding compliance check in an audit. It is important to realize that if federal withholding tax (FWT) is required, then state withholding tax (SWT) will be required for wages paid in this State (Illinois) in **most** cases.

For exceptions to withholding, see Publication 130, Who is Required to Withhold Illinois Income Tax, which can be accessed on the IDOR website at www.tax.illinois.gov under Publications.

The following information may be utilized to help in determining a worker's status.

a) Independent Contractor or Employee Determination

- The Common Law Standard

In determining a worker's status, the primary inquiry is whether the worker is an independent contractor or an employee under the common law standard.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The common law flows mainly from court decisions within the justice system in the United States. Under the common law, the treatment of a worker as an independent contractor or an employee originates from the legal definitions developed in the law of agency – whether one party (the principal) is legally responsible for the acts or omissions of another party (the agent) – and depends on the principal's right to direct and control the agent.

Gaining an understanding of the way a business operates, and the relationship between that business and the worker, can aid in determining the worker's status.

- Twenty Common Law Factors

Every piece of information that helps determine the extent to which the business retains the right to control the worker is important. There are twenty common law factors that help with the business/worker determination. The importance and weight of these twenty can vary significantly.

1) Instructions
2) Training
3) Integration
4) Service rendered personally
5) Hiring, supervising, and paying assistants
6) Continuing relationship
7) Set hours of work
8) Full-time work required
9) Doing work on business owner's premises
10) Accomplishing work in certain order or sequence
11) Submission of oral or written reports
12) Method of payment
13) Payment of business or traveling expenses
14) Furnishing tools and equipment
15) Significant investment
16) Realization of profit or loss
17) Work for one entity at a time
18) Offer their services to the general public
19) Right to discharge
20) Right to terminate

The above factors can be useful in the worker determination. However, other relevant information may be utilized in determining if an employer-employee relationship exists. The following areas should be considered:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- What the business does and how the job gets done.
- The relationship between the business and its clients or customers.
- Facts that indicate whether the business has the right to control how the work is done.

The extent of the right to direct and control is a key factor in an employer-employee determination. Evidence should be gathered surrounding the “control” of the employer. One of the tools that can be utilized in gathering such information is the Employee vs. Independent Contractor Questionnaire.

> See Exhibit N - Employee vs. Independent Contractor Questionnaire

- Primary Categories of Evidence

Evidence can be identified within three specific categories as follows:

(a) Behavioral control – focuses on whether there is a right to direct or control how the work is done. The presence or absence of instructions and training on how the work should be done are an important indicator.

(b) Financial control – focuses on whether the business has the right to direct or control the economic aspects of the worker’s activities. Facts relevant to financial control are significant investment, unreimbursed expenses, method of payment, and opportunity for profit or loss.

(c) Relationship of the parties – focuses on how the parties perceive their relationship. This can be seen in the intent of the parties/written contract, employee benefits, discharge/termination, and permanency.

- Corporate Officers

Officers are specifically included within the definition of employee for purposes of federal income tax withholding, FICA, and FUTA. Ref: IRC §§ 3121(d)(1), 3306(i), and 3401(c). The common law standard is **not** applicable.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Generally, an officer of a corporation is an employee of the corporation. However, an officer is not considered to be an employee if two requirements are met:

(a) The officer does not perform any services or performs only minor services; and
(b) The officer is not entitled to receive, directly or indirectly, any remuneration.

The officer must meet **both** requirements to be excluded from employee status.

A director of a corporation, acting in the capacity of a director, is not an employee of the corporation for those services, even if that worker also serves as an employee or officer of the corporation for other services. In such a case, part of the compensation paid this worker can be for services rendered as an independent contractor (director) and part of the payments can be for services rendered as an employee.

S Corporation Officers – If there is an S Corp with a limited number of officers (1, 2, or 3), these officers are essentially doing the work of the corporation and should be reporting “wages paid”, as opposed to “distributions” from the corporation or having received any “loans” from the Corp. It is important that such officers are reporting correctly since withholding is involved.

- Statutory Employees

Workers in four occupational groups are considered employees for FICA tax purposes, and in some instances, FUTA tax, but **not** for federal income tax withholding. Ref: IRC § 3121(d)(3). These workers are referred to as “statutory employees”. The four groups include:

- Agent-drivers or commission-driver
- Full-time life insurance salespersons
- Home workers
- Traveling or city salespersons

Before a worker in one of these four groups is considered a statutory employee, three general requirements must be met as follows:

- Contract of service states that the work will be performed personally.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- Worker has no substantial investment in facilities.
- There exists a continuing relationship between the worker and the business.

- Statutory Non-employees

By federal statute, workers in three occupations are **not** treated as employees (commonly referred to as "statutory non-employees") for purposes of federal income tax withholding, FICA, or FUTA, provided they meet specific qualifications. These three occupations are:

- Real estate agents (IRC § 3508)
- Direct sellers (IRC § 3508)
- Companion sitters (IRC § 3506)

b) State of Illinois Definition of Employee and Employer

These definitions can be found in Publication 130, Who is Required to Withhold Illinois Income Tax, which can be accessed under "Publications" on the IDOR website at www.tax.illinois.gov.

Conclusion of the Research Portion of the Compliance Check – Audit Comments

The audit comments need to clearly report the following:

- The Commence Date for the withholding tax account

- The Cease Date for the withholding tax account (if applicable)

- The Filing Status
(Include detail as to whether the taxpayer is an annual or quarterly filer and whether or not they are in compliance. If not in compliance, the auditor needs to indicate that the case has been referred for audit.)

- The Payment Status
(Include detail on the payment schedule the taxpayer is required to use; annual, monthly or semi-weekly. State whether or not the taxpayer is incompliance. If not in compliance, the auditor needs to indicate that the case has been referred for audit.)

- The results of the federal withholding tax audit check

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(Include whether or not the taxpayer has had a federal audit for the periods being analyzed. If the taxpayer has had a federal audit, then the auditor will need to explain whether the audit affected the withholding taxes for Illinois. If the changes do not affect Illinois, this will need to be noted. If the changes do affect Illinois, and have not been reported by the taxpayer, then the auditor needs to indicate that the case has been referred for audit).

- The results of an employee classification audit check
  (Include whether an employee classification check was necessary and the determination of that check. The auditor needs to indicate that the case has been referred for audit, if warranted by this check).

E. COMPLETION OF THE SC-137 FOR WIT REFERRAL

If the taxpayer is not in compliance for any tax type, and it is determined that an audit is warranted, the auditor will need to complete the SC-137, Audit Referral/Request, as shown below. Referral for audit should be marked. The completed, signed SC-137 should be mailed or emailed, along with required documentation, to the auditor's supervisor who will then sign and submit it to either the Income Tax Audit Planning Supervisor or the Sales Tax Audit Planning Supervisor for set up. The audit will then be assigned in-house.

For WIT audit referrals, the earliest that a referral can be setup as an audit is two months after the missing WIT return due date. This is much different than the time limitation of nine months from the extended due date for BIT/IIT audits.
The limitations period for issuing a notice of deficiency for withholding tax is April 15 of the year that is three years after the close of the calendar year during which the withholding was required. Ref: IITA § 905(j). This period may be extended by agreement. If no return was filed, there is no limitations period. Ref: IITA § 905(c).

The SC-137 can be accessed in the Audit Work Area under Forms on the Sp-IDOR web.

NOTE: When dealing with unitary taxpayers, separate SC-137 forms may need to be completed for each taxpayer not in compliance. Example: If four entities within the unitary group require separate withholding audits, then four SC-137s must be completed and submitted for those entities. A separate audit must be requested for each taxpayer that has a FEIN in GenTax.

This example SC-137 has been filled in to show the information that is required when submitting a "Referral for Audit" based on the findings of a WIT compliance

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

check. **Reminder**: The Auditor ID# required on the SC-137 is the auditor's four digit AIS number.

IV. ELECTRONIC AUDITS

A. SUBMISSION

Important Items to Keep in Mind:

1. This process does not change other functions completed in Gentax such as issuance of letters and their associated functions of the downloading of data into the STT program.
2. STT, APT and the stand alone programs will still be utilized to complete audit paperwork, however storage, submission and processing of the audit data will now be in Gentax.

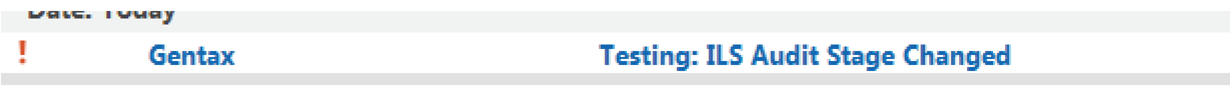
Goals of this Project:

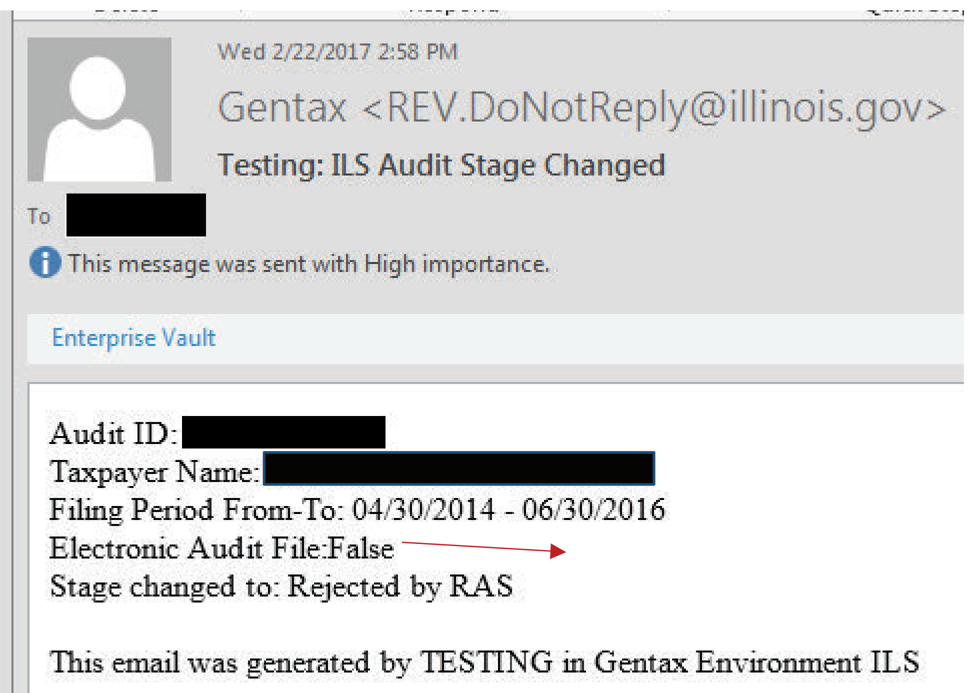
1. Savings of Resources such as paper, postage and time.
2. Increased efficiency in the processing of Audits.
3. Protection of Taxpayer Information through containment of data on secured servers and eliminated the handling of Audit data through third parties such as USPS or UPS.
4. This new process will replace Tiamat for the storage of the CAF of each audit as the CAF will be now contained within Gentax. This new process will allow CAF storage to be more orderly and better allow subsequent file users to access necessary information quickly.

Email Notifications:

Since there will **no longer be a paper file exchanged**, users will notice that email notifications will be sent at various stages to advise that an audit has been assigned to a particular user. These emails are very generic in nature and will merely advise the user an audit has been assigned or in some way changed in relation to his or her inventory or responsibility. This will be of particular importance when an audit is assigned or re-assigned to an auditor or when an audit is turned into a supervisor, passed to clerical or submitted to review and perfection.

Below is an example of the email as it displays in the inbox and the content of the email once opened.



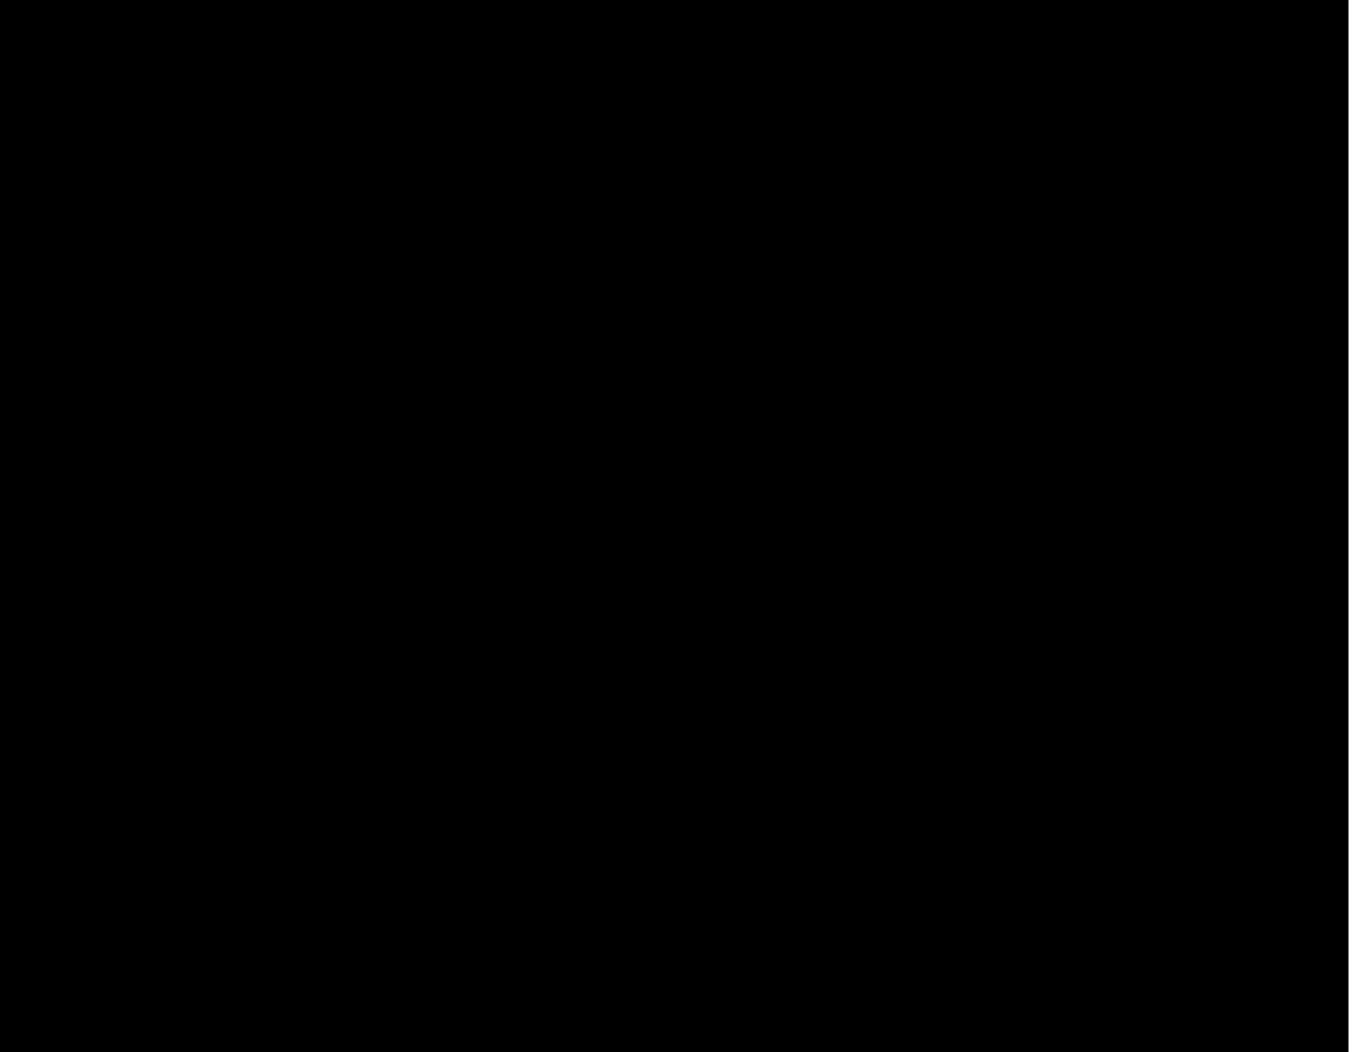


Electronic Documents Tab

Audits will now be stored on the Electronic Documents Tab in Gentax. This was formerly known as the attachments tab. It can be found by accessing the Audit Springboard, CRM tab and Electronic Documents.

Each audit type will have its own index listed on this tab. This will help organize audit file and serve as guide to the auditor for the documentation that may be necessary for their audit. Below is a sample of an index.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



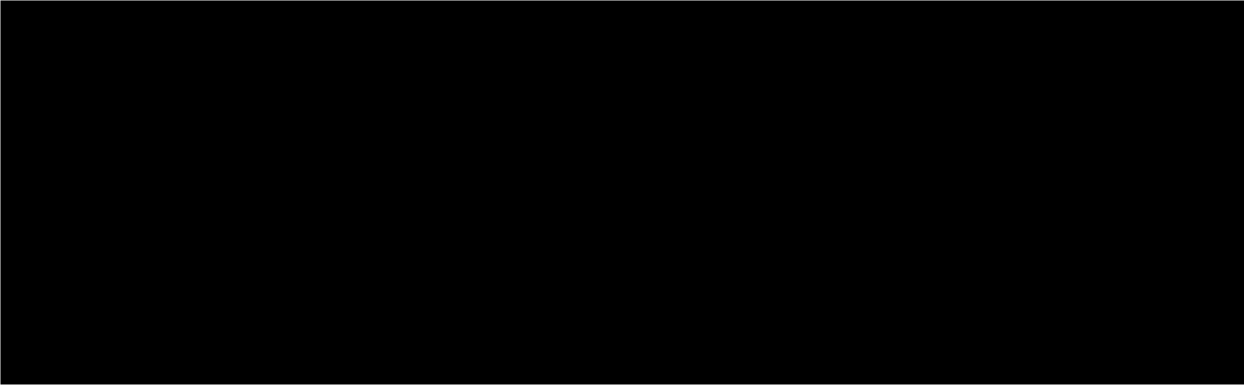
In the above example, the index is divided into sections to organize the information in a clear, concise manner. Next to each document type is an *Add* hyperlink. This is how users will add the necessary documents to the audit file. It is important to note, multiples of each document type can be added. For example, if an audit has multiple auditor reports, the user can add as many as necessary to ensure the audit is properly documented.

Adding Documents to Electronic Documents Tab

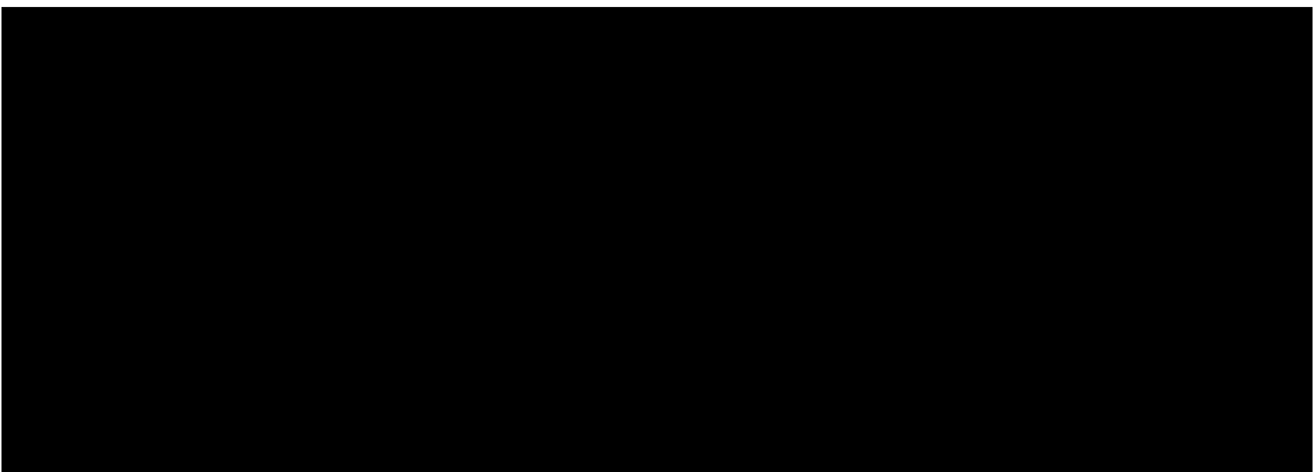
As is shown above next to each document type there is an "Add" hyperlink. To add an individual document type, the users clicks on the hyperlink and will see

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the following window appear:

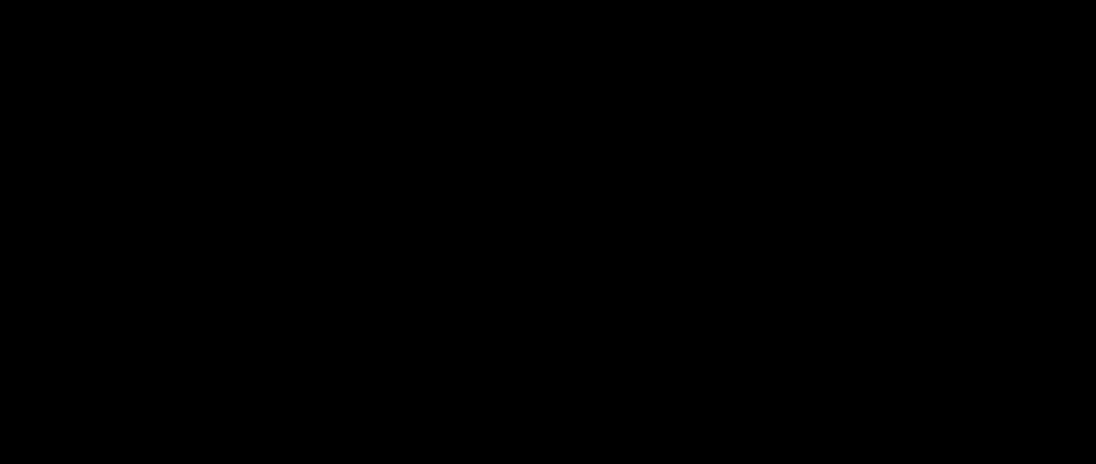


Similar to most attachment functions, users will click on the blue button with the small dots to locate the file to be attached. The following window will then appear:



The user will then select the browse button which will allow them to access the various storage areas utilized (i.e. hard drive, thumb drive etc.) to retain their files until the audit is completed. The auditor then chooses the file. As seen below the file name will automatically populate on the screen.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

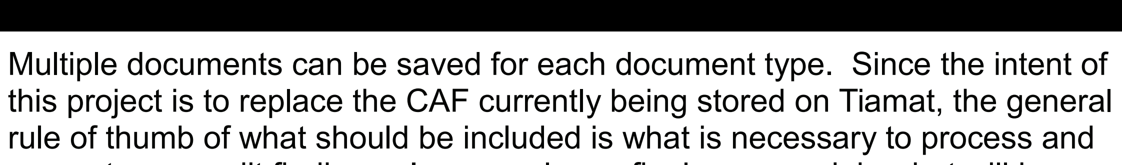


The user then chooses save and the previous window will display as follows with the file name prepopulated.

Note: Because the description line is still yellow, the save function will not work until a description is entered. Yellow is a REQUIRED field.

The system is designed to accept most common file types. (i.e. pdf, word, excel etc.). The user is required to give the file a name and brief description. Users should try to make the file name or at least the description easily identifiable to other users. Auditors should also be consistent in their naming conventions so that subsequent users can easily follow the flow of the audit file.

Once the file is saved it will show the time, etc. that it was saved and can be seen from the main list on the electronic documents tab.



Multiple documents can be saved for each document type. Since the intent of this project is to replace the CAF currently being stored on Tiamat, the general rule of thumb of what should be included is what is necessary to process and support your audit findings. In general your final paperwork is what will be retained in the electronic documents tab, however if multiple versions of a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

document type is necessary to understand and or process audit findings properly, then all necessary versions should be included in the Electronic Documents tab.

Ultimately when the audit is fully processed and the audit stage is changed to closed send to stores, the CAF will become read only. There will be some staff which is given the ability to add files to the CAF once it is closed however those with that security will be limited to protect the integrity of the file in the system.

Individual document types as well as a zip file from STT and APT will be savable to the system. Please keep in mind however that the individual document types **must** be saved and the zip file can be saved as a matter of procedure.

Auditor Signature of the Prod-1: Until there is a Prod-1 available to utilize an electronic signature, the auditor will print sign and scan to attach the prod-1 in the Gentax CAF.

Auditor Submission of Audit to Supervisor
Auditors will see a new button at the top of the audit springboard in Gentax labeled "*Send to Supvr*". This will appear when the audit is in the *assigned started* and the *rejected by supervisor* stages. Since the paper file is being eliminated in this new process, pressing this button when the auditor is ready to submit the audit will send the email notification to the supervisor to let him or her know there is an audit to be reviewed now in their inventory.

Once the audit has been submitted to the supervisor the "Send to Supvr" button will disappear from the springboard. It will not appear again unless the audit is moved to the "Rejected by Supervisor" stage or once again placed in the "Assigned Started" stage. See below.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Procedure Change for Certain Documents Previously Included in Audit File

Changes are being made to the procedure for the submission of SC-137's, Reg 3C's and the Great Lakes Questionnaires.

Typically these items where submitted as part of the audit and then separated out as part of the processing. Since we are now moving to the Electronic CAF in Gentax, we will now be submitting certain forms directly to the appropriate areas instead of submitting with the audit file.

SC-137's will be completed by the auditor and signed by typing their name. This file can be then saved and sent directly to the supervisor. The supervisor will then also sign the form by typing their name and saving the file. Supervisors will now directly send the file via email to the appropriate planning supervisor. All Income tax requests are to be sent to [redacted]. Currently all Sales and Miscellaneous tax requests as well as Great Lakes Questionnaires should be forwarded to [redacted].

Reg 3C's should be attached via email and sent directly to [redacted], who then forwards the to the Central Registration Division.

IMPORTANT: The following changes were made to the Paperless Audit Submission indexes **effective 10/16/2017.**

- Statute Date in the Audit Manager will now show red if the statute is within:
    - 45 Days for Sales and Misc. Audits

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

        - 120 Days for Income Tax Audits

    - The security has been removed for ICB attachments
    - [redacted]

- The following document types have been changed
    - IFTA
        - Added **IFTA MPG Summary Report** in Section 2
        - Added **ICB Action Decision** in Section 5
        - Added **Section 6** for Court/Litigation documents
            - **SC-7**
            - **Notice of Disposition**
            - **Final Orders**
            - **Other Documents**
    - Sales, Misc., Excise
        - Removed **EDC-20** from Section 1
        - Removed **ICB Conferee Recommendation** from Section 5
        - Renamed **Court, AH, and Tribunal** from Section 8 to Other Documents and moved it to Section 9 (see below)
        - Added **EDA-20** to Section 4
        - Added **EDA-11A** to Section 4
        - Added **EDA-11B** to Section 4
        - Added **Subpoena** to Section 4
        - Added **Section 9** for Court/Litigation documents
            - SC-7
            - Notice of Disposition
            - Final Orders
            - Other Documents (see above)
    - BIT
        - Renamed ICB Folder (AD/Recomm) to **ICB Action Decision** in Section 1
        - Added **EDA-11A** to Section 3
        - Added **Subpoena** to Section 3
        - Added **Section 4** for Court/Litigation documents
            - **IL-870-AD**
            - **Litigation EDA-25**
            - **Final Orders**
            - **Other Documents**
    - WIT

    - **Litigation EDA-24**
    - **Final Orders**
    - **Other Documents**

B. RECORDS RETENTION ACT

With the transition to Electronic Audits, we must be sure that we are in compliance with the Records Retention Act. For any document that an auditor intends to scan to include in an electronic audit, meaning the auditor has taken custody of that document, it must be verified as the exact image and retain the same data file integrity after it has been scanned. The process below describes when an auditor must verify the scanned document is an exact replica of the paper hardcopy.

The Audit Clerical Support Supervisor and Audit Recovery and Discovery Division Manager will approve and sign off on the certification and approve these documents for destruction.

What does this mean to you?

- If an auditor receives a document electronically from a taxpayer *there is no verification needed.*

- If a taxpayer provides a document, and the auditor scans it to an electronic format, but gives said document back to the taxpayer, *there is no verification needed.* (The auditor is not taking custody of this document.)

- If a taxpayer provides a document, we scan to electronic format, and we retain that document or take custody of that document for the audit, then verification and destruction is required. Therefore, when documents are scanned in the field, the auditor shall use the attached list to record those scanned documents and affix a certification page for each verification

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

sheet. You must include the numbers of pages scanned for each document. **See example below:**

REVISED
11:51 am, Nov 01, 2017

Auditors must sign the verification sheet and then mail together with the originals for approval and destruction here at the WIB. See attachment A and attachment B.

Mail to: IL Dept. of Revenue
Audit Clerical Support Supervisor
101 W. Jefferson, Mail Code 3-329
Springfield, IL 62702

- If the documents are in excess of 50 pages, please use the attached scanning request to mail the documents to our clerical unit for scanning. Depending on the quantity, the scanned documents will either be returned via email or placed on the network with auditor notification so the auditor can then include in the electronic audit file. See attachment C.

NOTE: In-house Discovery Section: your procedures will remain the same. This does not impact or change current shred procedures. **DO NOT send shred information in with the verification sheets or document request.**

When and where possible please try to obtain electronic documents from the taxpayer which will eliminate the need to do the verification process.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. DOCUMENT SCANNING REQUEST

The purpose of this request is for field auditors needing to scan more than 50 sheets of paper in order to include a document(s) in the electronic audit file. Please take time and prepare the documents for scanning. All paper clips and **staples must be removed**. Separate each document with binder clips or rubber bands for each file. Make sure the paper is free of folds, debris and etc. Depending on the quantity, scanned documents will either be returned via email or placed on the network with auditor notification. Please complete the requested information below for each document.

V. REASONABLE CAUSE

A. INTRODUCTION

This chapter is to be used when considering a taxpayer's request for abatement of penalties established by the Uniform Penalty and Interest Act due to "reasonable cause". This chapter replaces all reasonable cause sections in all other Audit Manual chapters. This chapter provides the guidance and procedures for Audit Bureau staff to follow to make uniform abatement decisions on penalties assessed in an audit.

The State of Illinois imposes penalties for the failure to file tax or information returns or to pay taxes within the time prescribed by statute. The State of Illinois also imposes interest on any unpaid tax liabilities. The Uniform Penalty and Interest Act (UPIA) [35 ILCS 735] authorizes the assessment of interest and penalties.

Section 3-8 of the Uniform Penalty and Interest Act [35 ILCS 735/3-8] provides that the Illinois Department of Revenue can abate some imposed penalties if the taxpayer can demonstrate reasonable cause for the noncompliance. UPIA does not authorize the Department to abate interest. The associated regulations on reasonable cause for the abatement of penalties can be found in 86 Illinois Administrative Code 700.400. The standards in this Regulation are intended to be used for the abatement of UPIA penalties only.

Contact the appropriate Technical Support Section for instructions on how to process Reasonable cause requests for Pre-UPIA penalties and non-UPIA penalties.

B. UPIA PENALTIES **ELIGIBLE** FOR REASONABLE CAUSE ABATEMENT

AUDIT RELATED

- Late filing, failure to file, or late payment penalty [35 ILCS 735/3-3];
- Negligence penalty [35 ILCS 735/3-5].

OTHER

- Failure to file a correct information return penalty [35 ILCS 735/3-4];

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Bad check penalty [35 ILCS 735/3-7.5].

C. UPIA PENALTIES **NOT ELIGIBLE** FOR REASONABLE CAUSE ABATEMENT:

- Personal liability penalty [35 ILCS 735/3-7];
- Collection penalty [35 ILCS 735/3-4.5];
- Fraud penalty [35 ILCS 735/3-6].

D. NON-UPIA PENALTIES

1. **NOT ELIGIBLE** FOR REASONABLE CAUSE ABATEMENT

- Abusive Tax Avoidance Transaction (ATAT) - (35 ILCS 5/1007 & 1008)
- **The penalty imposed under the Retailers' Occupation Tax Act for improper use of a** Building Materials Exemption Certificate.

2. **ELIGIBLE** FOR REASONABLE CAUSE ABATEMENT

- Reportable transaction penalty in 35 ILCS 5/1005(b)(4)

3. **ELIGIBLE** FOR REASONABLE CAUSE ABATEMENT

- Reportable transaction penalty in 35 ILCS 5/1005(b)(4)

E. REASONABLE CAUSE - PENALTY ABATEMENT - AUDIT BUREAU

The term reasonable cause is commonly defined as a good faith effort to exercise ordinary business care and prudence in the reporting of one's tax obligations.

The term good faith commonly refers to an honest belief void of any knowledge that would put a taxpayer on notice **to inquire further as to his or her tax responsibilities, coupled with the absence of any intention** to commit fraud.

Ordinary business care and prudence generally means the amount of care that a reasonably logical person would take under similar circumstances, given the knowledge, experience and sophistication of the taxpayer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Ordinary business care and prudence depends upon the:

- clarity of the law,
- the interpretation of the law (as analyzed by Illinois Appellate or Supreme Court cases),
- taxpayer's experience,
- taxpayer's knowledge, and
- taxpayer's level of education

The Audit Bureau may grant reasonable cause on certain penalties assessed in an audit or on outstanding balances.

There are two separate categories that the Audit Bureau will consider penalty abatement for under Reasonable Cause. They are:

1) Reasonable cause based on error percentage within established limits; and
2) all other reasonable cause requests.

- **AUDIT ERROR RATE LESS THAN**

- **OTHER REASONABLE CAUSE REQUESTS**

, other factors may qualify a taxpayer for reasonable cause consideration. Some examples are as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Death or serious illness of a taxpayer or tax preparer
- Natural disaster
- Unavoidable absence of a taxpayer or tax preparer
- Inability to timely obtain records or computer failure
- Reliance upon written advice from the Department
- Reliance upon the erroneous advice of a competent tax adviser
- Embezzlement or employee fraud

This is located on the Sp-IDOR web.

- **CONSIDERING REASONABLE CAUSE REQUESTS**

When evaluating reasonable cause requests, the reviewer must use the and the reasonable cause regulations (86 Illinois Administrative Code 700.400) in determining whether reasonable cause should be approved.

F. AUDIT PROCEDURES FOR REASONABLE CAUSE PENALTY ABATEMENT

The following procedures must be utilized to request approval for abatement of UPIA and/or pre-UPIA penalties where reasonable cause exists.

All taxpayer requests for reasonable cause penalty abatement must be in writing, which includes letters, emails and facsimiles.

Auditors are not allowed to accept oral requests for reasonable cause penalty abatement. The taxpayer must also submit documentation which supports the taxpayer's contention that reasonable cause should be granted. The best documentation that can be provided by the taxpayer are **evidentiary documents that can be admitted** into evidence at a hearing or trial.

The field auditor can initiate the approval process, but cannot give final approval until it is approved by higher management levels.

Abatement of penalties assessed in an audit will be considered in the following circumstances:

- The overall error rate is within a predetermined tolerance level, or

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- **The error rate may exceed the tolerance level but other factors exist where the taxpayer** may qualify for reasonable cause consideration.

There are different approval procedures for each of these circumstances.

NOTE: Reasonable cause abatement does not apply to Federal Revenue Auditor's Reports (RARs) which follow the established rules that govern Federal Revenue Auditor's Report (RAR) penalties.

When the result of a federal income tax audit is reported and paid within 120 days of federal finalization, no penalty is due. However, when the taxpayer made an error reporting the RAR changes that resulted in more tax due than was reported, penalty is assessed on any such amount and should not be adjusted. Penalty abatement for reasonable cause may be warranted in such a case.

STEP 1 - TAXPAYER NOTIFICATION OF LIABILITY

Once the auditor has determined that a tax liability may exist, the auditor must explain all penalties and notify the taxpayer that they may make a request for the abatement of penalty under the Reasonable Cause guidelines. It is encouraged that the taxpayer submit a request for the abatement of the penalty as early in the audit process as possible. The Reasonable Cause request should be received, reviewed, and replied to prior to the issuance of the following ICB standardized letters:

Income Tax:

- Form EDA-122 - Notice of Proposed Deficiency;
- Form EDA-124-I - Notice of Proposed Tax Liability and Claim Denial; or
- Form EDA-125-I - Notice of Proposed Claim Denial

Sales Tax:

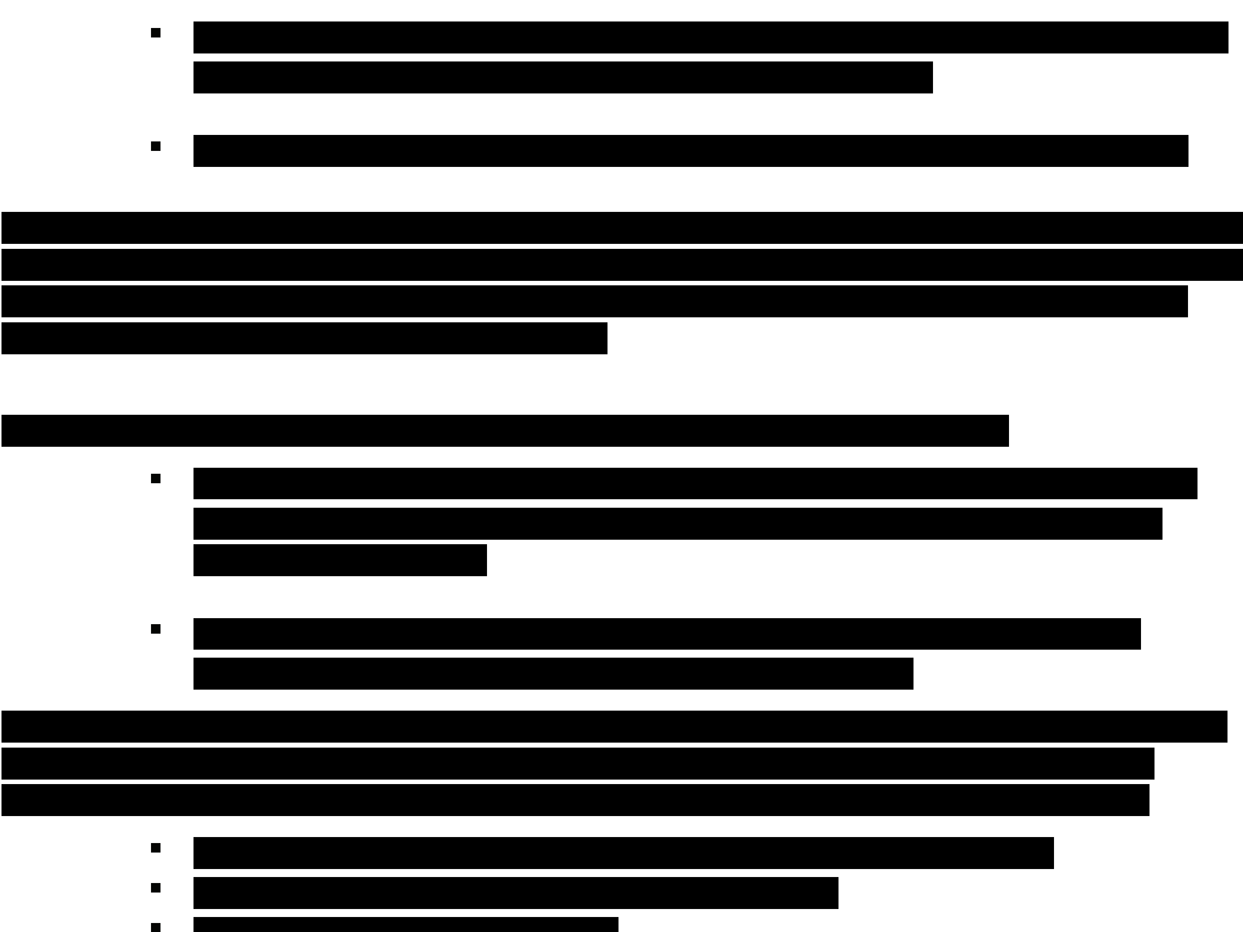
- Form EDA-123 - Notice of Proposed Liability,
- Form EDA-124-S - Notice of Proposed Tax Liability and Claim Denial, or
- Form EDA-125-S - Notice of Proposed Claim Denial

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

STEP 2 - REASONABLE CAUSE BASED ON ERROR PERCENTAGE

If the error rate exceeds the error rate penalty abatement threshold go to Step 3.

The taxpayer's error rate should be within ordinary business care and prudence which can be demonstrated by the accuracy of the taxpayer's returns and their effort in applying tax law correctly. The error percentage threshold limits are as follows:

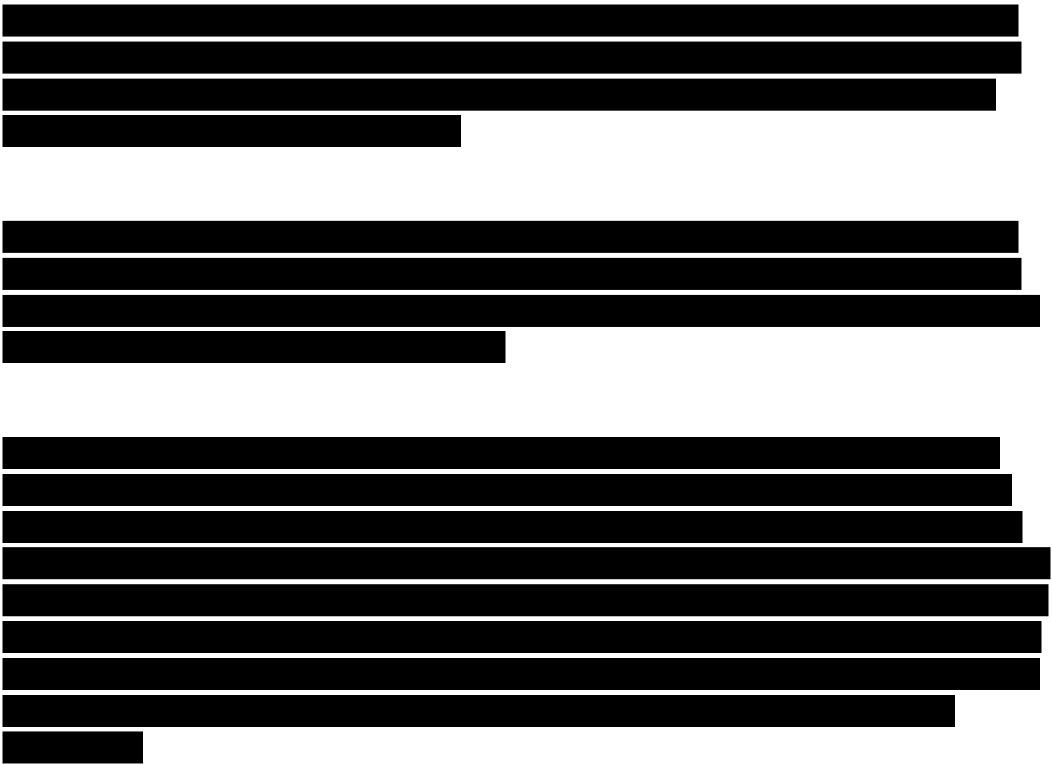


For example, the taxpayer is a retailer with the majority of sales made to exempt organizations and resellers (resale certificates) and pays a minimal amount of ROT. The audit sample error rate is 2.5%. The projected additional tax liability causes the percentage change on tax paid to be 25% because the taxpayer paid a minimal amount of tax on his returns. The auditor and RAS will have to determine which error rate more accurately reflects the taxpayer's compliance with the tax laws and regulations.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) ERROR PERCENTAGE CALCULATION – percentage change on tax paid

The error percentage is based on the amount of increased liability assessed in the audit divided by the dollar amount that the taxpayer paid in the audit period. Examples are as follows:

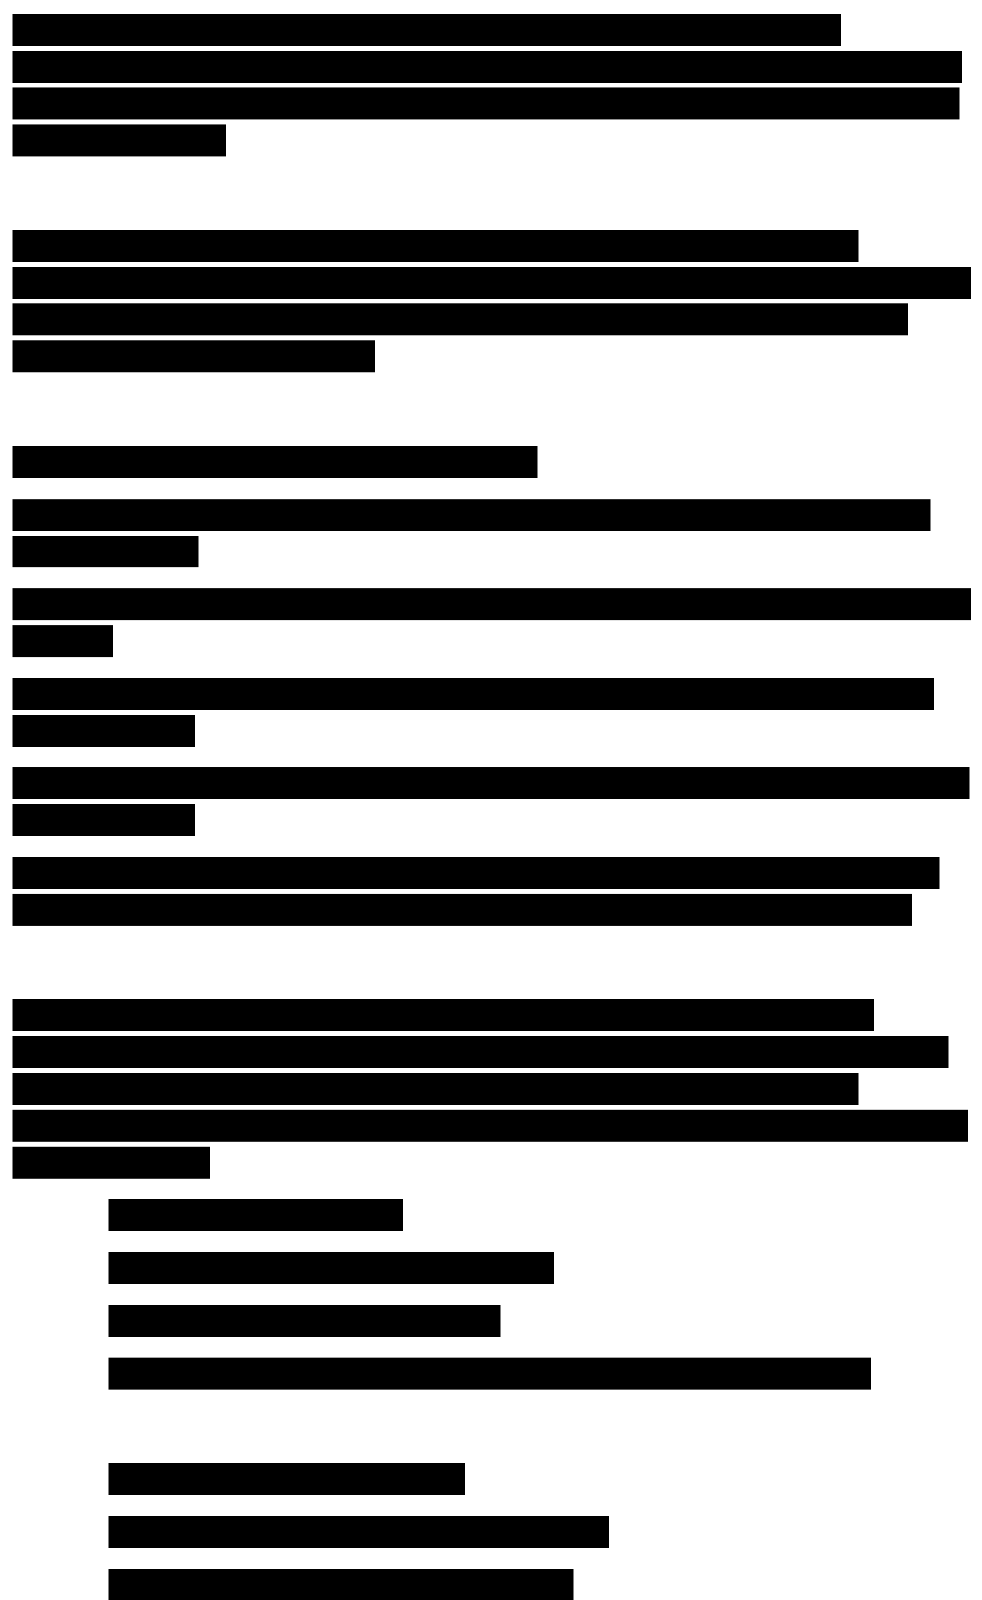


b) ERROR PERCENTAGE CALCULATION – percentage of sample error

Auditors must select accounts to sample which have a taxable basis. (e.g., sales, fixed asset purchases, consumable supply purchases, etc.)

The sample error percentage is based on the total dollar amount of exceptions divided by the total dollar amount of the sample size. This is the case regardless of the type of exam that is made (Detail, % of error, Average Error per Unit, or CAA). In a non-CAA sample the auditor will have to determine the appropriate accounts to sample and have the totals for the sample periods to determine the error rate percentage. Examples are as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In this example, Reasonable Cause might be approved for sales because the error rate is within the established limit and denied for purchases because **the error rate is above the established limit.**

c) AUDITOR PROCEDURES - ERROR RATE

1) Auditors must calculate the error rate percentage and submit a recommendation along with the taxpayer's abatement request to their Supervisor who will then recommend to the Assistant Division Manager for approval or denial.

   It is important that abatement thresholds must never be shared with the taxpayer.

2) The Audit Narrative and EDC-5 must fully explain in detail the rationale for either approving or denying penalty abatement.

The auditor must ensure that the taxpayer's written request for reasonable cause and any documents pertaining to the request (including: work papers, analysis or decision making done in the audit) be retained and included in the audit file.

NOTE: It is important to properly address and document any reasonable cause request at the audit level because the decision is intended to be used in the Board of Appeals analysis if the taxpayer makes a request for a BOA review.

3) The auditor will complete all of the audit reports.

- **If reasonable cause is not approved,** the taxpayer can disagree with the finding and file for an ICB hearing. If the taxpayer accepts the denial and still agrees with the audit findings, the auditor will complete and update the penalty schedule. The penalty will then be on the audit report (IL-870, EDA-105, etc.).
- **If reasonable cause is approved,** the auditor will complete all of the audit reports. The amount of approved abated penalty will not be shown on the final Auditor Reports issued to the taxpayer (e.g., EDA-105, IL-870, etc.). Auditors will code the PROD-1 with the "RC" (reasonable cause) liability code and the "NP" (+/-, Negative/Positive Change) liability code. See Step 4 of this section for instructions on completing the PROD-1 when reasonable cause has been granted.

4) **If abatement is approved,** the auditor must show the abatement on the outside of the audit folder to notify Audit Review and Perfection that penalty relief should be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

given. When Perfection enters the audit return information into GENTAX, GENTAX will apply the penalty. The penalty will have to be adjusted manually.

STEP 3 - ABATEMENT DUE TO REASONS OTHER THAN ERROR RATE – PROCEDURES

1) The taxpayer must submit a detailed written explanation of the reasonable cause circumstances to the auditor. Any documentation, affidavits, or other information which supports the reasonable cause statement must also be provided.

2) Upon receipt of the reasonable cause statement, the auditor and the audit supervisor will review the statement and supporting facts. The auditor and the audit supervisor will make a recommendation of whether or not they feel that reasonable cause exists. The taxpayer's reasonable cause statement, supporting information and the auditor and supervisor's recommendation must be forwarded to the Assistant Division Manager.

3) The Assistant Division Manager will review the recommendation, make a notation of whether he or she agrees or disagrees with the recommendation and send it for final review and approval to the Division Manager. If the reasonable cause request is approved by the Division Manager, the auditor will then complete the audit allowing the reasonable cause abatement.

4) If the Division Manager does not feel that reasonable cause exists, he will deny the reasonable cause statement and return it to the auditor/supervisor. The auditor will then complete the audit following normal audit procedures. If the taxpayer disagrees with the denial of reasonable cause, the taxpayer would still have the option of requesting an ICB hearing. (The taxpayer still has the right to pursue the reasonable cause argument at the conclusion of the audit through normal protest and/or litigation means.) The information, analysis and reasons for denial should be provided to the area (ICB, BOA, etc.) that has jurisdiction to consider reasonable cause if the taxpayer disagrees with the denial.

5) The Audit Narrative must fully explain the rationale for either approving or denying penalty abatement. It is important for the auditor to provide detailed information as to the determination on approval or denial.

6) The auditor will complete all of the audit reports. The auditor will follow the same procedures as in 3.6.2.2 above.

7) If abatement is approved, the auditor must show the abatement on the outside of the audit folder to notify Audit Review and Perfection that penalty relief should

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

be given. When Perfection enters the audit return information into GENTAX, GENTAX will apply the penalty. The penalty will have to be adjusted manually.

STEP 4 – COMPLETING THE PROD-1 WHEN REASONABLE CAUSE HAS BEEN GRANTED

The "NP" code will be used for both Income Tax and Sales Tax to properly record the penalty abatement in GENTAX so that it doesn't impact the Audit Results by Division reports or auditor's production totals.

Auditors will enter the following codes on the PROD-1:

- "RC" and the abated penalty amount shown as a negative number (e.g., -1000)
- "NP" and the abated penalty amount shown as a positive number (e.g., +1000)

The following example shows how Parts 1 and 2 of the PROD-1 will appear:

EXAMPLE PROD-1

Part 1: Additional Liability by Period			
Area: 206 Federal RAR Change	Code: AL	Amount: $	500
Area: 240 Apportionment Change	Code: AL	Amount: $	500
Area: 96 Interest	Code: AL	Amount: $	56
Area: 98 Penalty	Code: NP	Amount: $	150
Area: 98 Penalty	Code: RC	Amount: $	(150)
Part 2: Status of Additional Liability Code			
	Code: AL	Amount: $	1056
	Code: NP	Amount: $	150
	Code: RC	Amount: $	(150)
Total Additional Liability		$	1056

1. PENALTY ABATEMENT ON OUTSTANDING BALANCES

There may be instances in which the taxpayer wants penalties abated that are included in the balances on the Taxpayer Statement. This includes penalties assessed by front end processing for late filing, failure to file, late payment and bad check penalties. These requests are subject to the approval process in Step 3 of this section – Abatement Due to Reasons Other Than Error Rate.

Each assessment will be evaluated individually and each one must have its own reasonable cause request. The ███ error rate threshold for abatement of penalty is only for penalties assessed in an actual audit and must be requested separately from other requests.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Penalties for these types of outstanding balances will only be abated if it is the same issue as was in the audit other than the error rate threshold.

Once reasonable cause has been approved on an outstanding balance, the auditor is to prepare a memo indicating the letter number(s) and stating that the penalty is to be abated per an approved reasonable cause request. The Revenue Audit Supervisor has to approve the memo prior to the case being transmitted to Audit Review. Reasonable cause penalty abatement on outstanding balances cannot be done via the auditor reports (e.g., EDA-105, IL-870) or the PROD-1. Audit Review and Perfection will make the appropriate adjustments in GENTAX and add a CRM note explaining the reason for the adjustment.

a) PAID OUTSTANDING BALANCES

The auditor can make adjustments in the audit on the amount of tax properly due if necessary (i.e. tax liability reduced or additional tax liability).

b) UNPAID OUTSTANDING BALANCES

The auditor can make adjustments in the audit on the amount of tax properly due if necessary (i.e. tax liability reduced or additional tax liability).

If the outstanding balance is in the Collection stage and reasonable cause has been granted, Audit Review and Perfection will need to place a stop bill indicator on the account to remove the periods from Collection and to stop the collector from pursuing the outstanding balance until the adjustments are made.

NOTE: Regardless of the Reasonable Cause status, all outstanding balances are required to be collected in accordance with AMU IT12-11 and ST12-06, Audit Liability Payments and Assessment Collection Payments. For income tax, this AMU has been incorporated into Audit Manual Chapter 20.

c) SPECIFIC AUDIT ISSSUES

- Two-Year Good Filing History Provision- Department policy is to abate both late file and late pay penalties for a taxpayer with a two-year good filing history. This provision only applies to original returns and would not apply to underreporting seen in an audit.
- Reliance on previous Audit issues should not be the sole reason for penalty abatement unless the same fact pattern exists in the follow-up Audit.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

VI. AMNESTY

A. PURPOSE

The purpose of this chapter is to provide information concerning the 2010 and 2003 Illinois Tax Amnesty Programs. The chapter is divided into the two main sections, the first examining the 2010 Amnesty Program (Section III) and the second explaining the 2003 Amnesty Program (Section IV).

B. REFERENCE SOURCES

1. TAX DELINQUENCY AMNESTY ACT
- 35 ILCS 745/

2. ILLINOIS REGULATIONS
- IAC § 520.101
- IAC § 520.105

3. UNIFORM PENALTY AND INTEREST ACT
- 35 ILCS 735 § 3-2(f), (g) and (h)
- 35 ILCS 735 § 3-3(i) and (j)
- 35 ILCS 735 § 3-4(d) and (e)
- 35 ILCS 735 § 3-5(d) and (e)
- 35 ILCS 735 § 3-6(c) and (d)
- 35 ILCS 735 § 3-7.5(b) and (c)

4. DEPARTMENT PUBLICATIONS
- Informational Bulletin FY 2004-11 – Tax Delinquency Amnesty Act (2003)
- Informational Bulletin FY 2005-10 – Refund Claims for RAR Liabilities Paid Under Amnesty (2003)
- The FACT sheet - Amnesty Questions and Answers (2010), was available on the Department’s web site (link has been removed so no longer accessible).

- Throughout the chapter this “bullet style” has been used to indicate when an Exhibit should be reviewed at the end of the chapter. Exhibits have been hyperlinked.

C. 2010 ILLINOIS TAX AMNESTY PROGRAM

Public Act 96-1435 amended the Tax Delinquency Amnesty Act and directed the Department of Revenue to implement an Amnesty program in 2010. The program allowed taxpayers with contested and uncontested tax liabilities who paid the tax in full during the Amnesty Program Period to have the related penalties and interest abated. Taxpayers who did not pay the full tax during the Amnesty Program Period may be subject to double penalties and interest on the unpaid tax liability. Ref: 86 Ill. Admin. Code § 520.101(a) and 35 ILCS 745/10 § 10 Amnesty Program.

1 GENERAL INFORMATION

The Amnesty Legislation did not require the Department to send taxpayers written notification of Amnesty. However, the Department did send a system-generated notice to every taxpayer that had an outstanding processed liability. In addition, the Audit Bureau sent a notice to every taxpayer that was under audit (including ICB cases), had an audit completed but not processed, or that was in unassigned inventory available for selection. The FACT sheet – Amnesty Questions and Answers was available on the Department's web site (link has now been removed) to answer taxpayer questions about the 2010 Amnesty Program. Amnesty regulations are available on the Department's web site (http://www.iltax.com/LegalInformation/regs/part520/).

Note: The regulation, rules, and audit procedures are significantly different for the 2010 Amnesty program when compared with the 2003 Amnesty program.

5. DEFINITIONS

The following definitions are used throughout this chapter:

a) "Eligible Liability"

A tax liability with respect to which a taxpayer may participate in the Amnesty Program. The Eligible Liability is the actual amount due for a period whether known or unknown. Ref: 86 Ill. Admin. Code § 520.105(h).

b) "Established Liability"

An Eligible Liability that was assessed or became final prior to October 1, 2010 (start of the 2010 Amnesty Program Period). Typically, this means the taxpayer received an audit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

return (EDA-105-R, IL-870, etc.) after the completion of an audit (including any proceedings before the Informal Conference Board), Notice of Assessment, Notice of Tax Liability, Notice of Deficiency, or other final bill. The Established Liability is the known amount due for a tax period prior to the start of the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.101(b)(5).

c) "Amnesty Program Period"
The time period during which the taxpayer was required to pay an Eligible Liability. The published dates were from October 1, 2010, through November 8, 2010, but the Department established a grace period which allowed returns and payments received from September 6, 2010 through November 15, 2010 to also qualify.

d) "Additional Liability"
An additional amount of tax determined to be due after the Amnesty Program Period for a period in which a taxpayer participates in Amnesty.

e) "200% Sanction"
The doubling of the rates of penalty and interest imposed on a taxpayer with an Eligible Liability who fails to participate in Amnesty.

f) "Estimated Federal Change Liability"
An Eligible Liability that a taxpayer estimates will result from a Federal Change that has not become final under IITA § 506(b) as of the end of the Amnesty Program Period.

g) "Notice and Demand"
Any demand for payment issued by the Department that is eligible for the 30-day interest-free grace period under UPIA § 3-2(c-5). This is typically the audit return (EDA-105-R, IL-870, etc.). [Note: The EDA-105 and IL-870 are no longer viewed as a notice and demand, but were considered as such during Amnesty.]

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

h) "Protest Act"
The State Officers and Employees Money Disposition Act [30 ILCS 230] which allows a taxpayer to challenge a liability in civil court.

i) "Taxable Period"
The period of time for which any tax is imposed by and owed to the State of Illinois. (ITDAA § 5)

j) "Federal Change"
A change affecting the taxpayer's federal income tax liability that must be reported to the Department under IITA § 506(b).

k) “Amnesty Issue”
An Amnesty Issue is every issue of law that must be resolved in determining the amount of an Eligible Liability paid during the Amnesty Program and all facts relevant to those issues, as in existence as of the end of the Amnesty Program Period.

6. ELIGIBLE TAX PERIODS, PARTICIPATION PERIOD, AND PROVISIONS

Tax periods eligible for Amnesty treatment included those ending after June 30, 2002, and prior to July 1, 2009.

The Amnesty payment period (also referred to as the Amnesty Program Period) ran from October 1, 2010, through November 8, 2010.

For **ROT annual** filers, all 2002 receipts received in a tax period ending after June 30, 2002, would qualify for Amnesty; however, all 2009 receipts received in a tax period ending after June 30, 2009, would not qualify for Amnesty.

Unless specifically excluded, taxpayers were eligible to participate in the Amnesty Program as explained in 86 Ill. Admin. Code § 520.105(b)(1) of the Amnesty Regulations:

A taxpayer may participate in the Amnesty Program **selectively**, provided that the taxpayer completely satisfies its Eligible Liability for the tax type and tax period for which amnesty is sought. Thus, a taxpayer may participate in the Amnesty Program with respect to:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

A) Particular types of tax liability, but not others (e.g., Illinois Income Tax, but not Illinois Retailers Occupation Tax), or

B) Particular tax periods but not others (e.g., 2003 Illinois Income Tax but not 2004 Illinois Income Tax).

If the taxpayer paid its full Eligible Liability during the Amnesty Program Period, the Department abated and did not seek to collect any interest or penalties applicable to that liability. The Department also did not seek civil or criminal prosecution for any taxpayer for the period of time for which Amnesty was granted. However, a taxpayer, with an Eligible Liability, who failed to participate in the Amnesty Program, would be subject (with a few exceptions) to the 200% Sanction on that liability.

If the taxpayer or the Department determines after the Amnesty Program Period the taxpayer owes an additional liability for a period, the taxpayer may preserve the abatement of penalties and interest on any amount paid during the Amnesty Program Period by paying the additional liability plus the 200% Sanction on that liability. If the taxpayer unsuccessfully contests the additional tax liability or fails to pay the additional tax, penalties and interest within 30 days of receiving a Notice and Demand for payment (audit return), the abatement of penalties and interest on the amnesty payment is forfeited and the taxpayer is also subject to the 200% Sanction on any tax liability paid for that period during as well as after the Amnesty Program Period.

7. TAXES/FEES QUALIFYING AND NOT QUALIFYING FOR AMNESTY

a) Taxes/Fees That Qualify

Amnesty applies to all taxes, except for Motor Fuel Use Tax (IFTA), collected by the Department of Revenue, such as Retailers' Occupation, Use, Income, Replacement, Liquor, Cigarette, Hotel, Chicago Soft Drink and other miscellaneous taxes. Ref: 86 Ill. Admin. Code § 520.105(h).

Amnesty does not include taxes that are collected by other Illinois agencies or local municipalities such as corporate franchise taxes, insurance company premiums taxes, unemployment taxes, or local property taxes.

b) Taxes/Fees (and Penalties) That Do Not Qualify

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Lien filing and lien release fees, forfeited retailers' discounts, and over-collections of Use Tax that are required to be remitted to the Department by reason of § 2-40 of the ROT Act are not penalties and were not eligible for abatement.

Collection agency fees that are added to a taxpayer's tax liability are not "penalties", but are tax liabilities that may be eligible liabilities. If referred to a collection agency, the collection agency's fees must be paid during the Amnesty Program Period in order for the taxpayer to qualify for abatement of penalties and interest. Also, reimbursements of collection agency expenses incurred by the Department, when those expenses are deemed by statute to be part of the related tax liabilities are part of the Eligible Liability which must be paid during the Amnesty period.

Responsible officer penalties for failure to collect, account for, and pay over trust taxes are penalties imposed on the responsible officer, even when the amount of the penalty includes unpaid tax and interest. As such, they are ineligible for abatement because there is no related tax liability for the responsible officer to pay. However, a responsible officer's employer could have participated in the Amnesty Program. If the underlying trust tax liability of the employer was paid under the Amnesty Program, penalties and interest would be abated, and the responsible officer penalty would be zero.

In periods where there was no remaining unpaid tax liability, outstanding penalties and interest did not qualify for Amnesty.

8. PENALTIES THAT **QUALIFY** FOR ABATEMENT

Late payment, late filing or failure to file, collection, negligence, fraud, bad check, and tax shelter penalties were eligible for abatement. Abatement of penalties and interest was based on the period, and not the payment. Therefore, penalties and interest from previously assessed tax liabilities which were still **unpaid** during the Amnesty Program Period were also eligible for abatement if the Eligible Liability was paid during the Amnesty Program Period.

> **Example:** Taxpayers had a $1,000 tax liability on their 2008 income tax return. They filed the return timely but did not pay the tax liability and were assessed a late payment penalty and interest on the $1,000 liability. In December 2009, the taxpayer paid $700 which was applied to the tax liability. If the taxpayer pays the remaining $300 tax liability during the Amnesty Program Period,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

they will receive abatement on the penalties and interest that were assessed on the original $1,000.

As stated above, tax shelter penalties were eligible for abatement. However, in a situation where the taxes have been paid before the Amnesty Program Period, ATAT penalties would not qualify for abatement.

> **Example:** An auditor assessed ATAT penalties on the $10 million of taxes paid with Forms IL-1120-X for tax years 2007 and 2008, which were filed by the taxpayer on December 30, 2009 (taxes were paid well before the 2010 Amnesty Program Period began). During the Amnesty Program Period, the taxpayer filed a subsequent set of amended returns for both years and paid additional taxes of $1 million with the returns on October 30, 2010. The taxpayer contended that the payment made during Amnesty would preclude the auditor from imposing ATAT penalties on the original $10 million paid on December 30, 2009. However, the taxpayer is incorrect and may only have abatement on the penalty and interest associated with the $1 million liability paid during the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(h)(1).

9. PENALTY AND INTEREST ONLY LIABILITIES

Amnesty participation was not allowed for taxpayers who only owed penalty and/or interest. Ref: 86 Ill. Admin. Code § 520.105(h)(1).This occurred when a taxpayer had paid all of the tax liability due for a period, but had not yet paid all of the penalty and interest related to the liability. Since these taxpayers could not participate in Amnesty, the 200% Sanction did not apply.

> **Example:** Taxpayers had a $1,000 tax liability on their 2008 income tax return. They filed the return timely but did not pay the tax liability and were assessed a late payment penalty and interest on the $1,000 liability. On December 22, 2009, the taxpayer paid only the $1,000 tax liability. By the start of the Amnesty Program Period, they had not paid the penalties and interest. An audit concluded on October 15, 2010, established an additional $100 tax liability for 2008. If they signed the audit return and paid the additional $100 tax liability before the end of the Amnesty Program Period, the Department would abate penalties and interest related to the additional $100 liability, but not the interest and penalties (standard rate) related to the original $1,000 liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

10. PARTICIPATION IN AMNESTY

No application was required for Amnesty participation. In order to qualify for Amnesty, taxpayers must have had an outstanding Eligible Liability for a tax period covered under the Amnesty Program. These included taxpayers who:

1) Had a tax liability associated with an audit, including those that were currently assigned or in Technical Review?

2) Had unreported liabilities in periods not under audit.

3) Had unpaid tax assessments (Established Liabilities).

4) We're participating in the ICB process. (See the "Amnesty and ICB" section below for details)

5) Were in Administrative Hearings. In order to participate in the Amnesty Program, a taxpayer in Administrative Hearings had to withdraw and stipulate to judgment in favor of the Department and pay the tax during the Amnesty Program Period.

6) Were in bankruptcy. However, since taxpayers in bankruptcy were likely unable to get court and creditor approval in time to pay the required tax within the Amnesty Program Period, the 200% Sanction does not apply.

11. ELIGIBLE VS ESTABLISHED LIABILITIES

There are two significant differences between the treatment of an Established Liability and other Eligible Liabilities.

First, as a general rule, a taxpayer who failed to pay all of an Eligible Liability would be subject to the 200% Sanction only on the amount they failed to pay as long as they paid all additional tax, penalties, and interest within 30 days of receiving a notice and demand for payment of the additional amount. Audit reports such as the EDA-105 and IL-870 qualify as notice and demands. (Note: The EDA-105 and IL-870 are no longer viewed as a notice and demand, but were considered as such during Amnesty.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In contrast, a taxpayer who failed to pay all of an Established Liability during the Amnesty Program Period did not qualify for abatement of penalties and interest, and was subject to the 200% Sanction on its entire liability.

Second, participation in the Amnesty Program generally did not bar refund claims. However, in the case of an Established Liability, no refund was allowed unless it resulted from an issue that was unrelated to the Amnesty payment or from a federal change (RAR) to the taxpayer's income tax liability, which became final after Amnesty.

Taxpayers with an Established Liability needed to pay that tax liability in full during the Amnesty Program Period to qualify for abatement of penalties and interest.

Taxpayers with an Eligible Liability (that was not an Established Liability) needed to file the appropriate original or amended returns, and pay the tax liability shown on the return (plus any Established Liability for that tax and period) in full during the Amnesty Program Period to qualify for abatement of penalties and interest.

12. CONSEQUENCES FOR FAILURE TO PARTICIPATE – 200% SANCTION

A taxpayer who failed to pay the full amount of an Established Liability during the Amnesty Program Period had the 200% Sanction imposed on the full liability. They did not receive amnesty on any partial payments made during the Amnesty Program Period.

A taxpayer who failed to pay any portion of an Eligible Liability (other than an Established Liability) during the Amnesty Program Period would have the 200% Sanction imposed on that unpaid portion. If the taxpayer paid the unpaid portion of the tax, with the related penalties, and interest (including the 200% Sanction) within 30 days of receiving a notice and demand for payment, the taxpayer maintained the abatement of penalties and interest on any portion paid during the Amnesty Program Period. If the taxpayer failed to pay the unpaid portion of the tax, penalties, and interest within 30 days of receiving a notice and demand for payment, they were also subject to the 200%
Sanction on the portion of the liability paid during as well as after the Amnesty Program Period.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note that the 200% Sanction did not apply to RAR liabilities for any period covered by the 2010 Amnesty Program, even if the change was not timely reported or the payment was made beyond 120 days of the finalization date.

13. REQUIREMENT TO FILE RETURNS

For Eligible Liabilities which were not assessed or otherwise subject to collection action by the Department before the end of the Amnesty Program Period, the taxpayer was required to **file and pay** the appropriate original or amended return for that liability, during the Amnesty Program Period, in order to participate under Amnesty. Taxpayers who made a payment during the Amnesty Program Period without filing a return were subject to the 200% Sanction.

Taxpayers who filed one return for multiple periods (Sales Tax) were only eligible for Amnesty on one of those periods.

> **Example:** A taxpayer who was required to file monthly sales tax returns filed one return covering January – December 2008 and paid the reported liability during the Amnesty Program Period. Even if the payment was enough to cover the full liability, the taxpayer would only qualify for Amnesty in one month.

Auditors should have allowed Amnesty on the period that was most beneficial to the taxpayer (per Sales Tax policy).

AMNESTY BY PERIOD

Each period had to be evaluated separately to determine whether it qualified for Amnesty. A taxpayer may have qualified for abatement of penalties in one period of an audit and be subject to the 200% Sanction in another.

> **Example:** A taxpayer filed monthly ST-1-X returns during the Amnesty Program Period and paid $10,000 per month for the periods from January 2007 through December 2008. In March 2011, an auditor determined they actually owed $8,000 per month for January – December 2007 and $11,000 per month for January – December 2008. Since the full Eligible Liability was paid for each month in 2007, these months maintain the abatement of penalties and interest even if the taxpayer refused to sign the audit return reporting the additional $1,000 per month for 2008.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The additional $1,000 per month for 2008 was subject to double penalties and interest. If the taxpayer did not sign the audit return and/or pay the full amount of Additional tax, penalties, and interest within 30 days, the taxpayer would also be subject to the 200% Sanction on the original $10,000 payments for 2008.

Although each period must be evaluated separately, auditors should not have prepared special returns to allow taxpayers to selectively agree to additional liabilities on a period by period basis.

14. TAXPAYERS NOT SUBJECT TO THE 200% SANCTION

The 200% Sanction did not apply to the following:

1) A taxpayer with an income tax liability that results from a Federal Change, if the Federal Change was not final as of the end of the Amnesty Program Period.

2) A taxpayer in bankruptcy proceedings during the Amnesty Program Period.

3) A taxpayer who, during the Amnesty Program Period, was a party to any civil litigation pending in an Illinois circuit court or Illinois appellate court or the Illinois Supreme Court. Ref: 86 Ill. Admin. Code § 520.101(b)(1) for 1 through 3 above.

4) A taxpayer who, during the Amnesty Program Period, was a party to any criminal investigation for nonpayment, delinquency or fraud in relation to any State tax imposed by any law of the State of Illinois with respect to an otherwise Eligible Liability.

5) A taxpayer who, prior to the beginning of the Amnesty Period, entered into an installment payment agreement with the Department. If the taxpayer fails to fulfill the terms of that agreement, they will be subject to the 200% Sanction.

6) A taxpayer under audit who, before the end of the Amnesty Program Period, submitted a request for an installment agreement, and the agreement was ultimately approved by the Collections Bureau. If the taxpayer fails to meet the terms of the agreement (defaults), the Collections Bureau will reinstate the 200% Sanction (see section on “Payment Plans”).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

15. INELIGIBLE TAXPAYERS

Taxpayers that were a party to any criminal investigation, or civil or criminal litigation that was pending in any Illinois circuit court, Illinois appellate court, or the Illinois Supreme Court during the Amnesty Program Period were not eligible. Ref: 86 Ill. Admin. Code § 520.105(d). Since these taxpayers were ineligible to participate in the Amnesty Program with respect to these liabilities, they are not subject to the 200% Sanction.

If taxpayers with civil cases pending in Illinois courts wished to participate in Amnesty, they were required to stipulate to judgment in favor of the Department and make full payment of tax during the Amnesty Program Period. If they did not, they were ineligible to participate in the Amnesty Program with respect to these liabilities, and they are not subject to the 200% Sanction.

Amnesty participation was not allowed for taxpayers who owed penalty and interest only. This occurred when a taxpayer had paid all of the tax liability due for a period, but had not yet paid all of the penalty and/or interest related to this liability.

16. PAYMENTS, OFFSETS, AND CREDITS

a) Method of Payment

Payments under the Amnesty program were allowed to be made by cash, check, money order, guaranteed remittance, or ACH debit. Payments of amounts due under the IITA (applies to individuals only) could be made by credit card, provided that the taxpayer paid any discount fee charged by the credit card issuer.

If ACH debit (WebPay option through the Department's website) was used by the taxpayer for Amnesty payments, the auditor should have followed the procedure in place pertaining to "Electronic Funds Transfer" to insure that the "Amnesty payment" was applied correctly to the proper APE (income tax) or audit period (sales tax). Refer to the "Electronic Funds Transfer" section of Chapter 20 for this procedure.

Verified overpayments and credit memorandums relating to sales and excise taxes could also be used to pay an Eligible Liability. To use these credits, taxpayers were required to provide a request to use them with the appropriate return. For information on using

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Manufacturer's Purchase Credit (MPC), see the section "Use of Manufacturer's Purchase Credit (MPC)".

Established tax liabilities could be paid by several methods:

- Electronically through the Department's web site at **tax.illinois.gov.**
- Using a credit card for Individual income tax liabilities.
- Mailing the payment, along with the provided payment voucher.
- Paying in person with checks or guaranteed remittances at any Illinois Department of Revenue office.
- Paying in person with cash at the JRTC building in Chicago or the Willard Ice Building in Springfield.

Eligible liabilities that were **not** Established Liabilities could be paid by three methods:

- Mailing the payment, along with any required original or amended return, to the PO Box address provided on the Amnesty letter.
- Paying in person with checks or guaranteed remittances at any Illinois Department of Revenue office. Appropriate original or amended returns were required.
- Paying in person with cash at the JRTC building in Chicago or the Willard Ice Building in Springfield. Appropriate original or amended returns were required.

(1) Payment Plans

Payment plans could be requested by taxpayers who received Amnesty letters. These taxpayers were required to submit a completed CPP-1, Payment Installment Plan Request, postmarked between October 1 and November 8, 2010, and have the Collections Bureau approve the request.

Since no special payment plan was established for Amnesty, all payment plans function as normal. Plans include tax, penalty and interest when set up and approved by Collections.

In order to qualify for Amnesty, the taxpayer was required to pay the full amount of the tax due during the Amnesty Program Period, so entering into a payment plan did not result in abatement of penalties and interest. However, taxpayers who established a payment plan before the end of

the Amnesty Program Period were not subject to the doubling of penalty and interest if all payments were made as agreed. If a taxpayer later defaulted on their payment plan, all penalties and interest would double.

In order to qualify for a payment plan, the taxpayer must have filed all required returns from 2004 to the time they submitted the CPP-1. After October 15, 2010, the taxpayer also had to have a 2009 Individual Income Tax Return on file to be considered current.

Taxpayers who were establishing a payment plan for Individual Income Tax could request up to 60 months to pay off the outstanding balance.

Taxpayers who were establishing a payment plan for Business Income Tax could request a payment plan up to 24 months to pay off the outstanding balance.

(2) Taxpayers under Audit

Taxpayers under audits, which could not be completed before the end of the Amnesty Program Period, were required to submit signed original or amended returns with payments for each applicable tax period in order to qualify for Amnesty. If taxpayers sent a payment without a return, the auditor was required to contact them and request that they file the required returns. If they refused, the auditor was required to document the refusal in their EDC-5. Double penalties and interest would apply to these payments.

Returns and payments for all tax types were requested to be mailed to:

Illinois Department of Revenue
Audit Bureau
PO Box 19012
Springfield, IL 62794-9012

All returns were scanned into the Audit Springboard-Attachments panel in Gentax, but not processed. The auditor’s comments needed to state that estimated returns were received and are attached on the Audit Springboard. **ROT auditors** would use these estimated returns to make

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

adjustments on the final EDA-105 (or equivalent) audit returns. For **Income tax auditors**, amended returns would be processed using the amounts shown on an original return filed during amnesty or the amounts in Column C of an amended return as the starting point for the audit adjustments. Note: Column C of the IL-1120X could only be used if Column A matched Gentax.

(3) NSF (non-sufficient funds) Checks

Payments by check that were returned due to insufficient funds (NSF) in the taxpayer's account did not qualify as payments during the Amnesty Program Period. If the money was not repaid within the Amnesty period, double penalties and interest applied.

b) Amnesty and Offsets

During the Amnesty Program Period, underpayments could be offset with overpayments from audit periods within the audit track. Ref: 86 Ill. Admin. Code § 520.105(c)(4)(ii). If the overpayment was established during an audit within the Amnesty Program Period, no interest would be payable by the Department on the portion of overpayment used to offset the underpayment. Interest would be paid only on the **net** overpayment. However, interest would be allowed on any refund or credit based on a refund claim that was outstanding as of the **beginning** of the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(k)(5).

Example:
During the Amnesty Program Period, the auditor determined that the taxpayer overpaid January 2008 by $3,000. The auditor also determined that the taxpayer owed an additional $2,000 in January 2007 and an additional $1,500 in February 2009. The $3,000 overpayment was applied to the underpaid periods when the auditor prepared the EDA-105-R. Interest was only calculated on the $500 in tax from February 2009 that was not offset with the credit from January 2008. There was no overpayment interest granted for January 2008. Since the underpayments were discovered during an audit, penalties were calculated at the 15% rate for January 2007 and February 2009. The tax due was the difference between the overpaid and underpaid periods. As long as the taxpayer signed the EDA-105-R during the

Amnesty Program Period, the $300 penalty on the $2,000 liability from January 2007 was abated. The $225 penalty for February 2009 was also eligible for abatement if the taxpayer paid the remaining $500 tax liability during the Amnesty Program Period.

Example:
During the Amnesty Program Period, a taxpayer was being audited for the 2007 and 2008 tax years. The taxpayer's 2007 original return had been "math errored" by the Department resulting in a balance due of $792,000. However during the audit, the auditor obtained the NLD schedule which allowed the reversal of the math error and resulted in the taxpayer having an overpayment of $300,000 for 2007. No other audit adjustments applied to 2007. For the 2008 tax year, audit adjustments resulted in the taxpayer having a proposed liability of $500,000. The $300,000 overpayment for 2007 was used to offset the $500,000 underpayment for 2008. The taxpayer needed to pay the $200,000 net liability during the Amnesty Program Period in order to qualify for the abatement of penalties and interest under amnesty.

If the audit resulted in a net overpayment, either a refund or credit memo was issued. Interest was earned only on the net overpayment. The auditor should have informed the taxpayer that they would not receive any interest on the portion of the overpayment used to offset the underpayment.

Example:
During the Amnesty Program Period, the auditor determined that the taxpayer under audit had overpaid the 2007 tax year by $5,000, but had underpaid the 2008 tax year by $3,500. Both years were included in the audit track. $3,500 of the 2007 overpayment was applied to the underpaid 2008 tax liability. Penalties and interest were abated for 2008. **The offset is an Amnesty payment in the underpaid period** (see 86 Ill. Admin. Code § 520.105(c)(4)(A)(ii)). Interest was only paid on the $1,500 net overpayment from the 2007 tax year.

If an audit could not be completed before the end of the Amnesty Program Period, the taxpayer was required to file and pay original or amended returns reporting the Eligible Liability and the overpayment periods used to offset that liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

After the Amnesty Program Period, taxpayers under audit were still able to offset liabilities with payments made during the Amnesty Program Period, but the offset occurred after the assessment of the 200% Sanction on any underpaid tax liability. Any excess payments for the audit would be credited or refunded to the taxpayer. There was no interest payable on any refund or credit that resulted from an overpayment of an Amnesty payment (see UPIA § 3-2(h)).

Example:
During the Amnesty Program Period, a taxpayer filed amended returns and paid an additional $3,000 for January 2007, an additional $10,000 for January 2008, and an additional $8,000 for February 2009. The Department initiated an audit **after** the Amnesty Program Period. The auditor determined that the taxpayer overpaid its January 2008 estimated amnesty payment by $3,000. The auditor also determined that the taxpayer owes an additional $2,000 in January 2007 and an additional$1,500 in February 2009. The $3,000 overpayment would be applied to the underpaid periods when the auditor prepared the EDA-105-R.

Penalties would be calculated at the doubled 30% rate on the $2,000 for January 2007 and $1,500 for February 2009 and the tax due would be the difference between the overpaid and underpaid periods. The EDA-105-R would list tax of $500 ($2,000 + $1,500 - $3,000) and penalties of $1,050 (($2,000 + $1,500) x 30%). Interest would be computed on the $3,500 underpayment at double rates. These penalties and interest would not be reduced even if the taxpayer paid the full amount of additional liability. If the taxpayer did not pay the full amount of the additional liability prior to the due date of any demand for payment issued by the Department, the abatement of penalties and interest would be forfeited and the 200% Sanction applied to the Amnesty payments of $3,000 for January 2007 and $8,000 for February 2009.

For **Income Taxes**, the auditor could do an offset if it was between years within the audit period. **No pending income tax refunds were allowed to be offset during the amnesty program period.**

Example:
A taxpayer was under an income tax audit for tax years 2007 and 2008 **after** the Amnesty period. The taxpayer had filed and paid amended returns estimating the tax liability for both years during the Amnesty Program Period. The auditor determined that the taxpayer overpaid the 2007 estimated tax liability by $2,000 but has underpaid the 2008 by $1,000. The taxpayer currently had a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

pending refund of $500 from the 2006 tax year which could not have been used to offset any underpayment during the Amnesty Program Period, because 2006 was not in the audit (see Regulation § 520.105(c)(5)). The $2,000 overpayment from 2007 could be used to offset the underpaid $1,000 for 2008; however, the 200% Sanction would be calculated on the $1,000 underpayment for 2008 before any offset of the overpayment. Any overpayment amount that remained after offset would be credited or refunded to the taxpayer.

If a pending refund for a given year was reduced by an audit, the auditor should have shown the adjustment on the IL-870 and then put a note in the comments that the adjustment merely reduced the pending refund. No penalty or interest should have been imposed, except in the case where the refund was the result of a carryback, so that restricted interest would apply to the adjustment. An email should have been sent to the Audit Perfection and Review supervisor requesting that an audit indicator be placed on the account to ensure that the refund was not made before the audit was processed.

c) Cash Prepayments (Sales Tax Only)

Cash prepayments (applied to Sales Tax only) made prior to the Amnesty Program Period could be used to qualify for Amnesty even if there was no other liability paid during the Amnesty Program Period.

Example:
A taxpayer was under audit for January 2007 – June 2009. After receiving an audit initiation letter in September 2009, a prepayment was made against the audit of $100,000. The auditor completed the audit on October 15, 2010, and determined that the additional liability was $90,000. The taxpayer could qualify for abatement of penalties and interest by signing the audit return and requesting that $90,000 of the prepayment be applied to the audit Amnesty liability. The remaining $10,000 was applied to post-Amnesty periods. If the post-Amnesty liability was less than the $10,000, the taxpayer received a credit memorandum or refund for the difference. Since the remaining $10,000 was not applied to an Amnesty period, it was eligible for interest.

Cash prepayments which were not included on a return filed before the end of the Amnesty Program Period did not qualify as amnesty payments.

Example:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A taxpayer was under audit for January 2007 – June 2009. After receiving an audit initiation letter in September 2009, a prepayment was made against the audit of $100,000. The auditor completed the audit on October 15, 2010 and determined that the additional liability was $125,000. The taxpayer did not agree to the full liability, did not file amended returns, and did not pay the remaining $25,000. Since the $100,000 prepayment was not reported on a return prior to the end of the Amnesty Program Period, the entire $125,000 liability was subject to the 200% Sanction. The $100,000 prepayment was applied to the audit liability after the 200% Sanction was applied to Amnesty periods.

d) Use of Manufacturer's Purchase Credit (MPC)

The reduction of a liability that results from the use of Manufacturer's Purchase Credit is not a payment of tax. Therefore, the use of MPC did not qualify a taxpayer for Amnesty. The taxpayer could, however, use MPC to offset the amount of use tax due on production related tangible personal property. Penalty and interest applied to this liability, but if the taxpayer paid the remaining audit liability during Amnesty, these were abated.

Example #1:
A taxpayer had a $100,000 use tax liability. $40,000 was tax on production related tangible personal property. The taxpayer paid the $40,000 with available MPC when the audit was completed on October 15, 2010, and the taxpayer did not contest the results and paid the remaining $60,000 liability during the Amnesty Program Period. All penalties and interest were abated on the entire $100,000 liability.

Example #2:
The taxpayer had $40,000 in unpaid production related use tax liability, and the taxpayer authorized the use of $40,000 of available MPC to pay the liability. The taxpayer did not qualify for Amnesty because no tax liability which could qualify the taxpayer for Amnesty was unpaid. The taxpayer owes the penalty and interest even if the MPC was used during the Amnesty Program Period. Since the taxpayer had an Eligible Liability that was not paid during the Amnesty Program Period the penalties and interest will double.

Example #3:
The taxpayer had $40,000 in production related use tax liability, but no other tax liability and the taxpayer authorized the use of $15,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

of available MPC to pay part of the tax liability. The taxpayer could qualify for Amnesty by paying the remaining $25,000 during the Amnesty Program Period and all penalties and interest would be abated.

Example #4:
A taxpayer had a $100,000 use tax liability. $40,000 was tax on production related tangible personal property. The taxpayer signed the audit return and paid the $40,000 with available MPC when the audit was completed on October 15, 2010, but the taxpayer did not pay the remaining $60,000 liability by the end of the Amnesty Program Period. Penalties and interest will double on the entire $100,000 liability.

Example #5:
A taxpayer was under audit during the Amnesty period but the audit could not be completed by November 8, 2010. An additional use tax liability was estimated at $50,000 of which $40,000 was production related. The taxpayer made an amnesty payment of $10,000 and completed an MPC-1 directing the Department to pay the remaining $40,000 with available MPC. After the Amnesty period, the auditor determined that the additional liability was $60,000 of which $50,000 was production related. The remaining $10,000 liability is subject to the 200% Sanction regardless of whether a cash payment was made or MPC was used.

Example #6:
A taxpayer was under audit during the Amnesty period that could not be completed by November 8, 2010. An additional use tax liability was estimated at $50,000 of which $40,000 was production related. The taxpayer made an Amnesty payment of $10,000 and completed an MPC-1 directing the Department to pay the remaining $40,000 with available MPC. After the Amnesty period, the auditor determined that the additional liability was $30,000, of which $20,000 was production related. No additional liability is due. All penalties and interest will be abated, and the taxpayer will be able to add the $20,000 in excess claimed MPC to its available MPC balance.

Example #7:
A taxpayer was under audit during the Amnesty period that could not be completed by November 8, 2010. An additional liability was estimated at $50,000 of which $40,000 was production related. The taxpayer made an Amnesty payment of $10,000 and completed an

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

MPC-1 directing the Department to pay the remaining $40,000 with available MPC. After the Amnesty period, the auditor determined that the actual additional liability was $35,000, of which, $5,000 was production related. After taking into account the $10,000 Amnesty payment and the $5,000 in production related supplies, the additional liability is $20,000 and is subject to the 200% Sanction. The taxpayer will be able to add the $35,000 in excess claimed MPC to its available MPC balance.

Example #8:
A taxpayer did not make an Amnesty payment and is selected for audit after the Amnesty period. The auditor determines that the additional liability is $30,000, of which, $5,000 is production related. All of the additional liability is subject to the 200% Sanction regardless of whether the additional liability is paid in cash or with MPC.

Example #9:
A taxpayer made a $5,000 Amnesty payment and is selected for audit after the Amnesty period. The auditor determines that the additional use tax liability is $30,000, of which, $5,000 is production related. All of the additional liability is subject to the 200% Sanction regardless of whether a cash payment is made or MPC is used. If the taxpayer contest the audit or do not pay the additional tax due by the due date shown on the assessment, the original $5,000 Amnesty payment is also subject to the 200% Sanction.

If an audit could not be closed by the end of the Amnesty Program Period, taxpayers needed to list the MPC amount they wanted to use on the ST-1 return for each applicable period. They also were asked to complete an MPC-1 to report the amount of MPC they wished to apply to satisfy their Amnesty liability. Failure to provide the MPC-1, however, would not invalidate their amnesty status if they otherwise qualified.

MPC for Credit Swaps

Participating in Amnesty did not prevent a taxpayer from exchanging MPC for credit on production related liabilities. This was not considered contesting an amnesty liability, but rather a payment exchange which did not affect the taxpayer’s liability for the period.

Example:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

A taxpayer signs an audit return and makes a $5,000 Amnesty payment on Use Tax liability due for May 2009 during the Amnesty Program Period in order to qualify for abatement of penalties and interest. In January 2010, the taxpayer files an EDA-98 requesting to exchange $5,000 in available MPC for credit. Whether or not the auditor approves the exchange, the taxpayer will not lose the original abatement of penalties and interest.

e) Loss Carryovers or Credits

If an audit could not be closed by the end of the Amnesty Program Period, the taxpayer needed to file an amended return indicating the amount of losses or credits that were available for use in the tax period. Reduction of the tax liability to zero using those losses or credits did not qualify as an Amnesty payment per 86 Ill. Admin. Code § 520.105(c)(1). However, if the reduction was the result of a carryforward, the interest and penalties associated with the reduction were eliminated. A carryback, on the other hand, could reduce the liability to zero, without eliminating penalty and interest, so that the taxpayer still owed the penalty and interest and had no liability it could pay during Amnesty to abate these amounts.

Example 1: A taxpayer filed an amended 2008 income tax return claiming $1,000 in enterprise zone investment credits that were earned in 2007 and carried forward to 2008. This $1,000 credit reduced the tax liability to zero, and eliminated any late payment penalty and interest arising from the taxpayer's failure to timely pay any of the original 2008 liability.

Example 2: A taxpayer filed an amended 2008 income tax return reporting an additional $1,100 in tax and claiming $1,000 in enterprise zone investment credits that were earned in 2007 and carried forward to 2008. During the Amnesty Program Period, taxpayer also paid the $100 liability remaining after using the credit. As a result, the taxpayer qualified for Amnesty and was entitled to penalty & interest abatement on its 2008 underpayment.

Example 3: A taxpayer timely filed and paid the 2005 income tax return showing a tax liability of $100. Taxpayer was a non-filer for 2003 and 2004 tax years. During the Amnesty Program Period the taxpayer filed a 2003 original

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

return showing an Illinois net loss of $1,000, a 2004 original return showing an Illinois net loss of $800, a 2005 amended return showing $2,000 in additional income before net loss deductions. The 2003 and 2004 Illinois net loss amounts must be carried forward to the 2005 tax year. Because the 2003 and 2004 net loss carryforwards did not entirely offset the increase in 2005 net income, the taxpayer could participate in the amnesty program. Note also that, because the taxpayer had no 2003 or 2004 tax liability, it could not participate in the amnesty program for either of those years.

Restricted Interest on Capital Loss Carrybacks

"Restricted interest" is a federal income tax term which refers to interest that accrues on an underpayment between the date it arises and the date it is reduced or eliminated by a carryback. For more information about restricted interest, see Audit Manual Chapter 31 (new chapter 42).

Restricted interest can also be "assessed" in a field audit situation, where the IDOR auditor has established an additional tax liability and then offset, either a portion, or the total additional liability, with an Illinois NLD carry back (for years prior to 12/31/03).

Under the Amnesty program, if the total additional tax liability was satisfied by means of an Amnesty payment, as well as an offset from an Illinois net operating loss deduction that restricted interest assessment would be abated. However, under the 2010 Amnesty Program, if a federal capital loss (or net operating loss or Illinois net loss) reduced the tax liability to zero, there would be no Eligible Liability to pay under Amnesty per 86 Ill. Admin Code § 520.105(c)(1). In a situation where the INLD eliminated the entire tax liability, restricted interest would not be abated as this would not be considered a "payment" under Amnesty.

17. AUDIT ISSUES

Audits Completed Prior to, During, and After Amnesty

a If an audit was completed **prior to the beginning** of the Amnesty Program Period, the taxpayer could participate in Amnesty by signing the EDA-105 and paying the tax amount reported on that EDA-105, or by paying the tax amount reported on the IL-870. However, the payment was required to be made during the Amnesty Program Period of October 1 through

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

November 8, 2010, for the taxpayer to qualify for penalty and interest abatement.

b If the audit was **completed during the Amnesty Payment Period,** and the taxpayer wanted to pay, the auditor needed to obtain signed EDA-105's (for Sales Tax) and payment for the full tax liability. A signed IL-870 was not required with the full tax payment for Income Tax.

c If an audit **could not be completed before the Amnesty period expired,** the taxpayer could still participate in Amnesty. The taxpayer needed to make a reasonable estimate of the tax liability and submit an original or amended return with payment for that liability during the Amnesty payment period. The return with payment was to be sent to the audit PO Box listed on the taxpayer's Amnesty notification letter, or could be given to their auditor for submission. The taxpayer was required to make their "best estimate" of the tax liability.

If the estimate was less than the final liability, the taxpayer would be subject to the 200% Sanction only on the additional amount that was not paid as long as they paid the remaining amount by the due date shown on the demand for payment. Issuance of the IL-870 or EDA-105 was notice and demand for payment. [Note: The EDA-105 and IL-870 are no longer viewed as a notice and demand, but were considered as such during Amnesty.] If the estimate was less than the final liability and the taxpayer did not pay the additional amount by the due date, they would be subject to the 200% Sanction on both the Amnesty payment and the additional liability.

> **Example:** Since an audit could not be completed before November 8, 2010, a taxpayer estimated their 2007 income tax liability to be $4,000 and submitted an amended return with payment. In December 2010, the auditor determined that an additional $1,000 of tax liability was due. If the taxpayer paid the additional $1,000 tax, plus the double penalty and interest on the $1,000, within 30 days of the interest through date listed on the audit return, penalties and interest would be abated on the $4,000 paid during Amnesty.
>
> If the taxpayer failed to pay the additional tax, penalties, and interest by the due date, double interest and penalty would apply to both the Amnesty payment and the additional liability (all $5,000).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the Amnesty payment resulted in an overpayment, the taxpayer could have used the overpayment to satisfy a liability for a separate period within the audit. However, the offset would occur after penalties and interest were applied to the underpaid liability, including the 200% Sanction, if the other period qualified for Amnesty.

Example 1: A taxpayer under audit estimated owing an additional $1,000 each for January 2009, March 2009, and June 2009. The taxpayer submitted ST-1-Xs along with payment to their auditor during the Amnesty Program Period. In January 2011, the auditor determined that the taxpayer did not owe the additional $1,000 for January 2009, but did owe $1,000 for February 2009 in addition to the $1,000 paid in the Amnesty Program Period. The taxpayer could use the January 2009 overpayment to offset the February 2009 tax liability, but since February 2009 is an Amnesty period, the taxpayer would owe double penalties and interest prior to the offset. The auditor presented a bill for $0 in additional liability, $300 in doubled penalties, and doubled interest.

Example 2: A taxpayer under an income tax audit estimated owing an additional $500 tax liability for each of the years 2007 and 2008. The taxpayer submitted amended returns with $500 payments for both years during the Amnesty Program Period. In late December 2010, the auditor determined that the taxpayer did not owe the $500 for 2007, but the taxpayer owed a total of $800 ($300 underpaid) for 2008. The taxpayer could use the $500 overpayment from 2007 to offset the additional $300 liability for 2008, but the taxpayer would owe the double penalties and interest on the $300 underpayment for 2008. If the 2007 overpayment exceeds the 2008 deficiency, penalties and interest, the remainder will be refunded (but no interest will apply).

18. AMNESTY AND NON-AMNESTY PERIODS

If an audit covers periods that are outside of the Amnesty periods, the auditor should have done the following:

For income tax, both the Amnesty and non-Amnesty periods could be kept in the same track and be included on the same IL-870. Since each year is processed on its own EDA-25 for income tax, the penalties and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

interest would be abated on the EDA-25's for the Amnesty years and would not be abated on the EDA-25 for the post-Amnesty year.

For sales tax, the audit could remain in one track, but it needed to be reported on at least two EDA-105s, one EDA-105 for the Amnesty periods, and a second one for the non-Amnesty periods. As with non-Amnesty audits, if the taxpayer did not agree to or pay the additional liability, additional returns needed to be prepared for each liability period that was less than one year from the interest through date listed on the audit returns.

19. AMNESTY AND ADMINISTRATIVE HEARINGS

Taxpayers that were in Administrative Hearings were eligible to participate in the Amnesty Program. To participate in Amnesty taxpayers needed to stipulate to judgment in favor of the Department concerning that liability on or before November 8, 2010, and pay that liability during the Amnesty Program Period.
The filing of a return or amended return was not required by taxpayers in regard to the liability that was the subject of the proceeding, but taxpayers were required to stipulate that they were participating in Amnesty and to pay during the Amnesty period.

Failure to participate in the Amnesty Program concerning the liability that was the subject of the proceeding subjected taxpayers to the 200% Sanction of double penalty and interest.

Taxpayers can go to Administrative Hearings on unagreed issues which they paid under Amnesty. If a taxpayer contests an additional tax liability and loses, or pays the additional liability and later files an unsuccessful claim for refund against that liability, they will lose the benefit of Amnesty on the entire liability paid during the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(j)(4)(B).

For income tax, if the taxpayer had an unagreed issue for only one year, and only agreed issues for other years of the audit period, the taxpayer could participate in Amnesty for the agreed years, and go to Administrative Hearings on the unagreed year without affecting its Amnesty for the agreed years.

For sales taxes, if a taxpayer had an unagreed issue in only one month and only agreed issues in the remaining months, the taxpayer could go to Administrative Hearings on the unagreed period and participate in Amnesty by filing returns and paying the liability on the agreed periods.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

20. AMNESTY AND COURT

Amnesty could not be granted to a taxpayer that was a party to any civil litigation that was pending in any Illinois circuit court, Illinois appellate court, or the Illinois Supreme Court. If such taxpayers wanted to participate in Amnesty, they needed to have the civil action dismissed by executing an agreed order stipulating to judgment in favor of the Department and by paying that liability during the Amnesty Program Period.

Taxpayers did not need to file an original or amended return concerning the liability that was the subject of the litigation, but they did need to specify, in the motion to dismiss the action, that it was being done in order to participate in Amnesty. The liability payment needed to be accompanied by a statement that the payment was intended to qualify the taxpayer for Amnesty and must have identified the liability being paid.

Any taxpayer who was not eligible to participate in Amnesty for being a party to a civil action is not subject to the 200% Sanction on that liability for failure to participate in the Amnesty Program.

A taxpayer in bankruptcy was eligible to participate in Amnesty since bankruptcy proceedings take place in federal court. Ref: 86 Ill. Admin. Code § 520.105(d)(3). However, the taxpayer would have had to receive permission from the federal court in order to participate in Amnesty. The inability of a taxpayer to obtain this permission from the federal courts shall constitute reasonable cause for not participating in Amnesty. Ref: 86 Ill. Admin. Code § 520.105(m)(3). The 200% Sanction does not apply to a taxpayer in bankruptcy proceedings during the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.101(b)(1)(B).

Taxpayers could go to court on unagreed issues which they paid under Amnesty. If a taxpayer contested an additional tax liability and lost, or paid the additional liability and later filed an unsuccessful claim against that liability, they would lose the benefit of Amnesty on the entire liability paid during the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(j)(4)(B).

21. AMNESTY AND ICB

The Informal Conference Board (ICB) process is technically part of an ongoing audit. ICB case decisions are not considered legal settlements. Therefore, taxpayers who were in ICB or those who petitioned for a review before ICB on an incomplete audit were eligible for Amnesty. Such

taxpayers had options pertaining to Amnesty participation. These options were:

- The taxpayer could withdraw from ICB by agreeing with the audit paperwork as filed and paying this audit liability amount under Amnesty.
    - If, during the Amnesty payment period, the taxpayer paid the full amount of the additional tax liability, and ICB later reduced the amount, the taxpayer would receive a credit or refund, whichever would be applicable for the overpayment.
- If Amnesty was going to expire before the audit was complete, the taxpayer could make their "best estimate" of the tax liability, submit the applicable original or amended returns with payment, and still request that ICB review the audit.

If ICB upholds the audit results, and an additional amount is owed that was not paid during Amnesty, the taxpayer would owe double penalties and interest only on the additional amount not paid under Amnesty as long as the taxpayer signs the return and pays the additional liability within 30 days of being presented the EDA-105 or IL-870 results.

22. UNDERPAYMENT OF AMNESTY AUDIT LIABILITY

Failure to pay an Eligible Liability in full would invalidate the Amnesty provision granting abatement of penalties and interest. If a taxpayer did not pay the entire Eligible Liability for that tax period, the 200% Sanction would apply for failure to comply under Amnesty. Ref: 86 Ill. Admin. Code §§ 520.101(b)(4) and 520.105(h) & (i).

The following examples are illustrative:

For income tax, assume that the audit covered three years and the first two were paid in full during the Amnesty payment period. The Auditor's Reports for the first two years would be processed with no penalties and interest since they were paid in full. Since the taxpayer did not pay the third year in full, the taxpayer would have double penalties and interest on this liability.

For sales tax, the doubling or abatement of penalties and interest is calculated using the Schedule 2a for interest and Schedule 2b for penalties. Audit returns reflecting these amounts must be prepared

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

for each UPIA period and for post amnesty periods. The taxpayer may agree to additional audit liability on a return by return basis, but not a period by period basis. Failure to sign one return will not cause a taxpayer to lose their amnesty status on the periods listed on another return as long as all the amnesty requirements are met for that return.

23. UNAGREED AUDIT ISSUES

A taxpayer could participate in Amnesty selectively, provided that the taxpayer completely satisfied its Eligible Liability for the tax type and tax period for which Amnesty had been sought. However, an issue-by-issue basis for an eligible year/period was not allowed under the Amnesty program. The taxpayer needed to pay the entire tax liability for each year/period to qualify for abated penalties and interest. Ref: 86 Ill. Admin. Code § 520.105(b)(1)(A) & (B).

For income tax, this means that if a taxpayer owed $10,000 in tax on 2008 at the end of the audit, the taxpayer needed to pay the entire $10,000 tax during the Amnesty Program Period to have the penalties and interest waived on that year. The taxpayer could not take an unagreed issue of $2,000 for 2008 to Administrative Hearings or to Court and still have Amnesty on the remaining $8,000. However, if the taxpayer had only an unagreed issue attributable to one year, and agreed issues attributable to other years of the audit period, the taxpayer could take Amnesty for the agreed years, and go to court on the unagreed year.

For sales taxes, if a taxpayer had only an unagreed issue in one month and agreed issues in the remaining months, the taxpayer could go to Administrative Hearings or court on the unagreed period and participate in Amnesty by paying the liability on the agreed periods. However, if there were unagreed issues as well as agreed issues in the same tax period/month, the taxpayer could not separate the agreed issues from the unagreed issues; the taxpayer needed to pay the entire liability in order to get the benefits of Amnesty.

24. CLAIMS FOR REFUND (OR CREDIT) – GENERAL

No **interest** was paid by the Department on any refund allowed for overpayments made under Amnesty. Ref: UPIA § 3-2(h) and 86 Ill. Admin. Code § 520.105(k)(4) & (5).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Established Liabilities

Claims against Established Liabilities were only allowable if they were based on "issues unrelated to the issues for which the taxpayer claimed Amnesty" or if they were due to a federal change (RAR) finalized after the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(k).

> **Example:** A taxpayer paid a previously assessed liability of $100,000 for January 2007 during the Amnesty Program Period and had all penalties and interest abated. In February of 2011, the taxpayer filed a claim against the audit for $100,000 based on a related issue. The claim would be disallowed regardless of the merits of the issue since no refund is allowed with respect to an Amnesty issue. Ref: 86 Ill. Admin. Code § 520.105(f)(1).

"Issues unrelated to the issues for which the taxpayer claimed Amnesty" are issues related to facts that were unavailable at the time the Amnesty payment was made. The following are examples of unrelated issues which <u>would allow</u> a taxpayer to file a claim against an Amnesty payment made on an Established Liability:

i. After the Amnesty period, a customer presents a new resale certificate, "E" letter, ST-587, or similar valid exemption declaration to a taxpayer for a sale during a period on which the taxpayer has already made an Amnesty payment.

ii. A customer returns an item purchased during a period on which the taxpayer has already made an Amnesty payment.

iii. The taxpayer receives a Schedule K-1-P from a partnership in 2011 showing that the taxpayer was entitled to a credit for an Amnesty year (2008), and this credit had not been previously reported to the taxpayer.

iv. A math error, such as a transposition of figures, occurred in the preparation of the Amnesty return.

v. An overpayment that results from the taxpayer's failure to take into account collection activity by the Department such as an offset of an overpayment of a different tax.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

vi. An overpayment that results from the taxpayer paying the liability shown on a bill, where the bill did not take into account a payment made prior to Amnesty by the taxpayer.

The following are examples of amnesty issues on which taxpayers may not file a claim against an Established Liability Amnesty payment:

i. A customer informs the taxpayer that they overcollected tax on a transaction for sales tax.

ii. A taxpayer discovers that they had a valid resale certificate in their possession prior to making the Amnesty payment.

iii. A tax auditor from another state informs the taxpayer that they incorrectly paid tax to Illinois on an item that was shipped outside the state.

iv. A taxpayer understates a subtraction modification for bonus depreciation. The taxpayer knew of the bonus depreciation at the time of Amnesty.

Example: A taxpayer, on the 2008 Illinois income tax return, claimed $1,000 in enterprise zone investment credits that were earned in 2007 and carried forward to 2008, since the taxpayer had credits in excess of its 2007 liability. The taxpayer discovers that it had underpaid the 2008 Illinois income tax liability by $500 due to a sales factor computation error and pays this $500 (with an amended return) under the Amnesty Program. Later the taxpayer realizes that it failed to claim a subtraction for interest on federal obligations for 2007. This subtraction reduces the pre-credit liability by $200 thus increasing the allowable enterprise zone investment credit carryover to 2008 by $200. No refund for 2008 will be allowed, since the base income reduction for 2007 is based on facts that were in existence as of the time that the Amnesty payment was made.

b) Claims on Completed Audits

86 Ill. Admin. Code § 520.105(k)(3) limits claims against Eligible Liabilities paid under the Amnesty Program Period when the taxpayer was under audit during the Amnesty Program Period. To successfully file the claim, the taxpayer must have demonstrated that the claim was

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

based on "issues unrelated to the issues for which the taxpayer claimed Amnesty" or due to a federal change finalized after the Amnesty Program Period.

Example 1: During the Amnesty Program Period, the taxpayer signs an IL-870 for 2007 and pays the listed $6,000,000 in eligible tax liability in order to qualify for abatement of all penalties and interest. In January 2011, the taxpayer files a claim against the audit liability for $3,000,000 based on an issue that the auditor had denied during the audit. Regardless of the merit of the claim, the auditor will deny it since this is not an unrelated issue.

Example 2: During the Amnesty Program Period, the taxpayer signs an IL-870 for 2007 and pays the listed $6,000,000 in tax liability in order to qualify for abatement of all penalties and interest. In January 2011, the taxpayer files a claim against the audit liability for $2,000,000 based on a federal change finalized in December 2010. The taxpayer is eligible for a refund of the $2,000,000, but does not receive interest on this refund. The amnesty status of the remaining $4,000,000 liability that was paid during the Amnesty Program Period is not affected.

c) Claims on Audits Completed After the Amnesty Program Period

A taxpayer who unsuccessfully files a claim against an additional Eligible Liability established after the Amnesty Program Period would be subject to the 200% Sanction on any liability paid during the Amnesty Program Period. REF: 86 Ill. Admin. Code § 520.105(j)(3)(B) and (j)(4)(B).

Example 1: Since its income tax audit cannot be completed before the end of the Amnesty Program Period, a taxpayer estimates its tax liability for 2007, files an amended return, and pays the estimated $10,000 on November 4, 2010. In January 2011, the audit is completed showing the taxpayer's liability for 2007 to be $12,000. The taxpayer agrees with the audit findings and pays the additional $2,000 liability plus the 200% Sanction on that additional liability.

The penalties and interest on the $10,000 paid during Amnesty are abated. In February 2011, the taxpayer files an unsuccessful

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

claim against the audit for $1,000 which causes the abatement of penalties and interest to be forfeited on the $10,000 Amnesty payment.

Example 2: A sales tax audit cannot be completed before the end of the Amnesty Program Period. The taxpayer files an amended return during the Amnesty Program Period, and pays an estimated $100,000 in additional liability for January 2007. In January 2011, the taxpayer signs a return listing an additional liability of $110,000 for the audit periods (not including the Amnesty payment). The taxpayer pays the remaining $10,000 in tax plus the 200% sanction on that liability.

The penalties and interest on the $100,000 paid during Amnesty are abated. In February 2011, the taxpayer files a claim against the audit for $100,000. All but $6,000 of the claim is denied. Since the taxpayer unsuccessfully contested a portion of the $10,000 additional liability, it loses the Amnesty status on the payment made during the Amnesty Program Period (the original $100,000). The 200% sanction will now apply to the original Amnesty payment.

A taxpayer who unsuccessfully files a claim against an Eligible Liability which was paid in full during the Amnesty Program Period would not be subject to the 200% Sanction.

Example: A sales tax audit cannot be completed before the end of the Amnesty Program Period. The taxpayer files an amended return during the Amnesty Program Period, and pays an estimated $100,000 in additional liability for January 2007. In January 2011, the taxpayer signs an audit return listing a total liability of $90,000 and receives a $10,000 credit and abatement of penalties and interest. In February 2011, the taxpayer files a claim against the audit for $50,000. The claim is denied, regardless of the merits, because it was not allowed in the audit, but since they paid the full Eligible Liability during the Amnesty Program Period, they do not lose the abatement of penalties and interest.

Generally, **no interest** was payable by the Department on any refund or credit allowed for a tax and period for which the taxpayer participated in the Amnesty Program. A taxpayer was considered to have participated in Amnesty for a period even if they filed a return for a period in which an auditor later determined they had no liability

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

eligible for Amnesty. The exception pertaining to interest was for claims filed prior to the start of the Amnesty Program Period. Interest would be allowed on any refund or credit based on a refund claim that was outstanding as of the beginning of the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(k)(5).

d) Unsuccessful Claims against Amnesty Periods and the 5% Penalty

If a taxpayer unsuccessfully filed a claim against an audit in which the reduced 15% penalty rate was paid, the additional 5% penalty on the denied portion of the claim would have to be paid. How this applies to Amnesty related liabilities depends on the specific situation. Below is a list of potential amnesty scenarios and the ways they are addressed:

a Scenario 1

A taxpayer paid the full liability for a period prior to the start of the Amnesty Program Period and paid the reduced 15% audit penalty rate, then filed an unsuccessful claim against that period after the Amnesty Program Period.

Question: What is the appropriate penalty rate to charge for this period?

Response: If the taxpayer did not have an Eligible Liability which could be paid during the Amnesty Program Period, the taxpayer was neither eligible for abatement of previously paid penalties nor subject to the 200% sanction.

The claim would be treated the same as a non-amnesty audit. The taxpayer would owe an additional 5% on the denied portion of the claim.

b Scenario 2

A taxpayer paid the full Eligible Liability for a period during the Amnesty Program Period and received abatement of penalties. After the Amnesty Program Period, the taxpayer unsuccessfully filed a claim against that period.

Question: What is the appropriate penalty rate to charge for this period?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Response: If the taxpayer paid the full Eligible Liability during the Amnesty Program Period and received abatement of penalties, the taxpayer would not be subject to the additional 5% penalty on the denied portion of the claim. The taxpayer met the terms of amnesty when paying the full eligible liability during the Amnesty Program Period. Filing an unsuccessful claim did not cause the loss of amnesty status because the taxpayer would still have paid the full Eligible Liability during the Amnesty Program Period.

c Scenario 3

A taxpayer filed a return and made an estimated amnesty payment for a period during the Amnesty Program Period which qualified for abatement. An audit was completed after the Amnesty Program Period and the taxpayer paid an additional tax liability which was subject to the doubled 30% penalty. The taxpayer then filed a claim against the period.

Question: What is the appropriate penalty rate to charge for this period if the claim is partially denied or denied in full?

Response: If the approved portion of the claim is greater than the additional liability (the amount that was paid after the Amnesty Program Period), the taxpayer owes no additional penalties. The revocation of the abatement of penalties only applies if the taxpayer had unsuccessfully contested the additional liability.
If the approved portion of the claim is less than the additional liability, the taxpayer loses the abatement of penalties on the payment made during the Amnesty Program Period. Under our guidelines for implementing the additional 5% penalty only on the denied portion of the claim, the applicable rate depends on the amount of the claim. Any denied portion of the claim would be subject to the doubled 40% penalty. Any unclaimed amount would be subject to the doubled 30% penalty.

25. FEDERAL AUDIT CHANGES

A taxpayer who participated in the Amnesty Program could **claim a refund for an overpayment** of an Estimated Federal Change Liability (Federal RAR). Estimated Federal Change Liability means the Eligible Liability that a taxpayer estimates will result from a Federal Change (RAR) that had not become final under IITA § 506(b) as of the end of the Amnesty Program Period. Amended returns could be filed to report finalized federal audit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

changes for Amnesty years, and refunds related to the finalized RAR changes could be requested for liabilities that were paid under the Amnesty program.

For situations where an RAR resulted in an increase to an INL that was carried into an Amnesty year, or for situations where an RAR resulted in reversing an income year to an INL that could be carried into an Amnesty year, refund claims on an Amnesty year would be permitted. However, the auditor had to verify that the amended return was only for the finalized RAR changes (or for the change in INL that resulted from the RAR changes.)

If a taxpayer paid an Estimated Federal Change Liability under Amnesty and the finalized Federal Change (RAR) adjustment increased the liability for that period, the Amnesty status would remain for the portion previously paid during Amnesty, if the taxpayer timely paid the full RAR liability. Additionally, the liability associated with the finalized RAR would be subject to standard penalties and interest, not the 200% Sanction.

However, if the taxpayer failed to timely pay the liability as required under IITA § 506(b), or to pay any interest and penalty on the additional liability when billed, the abatement of penalties and interest originally allowed under the Amnesty Program for that tax liability would be forfeited. Standard penalty and interest would apply to the total liability owed by the taxpayer for that eligible tax period, not the 200% Sanction.

> **Example:** During Amnesty, a taxpayer filed (with payment) an amended 2007 Illinois income tax return reporting an Estimated Federal Change Liability of $10,000. The finalized Federal Change showing an additional $1,000 liability is filed in 2011. If the taxpayer timely reports and pays the $1,000 under IITA § 506(b) and pays any related single interest and penalty by the due date on the Department's notice and demand, the interest and penalty will remain abated on the $10,000. However, if the taxpayer fails to timely report and pays the $1,000, or fails to pay any related interest or penalties by the due date on the bill, the Amnesty abated interest and penalty will be forfeited. Single interest and penalty would apply to the total $11,000.

If the IRS finalized an audit that increases tax in a year by less than the estimated federal change payment made under Amnesty, any overpaid Illinois Income Tax could be refunded for that year. However, per IITA § 911(a)(1), a refund claim must be filed within the latter of:

1 three years from the date the original return was filed for the taxable year,

OR

2 one year after the payment was made.

If the Federal audit is finalized subsequent to both of the above stated dates, no refund would be allowed unless the taxpayer filed a timely claim for refund (protective claim), or the statute had been held open by a timely filed waiver (IL-872).

a) Refund Denied

The taxpayer filed an amended return on October 8, 2010, for the 12/31/2007 period with an amnesty payment of $1,500. The October 8, 2010 amended return estimated a pending RAR adjustment that had yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the October 8th amended return. The filing date of the original return occurred on 10/15/2008. On December 12, 2011, the taxpayer files another amended return reporting the RAR adjustments that were finalized on 12/4/2011. The December 12th amended return is claiming a $500 overpayment of the original $1,500 Amnesty payment. The following table illustrates the taxpayer's amended return filings:

Description (APE =12/31/2007):	Amount
Amended return # 1 – Amnesty return:	
Apportioned Illinois business Income (Per original return – as filed) (column A)	$7,850
Net Change reported- estimated RAR increase (column B)	$21,000
Apportioned Illinois business income (as corrected) (column C)	$28,850
Total tax paid- (per original return – as filed) (column A)	$492
Net change- Amnesty Payment	$1,508
Total tax paid- (as corrected) (column C)	$2,000
Amended return # 2 – Reporting finalized RAR:	**Amount**
Apportioned Illinois business Income (Per amend rtn. #1- column C= Amend. rtn. column A)	$ 28,850
Net Change reported- (RAR increase from orig. filing, decrease from amnesty amend. rtn. #1)	$ (6,962)
Apportioned Illinois business income (as corrected) (column C)	$ 21,888
Total tax paid- (as corrected from amend. rtn #1- column C)	$ 2,000
Net change- Requesting partial refund of amnesty payment	$ (500)
Total tax liability- (as corrected – per finalized RAR)	$ 1,500

Analysis:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The amended return claiming the overpayment of $500 is denied for the following reasons:

a The $500 claim was filed beyond the 3-year filing date of the original return.

b The $500 claim was filed beyond 1 year from the Amnesty payment date of 10/8/2010.

c A Waiver (IL-872) was not secured within 1 year of the Amnesty payment date (10/8/2010), which would have extended the period for filing a refund claim.

In this example, if the taxpayer had secured an IL-872 or had filed a "protective claim" within 1 year of the amnesty payment, the $500 refund would have been allowed.

b) Refund Allowed

The taxpayer filed an amended return on October 8, 2010 for the 12/31/2007 period with an amnesty payment of $1,500. The October 8, 2010 amended return estimated a pending RAR adjustment that had yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the October 8th amended return. The filing date of the original return occurred on October 15, 2008. On January 24, 2011, the taxpayer filed another amended return reporting the RAR adjustments that were finalized on January 16, 2011. The January 24th amended return is claiming a $500 overpayment of the original $1,500 Amnesty payment. The following table illustrates the taxpayer's amended return filings:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Description (APE =12/31/2007):	Amount
Amended return # 1 – Amnesty return:	
Apportioned Illinois business Income (Per original return – as filed) (column A)	$7,850
Net Change reported- estimated RAR increase (column B)	$21,000
Apportioned Illinois business income (as corrected) (column C)	$28,850
Total tax paid- (per original return – as filed) (column A)	$492
Net change- Amnesty Payment	$1,508
Total tax paid- (as corrected) (column C)	$2,000
	Amount
Amended return # 2 – Reporting finalized RAR:	
Apportioned Illinois business Income (Per amend rtn. #1- column C= Amend. rtn. column A)	$ 28,850
Net Change reported- (RAR increase from orig. filing, decrease from amnesty amend. rtn. #1)	$ (6,962)
Apportioned Illinois business income (as corrected) (column C)	$ 21,888
Total tax paid- (as corrected from amend. rtn #1- column C)	$ 2,000
Net change- Requesting partial refund of amnesty payment	$ (500)
Total tax liability- (as corrected – per finalized RAR)	$ 1,500

Analysis:

The amended return claiming the overpayment of $500 is allowed for the following reasons:

a The $500 claim was filed within the 3-year filing date of the original return.

b The $500 claim was filed within 1 year from the Amnesty payment date of 10/8/2010.

26. OVERPAYMENT OF ESTIMATED AMNESTY LIABILITY

If a taxpayer who was under audit during the Amnesty Program Period overpaid an estimated Eligible Liability, the refund or credit allowed could not exceed the amount determined by the audit, except if the refund resulted from an issue that was not an Amnesty Issue or from the finalization of a federal change after the Amnesty Program Period. Ref: 86 Ill. Admin. Code § 520.105(k)(3).

Example: Taxpayer's income tax return for the calendar year 2007 was under audit during the Amnesty Program Period, but no Established Liability was created. The taxpayer participated in Amnesty by estimating the Eligible Liability and submitting payment with an amended 2007 return. After the audit is concluded, the Department determines that Taxpayer overpaid its 2007 liability by

$500. Taxpayer may receive a refund of that $500, but no additional refund will be allowed unless the additional refund results from an issue that is not an Amnesty Issue or from the finalization of a federal change after the Amnesty Period.

27. UNDERPAYMENT OF ESTIMATED AMNESTY LIABILITY

If the taxpayer paid an estimated Eligible Liability during the Amnesty period, and at the close of the audit after Amnesty, the actual liability was greater than the estimated amount, the taxpayer could still have Amnesty on the estimated amount paid during the Amnesty payment period. However, in order to do so, that taxpayer must have paid the additional tax liability no later than the due date of any bill received from the Department, along with double penalties and interest (single if a Federal Change- RAR) on that additional tax liability. If the total additional tax plus the double penalties and interest on that additional tax was not paid before the due date on the bill, the Amnesty would be void, and penalties and interest would double on the entire audit liability. For Sales Taxes, the taxpayer must also sign the applicable EDA-105s. Ref: 86 Ill. Admin. Code § 520.105(j)(4)(B).

Example: A taxpayer estimated its 2008 (non-RAR) tax liability and submitted an amended return with payment for $600 during the Amnesty Program Period. At the completion of the audit on November 22, 2010, it was determined that the actual liability was $800. The taxpayer needed to pay the remaining $200, plus double penalties and interest on that $200 to preserve the abatement that was granted on the $600 payment. If the taxpayer failed to pay this by the notice due date, Amnesty would be voided and double penalties and interest would apply to the entire $800 tax liability.

28. GENERAL PROCESSING ISSUES

a) Audit Processing

Audits were conducted as usual. If the taxpayer did not contest the assessment of additional liability and paid the amount required by the due date listed on the assessment, the Department would assess the 200% Sanction only with respect to the portion of the Eligible Liability that was not paid during the Amnesty Program Period.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the taxpayer did not pay the full liability (tax, penalties, and interest) by the due date or contested the additional tax liability, the 200% Sanction would apply to both the additional liability and the Amnesty payment.
As long as the full liability was paid within 30 days of the interest through date listed on the audit return, a taxpayer could contest the assessment of interest or penalties by filing a claim without having the Amnesty payment subject to the 200% Sanction. A taxpayer could file a claim for reasonable cause or incorrect calculation of double penalty and interest without incurring the 200% Sanction, as long as it did not contest the tax liability itself. Ref: 86 Ill. Admin. Code § 520.105(j)(4)(B).

A taxpayer contested the additional liability when they failed to sign and pay the EDA-105 listing the additional liability, failed to pay the tax amount on the IL-870, filed a protest of the tax liability by filing an action under the Protest Act, or paid the liability and then filed a claim for refund or credit. Whenever the additional tax liability is contested unsuccessfully, the 200% Sanction applies as if no payment had been made during the Amnesty Program Period. REF: 86 Ill. Admin. Code § 520.105(j)(3)(B). Protesting the imposition or computation of penalty or interest is not contesting the liability.

A taxpayer who did not participate in Amnesty is subject to the 200% Sanction on any additional tax liability established under audit.

b) Protesting Amnesty Audit Results

Taxpayers could not protest amounts self-reported on a return filed during the Amnesty Program Period. They could only protest amounts in excess of the self-reported liability. If they did not owe additional liability, they could not protest the audit results. If they failed to sign the audit return, the auditor should have attached the signed self-reported returns and processed the audit as agreed.

> **Example:** A taxpayer was under audit for a vehicle purchased in January 2008. Based on the auditor's estimate, the taxpayer filed an RUT-25 reporting $2,000 in tax due and paid the balance during the Amnesty period. The taxpayer also petitioned ICB to review the audit. ICB determined that the auditor correctly calculated the additional liability. Since the taxpayer agreed to the liability by signing the RUT-25,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the taxpayer cannot protest ICB's decision. Even if the audit return is not signed, penalties and interest will be abated.

If an audit results in additional liability above what the taxpayer self-reported on the return, the taxpayer could only protest the additional liability. If the taxpayer would not agree to and pay the additional liability on the return, double penalties and interest would be assessed on both the additional liability and regular penalties and interest on the liability reported on the Amnesty return. Since the amount reported on the Amnesty return is an agreed liability, the taxpayer would receive a Notice of Assessment for the additional penalties and interest on the Amnesty liability and a Notice of Tax Liability for the additional liability plus additional penalties and interest.

Example: Taxpayers were under audit for a vehicle purchased in January 2008. Based on their own estimate, they filed an RUT-25 reporting $1,500 in tax due and paid the balance during the Amnesty period. After the Amnesty period, the auditor determines that they owed $2,000. If they do not sign the audit return reporting the additional liability or pay the additional tax plus double penalties and interest, they are subject to double penalties and interest on the full $2,000. They will receive a Notice of Assessment for double penalties and interest on the $1,500. They will receive a Notice of Tax Liability for the $500 in additional tax plus double penalties and interest on that amount. They may protest this additional liability, but they may not protest the $1,500 agreed to on the Amnesty RUT-25.

29. AMNESTY PRODUCTION AND PAYMENT CODES

New Production Codes were required for the 2010 Amnesty Program in order to distinguish between Amnesty 2003 and Amnesty 2010. These new codes are used on the PROD-1, in STT, and in GenTax on the Audit Springboard production workpapers. The Production code "92" designates "2010 Amnesty Interest" and the Production code "93" designates "2010 Amnesty Penalty". These codes are used for both penalties and interest that are abated and penalties and interest that are doubled.

On the PROD-1, the Payment Code for abated penalties and interest should be listed under "AI". Doubled penalties and interest should be listed under the standard Payment Codes such as "AP", "AL", "EL", etc.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In GenTax using "AI" should correctly show Audit's percentage of collected vs. established (penalties and interest). Also in GenTax, coding "AI" as informational only is appropriate since this is production that will never be collected. Both STT and the DAN Program should continue to include the P & I as "AL".

30. AMNESTY INDICATORS

GenTax indicators had to be developed for the 2010 Amnesty Program. These six indicators are:

1 **Amnesty Allow** – Indicates a user granted Amnesty to an account that did not meet the established Gentax Amnesty criteria.

2 **Amnesty Denied** – Indicates that a user manually denied Amnesty.

3 **Amnesty System Allowed** – Automatic indicator placed on an account when the account meets the Gentax Amnesty criteria.

4 **Amnesty Stop Interest** – Placed on a period (or range of periods) to stop the systematic doubling of interest for accounts not granted Amnesty. Note that once this indicator is placed on a period, it will cause all systematic Amnesty interest previously assessed to be reversed.

5 **Amnesty Stop P & I** - Placed on a period (or range of periods) to stop the systematic doubling of penalty and interest for accounts not granted Amnesty. Note that once this indicator is placed on a period, it will cause all systematic Amnesty penalty and interest previously assessed to be reversed.

6 **Amnesty Stop Penalty** - Placed on a period (or range of periods) to stop the systematic doubling of penalty for accounts not granted Amnesty. Note that once this indicator is placed on a period, it will cause all systematic Amnesty penalty previously assessed to be reversed.

These indicators are found on the Amnesty tax liability periods in GenTax.

31. AMNESTY LETTER 2010

The Illinois Tax Delinquency Amnesty Act did not require the Department to send taxpayers written notification of Amnesty. However, the Department sent a system-generated notice to every taxpayer that had an outstanding processed liability. In addition, the Audit Bureau sent a notice to every taxpayer that was under audit (including ICB cases), had an audit completed but not processed, or was in unassigned inventory available for selection.

To view the system-generated Audit Bureau Amnesty letters, the auditor must be at the Customer Level in GenTax, not the audit springboard. These notices are available by clicking on the Letters sub-tab under the CRM Tab, then selecting the appropriate letter.

- See Exhibit A – 2010 Amnesty Letter.

D. 2003 ILLINOIS TAX AMNESTY PROGRAM

Note: This section is included for historical reference. It was written while the 2003 amnesty program was in effect. There may be references to tools, policies, and procedures which are no longer used by the Audit Bureau or the Department of Revenue. References throughout this section will be to the old Legacy system which is now obsolete. If you encounter an audit situation where the 2003 amnesty program may be an issue, please contact Audit Technical Support for assistance.

On June 20th, 2003, Governor Rod R. Blagojevich signed Senate Bill 969 into law as PA 93-0026. This bill, known as the “Tax Delinquency Amnesty Act,” provided the opportunity for Illinois taxpayers to pay outstanding tax liabilities, file delinquent returns, and have 100% of the related interest and penalties abated.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1 AMNESTY TIME FRAME, ELIGIBLE TAX PERIODS, AND PROVISIONS

The amnesty payment period ran from October 1, 2003 through November 15, 2003. Since November 15th fell on a Saturday, the Department accepted amnesty payments through November 17th. Regulation 521.101(a) detailed this extension until the 17th. Because of the time that it takes for electronic payments to settle, Processing was internally permitted to utilize a "soft" amnesty start date of 9/29/2003 and a "soft" end date of 11/21/2003 since the system could not identify if a payment was electronic or in check form. However, in Audit, since we knew the actual payment type and date, we only allowed amnesty for the actual amnesty period in the Statute and Regulations – October 1, 2003 through November 17, 2003. For any audit account that was granted amnesty by the System as a result of the "soft" dates, the auditor should inform the taxpayer that the payment was not received timely and they will not be granted amnesty. A comment should be made in the Auditor's Report. When the audit is processed, it should be overridden to deny amnesty.

Tax periods eligible for amnesty treatment included those ending after June 30, 1983, and prior to July 1, 2002.

The Department will abate 100% of the interest and penalties related to the tax that was paid under amnesty, and the Department will not seek civil or criminal prosecution for any taxpayer for the period of time for which amnesty has been granted. However, penalty and interest will be doubled for eligible tax periods, with the exception of pre-UPIA periods (returns due prior to 1/1/94) if a payment was not made during amnesty and it is determined that the taxpayer has a liability for the eligible period.

32. TAXES/FEES QUALIFYING AND NOT QUALIFYING FOR AMNESTY

Amnesty applied to almost all taxes collected by the Department of Revenue, such as sales, income, replacement, liquor, cigarette, hotel, and other miscellaneous taxes.

Motor Fuel Use Tax (IFTA) was the only tax collected by the Department that was not included in the amnesty program.

Amnesty did not include taxes that were collected by other Illinois agencies such as corporate franchise taxes, insurance company premiums taxes, or unemployment taxes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Lien filing and lien release fees, as well as bad check penalties, were not eligible for amnesty abatement.

33. PARTICIPATION IN AMNESTY

In order to qualify for amnesty, taxpayers must have had an outstanding tax liability for an eligible amnesty year/period. This included any outstanding liabilities that were currently on our system at the start of amnesty, any delinquent returns, any underreported liabilities (including RAR's in process, and RAR's that were completed) as well as any Illinois audit liabilities that were in process, recently completed but not paid, or in unassigned inventory available for selection with the potential for Illinois tax liability adjustments.

There was no application process. Unless taxpayers fell under the ineligible criteria below, they must have made full payment of their liability with a payment coupon and any required spreadsheets or returns during the amnesty period to qualify. To qualify as a payment within the amnesty period, the payment must have been either postmarked between October 1, 2003 and November 17, 2003, or must have been physically given to the Department between October 1, 2003 and November 17, 2003. A signed offset letter within these dates would also qualify as payment.

Taxpayers that were in ICB were also eligible, unless they had made an offer of disposition that had been accepted by the Department.

Taxpayers that were in Administrative Hearings were eligible, but they were required to stipulate to judgment in favor of the Department and pay the full tax liability within the amnesty payment period.

Taxpayers that were in bankruptcy were technically eligible to participate, but it was unlikely that they would. They had to receive approval from the creditors and the courts to pay the tax liability. If they were able to do so, they were to have interest and penalties abated. However, they could not be subject to the double penalties and interest if they failed to participate. They were only subject to regular penalties and interest.

To participate in amnesty, taxpayers were required to pay the entire outstanding tax liability during the amnesty payment period of October 1, 2003 through November 17, 2003. Since there was no application process, for liabilities that were already established on the system, the taxpayer was to submit payment for the entire established liability along with the Amnesty-1 payment coupon.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For income tax audits that were in process or not yet started, the taxpayer was to submit payment for the estimated liability along with the Audit Amnesty Payment Coupon detailing the tax year and the amount of tax being paid per year. For each tax year, they were also to provide a copy of a spreadsheet (for audits that were in process) or an amended return (for audits that were not yet started or assigned) reflecting the line changes made to arrive at the payment amount. The taxpayer should not estimate overpaid years and offset that overpayment against tax due years. The taxpayer should pay, in full, all tax liability due for each tax due year within the amnesty period.

For sales tax audits, to participate in amnesty, taxpayers were to submit payment for their estimated liability along with the Audit Amnesty Payment Coupon detailing the tax periods and the amount of tax being paid per period. For sales tax audits that were not yet started or assigned, taxpayers were to provide a spreadsheet showing how they arrived at their estimated liability.

34. INELIGIBLE TAXPAYERS

Amnesty was not granted to taxpayers that were party to any criminal investigation that was ongoing during the amnesty period, or civil or criminal litigation that was pending in any circuit court, appellate court, or the Illinois Supreme Court during the amnesty period. If these taxpayers wished to participate in amnesty, they must have stipulated to judgment in favor of the Department and must have made full payment of tax during the amnesty payment period.

Any cases in the Informal Conference Board with an offer of disposition that was accepted by the Department were not eligible for amnesty.

If, as audits on amnesty years are being concluded, there is a question as to whether or not a taxpayer qualified for amnesty, the situation should be referred to Technical Support. The facts will then be forwarded to Legal Services for review. Legal Services will make the determination as to whether or not the taxpayer should be granted amnesty. Once the determination has been made by Legal Services, they will refer the case back to Technical Support. The auditor will then be responsible for informing the taxpayer in writing of Legal Services' decision.

35. TAXPAYER NOTIFICATION

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Legislation did not require that the Department send taxpayers written notification. However, a system-generated notice was sent to every taxpayer that had an outstanding processed liability. These system-generated notices contained a listing by tax type of the taxpayer's liabilities that were pending on the system. They also contained an Amnesty-1 payment coupon for taxpayers to remit with their check in payment of the balance due. However, the system-generated notices did not include any liabilities that were not yet completed or in process by Audit.

- See Exhibit B – 2003 Amnesty Letter.
- See Exhibit C – 2003 Amnesty Payment Coupon.

Because of this, in addition to the system generated notices sent by the Department, the Audit Bureau sent out a notice to every taxpayer that was currently under audit (including ICB cases), had an audit completed but not processed, or that was in unassigned inventory available for selection. The audit notices informed the taxpayer of the availability of amnesty, but did not include a balance due amount. An Audit Amnesty Payment Coupon was included for taxpayers to remit with their estimates of their liability.

In addition to the direct mailing of notices, television, radio and newspaper ads were released, and FY Bulletin 2004-11 was mailed to tax practitioners. The FY Bulletin is available on our web site.

36. METHOD OF PAYMENT

Established tax liabilities that were already processed on the system could be paid by several methods:

a Cash, check, money order sent with the Amnesty-1 Coupon from the Notice of Tax Delinquency-Amnesty Program.

b Credit card payments for IL-1040's only via the Department Web site at www.ILtax.com or via phone at 1 800 2PAYTAX (1 800 272-9829)

c Electronic funds withdrawal via the Department Web site at www.ILtax.com or via phone at 1 800 2PAYTAX (1 800 272-9829).

Audit liabilities could be paid by three methods:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a Cash, check or money order sent with the Audit Amnesty Payment Coupon

b Electronic funds transfer using FEDWIRE procedures outlined in Chapter 9 and Chapter 32 of the Audit Manual, sent with the Audit Amnesty Payment Coupon.

c Offsets with overpayments or pending refunds/credits at the request of the taxpayer, with the approval of the Department. Offsets from overpayments generated in an audit were to be done tax to tax, without any interest on the overpayment. If a net overpayment resulted, after the tax was paid for the amnesty liabilities, the taxpayer was to receive interest on the remainder. If the taxpayer wanted to do an offset using a pending BIT refund/credit to pay a liability under amnesty, the BIT offset policy and procedures, which are on the following pages, were to be followed.

Payment plans were not permitted for amnesty liability payments.

37. AMNESTY AND OFFSETS

The taxpayer had to provide the auditor with a letter requesting the offset be done under amnesty. The auditor was allowed to do an offset without going through the BIT Offset Committee **if** the offset was between underpaid and overpaid months/years within an audit period, **and** it did not involve a pending refund on BIT X-Logic (flag X) or offsets between tax types. The offsets from overpayments generated within the audit period should be tax-to-tax without calculating any interest on the overpaid periods. If the audit resulted in a net overpayment, the IL-870 or EDA-105 had to be signed during amnesty, and then interest would be calculated on the net overpayment. The interest should be calculated from the first overpaid month.

In income tax, if an offset was made between years, BIT will show a type 13 payment in the overpaid year and a type 10 payment in the year to which the overpayment was applied. If the payment-received date on these payments is any date within the amnesty period, they are considered amnesty payments.

On the other hand, if a taxpayer refused to accept the tax-to-tax offset, the audit period could be split into overpaid and underpaid periods at the taxpayer's request. Refund interest would be calculated on the

overpayments, and the taxpayer would be required to pay the tax under amnesty on the underpayments without interest or penalty.

To do this for sales tax, the taxpayers were told that they needed to complete amended returns for each overpaid period due to time constraints on the auditor. The auditor could provide them the information they needed for each overpaid period, but the returns would need to be completed and submitted to the auditor for processing, along with payment for the underpaid periods prior to the end of amnesty. Based on this position, the taxpayers would not be allowed to use the overpayment and associated interest to satisfy the underpaid tax periods.

For income tax, signed amended returns are needed. Generally, taxpayers did not have to prepare the returns because the auditor would have already completed them on the overpaid years in an audit along with the EDA-25 Auditor's Reports on the underpaid years.

a) Business Income Tax Offset Policy

The Department established a Business Income Tax (BIT) Offset policy for pending refunds that are on Flag X logic. "Flag X logic" means that the account currently has a pending refund that has been verified and approved by the Department, but the funds are not currently available to pay the refund. Accordingly, BIT overpayments that are on Flag X logic are allowed to be offset with interest against liabilities within the audit period, liabilities for the same tax outside of the regular audit period and liabilities for other tax types administered by the Department. For example, any BIT overpayment can be applied to a ROT audit liability, BIT to WIT, BIT to Telecom, etc.

The following items must be completed by the auditor for a BIT offset to occur.

- Verify that there is an overpayment on the BI00 system for the FEIN under audit. The BI00 summary screen will indicate if there is an overpayment with a Flag X;

- The audit liability should be offset against the oldest BIT overpayment first. An exception for ROT and other tax type liabilities (ROT), if there is one BIT APE that will pay off the ROT liability in full as opposed to multiple APEs, use the oldest BIT overpaid year that will pay off the balance due in full.

- Ensure that an Audit Code 4 is placed on the related FEIN and each applicable overpaid year. The Audit Code 4 will stop the processing of a refund until the offset is completed. Call or email the Audit Perfection Supervisor at [redacted] or the RTS at [redacted] to place an Audit Code 4 on the account;

- Secure from the taxpayer a signed and dated letter of authorization to offset.

  - See Exhibit D – BIT Offset Authorization Letter.

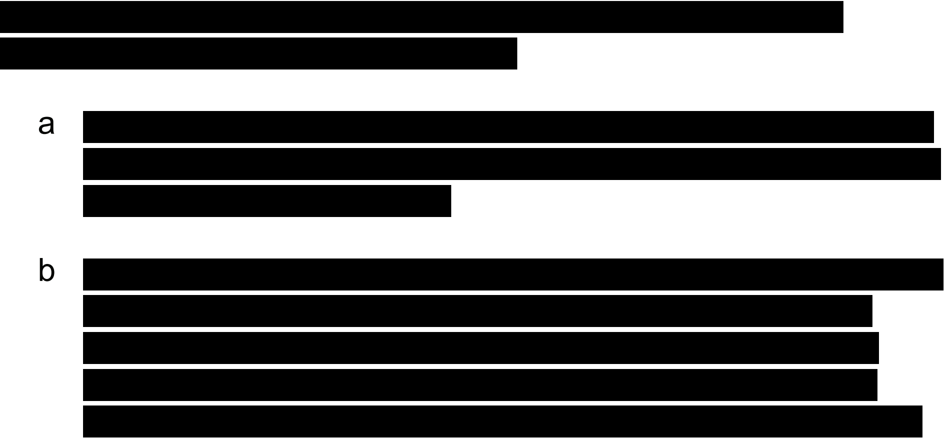
- For any offsets outside the audit period or to another tax type, attach a note on the outside of the audit file identified as “BIT Offset Request”;

- Any other offset situations that are not covered, please call the ROT Perfection Section Supervisor at [redacted] or BIT Perfection Section Supervisor at [redacted], and

- The BIT Perfection Section Supervisor will be responsible, respectively, for getting the BIT offset approved by the committee once the audit is received in Springfield.

b) Business Income Tax Offset Procedures

Following is the procedure for offsetting BIT refunds on Flag X logic. These are the only types of overpayments that will be offset against established liabilities only. Do not offset overpayments to future estimated payment (ES) liabilities.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

38. CONSEQUENCES FOR FAILURE TO PARTICIPATE

If a taxpayer had an audit tax liability on a certain tax type that was eligible for amnesty, paid part of the liability but failed to pay all of the taxes due to the State for that particular taxable period (for sales tax) or year (for income tax), their amnesty status will be invalidated for the periods/years that are not paid in full. Interest and penalty will then be imposed on the unpaid UPIA tax liability years at a rate of 200% of the rate that would otherwise have been assessed without amnesty.

Taxpayers that qualified but chose not to participate will also be assessed 200% of penalty and interest on the entire UPIA liability found on eligible amnesty months/years
after the amnesty payment period is concluded.

Taxpayers could make payments and write on the documents that they did NOT want to participate in amnesty. These taxpayers could pay single, as opposed to double, interest and penalty, with the amended returns. These taxpayers should have paid single interest and penalty prior to the conclusion of the amnesty period, November 15, 2003.

39. AUDIT ISSUES

a) Audits Completed Prior, During, and After Amnesty

1. If taxpayers agreed to the audit **prior to the start of amnesty**, but wanted to pay under amnesty, they could sign the IL-870 or the EDA-105 unless the audit involved overpaid periods that were to be offset against underpaid periods. The auditor should not have collected payment prior to the start of amnesty. The auditor was to inform the taxpayers that they would receive a Notice of Deficiency or Notice of Tax Liability, but **they should not pay until the amnesty payment period**. **The auditor was also to tell them that if they paid before or after the amnesty payment period, their penalties and interest would not be abated** – (they would be at current rates if paid before, and would be doubled (UPIA years only) if paid after the amnesty payment period.)

a. If the taxpayer did not sign the IL-870 or the EDA-105, the audit was to be closed as unagreed. Taxpayers were to be informed that they would be issued a Notice, but they should wait to pay during the amnesty period.

b. In both the agreed and unagreed situations, the taxpayers were to be informed that if they did not receive a Notice of Deficiency or Notice of Tax Liability (due to processing lag time) they should still make sure to pay the entire tax during the amnesty period anyway. Otherwise the tax liability would be subject to 200% penalties and interest for UPIA years.

c. If the audit resulted in a net overpayment after offsetting underpaid periods with overpaid periods, taxpayers had to sign the EDA-105 or IL-870 **during** amnesty filing dates to participate. They had to provide a letter to the auditor requesting the offset be done under amnesty. The offset would then be their payment during amnesty. There were a few cases where the audit resulted in a net overpayment, and because auditors were initially told to close cases rather than hold them until the start of amnesty, taxpayers signed the IL-870 before the start of amnesty. They were told that the offset would be their payment under amnesty. For these few cases, amnesty will be allowed since this is what the Department told the taxpayers and procedures were unclear at the time the audits were closed.

d. A copy of the Amnesty FY Bulletin 2004-11 Tax Delinquency Amnesty Act was to be given to taxpayers if they requested something in writing from us.

2. If the audit was **completed during the Amnesty Payment Period**, and the taxpayer wanted to pay, the auditor was to obtain signed EDA-105's, or IL-870's, the completed Audit Amnesty Payment Coupon and a check for the full amount of tax liability.

3. If an audit **could not be completed before the amnesty period expired**, the taxpayer could still participate in amnesty. The taxpayer could make a reasonable estimate and submit payment for the estimated amount during the amnesty payment period. If additional liability was due at the close of the audit, the taxpayer would be liable

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

for double penalty and interest on the additional liability established for UPIA years. If no additional liability was due, and it was determined that the taxpayer overestimated the liability, the taxpayer will be issued a credit or refund with interest. For more information, please refer to 86 Ill Adm. Code § 521.105 (k).

b) Amnesty and Post-Amnesty Periods

If an audit period covered periods that are outside of the amnesty periods, the auditor should do the following:

For income tax, both the amnesty and post-amnesty periods can be kept in the same track and be included on the same IL-870. Since each year is processed on its own Auditor's Report for income tax, the penalties and interest would be abated on the Auditor's Report for the amnesty years and would not be abated on the Auditor's Report for the post-amnesty year.

For sales tax, the audit can remain in one track, but it will need to be split between amnesty and post-amnesty periods.

40. AMNESTY AND ADMINISTRATIVE HEARINGS

Taxpayers that were in Administrative Hearings were eligible to participate in the Amnesty program. If a taxpayer failed to participate in the program, the taxpayer will be subject to double penalties and interest on any qualifying liability. A taxpayer that wished to participate in amnesty must have stipulated to judgment in favor of the Department and paid the tax during the Amnesty payment period. For more information, please refer to 86 Ill Adm. Code § 521.105 (f).

If a taxpayer paid an estimated audit liability under amnesty, but then filed a protest to go to hearings after the audit was completed, the audit should be closed according to normal procedures and forwarded on to Administrative Hearings. The Notice of Deficiency will include double penalty and interest for UPIA years. Interest will be calculated up to the date of payment. Administrative Hearings would then make the decision on how to handle the case. They could choose to dismiss the case from hearings.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the case is dismissed, the taxpayer will not receive the benefits from amnesty. They will be assessed double interest and penalties on the entire audit liability. If Administrative Hearings chooses to pursue the hearing, and the Department prevails in the case, double penalties and interest would be due on the entire audit liability. If, after the hearing, the taxpayer prevails, Administrative Hearings will determine if the amnesty status will remain.

41. AMNESTY AND COURT

Each tax period for each type of tax is a separate liability that can qualify for amnesty. So, if taxpayers were in court on a ROT liability, it would not prevent them from participating in amnesty for an income tax liability that was not in court nor would it prevent them from participating in amnesty for a ROT tax period that was not in court. If they wanted to participate on the liability that was in court, they were required to dismiss their case and pay the liability during the amnesty payment period.

42. AMNESTY AND ICB

Taxpayers that were already in ICB, or those who desired to petition for a review before ICB on an incomplete audit were eligible for amnesty. The resolutions of ICB cases are not considered legal settlements. ICB matters are technically still pending, ongoing audits. Therefore, the auditor could not conclude the audit in those situations where the taxpayer requested a review of the proposed audit adjustments by ICB until ICB issued an Action Decision in the matter. If ICB ordered the auditor to make adjustments to the audit, those adjustments were considered to be part of the audit.

Since ICB is considered part of the audit process, these taxpayers could make their best estimate if amnesty would expire before the audit was to be finished, pay their potential liability, have ICB review their audit, and finish the audit in accordance with the amnesty regulations. If fieldwork were completed before amnesty and the case was already in ICB, or if fieldwork were completed during amnesty and the case was headed to ICB, taxpayers would need to pay the full amount of the liability as determined by the auditor within the amnesty payment period. This would be their “best estimate.”

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

If the taxpayer won their case in ICB, they would receive a refund of any overpayment of their estimated amnesty payment, only if the auditor had informed the taxpayer of that specific situation within the audit process. If the taxpayers lost in ICB, and they owed an additional amount that was not paid during amnesty, no penalties and interest would be due on the estimated payment paid during amnesty. However, they would owe double penalties and interest only on the additional amount that was not paid under amnesty (but they must have paid it in full within 30 days of notification). If full payment is not received within 30 days of notification, then the amnesty benefits are voided on the entire audit.

If the taxpayer chose to withdraw from ICB and pay under amnesty, this was permissible; however, it was not required.

43. UNDERPAYMENT OF AMNESTY AUDIT LIABILITY

A taxpayer could participate in amnesty by completely satisfying a liability for a particular tax type and particular tax period (year, month, etc.) for which amnesty is sought. If a taxpayer had a tax period that was eligible for amnesty, and the taxpayer failed to satisfy the full amount of tax for that period, double interest and penalties would be imposed on any unpaid tax for that period. The following examples are illustrative:

For income tax, assume that the audit covered three years and the first two were paid in full during the amnesty payment period. The Auditor's Reports for the first two years would be processed with no penalties and interest since they were paid in full. Since the third year was not paid, the Auditor's Reports should reflect 200% of the penalties and interest (UPIA periods only).

For sales tax, the audit would need to be split into multiple EDA-105's. One EDA-105 should cover the amnesty months that were paid in full. No penalties and interest would be assessed on this period. Another EDA-105 should be prepared for the amnesty months that were not paid in full. This second EDA-105 would be subject to 200% penalties and interest. A third EDA-105 would be required if the audit period includes any months after June 30, 2002.

44. UNAGREED AUDIT ISSUES

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A taxpayer could not participate in amnesty on an issue-by-issue basis for the same year/period. (Ref: Regulation § 521.105(j)). They must have paid the entire liability for each amnesty liability year/period.

For income tax, this means that if a taxpayer owed $10,000 in tax on 1999 at the end of the audit, it would have to pay the entire $10,000 tax in order to qualify for amnesty and have the penalties and interest waived on that year. The taxpayer would not be able to take an unagreed issue of $2,000 for 1999 to Administrative Hearings or to Court and still have amnesty on the remaining $8,000. However, if the taxpayer had only an unagreed issue attributable to one year, and agreed issues attributable to other years of the audit period, the taxpayer could have taken amnesty for the agreed years, and could have gone to court on the unagreed year.

For sales and miscellaneous taxes, since each tax period stands on its own, it would be a rare situation in an audit where the taxpayer had only an unagreed issue in one month and agreed issues in the remaining months. The taxpayer could have gone to Administrative Hearings or Court on the unagreed issue and participated in amnesty by paying the liability on the agreed issues. However, if there were unagreed issues as well as agreed issues in the same tax period/month, the taxpayer could not separate the agreed issues from the unagreed issues, and had to pay the entire liability in order to get the benefits of amnesty.

45. PENALTY AND INTEREST ONLY LIABILITIES

There must have been a tax liability that was paid during the amnesty payment period in order for interest and penalties to be abated.

In regard to late payment penalties on accelerated payments, penalties and interest would not be abated where the tax had been paid prior to the amnesty payment period nor will penalties and interest be abated if during the course of an audit, the taxpayer finds additional tax liability not associated with the accelerated payments.

46. CIVIL FRAUD AND NEGLIGENCE PENALTIES

Civil fraud and negligence penalties do qualify for abatement under amnesty. However, excess tax collections do not qualify.

47. CHANGES MADE TO AMNESTY LIABILITY AFTER AMNESTY

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Claims for Refund - General

All unprocessed refund claims filed during or after amnesty for a tax period in which an amnesty payment was made will have to be accepted, partially denied or fully denied per audit. As a general rule, a taxpayer may not file a claim for any tax liability that was paid under amnesty. Section 521.105(c) of the Amnesty Regulations states, "The taxpayer relinquishes all rights to contest the tax liability that is being paid" and "the taxpayer may not claim a refund of the money paid or protest the Department's denial of such a claim." The exception to this for income tax would be a finalized federal RAR that decreased the tax liability or an RAR change that increased an NOL or created an NOL that could be carried to a year in which an amnesty payment was made. This will be addressed in the subsection that follows.

If a taxpayer paid a tax liability under amnesty and subsequently filed an amended return to claim a refund on that same period (for sales tax) or year (for income tax) for issues previously addressed under amnesty, the amended return will be denied, and a Claim Denial will be issued.

- See Exhibit E – 2003 Amnesty Claim Denial Letter.

The following examples illustrate how to handle some common income tax audit situations:

EXAMPLE: Corporation X filed its original combined return for the year 12/31/2000 on 9/10/2003 reflecting a total tax liability of $45,000. It made estimated payments in the amount of $44,000 and paid $1,000 with their original return. During the period of amnesty, the taxpayer was under audit, but the audit could not be completed prior to November 17, 2003. Therefore, on November 12, 2003 the taxpayer made an amnesty payment on an estimated audit liability in the amount of $20,000. The audit was completed on 3/10/2004 and two changes were made. Corporation Z was added to the unitary group, thereby changing Line 1 and the apportionment formula. After the audit adjustments, it was determined that the taxpayer's audit liability was overpaid by $5,000. The taxpayer did not complete an amended return to claim a refund of this amount. This is correct since the overpayment of $5,000 will be refunded after the audit is processed. Corporation X paid a total of $15,000 under amnesty. The $5,000 will be refunded **ONLY** if the auditor had informed the taxpayer that the overestimated audit liability would be indeed refunded after the audit is processed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Scenario 1: On 6/15/2004 Corporation X filed an amended combined return for the year ended 12/31/2000 requesting a refund in the amount of $10,000. The amended return was filed because Corporation X and subsidiaries were audited by another state to which throwback sales had been applied. The amended return filed by Corporation X removed these throwback sales from the Illinois sales factor. The amount of the change on the amended return was verified. It was not previously addressed in the audit. However, no refund is allowable since the taxpayer paid the audit liability for this year under amnesty and the change is not due to a federal audit.

Scenario 2: On 6/15/2004, Corporation X filed an amended return reversing the audit changes and requesting a refund of the $15,000 amnesty payment. The claim is denied in full. The taxpayer is sent a Notice of Claim Denial on the $15,000, due to the Amnesty rules. If the taxpayer protests the Claim Denial, Administrative Hearings will take jurisdiction. If the taxpayer loses the Administrative Hearing, the Department will issue a 200% penalty and interest assessment on the $15,000.

Scenario 3: On 6/15/2004, Corporation X filed an amended return which made changes to the apportionment factor that included issues which were addressed in the audit. Corporation X also made changes to the throwback sales as the result of an audit by another state. The total claim amount was $35,000. Of this, $5,000 was part of the original amnesty audit payment and $30,000 is due to the throwback issue. The entire claim will be denied since the changes are not due to a federal audit. The taxpayer will be assessed double penalties and interest on the entire $15,000 audit liability that was previously paid under amnesty.

b) Federal Audit Changes

Regulation 521.105(l) states in part:

"For purposes of participating in the Amnesty Program only, a taxpayer may file an amended return reporting a federal change prior to receiving final notification from the Internal Revenue Service that the change has occurred. Although participants in the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

> Amnesty Program may not seek or claim refunds, a limited exception to this rule will be permitted for taxpayers whose refund claims are based upon final determinations of the Internal Revenue Service or the federal courts."

Therefore, amended returns may be filed to report finalized federal audit changes for amnesty years, and refunds related to the finalized RAR changes may be requested for liabilities that were paid under the Amnesty program. According to Informational Bulletin FY 2005-10, however, the taxpayer must file a claim for refund within one of the following statutes of limitations: three years from the date the taxpayer's original return was filed for the taxable year, one year after a payment was made, or prior to the expiration date of a signed extension agreement with the Department. For any amended returns filed for finalized federal RAR changes, the auditor must verify that the only changes made by the taxpayer were for RAR issues. If the taxpayer made adjustments to the tax year for any issues that were not related to the RAR changes, the portion of the refund attributable to those adjustments must be denied. Following are various scenarios that the auditor may encounter with amended returns related to federal audit changes:

If a taxpayer filed an amended return to report an estimated increase for a federal audit change during amnesty, and the finalized RAR was subsequently less than the estimate, the taxpayer may file a claim for refund of the overestimated amnesty payment. If the claim is timely filed, a refund will be issued for the overpaid tax amount with interest from the payment date.

For situations where an RAR resulted in an increase to an NOL that was carried into an amnesty year, or for situations where an RAR resulted in reversing an income year to an NOL that can be carried into an amnesty year, refund claims on an amnesty year will be permitted. However, the auditor must verify that the amended return is only for the finalized RAR changes (or for a valid NOL change.) If the taxpayer makes changes to claim a refund for any other issues that were already addressed under amnesty, then amnesty will be invalidated (Regulation § 521.105(c)).-

If the taxpayer filed an amended return to report an estimated increase for a federal audit change during amnesty and the finalized RAR results in an additional liability due, no penalty will be due if the taxpayer files within 120 days of the federal finalization date. If a notice and demand is issued, and full payment is not received by the due date for payment, interest and penalties at double rates will be assessed on the amount paid under amnesty, as well as on the additional amount. –

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

c) Overpayment of an Estimated Amnesty Liability

If the taxpayer made an estimate of the audit liability for an audit that was unable to be completed prior to the close of amnesty, and the taxpayer mistakenly paid penalty and/or interest along with the tax due under amnesty before the audit was completed, this will be refunded to the taxpayer as well, when the audit is processed.

If the taxpayer received a Tax Amnesty Program – Audit Liability letter from the Department, which explained the process for the estimate, and the provision for them to receive a refund of an over-estimate, they may also receive a refund of any amount of overpayment that is determined at the close of the audit. The overpayment will be refunded to the taxpayer with interest from the payment date when the audit is processed. A copy of the letter should be included in the audit file. The taxpayer may also receive a refund if the auditor verbally informed a taxpayer of the estimate procedures, and that representation is documented in the audit file. The taxpayer may file a claim for refund, in either situation if the correction is not made in processing the audit.

d) Underpayment of Estimated Amnesty Liability

If the taxpayer made an estimate of the audit liability for an audit that was unable to be completed prior to the close of amnesty, and it was determined at the close of the audit that the actual liability was greater than the estimated amount, the taxpayer can still have amnesty on the amount paid during the amnesty payment period. However, in order to do so, the taxpayer must pay the additional tax liability no later than the due date of any bill received from the Department, along with double interest that will be assessed only on the additional liability for UPIA years. If the total additional tax plus the double interest on that additional tax are not paid within thirty days, then amnesty will be void and penalty and interest will be doubled on the entire audit liability.

For example, if the taxpayer makes a $600 amnesty payment, but it is determined at the completion of the audit after amnesty is over that the actual liability is $800, the taxpayer must pay the remaining $200, plus double interest on that $200. If the taxpayer fails to pay this within 30 days, then amnesty will be void and the taxpayer will owe double interest and penalties on the entire $800 deficiency.

e) Department Error

There are a few specific scenarios where the Department allowed amnesty because the Department made an error in information given to the taxpayer.

Following are the cases where amnesty is permitted:

1) Audit was given instructions that the auditors were to close cases (rather than hold them until the start of amnesty) for statute reasons, even if the taxpayer was planning to file under amnesty. However, these instructions created a problem. Several accounts were in a net refund situation (i.e. in income tax, the first two years are overpaid by $100 and $200 and the last year is underpaid by $160 – resulting in a net overpayment of $140). The auditors told the taxpayer that we would allow the offset under amnesty. However, the taxpayer signed the IL-870 before the start of the amnesty period. This resulted in an overpayment date (the IL-870 date) that was prior to the start of amnesty. Because the offset covered the entire tax amount, there was no tax remaining to be paid during amnesty. Since we incorrectly informed taxpayers that they would receive amnesty in this situation, and they would have waited to sign the IL-870 if they knew that was how they should receive amnesty, we will allow these taxpayers to have amnesty.

2) If an audit was completed prior to the start of amnesty, was agreed to, and payment was made on the audit liability prior to the start of amnesty, but an error was found in the audit during the Review process resulting in additional liability, and payment was made for that additional liability during amnesty, we will abate interest and penalties on the additional tax liability for the years (for income tax)/periods (for sales tax) where the amnesty payment satisfies the remaining total liability.

   For example, a taxpayer was under audit for income tax for the years 1997, 1998, and 1999. The audit was completed prior to amnesty and all issues were agreed to and paid in full prior to amnesty. After the audit, but subsequent to amnesty, an error in the audit was discovered that increased the taxpayer's tax liability for 1999. A new IL-870 is sent to the taxpayer, but it is not signed and paid until October 15, 2003 after amnesty begins. The taxpayer would receive amnesty for the 1999 tax year and all penalties and interest would be abated for this year. However, amnesty would not

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

be given for 1997 and 1998 because no tax remained due for these years during the amnesty payment period.

3) If an audit was closed, and the taxpayer incorrectly paid under amnesty an amount for penalties and interest on the liability, in addition to the tax, and that penalty and interest inadvertently was not refunded when the audit was processed, the taxpayer is entitled to a refund of the penalty and interest amount. In order for the taxpayer to receive a refund of that inadvertent payment of penalty and interest, the taxpayer would need to file a refund claim.

48. PROCESSING PROCEDURES

a) AMNESTY CHECK PROCESSING

(Note: These processing procedures are obsolete in 2014, but were followed during the 2003 amnesty program.)

Checks received in the field by auditors or received in the field office with an Audit Amnesty Payment Coupon:

1) **Income Tax** – auditors and/or the field office staff should copy the checks and the payment coupon for the audit file, and then send the check and coupon **directly to Audit Perfection at P.O. Box 19012, Springfield, IL 62794-9012. The IL-1962 should not be used. Do not send checks to Document Control and Deposit.** Audit Perfection will post the check directly to the tax system and to AIS Track Information System under the payments tab. Clerical staff in the field offices should verify that the check is posted to AIS payments when they post the C-17-1 for the completed audit. If the field clerical personnel discover that a check is not posted to AIS payments, they should post it and make sure that the box is checked to indicate amnesty.

2) **Sales/Misc. Tax** – auditors and/or field office staff should follow current procedures for processing checks. The **payments will be posted to AIS in the remittance posting of the audit history by Audit Perfection**. Clerical staff in the field offices should verify that the check is posted to AIS Track Information System under the payments tab when they post the PROD-1 for the completed audit. If the field clerical person discovers that a check is not posted to AIS, the sales/misc. tax supervisor of Audit Perfection should be contacted.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Checks received in-house by Audit Perfection or Tax Discovery with a payment coupon:

1) **Income Tax** – If the payment is received in Audit Perfection, the payment should be posted directly to the taxpayer's account by Audit Perfection based upon the tax type, years and amounts listed on the payment coupon. Copies of the check, payment coupon and any return or spreadsheet should be sent to the auditor responsible for the case. If Income Tax Discovery staff receives amnesty payments directly, they should make copies for their file, and give their checks and payment coupons to the income tax supervisor in Audit Perfection. For further information on payment posting, refer to Chapter 32, Payment Posting Procedures.

    a) Payments will be posted using the usual station numbers and appropriate forms (IDR-553, ITR-85A, WTR-1, etc.) Payment type 09 should be used for BIT field audits and payment type 25 should be used for Income Tax Discovery audits. After the payment is posted it will be visible on BIT History.

    b) The payment must also be posted in AIS Track Information System under the payments tab. The "Amnesty" box must be checked to indicate that the payment was for amnesty. Every amnesty audit payment needs to be verified by Audit Perfection to make sure the payment information is entered correctly. If the payment is for amnesty and post-amnesty periods, the payment needs to be entered in multiple parts. That way the amnesty money can be identified separately for reporting purposes.

2) **Sales/Misc. Tax Field Payments** – for registered taxpayers, payment should be posted directly to the taxpayer's account by Audit Perfection based upon the years and amounts listed on the payment coupon. For unregistered taxpayers, the money may be posted to the Remittance Clearing (RC) account. For both registered and unregistered taxpayers, the payment should be posted in the AIS Track Information System under the payment tab by Audit Perfection. The "Amnesty" box must be checked. After the payment is posted directly to the taxpayer's account, it will also be seen on STS and/or EPS. Copies of checks, payment coupons or spreadsheets should be forwarded to the auditor responsible for the case.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3) **Sales/Misc. Tax Discovery Payments** – when received, all payments must be posted in AIS Track Information System under the payments tab by the designated clerical staff. The checks, payment coupons and any spreadsheets submitted will be given to the respective auditor responsible for the case. The auditor should prepare the appropriate document for processing. Copies of the checks, the Audit Amnesty Payment Coupon and any spreadsheets should be maintained in the audit file. The check and processing document should be given back to the clerical staff, who will forward them to Document Control and Deposit.

Checks received for taxpayers that are in unassigned inventory (status code 18 or 20):

1) **Income Tax** – the taxpayer must provide an amended return along with the payment.

   For status code 20 – the money should be posted by Audit Perfection in AIS. The amended return should then be sent to Audit Planning for analysis and proper routing to the field or Office Programs.

2) **Sales/Misc. Tax** – the taxpayer must provide a spreadsheet along with the payment and payment coupon.

   For status code 18 or 20 – the money should be posted to the taxpayer's account by Audit Perfection if the~~y~~ business is registered and to the RC account if it is unregistered. The supervisor of Sales/Misc. Tax Discovery should be given the spreadsheets, and copies of the check and payment coupon. The Sales/Misc. Tax Discovery staff will prepare the EDA-105's, based on the spreadsheet information. The Sales/Misc. Tax Discovery supervisor will review them and then forward them to the supervisor of Sales/Misc. Tax Audit Planning.

Checks that are received in the field, in field offices, or in-house without the payment coupon, spreadsheet or amended return – The person receiving the check should make an attempt to obtain the missing information. The check should be forwarded to Audit Perfection to be posted. Tax Discovery will follow up on these cases.

Checks received by the Federal State Exchange Unit:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1 Received with a processable return and payment coupon – The check should be stapled to the return and then both the return and the payment should be sent downstairs to front-end processing.

2 Received with a payment coupon but without a return – the clerical staff should post the money on an ITR-85-A, and a either a letter should be sent to the taxpayer requesting a signed return, or an EDA-24 should be prepared and sent to the taxpayer.

3 Received with a payment coupon and a return without a signature on the return – the check should be stapled to the return and sent down to front-end processing. They will send a "no signature" letter to the taxpayer.

4 Received without a payment coupon – payment should be posted on an ITR-85-A.

49. GENERAL TAX AUDIT PROCESSING ISSUES

a) Doubling of Penalties and Interest

If any tax on an amnesty tax year is not paid during the amnesty payment period, any applicable penalties and balance due interest will be assessed.

Penalties and balance due interest **will double** on the following accounts:

- For corporate income tax UPIA tax years ending on or after 10/16/1993 through 06/30/2002;
- For IL-1040's, IL-1041's, IL-1065's, IL-1023-C's with tax years ending on or after 9/16/1993 through 6/30/2002;
- For IL-941 withholding returns, including either the annual 1993 return or the fourth quarter of 1993 return through the second quarter of 2002;
- For sales and miscellaneous taxes due on or after 01/1/94 through 06/30/2002 (including 12/93 returns); and
- Payment plans that are in default (for the above periods).

Penalty interest is calculated on the doubled penalty and then the interest is doubled. Therefore, penalty interest will essentially quadruple.

Penalty and balance due interest **will not double** on the following accounts:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- For income tax, tax years ending prior to 10/16/1993 (The IITA was not changed to permit doubling of pre-UPIA periods);
- For IL-1040's, IL-1041's, IL-1065's, IL-1023-C's with tax years ending prior to 9/16/1993;
- For IL-941's including or before the third quarter of 1993;
- For sales and miscellaneous taxes, periods due prior to 1/1/94 (periods through 11/30/1993);
- For income tax, tax years ending after 06/30/2002 (post amnesty periods);
- Penalty and interest only accounts (not eligible for amnesty because no tax due);
- Legal settlements with any accepted offer in compromise (not eligible for amnesty);
- Bankruptcy accounts;
- Payment plans, as long as the taxpayer does not default on the pay plan;
- Taxpayers that specifically indicate with a payment that they are protesting and filing in Circuit Court prior to November 17, 2003; and
- Any payment made with the "Not Amnesty" statement.

b) Additional Liabilities on Tax Years That Were Previously Granted Amnesty

Pre-UPIA Periods - Tax years ending prior to 10/16/1993 for corporate income tax, for tax years ending prior to 9/16/1993 for IL-1040's, IL-1041's, IL-1065's, and IL-1023-C's, for IL-941 withholding returns for quarters prior to and including the third quarter of 1993, and tax periods covering through 11/30/1993 for ROT and Miscellaneous taxes (tax years/periods due prior to 1/1/1994)

- When an additional tax liability is created (due to an amended return, audit, etc.) on an amnesty tax year/period ending prior to UPIA and amnesty was previously granted, penalty and interest on the additional liability will be assessed at the pre-amnesty rate.

- If the taxpayer pays the total amount of tax, penalty and interest due within 30 days of the Department's demand for payment, the original amnesty abatement will be honored.

- If the taxpayer does not pay the total amount of tax, penalty and interest due within the 30-day period, the original amnesty

abatement will be void and penalty and interest will be computed on the additional tax liability and the amount of tax due during the amnesty period.

When an additional tax liability is created (due to an amended return, audit, etc.) on an amnesty tax year/period prior to UPIA and the taxpayer did not owe any tax during amnesty, penalty and interest on the additional tax liability will be assessed at the pre-amnesty rate.

(1) UPIA Periods through End of Amnesty Where There is an Audit and Including Amended Returns filed During Amnesty

Tax years ending on or after 10/16/1993 through 6/30/2002 for corporate income tax, for tax years ending on or after 9/16/1993 through 6/30/2002 for IL-1040's, IL-1041's, IL-1065's, and IL-1023-C's, for 1993 IL-941 annual returns and fourth quarter 1993 withholding returns through second quarter 2002 withholding returns, and tax periods covering 12/1993 to 6/30/2002 for ROT and Miscellaneous taxes (tax years/periods due on or after 1/1/94 through 6/30/2002)

When an additional tax liability is created on an amnesty tax year under UPIA (due to an amended return, audit, etc.) and amnesty was previously granted, penalty and interest on the additional tax liability would be assessed at the doubled rate.

- If the taxpayer pays the total amount of tax and interest due within 30 days of the Department's demand for payment, the original amnesty abatement will be honored.

If the taxpayer does not pay the total amount of tax, penalty and interest due within the 30-day period, the original amnesty abatement will be void and penalty and interest will be computed on the additional tax liability and the amount of tax due during the amnesty period.

(2) UPIA Amnesty Periods Where an Amended Return is filed 11/18/2003 and after

When an additional tax liability is created on an amnesty tax year under UPIA due to an amended return (with the exception of federal RAR changes) and amnesty was previously granted, the amnesty status will be invalidated unless the additional liability is paid before

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the due date of any demand for payment and double penalty and interest will be assessed on the entire amnesty payment and the additional liability.

c) Bad Checks (NSF)

If a taxpayer completely pays an amnesty tax year liability during the amnesty payment period but the check is returned for non-sufficient funds (NSF), the following will happen:

- When the check originally comes in, the penalty and interest will be abated.

  When the check becomes NSF, the penalty and interest will be put back on the account, plus a NSF fee will be assessed.

- If the money is not repaid within the amnesty period, the penalty and interest will double at the end of amnesty.

  If the money is repaid within the amnesty period, the original penalty and interest will be abated but the NSF fee will not be abated.

d) Returns Filed

If an original or amended return is filed for an amnesty tax year after the amnesty payment period has expired and the return has a tax balance due that was not paid during the amnesty payment period, penalty and interest will be doubled.

If an original or amended return is filed for an amnesty tax year after the amnesty payment period and the tax shown on the return was paid prior to the amnesty payment period, penalty and interest will not be doubled because the liability was a $0 tax with penalty and interest only account and was not eligible for amnesty.

50. ROT & MISCELLANEOUS TAX AUDIT PROCESSING

a) Taxpayer Made an Amnesty Payment for an Audit Period during the Amnesty Payment Period

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1) The tax has been paid in full. Complete the appropriate audit document reporting penalty and interest even though they will be abated. Interest needs to be computed through amnesty payment date.

2) Taxpayer has made an estimated amnesty payment but does not pay the tax in full. Complete the appropriate audit document reporting tax paid during amnesty payment period along with penalty and interest that will be abated. Interest will be computed through the amnesty payment received date. A second audit document needs to be completed to report the additional tax liability. If the taxpayer remits the additional tax after the amnesty payment period, applicable penalty and interest will be doubled on the additional tax only. Interest will be computed through audit document signature date.

   Example: The audit period covers one period, March 2002. The taxpayer makes an amnesty payment totaling $1,000. At the close of the audit, the total tax liability is $2,000. An audit document will be completed reporting the $1,000 amnesty payment. Interest will be abated on this amount. A second document will be completed for the additional $1,000 and double interest is due.

3) Taxpayer's estimated amnesty payment does not pay the tax liability in full. If the taxpayer agrees to the additional liability but does not remit the additional amount, the amnesty payment needs to be reviewed to determine what periods are closed. When an amnesty payment does not close a period in full, applicable penalty and interest will be doubled on the entire amount for that period and forward.

   Example: The taxpayer has made a $4,800 estimated amnesty payment for period covering July 1, 2001 through June 30, 2002. At the close of the audit, total tax liability of $6,000 is due and the taxpayer does not remit the additional amount. The taxpayer is a monthly filer for ROT and the tax liability is evenly spread throughout the audit period. The amnesty payment will pay nine months in full, July 2001 through March 2002. An audit document will be completed for periods covering July 2001 through March 2002. The taxpayer will receive relief from interest and or penalty covering these periods. A second audit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

document will be completed for April 2002 through June 2002. Double interest will be computed on the additional tax due along with the amnesty payment amount allocated to April 2002. The reason that the taxpayer does not receive relief from the April 2004 amnesty payment is that they did not remit the additional amount at the close of the audit. The taxpayer's ROT filing status (monthly, quarterly, or annual) is used to determine if a period is closed.

4) At the conclusion of the audit, it was determined that the taxpayer overpaid the audit. The audit document will be completed reporting the correct liability due. The PROD-1 will also report the correct liability due. It should be noted on the audit document and letter of comments that the taxpayer is overpaid. The overpayment will be issued once the audit has been processed

b) Net Overpayment Established During Amnesty Period

1) Instead of liability due, a net overpayment is established. Complete a work schedule outlining how liability/credits fall within the amnesty period. The liability established will be offset against the credits. Once the audit is in a net overpaid situation, interest will begin accruing. Example: An audit covering the period January 2002 through June 2002 results in a net overpayment. January, February, and March have $1,000 due for each period while May has an overpayment of $5,000. Interest will be computed on the net credit of $2,000 and it will be computed in detail. The amount will be entered in May 2002. If the taxpayer made an amnesty payment for a month, we can allow credit for an overpayment for that month only if there was a representation made to the taxpayer that a refund would be allowed. Otherwise, no overpayments are allowed. If the overpayments are allowed, double penalties and interest are due on all underpayments and single interest is paid on overpayments up through the effective date of the offset.

2) The audit is completed after the amnesty payment period and it is a net overpayment. The taxpayer does not give an offset authorization letter during the amnesty payment period offsetting the liability to the credits. The taxpayer owes double

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

interest on the periods where a net liability is due and single interest on periods where the net liability is overpaid. When entering tax due on the interest schedule, the ST program will take this in account.

Single interest (refund interest) will be computed on the periods overpaid and double interest will be computed on the periods underpaid. The interest schedule will report the net interest due, which will be reported on the EDA-105 documents.

Example: An audit covers the period January 2002 through June 2002 with a total net credit due of $5,000. January, March, and May have a liability of $500 due for each period. February has a credit of $2,000 and June of $4,500. The interest schedule computes double interest on the liability established for January, March, and May and single interest for February and June. The net interest will then be reported on the audit document.

c) Amnesty Codes

Amnesty code AD is pre-printed on all ROT audit documents under the free form code section. When interest and/or penalty have been doubled, the AD free form code needs to be circled. This tells Audit Perfection and Review that interest and penalty have been doubled. If the audit document does not have the AD free form code, please write it in under the free form code section and circle it.

AX, amnesty exempt, is another amnesty free form code. This code is used when the taxpayer does not qualify for amnesty. This includes bankruptcy and BCI accounts. If the taxpayer was in bankruptcy or BCI was investigating, the taxpayer does not qualify for amnesty. Penalty or interest will not be abated nor will they be doubled. Please write and circle this code under the free form code section of the audit document.

d) PROD-1 Codes

Please refer to ROT audit manual chapter 9.1.1 for PROD-1 codes.

51. INCOME TAX AUDIT PROCESSING

(Note: These processing procedures are obsolete in 2014, but were followed during the 2003 amnesty program.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Taxpayer Made an Amnesty Payment for an Audit Period That is Currently Assigned to an Auditor

1) For the Audit Amnesty Liability, with the Taxpayer in ICB for Audit Period

    - Check with the taxpayer to see if he wants to withdraw from ICB before completing the audit.
    - If the taxpayer does NOT want to withdraw from ICB, you must wait for the ICB decision before you complete the audit.
    - If the taxpayer DOES want to withdraw from ICB, he must send a letter to ICB notifying them of the withdrawal.
    - If taxpayer does want to withdraw from ICB, verify that all tax was paid and submit the audit as PD.

2) For the Audit Amnesty Liability and the Taxpayer is not in ICB

    - Complete the audit and include the amnesty payment on your Auditor's Report. The C-17-1 must be coded as PD in an amount equal to the amnesty check and any subsequent checks.
    - If the taxpayer owes an additional liability, follow the normal procedure for notifying the taxpayer of the audit liability (i.e. send an EDA-122). The taxpayer is still allowed to file for ICB.
    - If the taxpayer does not wish to file for ICB, complete the audit in the normal fashion including the Audit Coupon, etc. in the audit file. Again, the taxpayer must pay all tax (including additional tax found in the audit) due in order to receive Amnesty on the payment made.

3) Representing the Audit Liability & for a Non-Finalized RAR during your Audit Period

    - Complete the audit INCLUDING whatever the taxpayer estimated as the increase adjustment for the non-finalized RAR (the taxpayer was to provide either a spreadsheet denoting the adjustments, or an IL-1120-X).
    - If additional tax is still owed, follow normal audit liability procedures.
    - The C-17-1 and the Auditor's Comments must identify the non-finalized RAR estimate separately from other audit changes as

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

code 211 to ensure proper coding on the BIT system. This is necessary so that when the RAR is finalized at a later date, it can be treated correctly for refunds or balance due.

4) For a Non-Finalized RAR Only

- Complete the audit including the non-finalized RAR adjustment.
- If additional tax is still owed, follow normal audit liability procedures.
- Identify the non-finalized RAR estimate on the C-17-1 as code 211.

b) Taxpayer Made an Amnesty Payment for Years in and Outside of the Audit Period

1) Taxpayer Filed An IL-1120-X Or Provided A Spreadsheet Showing The Adjustments For The Period Prior To Your Audit Period

- Audit Planning will set up tracks to handle these amended returns and payments and they are being sent to the field to verify.
- Verify that Column A matches BIT History. If it does not, correct it with an EDA-25. Also verify that amnesty payments are correct, and make changes for any necessary audit adjustments.
- If the adjustment is for a non-finalized RAR, include the RAR changes as specified by the taxpayer and review the return for any applicable IL audit adjustments.

2) Taxpayer Filed an IL-1120-X or Provided a Spreadsheet for a Period Subsequent to your Audit

- Audit Planning will set up a track that will include just the years filed for Amnesty.
- A regular Audit should be done for any applicable IL audit adjustments.
- Some taxpayers made payments that were non-amnesty payments or were Protest Act payments that stated the payment will be filed as a Protest Act suit. These are NOT to be considered for Amnesty. For the Protest Act cases, the audit must be completed and a Notice of Deficiency must be issued.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Contact your supervisor for instructions before the audit is closed.

3) System Abating 804 Penalty in Error

The Federal/State Exchange Unit (FSEU) has encountered situations where the system is abating Section 804 penalty in error. The Section 804 penalty was an original return assessment filed and paid prior to the start of amnesty. When FSEU established a subsequent liability that was paid during amnesty the system could not distinguish between the penalties assessed prior to amnesty and that assessed as a result of the FSEU subsequent liability. For these cases, FSEU should do the following:

- Override the abatement of Section 804 penalty.
- If the Section 804 penalty was subsequently refunded in error, the taxpayer should be billed for the erroneous refund.

c) Amnesty Codes

Amnesty free form codes AA, AD or AK will show on the system under AMN CD on the AGGRD screens or AMN on the SUMM screen. The code will also show on the INT, PEN, INTL, PENTL, screens etc. The amnesty indicator codes 4, 5, and 6 will be visible on BIT History in third column on page 1 under “Amnesty Code”.

- AA (4) – Indicates amnesty accepted; penalty and interest abated.
- AD (5) – Indicates amnesty denied; penalties and interest doubled.
- AK (6) – Indicates amnesty penalty and interest manually abated – not doubled. (Legal settlement, protest act cases, filed in Circuit Court, accounts receivables are for penalty and interest only or payment plan)

d) Adjusting Amnesty Accounts

- Directed Payments

- Audit payments (09) paid during the amnesty payment period show received dates within the 10/1 through 11/17/03 period (03274 through 03321 Julian dates) will have to be manually directed. Systems has to see the balance due first before it can grant amnesty.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

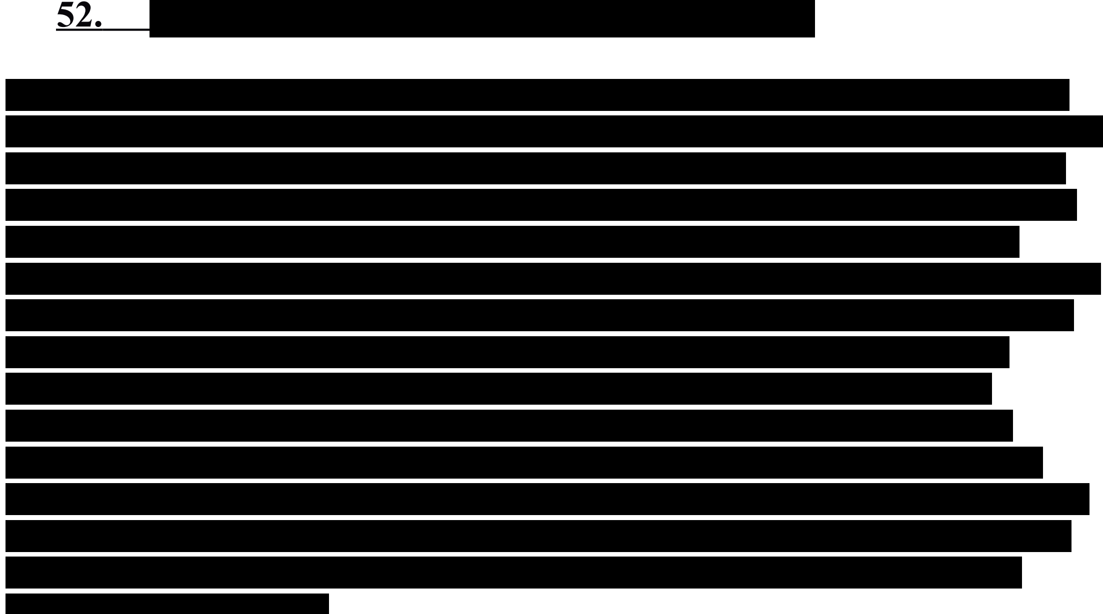
- If the taxpayer indicated that the Amnesty payment was for a non-finalized RAR, the adjustment history of the BIT will show a code "P" for partial payment. If the taxpayer indicated that the Amnesty payment was for a finalized RAR, the adjustment history of the BIT will show a code "F" for final payment.

- If an IL1120-X was filed, the adjustment type code for the Amnesty payment will be "02."

- Audit payments (25) paid during the amnesty payment period will continue to be manually directed.

- Payments (03) paid during the amnesty payment period are undirected and will have to be manually directed. Systems has to see the balance due first before it can grant amnesty.

52.



53. AMNESTY – UNIQUE AUDIT SITUATIONS

a) General Rule on Penalty Abatement at the Conclusion of an Audit

As a general rule, amnesty doubles the penalties and interest that would otherwise apply to an underpayment that is eligible for amnesty and is not paid during amnesty, but makes no other changes to the penalty provisions.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Accordingly, any penalty that would have been abated before amnesty should be abated after amnesty.

Example #1:
XYZ Corp. is under audit by the Department and the taxpayer participated in the amnesty program by remitting an amnesty payment of $1,000,000 on November 3, 2003. At the conclusion of the examination, the auditor established $2,000,000 in liability, and the taxpayer is presented with an IL-870. On the IL-870, the auditor correctly assessed 200% interest on $1,000,000, which is the difference between the $2,000,000 established in the audit, less the $1,000,000 amnesty payment. The 200% interest assessment totaled $800,000. If the taxpayer signs the IL-870 and pays the additional $1,800,000 ($1,000,000 plus double interest of $800,000) within 30 days of the IL-870 issue date, no penalty will be assessed. If the taxpayer fails to sign the IL-870 and pay the additional $1,800,000 within 30 days of the IL-870 issuance date, the amnesty will be revoked and the auditor should assess 200% interest and 200% late payment penalty on the entire $2,000,000.

If Amnesty did not exist, the auditor would have abated the late payment penalty on the additional audit liability when the taxpayer agreed to and paid the audit liability within 30 days of the IL-870 issuance date. Hence, this general rule, as stated above applies in this situation. Amnesty does not change this, if a penalty was abated prior to amnesty, it can also be abated after amnesty. However, any additional tax liability, as well as the 200% interest amount on the difference between the tax liability established and the amnesty payment must be paid in full prior to the expiration of 30 days of the IL-870 issuance date.

Example #2:
An auditor in tax discovery was assigned an examination of ABC Corp. The auditor examined 2 amended returns filed by the taxpayer, the first amended return was filed on November 3, 2003 reporting and paying $100,000 estimating a pending RAR adjustment. The RAR adjustment was finalized on December 31, 2006 generating Illinois tax due of $150,000. A second amended return was filed on June 30, 2007 reporting and paying the additional tax of $50,000 based on the finalized RAR. When the auditor examined these returns, she correctly presents an IL-870 to the taxpayer assessing 200% interest and 200% late payment penalty on a base of $50,000, which is the difference between the finalized RAR liability of $150,000 and the $100,000 amnesty payment. Since the taxpayer did not file the 2nd amended return reporting and paying on the finalized RAR

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

adjustments within 120 days, a 200% late payment penalty should be imposed on the $50,000 difference. If the taxpayer does not satisfy the entire assessment established on the IL-870 within 30 days of issuance, the amnesty is revoked and 200% of interest and late payment penalty will be computed on the entire $150,000.

These examples illustrate the application of the general rule on penalty abatement at the conclusion of an audit.

54. AMNESTY REFUND CRITERIA

The Department has established narrow guidelines that allow for any refunds of amnesty payments. There are limited situations where the Department will refund tax in a year in which an amnesty payment was made.

a) Refunds due to a Federal RAR

If the IRS finalizes an audit that reduces tax in a year in which an amnesty payment was made, any overpaid Illinois Income Tax may be refunded for that year. However, per Section 911(a)(1) of the IITA, as well as FY Bulletin 2005-10, a refund claim must be filed within the latter of:

1) three years from the date the original return was filed for the taxable year,

OR

2) one year after the payment was made.

If the Federal audit is finalized subsequent to both of the above stated dates, no refund will be allowed unless the taxpayer filed a timely claim for refund (protective claim), or the statute has been held open by a timely filed waiver (IL-872).

b) Overestimated audit liabilities

If a taxpayer was under audit by the Department and estimated the audit liability because the audit could not be completed prior to the close of amnesty, a refund of any overestimated “amnesty” tax paid, as well as any other payments made during the year, can be issued. However, the taxpayer **MUST** agree to the audit findings in order for the refund to be issued.

- **If the taxpayer fails to sign the IL-870, agreeing to the audit findings, no refunds will be issued.**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

c) Math errors

If a taxpayer filed an amnesty amended return, with remittance, and the amended return contained a math error generating an overpayment, the Department will allow the overpayment to be refunded.

d) *Amnesty* Refund Examples

Example #1:

The taxpayer filed an amended return on November 13, 2003 for the 12/31/1996 period with an amnesty payment of $1,500. The November 13, 2003 amended return estimates a pending RAR adjustment that has yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the November 13th amended return. The filing date of the original return occurred on 10/15/1997. On January 15, 2005, the taxpayer files another amended return reporting the RAR adjustments that were finalized on 12/15/2004. The January 15, 2005 amended return is claiming a $500 overpayment of the original $1,500 amnesty payment. The following table illustrates the taxpayer's amended return filings:

Description (APE =12/31/1996):	Amount
Amended return # 1 – Amnesty return:	
Apportioned Illinois business Income (Per original return – as filed) (column A)	$7,850
Net Change reported- estimated RAR increase (column B)	$21,000
Apportioned Illinois business income (as corrected) (column C)	$28,850
Total tax paid- (per original return – as filed) (column A)	$492
Net change- Amnesty Payment	$1,508
Total tax paid- (as corrected) (column C)	$2,000
	Amount
Amended return # 2 – Reporting finalized RAR:	
Apportioned Illinois business Income (Per amend rtn. #1- Column C= Amend. rtn. column A)	$ 28,850
Net Change reported- (RAR increase from orig. filing, decrease from amnesty amend. rtn. #1)	$ (6,962)
Apportioned Illinois business income (as corrected) (column C)	$ 21,888
Total tax paid- (as corrected from amend. rtn #1- Column C)	$ 2,000
Net change- Requesting partial refund of amnesty payment	$ (500)
Total tax liability- (as corrected – per finalized RAR)	$ 1,500

Analysis:

The amended return claiming the overpayment of $500 is denied for the following reasons:

1 The $500 claim was filed beyond the 3-year filing date of the original return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2 The $500 claim was filed beyond 1 year from the amnesty payment date of 11/13/2003.

3 A Waiver (IL-872) was not secured within 1 year of the amnesty payment date (11/13/2003), which would have extended the period for filing a refund claim.

In this example, if the taxpayer secured an IL-872, or filed a “protective claim”, within 1 year of the amnesty payment, the $500 refund would have been allowed.

Example #2: The taxpayer filed an amended return on November 13, 2003 for the 12/31/1996 period with an amnesty payment of $1,500. The November 13, 2003 amended return estimates a pending RAR adjustment that has yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the November 13th amended return. The filing date of the original return occurred on 10/15/1997. On January 15, 2005, the taxpayer files another amended return reporting the RAR adjustments that were finalized on 12/15/2004. The January 15, 2005 amended return is claiming the entire refund of $1,500 paid with the amnesty return. The following table illustrates the taxpayer’s amended return filings:

Description (APE =12/31/1996):	Amount
Amended return # 1 – Amnesty return:	
Apportioned Illinois business Income (Per original return – as filed) (column A)	$ 7,850
Net Change reported- estimated RAR increase (column B)	$21,000
Apportioned Illinois business income (as corrected) (column C)	$28,850
Total tax paid- (per original return – as filed) (column A)	$ 492
Net change- Amnesty Payment	$1,508
Total tax paid- (as corrected) (column C)	$ 2,000
Amended return # 2 – Reporting finalized RAR:	**Amount**
Apportioned Illinois business Income (Per amend rtn. #1- Column C= Amend. rtn. column A)	$ 28,850
Net change reported- (No change adj. from finalized RAR, decrease from amnesty return #1)	$ (21,000)
Apportioned Illinois business income (as corrected) (column C)	$ 7,850
Total tax paid- (as corrected from amend. rtn #1- Column C)	$ 2,000
Net change- Requesting full refund of amnesty payment	$ (1,508)
Total tax liability- (as corrected – per finalized RAR)	$ 492

Analysis:

The amended return claiming the overpayment of $1,508 is denied for the following reasons:

1 The $1,508 claim was filed beyond the 3-year filing date of the original return.

2 The $1,508 claim was filed beyond 1 year from the amnesty payment date of 11/13/2003.

3 A Waiver (IL-872) was not secured within 1 year of the amnesty payment date (11/13/2003), which would have extended the period for filing a refund claim.

In this example, if the taxpayer secured an IL-872, or filed a “protective claim”, within 1 year of the amnesty payment, the $1,508 refund would have been allowed.___

Example #3:
The taxpayer filed an amended return on November 13, 2003 for the 12/31/1996 period with an amnesty payment of $1,500. The November 13, 2003 amended return estimates a pending RAR adjustment that has yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the November 13th amended return. The filing date of the original return occurred on 10/15/1997. On January 15, 2005, the taxpayer files another amended return reporting the RAR adjustments that were finalized on 12/15/2004. The January 15, 2005 amended return is claiming a $1,750 overpayment, consisting of the $1,500 original amnesty payment along with an additional $250 from the finalized RAR. The following table illustrates the taxpayer’s amended return filings:

Description (APE =12/31/1996):	Amount
Amended return # 1 – Amnesty return:	
Apportioned Illinois business Income (Per original return – as filed) (column A)	$7,850
Net Change reported- estimated RAR increase (column B)	$21,000
Apportioned Illinois business income (as corrected) (column C)	$28,850
Total tax paid- (per original return – as filed) (column A)	$492
Net change- Amnesty Payment	$1,508
Total tax paid- (as corrected) (column C)	$2,000

RAR – finalized 4549 report- Finalized – 12/15/2004	Amount
Federal taxable income – as filed	**$ 7,850**
Federal Audit Adjustments	**$ (3,375)**
Federal taxable income – as corrected	**$ 4,475**

Amended return # 2 – Per taxpayer:	
Apportioned Illinois business Income (Per amend rtn. #1- Column C= Amend. rtn. column A)	$ 28,850
Net Change reported- (Taxpayer attempting to recoup RAR difference)	$ (24,375)
Apportioned Illinois business income (as corrected) (column C)(reconciling to corrected FTI)	$ 4,475
Total tax paid- (as corrected from amend. rtn #1- Column C)	$ 2,000
Net change- Requesting full refund of amnesty payment, along with partial refund of orig. tax pd.	$ (1,750)
Total tax liability- (as corrected – per finalized RAR)	$ 250

Analysis:

The amended return claiming the overpayment of $1,750 is **partially denied** for the following reasons:

1 The $1,750 claim was filed beyond the 3-year filing date of the original return.
2 The $1,750 claim was filed beyond 1 year from the amnesty payment date of 11/13/2003.
3 A Waiver (IL-872) was not secured within 1 year of the amnesty payment date (11/13/2003), which would have extended the period for filing a refund claim.

Of the $1,750 overpayment that the taxpayer is claiming, only **$242** would be allowed. The column C amounts from the **amnesty amended return** become the "as Filed ", "column A" amounts for the **2nd amended return**. The refund is limited by the Federal 4549 decrease to Federal Taxable Income reported from the finalized RAR report. Any subsequent claim adjusting the **amnesty amended return** would be **LIMITED** to the **CHANGE** reported within the finalized RAR report. In this situation, the corrected Federal Taxable income per the Finalized RAR report will **generally not reconcile** to Federal Taxable income reported to the corrected IL-1120 filings. The calculation for the **$242** refund is as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

	COLUMN A	NET CHANGE	COLUMN C
Federal Taxable Income	28,850	(3,375)	25,475
Less: Exemption Amt.	(1,000)		(1,000)
Net Income	27,850	(3,375)	24,475
Income & Replacement tax	2,033	246	1,787
Less: Rep. Tax Paid Cr.	(33)	(4)	(29)
Total Inc. & Replacement tax	2,000	242	1,758

In this example, if the taxpayer secured an IL-872, or filed a "protective claim", within 1 year of the amnesty payment, the originally claimed $1,750 refund would have been allowed.

55. AMNESTY AND RESTRICTED INTEREST

"Restricted interest" is a term which is used by various areas of the Department to identify the date of overpayment for interest computation purposes in situations in which an overpayment is claimed due to the carrying of either a federal loss, Illinois net loss or Illinois excess credit.

Restricted interest can also be "assessed" in a field audit situation, where the IDOR auditor has established an additional tax liability and then offset, either a portion, or the total additional liability, with an Illinois NLD carry back. In this type of circumstance, a restricted interest assessment would be generated by Springfield, after the audit was submitted for processing.

Under the amnesty program, if the total additional tax liability was satisfied by means of an amnesty payment, as well as an offset from an Illinois net operating loss deduction that restricted interest assessment would be abated. The following example illustrates this situation:

Example:

In June of 2003, ABC Corporation was under an IDOR field audit. On November 13, 2003, ABC Corporation made an amnesty payment of $657,747 paying the entire field audit liability under the Amnesty program. Since the taxpayer paid all the balance due for 1996 and 1997, all interest and penalties, including restricted interest, was abated.

	12/31/96	12/31/97	12/31/98
Base income as originally filed	(2,639,952)	219,309	(11,939,263)
Base Income per audit	42,467,052	7,969,850	(6,366,900)
Tax due before loss carryback	636,999	N/A	N/A
Tax due after loss carryback (from 12/98)	541,495		
Tax Due on IL-870 and paid under amnesty	541,495	116,252	0
Amount on which restricted Interest would have been billed: (636,999-541495 = 95,504)	95,504		

In this example, the taxpayer would have received a “restricted interest” assessment on the $95,504. Since the taxpayer satisfied the entire liability with the $541,495 amnesty payment, along with the Illinois NLD offset from the 12/98 period, the restricted interest assessment on the $95,504 is abated.

56. APPLICATION OF LOSSES AND CREDITS – AMNESTY EXAMPLES

The following examples analyze the Department’s position on how to handle losses and credits in a Federal change situation:

a) Loss Scenario

The taxpayer filed an amended return on November 13, 2003 for the 12/31/1996 period with an amnesty payment of $1,500. The November 13, 2003 amended return estimates a pending RAR adjustment that has yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the November 13th amended return. The taxpayer is estimating an RAR increase for the 12/96 period and anticipating an RAR decrease for the 12/97 period. Since the taxpayer is expecting an RAR decrease for 12/97, no amnesty amended return was filed. The taxpayer intends to file the 12/97 amended return when the RAR is finalized. The filing dates for the original returns occurred on 10/15/1997 and 10/15/1998, respectively. On January 15, 2005, the taxpayer files 2 amended returns reporting the RAR adjustments that were finalized on 12/15/2004. The first amended return, filed on January 15, 2005, is for the 12/96 period claiming an Illinois NLD carryback from the 12/97 period. The Illinois NLD carryback was claimed from a finalized RAR decrease for 12/97. The second amended return filed on January 15, 2005 is for the 12/97 period claiming a refund due to the finalized RAR. The following table illustrates the taxpayer’s amended return filings (assumes 100% Illinois apportionment):

AMNESTY 1120X – 12/96	COLUMN A	NET CHANGE	COLUMN C
Business income apportionable to Illinois	50,000	20,890	70,890
Less: Illinois NLD	(0)	(0)	(0)

Net Income	4,000		
Income & Replacement tax	292		-0-
Less: Rep. Tax Paid Cr.	(5)		
Total Inc. & Replacement tax	287	(287)	-0-

Analysis:

The $4,667 - 12/96 refund claimed on the amended return filed on January 15, 2005 will be allowed, even though an amnesty payment was made reporting an estimated increase to an RAR. Generally, when a taxpayer makes an amnesty payment, the year is considered closed. However, since the Illinois loss was

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

generated from an RAR decrease in 12/97, the taxpayer is allowed to claim that created Illinois loss to the 12/96 period. Although the taxpayer made a $1,500 amnesty payment for 12/96, the RAR generated loss for 12/97 allows the entire $4,667 refund to be allowed.

b) Illinois Credit Scenario

The taxpayer filed an Amended return on November 13, 2003 for the 12/31/1996 period with an amnesty payment of $1,500. The November 13, 2003 amended return estimates a pending RAR adjustment that has yet to be finalized. The taxpayer did not provide a Waiver (IL-872) with the November 13th amended return. The taxpayer is estimating an RAR increase for the 12/96 period and anticipating an RAR decrease for the 12/95 period. Since the taxpayer is expecting an RAR decrease for 12/95, no amnesty amended return was filed. The taxpayer intends to file the 12/97 amended return when the RAR is finalized. The filing dates for the original returns occurred on 10/15/1996 and 10/15/1997, respectively. On January 15, 2005, the taxpayer files 2 amended returns reporting the RAR adjustments that were finalized on 12/15/2004. The first amended return, filed on January 15, 2005, is for the 12/96 period claiming an additional Illinois RT investment credit due to an RAR change that occurred in the 12/95 period. The second amended return filed on January 15th, 2005 is for the 12/95 period reporting a finalized RAR. The following table illustrates the taxpayer's amended return filings (assumes 100% Illinois apportionment):

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

AMNESTY 1120X – 12/96	COLUMN A	NET CHANGE	COLUMN C
Business income apportionable to Illinois	100,000	20,890	120,890

Income & Replacement tax	292		0
Less: Rep. Tax Paid Cr.	(5)		
Less. Rt Investment Tax Credit	(287)	287	0
Total Inc. & Replacement tax	0		0

Analysis:

The **$287** refund claimed on the 12/96 amended return filed on January 15, 2005 will be **allowed,** even though an amnesty payment was made reporting an estimated increase to an RAR. Generally, when a taxpayer

makes an amnesty payment, the year is considered closed. However, due to the **RAR** decrease reported in 12/97, the originally claimed Illinois Enterprise Zone Investment Tax credit can now be utilized for 12/96.

Pay eligible tax liabilities October 1, 2010, through November 8, 2010, and the penalty and interest charges will be waived.

The Illinois Department of Revenue is notifying you of the 2010 Illinois Tax Amnesty program because either an audit has recently been completed, is currently in process, or you have been selected for a possible audit. The 2010 Illinois Tax Amnesty program provides a limited opportunity for you to pay eligible tax liabilities and to have penalties and interest waived for the taxes paid in full.

What tax liability qualifies? *An eligible tax liability is unpaid tax for periods ending after June 30, 2002, and prior to July 1, 2009. If you failed to file a tax return or incorrectly reported liability due on a previously filed return for these tax periods, now is the time to make corrections and pay the tax. Liabilities that consist of only penalty and interest are* ***not*** *eligible.*

Payment must be made October 1, 2010, through November 8, 2010, using the following instructions.

- If an audit has recently been completed, or will be completed prior to the close of amnesty on November 8, 2010, you must pay the full amount of audit tax liability.
- If an audit is currently in process and cannot be completed prior to the close of amnesty on November 8, 2010, estimate the tax liability due, file the appropriate return, and pay the tax balance in full. Contact your Illinois Department of Revenue auditor for additional information. Please note that if the final audit tax liability exceeds the paid estimate, double penalties and interest may apply.
- If you are not under an audit, please review your accounts and file original or amended returns and pay any unpaid tax liability in full. If you are audited in the future, you must pay in full any additional audit tax liability or the full amount may be subject to double penalties and interest.

If an eligible tax liability is paid in full October 1, 2010, through November 8, 2010, penalty and interest will be waived.

Warning! If you do not pay your eligible tax in full, penalty and interest charges may double.

For more information on the 2010 Illinois Tax Amnesty program, visit our web site at **tax.illinois.gov**. If you have questions about your account, please call us weekdays from 8:00 a.m. to 4:30 p.m. at <variable 2 Audit phone number >.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

To pay liability

You may choose from the following options to pay "Amnesty Eligible Tax Liability".

- *Mail* us your payment with your return. Mail the return and payment to Illinois Department of Revenue, <PO Box 19012, Springfield IL 62794-9012 or PO Box 19020, Springfield, IL 62794-9020 - ***customs only***> Do not mail cash. Make your payment payable to the "Illinois Department of Revenue."
  To qualify for the 2010 Tax Amnesty program, mail
  must be postmarked with a date from the period of October 1, 2010, through November 8, 2010.
- *Pay in person* -
  - *Checks or guaranteed remittances* are accepted at **any** Illinois Department of Revenue office location: 1) district offices (for a list of locations visit our web site at **tax.illinois.gov** or call us); 2) JRTC Building, 100 West Randolph Street, Chicago, IL 60601; or 3) Willard Ice Building, 101 West Jefferson Street, Springfield, IL 62702.
  - *Cash* is **only** accepted at the following two Illinois Department of Revenue locations: the cashier's office in the JRTC Building, Concourse level, 100 West Randolph Street, Chicago, IL 60601, *or* in the Willard Ice Building, 101 West Jefferson Street, Springfield, IL 62702.

To file an original return

For each applicable tax period, complete a return, attach any required supporting documentation, and pay the tax balance for each return in full. The eligible tax liability reported on each return should be paid with a separate check or guaranteed remittance. See the return for further instructions. Mail the return and payment to Illinois Department of Revenue, <PO Box 19012, Springfield IL 62794-9012 or PO Box 19020, Springfield, IL 62794-9020 - ***customs only***>. Do not mail cash. Make your payment payable to the "Illinois Department of Revenue." To qualify for the 2010 Illinois Tax Amnesty program, mail must be postmarked with a date from the period of October 1, 2010, through November 8, 2010.

To make corrections

For each applicable tax period, complete an **amended** return, attach any required supporting documentation, and pay the tax balance for each return in full. The eligible tax liability reported on each return should be paid with a separate check or guaranteed remittance. See the return for further instructions. Mail the return and payment to Illinois Department of Revenue, <PO Box 19012, Springfield IL 62794-9012 or PO Box 19020, Springfield, IL 62794-9020 - ***customs only***>. Do not mail cash. Make your payment payable to the "Illinois Department of Revenue." To qualify for the 2010 Illinois Tax Amnesty program, mail must be postmarked with a date from the period of October 1, 2010, through November 8, 2010.

Federal Bankruptcy Court

If you are currently under the protection of the Federal Bankruptcy Court, contact us and provide the bankruptcy number and the bankruptcy court. You may participate in the 2010 Illinois Tax Amnesty program only if the court allows you to do so. Failure to pay a liability eligible for amnesty will not subject you to double penalties and interest. The bankruptcy "automatic stay" does not relieve your obligations to file tax returns.

This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXHIBIT B – 2003 AMNESTY LETTER

Illinois Department of Revenue

Tax Amnesty Program — Audit Liability

Taxpayer Name
Address
City, State, Zip

Date:
Taxpayer ID:
Track #:
Tax Types(s):

Dear Taxpayer:

The Illinois Tax Delinquency Amnesty Act was recently signed into law. This tax act could impact your account favorably. As a part of our ongoing audit process, your account is either currently under audit, has had an audit completed but not yet processed, or has been selected for a possible audit to begin within the next several months.

The Illinois Tax Delinquency Amnesty Act provides a limited opportunity for taxpayers to pay outstanding tax liabilities and to have related interest and penalties forgiven for the taxes paid during the amnesty payment period.

To qualify for the amnesty program you must

- have tax liability due for a period(s) ending after June 30, 1983, and prior to July 1, 2002;
- **not** be a party to a criminal investigation or have a civil or criminal litigation pending for any tax collected by the Illinois Department of Revenue: and
- make full payment of all amnesty tax liabilities during the amnesty payment period of **October 1, 2003, through November 17, 2003.**

Liabilities **not** covered by amnesty include

- tax periods ending on or before June 30, 1983, and ending on or after July 1 2002;
- audits that have been protested and are currently in court;
- any accepted offer in compromise or legal settlement;
- lien filing and lien release fees; and
- bad check penalties.

To participate in the amnesty program, please follow the instructions for your situation.

Recently completed audit or audit to be completed by November 17, 2003

If an audit has recently been completed but is not yet processed or paid, or the audit will be completed prior to the close of amnesty on November 17, 2003, you must make full payment of the audit tax liability during the amnesty payment period to have the penalties and interest forgiven. Send your payment and the completed payment coupon to your IDOR auditor.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Audit in Process

If the audit is currently in process, and it cannot be completed prior to the close of amnesty, you may still participate in amnesty. Please determine an estimate of the liability due and contact your IDOR auditor. Provide the auditor with a spreadsheet showing the line changes you have made to arrive at the estimate. You must then make full payment of that amount during the amnesty payment period in order to participate in the program. Send your payment and the completed payment coupon to your IDOR auditor. If an additional liability results at the close of the audit, interest and penalties will be **doubled** on the liability not covered by the estimate. If the final audit liability is less than the estimated amount paid during amnesty, the difference will be refunded with interest from the payment date. If you do not pay the additional liability at the end of the audit, your amnesty status will be revoked and the entire audit liability will be subject to double interest and penalties.

Selected for a possible audit, or audit not yet started

If you have been selected for a possible audit or you have been notified that an audit will be conducted but it has not been started, and will not be started before the close of amnesty, you may still participate in the Amnesty Program. Determine an estimate of your liability. If you have been previously audited, you can use your prior audit results as an estimate, or you may make your own good faith estimate. Provide detailed information on a spreadsheet showing the changes used to arrive at your estimate. For income tax, you must provide an amended return reflecting the changes that you estimate. For sales tax no return is required. Send your payment for the estimated amount of tax liability and the completed payment coupon to the address below. After the audit is completed, any additional liability over the estimate will be assessed double interest and penalties. This additional liability must be paid in full at the conclusion of the audit, or amnesty will be revoked and double penalties and interest will be assessed on the entire audit liability. If the final liability is less than your estimated amount, the difference will be refunded.

Non-filed original or amended returns

If you have a non-filed original or amended return (such as for an RAR) that will not be included in the audit, complete the return(s) and write, "AMNESTY" across the top. Within the amnesty payment period, send the return to the address below along with the enclosed completed payment coupon, and the full amount of the tax liability shown on the return.

Payment options available

- electronic funds withdrawal/transfer - please contact the auditor (or the number below if you have not been contacted by an auditor) for instructions;
- cash, check, or money order sent with the enclosed payment form.

Note: Do **not** mail cash.

Bankruptcy:

If you are under the protection of the Federal Bankruptcy Court, please contact us and provide the bankruptcy number and the bankruptcy court. The bankruptcy "automatic stay" does not relieve your obligation to file tax returns.

Amnesty conditions and terms of agreement:

By making a payment during the Illinois Tax Amnesty program dates of October 1 to November 17, 2003, for a tax period covered by the program, a taxpayer affirms and agrees

- to give up any right to contest the tax paid under amnesty,
- to give up any right to a refund or to protest the denial of any refund claim of an amnesty payment; and
- that any credit or refund of tax paid under amnesty is limited to computational error or overpayment, as determined by the department.

All amnesty payments must be received between October 1, 2003, and November 17, 2003. Otherwise, they will not qualify.

Please note that the Illinois Tax Delinquency Amnesty Act provides that penalties and interest charges will be **doubled** if an eligible taxpayer fails to satisfy the tax liability during the amnesty payment period.

For more information on the 2003 Illinois Tax Amnesty program, visit our Web site at **www.ILtax.com**. If you have questions about your account, please call us weekdays between 8:30 a.m. and 4:30 p.m. at
217 524-0434.

Springfield IL 62794-9012

EXHIBIT D – 2003 BIT OFFSET AUTHORIZATION LETTER

I, _______________, Inc., FEIN: _ _ - _ _ _ _ _ _ _ _ authorize the assignment of the Business Income Tax overpayment(s) from the following tax year(s):

Tax Year	_ _/_ _ _ _	$ 00,000.00
Tax Year	_ _/_ _ _ _	$ 00,000.00

To the audit tax liability of ___________________, Inc., * See below instructions.

Period	_ _/_ _ _ _	$ 00,000.00
Period	_ _/_ _ _ _	$ 00,000.00

_________________________________ ____________________

Signature of Authorized Officer Date

- For the applicable tax type insert the following information in place of the asterisk: Taxpayer ID #, the period needs the correct date format and the liability dollar amount. The audit liability should include tax, interest and any applicable penalties. For income tax interest computations, contact the Audit Perfection Supervisor to determine the correct amount.

Business Income Tax (BIT)

FEIN: _ _-_ _ _ _ _ _ _ _

Period: MM/YYYY
Audit Liability for each year in the amount of $00,000.00.

Withholding Tax (WIT)

FEIN: _ _-_ _ _ _ _ _ _ _

Period: Qtr/YYYY

Audit Liability for each quarter in the amount of $00,000.00

Sales Tax (ROT) & (MISC)

IBT#: _ _ _ _-_ _ _ _

Period: MM/YYYY through MM/YYYY for the audit period.
Audit Liability for the number of months in the audit period in the amount of $00,000.00

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXHIBIT E – 2003 AMNESTY CLAIM DENIAL LETTER

If a taxpayer attempts to file refund claims in periods where they participated in the Amnesty program, the auditor should present an Amnesty claim denial letter using the language in the following example as a guideline:

Dear Taxpayer:

This letter acknowledges that we have received your IL-1120X returns, dated <date> which you submitted to amend your State taxes for <period(s)>. Our records reflect that you elected to participate in the State's Tax Delinquency Act ("Amnesty") for the tax period(s): <period(s)>. 35ILCS 745/10.

By your participation in Amnesty, you affirmed and agreed to all of the conditions contained in 86 Ill. Admin. Code 521.105(c). Specifically you agreed to: 1) relinquish all rights to contest the tax liability that is being paid; 2) not claim a refund of the money paid or protest the Department's denial of such a claim, except as expressly provided in 86 Ill. Admin. Code 521.105; 3) promptly correct any underpayment of tax liability; and 4) forgo any right you may have to withdraw from Amnesty.

Pursuant to your agreement to all of these conditions your return(s) cannot be reviewed or processed.

If you should have any questions, I can be reached at <phone #>, Fax #: <fax #>. Or you can email me at the following e-mail address: <email address>.

Sincerely,

<auditor name>
<auditor title>
Illinois Department of Revenue
<auditor address>

III. GENERAL INFORMATION

This chapter has been redesigned to show the steps involved in an Income Tax audit. The majority of taxpayer information can be found in GenTax. However, non-converted tax period information and BIT converted information detail is available in Legacy PDF Display – see Exhibit C, How to Locate Payment Information in GenTax and Legacy PDF Display.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note: Both IRIS (previous Mainframe/Legacy system information prior to GenTax) and Panagon (purged return information not available in IRIS) are no longer accessible. Legacy PDF Display has replaced both programs as the source for this type of taxpayer's financial information. See AM Chapter 46 for details for using Legacy PDF Display.

With version updates to GenTax, new terminology may be seen. The term "View" is in reference to, and can be used in place of, the term "Springboard". Example: Previously, a reference would be to the Audit Springboard, but the new reference may be Audit View instead.

- Throughout the chapter this "bullet style" has been used to indicate when an Exhibit should be reviewed at the end of the chapter. All Exhibits have been "hyperlinked", which is indicated in blue text.

A. PRIORITY AUDITS

Mandatory audits, claim audits, random audits, CID (Criminal Investigation Division) referrals and Director/Management requests receive priority treatment. Priority audits will be worked in lieu of other cases, whenever possible.

Statute expiration dates must be monitored, and action taken to finalize audits or secure waivers when necessary. Auditors must notify their supervisor regarding situations where time frames will not be met and indicate what actions are planned on the audit.

B. AGED CASES

Aged audits will be monitored, and status comments will be kept up-to-date with realistic estimated completion dates.

Level 1 & 9 Audits	Number of days aged equals **480** days old
Level 2 Audits	Number of days aged equals **600** days old
Level 3 Audits	Number of days aged equals **730** days old

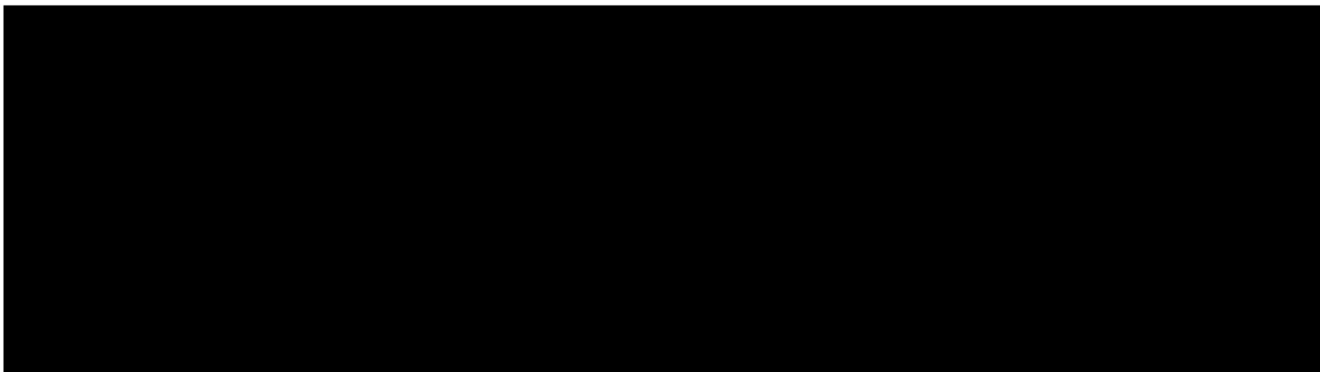
C. ESTIMATED DATE OF COMPLETION (EDC)

Auditors are required to establish an estimated date of completion (EDC) for **all** audits in GenTax.

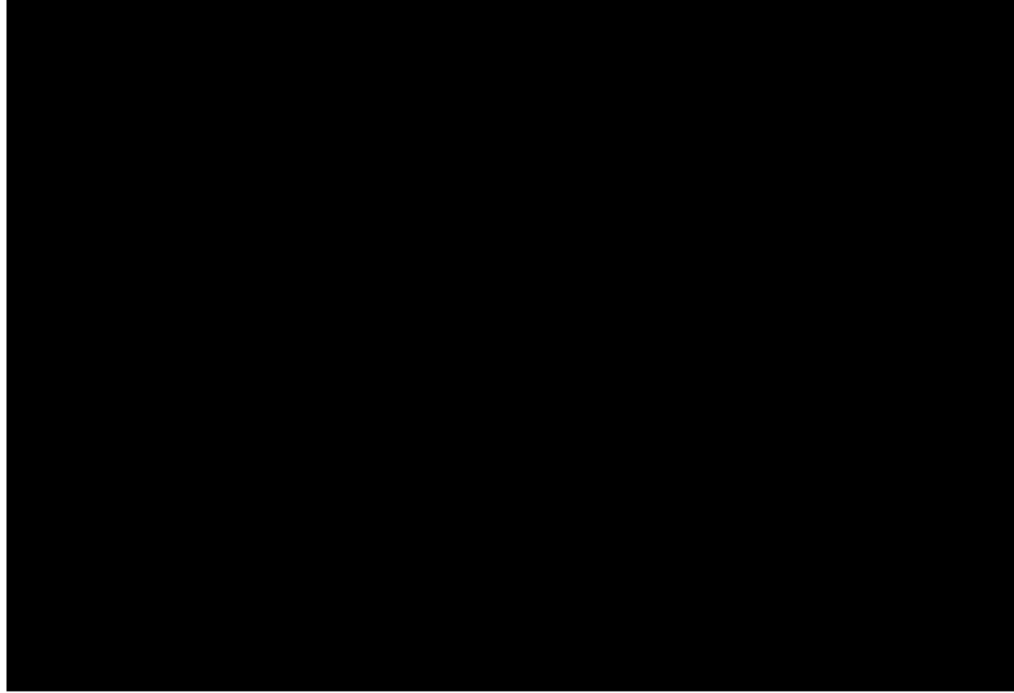
This date should be determined based on the work yet to be completed. **The date should not be continually changed.** Upon initiation, provide a realistic estimate of how long the audit will take from beginning to end. In the event an audit takes longer to complete than originally estimated, supervisors will assist the auditor in developing a documented action plan to complete the audit.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

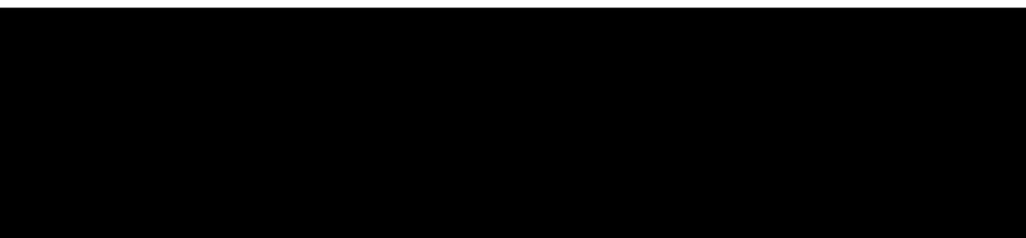
The Work Date on the Audit Springboard in GenTax is to be used to populate the EDC. In this example a business audit view is used, however, the "Work Date" field is in the same location on the audit view for all tax types. Click on the "Add" in the "Work Date" field to open the Change Audit Detail screen.



Enter the ECD in the Work Date box, and then click the OK button.



Work Date on the Audit Springboard will then be populated with the date entered.



D. STATUTE CONTROL

The major factor that affects the proper completion and processing of an audit is the statute date. Auditors **must** monitor all statute dates in order to ensure that the statute is not lost. An extensive explanation about statutes can be found in Chapter 21, which examines due dates, extensions, and statute control.

E. INCOME TAX RATES

Public Act 76-261 established the Illinois Income Tax Act (IITA) effective August 1, 1969. IITA § 201(a) imposes the tax, while § 201(b) governs the rates.

ILLINOIS INCOME TAX RATE HISTORY

Date	Public Act	Years Affected	Corp Tax Rate	Individual Tax Rate
August 1, 1969	PA 76-261	8/1/69 to 12/31/82	4%	2.5%
July 1, 1983	PA 83-014	1/1/83 to 6/30/84	4.8%	3.0% - temporary
September 19, 1985	PA 84-604	7/1/84 to 6/30/89	4%	2.5%
July 5, 1989/ July 1, 1991	PA 86-018/ PA 87-017	7/1/89 to 6/30/91 7/1/91 to 7/1/93	4.8%	3.0% - temporary/ extended
July 1, 1993	PA 88-089	7/1/93 to 12/31/10	4.8%	3.0% - permanent
January 13, 2011	PA 96-1496	1/1/11 to 12/31/14 1/1/15 to 12/31/24	7.0% - temporary 5.25% - temporary	5.0% - temporary 3.75% - temporary
July 6, 2017	PA 100-022	1/1/15 to 6/30/17 7/1/2017	5.25% 7.0%	3.75% 4.95%

Note: Individual tax rate also applies to trusts and estates.

Tax Rate Change in Taxpayer's Taxable Year

If a tax rate change occurs during a taxpayer's taxable year, the income is prorated for the number of days before and after the rate change. In order to prorate the income during the two rate periods, taxpayers may either elect to use:

- a number-of-days method or
- a specific accounting method.

The election must be made by the due date of the return (including extensions) and is irrevocable.

a) Number-of-days Method

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the taxpayer elects the number-of-days method to prorate income, the number of days in each portion of the tax year (i.e. before and during the rate increase period or during and after the increase period) is divided by the total number of days in the tax year.

Proration tables appear in the instructions to the Illinois returns for the years in which the rate increase was in effect.

b) Specific Accounting Method

If the taxpayer elects to use the specific accounting method, Schedule SA must be attached to the Illinois return. Schedule SA specifically allocates income and expense items to the portion of the tax year in which they were paid, incurred or accrued. Detailed accounting records must be maintained to support the computations, and estimates are not permitted.

Schedule SA can be accessed on the Department's website (or Illinois Package X's for earlier years) for the periods in which the rate increase was in effect. Ref: Schedule SA and instructions.

F. REPLACEMENT TAX RATES

Replacement Tax rates are governed by IITA § 201(d) and were established through PA 81-1stSS-1.

ILLINOIS REPLACEMENT TAX RATE HISTORY

Date	Public Act	Years Affected	Corp Rate	Others Rate
July 1, 1979	PA 81-1stSS-1	7/1/79 to 12/31/80	2.85%	1.5%
January 1, 1981		1/1/1981 to	2.5%	1.5%

Note: Others rate of 1.5% applies to a partnership, trust or S corporation. Replacement tax is not applicable to individuals or estates.

Tax Rate Change in Taxpayer's Taxable Year

The same policy applies for a replacement tax rate change as an income tax rate change as provided above. Refer to the information in Section E above concerning number-of-days method and specific accounting method.

If the taxpayer elects to use the specific accounting method, Schedule B (Schedule R in 1980) must be attached to the Illinois return. Schedule B (or R) specifically allocates income and expense items to the portion of the tax year, in which they were paid, incurred or accrued. Detailed accounting records must be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

maintained to support the computations, and estimates are not permitted. Schedule B (or R) can be found in Illinois Package X's for the affected periods.

G. GENTAX FEDERAL TAX INFORMATION (FTI) BANNER

This information was moved to Audit Manual Chapter 1.

H. TRANSMISSION OF AUDIT FILE INFORMATION

With the advent of "electronic audits" (see table below), audit file information should be sent **electronically**. If this is not possible for some reason [dealing with large old paper audits], then a paper copy can be sent via **UPS** per Department policy – do not send audit file information through regular USPS mail. Electronic transmission is the preferred method, where applicable. Please refer to Chapter 2, General Audit Procedures.

Audit Time Frame	Type of CAF	Storage Area
Audits initiated after 10/31/2017	Electronic	GenTax – CRM Electronic Documents tab
Audits TYs 2011 and prior to 11/1/2017	Electronic	Tiamat – network storage area
Audits prior to TY 2011	Paper	Paper audits/CAFs – Stores in House

IV. PRELIMINARY AUDIT PREPARATIONS

A. ACCESSING AUDIT INVENTORY

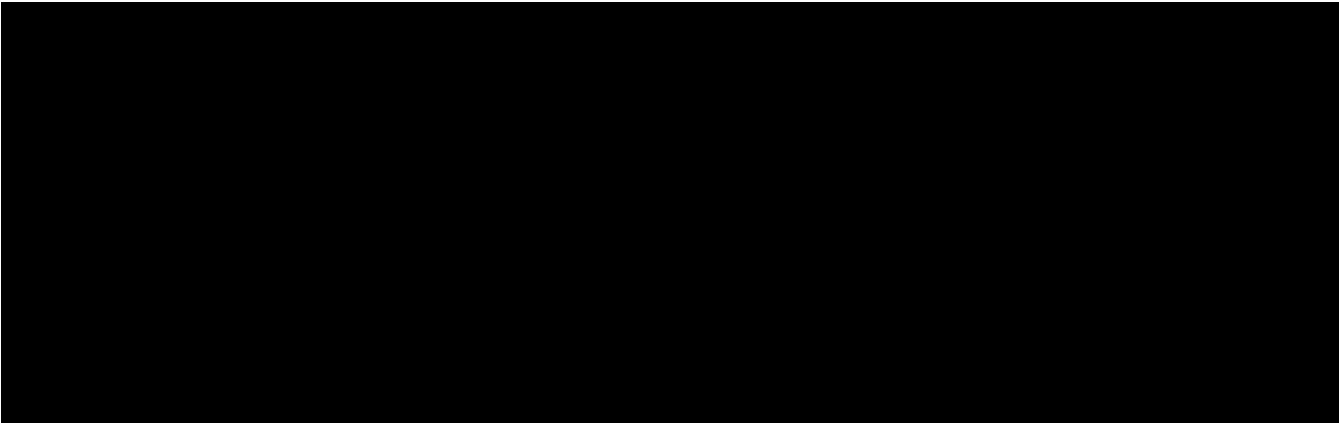
Supervisors assign available audits to their audit staff. Audit inventory can be accessed through several pathways in GenTax.

1. My Work Manager

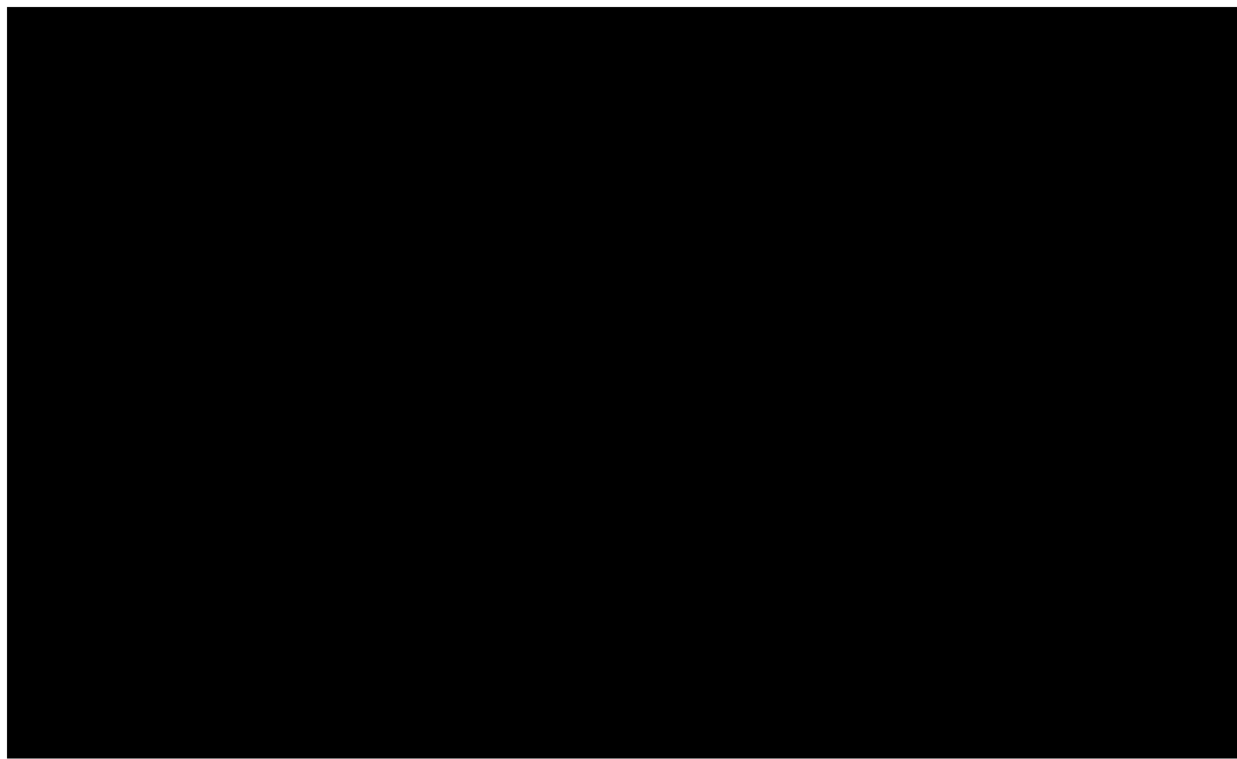
For quickest access click on the My Work Manager icon found in the New Manager screen.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The My Work Manager will open showing the audits that have been assigned. The audit track number under 'Task" is hyper-linked to allow access into the audit details screen. Click on the audit track number to open that particular audit.



The audit details appear for that audit.



2. Extract File for Audits in APT

When an auditor is assigned a new audit to be completed in APT (other than an IL-1040, IL-1041 and IL-990-T audit), a file containing the most current GenTax information for the Taxpayer and account is sent to the auditor from his Supervisor. As a preliminary step prior to using the data in APT, the auditor will save the extract file to the "Libraries" "Documents" folder, this will also be where the audit file is saved. See the APT Reference Guide for additional instructions.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

B. REVIEWING THE AUDIT ASSIGNMENT

Once the audit is assigned, the information should be reviewed in order to become familiar with the case. The following list of questions (not exclusive) may be helpful in this initial review process:

- What type of company/industry is involved (manufacturing, retail, service, etc.)?
  - Internet research of the company/industry should be performed.
  - The taxpayer's 10K should be reviewed, when possible.

- What type of legal entity is involved (corporation, Subchapter S Corporation, partnership, etc.)?

- What type of Illinois returns were filed (separate basis, separate unitary, combined)?

- Is the company unitary? If a unitary search is required through GenTax, the auditor can either use the Unitary Search sub-tab, or access the Report Manager.

  - **See Exhibit A – How to Search for Unitary Members.**

  For a Unitary Business Group (UBG), research may be necessary in determining if a member is a "financial institution". Below is a link to a website, run by the FDIC, listing banks regulated by the feds, which likely qualifies them as finance companies per § 304(c). This could be a useful resource if there are suspiciously named members of a UBG and you want to verify whether or not they should be part of that group. Here's the link- just select a state and hit search to find out if the entity in question is listed as being regulated by the FDIC: https://research.fdic.gov/bankfind/

  Also, if you find the bank listed and select it, you can check if it has an OCC Charter number, which is indicative of belonging to a Finance entity. Example:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Are separate unitary returns involved? If so, GenTax should be researched for all known Illinois filers. A listing of all group members, which the taxpayer has identified as Illinois filers, will be found in the UB Schedules that accompany the Illinois returns. Starting with December 31, 2010 returns and forward, the Schedule UB is part of the actual return in GenTax.

  Note: The unitary search function will not work for separate unitary because they cannot data enter the UB since it is attached to the taxpayer as an attachment.

- What years and issues were involved in the prior audit?

- Have any amended returns been filed for the current audit years or any prior years that should be examined in the current audit? Has the taxpayer filed any federal amended returns in response to a Federal RAR, and if so, was an amended Illinois return also filed?

- Are the locations of any manufacturing facilities, sales offices, warehousing facilities identified?

- Is any construction of new facilities noted?

- Are any acquisitions, mergers, spin-offs or liquidations of divisions or subsidiaries identified?

This review process, in most cases, will bring a number of additional questions to mind. These questions should be outlined in writing. Doing this provides a basis for discussion with the taxpayer regarding the way in which the returns were filed, and what type of books and records will be needed to start the examination.

1. Requesting the Continuing Audit File

When an audit is assigned, review the Continuing Audit File (CAF) to develop an idea as to the issues contained in the prior audit and the taxpayer's position regarding those issues. To access a CAF, refer to the table that follows:

Audit Time Frame	Type of CAF	Storage Area
Audits initiated after 10/31/2017	Electronic	GenTax – CRM Electronic Documents tab
Audits TYs 2011 and prior to 11/1/2017	Electronic	Tiamat – network storage area
Audits prior to TY 2011	Paper	Paper audits/CAFs – Stores in House

For access to a paper CAF, the auditors must request the CAF through his or her supervisor who will then forward the request in an email to REV.G.ITAuditPlanning@illinois.gov. Audit Planning will reply with electronic documentation if at all possible. In some instances, if the CAF requested does not have electronic capability to be provided or the information requested is too voluminous, information will be provided via UPS.

CAFs requested by auditors/legal from outside of the Willard Ice Building, via Audit Planning from Records Management (in stores), will follow both the email tracking standards and the packaging/shipping requirements set forth in Audit File Tracking Procedures in chapter 1. See that chapter for details.

For more concerning CAF, see Section XIX Continuing Audit File.

2. Department Resources

GenTax should provide the most current taxpayer information for possible contact phone numbers and company address information. Department resources should be utilized first when performing taxpayer research in reviewing the audit assignment.

- When researching taxpayer information in GenTax, the auditor should check if a bankruptcy exists for that taxpayer. See Section 4 below on Bankruptcy for more information.

Springfield Audit Planning can be contacted to provide the following information:

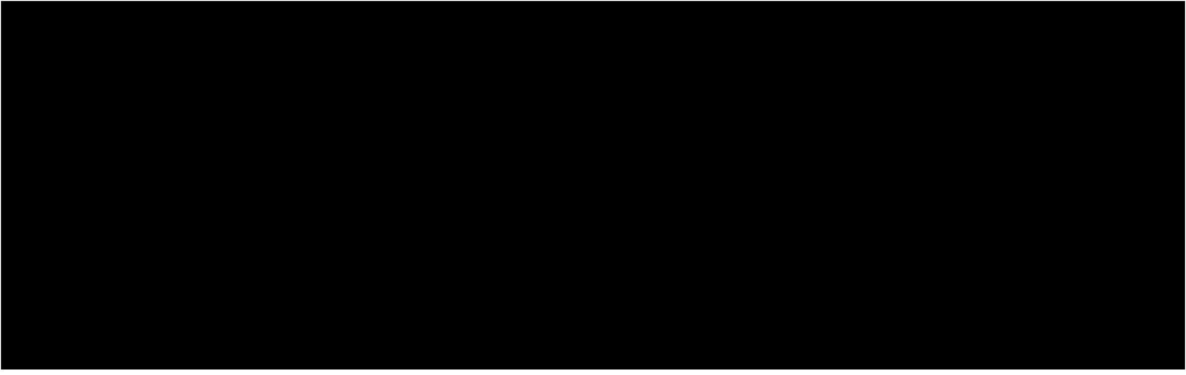
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Corporate information from Westlaw, NETS Database, Moody's, and/or the Directory of Corporate Affiliations
- Illinois returns with attachments (if specifically requested)
- Amended returns, if filed (if specifically requested)

Note: The auditor must send (email) their request for information to be obtained from audit planning to their supervisor who is to review and, if warranted, will forward the request (Form IDR-229) in an email to REV.G.ITAuditPlanning@illinois.gov. . Form IDR-229, Uniform Audit Action Request, must be used. See Section IV.F.3 for more information on the IDR-229.

3. Statute Dates

The statute date can be found in the Audit View screen for a particular audit.



However, the statute date can also been seen under the Aud Inventory sub-tab found within the Audit Tab (through the Search Manager). See Section IV.A.2.

Monitoring of this statute date is important so that the statute is not lost for proper issuance of a Notice of Deficiency (NOD) or Notice & Demand (Final Bill). Statute expiration dates must be monitored, and action taken to finalize audits or secure waivers when necessary. Auditors must notify their supervisor regarding situations where time frames will not be met and indicate what actions are planned on the audit.

See the Statute Chart in Chapter 21 for complete information on Statute of Limitations.

4. Audits of Bankruptcy Accounts

It is recommended that auditors check GenTax on audit assignments as received to see if a bankruptcy exists. It is also recommended that auditors question taxpayers on audit assignments to see whether a bankruptcy filing is involved.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The filing of bankruptcy by a taxpayer would not necessarily alter normal audit procedure when an audit is required to establish a tax liability. Although the bankruptcy court issues an automatic restraining order which prohibits all collection attempts, this does not interfere with the Department's guaranteed right under bankruptcy law to audit the taxpayer's books and records, and issue Notices of Deficiency.

When an auditor is informed of or becomes aware of a bankruptcy during the course of an audit, the auditor should:

- contact his/her supervisor immediately. Audit activity should be suspended until the supervisor evaluates all information and determines what course of action should be taken. The audit supervisor should evaluate the audit potential in bankrupt cases in light of the case load, the available audit staff, the complexity of the case, the claim date, the travel expense and the availability of books and records.
    - If the audit supervisor determines the case to be productive, then the auditor will proceed with the audit. The supervisor should contact Collection Enforcement's Bankruptcy Unit [Bankruptcy Unit Supervisor – phone number [redacted] and advise them of the audit.
    - If the audit supervisor determines the entity should not be audited, the assignment should be cancelled. See Section F below on Audit Cancellations.

- If no bankruptcy information is indicated on GenTax but the taxpayer indicates a bankruptcy is in process, the auditor should verify the bankruptcy with the Bankruptcy Unit Supervisor (Phone [redacted] The Bankruptcy Unit needs the following information to verify a bankruptcy:

    - The bankruptcy number,

    - The bankruptcy filing date, and

    - The court where the petition was filed.

- If a bankruptcy is verified by the Bankruptcy Unit, and

    - the bar date has been set, but has not expired, the auditor should provide an estimated audit liability amount so an estimated claim may be filed, or a request for an extension to the bar date may be sought.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- the bar date has expired, it is recommended the auditor and supervisor review and determine the audit period to be examined and contact the Bankruptcy Unit.

- An auditor should not solicit payment on the audit period up to the bankruptcy filing date, unless the taxpayer specifically requests to pay the liability. The auditor can, however, solicit a signature acknowledging agreement with the audit. On the audit period up to and including the bankruptcy, penalty and interest stop accruing as of the bankruptcy filing date.

The Department's procedures are not affected for any period following the date the bankruptcy action has been finalized.

C. REVIEWING TAX RETURNS FOR COLUMN A DETERMINATION

A review of the tax returns filed by the taxpayer is necessary in determining Column A figures needed for the Auditor's Report. This determination should be completed before the first taxpayer conference, if possible. This review requires research of both original and amended returns.

Part of this review process will be addressing work items, possible math errors and payment verification related to the taxpayer's account. When a math error is indicated on a return, a Return Correction Notice (RCN) will be generated through GenTax. A work item related to the RCN will remain open until the math error has been corrected. RCNs should be reviewed and addressed before the first appointment with the taxpayer.

1. Addressing Work Items

Work items found within GenTax can be an integral part of the audit process. Work items important to the auditor will consist of either amended returns or "math errors" (correspondence issued). The following discusses the proper procedure for addressing open work items and should be viewed as the Income Tax Audit Bureau's policy concerning such work items.

a) Auditor Responsibilities

When an audit is **assigned**, it is important for the auditor to check for open work items.

There are various types of work items that may affect the starting point of the audit. The following chart shows the work items that do **not** need to be addressed (all others will need to be "worked" as part of the audit).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Work Items that do not need Addressed
Amended Return Received
Original Return Received
TRM Send to Files
Audit Sent to Files
2nd Level Review….
Quality Review
TP Correspondence Review

NOTE: The first three in the above chart are created Audit Planning work items that will be closed upon completion of the planning process.

- Not only should work items be checked for at the **beginning** of the audit, but the auditor should check GenTax for work items **at every stage and every time the auditor spends time working on the audit.** The appearance of work items can occur at any time, so this is crucial to ensuring the audit work is not delayed and all issues are properly addressed.

- It is also required that the auditor ask the taxpayer during the audit if they have filed amended returns. Knowing if and when the taxpayer filed their amended returns is important based on the processing time delay.

  - When a taxpayer sends in an amended return, the amended return will be entered into GenTax as a work item. There is approximately a ten (10) day span from when the amended return is received by the Department to when it appears as a work item in GenTax. (Depending on the time of year in which the amended return is received will determine the amount of time it will take to appear as an active work item.)

  - If the taxpayer presents the auditor an amended return, the auditor should refer to Chapter 39, Amended Returns and Claims, for procedures regarding amended return handling. Amended returns need to be forwarded to the ITAPTS supervisor.

(1) Work Items – Audit Years

If open work items exist for the audit year (or years), email the supervisor a request for the work items. The supervisor will verify and forward, if necessary, an email to REV.G.ITAuditPlanning@illinois.gov requesting work item retrieval.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The requested information will be obtained and provided to the auditor.

(2) Work Items – Prior Years

If work items for prior years exist:

- And the prior years were never audited the auditor does not need to address these work items.

- And the prior years were audited, and the work items relate to amended returns, email the supervisor a request for the work items. The supervisor will verify and forward, if necessary, an email to REV.G.ITAuditPlanning@illinois.gov requesting work item retrieval. The requested information will be obtained and provided to the auditor. A determination will be made by the supervisor and the ITAPTS supervisor if the current audit should be expanded or a new audit established to handle the amended returns.

(3) Work Items – Outside Audit Period

If there are work items outside of the audit period, the auditor should contact their Supervisor to determine if the work items outside the audit period should be included in the current audit or included in a new audit.

- Adding additional years to the audit will require an expansion letter.

See Exhibit B – How to Check for Open Work Items

b) Audit Supervisor Responsibilities

The Supervisor (not the auditor) should contact Audit Planning to obtain the work items from Processing. An email should be sent to REV.G.ITAuditPlanning@illinois.gov requesting the work item.

- If a new track is needed, the request can be made at that same time by the Supervisor. All requests should be submitted in an email to REV.G.ITAuditPlanning@illinois.gov.

c) Audit Planning Responsibilities

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Once a request is received, Audit Planning personnel should identify and request all work items for that particular taxpayer. Audit Planning will be proactive in aiding the auditor with such work items.

- If Audit Planning discovers that there are work items for periods other than the audit period, the ITAPTS supervisor and the respective geographically responsible supervisor will make a determination on how to handle them.

2. Work Items that Involve Math Error Corrections

MATH ERROR CORRECTIONS NEED TO BE COMPLETED AT THE BEGINNING OF THE AUDIT AND PROPERLY SUBMITTED TO AUDIT PERFECTION

A math error is defined in IITA § 1501(a)(12) and 86 IAC § 100.9200(a)(1)(B)(2)(A)-(E) to include, in addition to an arithmetic or computational error, any of the following:

- Entries on the wrong line.
- Omission of required supporting schedules, or forms or any of the information called for thereon.
- Any attempt to claim, exclude, deduct or improperly report, in a manner directly contrary to the Act and Regulations, any item of income, deduction or credit.

The term "math error" does not include unclaimed subtraction modifications, tax credits, or ILNLD. Addition modifications are REQUIRED to be reported on an Illinois return, however, subtraction modifications are AVAILABLE to be claimed.

IITA § 903(a)(1) –

A math error differs from a deficiency in that its assessment is governed by IITA § 903(a)(1).

- A math error liability is deemed assessed by the filing of the return. The taxpayer is notified of a math error assessment by issuance of a Notice and Demand. The Department has only three years to assess a math error and bill the taxpayer where there is a liability.

- The taxpayer has no right of protest of the math error amount.

- The only way a taxpayer can "protest" the math error is to pay the assessed amount, and subsequently, file a claim for refund. The

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Department will deny the claim and, the taxpayer then has the right to protest the denial of the claim.

- A waiver of the statute of limitations does not hold open the statute for deemed-assessed liabilities. However, there is no bar in § 903(a)(1) against the Department or the taxpayer from correcting an error (at any given time) on a return in which there is no effect on tax. Example: Correcting an Illinois Net Loss on a return.

IITA §§ 905(n) and 911(h) –

For taxable years ending prior to December 31, 2002, these two sections provide a special limitation that prevents the Department from adjusting a loss year return after the statute has expired, unless a Loss Reduction Notification Letter (LR Letter) or properly filed amended return was provided before the expiration of the statute.

- A waiver on the loss year does not extend the statute in a case for such years. In auditing years prior to December 31, 2002, this should be taken into consideration.

a) Dealing with Math Errors

Math error (M/E) corrections must be addressed for the proper processing of an audit. The importance of M/E corrections is that the 804 penalty must be re-evaluated and any credit carryforward (CCF) reinstated. Such M/Es may be outside or inside of the audit period as discussed in depth below.

The following represents a common occurrence encountered during an audit:

Taxpayer has an RCN or Bill for a tax year and asks the Auditor to assist in correcting the problems which are subject of the notice.

- This can include errors pertaining to missing/incomplete schedules (Schedule C, J, M, NLD, etc.) or missing/incompletely filed Schedule UBs.
  - These should be corrected on a priority basis to eliminate erroneous billing and prevent improper Collection assignments (see Section VI.A. on the importance of checking for collection activity on the taxpayer's account).

- Credit & loss carry forwards are most likely affected, which causes errors in subsequent tax years.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note: *If taxpayer does not provide evidence supporting a math error correction, no math error correction is warranted. If this is the case, any math error adjustment made must stand.*

(1) Tax Year Outside Of Audit Period

a. If necessary, the auditor should research GenTax through letters to determine the exact error(s) and what is needed to correct or reverse the M/E.
b. The auditor should discuss with the taxpayer information needed to make the correction. Taxpayer (not auditor) must complete correcting documents. Auditor can review this information before taxpayer sends it to the return address on the notice.
c. Documentation being submitted by the taxpayer should conform to Department requirements. The taxpayer should mail the correcting documentation to the return address on the notice that they had received.
d. If resolving the RCN is critical to completing the audit, the ITAPTS supervisor should be contacted for possible priority processing.

(2) Tax Year Is Within Audit Period

(a) Math Error Corrections except Schedule UB

1. At the preliminary audit stage, Auditor will identify math errors to be corrected by thoroughly researching GenTax letters & work items.

2. The auditor will obtain from the taxpayer correctly completed or missing schedules/forms (Schedule C, J, M, NLD, etc.) with applicable supporting documents.
   - Auditor should verify the accuracy and compliance of each form and the support provided.

3. The auditor will create the EDA-25 (labeled "Math Error Correction), and complete auditor comments to discuss the adjustment(s) needed and what is to be done with any overpayment, if a refund or CCF.
   The narrative concerning the M/E correction needs to be specific as to each issue/adjustment and what documentation has been provided.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If a CCF, the auditor must verify that both the received date and the CCF amount requested are correct in GenTax.
- If a data entry error, attach a copy of the documentary proof so that it can be corrected in GenTax.

4. All M/E documentation, the EDA-25 and the narrative must be sent to the auditor's supervisor for review. After supervisory review, documents should be sent to the IT Audit Perfection supervisor via email (preferred method) or UPS.
    - Copies of all documents sent to Perfection should be maintained in the audit file.

5. Perfection will notify Auditor & Supervisor by email within 5 business days of receipt that the math error correction is complete.
    - All documents received by Perfection will be case filed.

6. Pre-math error balances or overpayments, losses, and carry forwards dropped to the next year must reflect math error correction.
    - Auditor should confirm that the corrections including overpayments, losses, and carry forwards are accurate, and inform the taxpayer that problem has been corrected.

7. EDA-25s reflecting final audit adjustments will use math error EDA-25 Column C as Column A.

(b) UB Schedule Math Errors (for APEs 12/07 and After)

1. Auditor will identify math errors to be corrected during preliminary audit stage.
    - UB Schedule M/Es may be due to either a missing UB schedule or a UB schedule that needs to be corrected. Both of these corrections follow.

Missing UBs:

2. Auditor will work with taxpayer to obtain missing UB.
    - The auditor will affirm that the UB prepared by the taxpayer is prepared in a manner

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

consistent with the UB Instructions, including proper calculations.

Corrected UBs:

3. Auditor will work with taxpayer to obtain corrected UB.
    - The auditor will affirm that the UB prepared by the taxpayer is prepared in a manner consistent with the UB Instructions, including proper calculations.

The following apply for both missing and corrected UBs.

4. The auditor will send the UB along with a revised EDA-25 to their supervisor for review.
    - Included in the narrative should be a thorough discussion explaining the specific areas of the UB that had changed from what was submitted with the returns filed. This will help Perfection personnel locate the specific UB entry to be corrected.

5. After supervisory review, documents should be sent to the IT Audit Perfection supervisor via email or UPS.
    - Copies of all documents sent to Perfection should be maintained in the audit file.
    - If posting the UB becomes labor intensive, Audit Perfection will determine when to forward to Data Entry for entering. Once the Schedule is entered, Audit Perfection can adjust the account and correct the balances, drop carry forwards, etc.
    - All documents received by Perfection will be case filed.

6. Perfection will notify Auditor & Supervisor by email within 5 business days of receipt that the math error correction is complete.

7. Pre-math error balances or overpayments, losses, and carry forwards dropped to the next year must reflect math error correction.
    - Auditor should confirm that the corrections including overpayments, losses, and carry forwards are accurate, and inform the taxpayer that problem has been corrected.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

8. EDA-25s reflecting final audit adjustments will use math error EDA-25 Column C as Column A.

b) Completed Math Error Correction EDA-25

The following is an example of an APT EDA-25 indicating a math error correction. The taxpayer (had received an RCN) provided the missing Illinois special bonus depreciation support to the auditor so that the math error could be corrected. This support indicated that the actual amount was $300,000,000, which was corrected on this “math error” EDA-25.

The “Math Error Correction” EDA-25, the support documentation, and Auditor’s comments explaining the math error correction must be sent to the RAS for review. After RAS review, all documentation will be sent to Audit Perfection for the taxpayer’s account to be adjusted/corrected.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

20 Distributive share of subtractions	20 67,677,572	0	20 67,677,572
21 Other subtractions	21 6,467,193	0	21 6,467,193
22 Total subtractions. Add Lines 10 through 21.	22 1,890,168,515		22 1,890,168,515
23 Base income or net loss. Subtract Line 22 from Line 9.	23 2,387,953,106		23 2,475,107,191

Step 3: Income allocable to Illinois *(Complete this step if any amount on Line 23 is derived outside Illinois.)*

Line	Column A	Column B	Column C
24 Nonbusiness income or loss	24 0	0	24 0
25 Trusts, estates, and non-unitary partnership business income or loss included in Line 23.	25 0	0	25 0
26 Add Lines 24 and 25.	26 0		26 0
27 Business income or loss. Subtract Line 26 from Line 23.	27 2,387,953,106		27 2,475,107,191
28 Total sales everywhere. This amount cannot be negative.	28 99,816,889,290	0	28 99,816,889,290
29 Total sales inside Illinois. This amount cannot be negative.	29 2,671,925,148	0	29 2,671,925,148
30 Apportionment factor. Divide Line 29 by Line 28. *(carry to six decimals)*	30 0.026769		30 0.026769
31 Business income or loss apportionable to Illinois. Multiply Line 27 by Line 30.	31 63,923,117	2,333,027	31 66,256,144
32 Nonbusiness income or loss allocable to Illinois.	32 0	0	32 0
33 Trusts, estates, and non-unitary partnership business income or loss apportionable to Illinois.	33 0	0	33 0
34 Base income or net loss allocable to Illinois. Add Lines 31 through 33.	34 63,923,117		34 66,256,144

EDA-25 front (R-06/14)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

c) General Reminders

M/E corrections:

- Cannot decrease additions or increase subtractions/credits beyond the original amounts entered by the taxpayer on their return (i.e. reinstate original amounts).
- May warrant the re-evaluation of the 804 penalty, and reinstatement of any credit carryforward (CCF).
- Should be addressed before the auditor issues any EDA-122.
- Are not included in audit assessments (EDA-122 or IL-870) or the PROD-1.
- Should be addressed (if possible) at the same time. It is beneficial to all parties (auditors, supervisors, and Perfection staff) that multiple corrections be submitted for correction together. This prevents potential delays in the audit process.

3. Verifying Payments

a) Payment History

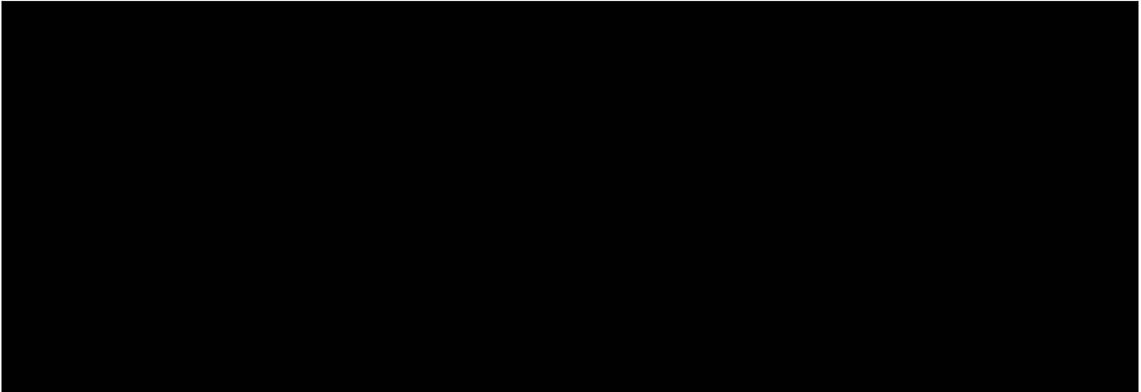
It is necessary to reconcile the payments reported by the taxpayer on the return as filed with the payments on the taxpayer's account on GenTax. If additional payments are claimed by the taxpayer that do not appear in GenTax, the taxpayer will need to provide proof of payment by giving the auditor a copy of the cancelled check or electronic payment verification information. Using the information provided, the auditor needs to research to find the payment.

If found, the auditor's comments should clearly state the status of the payment and how Perfection is to restore that payment to the taxpayer's account. **Note**: Screen prints of where the payment is found need to be included with the audit file to support the reinstatement of the missing money.

Payment panel in GenTax:

b) GenTax/Legacy PDF Display

When viewing GenTax payment ("converted credits") information, any payment identified with a Trans Type including "Cnv" in the description can be viewed in Legacy PDF Display. See AM Chapter 46 for details on accessing/using Legacy PDF Display.



When the payments in the Mainframe/Legacy system were converted to GenTax only the net amounts were converted. Therefore, Legacy PDF Display will have to be accessed to see the full details for the payments, the credit carryforwards, and the refunds for filing periods that have converted data.

The Business Income Tax System code reference card (EDA-78) is a convenient reference source when reviewing taxpayer information in Legacy PDF Display, but not in the GenTax system. If the auditor should need the latest version (revised 6/07) of the EDA-78, contact Audit Planning.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note: Any needed information that would have been previously accessed in either IRIS or Panagon (purged history) can now be accessed in Legacy PDF Display.

- **See Exhibit C – How to Locate Payment Information in GenTax and Legacy PDF Display.**

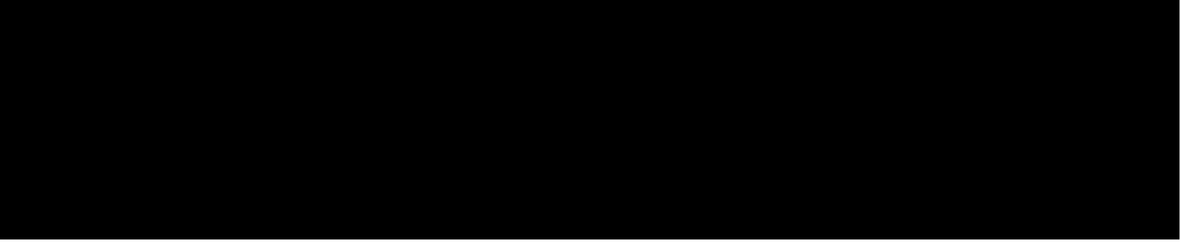
c) Deactivated Credits

Deactivated credit(s) will be seen on years where a statute has expired on an overpayment. Deactivating an overpayment credit prevents the system from trying to refund money the taxpayer is not entitled to receive. Deactivated credit can however be used to offset additional tax liability.

Example #1: Taxpayer has deactivated credit of $2,000. This money cannot be refunded, but if additional liability is reported at a later date, then the deactivated credit is able to be applied up to the liability amount. It still cannot create a refund. At a later date, additional liability of $1,500 is determined, so $1,500 of the deactivated credit can be applied to cover this liability.

Example #2: Audit situation – The taxpayer has an RAR and has utilized ILNLDs that they did not have. Audit liability is determined to be $1,625,000. There is a deactivated credit in GenTax for $1,300,000, so this amount can be applied against the $1,625,000 liability.

Example of a deactivated credit as appears in GenTax:



4. Column A Determination

Once work items have been addressed, any math errors corrected and payments verified, Column A figures can be determined.

- **See Exhibit D – How to Determine Column A Figures.**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

D. STOP BILL INDICATORS

Every effort is made by Planning to ensure tax years under audit that have a balance due amount as a result of an RCN on an original return that is yet to be resolved have a "Stop Bill" indicator in place to prevent premature collection activity. However, if the taxpayer did not respond to the Department's letter prior to audit assignment, there may be occasion for a stop bill indicator to be placed on an account. The taxpayer would need to provide the necessary documentation to have the auditor complete a math error correction per Section C.2. above.

If there is a need to create a stop bill indicator, the request and documentation (taxpayer response to the RCN issue) should be forwarded to the appropriate ADM. Approved requests will be forwarded to the Perfection supervisor in Income Tax, who will place stop bills on these approved requests.

Once placed on the account, the Stop Bill indicator will remain until the math error is corrected or the audit is processed.

E. PERFORMING COMPLIANCE CHECKS

This information was moved to Audit Manual Chapter 2.

F. AUDIT CANCELLATIONS

Note: Cancellations are for those cases that have already been assigned and/or started and are in the "Assigned – Started" stage.

1. Cancellation Reasons

A cancellation request must be submitted on Form IDR-229 if the reason(s) meet one or more of the seven cancellation reasons listed as follows:

1) The business has been discontinued and neither the taxpayer nor the books and records can be located, and no open periods exist.

2) The business has been discontinued, books and records are available, but the audit period is too short.

   - If the business is discontinued, and no change has been made, the discontinuation date should be firmly established, verified and documented via the completion of a REG-C-3, Business Information Update. The REG-C-3 can be found on the Department's website under Forms then Registration.

3) The issue that generated the audit is no longer valid (e.g. law changes, hearing and court decisions, IDOR policy, previous filing errors corrected), and there appears to be no additional area(s) of potential non-compliance.

4) It is suspected that the liability of a follow-up Mandatory audit will be zero or immaterial. Thorough documentation is required to validate potential audit results.

5) An out-of-state company's Illinois activities can be documented to be zero or very minimal and travel expenses to do the audit appear to be greater than the potential liability that could be generated.

6) Insufficient staffing due to higher priorities.

7) Duplicate Track.

2. Reasons not to Request an Audit Cancellation

A cancellation request will not be approved for any of the following reasons:

1) The taxpayer is uncooperative in providing records.

2) The taxpayer's records are not adequate and appear to be unreliable, making the completion of an audit difficult.

3) The taxpayer has discontinued and cannot be located, but the books and records are available from outside sources to substantiate a tax liability.

4) Randomly selected audits that may appear to be non-productive. However, the scope of the audit can be limited to reviewing only those areas necessary to assure the auditor that the taxpayer is in fact basically in compliance.

5) Generally, when taxpayer contact has been made and/or some review of books and records performed.

   The respective Audit Initiation Indicator must be ceased, "Inf-Audit Initiation" transaction reversed, a cancellation letter (form EDA-140) is mailed to the taxpayer [only issued when an audit initiation letter had been sent to the taxpayer]. This will be done by the Audit Planning staff.

6) Claim audits.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

7) Taxpayer books and records are located in an unsafe environment. Attempts should be made to have books and records given to the auditor at another location.

Note: Request for cancellation for tracks that have [redacted] or more charged will require additional information explaining the reason for the extra hours to be considered for approval.

3. Form IDR-229

Form IDR-229 (Uniform Audit Action Request) must be prepared for all cancellation requests. The approved Form IDR-229 (a savable fill-in pdf) is available under Forms in the Audit Work Area on the sp●IDOR web. DO NOT use your own created IDR-229.

- The auditor's supervisor must approve all cancellation requests.
- All reasons, work papers and information sources utilized in arriving at the conclusion that the audit should be cancelled must be included with the IDR-229. Approved IDR-229s (with any supporting documents) should be emailed by the RAS to REV.G.ITAuditPlanning@illinois.gov.

The IDR-229 will also be used for Audit mergers or transfers, change in Designated Agent (DA), and request for data. Form IDR-229-UB, Change of Designated Agent, should be used in conjunction with the IDR-229 when changing the DA, and can be accessed in the Audit Work Area under Forms on the sp●IDOR web. Completed IDR-229s should be emailed by the RAS to REV.G.ITAuditPlanning@illinois.gov. For more information on both forms, see Chapter 23, Unitary Determination.

4. No Liability Audits

Generally, **no** audit should be recommended for cancellation where taxpayer contact has been made and/or there has been some review of the books and records.

- After the Auditor is satisfied that the taxpayer is basically in compliance, the audit must be documented and closed as a no liability, "NL".
- Audits in which the taxpayer has been contacted and relevant issues of the case have been examined, but the audit adjustment(s) would result in no additional liability or an additional liability below established tolerances, should be processed as No Liability (NL) audits. These audits should be concluded with the minimum required workpapers.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Audits in which no additional liability is established, but adjustments are made that reduce a claimed net operating loss or excess credit amounts should be considered Loss Reduction (LR) audits IF EDA-25s OR IL-1120Xs are completed. However, audits involving net operating loss or excess credit year adjustments should be considered **NL** audits IF NO EDA-25s OR IL-1120Xs are completed. See Chapter 35 for more information on these types of audits.

5. Audits Which Could Result in Overpayments

During the course of an audit it may become apparent that the taxpayer has actually overpaid the tax liability. If it is determined that the taxpayer is overpaid, and it will take a substantial amount of time to complete the audit, the Auditor can request that the taxpayer determine the amount of the overpayment and prepare an amended return. The Auditor can review the amended return and verify that the overpayment is correct.

Note: Effective January 1, 2015, PA 98-0925 provides for a change to IITA § 909 as to the application of overpayments. The taxpayer can request overpayments on an original or amended return to be applied as an estimated payment to a future tax year. If no specific tax year has been supplied, the overpayment will be applied to the next applicable ES payment due date.

In the following situations the audit should be completed. When the audit is processed the refund, if requested, will be generated (if within statute).

- If a substantial amount of time (determined by conferring with your supervisor) has been spent on the audit and the case is near completion

- If a claim has been filed by the taxpayer and is included in the audit assignment. IN ALL CASES, THE CLAIM MUST BE APPROVED, ADJUSTED OR DENIED BY THE AUDITOR.

- If an audit reversal of a “math error” results in an overpayment.

- If one year of the audit results in a substantial deficiency and another in an overpayment and the net result is an overpayment.

V. CONTACTING THE TAXPAYER

Auditors **must** initiate contact with taxpayers within **15 days** of receiving an audit assignment. A Notice of Audit Initiation must be issued at that time. Audit appointments must be scheduled and entered on the field auditor’s calendar within the same 15-day period. If the audit is one that requires multiple appointments, the anticipated number of appointments should be scheduled at the same time of the initial appointment.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

A. SCHEDULING APPOINTMENTS

- The initial contact with the taxpayer is generally by telephone. Any appointments or requests for information should be confirmed in writing (see Audit Initiation Letter below). In this way adequate documentation is available in the audit package if the taxpayer is found to be uncooperative at a later date.

- To the extent that an audit is expected to take longer (based on history, etc.) than the time allotted in an audit appointment, it would be helpful to schedule as many weeks as possible when the initial appointment is being scheduled.

  - For example, if the previous audit took 70 hours to complete, it would be beneficial to schedule the 2nd week when scheduling the 1st week. This is appropriate even if the 2nd appointment is weeks after the initial one.

- All attempts should be made to keep any audit appointment, which is made and confirmed. If the situation arises in which it is impossible for an auditor to keep an appointment, the auditor should first contact his/her supervisor in the possibility that another auditor may be able to keep the appointment. If no other auditor is available, the appointment should be rescheduled and reconfirmed as soon as possible. If the taxpayer cancels the audit appointment, a letter should be obtained stating the reasons for the delay. If this is not possible the auditor should make a notation of the cancellation on the EDC-5. A new appointment should be scheduled immediately.

- After all preliminary research has been completed the auditor should contact the taxpayer to schedule an opening conference. The auditor needs to establish a conference within a reasonable time frame. The RAS or ADM may need to be involved in this conference also. If this conference must be scheduled at a far future date, the auditor must document the reasons as to why the conference could not be sooner.

  Example: Audit gets assigned on February 3, 2017. On February 10, 2017, the auditor schedules the opening conference for November 17, 2017. The auditor must document why this conference was scheduled in November and not sooner.

B. AUDIT INITIATION LETTER (EDA-135)

The audit initiation letter generated from GenTax, which not only confirms the appointment, but also requests documentation necessary for the audit **is required.** The language within each initiation letter will vary depending on the information needed for that particular audit.

- **See Exhibit E – How to create the EDA-135.**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

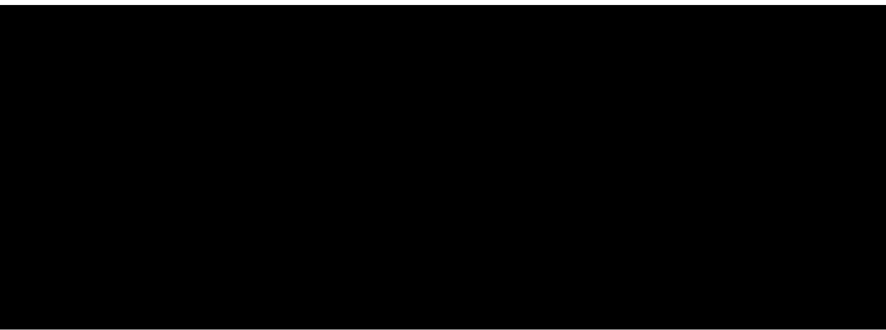
Once an audit has been assigned, the auditor has **15** days to issue an audit initiation letter (EDA-135).

1. Letter Confidentiality

When issuing an audit initiation letter in GenTax, it is important to maintain taxpayer confidentiality, especially when dealing with a status of "married filing separately". GenTax allows for the creation of letters that will be sent only to the spouse being audited. On the GenTax letters input screen, there is a check box entitled "Include Secondary Info".

- If the taxpayer status is "married filing separately", this check box should not be checked to ensure that taxpayer information is not mistakenly provided to the other spouse.
- If the taxpayer status is "married filing jointly", this check box should be checked to ensure that both names appear on the letter.

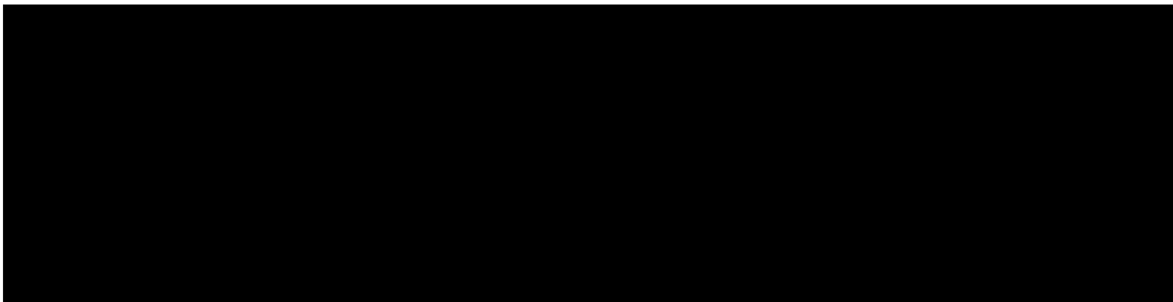
The check box can be found on the bottom of the input screen as follow:



For additional information on confidentiality, see Chapter 1 of the Audit Manual.

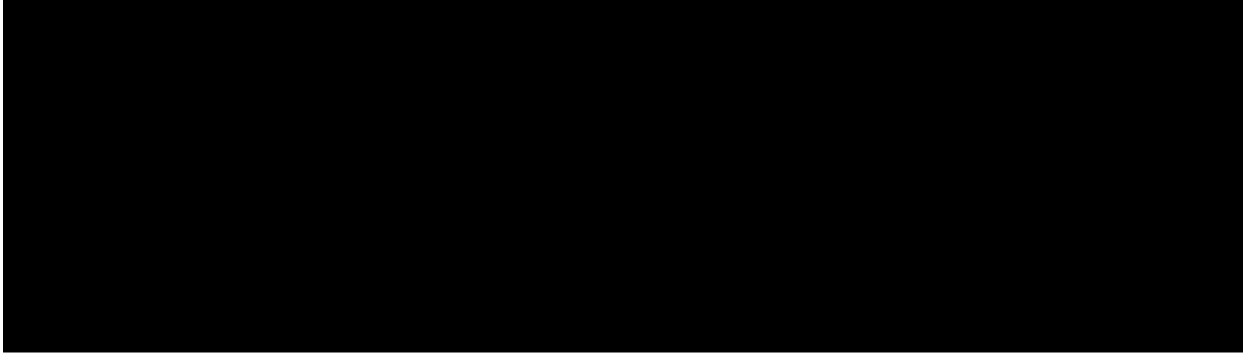
2. Carbon Copy Letter Option

It is possible to create a "carbon copy" of a letter, meaning that an extra copy of a specific letter can be sent to a taxpayer that is not the original recipient. A "carbon copy" can be generated through the *View Letter Detail* window by clicking on the Letter ID hyperlink of the letter that a carbon copy is needed for.



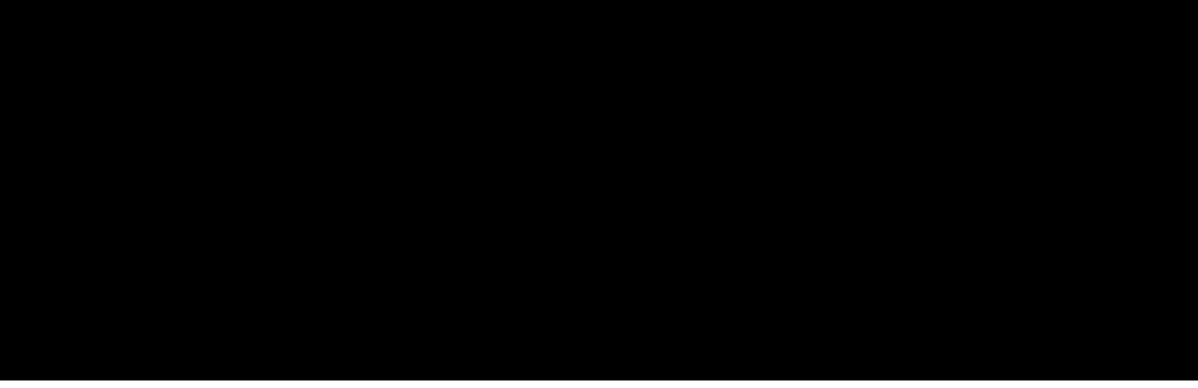
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

From the Letter Detail window that opens, click the “Carbon Copy” tab.



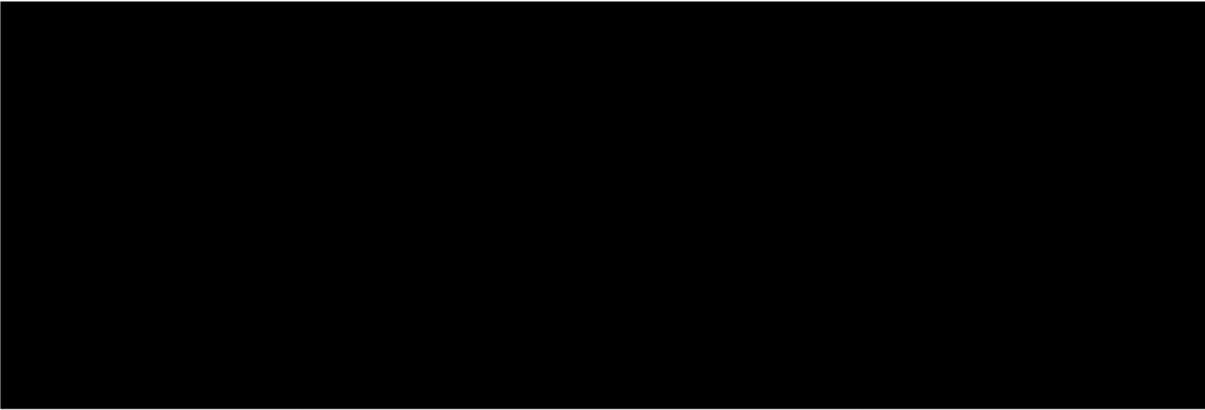
The “Carbon Copy” detail window will appear. To generate a carbon copy of the letter to send to a different taxpayer, click the “Add” tab.

At the “Select Level” window (previously selected addresses will appear in the table), choose the taxpayer that should be added as a Carbon Copy recipient. If this taxpayer does not automatically appear, use the green filtering field to search.



Once the correct taxpayer is chosen, it will populate in the Carbon Copy detail window.

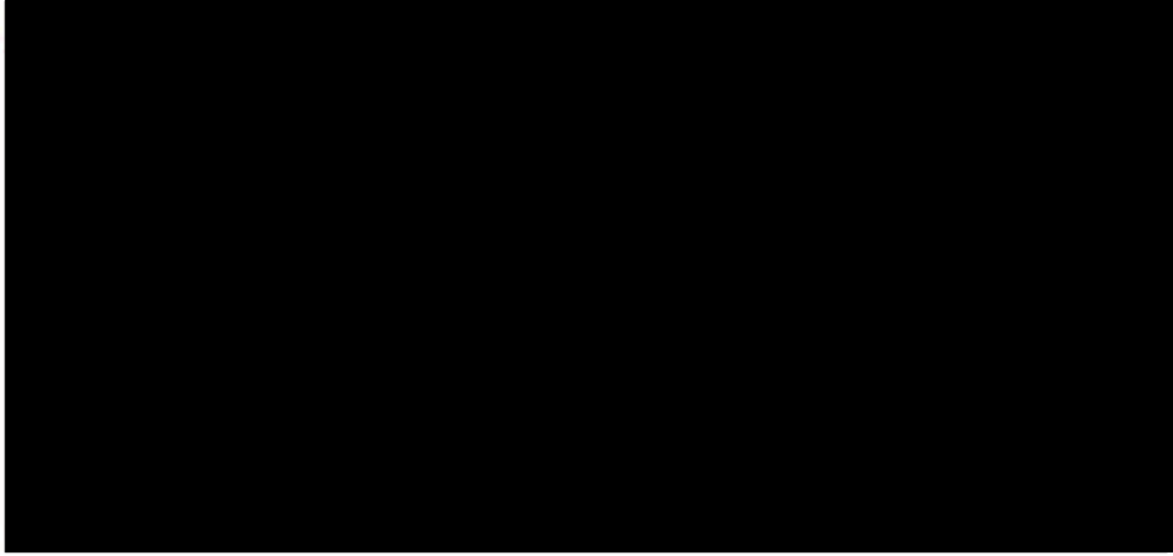
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.



This Carbon Copy detail window above has four hyperlink options - *Select*, *Linked*, *Manual* and *Remove*. Click *Select* to select another address already associated with the customer; Click *Linked* to select an address for a linked customer; Click *Manual* to add a name and address for the carbon copy manually; and Click *Remove* to remove the selected taxpayer. If the correct taxpayer has populated the address block, click the box corresponding to that taxpayer recipient, then click the "OK" button.

This screen appears, allowing for the letter to be saved. Click the "Save" button to save.

The taxpayer carbon copy recipient will appear in the letter detail window under the "Carbon Copies" list section. From the letter detail window, the letter may also be manually printed (which will exclude it from being sent to the batch), invalidated, and viewed by clicking the corresponding header hyperlinks.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Audit Activity Indicators and Informational Transactions

Depending on the stage that the audit is in, different activity indicators will apply. These audit indicators are an automatic function within GenTax and do not have to be manually entered. Since these indicators cannot be deleted out of GenTax, they act as a "trail" to show the timeline of the audit progress.

- Whenever an audit is set up by Audit Planning, the audit will be assigned to a supervisor for distribution to his/her audit staff. Once a supervisor assigns that audit, the indicators "Audit in Progress" and "Period Audited" will be displayed in GenTax.

- When the auditor generates an Audit Initiation letter to the taxpayer through GenTax, the "Audit Initiation" indicator will be placed on the account and an Inf-Aud Initiation transaction will appear in each period of the audit in the transactions list. It is this transaction that drives the audit late payment penalty (first 5%).

- If the audit needs to be expanded to incorporate additional years, an "Audit Expansion" indicator would appear when the additional years are added to the audit.

Audit indicators provide a history of the audit activities for the period(s) on which an audit has been set up. This history can be viewed by anyone needing audit information pertaining to that particular taxpayer.

C. GREAT LAKES STATES QUESTIONNAIRE

On July 16, 1986, the Great Lakes States of Illinois, Indiana, Michigan, Minnesota and Ohio executed the Great Lakes States Compact. One of the purposes of the compact is for the states to work together in cooperative enforcement efforts, exchanging information, etc. to obtain improved compliance by retailers and consumers in reporting sales/use taxes. Also, other states have entered into addendum agreements with the Great Lakes states for tax compliance cooperation.

Form IDR-829

Form IDR-829, Great Lakes and Midwestern States Questionnaire, was developed and agreed upon by the states. The following guidelines are in effect for all sales/use tax and income tax audits on taxpayers operating in one or more of the Great Lakes States.

- available as an Excel spreadsheet in the Standardized Forms Folder found on audit staff's computers.
- includes questions relating to both sales/use tax and corporate income/franchise tax.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- is mailed to the taxpayer along with instructions at the same time the audit initiation letter is mailed.

    - In the case of a unitary audit, a questionnaire is sent for each corporation which apportions income to Illinois as a result of the combined return.
    - At the opening conference, the completed questionnaire(s) should be reviewed with the taxpayer's representative for accuracy. If the questionnaire(s) is not completed the information should be requested again at this time.

D. INFORMATION DOCUMENT REQUESTS & DOCUMENTING TAXPAYER MEETINGS

Nothing is more central to the audit process than the quality of the evidence the auditor has available to verify the taxpayer's various assertions as to the correctness of their filings. This is why it is necessary to thoroughly document all requests for documents or any failure of the taxpayer to provide sufficient evidence. The documentation will show that the audit has been conducted with due care and that basic audit standards have been met.

One type of evidence is documentary evidence. Documentary evidence is also known as direct evidence. It is information which is printed or written, such as: contracts, books and records, deeds, notes, tax returns, correspondence, workpapers, and photographs. **Documentary evidence is usually preferred over oral testimony** and should be obtained whenever possible. Something written at the time of the event is usually more reliable than someone's memory long after the event occurred.

Information Document Requests (IDRs) are to be used every time additional documentation is needed from the taxpayer after the Initiation letter has been sent. The Initiation letter serves as the first document request of the audit. Additional IDRs include the following documents; EDA-70, EDA-11-A, and Subpoena Duces Tecum. These forms should be used in this order of progression to keep a record of the audit and to keep the audit moving efficiently.

Documenting Taxpayer Meetings

Whenever a meeting or discussion occurs with the taxpayer regarding audit matters, a written summary of the discussion must be provided to the taxpayer’s representative. This is to document the issues discussed to ensure that both parties have the same understanding.

a) EDC-5 Audit History Worksheet

EDC-5, Audit History Worksheet is required in all audits to document important contacts with the taxpayer. This generally refers to all meetings

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

and conferences specifically called to discuss any or all issues of the audit with the taxpayer, representatives of the taxpayer, audit supervisors or other Department employees. This includes the initial and exit interviews, all phone calls and conversations with the taxpayer, and all conversations with supervisors, Technical Support or other Department units about the audit. Every IDR issued, EDA-70, EDA-11-A or subpoena, must be documented in the EDC-5. **The EDC-5 must be typed.**

When documenting contacts in the EDC-5, be sure to refer to the written summary provided to the taxpayer. Document audit work performed on a daily basis on the EDC-5. On audits where lack of cooperation from the taxpayer is encountered or when the audit methodology and results will probably be disagreed to, document work performed as a means to provide for clarification at a later date.

b) EDA-70 Information Document Request

The EDA-70, Information Document Request, is required to be issued in every audit. This form documents the items that have been requested and the taxpayer's response. If after presenting the taxpayer with the EDA-70 on two separate occasions and the taxpayer does not respond, the next request to be issued is the EDA-11-A, a Notice of Demand for Books and Records.

For example, the auditor requests to see the depreciation schedule and fixed asset invoices. This information is presented to the taxpayer on the EDA-70. The taxpayer provides the fixed asset invoices, but not the depreciation schedule, so the auditor issues a second EDA-70 requesting the depreciation schedule. If the taxpayer does not comply, the auditor is required to issue the EDA-11-A.

The EDA-70 can be accessed as a savable, printable pdf on the Departments' Intranet (sp●IDOR web) under Work Areas, Audit, Forms, Universal.

c) EDA-11-A Notice of Demand for Books and Records

The EDA-11-A is a Notice of Demand for Books and Records. Unlike the EDA-70, the EDA-11-A specifies a deadline date for the books and records and the signature of the Revenue Audit Supervisor is required. The deadline is 30 days from the date the request is issued to the taxpayer. The EDA-11-A is available as a savable fill-in pdf in Forms, Universal under the Audit Work Area on the sp●IDOR web.

d) Subpoena Duces Tecum

The final document request to be issued to the taxpayer when they refuse to provide books and records is the Subpoena Duces Tecum. A duces tecum is a subpoena requiring a party to appear in court with documentary evidence that will be inspected by the court. 35 ILCS 120/10 gives any officer or employee, designated in writing by the Director, the authority to issue subpoenas requiring attendance by a witness or to issue Subpoena Duces Tecum requiring the production of books, papers, records or other memoranda bearing on such matters that auditors have the authority to investigate. The Department has taken the position this authority extends to computer data and other magnetic media.

Subpoenas will only be issued when the taxpayer has ignored the previously issued EDA-70 and EDA-11-A. Therefore, every effort should be made to secure testimony and/or information without a subpoena. However, if there is no response to a written demand within a reasonable period of time, the audit supervisor should refer the case to the Assistant Division Manager recommending issuance of a subpoena. Where the CAA staff has been involved in attempting to secure information, they should be consulted regarding the recommendation to issue a subpoena.

Since enforcement of the subpoena can be critical to the examination of tax liabilities, it is important that proper procedural steps are carefully followed. Subpoenas will not be issued for federal tax returns, other state tax returns, 10-K statements, annual reports, or similar materials which are available from other sources. Subpoenas may be issued to compel relevant and material testimony and/or other data including computer records and tapes.

To be successful in court, the Department must show that the taxpayer refused to comply with previous requests for information. The auditor must retain copies of any written requests setting forth the specific records required. The auditor must also maintain a record of the dates the requests were made, the name of the person contacted, and notes as to whether or not compliance was secured.

If you need to issue the formal subpoena, contact the IT Technical Support Supervisor. The formal subpoena has to be reviewed by IT Technical Support and receive approval from the Legal Services Division. When requesting this form the following is required:

- Copies of the EDA-135, all EDA-70s, EDA-11-As and any other document requests.
- EDC-5 Audit History Worksheet.
- Complete details of Books and Records being requested.
- Name and address of where the form will be sent.
- Date that the documents are to be presented, 4 weeks out due to certified mail.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The subpoena form will be completed initially by the IT Technical Support Section (only until the form is available as a fill in form), reviewed by the Technical Support Section, reviewed and approved by Legal Services, signed by the Division Manager, notarized and mailed by the IT Technical Support Supervisor. The Auditor will receive a scanned copy for the audit file when the form is sent.

E. FORM FOR SUMMARIZING TAXPAYER MEETINGS – EDA-156

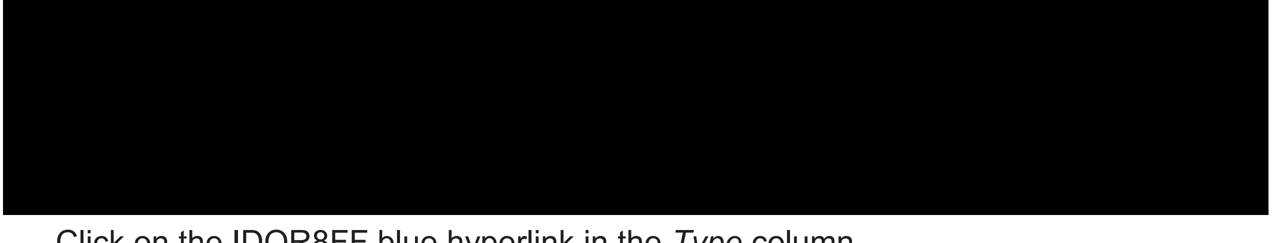
In response to the release of the Taxpayer Meeting Documentation AMU (incorporated in D. above), one of the field auditors developed a fill-in pdf template to summarize meetings with taxpayers. Intent is to include this template on the sp●IDOR web under Work Area Audit/Forms, but until approved for posting, the pdf template can be obtained through the ITAPTS Supervisor.

- **See Exhibit R – Template for Summarization of Taxpayer Meetings**

F. FREE FORM LETTER (IDOR8FF)

The IDOR8FF free form letter is used in place of the IDOR20A letter. **Exception**: Automated Audits/Projects run with the Discovery and Lead Managers.

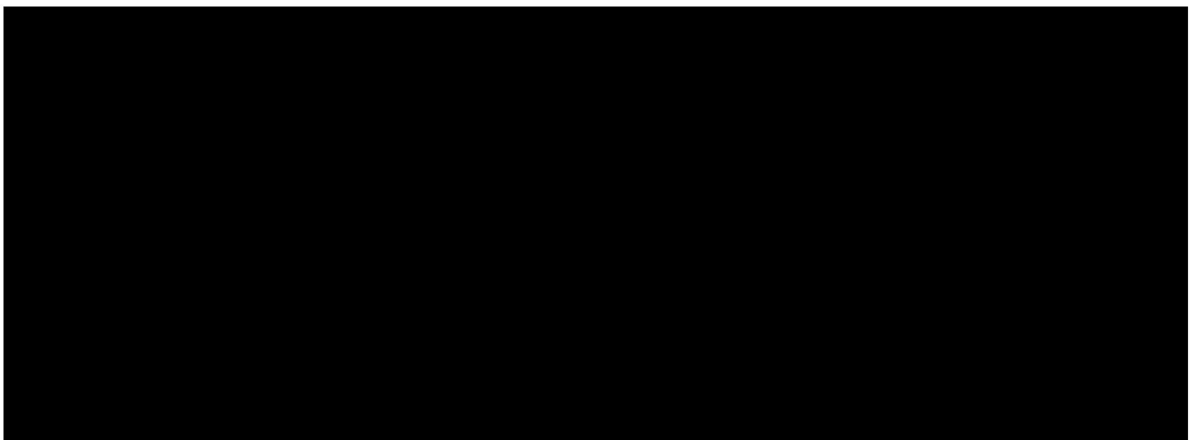
While in the Audit View, this letter can be accessed in the Letters sub-tab under the CRM Tab. Click on the Add tab to view this letter in the audit letters listing.



Click on the IDOR8FF blue hyperlink in the *Type* column.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The user will see this entry screen when accessing the letter. The user enters the data in the custom text box as it should appear in the letter.



Preview the letter prior to saving to be sure it looks correct and professional. Once the letter is saved it cannot be edited. If a mistake is found after the user saves it, then a new letter must be created. Be sure to invalidate the incorrect letter.

Reminder: This letter is not to be used as a substitute for the GenTax required letters such as the Initiation or Completion letters.

Do not use this letter to confirm conversations with the taxpayer concerning **proprietary information**. An example would be the following: at the conclusion of a plant tour, do not use this form to detail your understanding of the taxpayers manufacturing operation. This information should be placed in a private memo generated outside of GenTax.

G. AUDIT EXPANSION LETTER (EDA-136)

1. Audit Expansion Guidelines

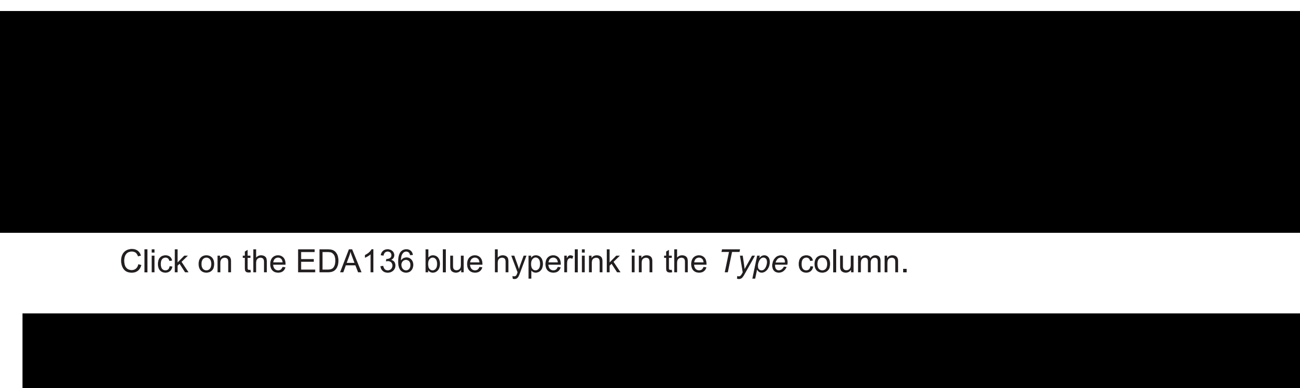
Before an audit is expanded and an expansion letter sent to the taxpayer, certain issues must be reviewed in making the determination to expand the audit.

1) Timing – not to expand the audit too soon as there may be a need to wait until the original return is processed.
2) Open work items – how old are these work items? Do they need to be addressed?
3) ICB notices issued – if these have already been issued to the taxpayer, there should be no expansion of the present audit.
4) Supervisor (RAS) approval – has the request for audit expansion been discussed and approved by the RAS.

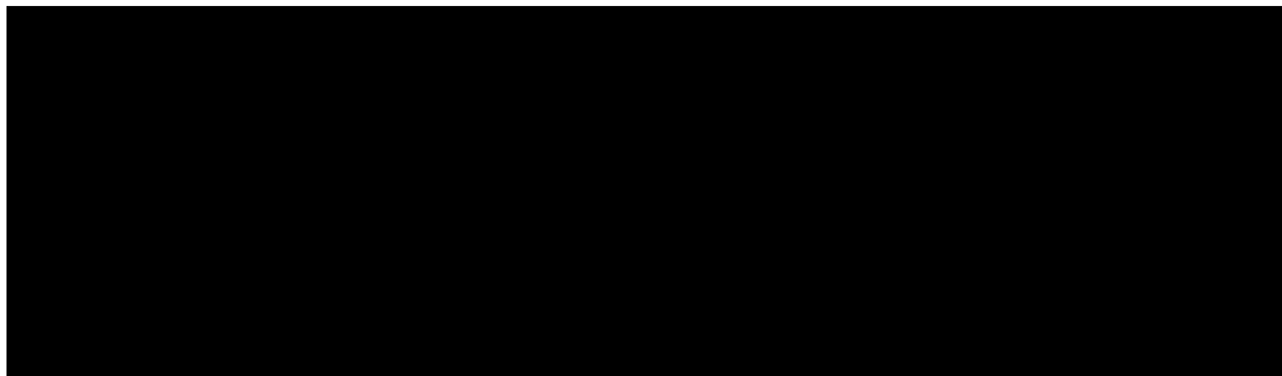
2. EDA-136 Letter Generation

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

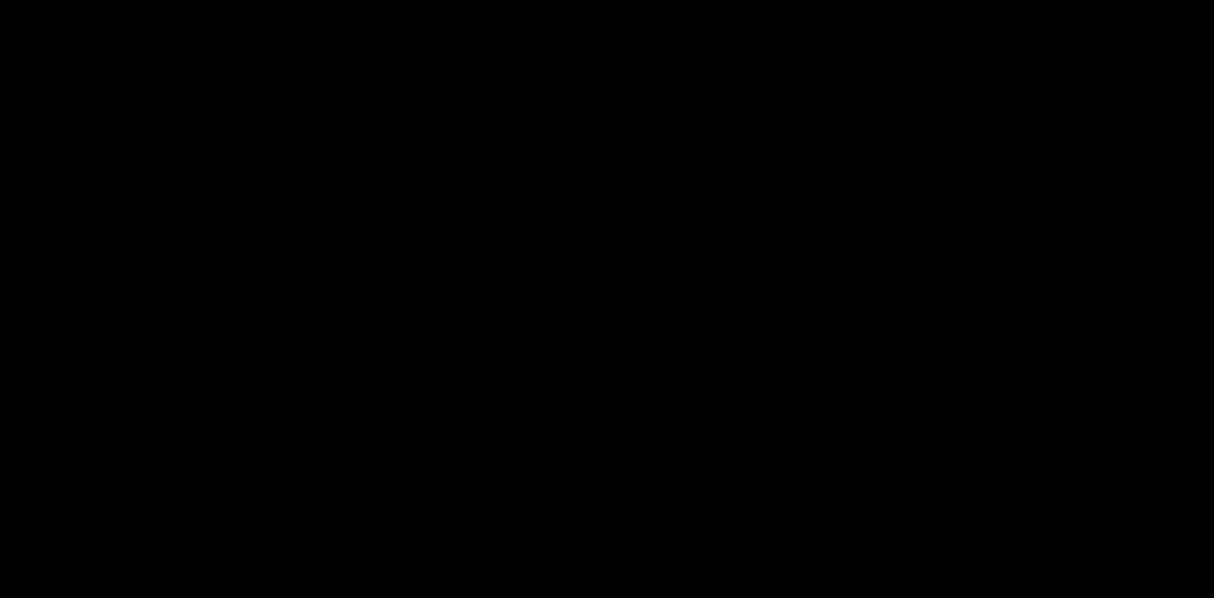
If the audit period is expanded after the audit initiation letter has been sent, an audit expansion letter will also need to be sent to the taxpayer. While in the Audit View, this letter can be accessed in the Letters sub-tab under the CRM Tab. Click on the Add tab to view this letter in the audit letters listing.



Click on the EDA136 blue hyperlink in the *Type* column.



Previously users could choose whether the verbiage would say notified of the extended audit period by phone or by the letter. Users can now also choose to have the letter reference that the taxpayer was notified in person (meeting) of the extension of the audit period. The input screen follows:



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Complete the Input screen with the necessary information, which includes the additional period(s) being added. After reviewing the letter for accuracy (Preview Letter), save and then print the letter.

H. SELECTING TEST METHODS AND PERIODS

Some type of sampling method may be used to complete an audit. This provides an economical and reasonable method to verify the accuracy of a large number of transactions.

Before a sampling method is selected, the Auditor and Computer Assisted Audit (CAA) staff should make a proper study and evaluation of the taxpayer's business activities and records. The Auditor must establish a basis for selecting the sampling method to be used in the audit. The population of transactions to be reviewed in the audit must be clearly defined before any method is selected. The population that is defined will help to determine the method to select.

Once the study and the definition are completed, the Auditor is ready to select the audit method to be used. The method selected must be defendable as the best method available under the circumstances. Thus, it will be necessary to document the method used to determine the population and selected audit technique. Included in this description should be the reasoning and methodology used to select the sample units or periods.

In some instances, a detailed examination of the population will be the best method. One example of a detailed audit would be one in which the population is small, and the review of documents is easy and readily accessible. When CAA techniques are used, the Auditor may be able to accurately pinpoint the audit exceptions. In most audit situations, the detailed examination of an audit population is not feasible and should be avoided. This is not to say that a detailed review of large dollar invoices in stratified sampling should be ignored. This is a proper and necessary part of many sampling techniques.

1. Computer Assisted Audit (CAA)

The Audit Bureau's position is that statistical sampling is the preferred method in large case auditing. Computer Assisted Audit techniques (CAA) will be used in these instances. **The auditor should contact CAA personnel on these cases as soon as the case is assigned.** CAA staff will be able to discuss the information with the taxpayer to determine the proper way to proceed. CAA personnel may be able to secure the data necessary to perform the audit prior to the first audit appointment. In these instances, the auditor may walk into the taxpayer's business with reports in hand. This is not to say that CAA cannot be considered for medium-sized cases. If the taxpayer has a large volume of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

transactions or the case took a large number of hours in the prior cycle, these cases are prime targets for CAA techniques.

To request CAA assistance, the auditor should complete and submit the form – "Request for Services of Computer Assisted Audit Group" as shown below. Submission should be through the auditor's immediate supervisor. This form (marked "Request New") is found in: (1) the CAA folder within the Standardized Forms folder on field staff laptops, or (2) on (C:) Drive in the CAA folder within the Forms folder for in-house staff using desktop computers.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Areas of Potential Use

The list below is intended to provide some potential areas that CAA may be able to assist with in conducting CIT audits. This list is not intended to be all-inclusive but is provided to give ideas of potential areas where CAA can benefit the audit process.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Potential Use	CAA Activities that may be Employed
US Gov't Interest	Identify file-containing data supporting subtraction. Summarize type of obligations claimed with dollar totals and record counts.
Credits – Replacement Tax Investment, Training Expense, and Enterprise Zone Investment	Identify file-containing data used to calculate credit. Summarize names, products, etc. utilized to calculate credit with record counts and dollars. Once population built, stratify and sample the population. CAA evaluation of sample results provides information necessary to calculate sample adjustment. This could be done with the recapture of certain credits.
Sales Factor	Obtain file containing sales transactions summarized in order necessary to identify the proper calculation of the factor. Summarize data in file and provide correct amounts for the factor.
Property Factor	Depending on area wanting to work on we have had some success in this area. Normally large companies maintain a Fixed Asset Management System file that is created for the IRS that contains the necessary information.
IL-1023C Partnership Test	Review of 1023C filers for accuracy based on information pulled from Gentax. This is also useful in reviewing S-Corp shareholders for non-filing of Illinois returns. List of shareholders SSNs can be matched against IDOR income tax files to identify missing periods. NOTE: With the implementation of Gentax, information on partners/shareholders may be accessed from not only the IL-1023C but also from the IL-1120-ST and IL-1065 (Schedule B information). Currently, no information can be "downloaded" from the IL-1000.
Filer Verification	Review of companies listed on US Form 851, US Form 7004 or other source to verify who is in the Gentax system as a filer. This is useful in verifying that we do not miss a company for waiver purposes. Also, may be able to use as a replacement for the AUB schedule.
Consolidated Group File	This file may be in Excel or Corp Tax for example. This should contain all consolidating information for all members of the Federal consolidated group. This should allow for assistance and speed in determining the impact of adding or removing companies from unitary groupings.

Even if a statistical sample is not used in the audit, CAA should still be contacted for advice on the sampling method that the auditor may want to employ.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2. Projecting Prior Audit Results

A considerable amount of audit hours can be saved when prior audit results are utilized as the basis for the current audit liability. The following guidelines will serve as a basis for the minimum amount of fieldwork necessary if prior audit results are to be utilized.

a) Audit History

When an assignment is received, review the Continuing Audit File (CAF) to develop an idea as to the issues contained in the prior audit. If necessary, secure the prior audit file. Analyze how the samples were prepared and whether they were sufficiently valid to warrant utilization in the current audit. If there are doubts as to accuracy and validity of prior audit results, the Auditor should not pursue this approach.

b) Management Approval

It is mandatory that Management participates in any decision-making on cases utilizing prior audit results. Approval of the audit supervisor is required and must be documented.

After an error rate projection is made based on the prior audit results, any subsequent audit periods may only be projected with the written approval of the Assistant Division Manager.

Only AGREED audits can be processed when this method is used.

c) Taxpayer Interview

Conduct an on-site interview with the taxpayer where applicable (field staff audits). An interview over the phone will not be acceptable. An in-state plant/facility tour could also prove helpful. Interview a responsible officer of the company and obtain information on operational changes, changes in product line, and any mergers or acquisitions that may have occurred. Interview the responsible tax return preparer, especially when there has been a change in personnel. You may elect not to proceed if there have been significant changes in the business since the prior audit.

d) If CAA Was Used in the Prior Audit

The CAA staff needs to be contacted if the prior audit utilized CAA and the Auditor is considering using the prior audit results in the current

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

audit. It will be necessary to obtain the taxpayer's computer records to recreate the same populations that were used in the prior CAA samples. CAA will provide reports to ensure that any changes in locations, cost centers or accounts can be addressed. If any new changes exist from the prior audit, separate audit procedures may need to be utilized depending upon their significance.

CAA will recreate the population that was utilized in the prior cycle. The newly created population will be stratified on the same basis as the prior cycle. This should be compared to the stratification report from the prior audit to determine if any significant changes exist between the two periods. If the dollar difference between any stratum or the total population is significant, further analysis will be necessary to determine the viability of an error rate projection.

If the prior audit result projections are used, then the detail stratum from the prior audit needs to be analyzed to determine how it will be addressed. There are two options that exist for the detail stratum:

1) review the new period in detail; or
2) use a percentage of error projection based on the prior audit.

A comparison of the detail stratum for each period will need to be performed to determine the proper method to employ. If the strata contain significant differences, then the Auditor should consider a detail review of the new period's stratum.

If the transactional makeup of the strata is substantially the same, then an error rate projection should be considered. The remaining sample strata would be projected based on the percentage of error for each stratum from the prior audit applied to the new period dollars.

If a stratum in the prior audit was un-projectable due to the number of exceptions found, then the Auditor should either propose no additional tax due for the stratum in this audit cycle or a sample may be drawn on this stratum for the new period.

If an area of small dollars were not sampled in the prior audit cycle due to immateriality, then they will be ignored for the new cycle as well.

VI. ATTENDING INITIAL TAXPAYER CONFERENCE

The initial meeting with the taxpayer can have a significant impact on the entire information gathering process of the audit. A well-prepared auditor is more apt to obtain

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the information necessary for completing the audit than one whom the taxpayer feels is unprepared.

During this opening conference, the taxpayer should be informed that:

- any outstanding (unpaid) assessments, for all tax types, will need to be addressed. The **Statement of Customer** available in GenTax should be utilized to collect these outstanding liabilities (see "Statement of Customer" Section A that follows below for instructions).

- a compliance check of the business (unless unitary) and the owners (partners, shareholders, etc.) for all taxes administered by the Department (Income, Sales, Withholding, etc.) is a required part of the audit.

The opening conference discussion should include:

- audit scope
- documents required
    - As part of the audit process, some auditors had begun asking to review FIN 48 workpapers (considered by the IRS as tax accrual workpapers) on a routine basis. However, such a review does not reflect the Department's current policy. The audit staff should not ask for or review these FIN 48 workpapers as part of the audit.

- estimated timeframes needed to complete various audit phases. By establishing timeframes within the audit, keeping scheduled appointments with the taxpayer becomes a high priority.
    - Once each audit phase is completed, the taxpayer should be provided with schedules (and discussion if needed) outlining the proposed adjustments. If the audit is not completed during the initial appointment, the auditor and taxpayer should meet to discuss any phases completed, extra documentation that may be required, and the timeframe for resuming the audit.

A. STATEMENT OF CUSTOMER – COLLECTION OF ASSESSMENTS

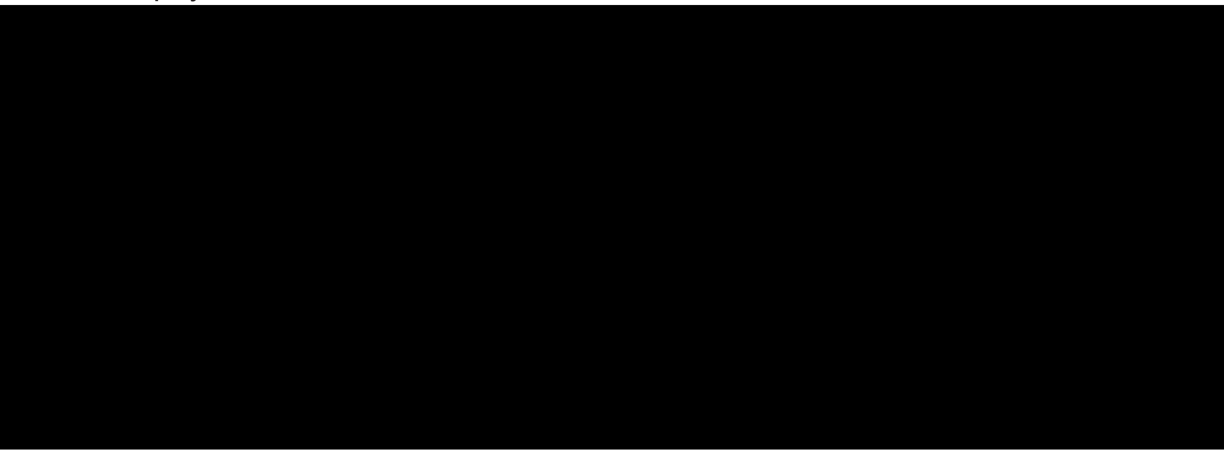
Auditors are responsible for advising a taxpayer of any outstanding liabilities and attempting to collect any balance determined to be due during the course of completing their audit. The following sections will provide information and guidelines on how to handle outstanding assessments that exist for taxpayers under audit.

NOTE: Before generating the Statement of Customer, it is important to research the taxpayer for any outstanding balance(s) that have gone to an **outside collection agency** (OCA). GenTax will be checked for Collection information as follows:

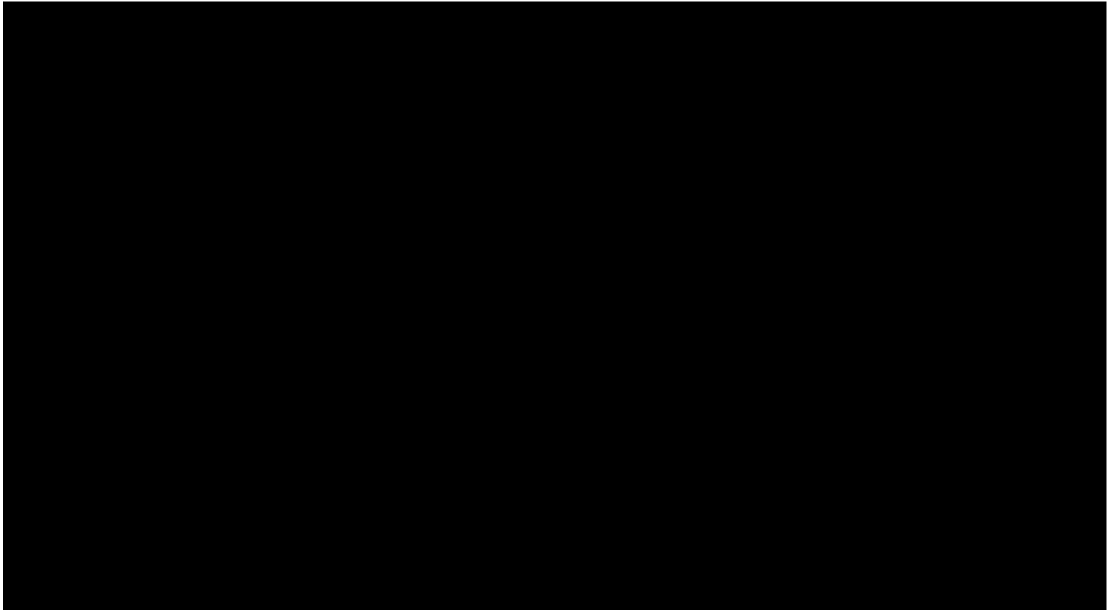
1) Access the taxpayer through the Search Manager by entering the FEIN or SSN dependent on that particular taxpayer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2) Click on the "View Additional Information" icon located in front of the taxpayer's name, as indicated below in the red box.



3) The "additional information" box will open. If there is Collection information present indicating OCA activity (see red box below showing an IIT account), the auditor must send an email to their immediate supervisor indicating the OCA activity. The supervisor will then forward this information to the ITAPTS Supervisor for review in determining any outstanding taxpayer balance owed to the Department of Revenue. No Statement of Customer should be generated until this review process has been completed.



Verifying Outstanding Assessments and Liabilities

a) Viewing Assessments in GenTax

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Audit Bureau requires auditors to advise a taxpayer of any outstanding liabilities and to attempt to collect these balances during the course of the audit. By clicking on the period hyperlink, the auditor can view all transactions associated with that period.

Additional information such as bill items, payments and refunds can be accessed by clicking on any of the sub-tabs that appear with the transactions.

b) Types of Statements Found in GenTax

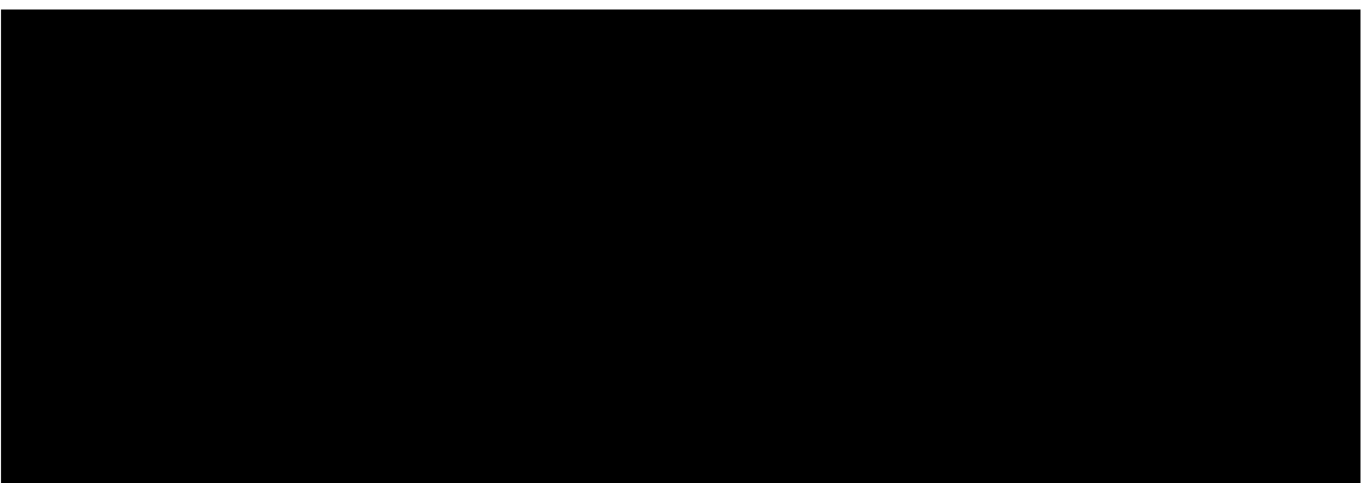
Taxpayer Statements allow IDOR to communicate account information to taxpayers and to facilitate their payment(s) for each account that has a balance due. These taxpayer statements list liabilities and/or credits by period. Audit personnel will use taxpayer statements to communicate and solicit payment of all current liabilities owed by the taxpayer to the Department.

The Statement of Collection reflects only collection items. These statements will only be issued by collections personnel.

The Statement of Account reflects only the information specific to the selected account.

The Statement of Customer reflects information for ALL tax types. Outstanding (unpaid) assessments can be verified by reviewing the taxpayer's **Statement of Customer** in the Customer View**.** The Statement of Customer will only have entries if there is a balance. If no debt is eligible for a Statement of Customer, a box will appear stating such when the View Statement Tab is selected.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



The Statement of Customer is the most comprehensive tool that can be utilized to advise the taxpayer of outstanding liabilities (including updated penalty and interest) across all tax types that the taxpayer is required to file and pay. Taxpayers can be presented with a Statement of Customer and **make payment utilizing the voucher found on the bottom portion of the statement.**

c) Creating the Statement of Customer

If the auditor is successful in collecting these assessments, he or she must attach the remittance to the voucher portion of a **newly generated, updated Statement of Customer,** and forward or mail to the IDOR address shown on the voucher. The reason for not using the original unpaid assessment notice that the taxpayer may possess is that the Statement of Customer generated by the auditor includes updated penalty and interest calculations.

Note: Auditors should make a photocopy, for the audit file, of the Statement of Customer, Voucher, and taxpayer payment that is being remitted. Photocopy of these items should be scanned and saved electronically with the audit documents.

In those instances where a collection case is in process, the auditor should contact the assigned collection representative to coordinate the collection. To determine if a collection is in process, the auditor can look in the Indicators Panel to see if there is an indicator showing “Collection in Progress.” The collection representative information can be accessed through the collection hyper-link, where the name and phone number of that representative (“owner of the collection”) can be located. Additional information on this collection may also be found in the account comments. Contacting the collection representative is important because collections may have issued demand letters, bank levies, wage garnishments or liens which might have an impact on how the auditor is to proceed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

All auditors have the authority to issue or reissue the Statement of Customer, or a Statement of Account (SOA), so that outstanding debt and assessments can be collected with updated penalty and interest. This will create a corrected voucher to send with any payments collected on outstanding assessments.

- **See Exhibit F- How to Generate an Updated Statement of Customer.**

Important Points to Note:

- Periods "under review via correspondence received" will not be included in the voucher amount. Such periods will state on the Statement of Customer that they are "under review via correspondence received" and no pending dollar amount will show for that period.
- Credits are not added to the voucher balance.
- Voucher will only reflect a balance due.
- Write-offs will be shown on the main screen but will not show on the Statement of Customer until the write-off value has been reinstated. A write-off is an amount that is owed but has been taken out of the "active" collection process. Most times a "lien" has been filed against these write-off amounts. This liability would need to be reinstated to the system for payment, including any lien release fees. Auditors would need to contact the Collection Support Supervisor directly to have these liabilities reinstated.

B. RETURN ISSUES

- If required returns outside of the audit period have not been filed, the Auditor should firmly encourage the taxpayer to prepare the missing returns and submit them before the close of the audit.

- If the taxpayer does not comply, the Auditor will initiate an additional audit and establish the liability. An SC-137 must be submitted (through the RAS) to Audit Planning to set up this audit in an email to REV.G.ITAuditPlanning@illinois.gov.

- If the taxpayer has failed to keep copies of filed returns and will be requesting copies from the Department, the taxpayer needs to fill out the IL-4506, Request for Copy of Tax Returns, and send the completed form with payment [$5 charge per return requested] to the address listed on the IL-4506. Note: Returns may have balances due which are not processed.

- If the taxpayer presents an original/amended return(s) to the auditor, the auditor needs to follow these steps:
  - Check that the return has been signed.
  - Write "Received by IDOR" on the top of the return, date and initial the return. This is very important for statutory control purposes.
  - All schedules and attachments should be provided by the taxpayer with the return. The auditor must verify that schedule information is accurate and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

that the returns correctly down foot.
- Make a copy of the return for the audit file (and/or scan and save with other audit documentation) and send the signed originals to Audit Planning (AP). AP will scan and attach the return to the audit track in GenTax, and then send the return to case files.

- If federal tax information (FTI) needs to be verified through the warehouse, the information should not be printed for the audit file. Auditors should state that the taxpayer's filings have been verified using "available IDOR resources" not the federal warehouse.

C. EMAIL AUTHORIZATION

Management encourages the use of email to communicate with taxpayers. In order to avoid potential problems with respect to the security of Email and the transmission of confidential information, the EDA-154, Audit Email Authorization, should be utilized. This form needs to be completed by the taxpayer and submitted back to the auditor. A copy of this authorization form is to be included in the completed audit report. The most current EDA-154 is available as a fill-in savable pdf, which should be saved electronically with all other documents in the electronic audit file.

Audit Email Authorization Form (EDA-154)

The EDA-154, Audit Email Authorization, is available in the Forms section under the Audit Work Area on the sp●IDOR Web (intranet). The same form is also available on the Department's website, under Forms, then Miscellaneous.

- **See Exhibit G - EDA-154 Audit Email Authorization.**

D. IL-2848, POWER OF ATTORNEY

This information was removed from this chapter and is replaced by AMU IT18-02 (POA), which goes into Audit Manual Chapter 2.

E. IL-872, CONSENT TO EXTEND THE TIME TO ASSESS OR REFUND INCOME TAX

Form IL-872 is used to extend the statute of limitations for audit years. **It is extremely important to realize when there is a statute issue with the concern that the statute could be lost, and that Form IL-872 should be executed to extend that statute.** Under IITA § 905(f), a Notice of Deficiency may be issued at any time prior to the expiration of the period agreed upon on Form IL-872. Both the taxpayer and the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Department must execute the extension prior to the expiration of the previous statute of limitations. See Ch 21 for more details concerning the IL-872.

Per IITA § 905(f), the IL-872 and ICB-1 are both viable vehicles to honor this statute for extension.

Auditors must include a signed copy of the IL-872 as an attachment to the Audit Springboard in GENTAX.

- **See Exhibit I – How to Scan and Attach a Document to an Audit in GenTax.**

Faxed IL-872 forms

- A faxed IL-872 becomes effective and enforceable upon the Department's countersignature of the faxed document, IF BOTH the taxpayer and the Department have signed within the proper statutory period.

- Even though the Department will countersign a faxed waiver, it should be requested that the taxpayer forward the original waiver form to the Department. The original waiver should then be attached to the faxed waiver that has already been countersigned. Both documents should be kept in the audit file. If electronic documents are provided, paper copies are no longer required in the audit file.

F. DETERMINING THE DESIGNATED AGENT

Determining the designated agent should be done as early as possible in the audit. 86 IAC §100.5220(a) states that the designated agent must be the controlling corporation if it is a member of the combined group and has nexus in Illinois. If the controlling corporation is not an eligible member of the group, the members must choose another designated agent. The Illinois filing member with the largest consistent liability should be selected, but this is not mandatory.

For details on designated agent determination and the use of new Form IDR-229-UB, Change of Designated Agent, refer to Chapter 23.

G. EXAMINING BOOKS AND RECORDS

While most taxpayers are cooperative in providing auditors with the information necessary to perform an audit, occasionally a taxpayer who is uncooperative may be encountered. In these cases, it is important for the auditor to know his/her authority for requesting and obtaining necessary information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Authority to Examine Books and Records

The authority to examine a taxpayer's books and records can be found in IITA § 913. IITA § 506(a) also deals with the Department's authority to obtain information, specifically, the federal return.

a) Federal Returns

The Illinois filer can be required to furnish a copy of ANY return filed under the provisions of the IRC, which has an effect on any item reported on that company's Illinois return. In the case of a company which is a member of a federal consolidated group, the federal consolidated Form 1120 is needed in order to verify the pro forma figures and to determine if the federal pro forma income is the correct Illinois pro forma income amount. See Chapter 24 for more information on Illinois pro forma income.

b) CPA Prepared Returns

Information given by a taxpayer to a CPA is not "privileged information" and may also be requested. In late 1988, the Illinois Supreme Court ruled that no information provided to an accountant for use in the preparation of tax returns was confidential because the client understood that the accountant might disclose part or all of the information to the government by filing returns.

c) Photocopying of Information

The Department's authority to examine a taxpayer's books and records also extends to PHOTOCOPYING books and records. Failure to provide photocopies when requested or refusing to allow an auditor to use photocopying equipment, assuming reasonable requests are made, will be considered as a failure to allow inspection of books and records in violation of IITA § 913. In the case of *People v. Floom* [(1977) – 52 Ill App 3d 971.], the court held that the "**power to inspect also included the power to copy records**".

A photocopy of returns, supporting schedules and breakdowns, unitary information, and other information is necessary to properly support the audit findings. At the beginning of the audit, the procedures for photocopying this information should be discussed. If the taxpayer refuses to allow photocopies of information to be made, the request and the taxpayer's refusal should be put in writing and the formal request (and possibly subpoena procedures) should be implemented.

d) Documenting Information Reviewed in the Audit

During the course of the audit, material may be examined that is not photocopied and included in the audit file due to volume or the nature of the information. Usually

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

under these circumstances, notes about such material should be made and included in the audit.

Since the documents which served as the source for these notes may be very valuable evidence if the audit is protested or litigated in court, it is essential that the material that has been examined be properly identified and summarized. The following information should, therefore, be obtained and documented:

- The name or title that appears on the report, chart, brochure, etc.
- The date it was issued.
- The number of pages.
- The place the original or master copy is kept.
- The name of the person to contact regarding the material.
- The name of the person who prepared the report and to whom it has been distributed in the company.
- A description of the contents or listing of the table of contents if available.
- If the material consists of excerpts, a list of the applicable page numbers should be identified.

Any documents received from the taxpayer should contain:

- The name of the person providing the document and the date received, and;
- The file name the taxpayer uses to identify the particular file.

This eliminates the possibility of the taxpayer, at a later date, denying that a certain report exists simply because it is being called by a title other than the one the taxpayer uses. Any information contained in the audit workpapers should be referenced to the applicable source document.

If interviews with the taxpayer, his personnel or representative have been relied upon, as soon as possible after the interview the conversation should be summarized. The summary should contain:

- the questions asked, and the answers given by the taxpayer
- the name and title of the individual(s) interviewed
- the date, time and place that the interview was conducted
- the names of other persons present at the interview.

This summary should be verified by the individual interviewed and his signature should be obtained, if at all possible.

Note: The above cannot be stressed enough since issues have come up during litigation where the Department has been asked to identify records used during an audit, but not retained.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

H. REQUESTING FEDERAL TAX INFORMATION (FTI)

Every attempt should be made to obtain federal return information in the following order:

a. From the taxpayer. Unless the taxpayer is a true non-filer, the taxpayer should be able to provide their federal return information.

b. From the Data Warehouse. The auditor needs to thoroughly research the information available in the warehouse. Field staff who does not have access to the warehouse must contact the ITAPTS supervisor for warehouse information.

- When checking records in the warehouse, need to change “Default” view from the “View 1” to see everything available in each file.
- Most often what is available in the warehouse provides more detail than a transcript will provide.

Note: Anytime that a number is taken from the Data Warehouse (Federal information) and transferred onto Audit documentation (i.e. EDA-25), it is then considered Federal Tax Information (FTI) and must be protected with a Federal folder and tracking sheet. However, if Line 1 AGI is only being verified through the Data Warehouse without printing it for an audit file, it is NOT considered FTI and does not require the folder/tracking sheet. In such a case, auditors should state that the taxpayer’s filings have been verified using “available IDOR resources” not the federal warehouse.

c. From the Disclosure Officer. IRS Form 8796-A should only be completed and submitted to the disclosure officer as a last resort to obtain federal information.

- Transcripts can only be ordered for the last three years. Information often provided in a transcript does not help in an audit.
- Copies of returns can be ordered but can take a considerable amount of time (6 months is not uncommon).
- The Disclosure area is under new, more stringent IRS security measures which include new requirements in tracking the requests that are handled. On the next IRS review, it is important to show that the Department is not continually ordering transcripts for information that is already available (such as on the warehouse).

Complete information concerning FTI and Form 8796-A has been moved to Audit Manual Chapter 1.

VII. CONDUCTING THE AUDIT

This section provides a layout of steps when conducting a CIT audit. The steps would be similar for other Income Tax audits – WIT and IIT. See Audit Manual Chapter 44 for WIT and Chapter

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

45 for IIT.

A. AUDIT STEPS

1. Line 1 Adjustments during an Audit

During the audit process, an auditor may make the determination that adjustments are necessary to the reported Line 1 figures on the Illinois return(s). Dependent on the type of audit, this would include:

1) Federal taxable income – IL-1120 and IL-1041
2) Ordinary income – IL-1065 and IL-1120-ST
3) Adjusted gross income (AGI) – IL-1040

Audit policy now dictates a new procedure that instructs auditors that they **must** submit a request for Illinois Line 1 change approval. This approval must be submitted through the auditor's supervisor, who will then forward the request to the Income Tax Audit Planning and Technical Support (ITAPTS) supervisor. Appropriate supporting documentation must be provided with the Line 1 adjustment request at the time of submission.

When submitting such a request, proper statute control procedures **must** be followed. Submission of a Line 1 change request needs to be made as early as possible in the audit. If needed, a properly executed IL-872 must be on file to support the time required for approval. Reminder: Per Management Expectations, audits are required to be sent to Audit Review with a minimum of 60 days left on the statute.

Audit changes made based on the federal tape match information are not affected by this policy. Also, not at issue would be when auditors question federal items that only affect items other than Line 1, such as modifications, apportionment or credits. Additionally, Line 1 changes necessary due to additions/deletions of UBG members would not be affected by this policy.

2. Audit Issues

When the auditor attends the initial meeting with the taxpayer, the following should have already been determined:

- Column A figures to be used in the audit
- The statute date and the possible need for a signed IL-872 extending the statute of limitations.

During the taxpayer conference(s), the audit issues need to be addressed with the taxpayer. The auditor will need to complete the appropriate schedule(s) within the Audit CIT package (DAN or APT – see note that follows), and also update the auditor comments on the issue.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note: Effective 8/3/2015, any audit that is in progress but has NOT had an ICB notice (EDA-122, 124 or 125) issued should be completed using the CIT package (APT). One exception is if the number of hours already spent on the audit is too great that re-entering data into APT would be inefficient for completion of the audit, it may be completed in DAN but ONLY with Supervisor and ADM approval.

Currently, APT can be used in IL-1120, IL-1120-ST and IL-1065 audits. The following chart shows the forms, documents and work papers programmed in APT for the IL-1120, IL-1120-ST and IL-1065. These self-contained APT forms, documents and work papers should only be used when completing APT audits, as opposed to using previous standalone work papers in these audits. Included are the forms now available in the APT Bundle. The "X" indicates what is available for each audit type (1120, 1065, and 1120-ST).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

NOTE: Currently, there are instances when APT cannot be used in an audit:

- Two or more Separate Unitary Business Groups (UBGs) to one combined UBG. Example: UBG with three members being combined with another UBG with 5 members.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Two returns filed with the same year end. Example: Returns filed for 5/31/2015 and 12/31/2015.
- Returns with UB INS through 12/31/2011.
- Separate Unitary filer. Example: UBG with members that file different return types – 1120, 1065, 11120ST.

The chart below lists audit issues and the audit manual chapter that relates to that issue.

AUDIT ISSUES	**AUDIT MANUAL CHAPTER**
Unitary Business Income	Chapter 23

Investments Tax Credit Recapture	Chapter 36
RT Investment Tax Credit	Chapter 36
IT Investment Tax Credit	Chapter 36

Federal NOL or Illinois NLD

In audits where the taxpayer is claiming federal net operating losses or Illinois net loss carryovers, the Auditor is required to verify the loss carry over. This verification should include:

- a detailed analysis of the audited losses and how/where these are to be carried
- complete NLD schedules to ensure that the NLD screen in GenTax reflects the correct application of losses for the years in the audit and all prior years
- all schedules and workpapers generated in that verification process

All loss verification documentation must be included in the audit file. It is important that losses have been verified in order to quickly and accurately see what/if any losses are available to carry forward.

For tax years ending on or after December 31, 2014, the $100,000 limitation on the use of Illinois net loss deduction (NLD) has expired. When

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

determining the years to which a loss can be carried forward for corporations, do not count:
- tax years ending after December 31, 2010, and before December 31, 2012;
- the taxable years for which the deduction would exceed the $100,000 if not for the NLD limitation (tax years ending on or after December 31, 2012, and before December 31, 2014).

3. Offsets

All offset requests from the taxpayer must be in writing.

There are specific protocol that address how to do offsets between audit periods, outside of audit periods, and between tax types. Proper chain of command approval must be followed dependent on the type of offset requested. Chain of command entails the following order:
- Revenue Audit Supervisor (RAS)
- Assistant Division Manager (ADM) – [if applicable]
- Division Manager (DM)
- Program Administrator (PA) [This is the Bureau Manager]
- The Director of Revenue [if required]

a) Within the Audit Period

- Offsets within an audit for the same taxpayer within the audit period can be approved by the RAS.

- Offsets between taxpayers within the same FEDERAL consolidated group, but for IL purposes must file in different groups, can request offset within the same audit period. This type of offset can only be approved by the Division Manager. Auditor needs to submit this request through his/her RAS.

b) Outside the Audit Period

- Offsets requested to have money offset to a period outside of the audited periods must go through the Program Administrator for approval by the Director. Auditor needs to submit this request through his/her RAS. This applies to both dot point situations in a) above – same taxpayer, and taxpayers within the same federal consolidated group filing in different groups for Illinois purposes.

a) Unrelated taxpayer or unrelated tax type

- Offsets requested to unrelated taxpayers or unrelated tax types must be go through the Program Administrator for approval by the Director. Auditor needs to submit this request through his/her RAS.

4. Audit Determination

Once the audit issues have been addressed, the determination may fall in one of three categories:

- Taxpayer agrees with the audit findings (Agreed)
- Taxpayer does not agree with the audit findings (Unagreed)
- Taxpayer agrees on some issues, but not on others (Both)

B. BACKING UP IN-PROGRESS AUDITS

In order to minimize any potential loss or corruption of computer data, auditors are responsible for following an appropriate system backup routine for their “current” audit. While certain tax programs have incorporated automated backup routines and reminders each time they are used, users still need to be conscious of performing regular backups to all critical information.

A general guideline would be once a day. However, to be safe, anytime that a substantial amount of work is completed in a tax program (or other software program) this information should be backed up. As important as recognizing the need to backup this information, guidelines must be followed regarding the storage location of this saved data.

1. Computer Hard Drive

Field: In-progress audits should always be backed up on the auditor’s computer hard drive.

In-house: In-progress audits should always be backed up on the auditor’s H:\ drive.

2. Flash Drive - Field

An encrypted flash drive issued by the Department is the most logical source of “local” backup in addition to the hard drive. However, it is imperative that the flash drive not be stored with your computer. This way in case the computer/data is lost, stolen, damaged, etc., the flash drive will not be affected. Keeping the flash drive in your computer bag will defeat your efforts! This is your only protection if you lose the information stored in the computer’s hard drive.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

VIII. TECHNICAL SUPPORT GUIDANCE

This information has been moved to Audit Manual Chapter 2.

IX. TECHNICAL REQUEST PROCEDURES

This information has been moved to Audit Manual Chapter 2.

X. DOCUMENTATION NEEDED IN COMPLETING AN AUDIT

This section provides detailed information about the main documentation that is required when completing an audit. Although only certain required documents are discussed, other documentation may be required as listed on the EDA-51, Income Tax Audit Index. This section does not include a discussion of all audit documentation as seen on the EDA-51.

A. AUDITORS REPORT

Auditor's Reports are referenced as follows:
EDA-24 Individuals
EDA-25 Corporations
EDA-26 Fiduciary
EDA-92 Partnerships
EDA-93 S-Corporations
EDA-127 IL-1023-C – available in the CIT Standalone

The following discussion is primarily directed toward corporate audits; however, many of the same procedures apply to other, non-corporate, Income Tax audits. Refer to Chapter 28 for more information regarding non-corporate Income Tax audit procedures.

EDA-25

For audits completed outside of the APT program, the EDA-25 should be accessed in the CIT Standalone package. For audits completed in APT, the self-contained APT EDA-25 should be used.

The Column A, As Filed, amounts on the EDA-25 should reflect the actual tax assessed to date. The current amounts may be from the original return, amended returns, math error adjustments, previous audits, or legal settlements. Column A, As Filed figures typically must include the last adjustments posted in GenTax for each APE within the audit period, unless an exception as discussed in these procedures applies.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If the return can't be viewed in GenTax, then the auditor must check to see if the return information can be viewed in Legacy PDF Display. Legacy PDF Display contains all of the information that was previously in the Mainframe/Legacy system (and then IRIS) that was used by the Department prior to GenTax. The information in Legacy PDF Display was last updated November 2007 prior to conversion to GenTax which was in December 2007.

- If the return is in GenTax, the most current account information will be available in GenTax. If the return in GenTax has converted credits, Legacy PDF Display information can be used to see the payment detail that may not be available in GenTax.

- For audits completed in APT, the self-contained EDA-25 should be utilized. APT is designed for the auditor to complete multiple Auditor (EDA) reports for each year of the audit when warranted. In circumstances such as math error corrections, amended returns, etc., which all must be resolved prior to or as part of the audit, the auditor will be able to access different versions of the report to make the necessary changes. See the APT Reference Guide in the Audit Training Section under *Work Areas* on the Intranet for detailed instructions on EDA-25 completion.

  ✓ See Section IV.C. for additional information on Column A determination.

a) Completing the EDA-25 When There Is an IL-1120-X That Has Not Been Processed

(1) Underpayment

If an IL-1120-X reporting an underpayment has been filed and has not yet been processed, the figures on the IL-1120-X would not appear on GenTax. However, the IL-1120-X underpayment is an admitted liability, and the IL-1120-X should be processed before any audit adjustments.

- The IL-1120-X, Column A, needs to be verified with GenTax. If the figures in Column A of the IL-1120-X agree with the figures on GenTax then Column C of the IL-1120-X needs to be used for the EDA-25, Column A that the auditor is preparing. Column B of the EDA-25 will represent the audit adjustments and Column C will show the corrected audit results.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

It is important to remember that the statute of limitations for issuing a Notice and Demand on an admitted liability expires 3 years after the date the amended return is filed and cannot be extended with a waiver.

(2) Overpayment

If an IL-1120-X has been filed claiming an overpayment and has not yet been processed, the IL-1120-X adjustments will not appear on GenTax. However, unless the IL-1120-X is withdrawn in full, it must either be allowed, or partially or fully denied.

- The IL-1120-X, Column A, needs to be verified with GenTax. If the figures in Column A of the IL-1120-X agree with the figures on GenTax then Column C of the IL-1120-X needs to be used for the EDA-25, Column A that the auditor is preparing. Column B of the EDA-25 will represent the audit adjustments and Column C will show the corrected audit results.

  - In a situation where the auditor is denying a portion of the claim, the auditor must complete an EDA-25 where Column A will typically be taken from GenTax and Column B will reflect the claim adjustment that is being allowed. The appropriate language must be shown on the IL-870 regarding the partial denial, if unagreed. For audits completed in APT, the IL-870 is no longer used.

  - In a situation where the auditor is denying the entire claim and there are audit adjustments for the same year, the auditor will complete an EDA-25 and Column A will typically be taken from GenTax.

The above instructions are for processable IL-1120-Xs (i.e. Column A of the IL-1120-X agrees with GenTax).

- If the IL-1120-X is not processable then the auditor should refer to sections "Reviewing Tax Returns for Column A Determination". In addition, the section "Dealing with Math Errors" can be referenced for information concerning math errors. Once the amended return is perfected, Column C of the amended return (or Column C of the EDA-25 used to perfect the amended return) will be used for Column A of the EDA-25 that is used to process the audit adjustments.

- If the taxpayer states that they have filed an X and the X is not attached to the audit in GenTax, then the auditor needs to locate this X. To locate the X, the auditor will need to look at the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

work items found in the taxpayer's account in the Work Items sub-tab under the Task Tab in GenTax. Request that Audit Planning order the X and have it attached to the audit. This X must then be worked in the same process as described above.

An audit involving an IL-1120-X claiming an overpayment is coded OC (if the claim is allowed as filed), OC/CR (if the claim reduction is unagreed) or OC/WC (if the claim reduction is agreed).

b) The Need for Multiple EDA-25s

When a case involves audit adjustments AND net operating loss carryback adjustments or capital loss carryback adjustments, it is necessary to prepare multiple EDA-25s, which reflect each "step" in the liability computation process. The purpose of multiple EDA-25s is to identify the various liability or overpayment amounts for restricted interest computations and to verify the loss amounts being applied.

- The audit adjustments (Illinois and/or federal RARs) should appear on the first EDA-25. Each loss adjustment is reflected on a separate, subsequent EDA-25.

  - CIT Standalone - All of the EDA-25s should be printed out for inclusion in the audit package. The last EDA-25 should be saved.

  - APT package - APT is designed to allow the auditor to complete multiple Auditor reports (EDA-25s) for each year of the audit. These reports are saved within APT. See the APT Reference Guide in the Audit Training Section under *Work Areas* on the Intranet for detailed instructions on EDA-25 completion.

- If there are multiple EDA-25s to be processed for the same year, then the auditor should clearly indicate on the top of each EDA-25 which should be processed first, second, third, etc.

Example: Company A filed its 2000 IL-1120 (its year of incorporation) on October 15, 2001 with Illinois base income of $100,000. On December 10, 2002, Company A filed an IL-1120-X carrying back its 2001 Illinois net loss of $60,000 to 2000. Note: Box on the 2001 IL-1120-X was not checked to forgo the carryback.

On November 15, 2003, Company A filed an IL-1120-X carrying back $40,000 of its $50,000 2002 Illinois net loss to 2000. Note: Again, the box on the 2002 IL-1120-X was not checked to forgo the carryback.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

During 2004 Company A's 2000 return is audited and Illinois net income is increased by $10,000 creating an audit deficiency.

Year - Return	**Filed Date**	**Base Income**	**CB Amount**	**CB to year**	**IL Net Income**
2000 IL-1120	10/15/2001	$100,000			
2001 IL-1120X	12/10/2002		$60,000	2000	
2002 IL-1120X	11/15/2003		$40,000 – had $50,000	2000	
Audit in 2004 of TY 2000					Increased by $10,000

Multiple EDA-25s are required for the audit of TY2000 as follows:

- When EDA-25s are prepared for 2000, the first EDA-25 will reflect the As Filed figures from Column A and the Audit Results in Column C.
- The second EDA-25 will reflect the figures from Column C of the first EDA-25 in Column A, and the Audit Results after the 2001 Illinois net loss carryback in Column C.
- The third EDA-25 will reflect the figures from Column C of the second EDA-25 in Column A, and the Audit Results after the 2001 AND the full $50,000 of available 2002 Illinois net loss carrybacks in Column C.
- All three EDA-25s should be printed out for the audit file. An IL-870 should be prepared for the taxpayer's signature, only if audit is completed using DAN. If completed in APT, the IL-870 is no longer required. It should reflect the tax resulting from the $10,000 audit income increase and a corresponding tax decrease to reflect the additional IL NOL that was carried back to 2002 to offset the full amount of the audit change.

c) Completing the EDA-25 with a Previous Audit That Has Not Been Posted to GenTax

If there is a previous audit on a tax year that is included in the current audit cycle, and the previous audit has been completed but not posted to GenTax, the auditor will need to obtain a copy of the EDA-25 from that audit. The Column C of the prior audit will have to be used for the Column A of the current EDA-25.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

d) Completing the EDA-25 When the Prior Audit Remains in Administrative Hearings & Litigation or the Audit is impacted by a Separate Audit That Remains in Administrative Hearings & Litigation

In these cases, unless the settlement agreements are signed, any subsequent audit adjustments for the protested audit years and carry years must use the unagreed audit figures. Audits are not to be held when an unagreed audit in Administrative Hearing and Litigation is involved. The audits are to be worked using the unagreed figures. When the settlement agreement is finally signed, then the Audit Perfection unit will adjust all related audits accordingly per the settlement agreement.

- If the current audit that the auditor is working has a prior audit for the same year in Administrative Hearings and Litigation and the settlement agreements are not signed, then the auditor must use the Column C, unagreed figures from the audit done prior to the audit they are conducting, when completing the Column A for the EDA-25 for the subsequent audit. This situation may happen in the case of additional changes from an RAR.

- If the current audit that the auditor is working has losses that are carried from a year that remains in Administrative Hearing and Litigation, then the auditor must use the loss amounts from the unagreed audit to carry to this tax year.

  - To get the unagreed figures for all audits in which the Notice of Deficiency was issued March 1, 2010 and after, the auditor can use GenTax. In the Audit View under the Working Papers sub-tab, see the Working Papers and click on the working paper that shows an approved status for the tax year you need. This working paper will contain the unagreed figures from the audit that is in Administrative Hearings and Litigation, which should be used to complete the current audit.

  - To get the unagreed figures for all audits in which the Notice of Deficiency was issued prior to March 1, 2010 the auditor must use the CAF.

B. EXPLANATION OF ADJUSTMENTS (EDA-27)

The EDA-27 gives an explanation of each line item audit adjustment made. Dollar amounts (where applicable) must be shown for every item of adjustment and each adjustment must be explained with citations from the Regulations and/or Tax Act.

The EDA-27 must be completed for ALL audits, both agreed and unagreed. An EDA-27 **must be** presented to the taxpayer (or taxpayer representative) with the appropriate

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

ICB notice (for audits completed in Dan - EDA-122, 124 or 125 and for audits completed in APT – EDA-122-B-APT, 124-I-APT or 125-I-APT).

- If a line item audit adjustment contains more than one item being adjusted (for example, two different items of non-business income being disallowed) then both items need to be broken down and explained on the EDA-27.

- For unitary audits, group membership changes must be discussed in the EDA-27. Companies which are being excluded or added as an "as filed" unitary group should be identified. Refer to Chapter 23 for a discussion of the information which should be included in a Unitary Determination and proper documentation of that report.

An Income Tax Notice of Deficiency must identify and explain the audit adjustments creating the proposed assessment. If the auditor does not properly identify the audit adjustments, it is difficult for Technical Review to prepare the Notice of Deficiency. For this reason, EDA-27s are reviewed very closely.

- Automated Notice of Deficiencies are now being generated. EDA-27s are the primary documents used in this automated Notice of Deficiency. For the automated Notice process to work and be correct, the EDA-27s must be very specific as to all adjustments made in the audit and must cite the correct paragraphs of the IITA and/or sections of the regulations which support the audit adjustments. Categories such as "computational errors" should be used sparingly.

1. APT EDA-27, Explanation of Adjustments

For audits completed in the CIT package (APT), the auditor should use the EDA-27 that is self-contained within that program. See the APT Reference Guide for details.

2. GenTax EDA-27, Explanation of Adjustments

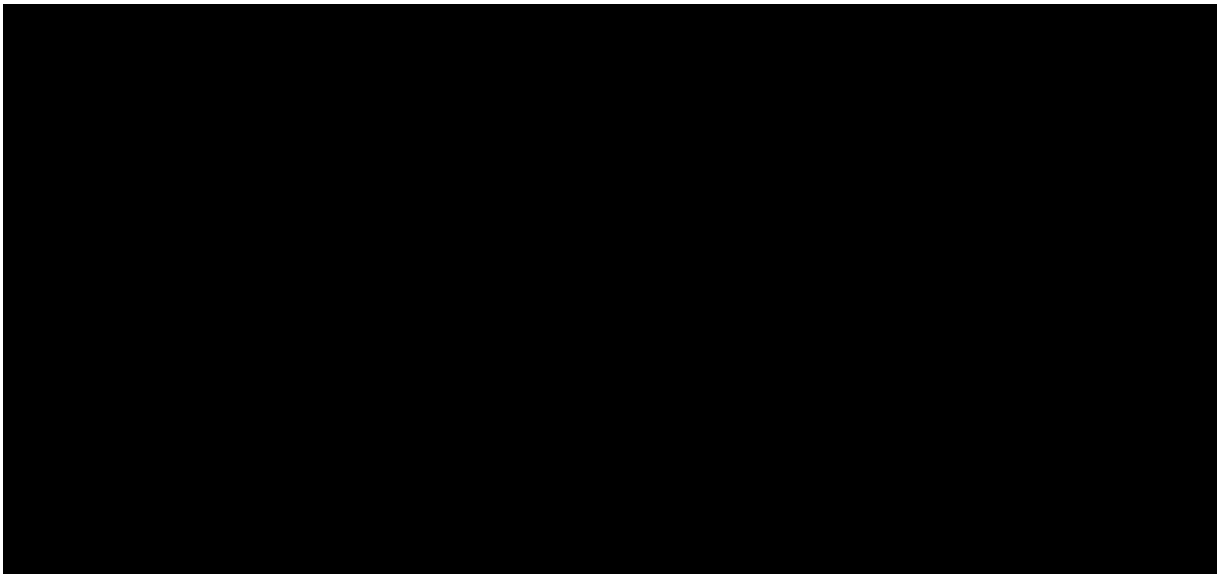
Starting June 22, 2015, the EDA-27, Explanation of Adjustments, became available in GenTax under the CRM tab, Letters sub-tab on the Audit Springboard.

For audits completed in DAN or CIT Standalone, this GenTax generated EDA-27 will be the only one accepted by Review/Perfection from 6/22/2015 forward. For audits completed in APT, the self-contained EDA-27 must be used out of that program.

Completing the EDA-27 in GenTax

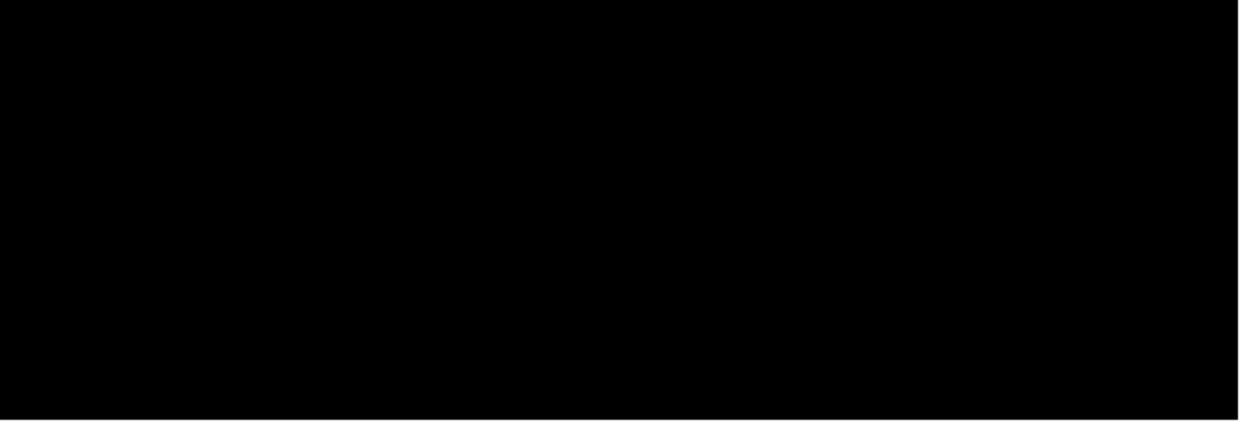
The EDA-27 can be accessed in the Audit Mail Types by clicking on the "Add" in the Letters sub-tab under the CRM tab on the Audit Springboard.

When applicable, an EDA-27 must be prepared (then saved) for each tax year under audit. Once the EDA-27 has been selected from the list of letters as shown above, it will be necessary to select the tax year that the form is being prepared for by clicking on the drop-down arrow in the *Filing Period* box, which opens showing the years under audit.



Once the tax year has been selected, the variables will be visible. The EDA-27 has been programmed to only show the variables which are applicable for the tax type and tax year.

It is necessary to select at least one variable…. Therefore, the “include” column is yellow (see above), which indicates it is a required field. Once one variable is selected, the “include” column will turn green. The variables can be sorted/filtered using the green “filter” field which is used in other GenTax documents also.



Some variables, like the Federal information displayed below, will not allow for the entry of figures in the “income change” and “tax impact” columns.

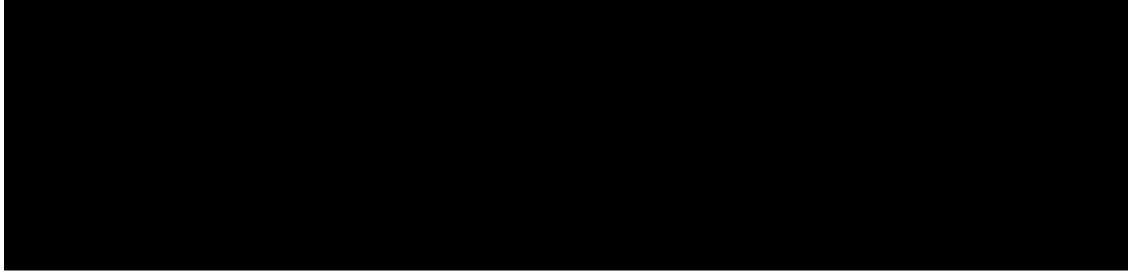
Other variables, where an income change and tax impact is applicable, allow for such entries.

Although available, the “Free Form” options found in each set of variables should only be used if no citation is applicable. Before using the “Free Form” option, the proposed citation must be approved by the supervisor.

Visible on the input screen is a running total for both the “income changes” and “tax impact”. This programmed function is for the auditor’s benefit for ensuring that the total dollar amounts are accounted for when being entered. These totals will NOT print on the actual EDA-27.

Like other letters, the EDA-27 should be reviewed prior to printing by clicking on the *Preview Letter* tab.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.



And, like other letters, the EDA-27 will need to be saved.

C. WAIVER OF RESTRICTIONS (IL-870)

The IL-870 essentially is the audit "agreement" form on which taxpayers not only consent to the audit results, but also waive their rights to a Notice of Deficiency and Administrative Hearing under IITA §904 and §908. (The taxpayer may still, however, pay the tax and subsequently file a claim.)

Note: For audits being completed in the CIT package (APT), the IL-870 will no longer need to be issued. See the APT Reference Guide for further details concerning this procedure change.

- The statutory deficiencies or over-assessments (reflected on the IL-870) are the increases or decreases in tax assessed, NOT the underpayment or overpayments. It represents the tax, penalty and interest CHANGES proposed in the audit.
  - These amounts are the increases or decreases to tax found in column "B" of the Auditor's Report. They should NOT include any previously assessed amounts (outstanding balances due) or pending refunds.
    - Example: If the audit increases tax by $7,000, resulting from changes to the apportionment formula, and the taxpayer still has an unpaid balance of $3,000 due to a valid math error on the original return, only the $7,000 is shown on the IL-870. This is the increase found in column "B" of the Auditor's Report, not the total underpayment found at the bottom of the form.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If the statutory deficiencies or over-assessments on the IL-870 are different from the actual under or overpayment at the bottom of the Auditor's Report, the difference should be explained in the "REMARKS" section of the IL-870 and explained in the Auditor's Comments.

When the proposed audit liability is being completely offset by Illinois net loss or excess credit carryforwards, the IL-870 should be completed as follows:

- The pre-loss or pre-credit audit tax liability should be entered as a positive number in the liability section.
- The identical reduction to the audit liability due to the loss or excess credit carryforward should be entered as a decrease (brackets) in the liability section.
- Any past statute refund amounts should be listed in the comments section and the net amount available to be refunded should be listed.

When only a portion of the proposed audit liability is being offset by the Illinois net loss or excess credit carryforwards, the IL-870 should be completed as follows:

- The pre-loss or pre-credit audit tax liability should be entered as a positive number in the liability section.
- The partial reduction to the audit liability due to the loss or excess credit carryforward should be entered as a decrease (brackets) in the liability section.
- Penalty and interest amounts based on the net liability should be entered as a positive number in the liability section.

For complete information on penalty and interest determination on the IL-870, see Chapters 42 and 43.

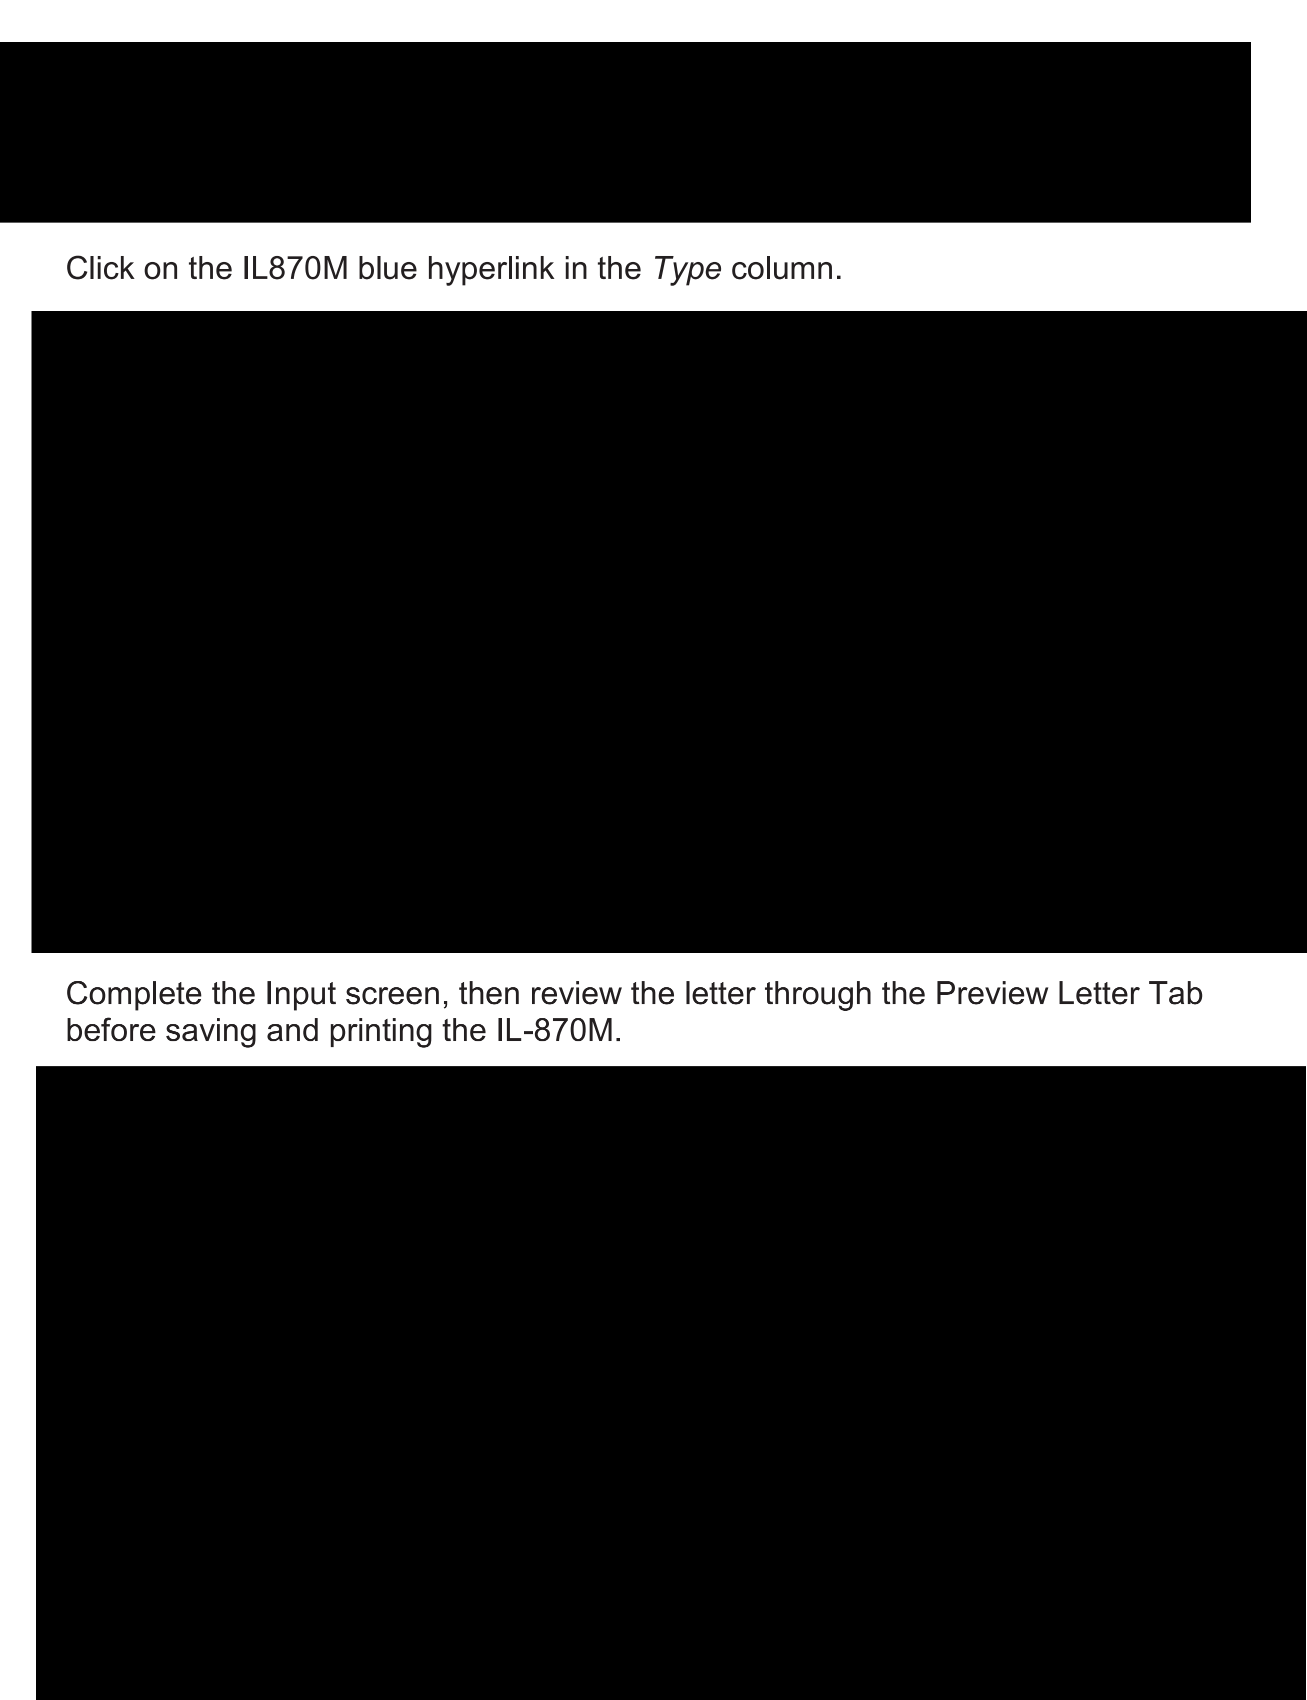
Note: The IL-870 cannot be used for adjustments that indicate zero tax changes, such as loss increases or loss reductions. These can only be agreed to by the taxpayer signing an amended return.

1. Generating the IL-870 from GenTax

When generating the IL-870 out of GenTax, the **IL-870M needs to be used**, as opposed to the IL-870, which should only be used for in-house automated WIT audits. Old standalone IL-870s should no longer be utilized. For audits completed in APT, an IL-870 no longer needs to be issued. See the APT Reference Guide for details.

When in the Audit View, click on the Letters sub-tab under the CRM Tab, then click on the Add Tab.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



Click on the IL870M blue hyperlink in the *Type* column.

Complete the Input screen, then review the letter through the Preview Letter Tab before saving and printing the IL-870M.

2. Superseding Versus Withdrawing Documents

If a taxpayer has signed returns or an IL-870, these documents cannot be superseded, they must be withdrawn. The auditor must take care to ensure that the changes that are requested on the more recent return/IL-870 are in statute.

Example:
A taxpayer filed a timely IL-1120-X for a claim that was later withdrawn to increase the taxpayer's claim. The problem is that the new 1120-X is out of statute to request any claim, and since the earlier claim was withdrawn, both are out of statute to request a claim.

Processing issues exist in cases where the auditor has written "superseded" across signed IL-1120-Xs or IL-870s, or the auditor used "superseded" in their language on these forms. The correct language should have been "withdrawn". Unless the taxpayer withdraws that IL-1120-X or IL-870, these are active forms and must be processed.

D. AUDIT COMPLETION LETTERS (EDA-143-XX)

The Audit Completion letter sets the Audit Completion Indicator and the Inf-Audit Complete informational transaction. The date in the transaction is used to calculate the UPIA 5 penalties at 20% on additional tax due after an audit has been completed. Without the Indicator the UPIA 5 penalties cannot be calculated correctly. Therefore, **all** audits must have an Audit Completion Letter (generated from GenTax) sent to set this indicator and transaction.

Available Audit Completion Letters:

EDA143CA Results – Return Approval *
EDA143I Results – IL-870 Information
EDA143IAPT Results – APT Auditor Reports [only for audits completed in APT]
EDA143LR Results – Net Loss Info (see Chapter 35 for details)
EDA143NC Results – No Liability
EDA143RR Results – EDA-153

* On May 25, 2015, a new GenTax Audit letter became available for Income Tax audits. Up until that point, Income Tax auditors had no access to a Notice of Audit Results which can be issued to cover an audit which contains both original and amended returns. The new EDA-143CA allows for this. In addition, the former results letter did not contain the required language for returns filed with unpaid balances which could be subject to additional penalty. The EDA143CA "Results Return Approval" replaces the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

following results letters: EDA143CA “Results- Amd Return Approval” and EDA143CO “Results-Original Return Approval”.

See Exhibit K, How to Create the Audit Completion Letter.

The Field Auditor will generate the Audit Completion letter the date that the IL-870 is issued to the taxpayer or the last day that the auditor charges hours to the audit.

- For audits in which an IL-870 is **required to be issued**, the completion date is the date that the taxpayer is issued the IL-870. For income tax, if an IL-870 is required to be issued for any audit year included in the track, all years in the audit will use the “Date of Issuance” on the IL-870 as the completion date.
    - The completion date is **NOT** the date that you send the audit to your Supervisor.
    - Auditors can still charge hours to the audit after the IL-870 is issued.
    - The Audit Completion letter is responsible for creating the audit completion indicator and transaction, so that any future tax increases will be assessed the 20% UPIA penalty. If a second IL-870 is to be issued to the taxpayer or if additional audit changes have been made that warrant a second completion letter, the first audit completion letter must be invalidated, and the audit completion indicator ceased and transaction (“Info Trans”) reversed (see Note below). This way when the second completion letter is created, the new audit completion date will be used to determine if the additional 5% UPIA penalty should be assessed.

      Note: Field and in-house staff should email Steve Manci or Tad Tucker to request the completion indicator be released before the second completion letter can be generated. The “Info Trans” transaction will be reversed also.
- For audits in which an IL-870 is **not required to be issued** for any audit year in the track, the completion date is the last day that the auditor charges hours to the audit. This includes but is not limited to:
    - No Liability audits
    - Claims filed by a taxpayer that are accepted as filed
    - Decreases or increases to losses or credits

Note: Once audit hours are charged to the last day, the audit should go to the RAS for review, and the audit should no longer be in the auditor’s inventory.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- If additional liability is established after an EDA-143NC (no liability) has been issued, the letter can be invalidated before the audit is posted. The auditor will need to revise workpapers and contact the taxpayer to let them know of the changes.

E. AUDITOR'S COMMENTS (EDA-64)

The EDA-64, Auditor's Comments, is one of the most important tools for an auditor to use throughout the audit process. This narrative is considered a "living" document, which should be started early in the audit process and then added to throughout the course of the audit. The Auditor's Comments should contain a thorough write-up of the items/issues as they are researched, considered and determined during the audit.

Procedures have been developed to standardize the headings and the appearance of the Auditor's Comments yet remain flexible for auditors to individually develop their audits according to their own thoughts and writing ability. The Comments should follow the suggested format.

Auditor's Comments should include the following sections:

- Cover
- General Background Information
- Discussion of Issues
- Taxpayer Position
- Auditor's Conclusion
- Specific Processing Notes
- Exhibits

1. Cover

The Cover page includes the following information:

Title (AUDITOR'S COMMENT SECTION)
Date of Report
Taxpayer Information
  Name
  Address
  City, State, Zip
Taxpayer FEIN
Audit Period
Audit Discussed With
  Name, Title, Address (if different than above)
  Phone Number

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2. General Background Information

This section should provide a brief description of the taxpayer's corporate history including the date of incorporation and its business activity and corporate structure. (If the taxpayer is a member in a unitary business group, an in-depth discussion of the business activity and corporate structure will be included in the unitary determination.) It should also include a history of the taxpayer's filing status.

The following guidelines reflect examples of the type of questions to be answered or information to be provided in this section. As each taxpayer is distinctively different, the Auditor should develop his/her own synopsis of each account, keeping in mind the following areas:

- The date the taxpayer began filing in Illinois. If the taxpayer is a non-filer, this issue should be developed in the "Discussion of Issues" section.

- Briefly describe the history of the taxpayer's account.
  - Has the taxpayer's filing method changed?
  - What is the current status of the taxpayer's account?
  - Were there any adjustments made to prior years which affect the current audit period?
  - Are there any outstanding math errors?
  - Were they resolved prior to the beginning of the current audit?

- Identify the following dates, where applicable to the case, in order to properly monitor the various statutes involved:
  - The original due date
  - The extended due date
  - The date the original return was filed
  - The statute for any math errors
  - The date of any liens
  - The date any claims for refund were filed reflecting state or federal changes
  - The last day to issue a Notice of Deficiency

- For separate basis (non-unitary) taxpayers, describe their principal business activity and operations. What is the product line? Are there multi-state sales? Nexus in other states (for purposes of throwback sales, application of PL 86-272, etc.)? If any of the above represents issues, full discussion should be given in the "Discussion of Issues" section.

- Unitary determinations will normally be an issue and should be fully discussed in detail in the "Discussion of Issues" section. When the taxpayer and the auditor agree that the original returns were filed under the correct unitary determinations, the auditor should provide statements to this effect and a brief but exact description of the unitary business.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Complete listing of entities that have nexus and what is creating that nexus activity.

- The reason for the audit referral.

3. Discussion of Issues

This section of the Auditor's Comments is probably the most important part of the entire audit, especially in the event of an unagreed audit. Should the taxpayer wish to litigate the audit in court, there is a very good chance that NO further evidence will be produced during the hearing other than that already in the audit. Therefore, it's imperative that each issue be developed as fully as possible, by identifying source documents, etc.

Evidence is something presented to a court which tends to establish or prove an allegation or point in question. It is an auditor's responsibility to gather all relevant evidence before reaching a conclusion. The evidence should be documented in the audit work papers and should establish both the auditor's and the taxpayer's position on the issue(s). If an adjustment is proposed and the taxpayer disagrees, the evidence on which the taxpayer bases his position is important to anyone attempting to resolve the issue.

A full explanation of the audit issues should be provided. The unitary determination is included in this section, in addition to an explanation of the modifications, non-business income, partnership income, apportionment formula, intercompany eliminations, nexus, throwback sales, penalties, interest, etc., involved in the specific case.

- The unitary determination will be developed from various sources of information. Each source shall be identified and referenced by "Exhibit A, B, C, etc." and placed in the "Exhibit" section. If the auditor, for example, is relying upon certain parts of the S.E.C., 10-K report as part of the unitary determinations, the discussion of this issue should include citation of the source and page number. The actual document (Exhibit 10-K) should be highlighted to take the reader specifically to the information relied upon, should an in-depth review be required.

- Unitary group membership changes must also be discussed in this section. Companies which are being eliminated or added to the "as filed" unitary group should be identified as well as the reasons for their exclusion or inclusion. Refer to Chapter 23 Unitary Determination.

Each item involved in the return should be explained fully. The following information should be included, where applicable:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- How each item was originally reported.
- Type of adjustment(s), if any, made.
- The basis for each adjustment (i.e. IITA, Regulations, etc.).
- The amount of each adjustment.
- The books and records examined.
- The audit techniques and procedures used.
- Any other information which specifically explains the adjustment(s) and fully develops the issues.

Even if a specific item was not adjusted in the audit but its identity or what is included in the figure is not clear from the return(s) filed, an explanation and breakdown of the originally filed figure should be included in the Auditor's Comments.

Each adjustment must be supported by citing the proper authority (IITA, Regulation, Court case, etc.). The auditor should, in addition to identifying the proper citation, also provide an interpretation as well as its application to the issue.

Do NOT cite the following in the Auditor's Comments under any circumstances:

- the Audit Manual
- any Audit Manual Update (AMU)
- Technical Responses
- TAMs
- Revoked PLRs. Beginning back on July 1, 2002, every PLR is revoked on the date that is 10 years after the date of issuance.

Note: If the taxpayer submits an ICB-1, Request for Informal Conference Board Review, after the issuance of the EDA-122, 124, or 125 or EDA-122-B-APT, 124-I-APT or 125-I-APT, the auditor's comments can only mention the following:

- Date the taxpayer petitioned ICB
- Date ICB accepted or rejected jurisdiction
- Date ICB Action Decision is issued
- Results as stated in the Action Decision

NEVER reference email correspondence between the auditor and ICB, the Conferee Recommendation or any other activity that resulted during the ICB process.

4. Taxpayer Position

This section reflects the taxpayer's disagreements with the audit results. In discussing the examination with the taxpayer at the closing conference, the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

auditor should transcribe the taxpayer's verbal statements as accurately as possible.

- Many times the taxpayer's representative, due to lack of authority, will not be able to make legal statements at the closing conference. The audit results may have to be presented (by taxpayer's representative) to upper management or taxpayer's legal staff for discussion of legalities or hazards of litigation. In this case, the auditor should grant the taxpayer a short period of time (depending on the complexities of the issues) to prepare his arguments and present them in either another office conference or, preferably, in a written letter than can be used as a reference document in the audit file.

Whenever possible, do not allow the taxpayer to disagree based upon generalities. Have the taxpayer pin-point reasons for disagreement citing court cases, IITA, Regulations, legislative intent, etc. It is very important that accurate communication exists in this area, and that mere confusion is not the reason for an unagreed audit.

5. Auditor's Conclusion

This section will explain the final outcome of the audit. Included within this section may be:

- Comments on the degree of cooperation extended by the taxpayer.
- Identified specific problems encountered.
- Was the taxpayer offered an office conference?
- Summarize the amounts of deficiency, penalties, and interest for each year.
- Was an IL-870 signed and payment processed? (If so, identify the dates the form was signed and/or the payment received.)
- Is there at least **2 months** (60 Days) remaining on the statute for Technical Review, or does this case represent a priority requiring an immediate Notice of Deficiency?
- At the bottom of this section, the auditor must sign and date the report as follows:

Auditor's Name ______________________________

Signature ______________________________

Title ______________________ Date ______________

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Audit conclusions are generally based on evidence, facts and inferences. Evidence is something which tends to prove a fact. A fact is a conclusion based on evidence about what actually happened. In making factual conclusions, the credibility of the evidence is evaluated, and the relative weight of conflicting evidence is judged. An inference is a conclusion based on the facts. It is important that the auditor's conclusion be based on these factors in supporting the Audit position.

6. Specific Processing Notes

Audit changes or adjustments per period should be well documented as to **specific** instructions for the processing of the audit. A processing checklist should be utilized as to what documents within the audit need to be processed. The following represent common processing issues and how they should be addressed:

- ✓ Auditor's Report/Amended returns – if multiple returns are included, indicate the proper order in which they need to be processed.
  Example: For the 2014 tax period, four amended returns have been included in the audit. The auditor must indicate the order in which these returns should be processed.
- ✓ Schedule UB changes –

  Note: For audits being completed in the CIT package (APT), the auditor must use the Schedule UB that is self-contained in that package. [Refer to the APT Reference Guide for details]. For audits completed outside of APT, CXC25SUP is required when adding separate Illinois filers to a combined return or combining two or more unitary groups that did not originally file as one unitary group.

  - if members have either been added or removed from the UB group, these changes should be indicated as to the members affected. The EDA-25 Supplemental (CXC25SUP) and the Schedule UB should reflect the changes and must be included for processing. For instructions on completing the CXC25SUP, see Chapter 28, Unitary Determination.
  - if there are changes to the IL-1120 Line 1 figures, a corrected Schedule UB must be provided.
  - if there are changes to Sales Everywhere and to Illinois Sales on the return, a corrected Schedule UB must be provided.

  Lines that need to be entered off of the Schedule UB for Members being added, deleted or changed are as follows:
  - Step 2, Line 28
  - Step 2, Line 29a
  - Step 2, Line 29b

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Step 4, Line 2
- Step 4, Line 3
- Step 4, Line 6
- Step 4, Line 7
- Step 4, Line 9

✓ Capital Loss Carryback (C/B) – need all forms and specific documentation for any C/B change.

✓ Losses – loss schedules must be provided with specific instructions as to carryforward/carry back amounts. NOL screens must be reviewed and included in the audit for loss verification. Also, merged or acquired losses from other Corps must be indicated.

✓ Stop Processes – if a "stop" indicator is present in GenTax, any documentation received during the audit that addresses that issue, should be flagged with specific processing instructions.

✓ Manual Deactivation of the Credit – GenTax views a return correction adjustment as timely change in tax liability if the original return receive date is timely. A manual deactivation of the credit must occur to prevent this money from being refunded. The refund should be deactivated to prevent it being issued without a review of the statute of limitations issues. Specific processing instructions must be included if a manual deactivation is necessary.

✓ Schedules – the following need to be attached to the EDA-25 for proper processing in GenTax:

Tax Year	Required Schedules
2007 - 2008	Schedule 1299-D and Schedule UB
2009	Schedule 1299-D, IL-4562, Schedule M, Schedule UB
2010	Schedule 1299-D, IL-4562, Schedule M, Schedule 80/20, Schedule UB
2011 - 2016	Schedule 1299-D, IL-4562, Schedule M, Schedule 80/20, Schedule INL Schedule UB
Fiscal year 2011 only	Schedule 1299-D, IL-4562, Schedule M, Schedule 80/20, Schedule INL Schedule UB, AND Schedule SA

Note: In APT – required schedules (workpapers) are self-contained. See the APT Reference Guide.

✓ Auditor Created Spreadsheets – if the auditor creates a spreadsheet (or Word document) to support or explain adjustments in the audit, these supporting documents must be included in the audit, and specific processing instructions should be provided if these documents affect the processing of the audit.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- ✓ Multiple EDA-25s – if multiple EDA-25s are required in the audit, supporting documentation must be attached to each EDA-25 as warranted.
- ✓ Superseded Forms – all superseded forms should be clearly marked and placed in the back of the audit file.
- ✓ EDAs for Down Foot Purposes – all EDAs that are down footed for verification purposes only should be clearly marked "**Do not process**" and placed in the back of the audit file.

7. Exhibits

Exhibits referenced in the text of the Auditor's Comments should be listed here in the order in which they appear in the narrative.

For Example:

Exhibit A – SEC 10-K
Exhibit B – Annual Report
Exhibit C – Executive Committee Minutes
Exhibit D – Organization Chart
Exhibit E – Policy Manual (Copies or Transcripts)
Exhibit F – Transcript of Interviews

F. AUDIT SCHEDULE FINALIZATION

The audit file is essentially the basis of the Department's legal case in any future protest proceedings, so the auditor should be thorough and precise. Many audit issues are won or lost at the hearing or court level based primarily on the quality and completeness of the audit. Even if the auditor is involved in the protest proceedings, the amount of time that may expire between the close of the audit and the protest proceedings could be quite lengthy. Without proper documentation, it would be very difficult for an auditor to remember precise details that are important to the defense of the Department's case.

The type and number of schedules vary slightly depending on the taxpayer's position regarding audit adjustments. Depending on the complexity of any specific case and the issues involved, additional schedules may be necessary. Specific comments are necessary where schedules normally prepared are not needed. It is important to remember that a sufficient amount of information should be included to allow the field office, Technical Review and the Office of the General Counsel to understand what adjustments were made and why.

1. Federal Schedules for Income Tax Audits

- Pages 1 thru 4 US 1120, US 1120S, US 1065, US 1041 (whichever is applicable, with supporting documents)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Pro-Forma Consolidated Income Statement & Balance Sheets, Schedule A, Cost of Goods Sold, Schedule C Dividends, and Schedule M-1, along with Schedule M-3 and Form 8916-A.
- Schedule 851 (Affiliations Schedule), list of shareholders, partners, beneficiaries, whichever is applicable
- Form 1120-FSC (Foreign Sales Corporation Return)
- Form 1120-F (Foreign Corporation Return)
- Schedule K-1 (Partner's share of income, credits, deductions, etc.)
- Schedule D (Capital Gains & Losses)
- Schedule 4797 (Sales of business property)
- Form 4562 (Depreciation & Amortization) for RTIC credits
- Form 6765 (Credit for increasing research activities) for R&D credits
- 10-K report or Annual report (Overview of a company's business), whichever is available

The above stated federal forms and schedules serve as documentation for potential issues to be examined in the table below.

AUDIT ISSUE TO BE EXAMINED	USEFUL FEDERAL DOCUMENTATION
Parent (controlling) corporation identification	Form US1120 – pages 1-4 with supporting docs to verify income, deductions, etc.
Unitary Grouping	Schedule 851, Form 1120-FSC with schedules, 10-K reports, Annual report, Form US1120 of companies not in the consolidated return, Schedule M-3 and Form 8916-A, Form 7004
Federal Taxable Income	Consolidating income statement, Form 1120-F, Form 1120-FSC
Partnership Income (Form US1120 – Line 10)	Form US1065, Schedule K-1 for each partnership interest
Non-business income	Schedule D – Capital gains (losses), Schedule 4797, any other federal schedule indicating non-business income

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Modifications	Page 4 US1120 M-1 detail schedule, Schedule C dividend schedules
Credits	Federal depreciation schedules Form 4562, Form 6765, R&D credits
Everywhere factors	Consolidating balance sheets, Schedule A, CGS detail statement

2. Illinois Schedules for Income Tax Field Audits

- PROD-1
- EDA-51 Audit Index
- IL-872 Consent to Extend Statute, if applicable
- IL-870 Consent for Assessment or Overpayment
- Unitary Payment Offset Schedule, if applicable
- IDR-829 Great Lakes States Questionnaire
- Auditor's Comments
- Letter of Comments for IL-1040/1041/1065/1120-ST/WIT
- EDC-5 Audit History
- IL-2848 Power of Attorney, if applicable
- EDA-122 Notice of Proposed Deficiency
- EDA-123 Notice of Proposed Liability
- EDA-124 Notice of Proposed Deficiency& Claim Denial
- EDA-125 Notice of Proposed Claim Denial
- EDA-153 Acceptance of Revised Claim for Refund
- AUB-2, IF Unitary
- EDA-27 Description of Audit Adjustments
- Worksheets of Adjustments
- K-1-P (Partners & Shareholders) and K-1-T (Trusts & Estates)
- Completed EDA-24 (Ind.), EDA-25 (Corp), or EDA-26 (Fiduciary), EDA-92 (1065), EDA-93 (S-Corp), IL-1904 (WIT), EDA-3 (WIT Acc Filers), IL-1023-C (Composite), IL-1000 (Pass-Through Entity Payment)
- IL-1120-X (1120), IL-1065-X (1065), IL-1120-ST-X (1120-ST), IL-1041-X (1041), IL-1023-C-X (1023-C), IL-1040-X (1040), IL-941-X (WIT), if obtained
- Worksheets for Penalty and Interest, if applicable
- Schedule of Property/Payroll/Sales Everywhere and IL
- State by state break-down factor(s), allocation working papers
- RTIC Gross Receipts Test Schedule (CXGRRCPT)
- Loss Schedules, if applicable (CXILLOSS, CTILNLD, CXUSNL5G, etc.)
- Loss Reduction Letter, if applicable
- Verification of payments (if not covered in printout)

- EDA-8-A Collection/Legal Action Support, if applicable
- ICB Action Decision, if applicable
- IL-3990 Reviewer's Memorandum, if applicable

It is not necessary to prepare Property, Payroll and Sales factor schedule; however, property, payroll and sales should be reviewed for all companies. If they are prepared, they must be included in the audit file.

The RTIC Gross Receipts Test is required in all audits for years ending on or after January 1, 1994 where the taxpayer claims the RTIC. Therefore, the schedules and workpapers prepared as a result of performing the test must be included in the audit file.

In audits where the taxpayer is claiming federal net operating losses or Illinois net loss carryovers, the Auditor is required to verify the loss carry over. All schedules and workpapers generated in that verification process must be included in the audit file.

All working papers generated in the audit should be placed in the file without exception.

G. AUDIT WORKPAPER SUPPORT

Audit working papers are the connecting link between the taxpayer's records and the auditor's report. They document all of the work done by the auditor and provide the justification for the auditors' adjustments. Working papers can take on many different forms such as:

- analyses of ledger accounts
- photocopies of minutes of directors' meetings
- organization charts
- flowcharts
- working trial balances
- audit programs
- Questionnaires
- letters of representation from the taxpayer or legal counsel
- intra-departmental correspondence
- State by state allocation working papers (should be a requirement)

All of these schedules, notes and documents are part of the auditor's working papers. Thus, the term **audit working papers** includes all final and superseded documents that have been given to the taxpayer.

Additional benefits to well-prepared audit working papers include:

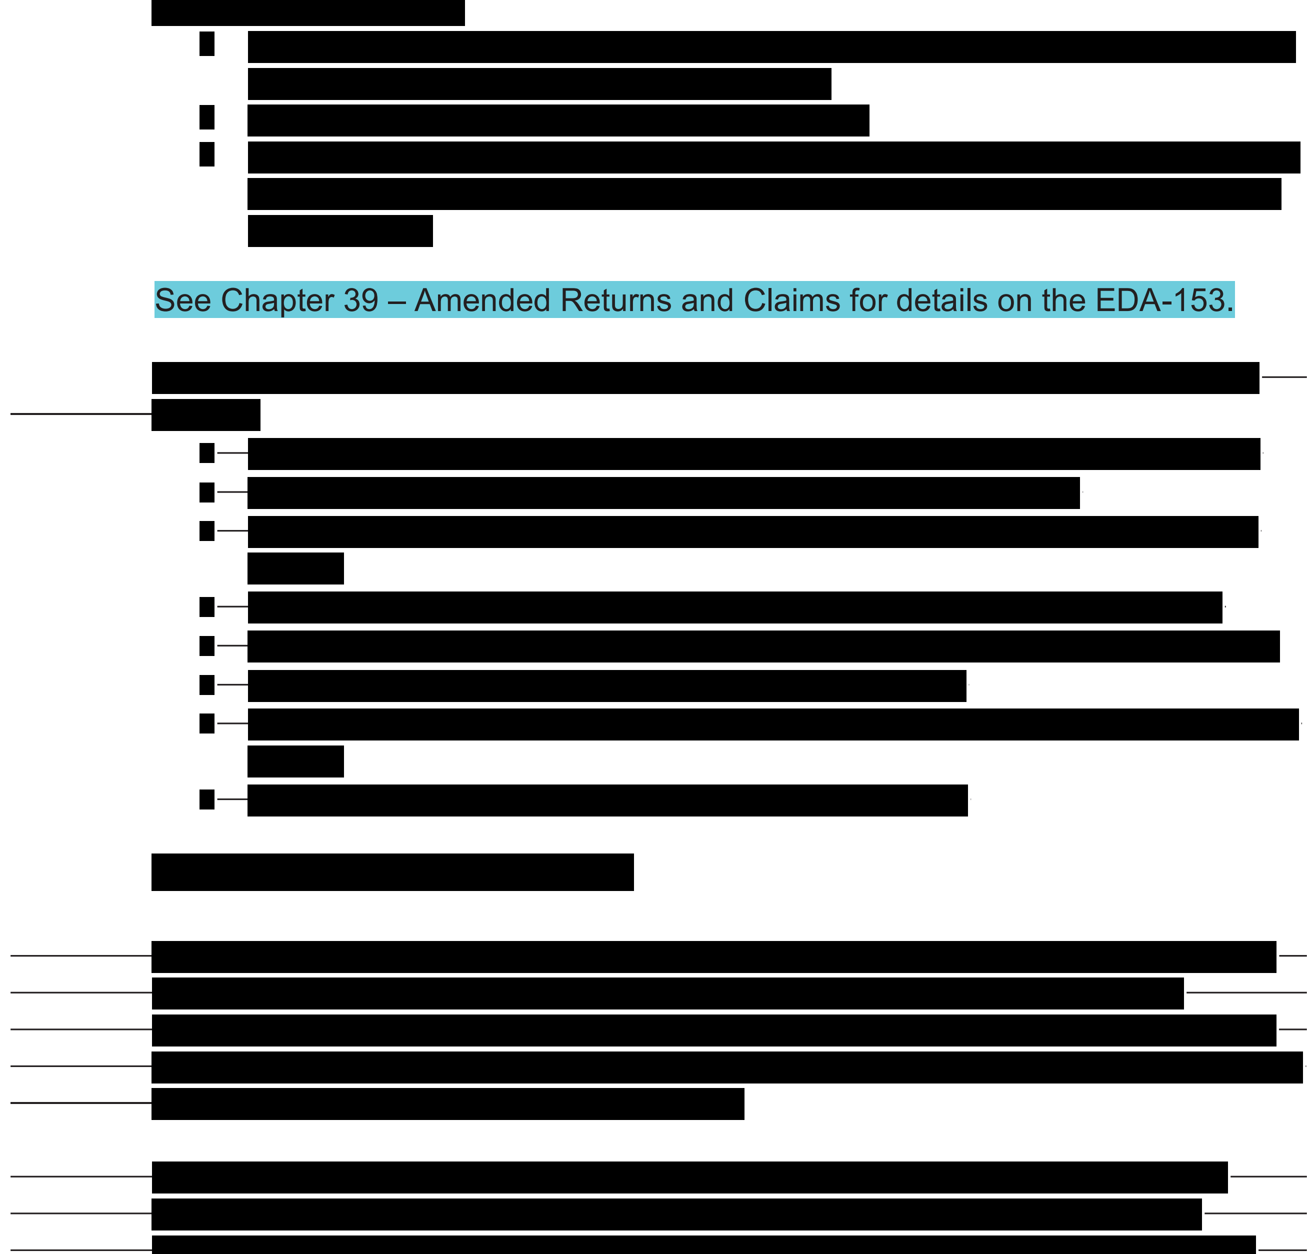
- documenting an issue that may go to administrative hearings, independent tax tribunal, or court

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- aiding managers and supervisors in reviewing the auditor's work by providing the support for the auditor's report
- aiding in planning and conducting future audits of taxpayers. In addition, working papers that are given to the taxpayer provide useful information for preparing their future income tax returns.

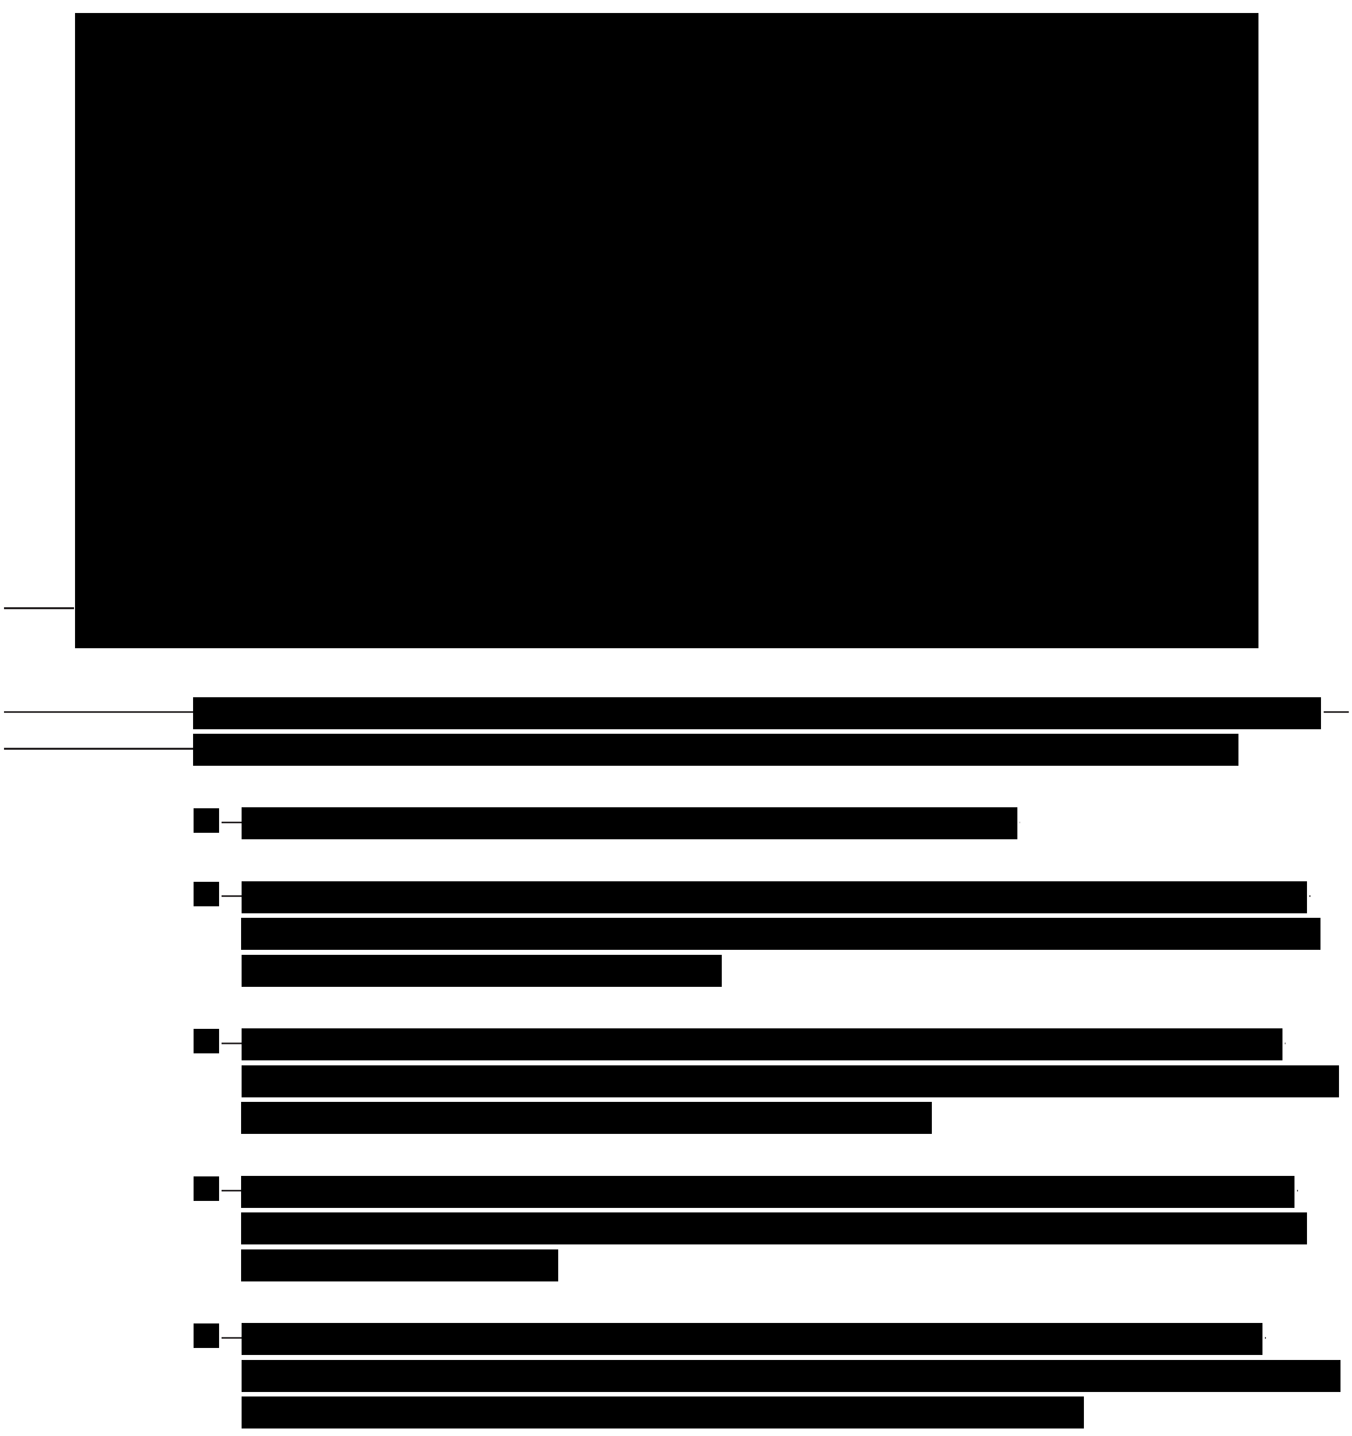
H. EDA-153 ACCEPTANCE OF REVISED CLAIM FOR REFUND

~~1. Purpose of the EDA-153~~ This section being moved to Ch. 39. Updated Ch 39 not approved/released out yet.

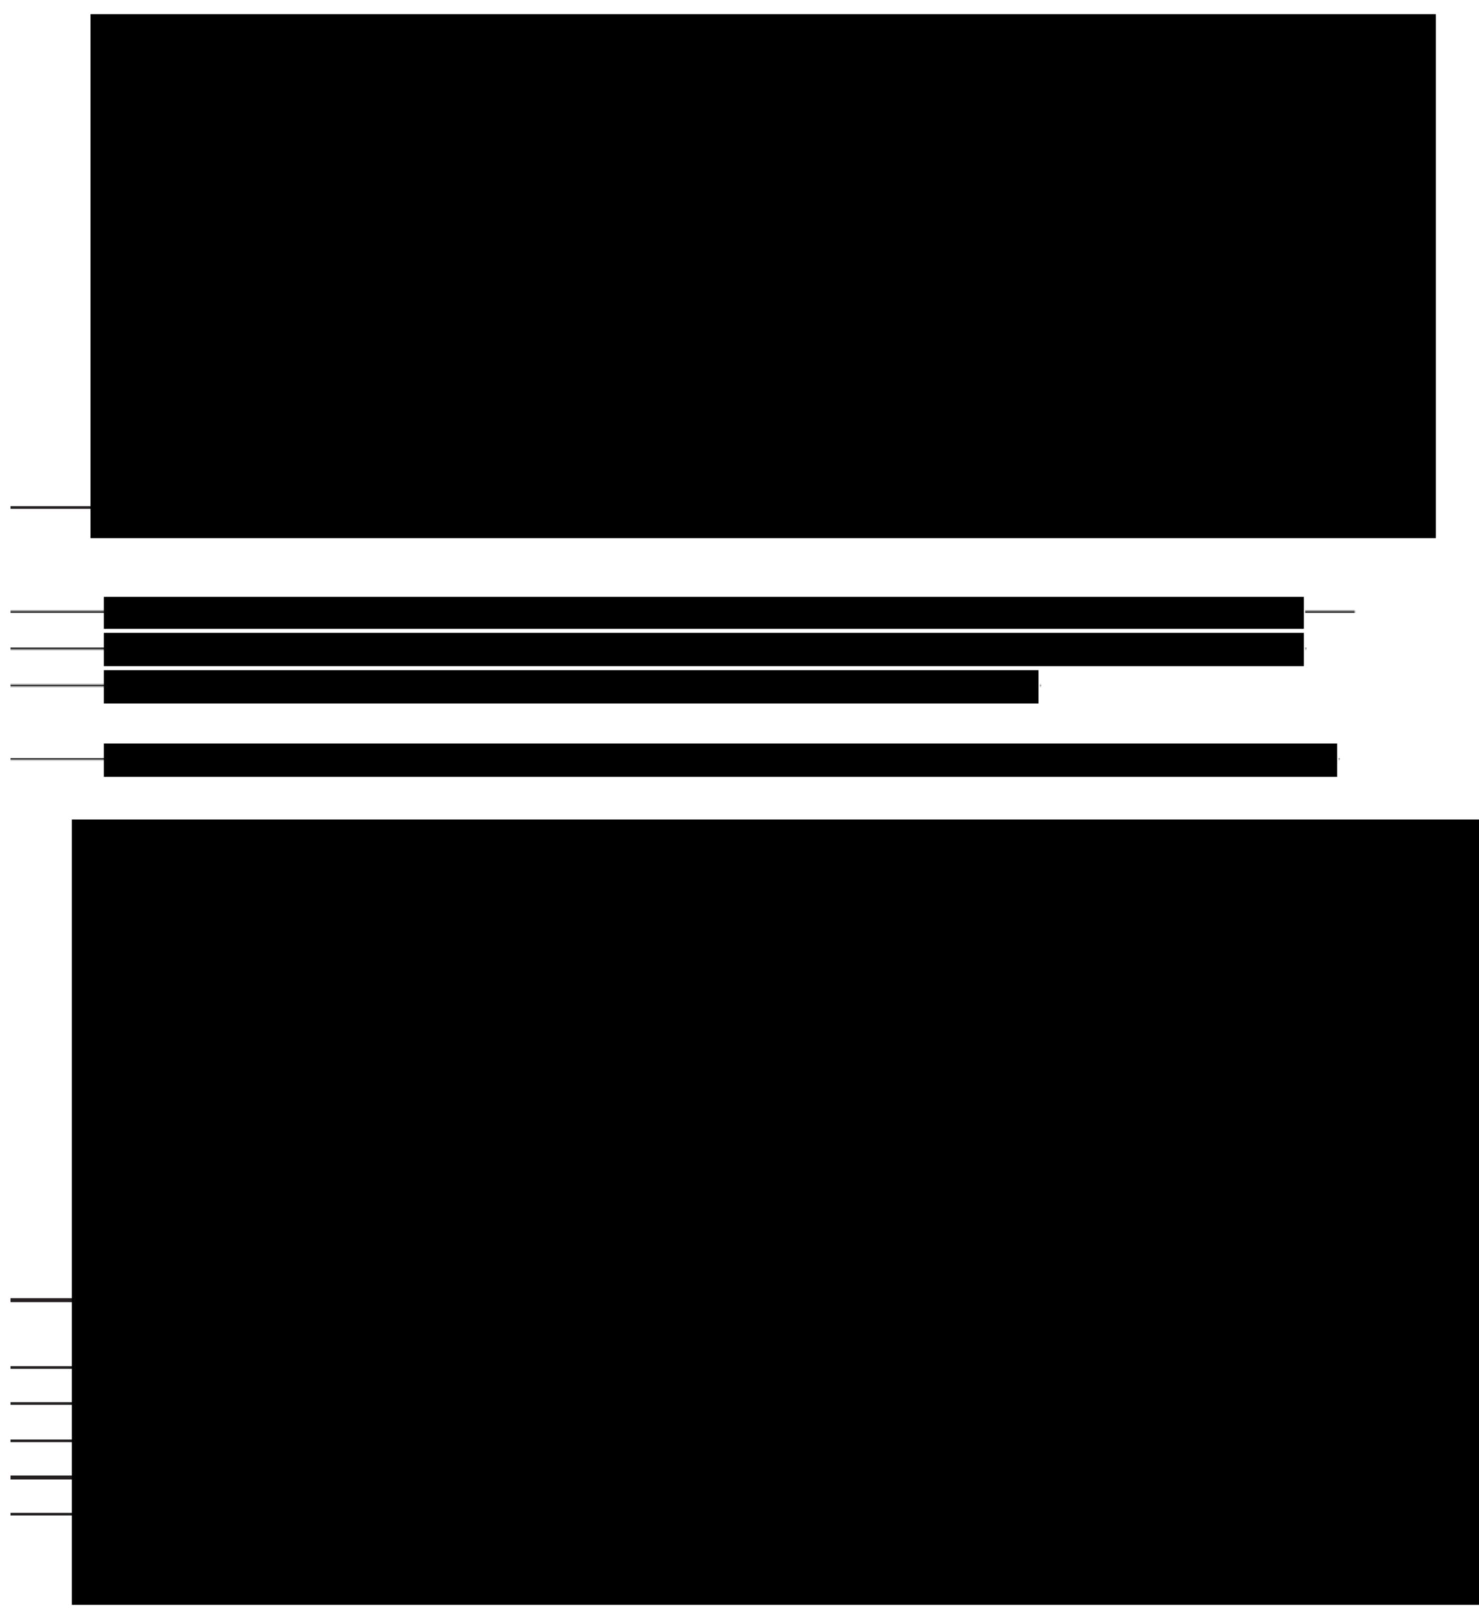


See Chapter 39 – Amended Returns and Claims for details on the EDA-153.

~~Click on the EDA-153 blue hyperlink in the *Type* column.~~

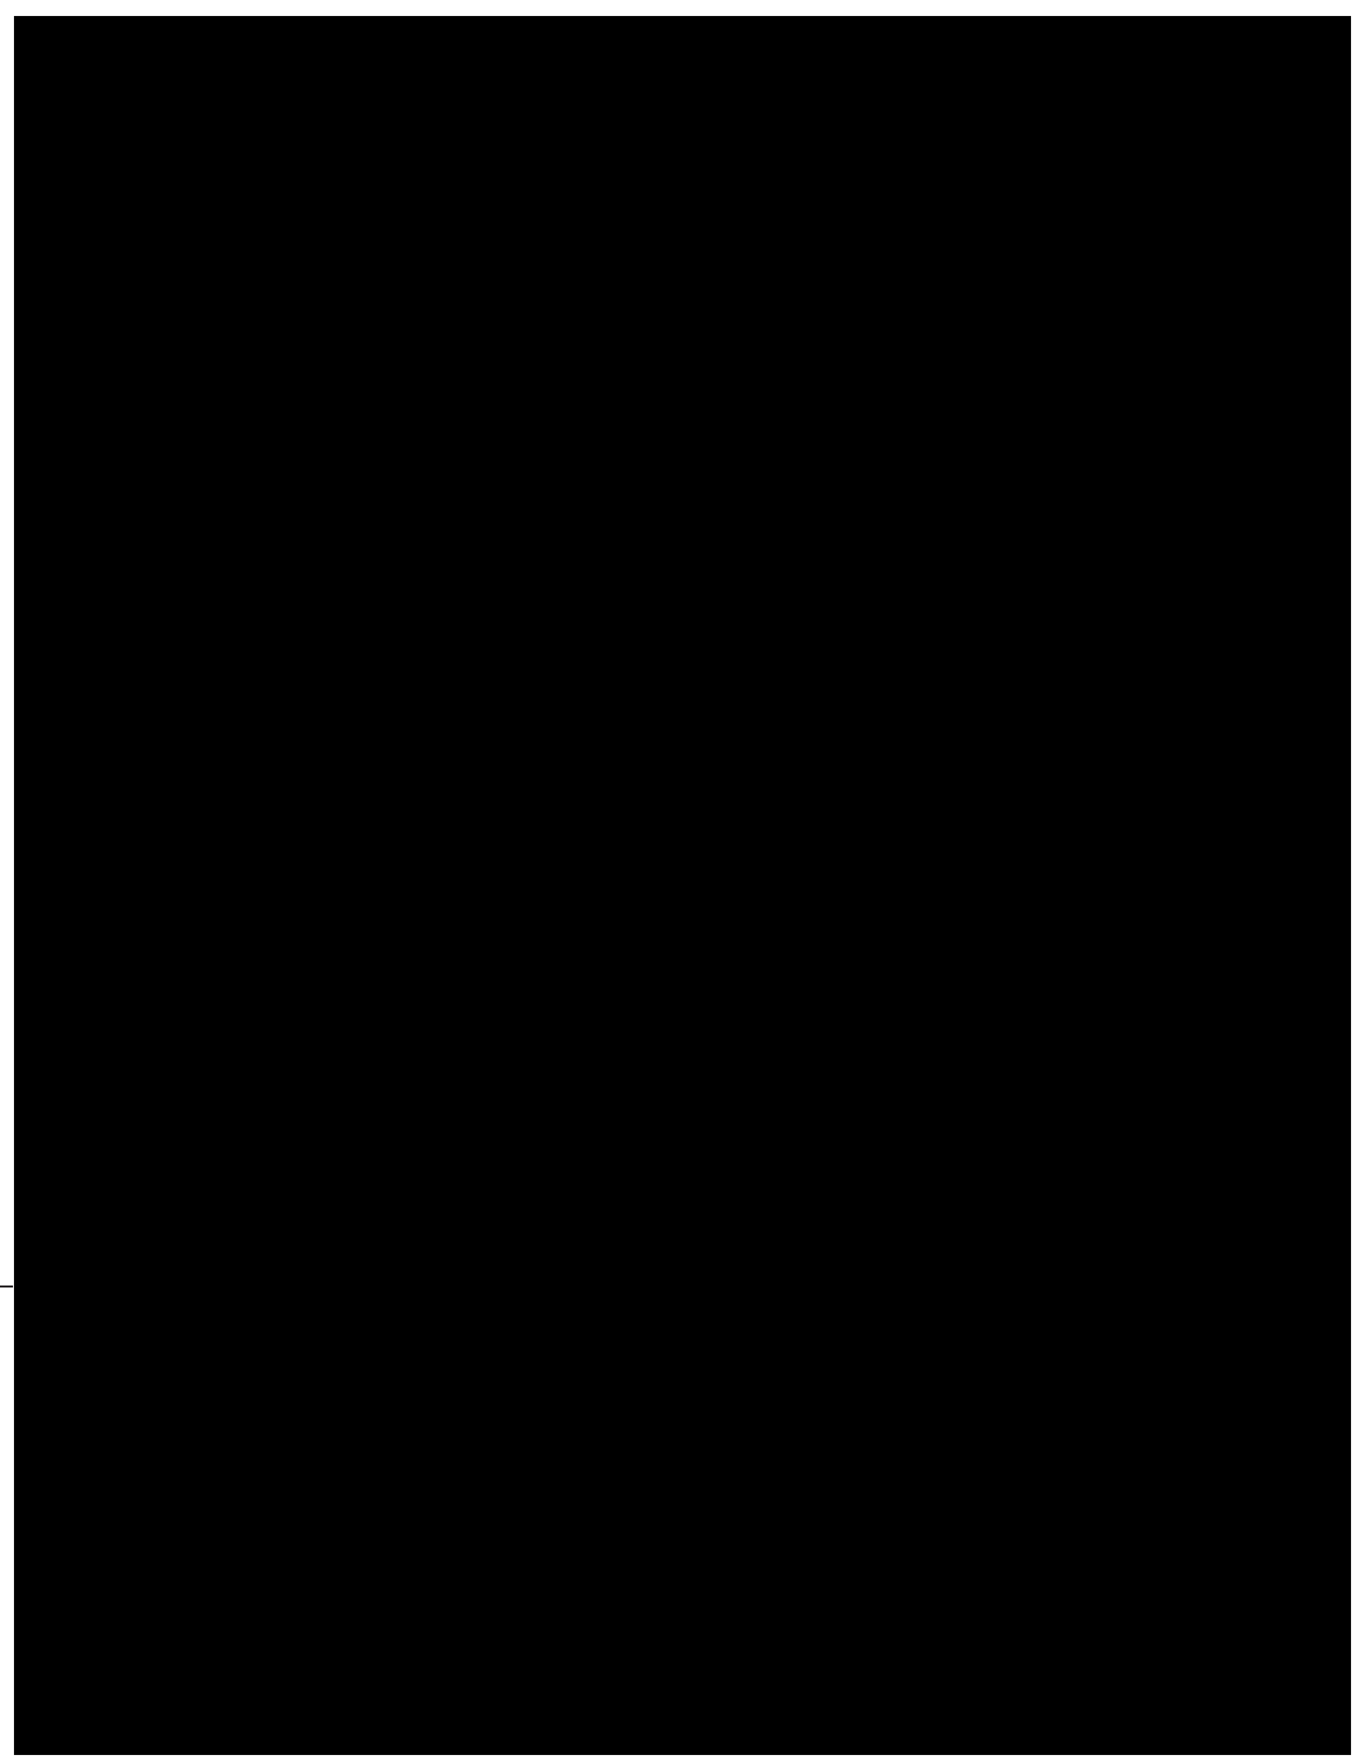


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

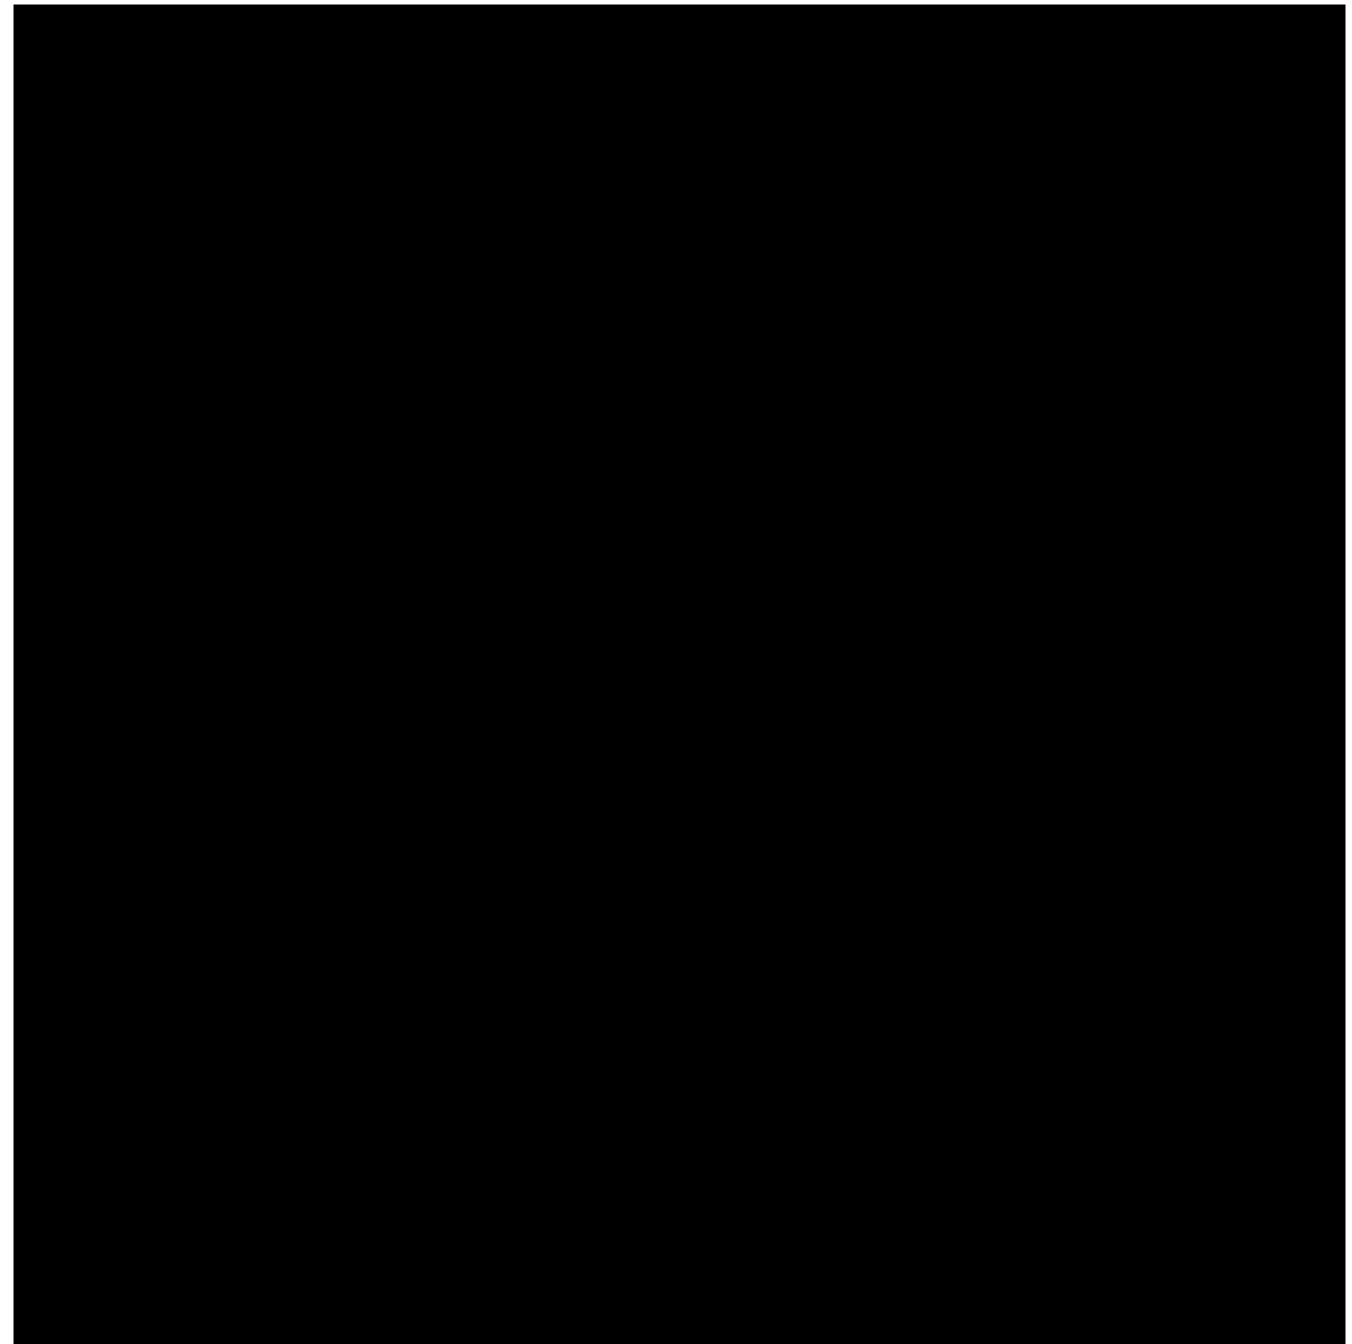


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



XI. CLOSING CONFERENCE

During the closing conference with the taxpayer, the auditor will:

1) Maintain confidentiality per IITA § 917.
2) Review the audit results with the taxpayer.
3) Determine the collectability of any liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A. CONFIDENTIALITY

It is important to reference the effect of the Confidentiality Clause when discussing audit results with taxpayers and/or their representatives as seen in IITA § 917. There are exceptions to the confidentiality restrictions within § 917, as the provisions do not apply if the information is being provided to a licensed attorney representing the taxpayer where an appeal or protest had been filed on behalf of the taxpayer.

The question of confidentiality occasionally arises in the performance of unitary apportionment audits. Many times, a corporation may own a subsidiary during the audit period however the parent has sold the subsidiary's stock prior to the actual audit procedure. If the two companies are determined to be members of a unitary group, the findings of the audit, when discussed with one company, will contain information regarding the other, now unrelated, corporation. The Department would consider any official discussion of audit findings with the taxpayer as within the scope of `official procedures for collection of state tax'.

See Chapter 1 for more information on Confidentiality.

B. AUDIT REVIEW WITH TAXPAYER

Important: Before the audit is ever reviewed with the taxpayer, all final working papers must be reviewed with and approved by the RAS. This alleviates any questions/issues that may arise if "supervisor reviewed" after being presented to the taxpayer.

- Each proposed adjustment detailed in the audit working papers must be discussed with the taxpayer. An EDA-27, Explanation of Adjustments, **must be** presented to the taxpayer (or taxpayer representative) with the issued ICB notices (EDA-122, 124 or 125, or EDA-122-B-APT, 124-I-APT or 125-I-APT).
  - It should be made clear to the taxpayer, or the taxpayer's representative, that the schedules are the auditor's recommendations which are subject to review by both the field office and Technical Review, and, that further work may be necessary if either takes exception to the schedules prepared.

- The audit conclusion and processing procedures should also be explained.
  - If the taxpayer agrees to a proposed adjustment, every attempt should be made **to get prompt payment** of the tax, penalty and interest, plus signature(s) on the IL-870. The IL-870 not issued in audits completed in APT.
  - If the taxpayer disagrees, the protest and hearing procedures should be explained.

- Once the working papers have been thoroughly reviewed by the taxpayer, any additional information submitted by the taxpayer has been examined and the

working papers revised as necessary, the final step in the audit process is arranging all of the various working papers, evidence and processing forms into an Audit package.

C. ISSUANCE OF INFORMAL CONFERENCE BOARD (ICB) FORMS

ICB forms must be issued unless NL or statute is expiring within 60 days. These forms include:

1) For audits completed outside of APT –
   - EDA-122 (the 122B in Gentax)– Notice of Proposed Deficiency

   If there is no tax liability, do not issue this form.
   - EDA-124 (the 124I in Gentax) – Income Tax Notice of Proposed Liability and Claim Denial
   - EDA-125 (the 125I in Gentax) – Income Tax Notice of Proposed Claim Denial

   If the claim is agreed to, do not issue this form.

2) For audits completed in APT –
   - EDA-122-B-APT
   - EDA-124-I-APT
   - EDA-125-I-APT

   These new letters for APT audits are still generated in Gentax from the Audit Springboard and have the same functionality. These new letters have been modified to conform to the new procedures that have been put in place with the APT program. Specifically, the changes related to when a taxpayer can sign auditors reports with the Jurat language to agree to an audit at the ICB rights level. These letters are the same but remove the IL-870 language since the taxpayer is being prompted to sign auditor's report(s) instead.

Any discrepancy with the auditor's proposal will require that the supervisor discuss further issue development, removal of an issue or request additional documentation to be obtained to support the issue. **ICB forms cannot be issued until these items are addressed. Additionally, ICB forms can be rescinded with Division Manager approval.**

Informal Conference Board forms (ICB-1 and ICB-2) should be issued along with the EDA-122, 124 or 125, or EDA-122-B-APT, 124-I-APT or 125-I-APT. Note: Forms ICB-1 and ICB-2 have been updated as fill-in savable pdf forms that can be accessed on the Department's website under Forms, Other, Informal Conference Board.

1. Prior to Issuance of ICB Forms

Auditor's Letter of Comments should be prepared and submitted to supervisor for review prior to the issuance of the ICB forms. The supervisor must agree with the established audit issues before the taxpayer is presented with the ICB forms.

Supervisors must make sure all necessary documentation request forms have been utilized prior to issuing the ICB forms. The Informal Conference Board should not be the forum for which an auditor attempts to secure additional documentation for the audit. This additional documentation would include the issuance of a Technical Support Request.

2. Audit Agreement after Issuance of ICB Forms

If the taxpayer agrees with the audit results after the issuance of the ICB forms and prior to the expiration of the 60 days allowed, they must provide their agreement to the auditor **in writing.** In those instances, the auditor should issue the EDA-143 Notice of Audit Results letter with the IL-870 within 5 days of such notification (the IL-870 not issued in audits completed in APT). If the taxpayer signs the IL-870 at that point, they waive their rights to review under ICB.

3. Informal Conference Board Audits

a) While under ICB Jurisdiction

Any and all requests from the ICB should be handled as a priority. If additional information is obtained at the ICB conference, the auditor must review the documentation as a priority and respond to the Conferee on the acceptance or denial of the data.

b) Once the ICB has issued an Action Decision

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor must contact the taxpayer within 8-15 days of the Action Decision to continue the audit process or to obtain additional documentation as directed. The auditor must submit the completed ICB audit for supervisor review within 60 days of: receipt of final decision by the ICB, the passage of any document deadline, or upon receipt of the required additional documentation.

c) How to Address ICB Activity in Auditor's Comments

If the taxpayer submits an ICB-1, Request for Informal Conference Board Review, after the issuance of the EDA-122, 124, or 125, or EDA-122-B-APT, 124-I-APT or 125-I-APT, the auditor's comments can only mention the following:

- Date the taxpayer petitioned ICB
- Date ICB accepted or rejected jurisdiction
- Date ICB Action Decision is issued
- Results as stated in the Action Decision

NEVER reference email correspondence between the auditor and ICB, the Conferee Recommendation or any other activity that resulted during the ICB process.

D. DOCUMENTS ISSUED IN AUDITS – AGREED, UNAGREED, OR HAVING BOTH

The following chart shows the documents that should be issued in agreed or unagreed audits, and audits that may have both agreed and unagreed issues.

Note #1: An EDA-27, Explanation of Adjustments, **must be** presented to the taxpayer (or taxpayer representative) with the issued ICB notices (EDA-122, 124 or 125, or EDA-122-B-APT, 124-I-APT or 125-I-APT). See Section X.B for details on the EDA-27.

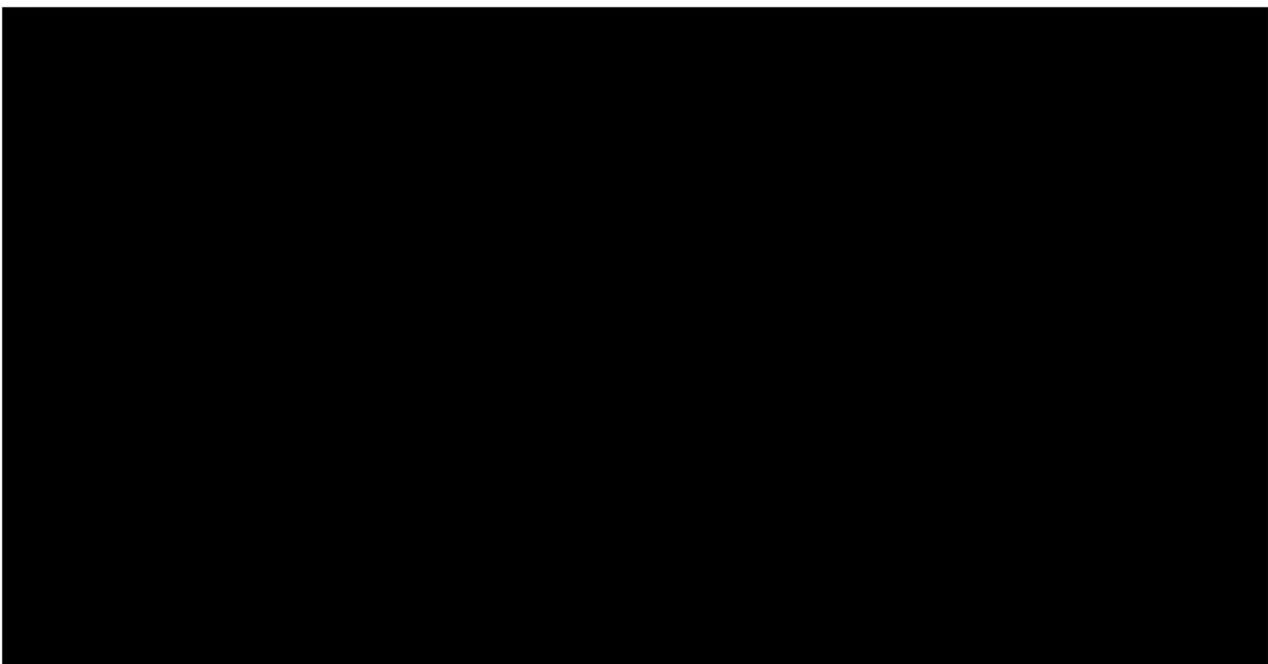
Note #2: Reference in the chart below to the issuance of the IL-870 does not apply to audits completed in APT. See the APT Reference Guide for details.

Audit Type	Agreed	Unagreed	Both
Documents Issued	ICB-1 issued with either an EDA-122, EDA-124, or EDA-125 dependent on audit findings. The taxpayer is required to provide a written statement to bypass ICB. Within 5 days of receipt of statement: IL-870 issued, and EDA-153 (if applicable). If taxpayer signs IL-870, proceed to close audit within 15 days.	ICB-1 issued with either an EDA-122, EDA-124, or EDA-125 dependent on audit findings. Taxpayer has 60 days to submit ICB-1 form. If taxpayer does not submit ICB-1 within the 60 days, EDA-143 is issued with an IL-870.	ICB-1 issued with either an EDA-122, EDA-124, or EDA-125 dependent on audit findings. **Agreed Issues** The taxpayer is required to provide a written statement to bypass ICB. Within 5 days of receipt of statement: IL-870 issued, and EDA-153 (if applicable). If taxpayer signs IL-870, proceed to close audit within 15 days. **Unagreed Issues** Taxpayer has 60 days to submit ICB-1 form. If taxpayer does not submit ICB-1 within the 60 days, EDA-143 is issued with an IL-870.

The above documents needing to be issued are accessed through Gentax when under the Audit ID number. Audit letters can be added through the *Letters* sub-tab under the *CRM* tab by clicking on the *Add* tab.

The *Mail Types* screen will open allowing the auditor to select the appropriate letter needing to be generated from the *Type* list as shown below (click on the appropriate letter hyperlink). Once the particular letter has been completed, it should be proofed for any errors, then printed and saved.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

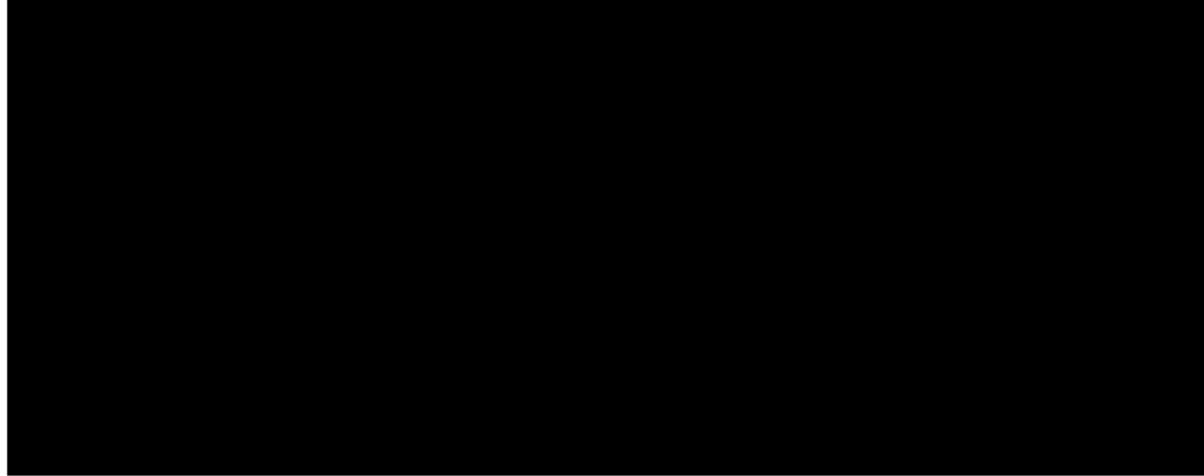


EDA-124I and EDA-125I

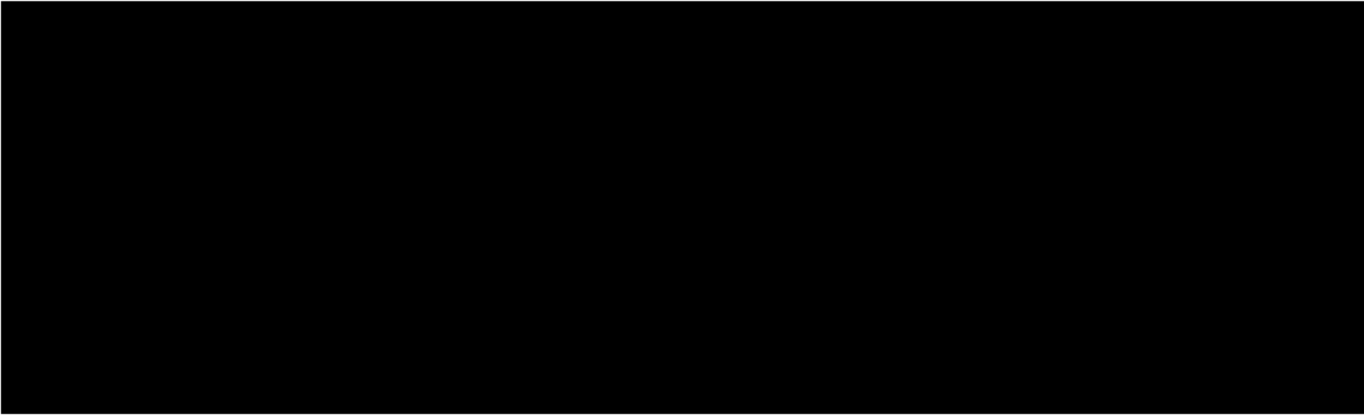
Both the EDA-124I (Income Tax Notice of Proposed Liability and Claim Denial) and the EDA-125I (Income Tax Notice of Proposed Claim Denial) have been revised to include the ability to enter claim filing dates for each tax year under audit. The original letters had been designed under the assumption that all claims within the audit would have been filed on the same date.

Note: The EDA-124IAPT and EDA-125IAPT should only be used when completing an audit in the CIT package – APT.

EDA 124I "Income Tax Notice of Proposed Liability and Claim Denial":



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



EDA125I “Income Tax Notice of Proposed Claim Denial”:

E. ISSUE FORM EDA-8-A, COLLECTION/LEGAL ACTION SUPPORT

In order to assist the Collections Bureau in pursuing collection activity allowed by law, including wage levies, bank levies, accounts receivable levies, 100% personal liability penalty for “trust” taxes, and seizures, Form EDA-8-A, Collection/Legal Action Support, has been developed. (A trust tax is any tax for which an amount is required to be collected or withheld by a taxpayer from another person, regardless of whether it is in fact collected or withheld.)

Because auditors have access to taxpayer’s books and records during an audit, information useful to Collections may be more easily obtained at the audit level.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

1. Factors Determining EDA-8-A Completion

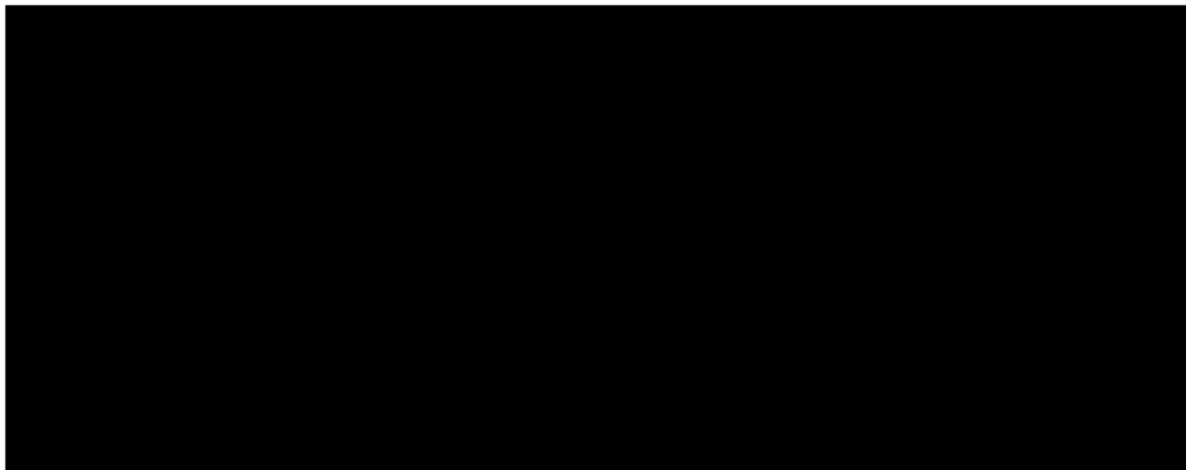
Form EDA-8-A is required for non-publicly traded corporations, partnerships and sole proprietorships for BIT, IIT and WIT audits when any of the following factors is present:

- There is a current collection activity for any year; or
- An audit liability is not paid, whether unagreed or agreed; or
- A Jeopardy Assessment appears warranted during the audit. Refer to Jeopardy Assessments section.

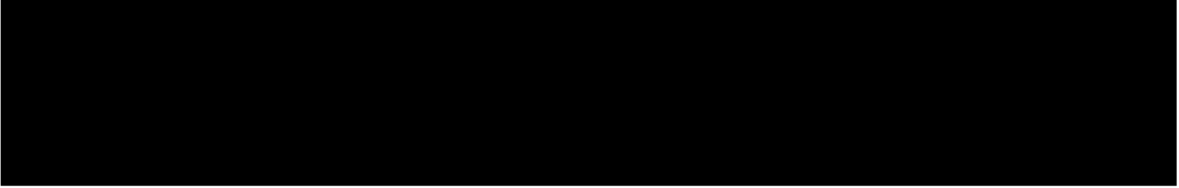
A major purpose for completing the EDA-8-A is to have a record of all Illinois assets for any potential Lien Determination. For Unitary Income Tax purposes, every company with Illinois nexus should be listed showing the Illinois assets (**if** this information is available).

a) Current Collection Activity

By entering the taxpayer's FEIN, SSN or name through the Search Manager, the information on record will be accessed showing the tax types that the taxpayer is registered for. Important indicators will be visible at the top of the screen. A "Collection in Progress" indicator will be present if there is collection activity.



Collections information can then be accessed by clicking on the Collection Tab.

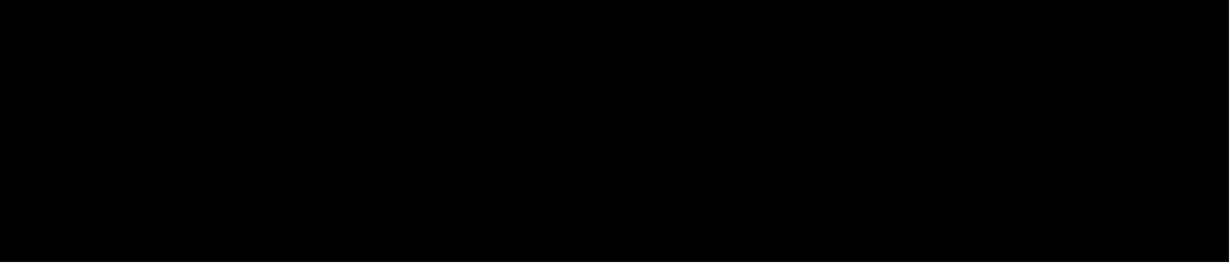


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

More collection details can be seen by clicking on the Collection number hyperlink.

b) Outside Collection Agency

It is also important to research the taxpayer for any outstanding balance(s) that have gone to an **outside collection agency** (OCA) as indicated below. See Section VI.A (that addresses an OCA and the Statement of Customer) for more details.



2. Form EDA-8-A

If required, the auditor should issue an EDA-8-A, which the taxpayer should complete and return back to the auditor. Once that taxpayer has provided this information, the auditor will need to follow the instructions in the next paragraph.

When dealing with a "paper audit":
The EDA-8-A (as a fill-in savable pdf) can be accessed on the Department's Intranet under Work Areas, Audit, Forms. The form must be filled-in, printed and saved by the auditor. Since the completed EDA-8-A must go in the audit file, saving it with the other audit paperwork and/or forms is recommended. Once completed and saved, the EDA-8-A will be part of the Continuing Audit File (CAF).

When dealing with an audit through APT:
When utilizing the CIT package (APT), the self-contained EDA-8-A should be used for audits completed in APT. The savable pdf discussed above should not be used with APT.

When dealing with an electronic audit through GenTax:
The EDA-8-A (as a fill-in savable pdf) can be accessed on the Department's Intranet under Work Areas, Audit, Forms. The form must be filled-in, printed and saved by the auditor. This form should then be added/saved to the "Electronic Documents" in GenTax.

Completing the EDA-8-A is not intended to take a significant amount of time. The Collections Bureau is requesting concise answers, rather than lengthy responses. Please be aware of the requested information throughout the audit's progression. If some of the information is unknown or not available, write such on the appropriate line.

Collections will be able to access the EDA-8-A as an attachment to the audit springboard as currently performed for Sales tax Audits.

- **See Exhibit L for an example of the EDA-8-A.**

F. JEOPARDY ASSESSMENTS

IITA § 1102, and Retailers Occupation Tax Act (35 ILCS 120/5a) authorize jeopardy assessments. These assessments are also authorized by statute for other taxes administered by the Department.

Jeopardy assessments are warranted if the taxpayer is, or appears to be:

- planning to immediately leave Illinois or hide;
- planning to quickly place their property beyond the reach of the state by removing it from Illinois, by concealing it, by dissipating it, or by transferring it to other persons;
- preparing to do some other act that would tend to prejudice or render wholly or partly ineffectual the ability to collect the audit liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Jeopardy assessments cannot be made just because the statute of limitations for assessing the tax is about to expire or because a taxpayer does not consent to extend the statutory period. A jeopardy assessment can be issued only if the collection of the tax deficiency is in jeopardy for the reasons described above.

1. Termination of Taxable Year – Applies to Income Tax

A termination of taxable year is covered under IITA § 1102(b) and applies only to the current tax year. (IITA § 1102(a) applies to all other years.) The same criteria to invoke IITA § 1102(a) apply to IITA § 1102(b). The difference is that 1102(b) assessments apply to current years and IITA § 1102(a) assessments apply to all other years.

The authority for termination assessments is contained only in IITA § 1102(b). Therefore, termination assessments may be made only for income and withholding taxes.

Auditors are required to determine if it is appropriate to pursue a jeopardy assessment on all audits based on his or her knowledge of taxpayer operations. In all audits, the letter of comments should discuss facts that were analyzed and state reasons why a jeopardy assessment was either necessary or not. The auditor should discuss the issue and documentation with the RAS before completing the request. The potential dollar liability should also be discussed.

2. Management Review and Approval

Management approval is required before any jeopardy or termination assessment can be issued. **Submission for such assessments is to be treated as top priority**.

The auditor recommending such assessment should complete the following and submit them to their supervisor:

- Form EDA-151 (Jeopardy Assessment Analysis and Request): Can be accessed as a fill-in savable pdf on the Department's Intranet under Work Areas, Audit, Forms.

See Exhibit M for an example of Form EDA-151.

- EDA-8-A (Collection/Legal Action Support): Also accessed as a fill-in savable pdf on the Department's Intranet under Work Areas, Audit, Forms.
    - The EDA-8-A should list owners, responsible parties and assets that a lien can be applied to. The identification and location of

assets is critical because Collections must have that information to issue the lien.

- audit working papers
- Auditor's Report

a) Auditor Submission

The auditor can personally deliver or use fax or email to submit the package to the supervisor. Justification for the jeopardy assessment must be reasonable and have supporting documentation. A reason of **"I think the taxpayer might leave the state"** is not sufficient to issue a jeopardy assessment. Also, the possibility of a taxpayer closing business as a result of an audit is not sufficient justification for jeopardy assessment.

b) Review and Approval Steps

- If the RAS agrees that a Jeopardy Assessment should be issued, he/she will forward (via UPS, if mailed) the documents to the Assistant Division Manager (ADM) for review. The RAS may also use email, or fax to submit the request to the ADM. Electronic submission is preferred.

- Upon approval, the ADM will forward all documents to Technical Support for review with Legal Services.

- If Legal Services concurs with the issuance of a jeopardy assessment, documents will be presented to the Division Manager for final approval to issue the jeopardy assessment.

- Upon approval, the Division Manager will send all documents to the Tech Review Supervisor.

c) Issuance Steps

- Audit Perfection will post the adjustment information into GenTax, which will establish the assessment. **Perfection will ensure that the 20% UPIA 5 penalty rate is assessed**.

- The Technical Review Supervisor will maintain the approval form and any attachments to include in the audit file once it is received and notify the ADM (copying supervisor and auditor) by email that approval to issue jeopardy assessment has been granted and the assessment has been posted to the system. (If denied, all documents will be returned to auditor for placement, as superseded, in the audit file.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Once notified of Management approval, auditor will print Form IDOR-8-J (Notice of Jeopardy Assessment) and personally deliver it to the taxpayer. This is a notice of demand with payment due immediately.
  - If unable to personally deliver the Notice of Jeopardy Assessment, the auditor should send it via certified mail to the taxpayer's last known address.
  - Form IDOR-8-J is the last notice sent to a taxpayer before a lien is filed. Form IDOR-8-J is available in GenTax, when in the Period View, by clicking on the "Add" tab found when in the "Letter" sub-tab, under the CRM Tab.

See Exhibit N for an example of Form IDOR-8-J.

NOTE: The auditor must NOT print the Jeopardy Assessment Letter until after receiving notification from the Technical Review Supervisor that the audit workpaper adjustments have been posted to the system so that the financial data will pull into the letter correctly.

- **The auditor will complete and print the IL-870, but must not present it to the taxpayer. If the audit is through APT, this would be an EDA-25, not IL-870. The IDOR-8-J contains all the information required by statute to identify the audit liability.**
- A jeopardy assessment indicator and work item will be created at the time the IDOR-8-J is printed and will reside in the Audit Manager to track the jeopardy assessment. The work item will be assigned to the Technical Review Supervisor for monitoring purposes. The Tech Review Supervisor will notify the Collection Bureau via email that a jeopardy assessment has been issued.
- Each different tax type needs a separate jeopardy assessment. The taxpayer has 5 business days (or more as extended by the Department) to comply with the Notice and pay the liability or to show that the findings in the Notice are erroneous. The date that Form

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IDOR-8-J is printed will become the date of notice from which the 5 business days will be counted.

- The auditor should first discuss any taxpayer request for extension with their supervisor, and if the supervisor believes that approval is warranted, the supervisor should discuss the issue with the ADM. If the ADM agrees, the rationale will be presented to the Division Manager. An extension will not be granted unless approved by the Division Manager.

d) Payment of Liability

- If the taxpayer pays the liability within 5 days (or additional time as granted by Division Manager), the auditor must ***immediately*** notify the Technical Review Supervisor of the payment so that the Jeopardy Assessment work item will not be forwarded to the Collection Bureau.
  - The audit payment must be sent to Audit Perfection by utilizing the payment delivery method discussed under Audit Liability Payments and Assessment Collection Payments section. (The Review supervisor will then notify the Collection Bureau by email when payment has been received.)
- The auditor must ***immediately*** complete the audit, and the RAS must ***immediately*** review the file as high priority. Once this is done, the RAS will send (electronically) the file to Technical Review as a paid audit with the audit file clearly marked ('Jeopardy Assessment'). RAS should send an email to the Audit Review RAS listing this as a high priority Jeopardy Assessment. **This will be handled as a priority case.**

e) Non-payment of Liability

- If the taxpayer does not pay the liability within 5 days (or additional time as granted by Division Manager) the Audit Supervisor (or auditor?) must notify the Technical Review Supervisor.
- The Tech Review supervisor will verify that there has been no other taxpayer activity which would stop the issuance of the jeopardy lien. The Tech Review supervisor will then notify the Collection Bureau by email to proceed with the jeopardy assessment lien.
- The auditor must ***immediately*** complete the audit, and the RAS must ***immediately*** review it as high priority. After review, the RAS will send the file (electronically) to Tech Review. The file is to be clearly marked ('Jeopardy Assessment') and **handled as a priority case.** RAS should send an email to the Audit Review RAS listing this as a high priority Jeopardy Assessment.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

XII. AUDIT LIABILITY PAYMENTS AND ASSESSMENT COLLECTION PAYMENTS

The State Officers and Employees Money Disposition Act (30 ILCS 230/2) addresses the requirement concerning all moneys received by the State of Illinois and then paid into the State Treasury. To facilitate this requirement, the following procedures have been implemented.

A. REMITTANCES

(Checks, Drafts or other Paper Instruments)

1. Field Audits

Checks written to cover field audit liabilities **MUST** be mailed directly to Springfield by the taxpayer.

Checks for **INCOME TAX** Audits must be mailed to:

Illinois Department of Revenue
Income Tax Audit Perfection / Notices Section
PO Box 19012
Springfield, IL 62794-9012

The following procedures should be followed concerning the processing of checks:

1) Upon issuance of the IL-870 [EDA-25 if audit completed through APT] or Tax Form to the taxpayer for signature and remittance, the auditor should instruct the taxpayer to send the remittance directly to the appropriate Springfield address (see above).

2) The taxpayer should be provided with a pre-addressed envelope to use for remittance of payment.

3) The auditor must e-mail the Audit Perfection Supervisor providing the following information:

a. Taxpayer Name

b. Account ID

c. Breakdown of the tax, penalty & interest by period/return

d. Expected date for receipt of remittance

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

4) Upon receipt of check in Springfield, Audit Perfection Clerical Staff will prepare a payment voucher in GenTax. A copy of the voucher, check and any correspondence received with the check will be sent to the auditor.

5) The check and voucher will be taken to Document Control & Deposit (DC&D) by Audit Perfection Clerical Staff.

The expectation is that taxpayers will remit payment directly to Springfield as outlined above. However, if a check is received by a field auditor or at an IDOR Field office, the check should be mailed to Springfield as indicated above.

a) Overnight Delivery of Checks

(1) Checks Received at the JRTC:

The expectation is that taxpayers will remit payment directly to Springfield as outlined above. However, in the event a payment is received at the JRTC, it should be sent inter-office directly to the WIB using the address below:

Illinois Department of Revenue – WIB
Income Tax Audit Perfection / Notices Section
Mail Code: 3-335

The following procedures should be followed concerning the processing of checks:

1) Upon receipt of check, Audit Perfection Clerical Staff will prepare a payment voucher in GenTax and take to DC&D for processing. A copy of the voucher will be sent to the auditor.
2) The auditor should retain a copy of the check, IL-870, etc. for the audit file.

(2) Checks Received at Field offices other than the JRTC:

The expectation is that taxpayers will remit payment directly to Springfield as outlined above. However, in the event a payment is received at an IDOR Field office, other than the JRTC, it should be sent via **UPS** overnight to the following address:

Illinois Department of Revenue
Income Tax Audit Perfection / Notices Section
Mail code: 3-335
101 W. Jefferson Street
Springfield, IL 62702

The following procedures should be followed concerning the processing of checks:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1) Upon receipt of check, Audit Perfection Clerical Staff will prepare a payment voucher in GenTax and take to DC&D for processing. A copy of the voucher will be sent to the auditor.

2) The auditor should retain a copy of the check, IL-870, etc. for the audit file.

b) Collection of Outstanding Assessment

It is also the auditor's responsibility to review GenTax to determine if there are any unpaid assessments that need to be collected. The auditor should update the penalty and interest and present the Statement of Customer to the taxpayer to utilize the payment voucher that is part of the statement. See Section VI.A "Statement of Customer – Collection of Assessments" in this chapter for complete instructions. Read the instructions pertaining to outside collection agencies in that same chapter section before generating any Statement of Customer.

The auditor should request that a separate check be issued to cover these assessments. If the auditor is successful in collecting on these assessments, the taxpayer must attach the remittance to the voucher portion (bottom part) of the newly generated updated Statement of Customer and mail to the IDOR address shown on the voucher.

2. In-House Audits and Leads

Checks written to cover a Discovery (In-House) audit or lead liability **MUST** be mailed directly to Springfield by the taxpayer.

a) Discovery Audits

Checks for Discovery audits should be mailed to the following address:

Illinois Department of Revenue
Income Tax Audit Perfection / Notices Section
Post Office Box 19012
Springfield, IL 62794-9012

The following procedures should be followed concerning the processing of checks:

1) Upon issuance of the IL-870 [EDA-25 if audit completed through APT] or Tax Form to the taxpayer for signature and remittance, the auditor should instruct the taxpayer to send remittance directly to the Springfield address indicated above. The address is also on the Notice of Audit Results letter.

2) The taxpayer should be provided with a pre-addressed envelope to use for remittance of payment.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3) Upon receipt of check in Springfield, Audit Perfection Clerical Staff will prepare a payment voucher in GenTax. A copy of the voucher, check and any correspondence received with the check will be given to the auditor.

4) The check and voucher will be taken to DC&D by Audit Perfection Clerical Staff for processing.

The expectation is that taxpayers will remit payment directly to Springfield as outlined above. However, if a check is received by an auditor, the check should be given to Audit Perfection Clerical Staff for processing.

b) Leads

Most correspondence for leads is systemically generated. Therefore, it is not necessary to provide the taxpayer with the appropriate mailing information. However, if the situation arises where the taxpayer inquiries about how to remit a payment, they should be provided with the address below:

Illinois Department of Revenue
Audit Bureau
Post Office Box 19020
Springfield, IL 62794-9020

The following procedures should be followed concerning the processing of checks:

1) Upon receipt of check in Springfield, Clerical Support will prepare a payment voucher in GenTax. A copy of the voucher, check and any correspondence received with the check will be given to the auditor.

2) The check and voucher will be taken to DC&D by Clerical Support for processing.

The expectation is that taxpayers will remit payment directly to Springfield as outlined above. However, if a check is received by an auditor, the check should be given to Clerical Support for processing.

c) Payment Plan Request

For all in-house Income Tax audit staff - when processing correspondence received from a taxpayer requesting a payment plan, or if the taxpayer has provided a completed CPP-1 form, Payment Installment Plan Request, the below instructions should be followed.

If a request is received with correspondence for a payment plan, there must be one of the following:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- A Signed IL-870
- A Signed Return, or
- Already assessed liabilities (such as a defaulted NOD).

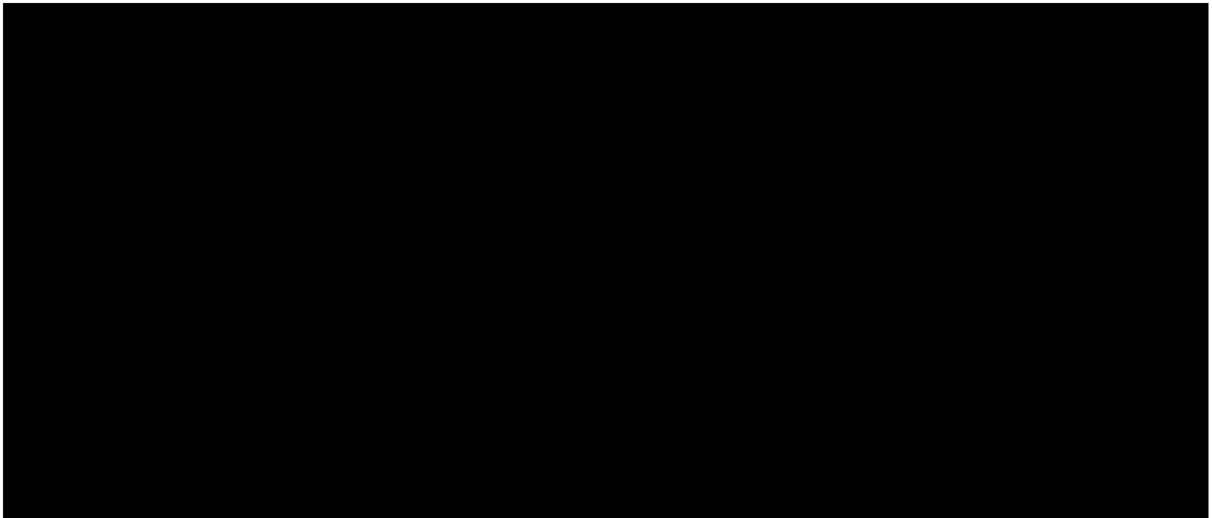
It is important to first make any adjustment (if necessary) and to verify the taxpayer's contact information (such as address and phone number).

(1) Correspondence Requesting a Payment Plan

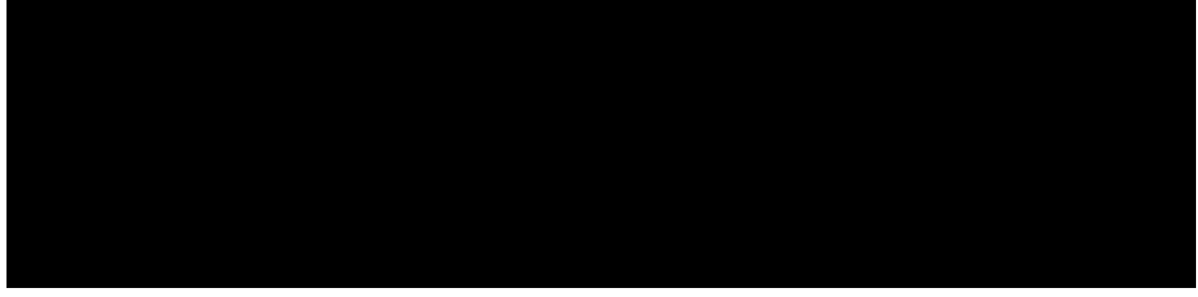
When the taxpayer provides correspondence (not a CPP-1 form) requesting a payment plan, the following procedure should be followed to create a work item in GenTax:

1) Open the taxpayer's Account Manager (i.e. BIT or IIT account)

2) Click on "Task" Tab, then the "Work Items" sub-tab. Click on the "Add" tab.

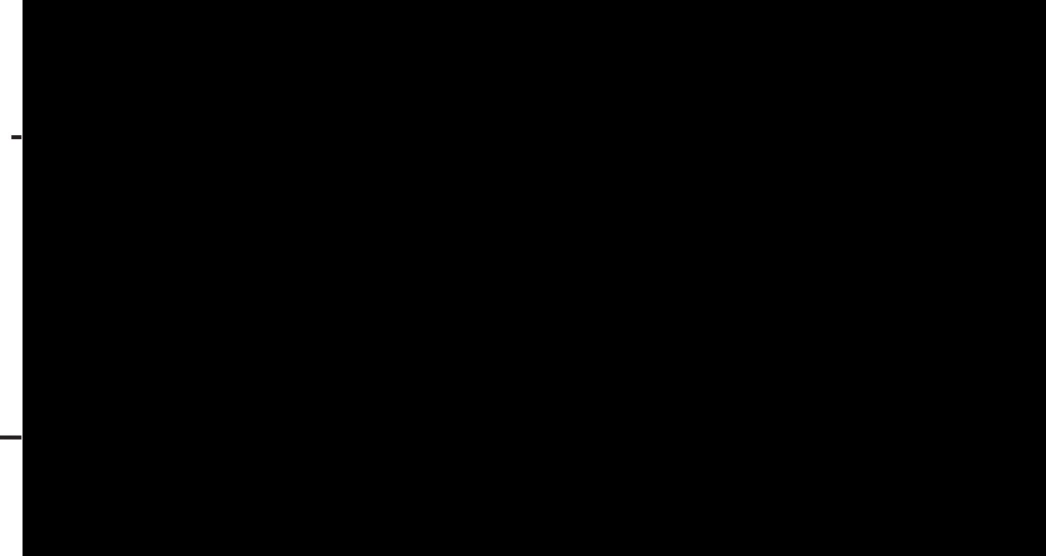


3) Type "Collections" into the green search line, then find "Pay Plan Requested" under *Type* and click on it.

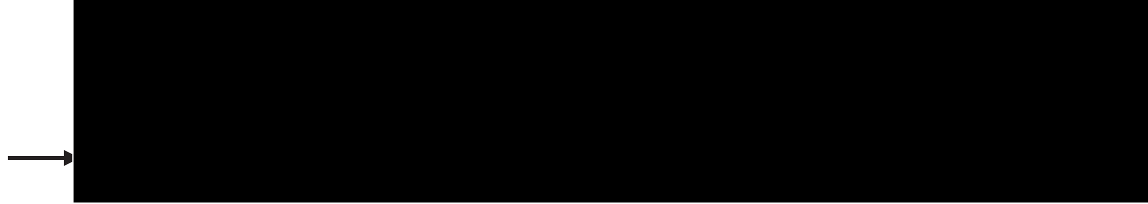


4) Under *Source* select "Audit" from the drop down. The yellow field under *Added* is a required field in which the information from the

correspondence requesting the pay plan should be entered as a note. Once all information is entered, click on the *Save* button.



5) The request for the pay plan will then appear under the Work Items.



Any handwritten requests that were received from the taxpayer should be placed in the audit file.

(2) Processing a Completed CPP-1 Form

If the taxpayer has completed the CPP-1, Payment Installment Plan Request form, a copy should be made for the audit file and the original forwarded to the Department per the CPP-1 instructions.

Create a work item with a note that the CPP-1 form has been forwarded to Collections.

3. Administrative Hearings, Protest Act & Tax Tribunal

Checks written to cover audit liabilities that are in one of the protest stages above will be handled by Technical Support.

1) Upon receipt of a check, Technical Support will prepare a payment voucher in GenTax. A copy of the voucher, check and any correspondence received with the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

check will be added to the audit file. To add a voucher from the Audit View, click on the "Add Voucher" Tab.

2) The check and voucher will be taken to:
   a. JRTC: Taxpayer Services window
   b. Springfield: Clerical staff in FSE Room

B. ELECTRONIC FUNDS TRANSFER (EFT)

The Department can no longer accept EFT payments in the form of a FEDWIRE (Federal Reserve Wire Transfer). EFT refers to payments not statutorily required under IAC §750.300.

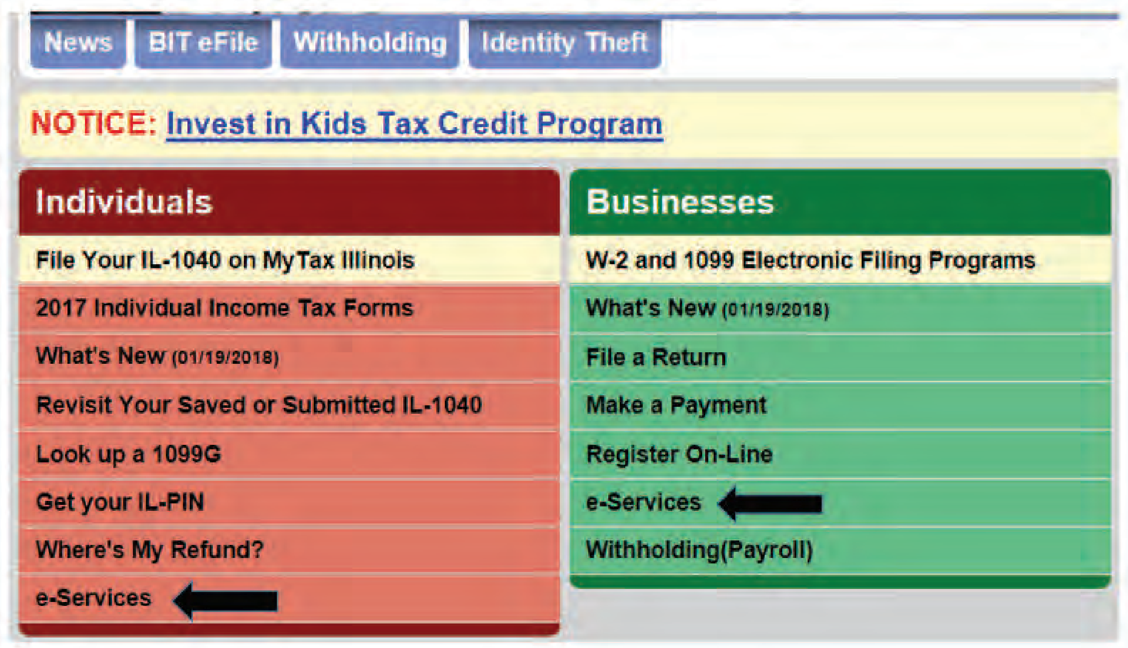
EFT is the transfer of funds, other than a transaction originated by check, draft or similar paper instrument, which is initiated through an electronic terminal, telephone or computer or magnetic tape so as to order, instruct or authorize a financial institution to debit or credit an account (IAC § 750.200).

EFT is an audit payment option. This option is separate and distinct from the requirement for payment of taxes by certain taxpayers using EFT.

There is currently only one EFT option available for taxpayers to submit audit tax liability payments. MyTaxIllinois is the Department's preferred payment option offered to businesses and individuals who inquire about an electronic payment option.

MyTaxIllinois is accessed via the Department's website tax.illinois.gov by clicking on the *e-Services* link under *Individuals* or *Businesses*.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



1. MyTaxIllinois

a) Businesses

After clicking on "e-Services" for Businesses, click on the *File, Pay and Manage Your Account Here for the Following* link in My Tax Illinois. Several return types are a pay only option.

e-Services for Businesses

MyTax Illinois

MyTax Illinois is a centralized location on our website where taxpayers may register a new business or electronically file tax returns, make payments, and manage their tax accounts.

Services provided by MyTax Illinois:

- Register a Business (REG-1)
- Verify a Registered Business
- Register for a Bingo, Pull Tabs, or Charitable Games License
- Apply for or Renew a Sales Tax Exemption
- File & Pay Use Tax (ST-44) - Should only be used by businesses that are not required to register for sales and use taxes. A taxpayer registered to file Form ST-1 should report any use tax liability on that form rather than Form ST-44.
- File, Pay, and Manage Your Account Here for the Following:
    - **Business/Withholding Income Tax**
        - **1099** - (Information Returns)
        - **IL-501** - (Payment Coupon)
        - **IL-505-B** - (Automatic Extension Payment)
        - **IL-516-I & IL-516-B** - (Pass-through Prepayment Vouchers)
        - **IL-941 & IL-941-X** - (Withholding Income Tax Return)
        - **IL-990-T** - (Exempt Organization Income and Replacement Tax Return)
        - **IL-1041** - (Fiduciary Income and Replacement Tax Return)
        - **IL-1065** - (Partnership Replacement Tax Return - **Pay Only**)
        - **IL-1120** - (Corporation Income and Replacement Tax Return - **Pay Only**)
        - **IL-1120-ES** - (Estimated payments)
        - **IL-1120-ST** - (Small Business Corporation Replacement Tax Return - **Pay Only**)
        - **UI-3/40** - (Unemployment Insurance Contribution and Wage Report)
        - **W-2 & W-2c** - (Wage and Tax Statements)
        - **W-2G** - (Certain Gambling Winnings)

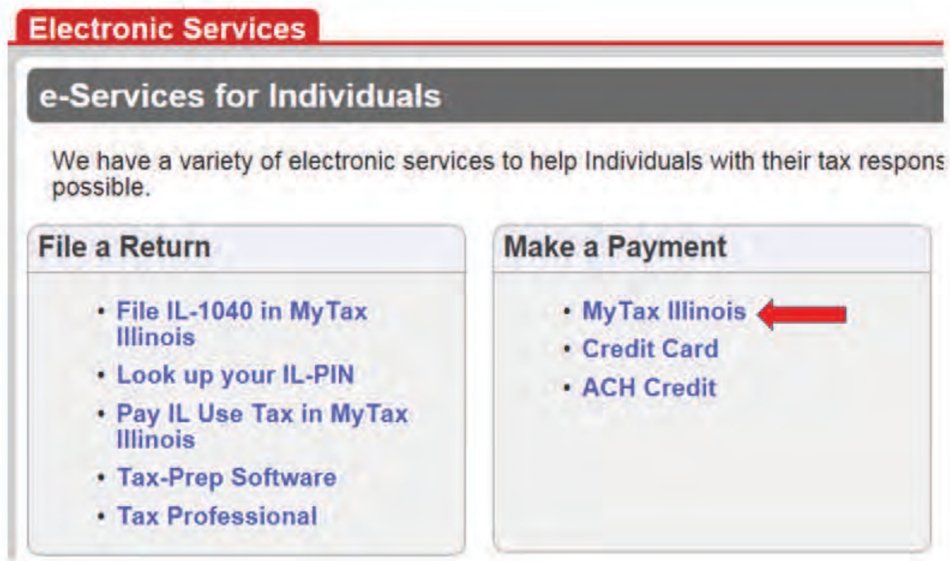
The taxpayer should then follow the online instructions for making an electronic tax payment.

b) Individuals

(IL-1040)

After clicking on “e-Services” for Individuals, the screen below appears. Under Make a Payment, the taxpayer needs to click on the MyTaxIllinois link.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.



The taxpayer should then follow the online instructions for making an electronic tax payment.

(1) Taxpayer Instructions

When utilizing MyTaxIllinois, the APE for which the audit payment is being submitted may not be available for the taxpayer to select. If this is the case:

- The auditor will instruct taxpayer to post the audit payment to the current year APE.
- The auditor will provide instruction, through an email, to the Electronic Commerce Division to guarantee that the payment is posted correctly once it is transmitted to the Department.

When the taxpayer submits a payment using MyTaxIllinois, the taxpayer needs to immediately provide the auditor with the confirmation number for the payment and the specific APE for which they made the payment.

(2) Auditor Instructions

Provide information for the taxpayer to access payment through MyTaxIllinois.

Explain to the taxpayer that the payment will need to be posted to the current year APE if the payment is being made for an APE or audit period not available on MyTaxIllinois.

Get the payment confirmation number from the taxpayer once the payment

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

has been made. This number is needed immediately after the payment is made. Also, get the specific APE for which they made the payment.

The auditor must send an email to the Electronic Commerce Division at rev.taxpay@illinois.gov to guarantee that the payment will post correctly on GenTax. The auditor copies his or her supervisor and the Audit Perfection supervisor when sending the email. The Audit Perfection supervisor will make sure that the payment is posted correctly and that the proper hold indicator is set in GenTax. The email must contain the following information:

- Email subject line: *Audit Payment Submitted on MyTaxIllinois*

- The text of the email:

  Identify the taxpayer: give the taxpayer's name exactly as shown on GenTax, the taxpayer's address, tax type for which the payment is being made (income tax). Provide the account ID and audit track number.

  State the exact amount of the audit payment that was made.

  Provide the confirmation number that the taxpayer received from MyTaxIllinois and gave to the auditor.

  State the APE for which the payment was made on MyTaxIllinois. Also, give the correct APE or audit period to identify where this payment should be posted. If the payment is for multiple APEs, be sure to clearly identify the amounts and APEs to which the payments should be applied.

  Provide contact information (auditor's name, work location and a contact phone number) and request that a reply be sent confirming that the payment has been correctly posted.

  In the audit file, the auditor should provide a copy of the e-mail sent to, and a copy of the response received from, the Electronic Commerce Division.

C. ACH CREDIT

This information moved to Audit Manual Chapter 1.

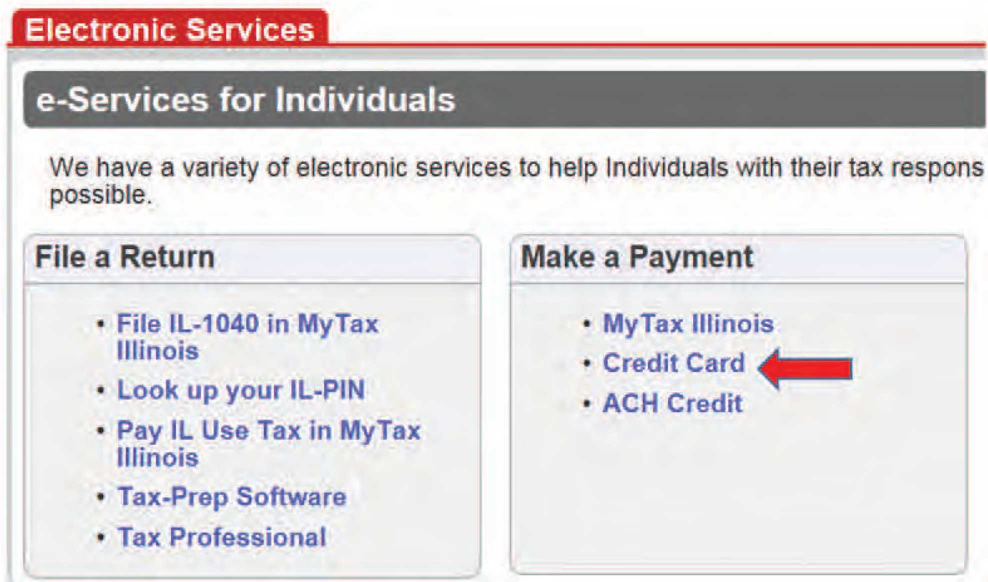
D. CREDIT CARD PAYMENTS

(Individuals only)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IITA §605 provides that, as of September 24, 1992, the Department may adopt rules and regulations for payment of taxes due under the IITA by credit card.

IL-1040 filers may use VISA, Master Card, Discover, or American Express credit card to pay any individual income tax delinquencies or any prior-year Form IL-1040 return payments starting January 1, 2002. In the Electronic Services section, under e-Services for Individuals, click on the *Credit Card* link:



The taxpayer will then be given three options from which to choose to make a payment.

Individuals

Pay by Credit Card

Use your MasterCard, Discover, American Express, or Visa to pay your Individual Income Tax. Have your credit card ready and choose one of the following:

- Official Payments Corporation
- payILtax as supported by Value Payments Systems
- Link2Gov/FIS

After choosing an option, the taxpayer will then follow the online instructions for making an electronic tax payment. The credit card service provider will assess a convenience fee.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

XIII. REFERRALS

A. AUDIT REFERRALS USING THE SC-137

Auditors are encouraged to be aware of the level of compliance in their community, and region, as well as on the audits they are conducting. Audit referrals should be made on form SC-137, Audit Referral/Request, and submitted to your supervisor, who should email the SC-137 to REV.G.ITAuditPlanning@illinois.gov.

The SC-137 can be accessed as a savable, printable pdf on the Departments' Intranet under Work Areas, Audit, Forms.

- When referring an unregistered taxpayer, please make sure as much evidence as possible is included with the referral to prove nexus. Copies of invoices, news articles or service contracts are very useful in these situations.

- When submitting the audit referral/request form SC-137, the "reason for referral" section must be completed. Completion is important for Audit Planning to separate non-filers from non-compliance or under-reporters. If "referral for audit" is marked, documentation is required and needs to be attached to the SC-137. A tax potential amount MUST be provided.

Audit Referral Procedures

See Section IV E. – Performing Compliance Checks.

- Non-filed Corporate Income tax returns should be referred to a CIT Supervisor by the Auditor's Supervisor.

- Sales Tax non-filers should be referred to a Sales Tax Supervisor following established referral procedures.

- Withholding tax liabilities should be established following procedures detailed in Chapter 44.

Referrals to IT Discovery

If there are a significantly large number of shareholders, partners or beneficiaries (**ten or more**) not in compliance, the accounts may be referred to the Discovery Section for completion following established referral procedures. A SC-137 needs to be completed for each individual shareholder, partner, etc. and the following documentation attached for each respective situation.

1) Shareholder of an S Corporation

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Copy of pages 1-4 of the Federal return (US-1120S) filed for each year being referred.
- Copy of K-1 schedules for each shareholder being referred for each year being referred.
- Copy of the IL-1040 return.
- Pro rata share percentage.

2) Partner in a Partnership

- Copy of pages 1-4 of the Federal 1065 return filed for each year being referred.
- Copy of K-1 schedules for each partner being referred for each year being referred.
- Copy of the IL-1040 return.
- Pro rata share percentage.

3) Beneficiary of Trusts or Estates (1041)

- Copy of pages 1-4 of the Federal 1041 return filed for each year being referred.
- Copy of K-1 schedules for each beneficiary being referred for each year being referred.
- Copy of the IL-1040 return.
- Pro rata share percentage.

It will be the Supervisor's responsibility to ensure that all referrals contain the required information stated above. The referrals should then be forwarded to Springfield Audit Planning in an email to REV.G.ITAuditPlanning@illinois.gov for set-up in GenTax.

B. AUDIT REFERRALS TO THE CRIMINAL INVESTIGATIONS DIVISION (CID)

1. Fraud

Fraudulent activity is an INTENTIONAL disregard of the law or the rules and regulations. In order for fraud to exist, the taxpayer must know the correct application of law and must intentionally disregard the correct application of the law in order to reduce or avoid their tax liability. Since fraudulent activity is rarely openly admitted by the taxpayer, proving it usually requires a collection of circumstantial evidence being uncovered in an audit or through a Criminal Investigation Division (CID) examination.

For fraud to exist a taxpayer must generally have caused some monetary harm to be suffered by virtue of his act; and he must have done this believing the consequent injury to the State would not be discovered.

- The most common fraud consists of acts of omission (e.g., the self-employed taxpayer who simply fails to file returns). In and of itself the failure to file a return may not constitute fraud.

  - However, if it was discovered in the course of the examination, that in several years where tax was withheld, and a refund was due, the taxpayer did file; whereas in other years, when no tax had been withheld, the taxpayer failed to file, a clear and convincing argument that the failure to file constituted fraud might well be made.

  - Similarly, in the case of failure to file by a corporation which had been advised in a previous examination by the Department's auditors of its duty to do so, imposition of the penalty would seem defensible.

The Department has the authority to examine the entire content and substantiation of a federal income tax return as to particular items related to Illinois income tax liability, and to establish a correct federal taxable income. [Ref: IITA § 203(e)] However, audit policy now dictates that the approval process must be followed before any Line 1 adjustments are made. See Section VII.A.1. – Line 1 Adjustments During an Audit.

A taxpayer can, however, properly pay federal income taxes on taxable income and, simultaneously, (utilizing the same numbers reported for federal purposes), defraud Illinois. Possible examples of fraud of this type might include:

- an apportioning corporation that encodes its fixed assets as having other than the true geographic location or allocates "non-business" royalties to states other than the correct ones with intent to mislead the Department on the return itself. Such reallocation or re-categorization in order to persuade the Department that the tax liability as filed is correct could constitute fraud.

No one factor absolutely points to fraud. It is important to remember that mere negligence, or ignorance of law, does not constitute fraud. It must be shown that there was fraudulent intent to evade tax. REF: CCH Para. 40,445.191.

If, during an audit, fraudulent activity on the part of the taxpayer is suspected, the auditor should discuss the case with his/her supervisor. This informal approach will aid in developing a course of action that will best suit the auditor's needs. The informal discussions should be noted on the history worksheet for the case (EDC-5). It is also important in these instances to keep detailed records of all conversations with the taxpayer.

2. Tax Avoidance Verses Tax Evasion

a) Avoidance

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

It is also important to understand that there is a difference in a taxpayer evading tax or avoiding tax. Avoidance of tax is not a criminal offense. Every taxpayer has the right to reduce, avoid, or minimize taxes by legal means. The distinction between avoidance and evasion is fine, but definite. The taxpayer that avoids tax does not conceal or misrepresent the facts. He has legally shaped events to reduce or eliminate tax liability and reports these transactions in his records.

b) Evasion

The following is a description of evasion:

> "Evasion on the other hand, involves deceit, subterfuge, camouflage, concealment, some attempt to color or obscure events, or making things seem other than they are. For example, the creation of a bona fide partnership to reduce the tax liability of a business among several individual partners is tax avoidance. However, if the facts of a particular case show that an alleged partnership was not in fact established and that one or more of the alleged partners secretly returned his share of the profits to the real owner of the business, who in turn did not report this income, this would be an instance of evasion." REF: IRS Tax Manual - Para. 12(13).

Example:

Company A owns 100% of Company B. Only Company B is required to file an Illinois return. Company B's 2009 Illinois separate apportionment return reflects an Illinois net loss. For federal purposes companies A and B filed a consolidated return for 2009 which reflected net income. After reviewing the federal return, it was found that all expenses were allocated to Company B on its proforma Illinois return. If it is established that this proration was done merely to evade Illinois Income Tax, the fine line between avoidance and evasion has probably been crossed.

3. Minimum Standards for Criminal Investigation

The following are the minimum standards for criminal investigation initiations and prosecution referrals:

Income Tax –

- Individual Income Tax (IL-1040) and Business Income Tax (IL-1120) failure to file: Minimum of two consecutive years and a minimum of $3,500 in state tax liability per year.
- Fraudulent filing of IL-1040 or IL-1120 returns: Minimum of two consecutive years and a minimum $4,000 state tax liability in the aggregate.
- Illinois Income Withholding Tax (IL-941) failure to file: Minimum of four quarters and $3,500 state withholding tax liability in the aggregate.
- Fraudulent filing of IL-941's: Minimum of two consecutive quarters and $1,500 state tax liability.

- Failure to pay over IL Withholding Tax: Minimum of $1,500 state tax liability.

NOTE: Exceptions may be sought for tax preparers, tax protesters, or where other specific circumstances are involved that may warrant criminal prosecution.

Tax Protesters

A “tax protester” is someone who refuses to pay a tax on constitutional or legal grounds. Many will claim the tax laws are unconstitutional or otherwise invalid, while some refuse to file a tax return or file returns with no income or tax data supplied (see “frivolous returns” in IITA § 1006 and IAC § 100.5050 – applies only to IL-1040 filers).

- As of July 15, 2010, CID receives IPD referrals for “tax protester” cases and all suspected fraud schemes. CID reviews these referrals to determine if these cases will be pursued. Audit’s policy of referrals to CID remains unchanged.

4. Examples of Cases to Send to CID

Examples of matters, if material and relevant, which should be sent to CID for review:

- Inconsistencies between taxpayer books and records and other independent sources of information, such as third-party records or bank information;
- Missing documentation, such as resale certificates or other required forms or schedules;
- Taxpayer is uncooperative or evasive to department employees;
- Taxpayer is proven to be untruthful in statements previously made;
- Other articulated factors by the employee based upon their visual observations and past experience that may indicate fraudulent activities such as knowingly and intentionally underreporting taxable receipts or income; and
- Failure to file and pay tax matters where every reasonable attempt has been made to get the taxpayer into compliance.

5. CID Referrals Form EDA-4

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Form EDA-4, Referral to Investigations, must be prepared for the Audit Supervisor's approval, and then forwarded to the Division Manager.

NOTE: CID reports are confidential and should not be disseminated or included in the audit file. If necessary, the data contained in the report can be included in the auditor's comments, but the report itself should not be submitted with the audit.

a) Preparation/Submission of EDA-4

- The EDA-4 can be accessed on the Department's sp•IDOR web. For this fill-in printable form, go to "Work Areas" and click on "Criminal Investigation Division". Choose "Forms" then click on "Referral to Investigations (EDA-4)". Two copies are required to be printed and signed.

  See Exhibit O – Form EDA-4, Referral to Investigations.

- The "Reasons for Referral" section should contain as much information as possible.

  - If the referral is not related to or does not affect a current assignment, all available information and documentation should be included in this section.

  - If the referral directly relates to a current assignment, this section should include:

    1) Taxpayer's explanation for failure to comply.

    2) Method used in the computation of the liability.

    3) Any legal action which may have already been used such as seizure, demand letter, subpoena, etc.

    4) Information about the taxpayer's records, such as the kind and quality of records kept, who kept the records, etc.

    5) The number of contacts with the taxpayer and the results of those contacts.

    6) Also mention any general observations you have about the business, its management, and employees.

- All copies of the EDA-4 should be signed and dated, and then forwarded to the APTS Supervisor for the Division Manager's required signature.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Any correspondence sent via UPS should be sent to: Illinois Department of Revenue, Audit Planning, 101 W Jefferson, MC 3-327, Springfield IL 62702.
- The APTS Supervisor will then forward the EDA-4 to the Division Manager.

b) CID Response

- CID will notify the Audit Supervisor (in writing) of the acceptance or rejection of the referral, generally within 30 days of receipt of the referral, and attach a copy of the EDA-4.
- If no response is received from CID within 25 working days of the referral mailing, the Assistant Division Manager should be contacted by the Audit Supervisor to follow-up with a letter to CID management.

(1) Referral Accepted

If the referral is accepted, CID will request auditor assistance when necessary. All further auditing and investigating activities should be coordinated between the assigned CID agent and the auditor.

(2) Referral Rejected

If the referral is rejected, the reason for rejection will be stated. If additional evidence of fraud is discovered after CID has rejected a referral or has withdrawn from a joint investigation, the case should be referred to CID again.

6. Civil Fraud Determination

If CID rejects the referral to investigate the case for criminally fraudulent activity, the UPIA § 3-6 Fraud penalty (civil fraud) may still be imposed. Upon receipt of such letter, a decision must be made in writing by the Audit Supervisor and/or Assistant Division Manager as to whether to pursue the civil fraud issue based upon the information supplied by the Auditor.

- Authorization to impose civil fraud penalties should generally be granted if the auditor is able to establish that the weight of the evidence will prove:
  1) Material harm was done to the State, by,
  2) A willful act on the part of the taxpayer, with
  3) Intent to defraud the State.

- **Fraud penalties cannot be assessed without approval from the Division Manager.**

- In all cases where a civil fraud penalty is applied, the evidence contained in the audit must be "clear and convincing" and not just a preponderance of the evidence.
    - According to Black's Law Dictionary, a preponderance of the evidence is "a standard of proof (used in many civil suits) which is met when a party's evidence on a fact indicates that it is `more than likely not' that the fact is as the party alleges it to be". Whereas "clear and convincing proof" is proof that is stronger than a mere preponderance of evidence but not to the extent of such certainty as is required beyond reasonable doubt as in criminal cases. REF: Federal Tax Audit Manual - Chapter 12. (IRM 4(12)20) and Black's Law Dictionary).

In summary, imposition of the UPIA § 3-6 penalty is neither simple nor automatic. While easier to sustain than criminal sanctions, it requires painstaking documentation and extensive investigation efforts to uncover the fraud.

C. AUDIT REFERRALS TO INTERNAL REVENUE SERVICE (IRS)

Pursuant to the Federal/State information exchange agreement, the Illinois Department of Revenue has agreed to forward certain information to the IRS. It is vitally important that we cooperate as fully as possible to fulfill this agreement. The types of information and method of handling such data are stated below and must be adhered to.

Auditors may discover or observe questionable items or practices while in the performance of their duties. For example, a taxpayer may have the following issues:

- under reporting gross sales (receipts) on the US Income tax return;
- deducting questionable items;
- taking too many exemptions; or
- other material issue(s).

If an adjustment affects only gross receipts or sales and Federal Taxable Income or Adjusted Gross Income, the auditor should make the Line 1 adjustment on the Illinois income tax return. However, audit policy now dictates that the approval process must be followed before any Line 1 adjustments are made. See Section VII.A.1. – Line 1 Adjustments During an Audit.

A report is to be made to the IRS by completing federal Form 3949-A, Information Referral (found on www.irs.gov, under Forms and Pubs).

See Exhibit S - Form 3949-A, Information Referral.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Form 3949-A

Form 3949-A is divided into three sections.

Section A – Information About the Person or Business You Are Reporting - Complete as per instructions provided with form based on whether taxpayer is an individual or a business.

Section B – Describe the Alleged Violation of Income Tax Law - Complete as per instructions provided with form. For Item 5, please be as specific as possible, indicating the year(s) and audit status. Include a copy of any auditor's reports, summary analysis, etc.

The auditor's report should clearly and concisely outline everything that is questionable including dollar amounts, where applicable, and a synopsis of the work completed. Include copies of the audit working papers.

Section C – Information About Yourself

All referrals should be completed as follows for 7a – g:

[redacted], Revenue Audit Supervisor Change for new supervisor
(217) 557-0773
Mon. – Fri., 8:30 a.m. – 4:00 p.m., CST
101 W. Jefferson, MC 3-327
Springfield IL 62702

Send the original form, along with any attachments, to:

Inter-office:
Disclosure Officer
WIB
MC 1-214
101 W. Jefferson
Springfield, IL 62702

UPS:
Illinois Department of Revenue
Disclosure Officer
101 W. Jefferson St., MC 1-214
Springfield, IL 62702

- The form should not be forwarded to the Tax Compliance Disclosure Officer until all Department field action (including fraud investigation and prosecution) is finalized and the case forwarded to the respective central office locations for processing.
- A copy of Form 3949-A along with any attachments should also be included in the audit file.

XIV. TAXPAYER PROTESTS

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This section explains the avenues that a taxpayer has for unagreed audits once a Notice of Deficiency (NOD) or a Notice of Claim Denial (NOCD) are issued.

A. ADMINISTRATIVE HEARING PROTEST

Administrative Hearings is responsible for protests with a liability of $15,000 or less. This $15,000 limit is exclusive of penalties and interest, unless there is no tax liability the total penalties and interest do not exceed $15,000.

The taxpayer should file its written protest by submitting the Form EAR-14, Format for Filing a Protest for Income Tax, accessible on the Department's website.
Department procedures are as follows:

- Protest received by Administrative Hearings or Review. If received by Administrative Hearings, will be forwarded to Review
- Review (or if not received by Review, SPI Tech) will attach the Protest to the audit in GenTax
- "Admin Hearing" indicator to be set by Legal
- Review will pass audit to SPI Tech Support
- SPI Tech Support will attach necessary documents to audit in GenTax, change audit stage to "Admin Hearing", and send e-mail notification to Legal

The rules relating to Administrative Hearings can be found in IAC Part 200.

B. ILLINOIS INDEPENDENT TAX TRIBUNAL

The Illinois Independent Tax Tribunal Act of 2012 ("Tribunal Act") was made effective 8/28/12 under P.A. 97-1129, establishing the Illinois Independent Tax Tribunal ("Tribunal"). The Tribunal Act was later amended by P.A. 98-463, effective August 16, 2013.

The purpose of the Tribunal is to give the taxpayers an appeal process with a body independent of the Department. Ref: 35 ILCS 1010/1-5(a).

The criteria for the Tribunal's jurisdiction are as follows:

- Protests filed with respect to:
  - Notices of Deficiency and Notices of Claim Denial where the tax amounts for all notices for the same tax year or audit period exceed $15,000 (not including penalties or interest), or
  - Notices of Deficiency proposing to assess no tax liability and proposing to assess interest and penalty totaling more than $15,000.

For the Tribunal, the taxpayer will have to compose a petition, which the Department will then have to answer, in accordance with 35 ILCS 1010/1-50. See the Tribunal petition guidelines at www.illinois.gov/taxtribunal

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For rules governing the Illinois Independent Tax Tribunal, see 35 ILCS 1010/1-1, *et seq.*, and IAC § 200.102 and 200.175.

Department procedures are as follows:

- Petitions received by Legal from Tax Tribunal, will be forwarded to Review and SPI Tech Support
- Review or SPI Tech will attach the petition to the audit in GenTax
- Tax Tribunal indicator to be set by Legal
- Review will pass audit to SPI Tech Support
- SPI Tech Support will make a copy of the audit file for Revenue litigator, change audit stage to "Tax Tribunal", and send e-mail notification to Legal

C. CIRCUIT COURT

Taxpayers who wish to forego the Administrative Hearings or Tax Tribunal process may pay the tax due per audit under protest and file suit in Circuit Court. Suit must be filed within 30 days of making that protest payment. The Illinois Compiled Statutes (30 ILCS 230/2a and 2a.1) provide the requirements for payment under protest. Generally, these requirements are:

- Taxpayers must give notice that their payment is being made under protest;
- The notice of protest must express their intention of filing a complaint for injunction or intention of becoming a party to an existing suit;
- The notice must be substantially in the form provided in 30 ILCS 230/2a.1.

The Department's protest payment Form RR-374, Notice of Payment Under Protest, (accessible on the Department's website) fulfills these statutory requirements. However, a taxpayer's own form of protest may satisfy the requirements if it contains all of the information required by 30 ILCS 230/2a.1.

- If a taxpayer wishes to pay the liability that the auditor has assessed through audit under protest, they should be provided with the RR-374 form. Any monies, which are paid under protest, go into a special "protest" fund and cannot be released into the general revenue fund.

    - A taxpayer that merely writes "protest" or some other indication of protest on the tax return, remittance or in correspondence has not met the statutory requirements.
    - The Department may have to use discretion in determining if a taxpayer has submitted a valid protest. But, in absence of a properly completed RR-374 or other document containing all of the required information, a taxpayer will generally be regarded as not satisfying the requirements for a valid protest.

The protest payments should be accompanied by the RR-374, and the Auditor's Report(s). They should be sent to:

IL Department of Revenue

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Audit Perfection Section
PO Box 19012
Springfield, IL 62794-9012.

Department procedures are as follows:

- Complaint received by the Attorney General's Office will forward to Review and SPI Tech Support
- Protest indicator set by Review
- Review will pass audit to SPI Tech Support
- SPI Tech Support will attach necessary documents to audit in GenTax or make copy of audit file for Revenue Litigator/AG, change audit stage to "Court/Litigation", and send e-mail notification to Legal

XV. PROD-1 AUDIT RESULTS

The PROD-1, Audit Results Report, is used to report the production achieved in the audit. It identifies the area of adjustment (i.e. RAR, NOL, RTIC, etc.), the resolution of the area of adjustment (i.e. agreed paid – AP, established liability – EL, etc.) and the monetary amount of adjustment. The PROD-1 can be accessed as an Excel spreadsheet (version updated 01-31-2018) provided previously in an Audit bureau wide email. This is a standalone PROD-1 that should not be used for audits in APT. Refer to your RAS for access to this standalone spreadsheet, if needed.

Note: This "Excel" PROD-1 should **not** be used for audits that are completed in the CIT package (APT). APT contains its own PROD-1, which should be utilized for those audits completed in APT.

A. PROD-1 COMPLETION

1. General Information

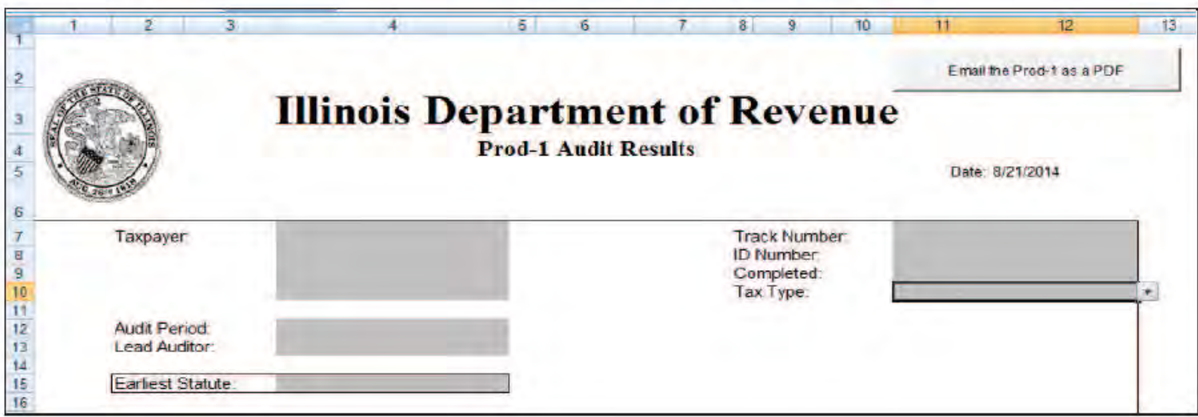
a) Excel Spreadsheet PROD-1

Enter the general information in the upper portion of the PROD-1.

- The taxpayer information should match GenTax information for the name, and the address should be the audit address used during the course of the audit.
- Track number is the GenTax Audit ID – A#######
- ID number is dependent on the tax type as follows:
  - BIT – use the FEIN - ##-#######
  - IIT – use the SSN - ###-##-####
  - WIT – use the FEIN – FEIN-000
  - IL-1023-C – use the FEIN – FEIN-666
  - IL-1000 – use the FEIN – FEIN-555

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

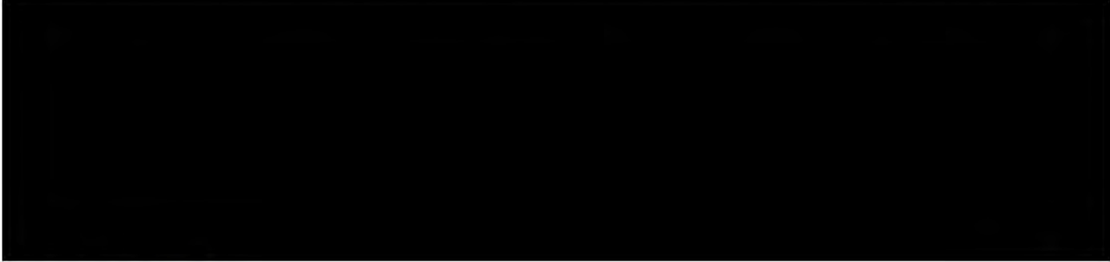
- Completed is the date turned in to the supervisor for review.
- Tax type is a drop-down list, select the correct tax type.
- Audit Period should match the Audit Periods as shown in the Gentax Audit View.
- Lead Auditor is the auditor who completed the audit.
- Earliest Statute – the correct date is vitally important. This date should be the Statute Date as shown in the Gentax Audit View, which should also match the most recent IL-872 on record.



b) APT Self-contained PROD-1

The self-contained PROD-1 in APT can be accessed under the Audit Documents Tab in the tree. Users will click on the PROD-1 document to open for completion.

The lead auditor's name and today's date will fill automatically at the top.



2. Production Codes

Production codes (see table below) are used in the “AREA” portion of Part 1 – Additional Liability by Period (see subsection (4 ~~a~~) below). The production codes entered in this section show the “cause” of the audit adjustment. This section provides historical statistics that, among other things, are used for future audit selection purposes.

	231 Non-Business Income/ Loss
92 2010 Amnesty Interest- 7/02-6/09	232 IL Partnership Income/ Loss
93 2010 Amnesty Penalty	233 Foreign Insurers
96 Interest- Regular	240 Apportionment Change
97 2003 Amnesty Interest- 7/83-6/02	245 Net Op. Loss Deduction
98 Penalty- Regular	250 Sep. to Combined Apportionment
99 2003 Amnesty Penalty	255 Change to Unitary Members
201 CIT/ IIT Nonfiler	260 WIT Taxes Not Withheld
205 Tax Income Under/ Overstated	261 WIT Taxes Not Paid
206 Federal RAR Change	262 Other WIT Adjustments
210 TEI Addition Modifications	280 IT Credit Change R&D
211 Addition Modification Other	281 IT Credit Change Training
212 Add 80/20 Rltd Party Exp	282 IT Credit Change Coal Res. & Util
213 Add Bonus Depreciation	283 IT Credit Change Jobs
220 Sub. US Govt. Interest	284 IT Credit Change Employee Child
221 Sub. Schedule J	285 IT Credit Change Edge
222 Sub. Federal Nol C/F	286 IT Credit Change Film Prod.
223 Sub. Ent. Zone 1120ST	287 IT Credit Change High Impact Bus.
224 Sub. Personal SRV 1065	288 IT Credit Change Afford. Housing
225 Sub. IL RT Tax 1065	289 IT Credit Change Env. Remediation
226 Sub. Other	290 IT Credit Change IT Investment
227 Sub. 80/20 Part Exp.	291 RT Investment Tax Credit Change
228 Sub. Bonus Depreciation	292 Recapture All Credits
229 Non-Bus Inc. Disallowed	293 Other Adjustments
230 Partnership Inc. Disallowed	

Note: The production code “00” should never be used for Income Tax NL audits. The proper code used should be the cause of the audit adjustment. Example: In the case of an RAR change, use 206.

Production codes 10 to 83 and 100 to 196 are ROT, IFTA, Motor Fuel, and Excise tax codes that are not included in this table but appear in the listing of production codes on the PROD-1.

Amnesty Production Codes

Amnesty production codes listed above are Amnesty Period specific. For the **2003** Amnesty Period, eligible tax periods include the periods after June 30, 1983 and prior to July 1, 2002. Amnesty Interest code 97 was

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

used when interest was billed as doubled, and Amnesty Penalty code 99 was used when penalty was billed as doubled.

Production codes for the **2010** Amnesty Program includes the eligible tax periods ending after June 30, 2002 and prior to July 1, 2009. The codes are: 92 for Amnesty Interest and 93 for Amnesty Penalty. These codes must be used for interest and penalty billed on a "2010" Amnesty program period and the liability status will show whether or not the interest and/or penalty is being abated.

3. Liability Status Codes

Liability Status codes are used in both Part 1 (additional liability by Period) and Part 2 (Status of Additional Liability) of the PROD-1. These codes indicate the tax effect (increase or reduction), whether or not the taxpayer agrees, if an original claim has been included in an audit, etc. Also, these codes used on the PROD-1 are to reflect the adjustments to be posted within the audit file.

If the audit assessments are unagreed, then these audits are assigned to the Review section so that the Notices of Deficiency [NODs] or Notices of Claim Denial (NOCDs) are created and issued to the taxpayer within statute.

The following table lists these liability status codes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

AI	Amnesty Interest (92) & Amnesty Penalty (93) Waived	Used to track the amount of interest and penalty waived during the 2010 Amnesty Program	Dollar amount entered as (+)
AP	Agreed Paid	Additional liability established and paid. The paid amount should be equal to the check amount.	Dollar amount entered as (+)
AL	Agreed (Admitted) Liability	Additional liability established and agreed to by the taxpayer but no payment is provided, **OR** deemed assessed Penalty & Interest not yet paid for by the taxpayer.	Dollar amount entered as (+)
CL	Claim	Claim established through regular audit and agreed to by taxpayer.	Dollar amount entered as (-)
CR	Claim Reduction	Amount of original claim that has been reduced. Taxpayer disagrees	Dollar amount entered as (+)
EL	Established Liability	Additional liability established without taxpayer agreement	Dollar amount entered as (+)
IR	IT Reduction	IT credit reduction with no tax effect in the current year	Dollar amount entered as (+)
LI	Loss Increase (only for year of loss)	Used when any change that affects the $ amounts above the Net income Line (ex: 2013 IL-1120 Line 39) increases the ILNLD available to be used	Dollar amount entered as (-)
LR	Loss Reduction (only for year of loss)	Used when any change that affects the $ amounts above the Net income Line (ex: 2013 IL-1120 Line 39) decreases the ILNLD available to be used	Dollar amount entered as (+)
NP	Negative/ Positive Change	Positive amount for RC penalties abated	Dollar amount entered as (+/-)
NL	No Liability	No liability established No adjustment necessary	Dollar amount entered as (0)
OC	Original Claim	Amount of original claim filed by taxpayer	Dollar amount entered as (-) or zero
OI	Offset Loss Increase	May be used in conjunction with LI (Loss Increase), or it may be used on its own if there are no changes to the loss year, but the offset to the income year is reduced in audit. Used when reapplying losses to an income year with no tax effect, but there is an increase in the Loss available to be carried going forward after the loss is offset against audit adjustments in the income year.	Dollar amount entered as (-)
OR	Offset Loss Reduction	May be used in conjunction with LR (Loss Reduction), or it may be used on its own if there are no changes to the loss year, but the offset to the income year is increased in audit. Used when reapplying losses to an income year with no tax effect, but there is a reduction in the Loss available to be carried going forward after the loss is offset against audit adjustments in the income year.	Dollar amount entered as (+)
RC	Reasonable Cause	Amount of reasonable cause included in the audit that the taxpayer requested -penalty abatement	Dollar amount entered as (-)
RR	RT Reduction	RT credit reduction with no tax effect in the current year	Dollar amount entered as (+)
WC	Withdrawn Notice/Claim	Used when a taxpayer agrees to withdraw all or part of a claim	Dollar amount entered as (+)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note: When entering all dollar amounts, each value should be double checked as to whether a (+) or (-) amount, based on the Liability Status code being used, then entered accordingly.

a) 2010 Amnesty Liability Status Code

With the implementation of the Amnesty Program for 2010, a new status code was required. AI – Amnesty Interest (92) and Penalty (93) Waived – will be used to track the amount of waived interest and penalty during the Amnesty Program. The dollar amount should be entered as a (+).

b) Liability Status Code Rules

Whenever using the Liability Status Codes certain rules should be followed.

- One of the most important is whenever AP (agreed paid) is used for an agreed additional liability, the paid amount should equal the amount paid. When an audit of amended returns is performed, the amount paid with any amended return (not processed) should equal the AP (agreed paid) amount. If the taxpayer pays the audit assessment and does not sign the auditor's reports, code the audit as agreed (AP) and write in the auditor comments that the taxpayer has made the audit payment in agreement for the tax to be deemed assessed. Any related P&I assessments that are not paid are to be coded AL. AL reflects that Notice and Demand(s) are to be issued to the taxpayer for the remaining audit assessment (also deemed assessed).

- Whenever an original claim (OC) exists and the auditor determines that a reduction in the claim is required, either CR (claim reduction) or WC (withdrawn notice/claim) will be used. CR will be used when the taxpayer disagrees with the reduction. If CR, the audit will be assigned to the Review section to issue a Notice of Claim Denial to allow the taxpayer protest rights. WC will be used when the taxpayer agrees with the reduction, and either signs an EDA-153 or letter withdrawing the claim.

- Code AL (agreed liability) would normally be used when additional liability has been established and agreed to by the taxpayer, but no payment is provided. However, Technical Review requests that AL be used only when a "Final Notice of Tax Due" (aka "Notice and Demand") will need to be sent to the taxpayer. When an additional liability is being offset with a pending refund, code CM (credit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

memo) should be used (instead of AL), since a "Final Notice of Tax Due" will not be issued by Technical Review.

- Code NL (no liability) should be used when an audit results with no additional liability due. This is used when the audit will result in a total liability [redacted] for the entire audit period, and this is viewed that the taxpayer is basically in compliance. Code NL should not be used for changes in losses or credits that result in no additional tax due, or if the audit file contains signed amended returns.

- Reminder that the audit late payment penalty (if applicable) should be reflected at 20% (if applicable) on the PROD-1 when the audit is submitted. This normally will be in audits coded EL and on tax periods that have been previously audited regardless of production code if penalty is applicable. Appropriate penalty production codes should be used (93 or 98) based on whether an Amnesty period.

- Protest payments are not shown as PD in production. They should be coded as EL.

- If the taxpayer does not make payment or will not sign for additional audit tax assessment(s), these audits are unagreed (EL) and Notice of Deficiency(s) [NODs] must be issued within statute for these protestable assessments.

- **Audits dealing only with claims for refund or no tax effect amended returns are never to be coded as NL (no liability).**

- If an audit referral is made to income tax (from ROT), the Income Tax audit area will not assess the Negligence Penalty on a taxpayer when the ROT audit did not assess the Negligence Penalty on this same taxpayer. Ref: ABB #2018-2 [effective 4/2/2018].

c) Liability Status Codes in APT

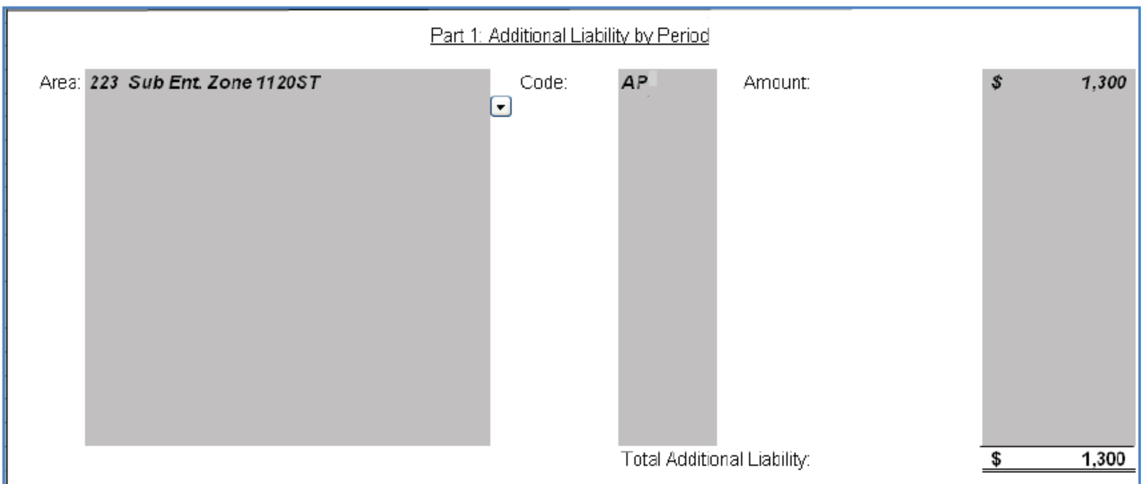
When utilizing the PROD-1 in APT, the following codes apply:

- If the APT 25 the taxpayer signed is the one issued with the 122 using the Jurat statement language, then the 25 is treated just like an amended return and production is "OC".

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If the APT 25 the taxpayer signed is the one issued with the EDA-143 letter and the IL-870 waiver language, then the production code is "CL".

4. Part 1: Additional Liability by Period



Excel spreadsheet PROD-1: Part 1 (Additional Liability by Period) includes drop down lists for both the "Area" field, and the payment "Code" field. When the field is active, a drop-down arrow appears on the right side of that field.

- Click on each drop-down arrow to see the list of available codes.
- Select the appropriate code, then hit the <TAB> key to advance to the payment code field.
- After entering the payment code, hit <TAB> to advance to the "Amount" field.

Part 1 should reflect the audit findings broken down by the "Area" of the adjustment. The auditor will need to verify that the correct code is being used on the PROD-1, since many of the codes have changed. The tab marked "Reference Info" at the bottom of the PROD-1 lists both the old and new codes.

a) PROD-1 Instructions:

Per Audit Management, and for the purpose of tracking production effectively:

1) Do **not net** liability codes reported when there are different applicable area production codes in the audit adjustments. This is essential for data analytics. *Example:* See examples A) and B) under Section "LR – Loss Reduction and LI – Loss Increase" below.

2) The auditor may only combine liability codes if using the same area production code.
   Example: A three-year audit in which the same adjustment (area production code – 228 Sub. Bonus Depreciation) was made in all three years. When reported on the PROD-1, all three years can be combined and reported on one line.

These instructions apply to all PROD-1s available for Income Tax Audit use, which includes: the Excel Standalone, APT and GenTax. With this detailed production information, the newly developed Data Analytics Planning Program will enable Planning to select more productive, focused audit work.

NOTE: All examples illustrated throughout this material are based on the 2014 tax rate (0.095). When determining actual audit production, previous tax year rates may vary.

Definitions

Loss year – A tax period in which the taxpayer has a negative Illinois base income.

Carry year – a tax period in which the taxpayer has Illinois base income, but an excess Illinois net loss deduction from another loss year is carried to the income year to offset it.

b) LR-Loss Reduction and LI-Loss Increase

These LR and LI codes are only to be used on the loss year in which the audit change is made to increase or decrease the loss. They are NOT to be used on the carry year when excess loss is used to offset against a subsequent income year.

(1) LR – Loss Reduction

Loss Reduction production occurs when the year being audited is in a loss state and that loss is reduced, thereby reducing the net loss available to be carried forward. A basic example would be – IL Net Loss beginning is ($500) and after Audit, IL Net Loss is ($400). Production is $100 times the tax rate. Dollar amounts on the PROD-1 need to be entered as a positive amount **(+)**.

PROD-1 Example: The taxpayer's Illinois net loss prior to audit is ($1,000,000). Audit changes to bonus depreciation, non-business deduction, and apportionment reduce Illinois base income to ($500,000). The tax rate is .095. The PROD-1 would look as follows:

Part 1: Additional Liability by Period

Area		Code		Amount		
Area:	*228 Sub. Bonus Depreciation*	Code:	*LR*	Amount:	*$*	*11,875*
Area:	*229 Non-Bus Inc. Disallowed*	Code:	*LR*	Amount:	*$*	*23,750*
Area:	*240 Apportionment Change*	Code:	*LR*	Amount:	*$*	*11,875*

NOTE: This LR production is recorded whether the taxpayer agrees by signature or not. An EDA-143LR must be issued to the taxpayer.

(2) LI – Loss Increase

Loss Increase production occurs when the year being audited is in a net loss and that loss is increased, thereby providing the taxpayer with more available net loss to use in the future. A basic example would be – IL Net Loss beginning is ($150) and after Audit, IL Net Loss is ($200). Production is ($50) times the tax rate. Dollar amounts on the PROD-1 need to be entered as a negative amount **(-)**.

PROD-1 Example: The taxpayer's Illinois net loss prior to audit is ($2,000,000). Audit changes to US interest and apportionment increase Illinois base income to ($5,000,000). The tax rate is .095. The PROD-1 would look as follows:

Part 1: Additional Liability by Period

Area		Code		Amount		
Area:	*220 Sub. US Govt. Interest*	Code:	*LI*	Amount:	*$*	*(190,000)*
Area:	*240 Apportionment Change*	Code:	*LI*	Amount:	*$*	*(95,000)*

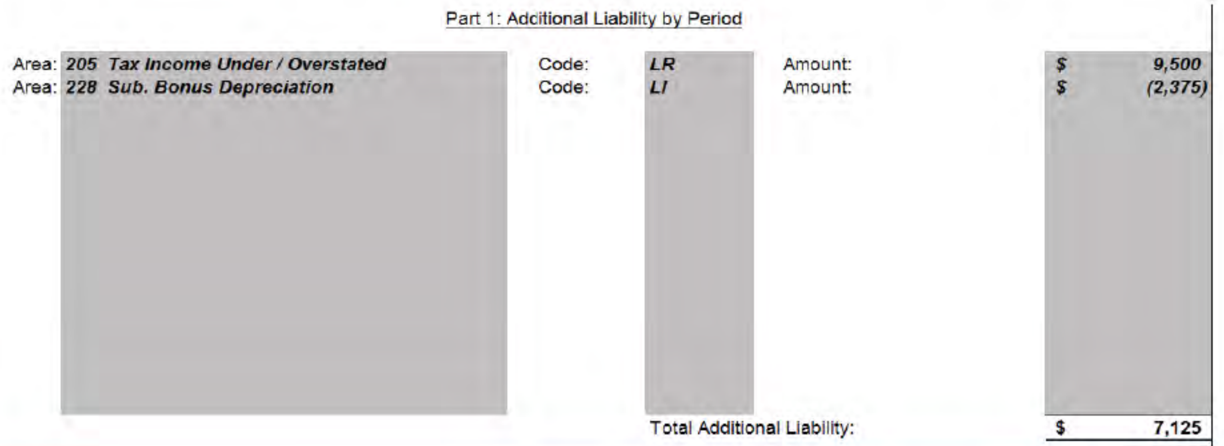
NOTE: This LI production is NOT recorded without a signed amended return/EDA-25 with waiver statement, indicating agreement, from the taxpayer because the increased loss could result in claims being filed in carry years. If the taxpayer does not provide a signed document for this audit, the production should be changed to NL and the amended return/EDA-25 should be annotated with "Do Not Process".

(3) LR – Loss Reduction and LI – Loss Increase

Example for LR and LI used in the same year –

A) LR amount more than LI amount
PROD-1 Example: The taxpayer's Illinois net loss prior to audit is ($800,000). Audit changes increased income by $100,000, but also increased the Bonus Depreciation subtraction by $25,000. The tax rate is .095. The PROD-1 would look as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



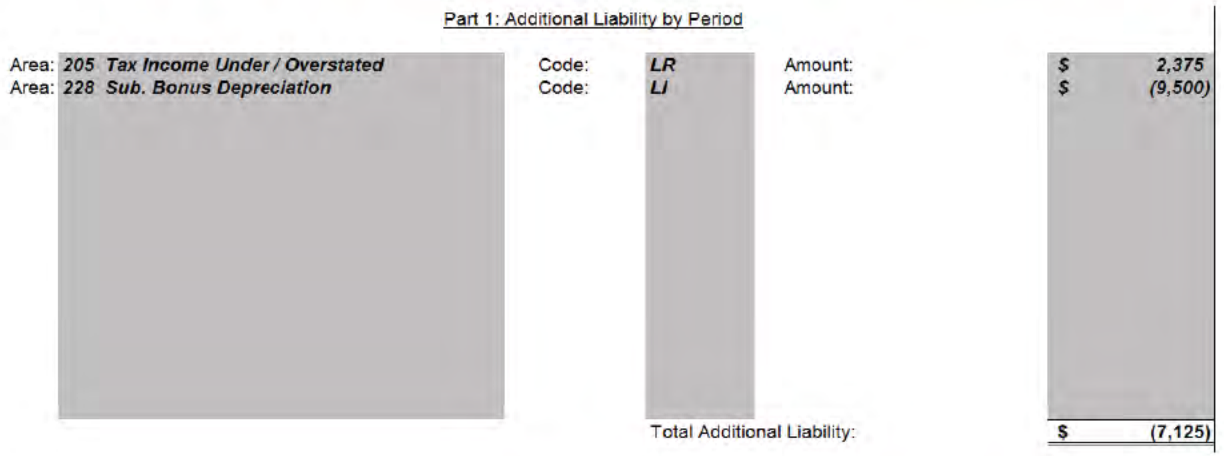
Part 1: Additional Liability by Period

Area	Code	Amount
205 Tax Income Under / Overstated	LR	$ 9,500
228 Sub. Bonus Depreciation	LI	$ (2,375)
	Total Additional Liability:	$ 7,125

Remember – **Since there are two adjustments in this audit for two different area production codes, each must be separately stated**. They **cannot** be netted together into one income change line of $75,000 to result in a net $7,125 LR.

NOTE: This production is recorded whether the taxpayer agrees by signature or not because it is an overall reduction to the loss year. An EDA-143LR must be issued to the taxpayer.

B) LI amount more than LR amount
PROD-1 Example: The taxpayer's Illinois net loss prior to audit is ($800,000). Audit changes increased income by $25,000, but also increased the Bonus Depreciation subtraction by $100,000. The tax rate is .095. The PROD-1 would look as follows:



Part 1: Additional Liability by Period

Area	Code	Amount
205 Tax Income Under / Overstated	LR	$ 2,375
228 Sub. Bonus Depreciation	LI	$ (9,500)
	Total Additional Liability:	$ (7,125)

Remember – **Since there are two adjustments in this audit for two different area production codes, each must be separately stated**. They **cannot** be netted together into one income change line of ($75,000) to result in a net ($7,125) LI.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

NOTE: This production is NOT recorded without a signed amended return/EDA-25 with waiver statement, indicating agreement, from the taxpayer because it is an overall increase to the loss year which can result in claims being filed in carry years. If the taxpayer does not provide a signed document for this audit, the production should be changed to NL and the amended return/EDA-25 should be annotated with "Do Not Process".

c) OR- Offset Loss Reduction and OI- Offset Loss Increase

The OR and OI codes are only to be used on the carry year in which the audit change is made to increase or decrease the amount of the loss carried to offset against the taxpayer's audited income.

(1) OR – Offset Loss Reduction

This code may be used in conjunction with LR (Loss Reduction), or it may be used on its own if there are no changes to the loss year, but the offset to the income year is increased in audit. It is used when reapplying Losses to an income year with no tax effect, but there is a reduction in the Loss available to be carried going forward after the loss is offset against audit adjustments in the income year. A basic example would be – IL Base Income beginning is $500, ILNLD used is $500, and tax is $0; after Audit, IL Base Income is $600, ILNLD used is $600, and tax is $0. Production is for the change in ILNLD used times applicable tax rate. Dollar amounts on the PROD-1 need to be entered as a positive amount **(+)**.

PROD-1 Example: The taxpayer's Illinois base income prior to audit is $800,000 with $800,000 ILNLD used, so tax is $0. After audit, Illinois base income is $900,000 with $900,000 ILNLD used, so tax is $0. The tax rate is .095. The PROD-1 would look as follows:

Part 1: Additional Liability by Period

Area:	228 Sub. Bonus Depreciation	Code:	OR	Amount:	$ 9,500

NOTE: This OR production is recorded whether the taxpayer agrees by signature or not because it is a reduction to the loss available to be offset to future years. An EDA-143LR must be issued to the taxpayer.

(2) OI – Offset Loss Increase

This code may be used in conjunction with LI (Loss Increase), or it may be used on its own if there are no changes to the loss year, but the offset to the income year is reduced in audit. It is used when reapplying Losses to an income year with no tax effect but there is an increase in the Loss available to be carried going forward after the loss is offset against the audit adjustments in the income year. A basic example would be – IL Base Income beginning is $700, ILNLD

used is $700, and tax is $0; after Audit, IL Base Income is reduced to $400, ILNLD used is reduced to $400, and tax is $0. Production is for the change in ILNLD used times applicable tax rate. Dollar amounts on the PROD-1 need to be entered as a negative amount **(-)**.

PROD-1 Example: The taxpayer's Illinois base income prior to audit is $800,000 with $800,000 ILNLD used, so tax is $0. After audit, Illinois base income is $600,000 with $600,000 ILNLD used, so tax is $0. The tax rate is .095. The PROD-1 would look as follows:

Part 1: Additional Liability by Period

Area:	227 Sub. 80/20 Part Exp.	Code:	OI	Amount:	$ (19,000)

NOTE: This OI production is NOT recorded without a signed amended return/EDA-25 with waiver statement, indicating agreement, from the taxpayer from the taxpayer because it is an increase to the loss available to be offset to future years which could result in claims being filed. If the taxpayer does not provide a signed document for this audit, the production should be changed to NL and the amended return/EDA-25 should be annotated with "Do Not Process".

(3) OR – Offset Loss Reduction and OI – Offset Loss Increase

Example for OR and OI used in the same year –

A) OR amount more than OI amount

PROD-1 Example: The taxpayer's Illinois base income prior to audit is $800,000 with $800,000 ILNLD used, so tax is $0. After audit, Illinois base income is $900,000 with $900,000 ILNLD used, so tax is $0. However, audit changes increased income by $125,000, but also increased the Bonus Depreciation subtraction by $25,000. The tax rate is .095. The PROD-1 would look as follows:

Part 1: Additional Liability by Period

Area:	205 Tax Income Under / Overstated	Code:	OR	Amount:	$ 11,875
Area:	228 Sub. Bonus Depreciation	Code:	OI	Amount:	$ (2,375)
			Total Additional Liability:		$ 9,500

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Remember – **Since there are two adjustments in this audit for two different area production codes, each must be separately stated**. They **cannot** be netted together into one income change line of $100,000 to result in a net $9,500 OR.

NOTE: This production is recorded whether the taxpayer agrees by signature or not because it is an overall reduction to the amount of loss available to offset to future years. An EDA-143LR must be issued to the taxpayer.

B) OI amount more than OR amount
PROD-1 Example: The taxpayer's Illinois base income prior to audit is $800,000 with $800,000 ILNLD used, so tax is $0. After audit, Illinois base income is $700,000 with $700,000 ILNLD used, so tax is $0. However, audit changes increased income by $25,000, but also increased the Bonus Depreciation subtraction by $125,000. The tax rate is .095. The PROD-1 would look as follows:

Part 1: Additional Liability by Period

Area:		Code:		Amount:	
Area:	*205 Tax Income Under / Overstated*	Code:	*OR*	Amount:	*$ 2,375*
Area:	*228 Sub. Bonus Depreciation*	Code:	*OI*	Amount:	*$ (11,875)*
			Total Additional Liability:		$ (9,500)

Remember – **Since there are two adjustments in this audit for two different area production codes, each must be separately stated**. They **cannot** be netted together into one income change line of ($100,000) to result in a net ($9,500) OI.

NOTE: This production is NOT recorded without a signed amended return/EDA-25 with waiver statement, indicating agreement, from the taxpayer because it is an overall increase to the loss available to be offset to future years which could result in claims being filed. If the taxpayer does not provide a signed document for this audit, the production should be changed to NL and the amended return/EDA-25 should be annotated with "Do Not Process".

d) Multi-year Audit Example Using New Codes

Basic Example:

Year 1: IL net loss beginning is ($500) and after Audit, IL net loss is ($400) – LR
Year 2: IL Base Income beginning is $500, ILNLD used is $500, and tax is $0; after Audit, IL Base Income is $600, ILNLD used is $600, and tax is $0 – OR
Year 3: IL Base Income beginning is $700, ILNLD used is $700, and tax is $0; after Audit, IL Base Income is $650, ILNLD used is $650, and tax is $0 – OI.

PROD-1 Example:
Year 1 (2012): The taxpayer's Illinois net loss prior to audit is ($800,000). After audit Illinois net loss is ($400,000). Audit changes were to bonus depreciation of ($100,000), non-business deduction of ($200,000), and apportionment $100,000. The tax rate is .095.

Year 2 (2013): The taxpayer's Illinois base income prior to audit is $700,000 with $700,000 ILNLD used, so tax is $0. After audit, Illinois base income is $900,000 with $900,000 ILNLD used, so tax is $0. Audit change was to the subtraction modification for US Govt. Interest. The tax rate is .095.

Year 3 (2014): The taxpayer's Illinois base income prior to audit is $800,000 with $800,000 ILNLD used, so tax is $0. After audit, Illinois base income is $700,000 with $700,000 ILNLD used, so tax is $0. Audit change was to the subtraction modification for 80/20 Party Expenses. The tax rate is .095.

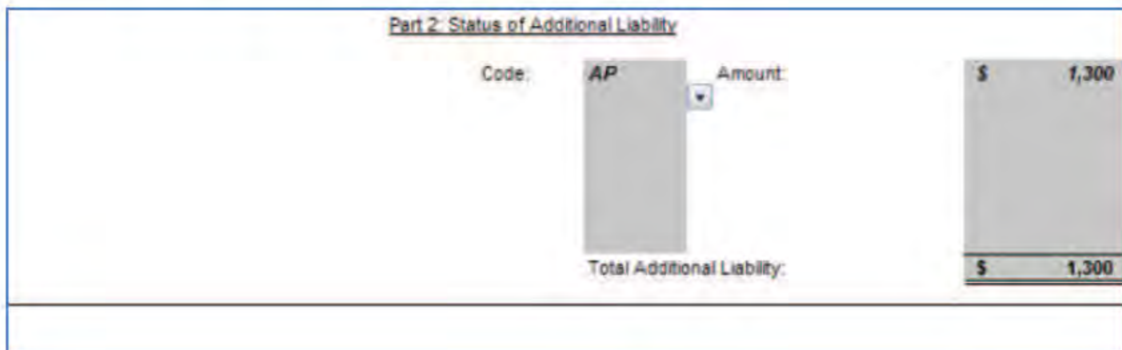
Part 1: Additional Liability by Period

Area		Code		Amount		
Area:	*228 Sub. Bonus Depreciation*	Code:	*LR*	Amount:	*$*	*9,500*
Area:	*229 Non-Bus Inc. Disallowed*	Code:	*LR*	Amount:	*$*	*19,000*
Area:	*240 Apportionment Change*	Code:	*LR*	Amount:	*$*	*9,500*
Area:	*220 Sub. US Govt. Interest*	Code:	*OR*	Amount:	*$*	*19,000*
Area:	*227 Sub. 80/20 Part Exp.*	Code:	*OI*	Amount:	*$*	*(9,500)*
			Total Additional Liability:		$	47,500

NOTE: In a multi-year audit, if there is an LR or OR code, an EDA-143LR must be issued to the taxpayer. Also, if in an individual year within a multi-year audit, there is an LI or OI code, then this production is NOT recorded without a signed amended return/EDA-25 with waiver statement, indicating agreement, from the taxpayer because it is an overall increase to the loss available to be offset to future years which could result in claims being filed. If the taxpayer does not provide a signed document for that respective year [LI or OI] in this audit, the production would not be recorded and the amended return/EDA-25 should be annotated with "Do Not Process".

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

5. Part 2: Status of Additional Liability



Part 2: Status of Additional Liability

Code: AP Amount: $ 1,300

Total Additional Liability: $ 1,300

Excel spreadsheet PROD-1: Part 2 (Status of Additional Liability) is completed like Part 1 by using the drop-down arrow for the "Code" field. Note that the auditor must enter the appropriate liability code on each line in Part 1 and Part 2. Also, the amounts entered in Part 1 and 2 must match, and the **total of each** liability code in Part 1 will be entered for that code in Part 2.

6. Comments and Signatures Section

A "Comments" section allows the auditor to type in comments without having to "unprotect" the PROD-1. The comment section appears as follows:

Comments: Add comments here pertaining to the audit.

Auditor Signature Date Supervisor Signature Date

Per ABB #2018-3 [effective 5/16/2018], the policy concerning signatures on the PROD-1 has been changed. Signatures of the auditor and audit supervisor are no longer required on the PROD-1. In lieu of signatures, the following process must be followed:

- The auditor completes the PROD-1
- The auditor attaches the PROD-1 in the Electronic Documents folder in GenTax and changes the stage to RA Supervisor Inventory when ready to submit the audit to their supervisor for review. Attaching the PROD-1 and changing the stage is proof that the audit was completed/approved by the auditor in lieu of the signature on the PROD-1.
- The audit supervisor downloads and reviews the PROD-1 for accuracy and correctness.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The audit supervisor changes the stage to Passed to Clerical when the audit has been thoroughly reviewed and has been approved. The downloading/review of the PROD-1 and changing the stage is proof that the audit was reviewed/approved by the supervisor in lieu of the signature on the PROD-1.
- If the PROD-1 is not correct or accurate, the supervisor must return the audit to the auditor to correct this document.

Auditor Signature Date Supervisor Signature Date

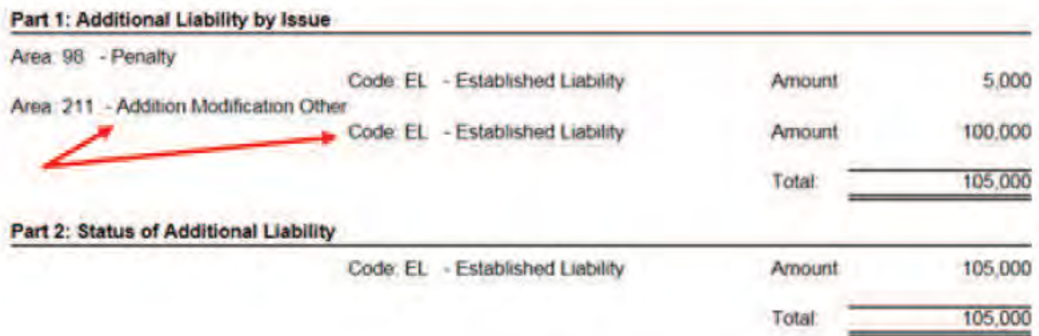
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This PROD-1 can be e-mailed using the “Email the PROD-1 as a PDF” button found in the upper right-hand corner. This button is mainly for use by supervisors who need to forward a copy of the PROD-1 to staff who update production info.

7. APT PROD-1 Codes

To enter the codes in APT, users need to double click on the blank line, scroll down and choose the appropriate codes. Dollar amounts are manual entry fields. The comment section is also available if needed.

Users need to be aware that unlike previous versions of the PROD-1, the display of the APT PROD-1 will be in a two line per entry format. Example follows.



Part 1: Additional Liability by Issue

Area: 98 - Penalty			
	Code: EL - Established Liability	Amount	5,000
Area: 211 - Addition Modification Other			
	Code: EL - Established Liability	Amount	100,000
		Total:	105,000

Part 2: Status of Additional Liability

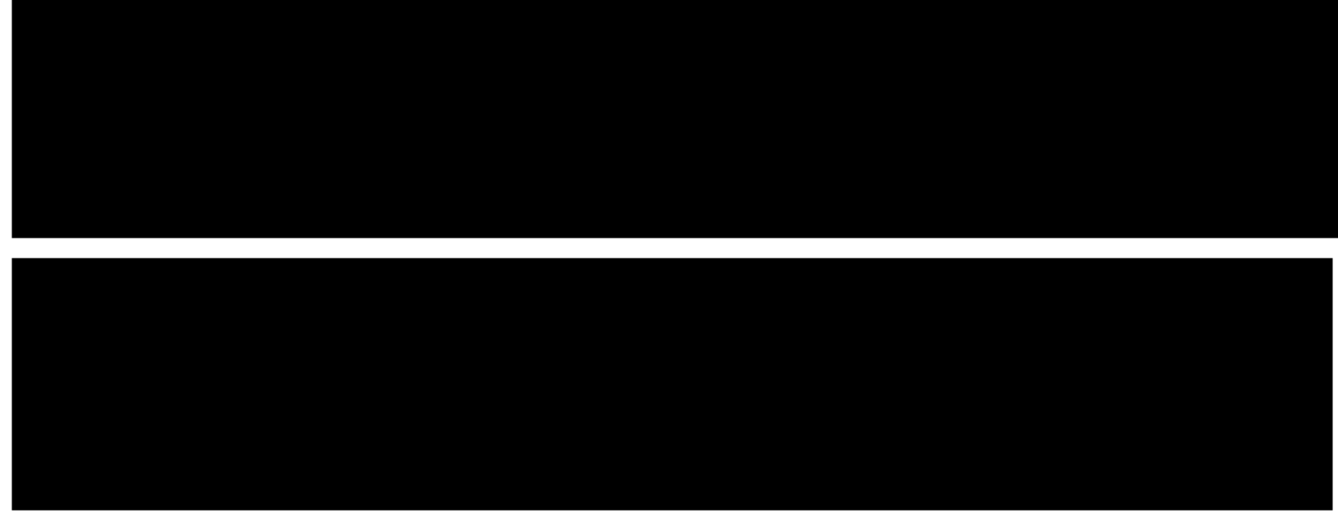
	Code: EL - Established Liability	Amount	105,000
		Total:	105,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

8. Viewing the PROD-1 Results in GenTax

Information submitted on the PROD-1 is entered into GenTax by clerical staff in the Technical Review/Perfection section. The codes can be found in the Audit Manager under the *Audit* tab, *Working Papers* sub tab, Production/Hearings working paper type as shown through the screen print below.

Click on the *Working Papers* ID number to access the Production & Hearings detail.



XVI. DEADLINE TO TURN IN AN AUDIT

A Waiver of the Statute of Limitations for issuance of a Notice of Deficiency must be obtained no later than 2 **months** (60 days) prior to the expiration of the statute. This applies to all Income Tax audits.

If waivers cannot be secured by the above date, ALL audits (agreed and unagreed) must be transmitted to Technical Review. The audit file tracking procedures in Section XXI should be followed. The manager of Technical Review should be notified, in writing or by e-mail, if an unagreed case is pending with a running statute along with an expected arrival date for the case in Review.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

TIMELINE FOR SUBMITTING AN AUDIT WITH STATUTE DATE

The following timeline chart examines various segments that affect audit completion, with the minimum amount of time for completion being nine months.

	Months
All audits must be submitted with 2 months on statute (OP 92-002 & 92-003)	**2.0**
RAS has up to 30 days to review completed audit (OP 92-002)	**1.0**
IL-870 – has 30 days to expire	**1.0**
EDA-122 and EDA-125 – have 60 days to request ICB	**2.0**
Preliminary audit results – 30-day deadline for taxpayer to review	**1.0**
Minimum amount of time to begin audit completion	**7.0**

Note: This timeline does not account for any time to transmit audits to your RAS or time to revise any documents if additional information is received from the taxpayer that impacts the audit conclusion.

The taxpayer can sign a waiver any time during this process to provide additional time for submitting the audit.

If the taxpayer's ICB request is accepted, once the recommendation is issued a new statute date may exist.

XVII. ASSEMBLING THE AUDIT FILE FOR SUBMISSION

Note: For submission of Electronic Audits, refer to the section on Electronic Audits in Chapter 2, General Audit Procedures.

Before submitting the paper audit for review, the auditor needs to properly assemble all of the documents contained within the audit. To aide in this assembly, the EDA-51, Income Tax Audit Index, should be completed and used as a guide for determining the order of documentation within the audit file folder.

- **See Exhibit P (For audits not completed in APT: #1 – the EDA-51 used by field auditors and #2 – the EDA-51 used by in-house auditors. For audits completed in APT: #3 – the EDA-51 contained in APT)** at the end of this chapter.

  There are other EDA-51s available:
  1) the EDA-51-WIT, used in withholding audits. See Chapter 44 for information on Withholding and the EDA-51-WIT.

2) the EDA-51-IIT, used in individual income tax (IL-1040) audits. See Chapter 45 for information on these audits and the EDA-51-IIT.

Note: When using the CIT package (APT) for an audit, the EDA-51 available through that package must be used, as opposed to previous EDA-51 versions.

XVIII. AUDIT SUBMISSION AND REVIEW

Note: For submission of Electronic Audits, refer to the section on Electronic Audits in Chapter 2, General Audit Procedures.

A. SUBMISSION

1. Agreed Audits

"Agreed Audits" must be submitted to the supervisor for review within **15 days** of auditor notification of receipt of the payment voucher or receipt of signed return, or signed IL-870 "Waiver of Restrictions", whichever is later.

2. Unagreed Audits

"Unagreed Audits" will be discussed with the supervisor prior to submission. "Unagreed Audits" must be submitted to the supervisor for review within **15 days** of the expiration date of the IL-870 "Waiver of Restrictions".

3. No Liability Audits

"No Liability" audits must be submitted for supervisor review within **15 days** of finalizing casework.

Note: If an auditor cannot submit the audit as outlined, the auditor must notify the audit supervisor and include rationale stating why they could not comply within these dates.

B. REVIEW

Supervisor Review of Submitted Audits

In-house and field supervisors are expected to review completed audits and either approve them or return them to the auditor for correction, within the time frame established in the Management Expectations.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Audits Returned by Revenue Audit Supervisor

All completed audits returned by the Revenue Audit Supervisor to the auditor must be treated as a priority by the auditor and returned to the supervisor within **15 days** of receipt.

XIX. CONTINUING AUDIT FILE

Audits initiated after October 31, 2017:

The audit will be "paperless", an electronic audit stored in GenTax and accessed on the Audit Springboard under the CRM Electronic Documents tab. This audit documentation will now be stored in GenTax. See Audit Manual Chapter 2 for information on Electronic Audits.

Audits for tax years 2011 and prior to November 1, 2017:

The Continuing Audit File (CAF) is stored electronically in a network storage area (Tiamat). The purpose is to have a complete copy of the audit file and associated workpapers available electronically for future use (e.g., copies for administrative hearing, original audit file missing, etc.). Superseded workpapers should not be included. If these items need to be referenced at a later time, the audit may be ordered from Records Management in Springfield.

- A paper copy of the CAF identical to the electronic CAF may be kept in the respective field office at the auditor's discretion for future audits. Under no circumstances are they to be retained at the auditor's home.

The network storage area is designed so that each auditor has full rights to all files stored in Tiamat. Supervisors have full rights to each of their auditors' folders. The Audit Review, IT Audit Technical Support, and Computer Support personnel have full access to these folders as well.

Upon completion of the audit, it is the auditor's responsibility to store the required audit documents in the network storage area and to clear the audit from their laptop and/or desktop computers. Supervisors will be responsible for reviewing the audit folders.

Network storage is NOT replacing the paper audit file. Any audit documentation on paper should continue to be turned in with the paper audit file for these specific tax years.

Audits for tax years prior to 2011:

A paper CAF is the only available resource for those years.

A. NETWORK STORAGE INSTRUCTIONS

All auditors have a folder located on \\tiamat\sys\audits\users. All auditors (field and in-house) are required to save audits to the network location.

- **See Exhibit Q – How to Save Audits to the Network.**

Documents with taxpayer's original signatures on them should be included in the electronic CAF; such as but not limited to signed IL-870's and Waivers of Statute of Limitations. These documents should be scanned into the respective audit file and loaded into the CAF.

WARNING: YOU SHOULD STILL BACK UP YOUR IN-PROGRESS AUDITS ONTO A DEPARTMENT ISSUED ENCRYPTED FLASH DRIVE AS WELL AS ON THE HARD DRIVE. THIS IS YOUR ONLY PROTECTION IF YOU LOSE THE HARD DRIVE IN YOUR COMPUTER.

B. AUDIT REVISIONS

1. Prior to Protest

Revisions made to documents by field auditors or in-house auditors should be saved so that the new version *overwrites* the already saved version.

2. After Protest is Finalized

For audits forwarded to Administrative Hearings, Court or Independent Tax Tribunal, any revisions to auditor reports after they have entered this process will need to be saved as a separate document by IT Audit Technical Support.

C. VIEWING AN AUDIT IN STORAGE

1. Field Auditors

Once an audit is in storage, the auditor may need to view that audit information. The following provides the steps for viewing that audit:

- Go to your storage folder
- Right-Click on the applicable track to be viewed
- Left-Click on "Copy"
- Go to "Computer"
- Double-Click on the C: drive
- Double-Click on CIT audits
- Right-Click on an empty space
- Left-Click on "Paste"

2. In-House Auditors

- Go to your storage folder
- Double-Click on the applicable folder

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

D. REQUIRED DOCUMENTS

1. Income Tax

The following is a list of items (not all-inclusive) that are required to be included in the electronic CAF of all audits, <u>if applicable to your audit</u>:

- IL-872 Consent to Extend the Statute of Limitations (signed)
- ICB Action Decision
- EDA-51 Income Tax Audit Index
- Prod-1 Production Results
- IL-870 Waiver of Restrictions (signed)
- EDA-64 Auditor's Comments
- IL-2848 Power of Attorney
- Schedule UB
- CIT Schedules – apportionment factor details
- EDA-27 Explanation of Adjustments
- Auditor's Reports (EDA-24, EDA-25, etc.)
- Penalty and/or Interest Computations
- NOL Schedule (Verified Exported Excel NLD spreadsheet from GenTax)
- EDC-5 Taxpayer History Worksheets
- EDA-70 Information Document Requests
- 404 adjustment computations
- EDA-8 Collection/Legal Action Support
- Supporting Schedules from Federal Returns
- EDA-132 Unitary Determination Questionnaire, if applicable
- Word documents
- Excel spreadsheets created by the auditor
- Taxpayer correspondence

Note: Additional documentation that is pertinent to the audit may also be included in the electronic CAF. If warranted, documentation may need to be scanned and saved as pdf files.

2. Income Tax Discovery

Discovery leads generated from the GenTax Discovery program are saved within GenTax and are not required to be saved in the auditor's network storage folder. Work papers, spreadsheets, non GenTax word documents, etc. are to be saved as attachments to the lead in GenTax.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

E. TIAMAT ACCESS

Auditors have access to all files stored in Tiamat, which should be audits prior to November 1, 2017. This is important when needing to access taxpayer tax information [CAF] from a previous audit (but completed by another auditor) that may be pertinent to the current audit.

CAF Requests (For Audits in Tiamat)

1. Open the closed audit from the Business account manager, Audit tab, click on "Show History" tab. Click on hyperlink of the audit requested.

2. Note Audit ID and look in audit history for the auditor who performed the audit.

3. Go to \\tiamat\sys\Audits\Users\.

4. Click on folder of the auditor for the CAF requested.

5. Search the auditor's folder for the Audit ID and/or taxpayer's name and audit period of the CAF requested.

6. When found, highlight the file, right-click the mouse, select "Copy"

7. Open the requesting auditor's folder on \\tiamat\sys\Audits\Users\.

8. Right-click the mouse while hovering in the white space to the right of the file list, select "Paste".

Form IDR-229, Uniform Audit Action Request, is not required to be completed/submitted when copy/pasting such files. The IDR-229 would only need to be completed/submitted if needing access to "old" taxpayer forms not stored in Tiamat – in which case, mark the box "Request for Data" on the form. Form IDR-229 (a savable fill-in pdf) is available under Forms in the Audit Work Area on the sp●IDOR web. The completed IDR-229 would need to be emailed to REV.G.ITAuditPlanning@illinois.gov.

XX. THE QUALITY AUDIT

Audits pass through a series of steps after they are transmitted to Audit Perfection for approval and processing to ensure that they are completed properly. When the audit is received in Technical Review, it is assigned to an RTS. The RTS performs an initial review of the audit. The RTS verifies that audit processing documents and schedules are complete and correct,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

workpapers supporting audit adjustments are included, payments are correct, and there are no computational errors.

The audit then advances to the second stage of review where it is assigned to an Audit Reviewer. The reviewer, who is a Revenue Auditor, then analyzes the audit to make sure that all audit issues have been checked and that the law has been properly applied. There are several general areas of concern to the reviewer.

- Did the auditor apply the law properly, are the computations correct, and is the report clear, concise and meaningful?

- Have approved versions been utilized for all audit forms and workpapers? There will be instances where standard generic computer spreadsheets will not work for audit scheduling purposes. Customized spreadsheets can then be made from Excel.

XXI. RETURNED AUDITS

The main purpose and responsibility of Technical Review is to evaluate every audit for quality and completeness and to issue Statutory Notices ~~a~~ [Notice of Deficiency (NOD) or Notice of Claim Denial (NOCD)] that they feel can be upheld at the Administrative Hearings, Tax Tribunal, and/or Circuit Court level. Auditors who are contacted by Technical Review regarding an audit they have completed, should understand that the reviewer/analyst's intention is not to create more work for the auditor but, rather, to improve the quality of the audit being transmitted. In this way the Audit Bureau will continue to pursue the goals of the Department's Mission Statement which include establishing clear, concise, accurate and timely communications with the public and to maintain a work force that demonstrates the highest standards of integrity, efficiency and performance.

Note: Audits must be transmitted to Technical Review/Audit Perfection (TR/AP) prior to the 60 days deadline for securing an IL-872 by the auditor. Once in TR/AP, if the audit then falls within the 60 days statute date period prior to processing being completed, TR/AP is responsible for securing an IL-872.

> Example: An audit was transmitted to TR/AP with six months left on the statute (well within the 60 days deadline). When processing has not been completed yet with 60 days left on statute, TR/AP is responsible for securing an IL-872.

Occasionally errors are discovered by Technical Review that can be corrected in-house. In this case, an email will be sent to the Auditor and Supervisor as an "advisory", which will explain any corrective action taken before processing the audit.

If the audit cannot be corrected in-house, it will be returned for revision. Any transfer (or movement) of an audit must follow the guidelines established in the Audit File Tracking Procedures (see next Section). For Paper Audit Files (although, obsolete as of October 31, 2017):

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The reviewer creates a Working Paper in GenTax for the audit to be returned to the field.
- Reviewer gives the audit file to the Tech Review Supervisor.
- Audit file is sent to auditor or RAS
- Auditor corrects audit and adds Response on Working Paper in GenTax
- Auditor prints comments page to place in the audit file and sends to Audit Supervisor
- Audit Supervisor enters comments that they are approving the response
- Audit Supervisor sends e-mail to the Tech Review Supervisor and reviewer that file is being returned
- Auditor places an 8 ½ x 11 paper on front of audit file with reviewer's name so file gets back to reviewer.

For Electronic Audits:

- The reviewer creates a Working Paper in GenTax for the "audit" to be returned to the field for correction.
- Notification of this "returned audit" will happen through an email that is initiated out of GenTax when stage is changed.

Audits Returned by Audit Review & Perfection (AR&P)

Returned audits must be handled as a priority.

1) Returned audits not requiring additional contact with the taxpayer must be answered and resubmitted to the supervisor within **15 days** of the notification.

2) Returned audits requiring audit changes and taxpayer contact require that contact with the taxpayer must be made within **15 days** of the notification from AR & P. The returned audit should be resubmitted to the supervisor within **15 days** of all completed changes.

3) Supervisors must review the returned audit within **15 days** of receipt from the auditor and, if correct, return to AR & P.

XXII. AUDIT FILE TRACKING

Audit File Tracking applies to ALL audit staff (field and in-house). The ability to track audit files is essential since these files may contain Federal Taxable Information (FTI). This FTI may be actual documentation received from the IRS or co-mingled information that appears on printed

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

GenTax screens included in the audit file. Therefore, GenTax screens should be printed sparingly.

To ensure the audits can be properly tracked, an email trail is essential. Note that an email is **in addition to** the appropriate changes that are required to be made in the GenTax through the Audit View. Generally, any time the audit is transmitted from one Audit employee to another, two emails will be initiated. One will be sent from the sender to the intended recipient. The second will be sent from the recipient back to the sender once the audit has been received. Each email should contain the following for each audit being transmitted:
(1) name of the taxpayer
(2) audit track number
(3) tracking number, if available when mailed by UPS.
(4) expected delivery date, if mailed by UPS.

The email trail should be as follows:

A. COMPLETED AUDITS RECEIVED FROM FIELD

a. When an auditor submits the audit (paper audit) to their supervisor, they need to send an email indicating the date that it is being submitted or delivered (either physically or by UPS) to that supervisor. If the audit is being sent UPS to an office, the clerical that handles the office mail should be "copied" on that same email.

b. Once the audit is received by the supervisor, a reply email should be sent back to the auditor as confirmation that the supervisor is now in possession of the audit.

c. Upon receipt of a completed audit, supervisors are to review the completed audit, and either forward it to the appropriate Audit clerical staff for processing or return the audit to the auditor for correction(s), within the time frame established in the Management Expectations. In either case, the supervisor must email the appropriate person (either the auditor or the clerical staff) that the audit is being returned/forwarded on a given date. Attached to the email should be the scanned transmittal. See Audit Manual Chapter 1 for information on transmittals.

d. In turn, the auditor or the appropriate Audit clerical staff would email back to the supervisor when they have received that particular audit.

e. If the completed audit passes supervisory review, the supervisor must follow staging, etc. procedures.

B. REVIEWED AUDITS THAT NEED CORRECTED

a. When the Technical Review Supervisor determines that an audit needs to be returned to the auditor for correction, the supervisor must email the reviewer,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

auditor, auditor supervisor, Assistant Division Manager, and Division Manager providing notice that the audit is being returned for correction (and the date that it is being returned). Attached to the email will be the Excel file that the reviewer had prepared.

Audits (paper audits) being returned to the field can now be sent directly through the Department of Revenue's mail room. Also, when returning an audit, please do not send via certified mail due to the Department's policy to eliminate certified mailing costs. Returned audits **must** be sent via UPS.

Note: Audit Review in Sales Tax rarely mails back audits for correction to the field. Most are now sent electronically as an email with the Excel file attached for correction.

b. Once received back for correction, the auditor and/or supervisor should email that the returned audit is now in that person's possession. After corrections are made, the audit will be submitted back to that auditor's supervisor for approval. Again, an email will be required when submitting the corrected audit back to his/her supervisor.

c. The supervisor must email the auditor when the audit has been received back with the corrections. Once corrections are approved by the supervisor, the Audit supervisor should notify (e-mail) the Technical Review Supervisor (and the personnel listed in (a) above) that the file is being returned. The file should contain a copy of the response that the auditor entered in GENTAX. The auditor should place an 8 ½ x 11 sheet of paper in the front of the audit file with the Reviewer's name plainly printed so that the file gets back to the reviewer and does not end up mixed in with new inventory.

d. Once the corrected audit is received back in house, an email should be sent to the field supervisor stating that the corrected audit was received.

C. MAILING OF AUDITS TO REVENUE OFFICES

This information moved to Audit Manual Chapter 1.

D. AUDIT MOVEMENT BETWEEN REVENUE OFFICES

This information moved to Audit Manual Chapter 1.

E. DETERMINATION THAT AN AUDIT FILE IS MISSING

This information moved to Audit Manual Chapter 1.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

F. AUDIT TRANSMITTAL FORM IN GENTAX

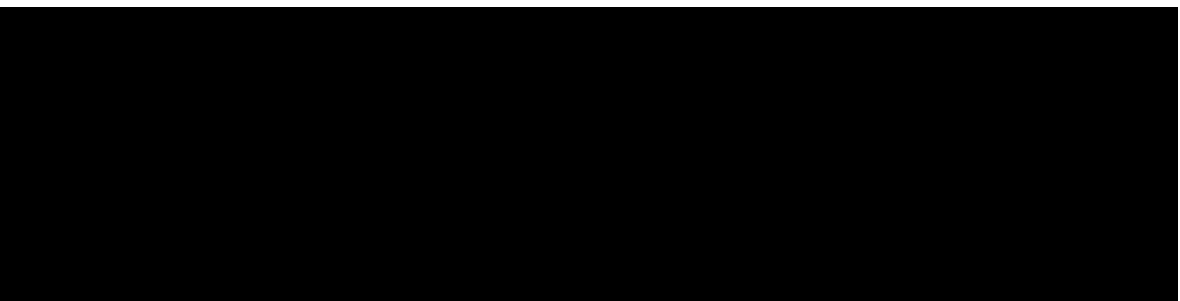
This information moved to Audit Manual Chapter 1.

XXIII. CORRESPONDENCE RECEIVED AFTER AUDIT CLOSURE

Situations may arise in which correspondence is received after an audit has been closed. The two most common types of correspondence that might be received are:

- Reasonable Cause (RC) request – see Audit Manual Chapter 2, General Audit Procedures, for additional information
- Requesting explanation of P&I billed

In-house auditors will receive the actual work item, while field auditors will be informed by email (no physical work item). Work items can be seen in GenTax, under the Task tab and Work Items subtab.



The following steps should be used for an RC request:

- The auditor should check the CAF (either in GenTax or Tiamat dependent on tax year) to see if a previous RC request was addressed during the audit.
  - If yes, but the request had been denied, the taxpayer should be informed that: 1) RC was previously denied and 2) the BOA process would be available. Taxpayer should be sent a Free Form letter stating such information.
  - If no, but the taxpayer has already agreed to the audit with payment of the tax liability, the taxpayer should be informed of the BOA process. Taxpayer should be sent a Free Form letter stating such information. In-house auditors should print a copy of the Free Form letter to attach with the physical work item, which will be closed and sent to files.

The following steps should be used for an explanation of P&I billed:

- Auditors (both in-house and field) should review the audit P&I calculations, then send a Free Form letter to the taxpayer with an explanation as to the billed P&I.
- Example of this situation is the taxpayer paid the tax, penalty and interest shown on the IL-870 later than 30 days after issuance. The bill is most likely the additional 5% penalty and interest amount is the accrued interest from date of issuance of the IL-870 and the date the payment was received.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

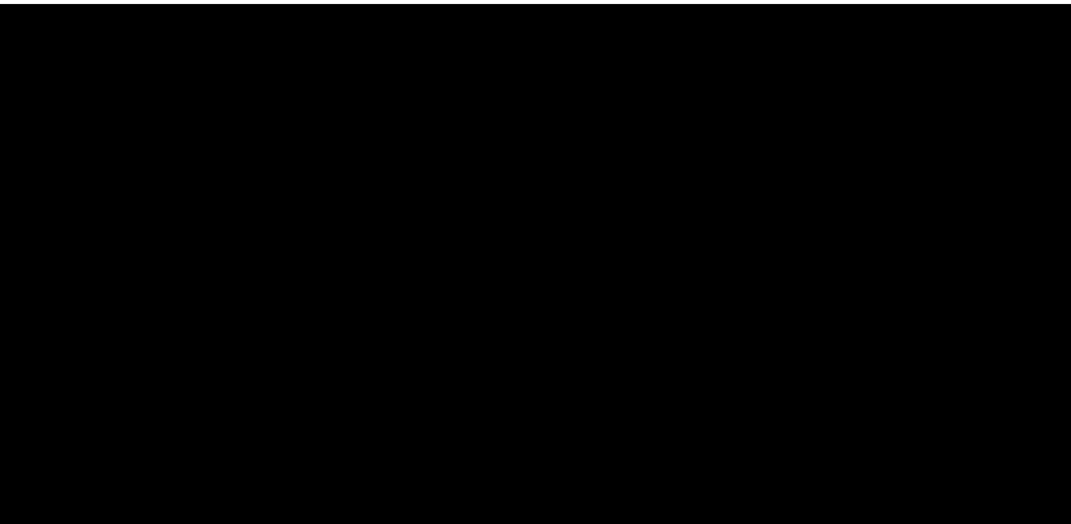
XXIV. EXHIBITS

A. EXHIBIT A - HOW TO SEARCH FOR UNITARY MEMBERS

1. Schedule UB Changes in GenTax

For periods prior to December 31, 2010, the Schedule UB is a separate document under the Returns sub-tab. Starting with periods December 31, 2010 and forward, the Schedule UB is part of the actual return. In order to view the UB information, a user must select the return and then the Schedule UB tab located within the return. The information in the Schedule UB remains the same, only the location of the information has changed.

Display 2009 and prior:

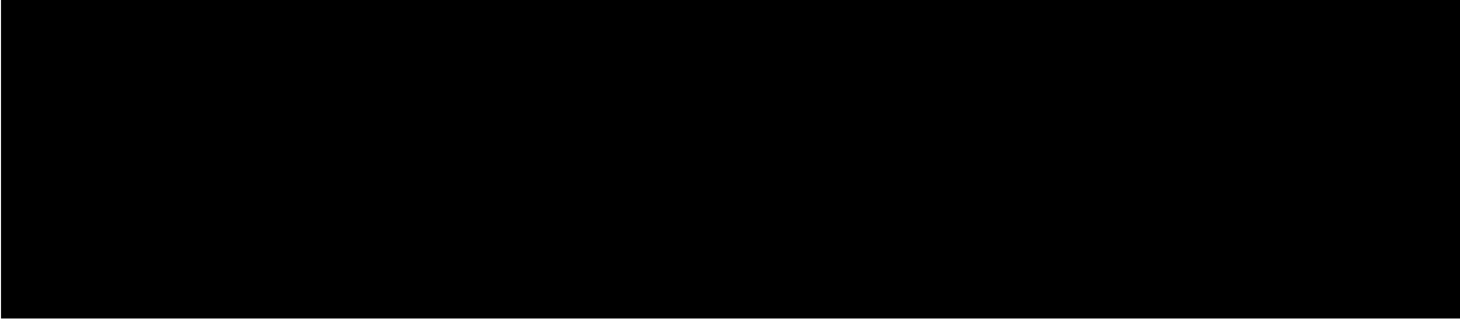


Display 2010 and forward:

Click on the return doc type for that particular year to access the return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The return screen will open. The Schedule UB can then be viewed by clicking on the Schedule UB sub-tab on the far right.



2. Searching for Unitary Members

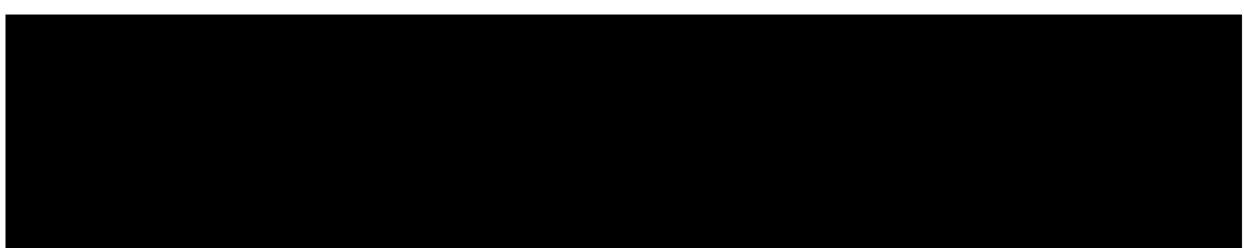
There are two options that a user can use to look up members of a Unitary Filing - the Unitary Search (sub-tab) or the Report Manager.

a) Unitary Search

The Unitary Search (sub-tab) can be accessed through the Financial Tab when in the taxpayer's account. This search is appropriate when the user is already on a **related** taxpayer account for which they have a business purpose and there is reason to believe that the taxpayer they are researching should be a part of the same group.

1) Click on the Unitary Search sub-tab to open the search.

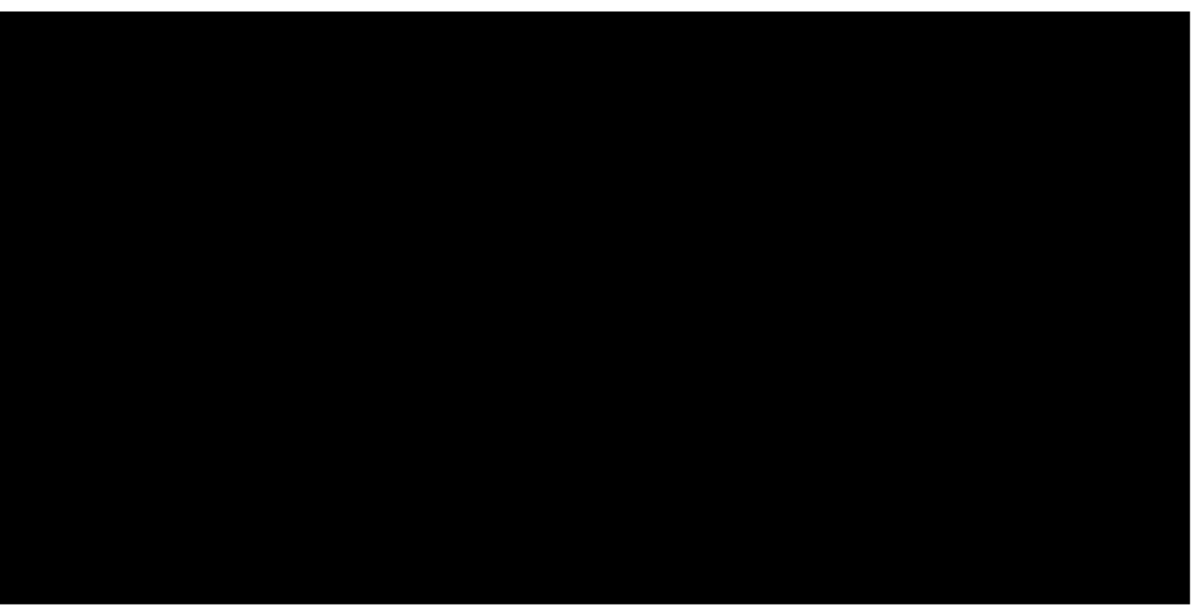
2) The search box will appear. Enter the FEIN of the entity being searched for, then hit "Enter".



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3) If the FEIN is found, the information bar will appear below the search box. Click on the Filing Period.

4) The Schedule UB information of the entity that was searched for will be displayed.

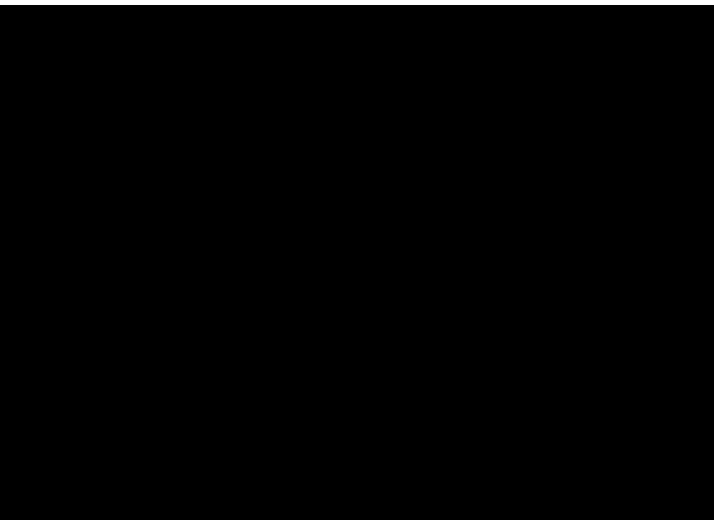


b) Report Manager

The Report Manager should be used when determining if a taxpayer filed as a part of a unitary group for whom the designated agent is **unknown**, and the user does not have an audit assignment on a related taxpayer that could be in the same unitary group.

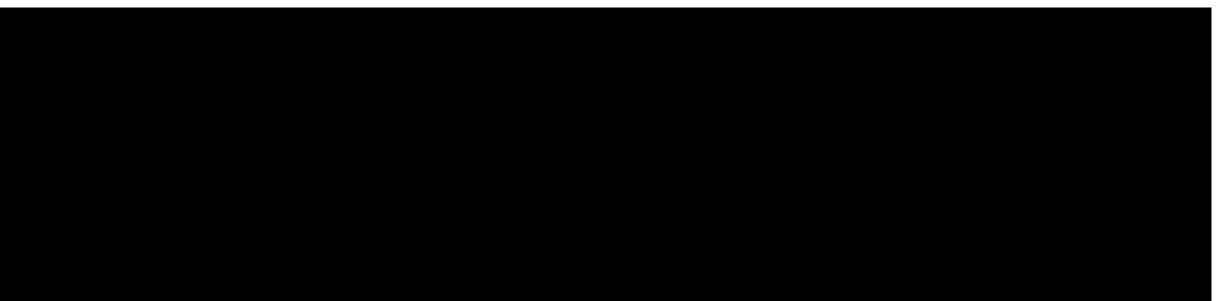
1) Access the Report Manager.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



2) Once in the Report Manager, click on the Report List tab***.***

3) The user can then quickly locate the ad hoc report by typing ***FEIN in Multiple Groups*** into the filter line, then hit “Enter”.

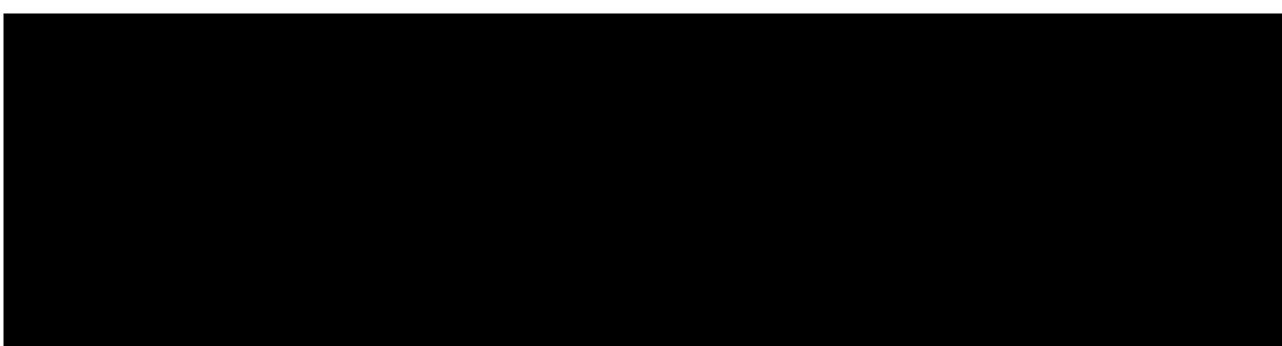


4) Click on the report title – FEIN in Multiple Groups.

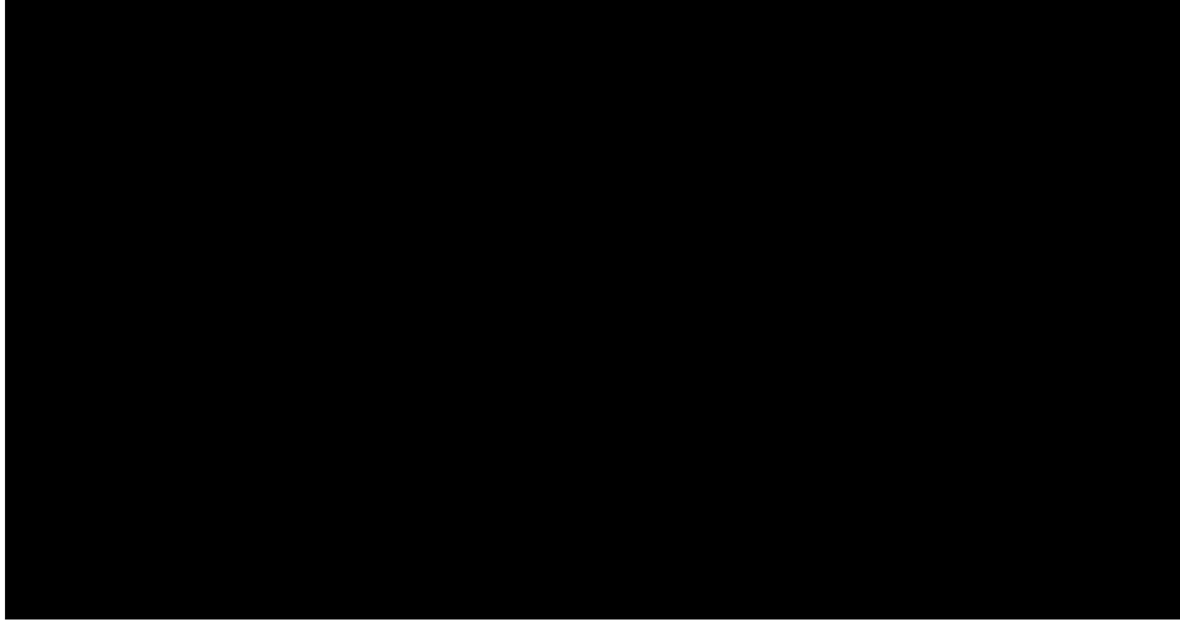
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

5) After selecting the report, the details screen will open allowing for the FEIN that the user is researching to be entered.

6) The results for this report look similar to the screen in the Unitary Search above.



7) Clicking on the Filing Period will bring up the Schedule UB information for the entity. This is the same screen as seen in the Unitary Search above.

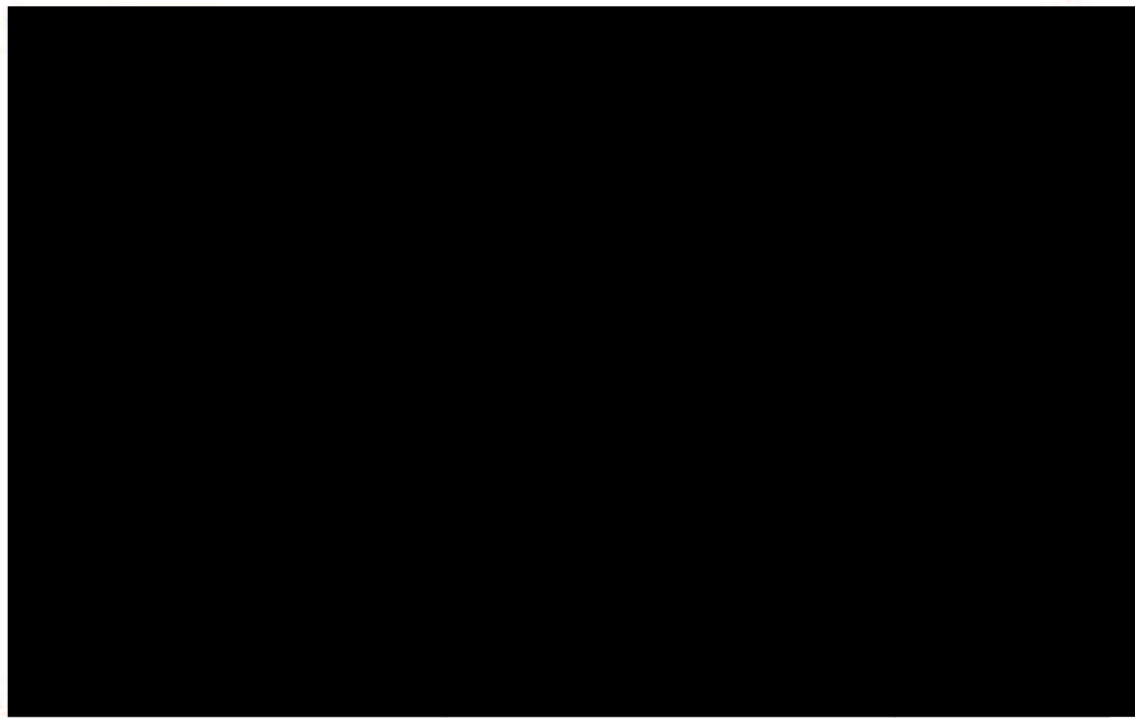


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

B. EXHIBIT B - HOW TO CHECK FOR OPEN WORK ITEMS

When in the taxpayer's account (BIT), click on the Task tab, then click on the Work Items sub-tab to see open work items pertaining to the taxpayer. The number of work items present (7 in this screen print) will be shown on the sub-tab.

The open work items details will be shown under the Work Items sub-tab. "Work Type" will need to be reviewed to determine if that particular work item should be addressed in the audit.



The following chart shows the work items that do **not** need to be addressed (all others will need to be "worked" as part of the audit).

Work Items that do not need Addressed
Amended Return Received
Original Return Received
TRM Send to Files
Audit Sent to Files
2nd Level Review….
Quality Review

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

C. EXHIBIT C - HOW TO LOCATE PAYMENT INFORMATION IN GENTAX AND LEGACY PDF DISPLAY

1. Locating Payment Information in GenTax

To locate the payment information in GenTax, the auditor will need to be in the taxpayer's account, then click on the Payments sub-tab under the Financial Tab.

2. Accessing Payment Information in Legacy PDF Display

To access the payment detail in Legacy PDF Display the auditor will need to open Legacy PDF Display and follow the instructions in that program. See details on accessing Legacy PDF Display in AM Chapter 46.

BIT System Code Reference Card (EDA-78) – Payment/Credit History Codes

When reviewing taxpayer payment information in Legacy PDF Display, an understanding of history codes is necessary for determining payment types. The following payment history codes and their meaning are relevant to Audit:

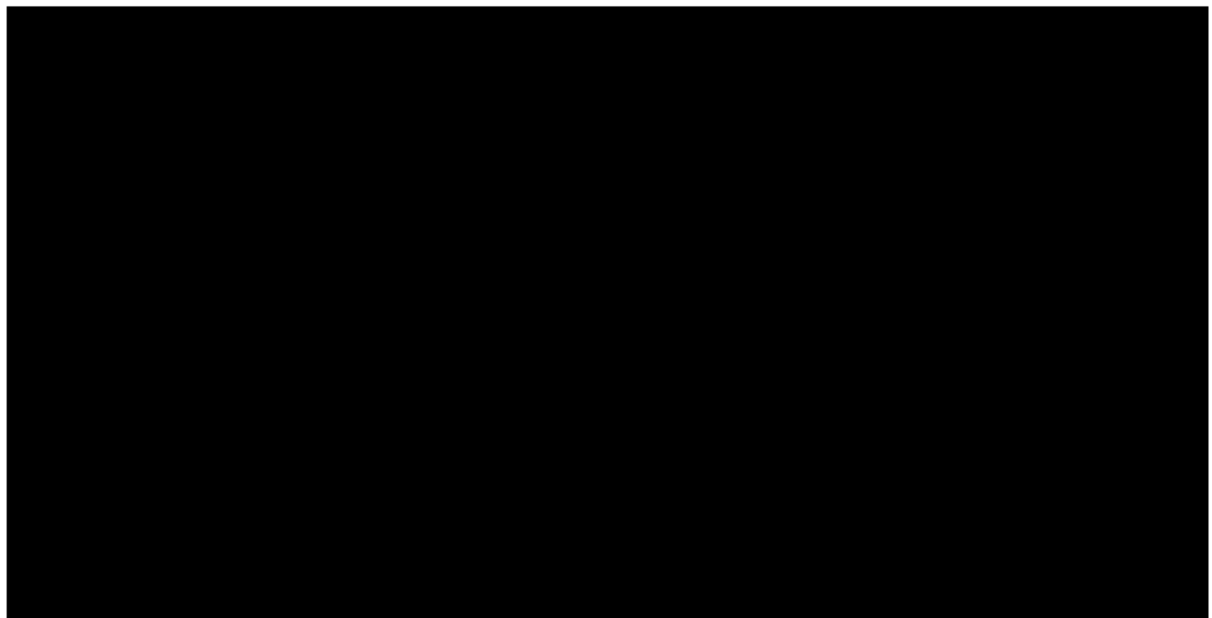
Number	Type
2	System offset between IT & RT
3	Miscellaneous payment
4	Payment with return
5	ES payment
6	505 payment
7	Bill payment (BTR-85)
8	TPN payment (BTR-76)
9	Audit payment
17	ES credit forward payment
24	Chicago audit payment/ ATAT audit payment
25	Springfield audit payment

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Compare the GenTax information with the Legacy PDF Display data

a) GenTax

The transactions screen from GenTax is being used in this dollar comparison. The three marked Cnv Credits will be compared to the information available through Legacy PDF Display.



b) Legacy PDF Display

Payment information in Legacy PDF Display provides not only the payment amount(s) but also the Batch Doc Number, Payment Received Date, and Post Date. Payments will indicate the IT payment amount, RT payment amount and the total payment amount. When comparing payment amounts, the total payment amount in Legacy PDF Display should be matched to the amount as indicated on the GenTax screen. In this case, the Cnv Credit amounts are $786,000, $785,000 and $785,500 as presented below.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

BIT Payment - Seq 1

IT Batch Document Number	2004-289-351-01-079
IT Payment Status	ALLOWED AND APPLIED
IT Payment Received Date	10/15/2004
IT Payment Amount	$516,821.92
RT Batch Document Number	2004-289-351-01-079
RT Payment Status	ALLOWED AND APPLIED
RT Payment Received Date	10/15/2004
RT Payment Amount	$269,178.08

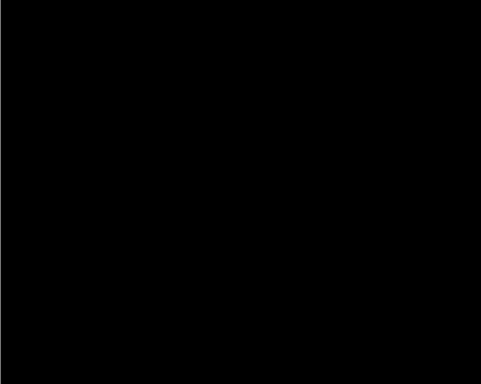
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

D. EXHIBIT D - HOW TO DETERMINE COLUMN A FIGURES

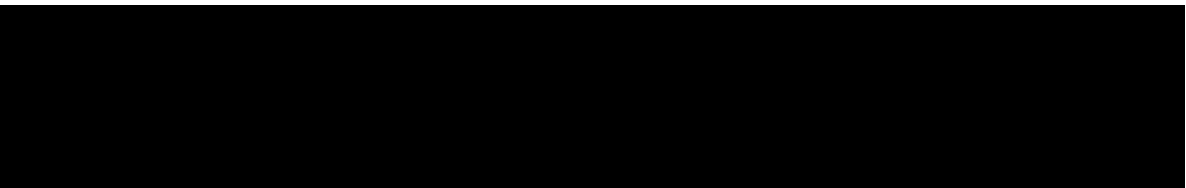
Correctly Identifying Column A Figures in GenTax

Financial information required for Column A (As Filed on the EDA-25) can be accessed through the Account View or the Audit View. The methods identified for obtaining the needed information take into account all users. This includes auditors who are assigned audits, auditors who are not assigned audits, management, legal services and others who may need to inquire on this type of information.

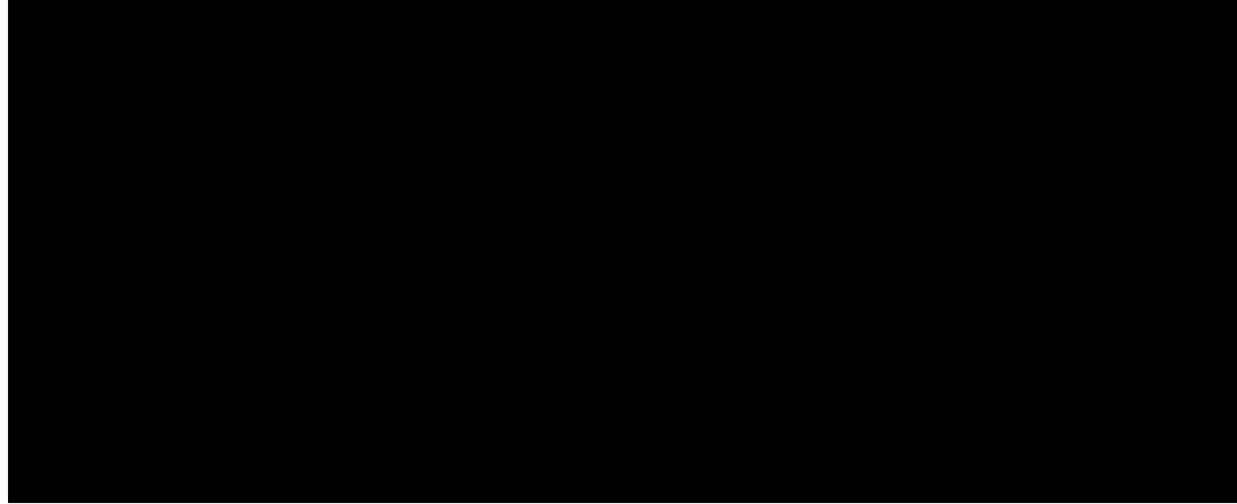
Taxpayer records can be located using the Search Manager found in the New Manager screen.



You can use the Search Manager to search for a customer using any information that has been recorded, such as name, address, identification number (FEIN or SSN) and more. Enter the search criteria in the green search line then hit Enter.



The Search Details screen opens. Click on the taxpayer's name.

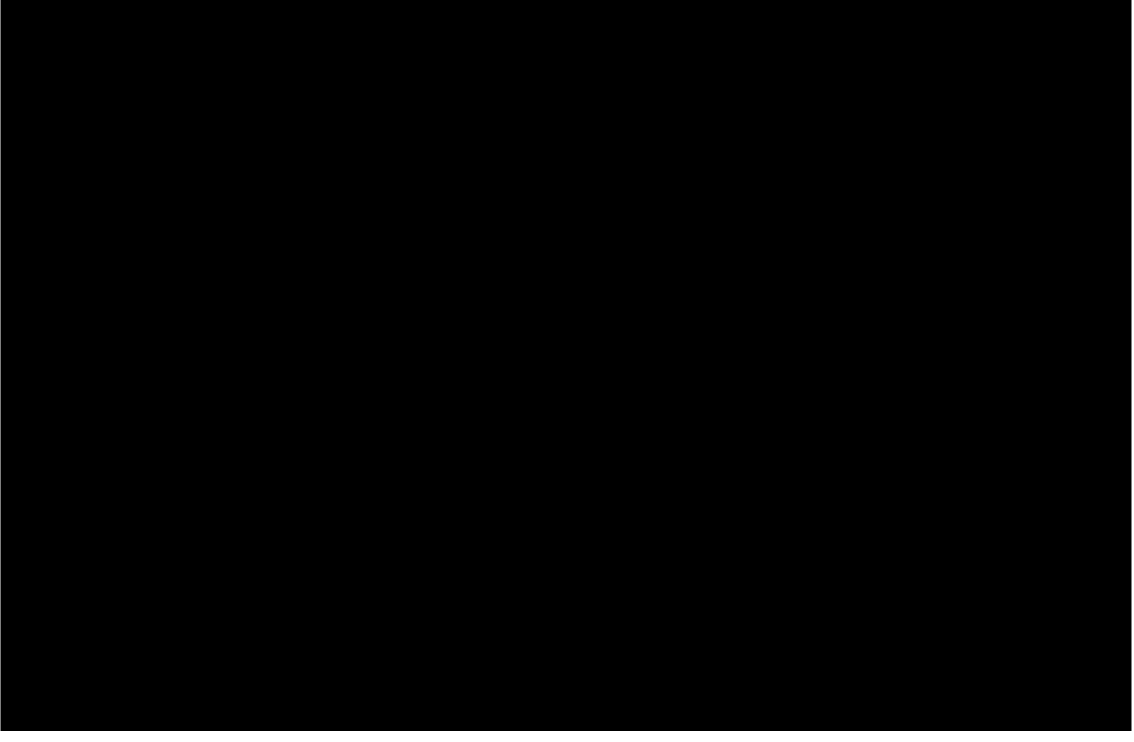


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Customer View opens providing information on the accounts set up for that particular taxpayer. To open the taxpayer's BIT account, click on the Account number hyperlink.

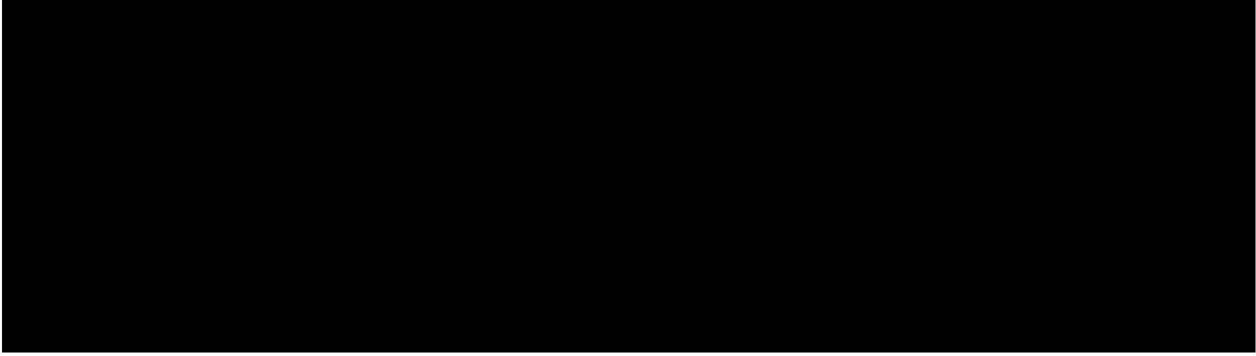
a) Account View

The Account View opens providing access to the financial information (returns, payments, etc.). The return information is accessed to determine Column A figures.

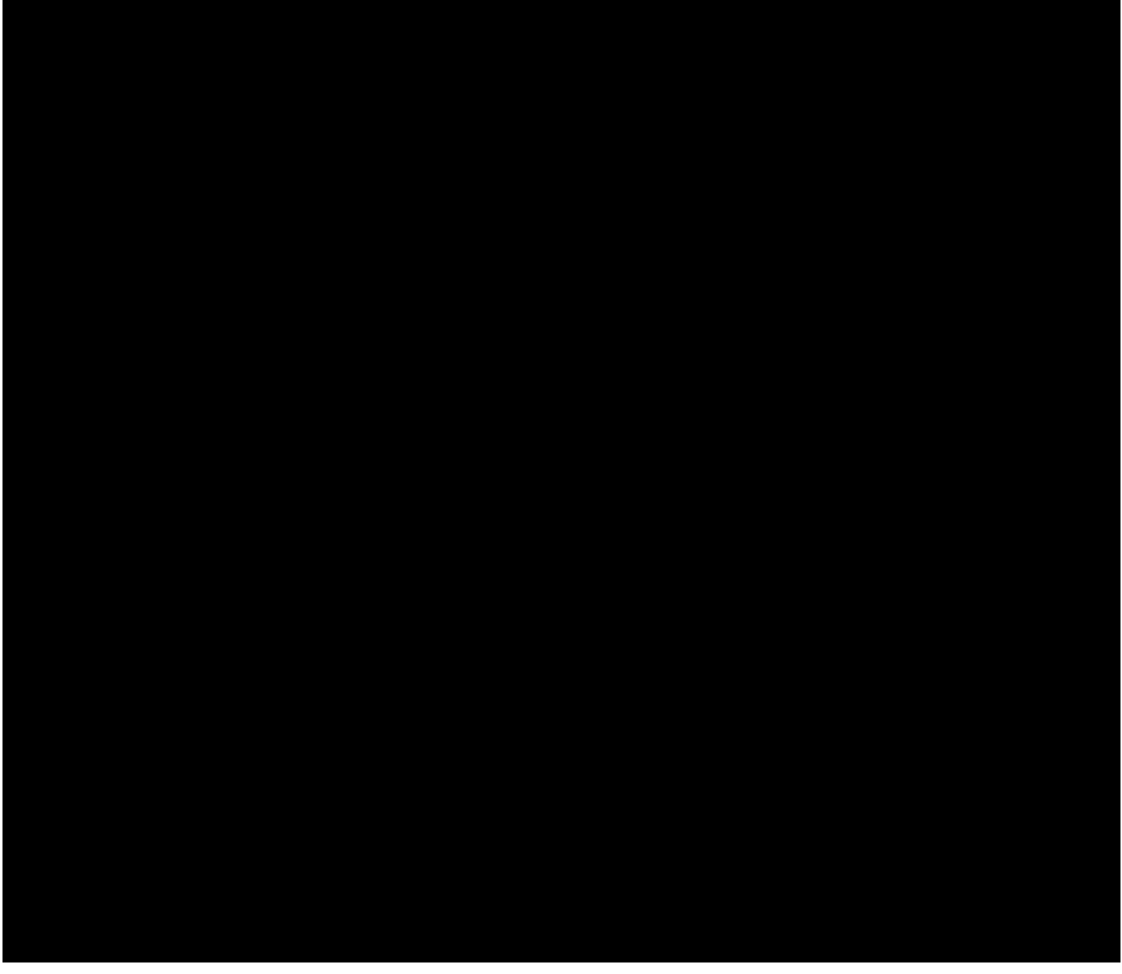


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Click on the Returns sub-tab under the Financial Tab, then click on the year specific return under *Doc Type*. The Return Detail screen will open.

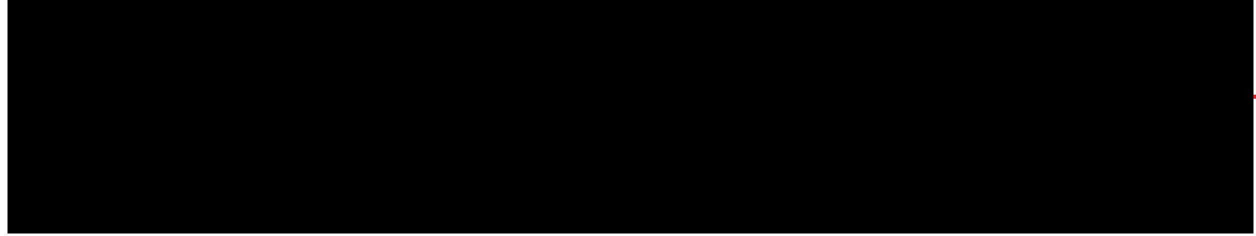


Below is the 2008 IL-1120 return for this taxpayer. These are the figures that will typically be used for Column A, As Filed, of the EDA-25. If this screen indicates that there are multiple versions of this return, the auditor needs to use the most current version of the return (i.e. the highest number – for example 8 of 8 below).



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

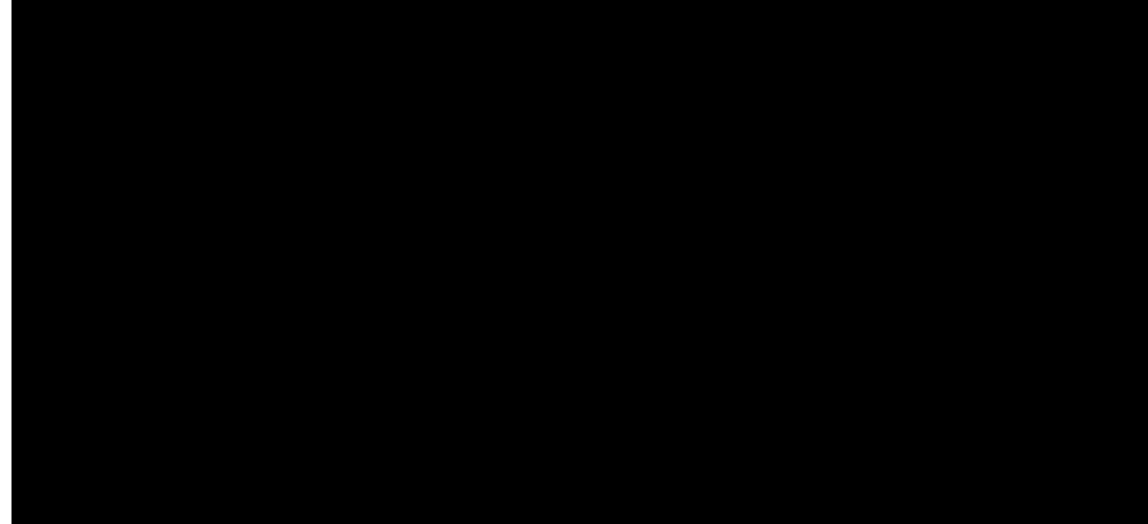
To view the side by side line changes for each version of the return, use the double arrow icon at the top of the screen.



Note: The auditor needs to be aware of the status of each filing period financial data. The financial data may be converted information from IRIS (now Legacy PDF Display) and there may be no additional adjustments in GenTax. The financial data may be converted information from IRIS with additional adjustments that were completed in GenTax. The financial data may only be GenTax with no converted data. If there is financial data that was converted to GenTax, the auditor will have to review Legacy PDF Display to correctly complete the EDA-25.

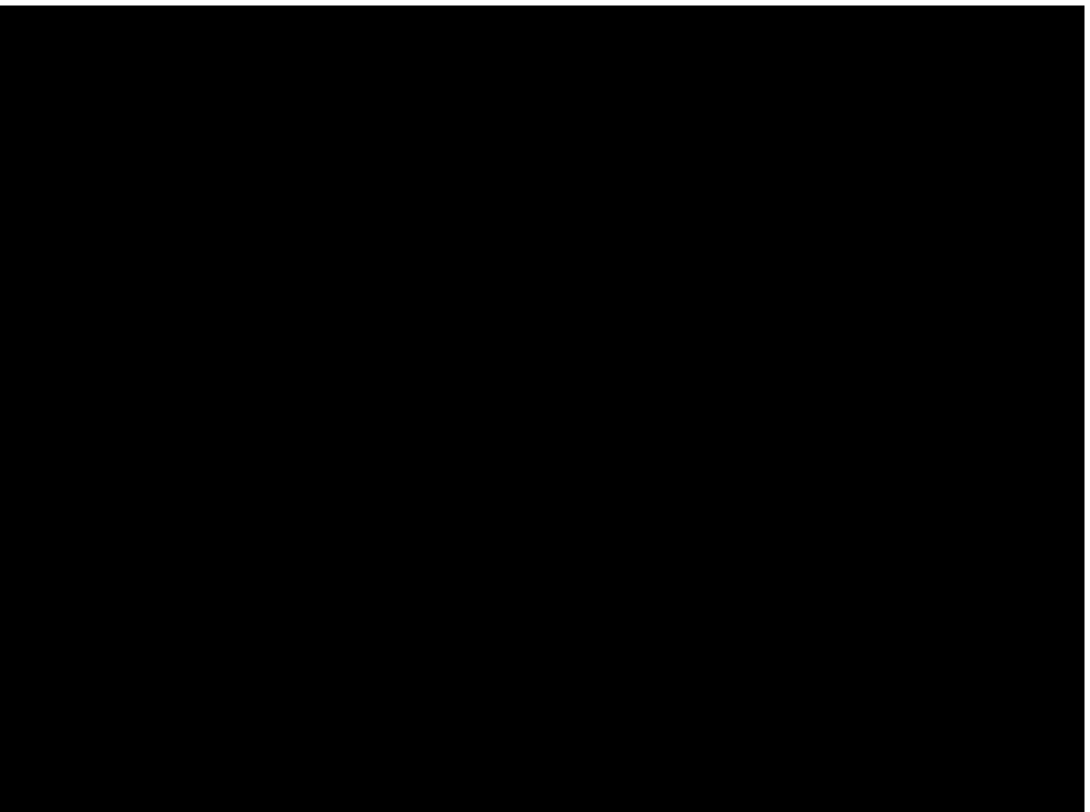
b) Audit View

Financial information can also be accessed through the Audit View. While in the Customer View, click on the Audit Tab to access the audits set up on the taxpayer, then click on the appropriate Audit track number to open the audit information details screen (Audit View).



This is the Audit View screen. Click on the appropriate return period.

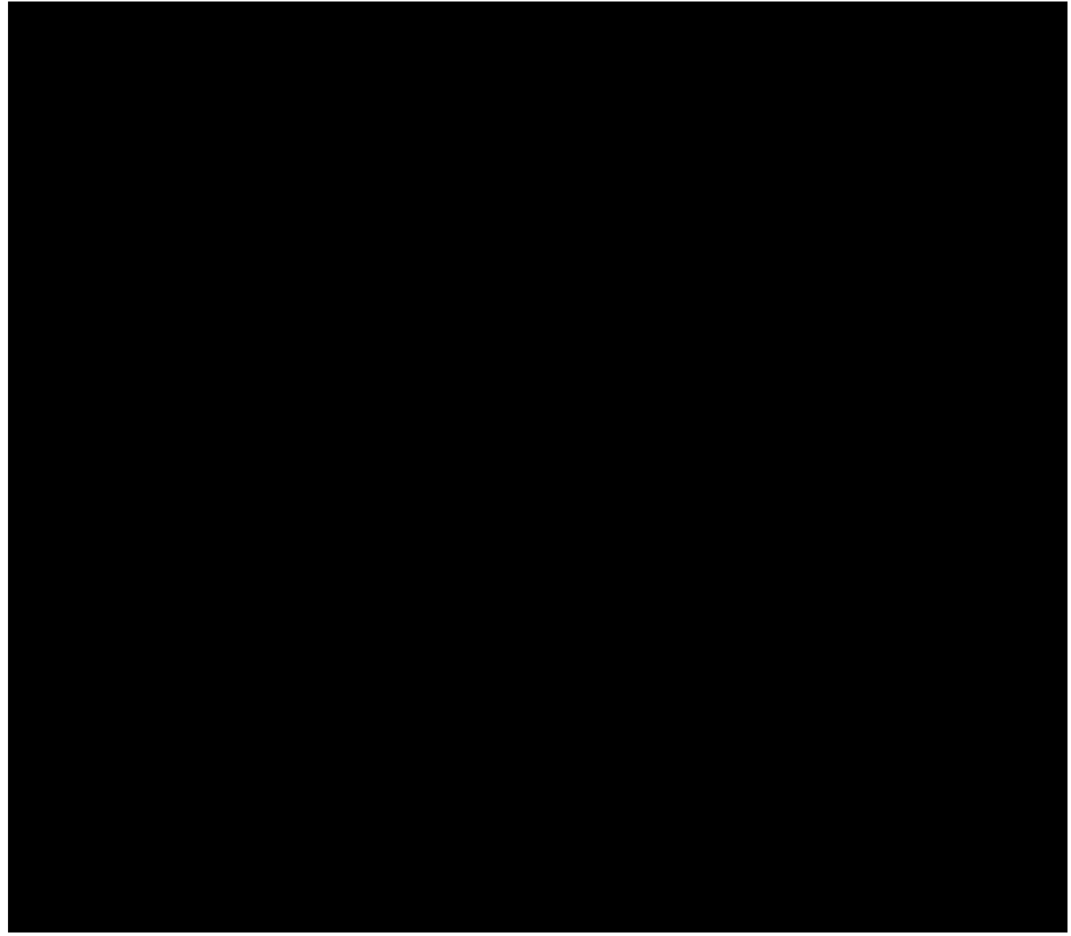
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



The Period View will open showing the Transactions. Click on the return blue hyperlink (in this case the IL-1120) which will open the return.

If this screen indicates that there are multiple versions of this return, the auditor needs to use the most current version of the return (i.e. the highest number – for example 8 of 8 below).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



c) Verification for EDA-25 Completion

The auditor needs to verify the following items prior to completing the EDA-25:

- Verify that the audit periods listed are correct.
- Verify that the filing periods included are correct for the audit period so that the auditor has the correct financials for the audit.
  - If the audit or filing periods listed are not correct it will be necessary for the auditor to contact the auditor's supervisor to make sure that the necessary corrections are made.
- Check the audit description, the CRM comments and the Electronic Documents to see Amended Returns that may be attached to the audit. If amended returns are referenced in the audit description or CRM comments, or they are attached in Electronic Documents, then these must be addressed in the audit.

Once the audit and filing periods are correct and amended returns have been taken into consideration, the EDA-25 can be prepared for that tax year.

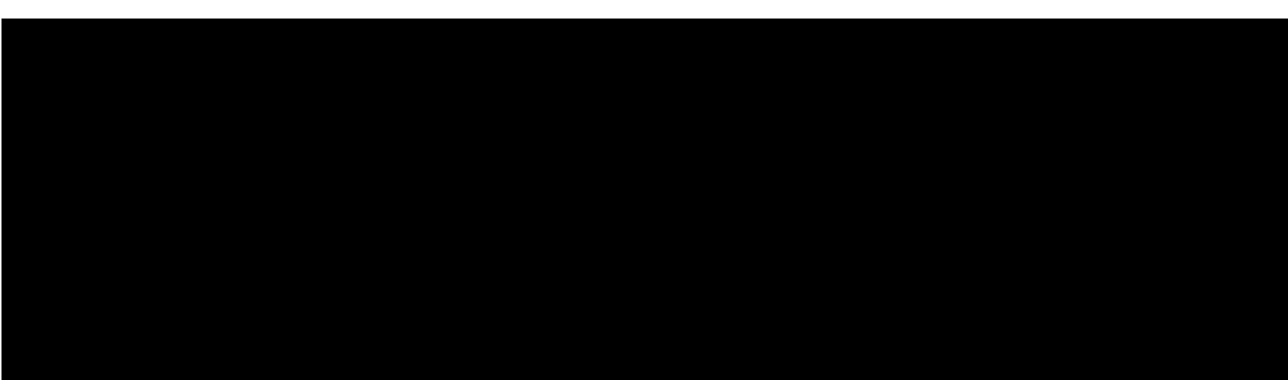
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

d) Identifying the Status of the Financial Data for Each Filing Period

(1) Financial Data that Has Converted Information from IRIS and Has No Additional Adjustments in Gentax

On the return detail screen shown below, the auditor will see cnvr1 and the date 04-Dec-2007.

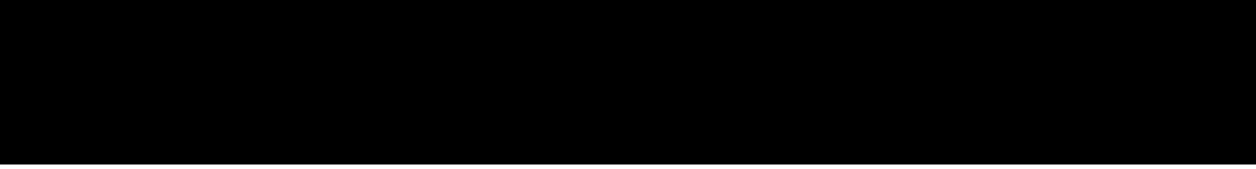
Under the Transactions Tab, all of the transactions will have a Posted date of 04-Dec-2007 and a Trans Type beginning with Cnv.



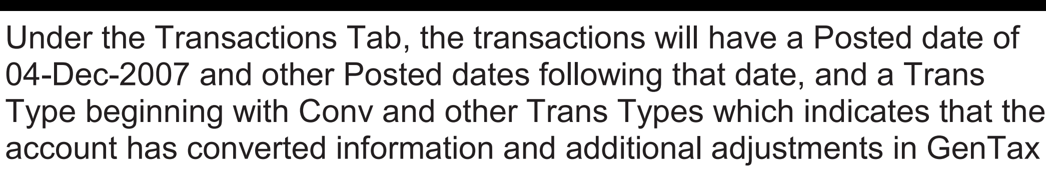
In the above scenario, to obtain the correct figures for the EDA-25, Column A As Filed, the auditor will have to reference information in BOTH Gentax and Legacy PDF Display.

(2) Financial Data That Has Converted Information From IRIS And Has Additional Adjustments In Gentax

On the return detail screen shown below, the auditor will see an adjuster name and the date of the final adjustment for the return.



On the return detail screen show below, the auditor will see that more than one return version (4 of 4) exists which indicates adjustments have been made to the return since it was put into GenTax.

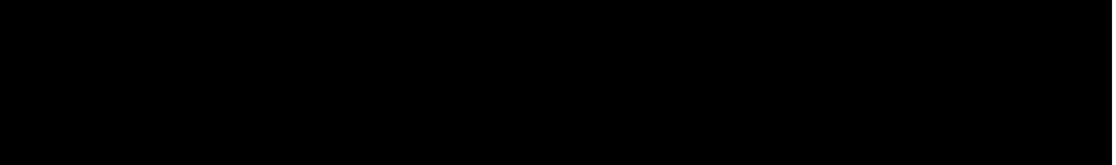


Under the Transactions Tab, the transactions will have a Posted date of 04-Dec-2007 and other Posted dates following that date, and a Trans Type beginning with Conv and other Trans Types which indicates that the account has converted information and additional adjustments in GenTax since the conversion.

In the above scenario, to obtain the correct figures for the EDA-25, Column A, As Filed, the auditor will have to reference information in BOTH GenTax and Legacy PDF Display.

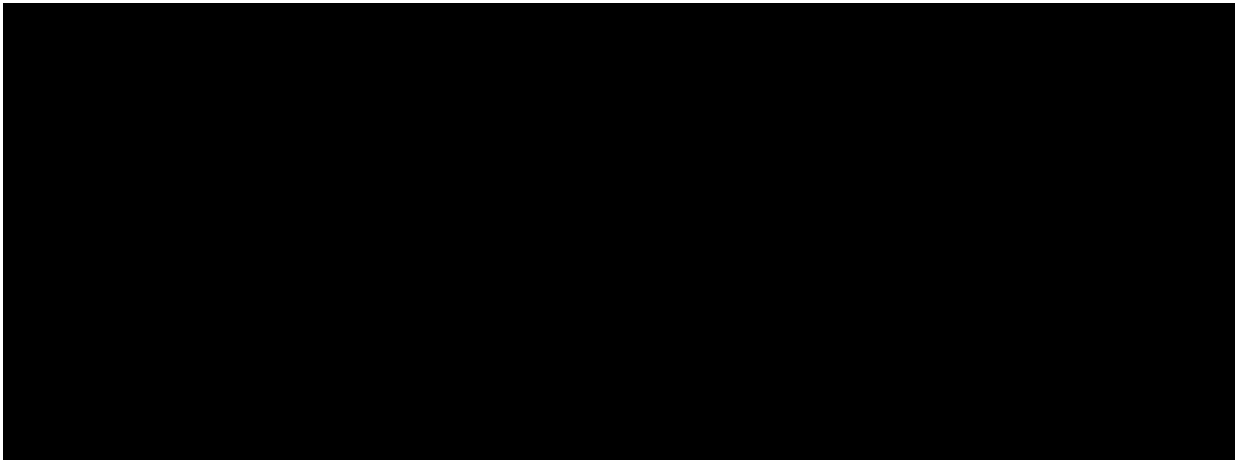
(3) Financial Data That Is Only In Gentax With No Converted Data From IRIS

On the return detail screen, the auditor will see one of the following:



Under the Transactions Tab, the transactions will have Posted dates after 04-Dec-2007 indicating that there was no data converted from IRIS.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



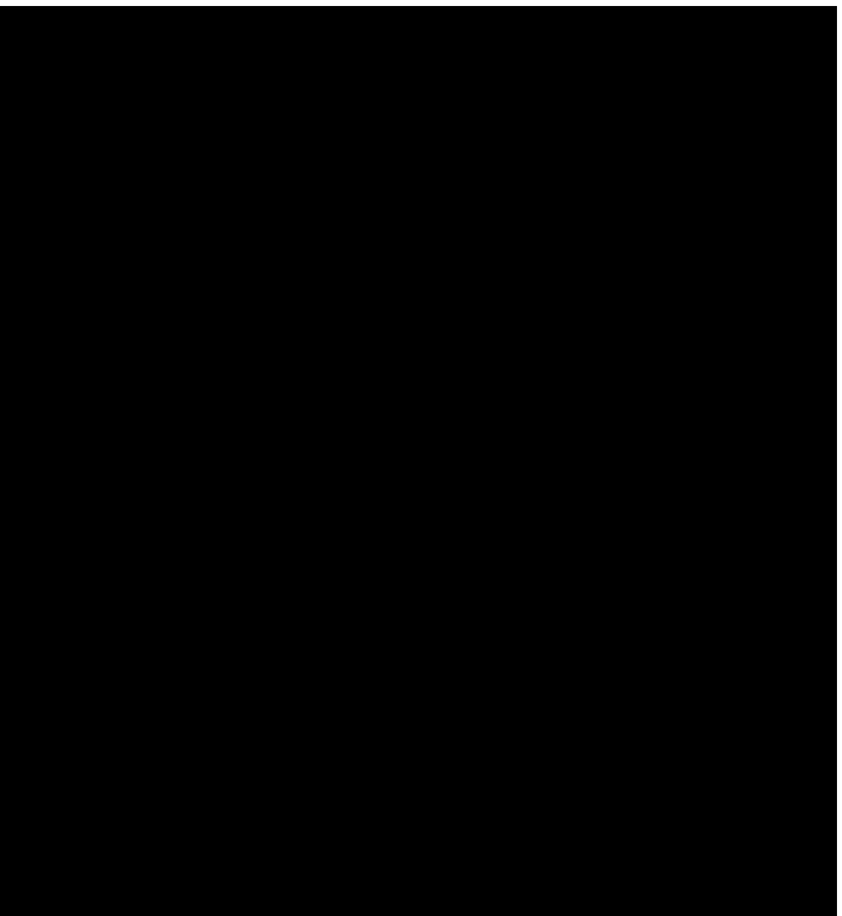
In the above scenario, to obtain the correct figures for the EDA-25, Column A, As Filed, the auditor will only have to reference information in GenTax.

(4) GenTax - Step 8 of the Tax Return (Lines 53-60 for an IL-1120)

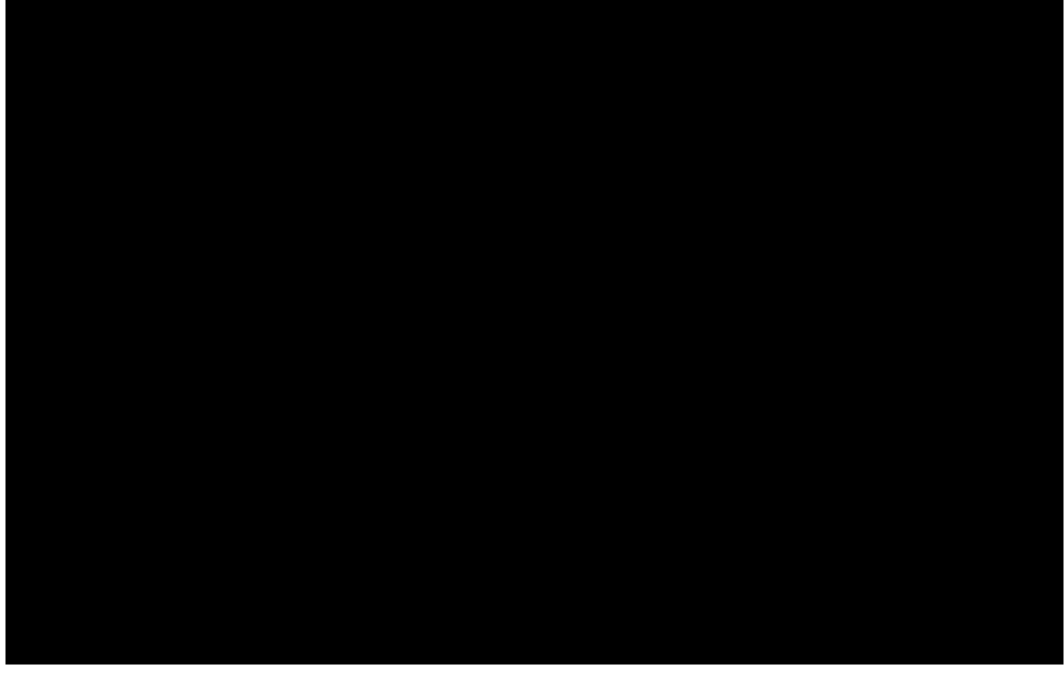
The EDA-25 needs to accurately reflect all of the payments, credit carryforwards and refunds for a particular tax year. The taxpayer has a right to see the application of all of these items for each tax year.

In the Step 8 screen print shown below, the IL-1120 Lines 53-60 of this portion of the tax return in GenTax are lines that come directly from the tax return prepared by the taxpayer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



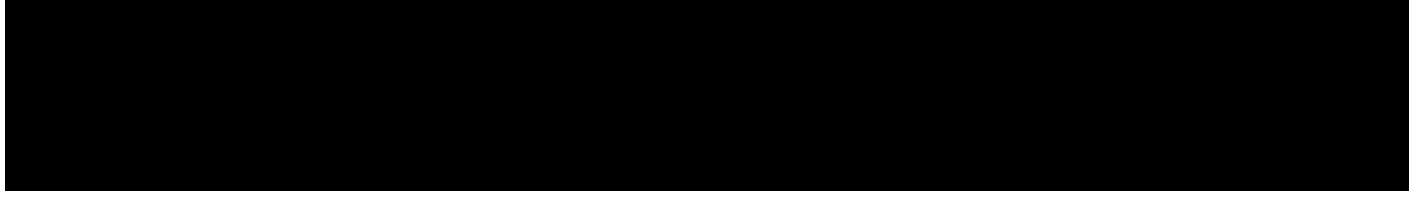
Note: It is important that the auditor uses the detail under the Transactions sub-tab (example below), and other detail in GenTax (and/or Legacy PDF Display) to complete the EDA-25, Column A, As Filed and not rely upon the detail as shown in Step 8.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

E. EXHIBIT E - HOW TO CREATE THE EDA-135

While in the Audit View of the audit needing the initiation letter sent, click on the CRM Tab, then the Letters sub-tab. To generate the letter, click on the “Add” tab.



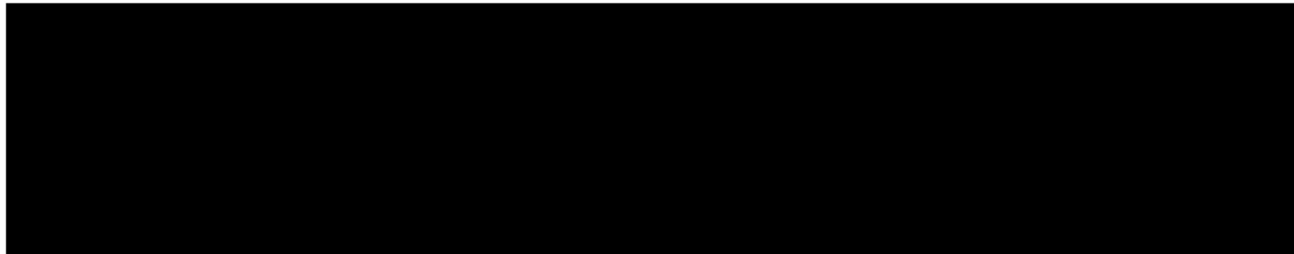
Double click EDA-135 Audit Initiation and complete the initiation letter.

The EDA-135 allows four options for situations in which this letter can be used and addressed.

1. Follow up to a phone call to the taxpayer advising they are under audit with a field appointment confirmation.
2. Follow up to a phone call to the taxpayer advising they are under audit with no appointment. (Typically for in-house staff but can be used by field auditors if no appointment time is set)
3. As a letter to the taxpayer without previous phone contact to advise them they are under audit.
4. As a letter to the taxpayer without a successful previous phone contact to advise them they are under audit with an appointment time.

Users will note that there are 3 check boxes initially available besides the initiation date:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.



The initiation date is required to be entered, which will be the current day's date.

"Phone Contact" is to be used if making phone contact with the taxpayer.

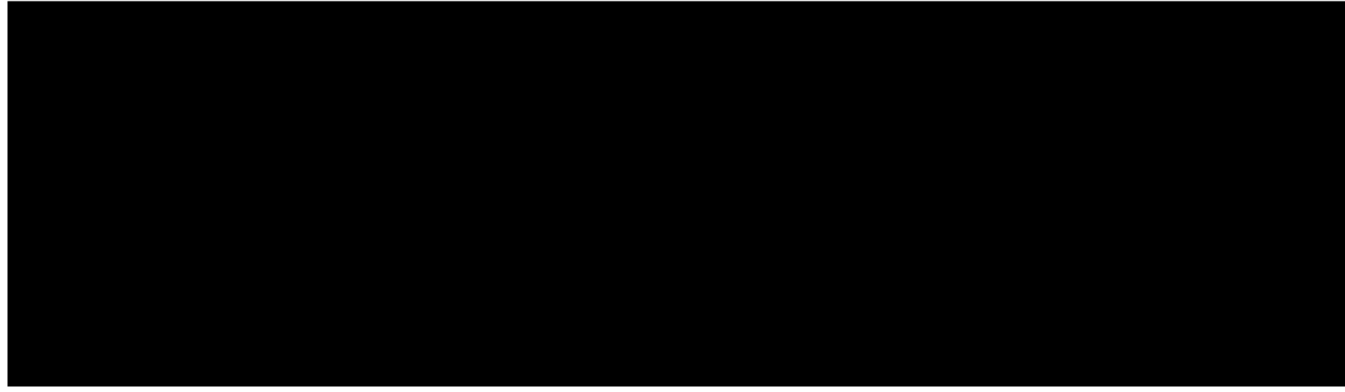
The "Serves to Notify You That Effective" option is used when just making contact with the taxpayer by letter with no previous or no successful previous phone contact has been made.

The "Field Appointment" box is used whenever a field appointment is being made and is available with initially chosen box.

Once one of the first two choices ("Phone Contact" or "Serves to Notify You") on the left are made, the in-house RAR/non-filer choices are made available to the user.

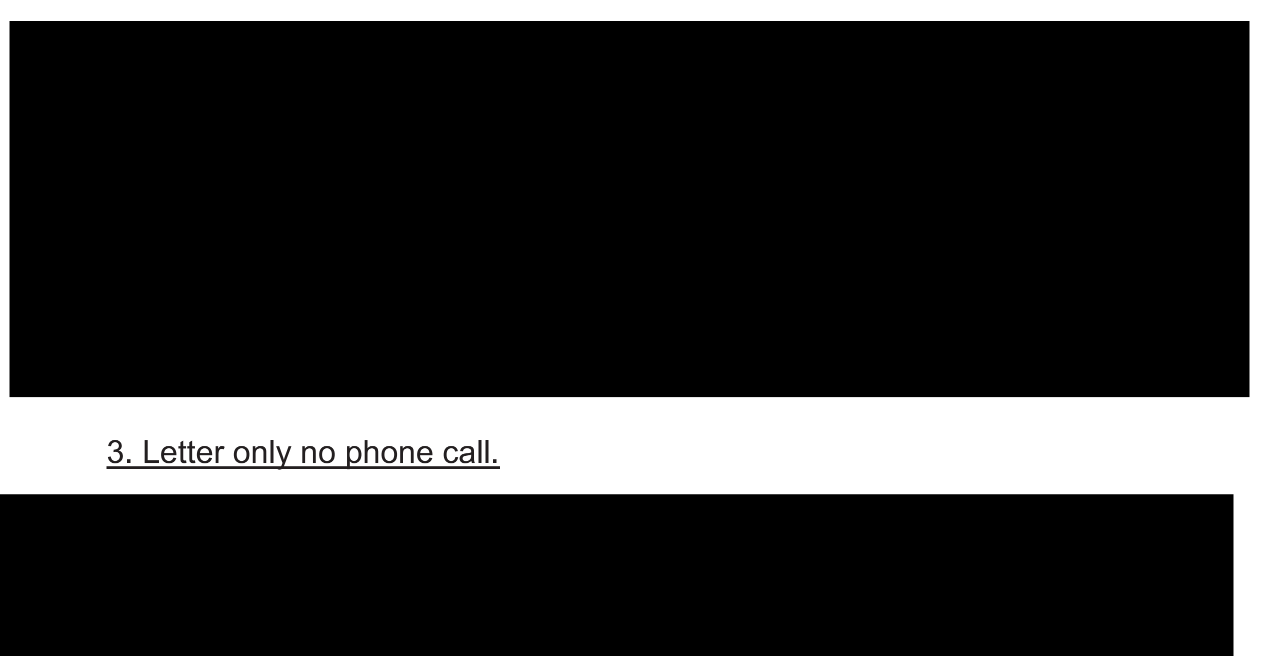
Examples of box choices:

1. Phone Call/ Set Field Appointment:



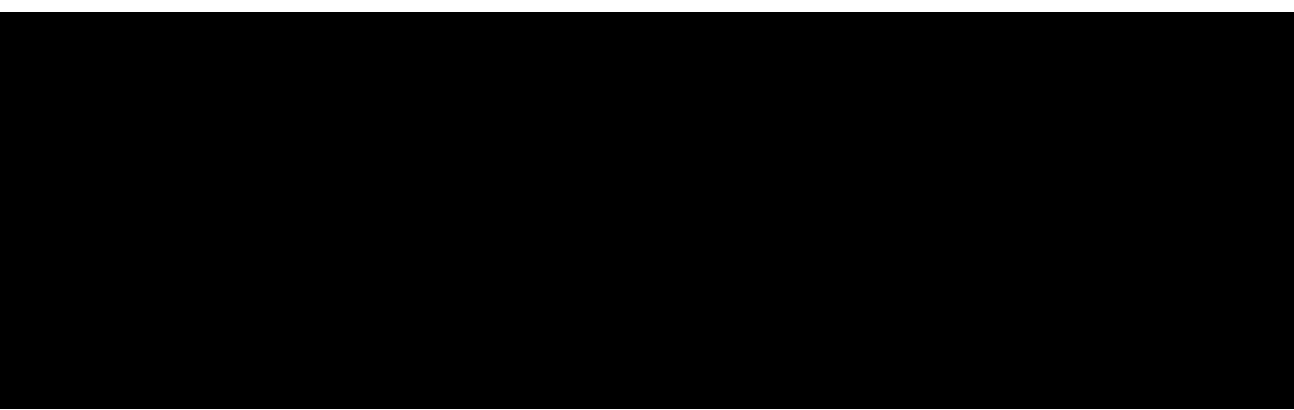
2. Phone Call only no appointment:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



3. Letter only no phone call.

4. Letter no phone call but with Field Appointment



The rest of the input screen as shown below contains a list of items that the auditor may potentially need for the audit. Boxes need to be checked for each item to be requested. A free-form area is included that allows the auditor to ask for items not listed.

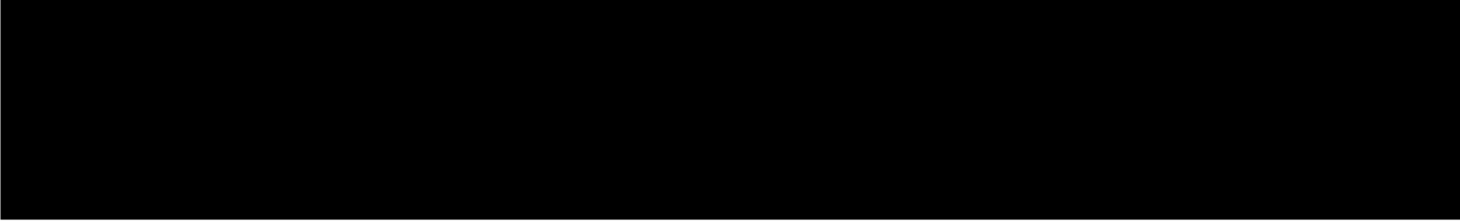
Note: It is recommended to only request those items which the Department does not already have access to. Do not check all of the boxes. Ask for only relevant items.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

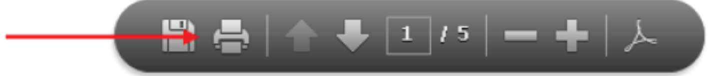
After all boxes have been checked for the requested documentation, it is recommended to click on the Preview Letter tab in order to review the initiation letter before saving and printing. The preview letter will have “Preview” superimposed over the letter text. Do not print or send this version to the taxpayer.

Once completed and reviewed for accuracy, close the preview letter. You will be returned to the letter completion screen. Click on “Save” in the lower right-hand corner. The letter must be saved before it can be printed.

The Audit View will reappear showing the Initiation Letter saved in the Audit Folder Letters, as shown below. The letter is now ready to be printed. Click on the “Audit Initiation” under *Letter Type* to open the letter.



After the letter is opened, move the cursor to the bottom part of the letter page till the function toolbar appears. Click on the “Printer” icon in the bar. The Print box will then come up allowing the letter to be printed.



Two copies of this initiation letter will need to be printed - one copy for the audit file and a copy that will be sent to the taxpayer.

REMEMBER: ONCE THE LETTER IS SAVED, IT IS ALWAYS IN GENTAX. If you save the letter and discover it is incorrect, you must invalidate the letter.

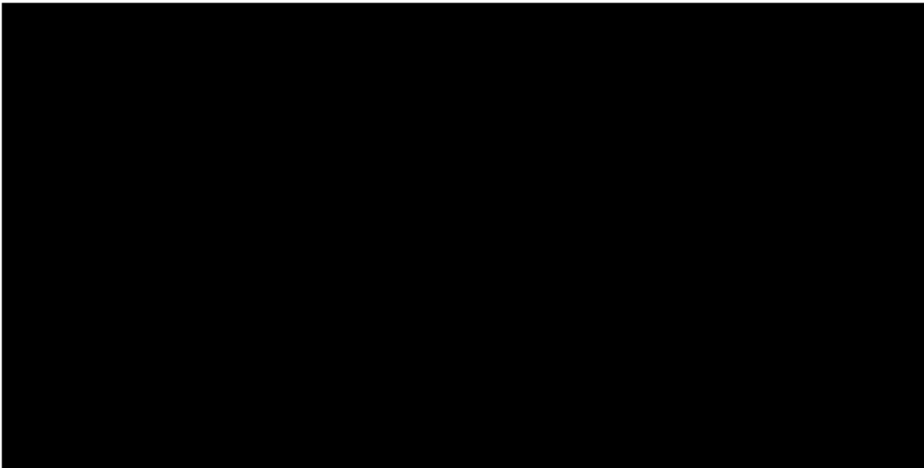
Invalidating a Letter

To invalidate a letter, open the initiation letter that was just created, by clicking on the letter ID hyperlink under “Letter ID”.

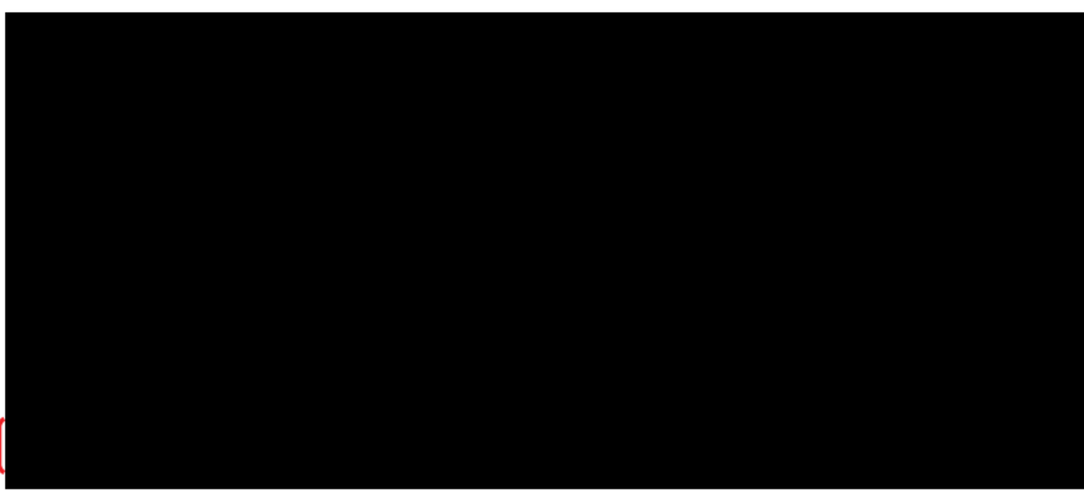
The Letter Detail screen will open in Mail. Click on the Invalidate Tab.

The Comment box will open for input of the reason as to why the letter is being invalidated. After a comment is added, click the “OK”.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.



The Letter Detail will now show that the letter is invalid, and a note will show the reason for the invalidation.



Note: Once a letter has been invalidated, it no longer appears under the Letters subtab as it goes into “History”. To view an invalidated letter, click on the Show History Tab. Invalidated letters will appear grayed-out.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

F. EXHIBIT F – HOW TO GENERATE AN UPDATED STATEMENT OF CUSTOMER

To generate a Statement of Customer in GenTax, the Customer View must be opened. This Customer View will show all tax types that the taxpayer is registered for with the Department.

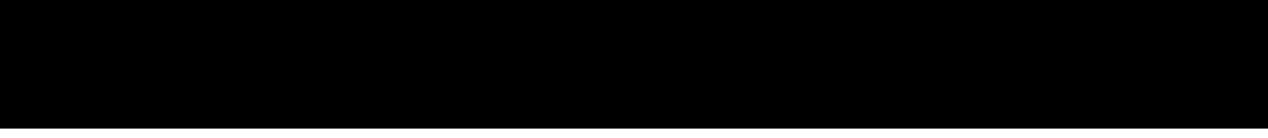
Updating Penalties & Interest for each account (and tax type) is necessary to determine an accurate balance due on any given taxpayer's account. Auditors are encouraged to update penalties & interest as a first step prior to issuing a customer statement or communication of a liability to the taxpayer to confirm that the information being provided to the taxpayer is the most current.

1. Step 1 - Updating Penalties & Interest

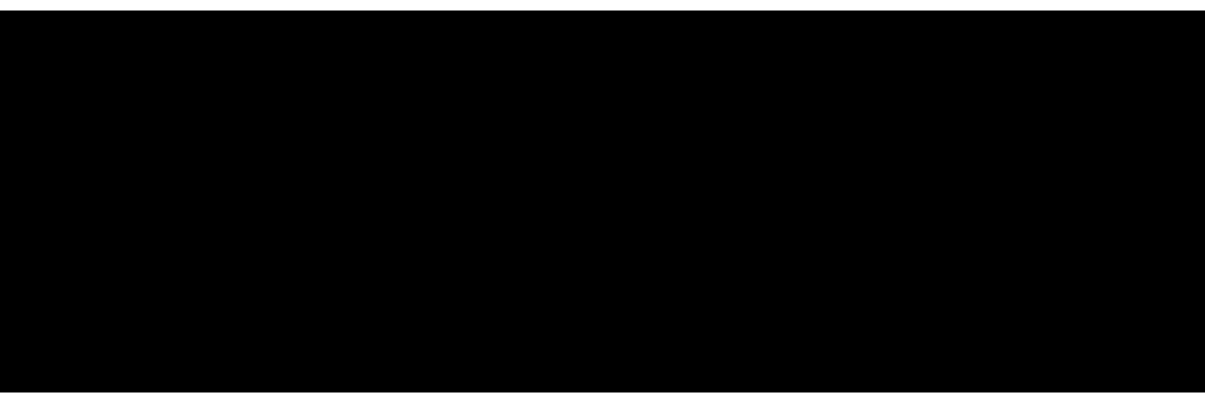
(for all accounts with a liability/credit balance).

- View and make note of the balance(s) due. The balance appears under the Periods sub-tab in the Financial Tab.

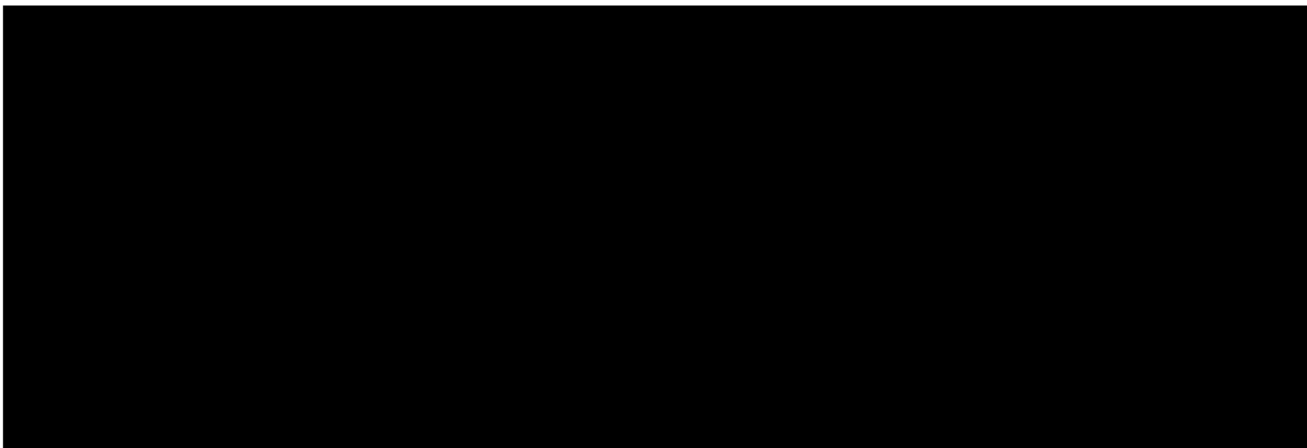
- Click the Update P&I action tab found at the top right of the screen. This action will instantly update the P&I and balances.



- The Update P&I box will open. Click on the Update Tab.



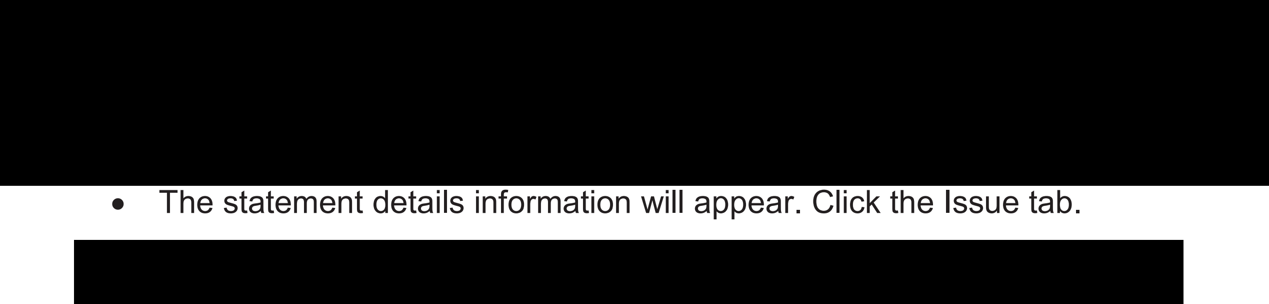
- The updated balance(s) will show in both the Financial Summary and the *After* line. The *Before* line shows the figures before the update.



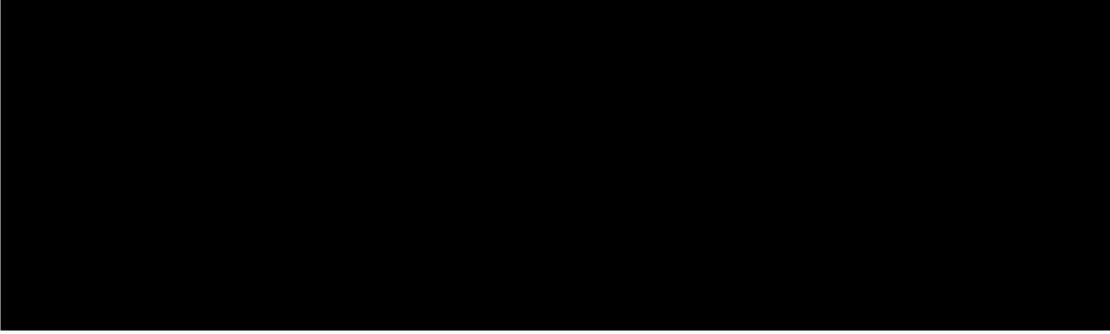
- Note that this process must be **repeated for each separate tax type**. Once all tax types have been updated, the Statement of Customer may be generated.

2. Step 2 - Generating the Statement of Customer

- While in the Customer View, click on the CRM Tab, then click on the Statements sub-tab. Click the View Statement on the right.

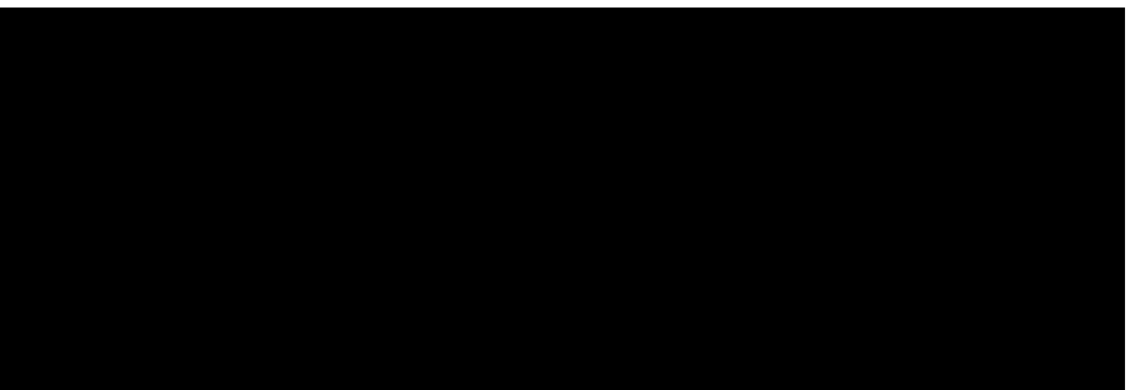


- The statement details information will appear. Click the Issue tab.

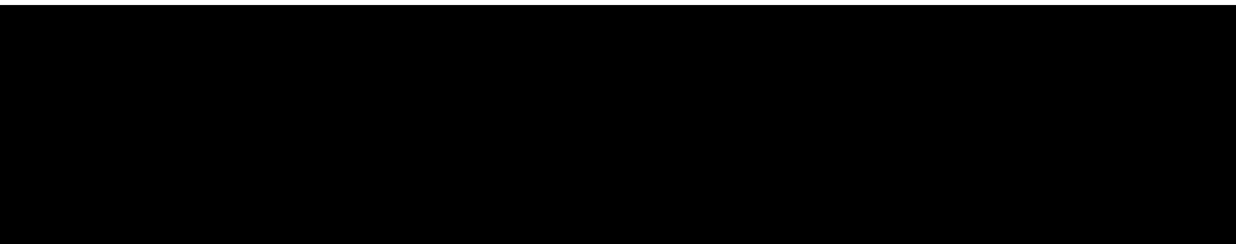


- The “Statement has been issued” box will appear. Click *OK*.

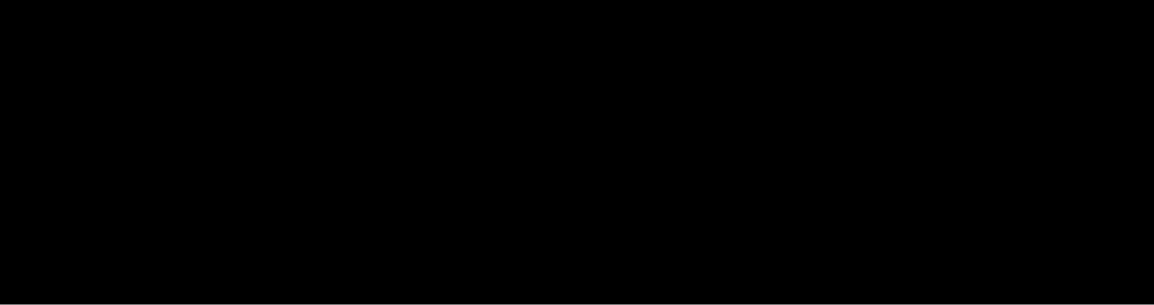
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.



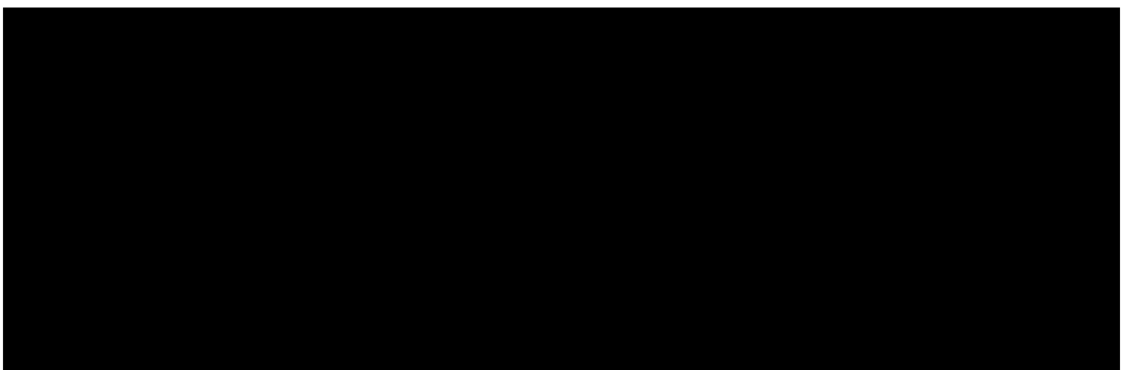
- Click on the Letters sub-tab. The Statement of Customer just generated should appear at the top of the letters listing. Click on the Letter ID number.



- The Mail Letter Detail screen opens. Click on the View Letter tab. The actual statement will open so that the information can be reviewed before printing. After confirming the information, close the statement.

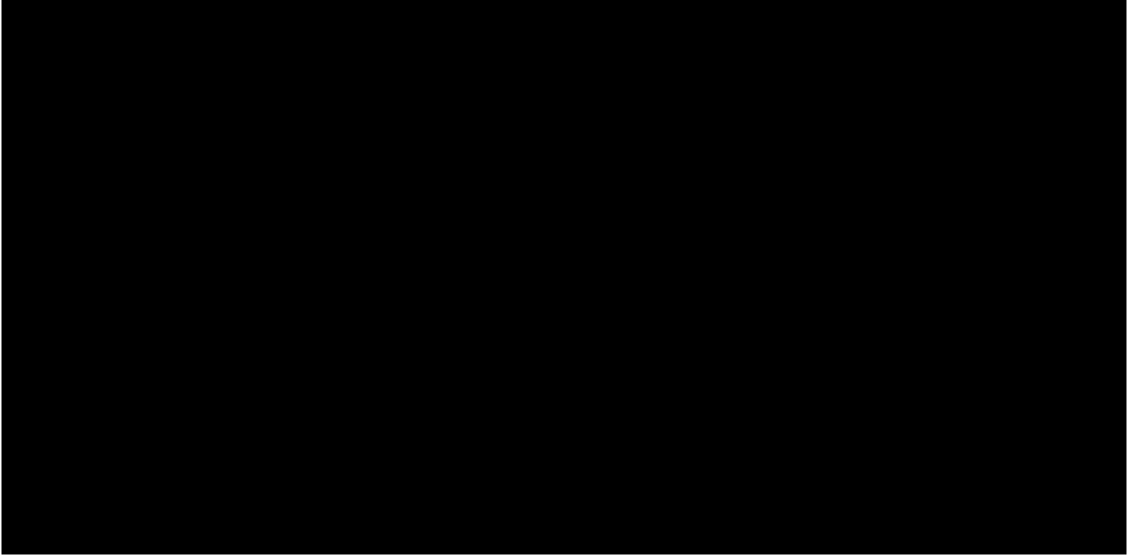


- Click on the Print tab.

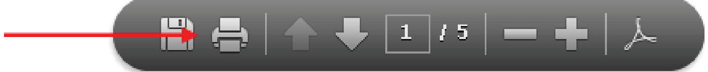


This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

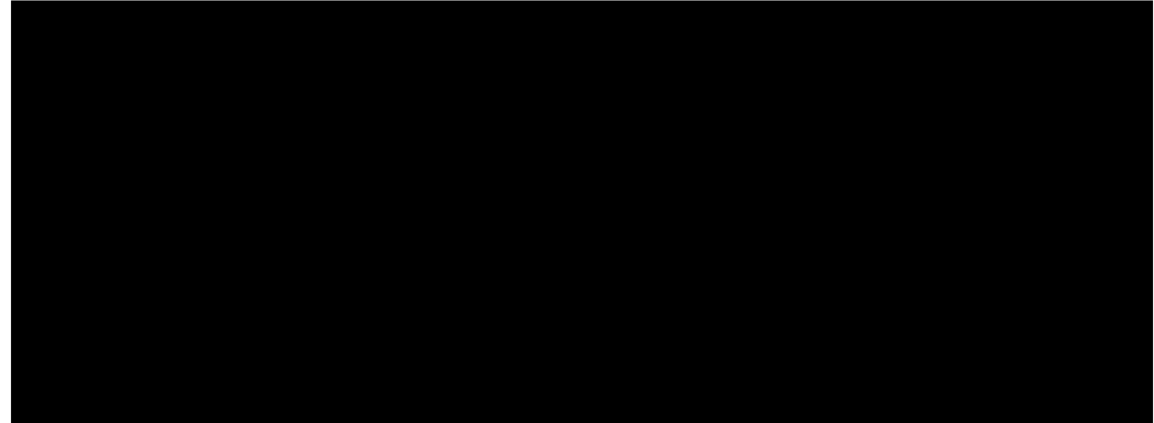
- The box opens asking if you want to print this item. Click Yes to print. The Adobe Reader screen should open showing the Statement of Customer.



- Move the cursor to the bottom part of the statement till the function toolbar appears. Click on the "Printer" icon in the bar. The Print box will then come up allowing the letter to be printed. Two copies should be printed, one for the taxpayer and one for the audit file.



- Once the statement has been printed, the Mail Letter Detail screen will change showing new tabs – *Reprint* and *Resend*. The screen shows that the statement was printed, and also provides the date and time that it was created and printed.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The following is an example of how the GenTax generated Statement of Customer should look. Statement portion will appear above the bottom voucher portion. Voucher portion must be remitted with the payment.

G. EXHIBIT G – EDA-154 AUDIT EMAIL AUTHORIZATION

Illinois Department of Revenue

EDA-154 Audit Email Authorization

As part of our auditing procedures, prior to sending confidential information through Internet email, we must obtain your authorization.

Step 1: Your information

Account ID: ______________________

Taxpayer name: ______________________

Step 2: Authorization and password set up

If you would like to receive audit reports or other files regarding your business through Internet email, please indicate your preference.

☐ I do not authorize delivery of reports or files through Internet email.

☐ I authorize delivery of reports or files through Internet email.

Email address: ______________________

For additional security, the files can be password protected. If you would like the files to be password protected, please indicate the password to be used. ______________________

Step 3: Authorized representative

Name: ______________________

Title: ______________________

Date: ______________________

Step 4: Return instructions

Please complete and return to your auditor. We recommend that you email the completed form as an attachment to your auditor. If it is returned electronically, type in the required information.

Disclosure of this information is voluntary.

EDA-154 (N-06/12)

H. EXHIBIT H – HOW TO ENTER POA INFORMATION IN GENTAX

This information was removed with the implementation of new Department POA procedure starting January 1, 2018. See AMU IT18-02 – to be incorporated into Audit Manual Chapter 2.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. EXHIBIT I – HOW TO SCAN AND ATTACH A DOCUMENT TO AN AUDIT IN GENTAX

1. Scanning a Document

Using an applicable copier, the document should be scanned to yourself via e-mail. The scanned document should be opened from your e-mail and saved, using the “save a copy” option, to your “H drive”. For locations without scanners, please forward a copy to Audit Planning to have scanned as an attachment onto the audit.

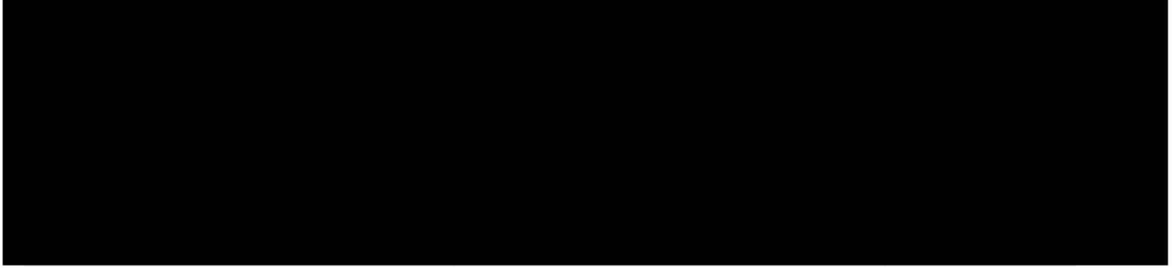
The following format should be used when naming the document to save:
Taxpayer name, taxpayer ID, tax year, form number
(I.e. John Doe, 123-45-6789, 2005, IL-1040X)

Once the return has been saved to the “H drive”, it will need to be attached to the GenTax audit. Note: Once the return has been successfully attached to the audit in GenTax, the e-mail containing the scanned return and the file on the “H” drive where the return was saved should be deleted.

2. Attaching a Document in GenTax

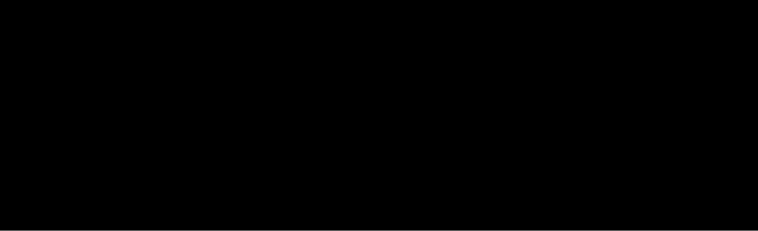
Step 1: Go into the Audit View

Step 2: Click on the CRM Tab, then on the Electronic Documents sub-tab. Click on the Add next to the “Auditor Attachment” in the “Section O: Planning” section.



Step 3: The Attachment entry screen will open. Fill in the applicable information:
Type: Auditor Attachment
File Name: Using the “browse” option, find the saved scanned document
Short Desc: enter the tax year and description (i.e. 2004 original 1040)

When the Browse button above is clicked, the box below appears allowing for either a file name (if know) to be entered or for Browsing for the correct document.



After the correct file has been entered or selected, click on the Save.

The file name will now be populated. Add a description in the Short Description box. Save the attachment by clicking the Save tab.

Version 10 – the saved attachment will show under the Electronic Documents sub-tab.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

J. EXHIBIT J – FORM 8796-A, REQUEST FOR RETURN/INFORMATION

Request for Return / Information

Instructions for Form 8796-A, Request for Returns/Information under Federal/State Exchange Agreement

The form may be used by state and local tax agency personnel requesting return(s) or return information from IRS.

Complete Sections A, B and C. After signature approval, forward to the pre-printed address in Section A. State the agency's need and use for the requested data as specifically as possible in section B-3. A general statement that it is needed for tax administration is insufficient.

Note: Do not send expedite requests or other requests that require local handling to the address in Section A. Contact your local Disclosure Office. If the office agrees to expedite or otherwise handle your request locally, you will submit it directly to that office.

Form **8796-A** (5-2011) Catalog Number 58858D www.irs.gov Department of the Treasury-Internal Revenue Service

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

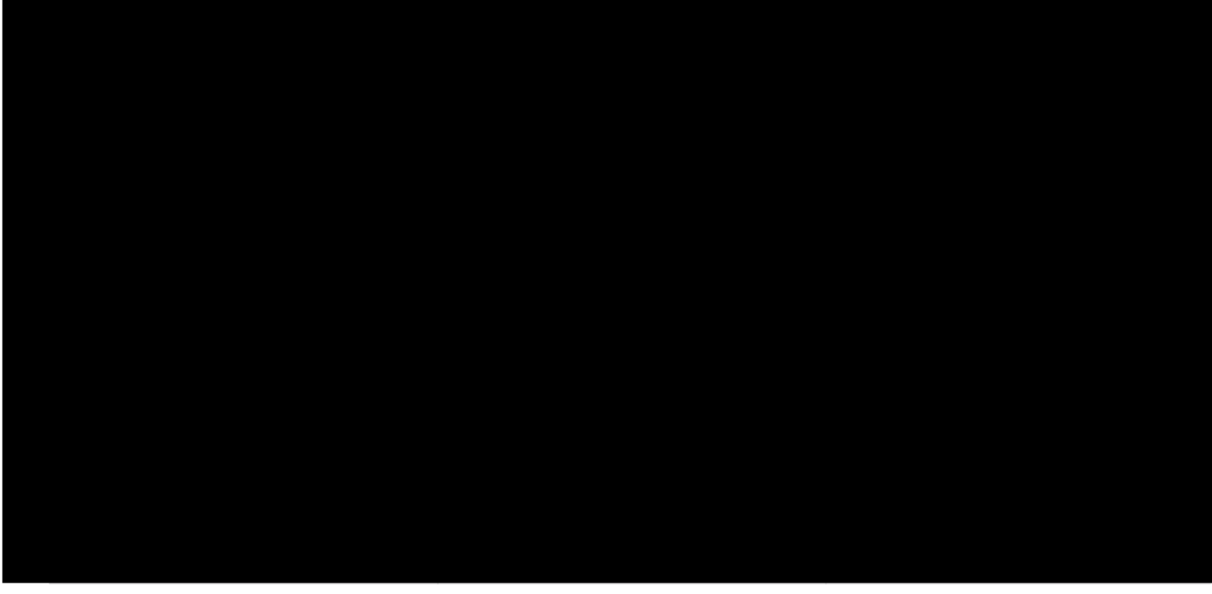
K. EXHIBIT K – HOW TO CREATE THE AUDIT COMPLETION LETTERS – EDA-143-XX

Since creating completion letters in GenTax is similar to creating initiation letters, please refer to the instructions in Exhibit E for any additional screen steps that may be useful when generating these letters.

The following exhibit information applies when creating the six completion letters. Each of these letters would be accessed through the "Add" tab (see below), completed, reviewed, and then saved.

In the Audit View, click on the CRM Tab, then click on the Letters sub-tab. Click on the Add tab.

Select the appropriate completion letter from the list by clicking on the letter type (in this case the EDA-143-CA). The EDA-143IAPT should only be used for audits completed in APT.



The EDA-143CA allows for an audit that contains both original and amended returns. Since this letter will summarize the results of multiple years in many instances, it is important to have the details about each year readily available when generating the letter.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

NOTE: It is important that this letter (EDA-143CA) NOT be issued until the audit findings are finalized. The issuance of this “results” letter or any of the other “results” letters set indicators and transactions which can impact the taxpayer’s account balances.

The Input Letter screen will appear which allows the auditor to input specific taxpayer information for the letter, and then preview that completed letter (click on the Preview Letter tab) for verification before saving the letter and then sending it to the taxpayer.

This is the screen (upper portion) that will be seen when the letter is opened. If the audit covers only one tax year, the “return” box should be selected (which is the default). If there are multiple years in the audit, then the “returns” box should be selected instead.

If the taxpayer has Illinois Net Loss Deduction (ILNLD) that they could have utilized but did not, then the ILNLD box should be selected.

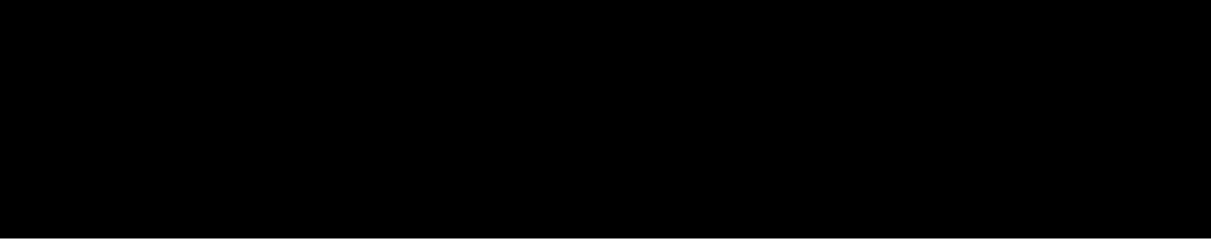
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Based on the result of the audit, the "deficiency" or "overpayment" sections will be completed for each tax year.

Deficiency –

For the first year with a deficiency, select the deficiency box. Once the "deficiency" box is selected for the first tax year, a second box "additional deficiency?" will appear.

Deficiency information may be input for up to four tax years. In the event that more than four years within the audit resulted in a deficiency, a second EDA143CA will need to be completed.



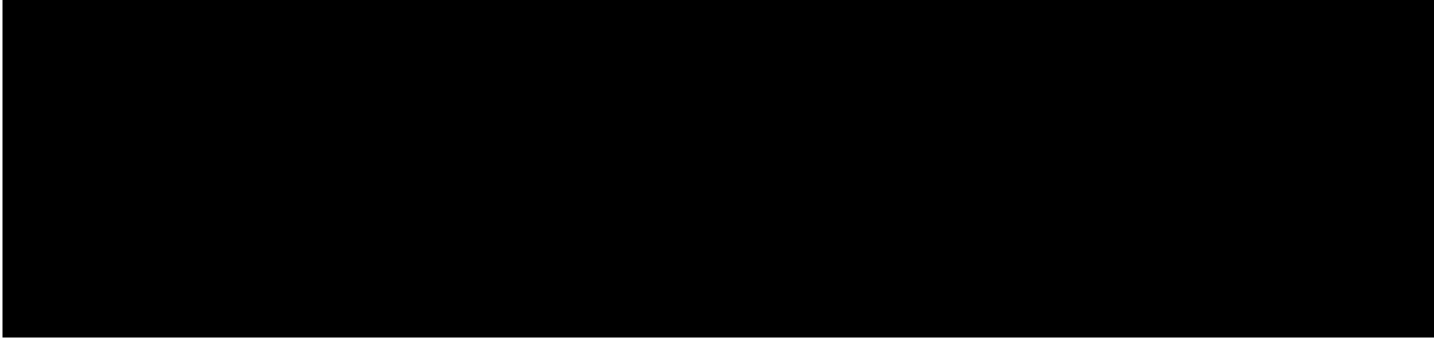
Select "original" or "amended" for each year with a deficiency and complete the remaining boxes.

Overpayment –

For the first year with an overpayment, select the "overpayment" box. Once the "overpayment" box is selected for the first tax year, a second box "additional

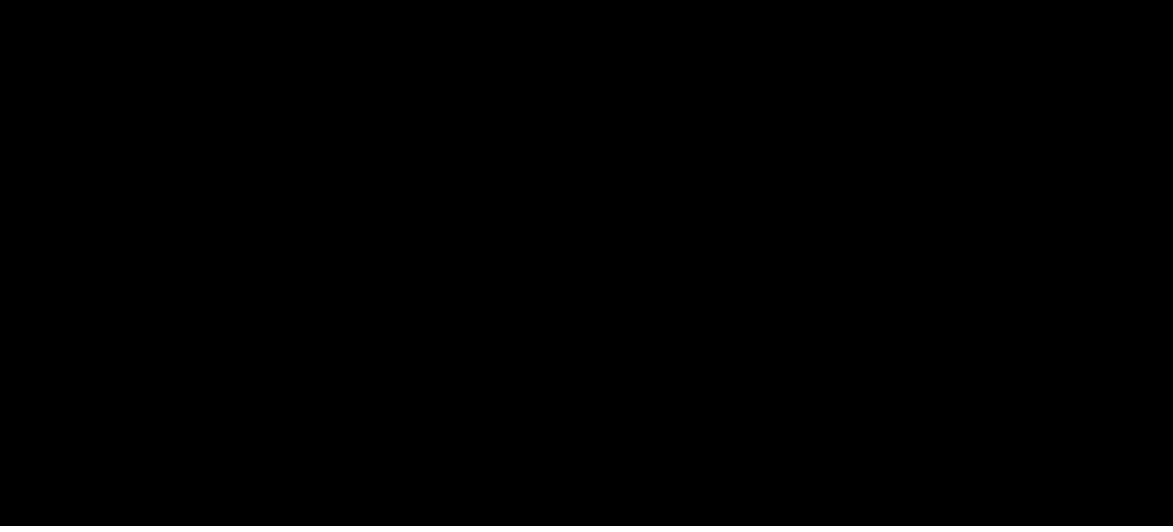
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

overpayment?" will appear. As with the deficiency information, overpayment information for four years can be completed.



Select "original" or "amended" for each year with an overpayment and complete the remaining boxes.

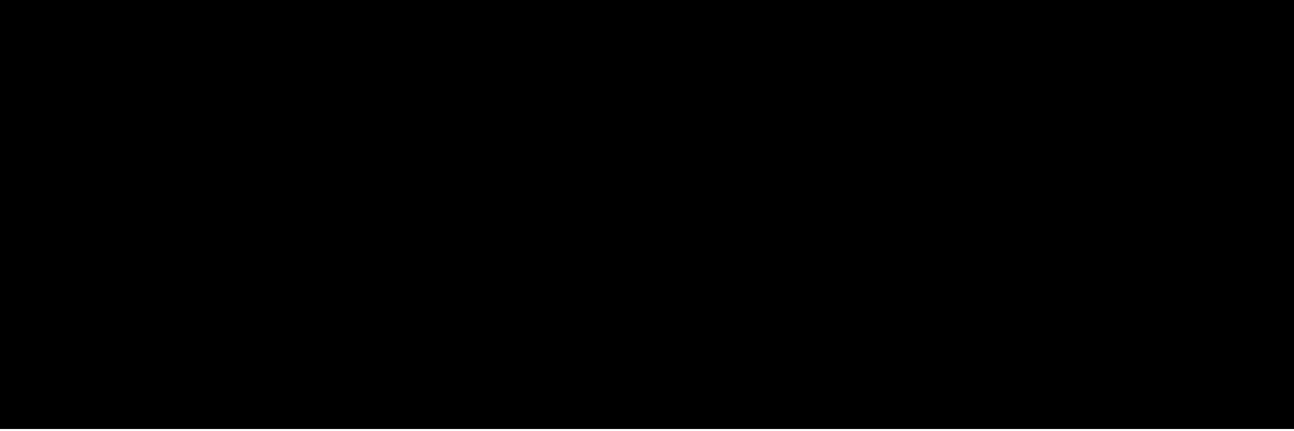
If one of the overpayments is out of statute, mark the checkbox "ONE overpayment". If more than one of the overpayments is out of statute, mark the "TWO OR MORE" box.



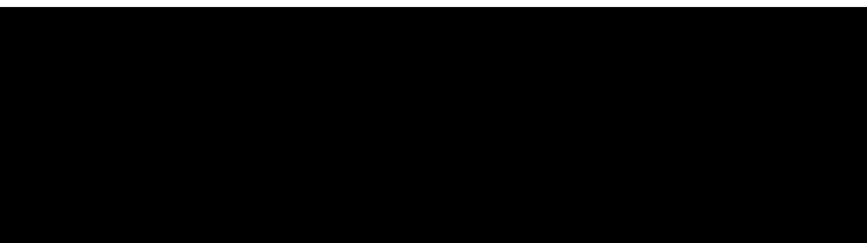
Completion Date –

The "completion date" is a required entry, which is entered in the lower portion of the Input Letter screen.

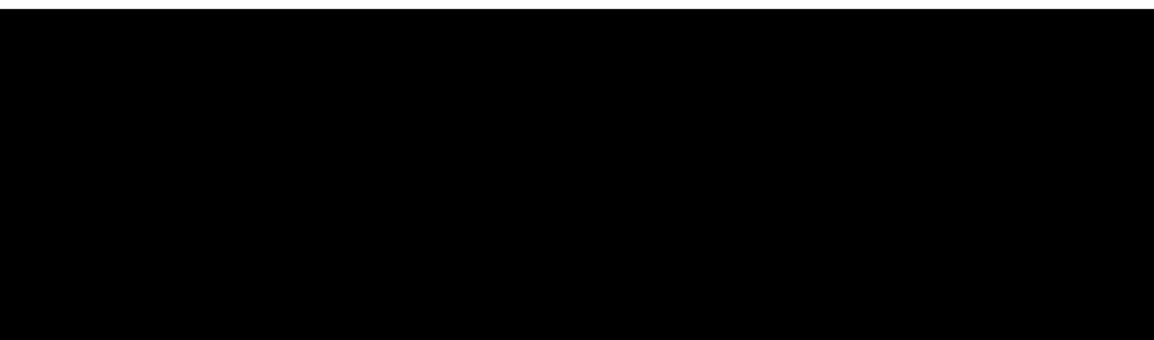
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



Enter the completion date



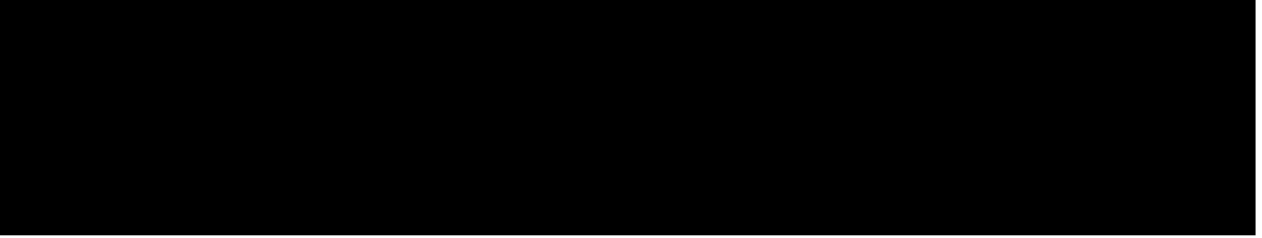
When completed, *preview* your letter to ensure that the information in the letter fully details the results of the returns filed in audit.



Once the letter is completed and reviewed, click on the "Save" button at the bottom of the Input Letter screen.

The Audit View will reappear showing the Results Letter saved in the Audit Folder Letters, as shown below. The letter is now ready to be printed. Click on the "Results-Return Approval" under *Letter Type* to open the letter.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

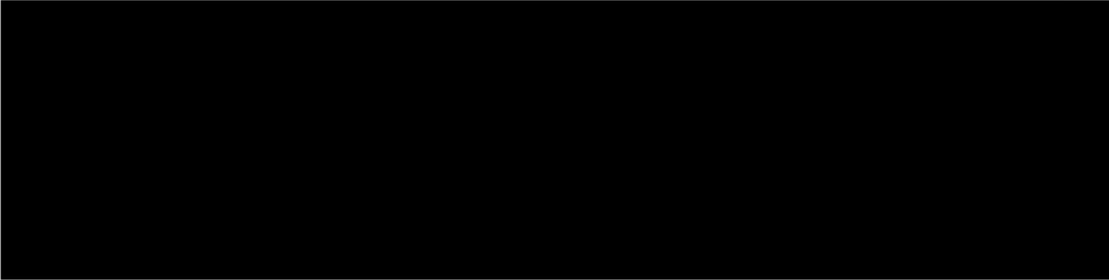


After the letter is opened, move the cursor to the bottom part of the letter page until the function toolbar appears. Click on the "Printer" icon in the bar. The Print box will then come up allowing the letter to be printed.

Previewing IIT letters –

NOTE: There continues to be an issue with previewing IIT letters if you have secondary info, whereby the primary taxpayer's name is dropped from the address.

To ensure that BOTH taxpayers' names appear on correspondence, use the "change address" hyperlink to manually add both taxpayers' name and address information.



Specific instructions for the EDA-143-LR

If an EDA-143-LR is being generated, there is a separate box marked "Pre2002" which the auditor will check if the audit period includes any tax year ending prior to December 31, 2002. If the box is checked, GenTax will insert the following line on the EDA-143-LR:

> "This letter constitutes proper notification of the proposed decrease as required by the Illinois Income Tax Act, § 905(n)."

This line is not needed if the audit period includes a tax year ending after December 31, 2002 because IITA § 905(n) has no application after that date.

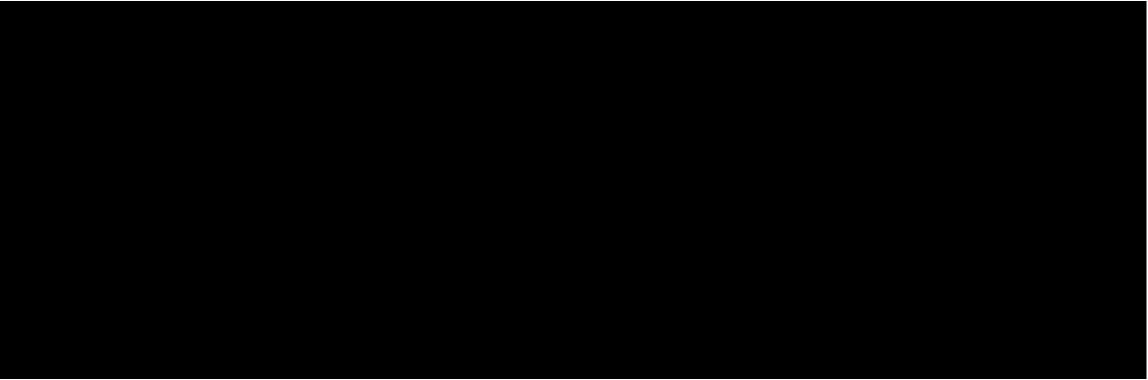
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Specific instructions for the EDA-143-NC

For clarity purposes some changes have been made to the EDA-143-NC letter. In the past the verbiage may have been misleading some taxpayers to believe that they may not owe money when in fact they did. Although the Department is accepting the return filed, the taxpayer is not recalling that they had a balance due which was not paid.

Because the audit was not establishing a liability or making changes to a return as filed during the audit, taxpayers have misinterpreted that as no money owed.

There are two options that can be chosen when using the EDA-143-NC – 1) No Liability or 2) No Change.



Either choice that is made will now contain the following verbiage:

> **Note: The review and acceptance of the submitted return may not change the existing account balance due, if applicable.**

1) No Liability letter presents the following language:

> This letter is to notify you that your audit for the tax type and audit period shown above has been tentatively completed, as of February 25, 2016. At this time, no liability has been assessed. All audits are subject to a quality review process. If no changes are made, you will receive a Notice of Audit Closure. You will be notified if additional information is needed.
>
> Note: The review and acceptance of the submitted return may not change the existing account balance due, if applicable.
>
> If you have any questions, contact us using the information listed below.

2) The "No Change" Option will show the following verbiage change to clarify the taxpayer may still have a balance due if the return was filed unpaid.

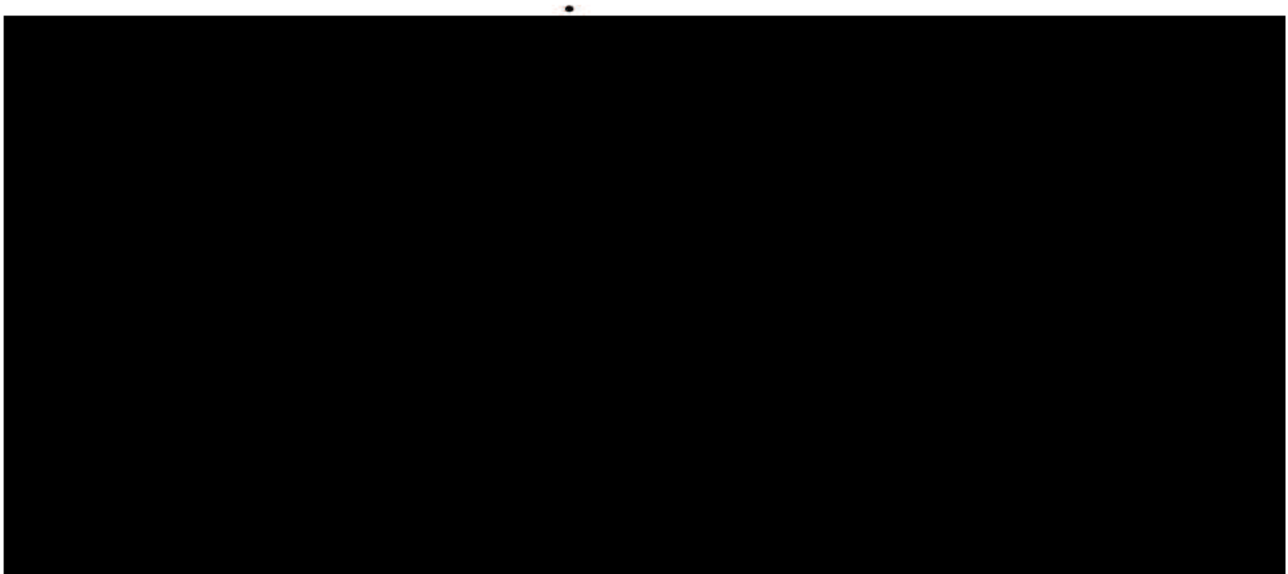
> This letter is to notify you that your audit for the tax type and audit period shown above has been tentatively completed, as of February 25, 2016. At this time, no changes have been made to your account. All audits are subject to a quality review process. If no changes are made, you will receive a Notice of Audit Closure. You will be notified if additional information is needed. If your return was filed showing a balance due and full payment has not been made, we will issue a bill, which will include any applicable penalty and interest.
>
> Note: The review and acceptance of the submitted return may not change the existing account balance due, if applicable.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Specific instructions for the EDA-143-I-APT

For audits completed in APT, this new letter is still generated in Gentax from the Audit Springboard and has the same functionality. It has been modified to conform to the new procedures that have been put in place with the APT program, specifically the changes related to when a taxpayer can sign auditor's reports with the Jurat language to agree to an audit at the ICB rights level.

In addition to signing the Auditor's report(s) if they are in agreement, taxpayers are provided with offset information within the body of the letter should they agree to the entire audit period. This new verbiage is necessary since the IL-870 is no longer issued for an APT audit and the audit is not summarized in that process. Since the verbiage is slightly different, the entry screen is slightly different than the regular EDA-143-I.



The letter allows up to a four-year scope. As the user completes each year's information, another blank year will appear so that information can be input. If the entire audit period is a liability, this information is still entered for summary purposes for the taxpayer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

L. EXHIBIT L – FORM EDA-8-A COLLECTION/LEGAL ACTION SUPPORT

Illinois Department of Revenue

EDA-8-A Collection/Legal Action Support Account ID: ____________

On all unagreed or agreed without payment audits this form must be completed to support subsequent collection and/or legal action on nonpublicly traded corporations, partnerships, and sole proprietors.

1 List the names, residential addresses, Social Security numbers, and years of responsibility of all owners and officers who were responsible for filing and paying the taxes. Do not list those who were officers of convenience or investors only.

Name	Address	SSN	Years of responsibility
		- -	
		- -	
		- -	
		- -	

2 List the names and addresses of all business bank accounts and bank accounts of responsible officers.

3 If the business is discontinued, identify the residential address of the owner or responsible corporate officer on the tax return to ensure that they are properly notified of the liability.

4 List all known business assets, including property located in Illinois. This is particularly important with respect to firms located out-of-state.

5 List employees who could testify as to who the responsible officers were.

6 Identify if any business receipts were deposited into an account other than that of the business.

EDA-8-A front (R-8/10)
IL-492-1979

7 Provide your recommendation as to who the responsible corporate officers are and on what information such recommendation was determined. **(Include any information in regard to responsible officer's ability to pay 100% Corporate Officer Penalty.)**

Name	Name
Basis for recommendation	Basis for recommendation

8 Attach copies of checks that paid the taxes and have been signed by the responsible officers and owners.

9 Attach copies of any corporate minutes available for the audit period.

10 Attach documentation that shows who authorized payments for items in lieu of taxes.

11 Additional information, if any.

I hereby recommend that after a determination has been made that if the corporation will not pay the liability established in the audit, we should issue an assessment for the 100% corporate officer penalty based upon the information contained herein.

N. EXHIBIT N – IDOR-8-J – NOTICE OF JEOPARDY ASSESSMENT

Notice of Jeopardy Assessment
for Form IL-1120-ST, Small Business Corporation Replacement Tax Return

January 24, 2014

Letter ID:

Account ID:
FEIN:
Reporting Period: December 2009

We have audited your Illinois Small Business Corporation Replacement Tax account for the reporting period listed above.

As a result we have assessed the amounts shown below.

Under 35 ILCS 5/1102 of the Illinois Income Tax Act the assessment of tax, penalty, and interest is **immediately payable** and **due** because the department has made a finding that our ability to collect taxes due from you may be jeopardized because you are about to depart from the state, or to conceal yourself or your property, or to do other acts that may prejudice or hinder any proceedings to collect such tax due from you. You must make **immediate** payment. See back page for payment information.

	Liability	Payments/Credit	Unpaid Balance
Additional Tax	25,795.00	0.00	25,795.00
Late-Payment Penalty	2,579.50	0.00	2,579.50
Late-Filing Penalty	250.00	0.00	250.00
Interest	2,548.44	0.00	2,548.44
Assessment Total	$31,172.94	$0.00	**$31,172.94**

If you do not pay the assessment or show us that the findings are in error **within five days** of this Notice of Jeopardy Assessment, the department may file a Jeopardy Assessment Lien and send you a notice explaining your rights to protest this lien. Provide a copy of this notice along with your payment or information to the department's auditor that your are working with or to the address below.

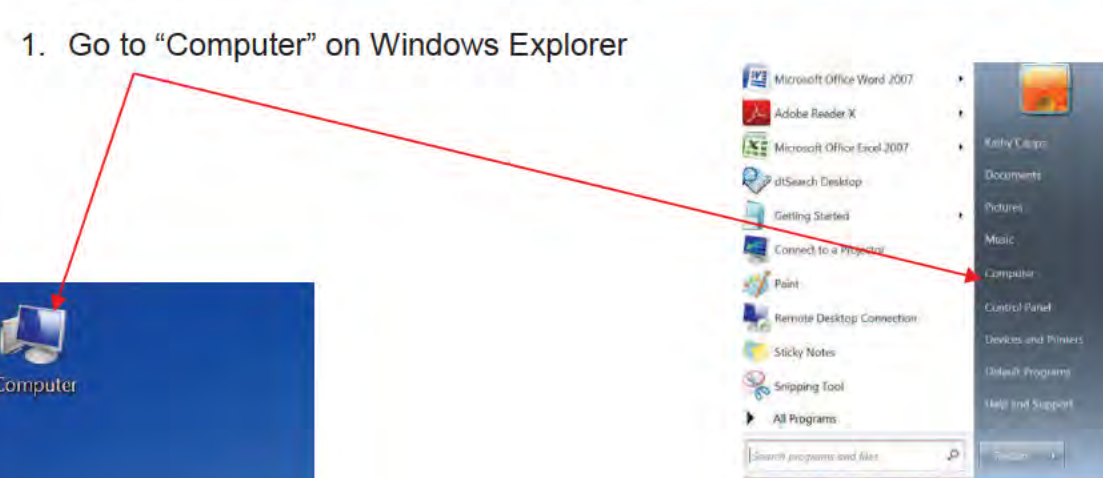
EDA-51 (R-03/13)

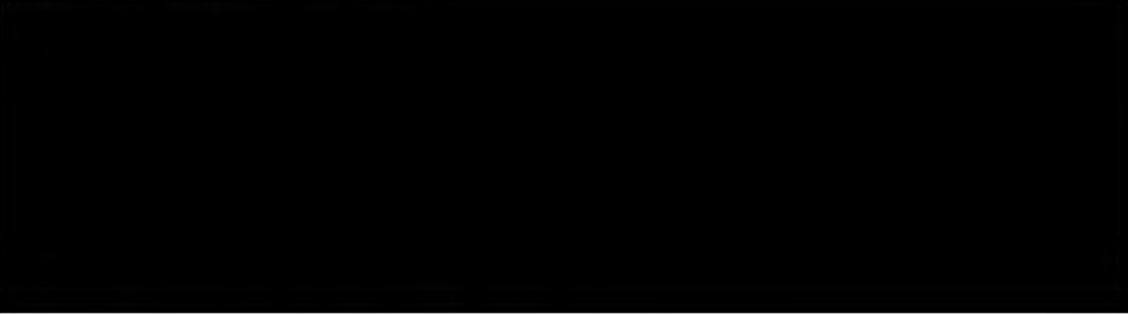
Q. EXHIBIT Q – HOW TO SAVE AUDITS TO THE NETWORK

1. Go to “Computer” on Windows Explorer



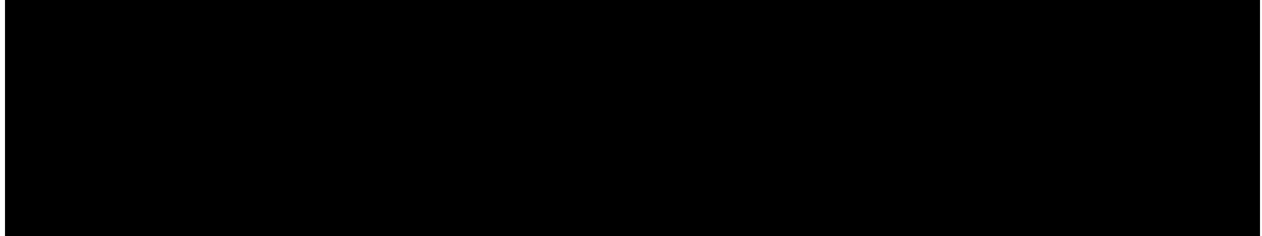
2. Paste or type the link (\\tiamat\sys\audits\users) into the address bar

3. Locate the auditor’s last name

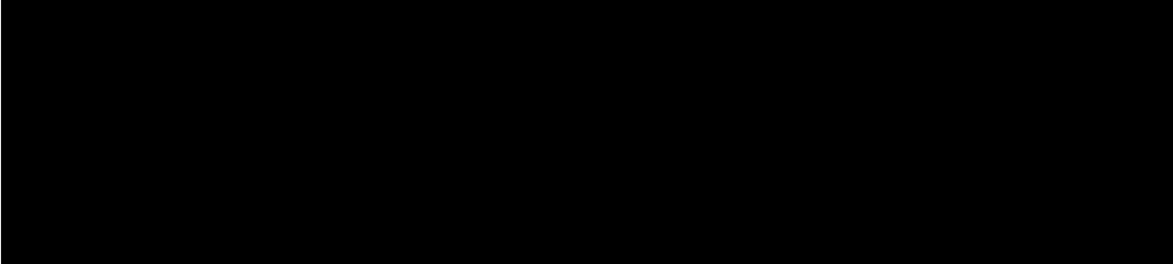


4. Double-click on the auditor’s last name folder

5. Right-click and select New, Folder



6. CAREFULLY type the audit Track number and name of taxpayer



7. Double-Click to open the new folder you just created

8. Next go to your computer where the audit and applicable files are stored.

For example:	ROT	c:\upload\audit.zip
	CIT	c:\cit audits
	IFTA	c:\cas\iftafile

   Include all electronic documents that may be stored on C: and H: drives, and any other electronic documents pertaining to the audit.

9. HIGHLIGHT all applicable files, right click, and select COPY to hold the files in memory.

10. Then go back to the new storage folder you already created by track number and name, right-click and past the files into it. Your audit information is now in the network storage.

    For faster access to folder information, the link \\tiamat\sys\audits\users may be saved to Favorites, or a Shortcut may be created on the computer desktop.

S. EXHIBIT S - FORM 3949-A, INFORMATION REFERRAL

Form **3949-A** (March 2014)

Department of the Treasury - Internal Revenue Service

Information Referral

(See instructions on reverse)

OMB Number 1545-1960

Use this form to report suspected tax law violations by a person or a business.

CAUTION: READ THE INSTRUCTIONS BEFORE COMPLETING THIS FORM. There may be other more appropriate forms specific to your complaint. (For example, if you suspect your identity was stolen, use Form 14039.)

Section A – Information About the Person or Business You Are Reporting

Complete 1, if you are reporting an individual. Complete 2, if you are reporting a business only. Complete 1 and 2 if you are reporting a business and its owner. *(Leave blank any lines you do not know.)*

1a. Name of individual | b. Social Security Number/TIN | c. Date of birth

d. Street address | e. City | f. State | g. ZIP code

h. Occupation | i. Email address

j. Marital status *(check one, if known)* ☐ Married ☐ Single ☐ Head of Household ☐ Divorced ☐ Separated | k. Name of spouse

2a. Name of business | b. Employer Tax ID number (EIN) | c. Telephone number

d. Street address | e. City | f. State | g. ZIP code

h. Email address | i. Website

Section B – Describe the Alleged Violation of Income Tax Law

3. Alleged violation of income tax law. *(Check all that apply.)*

☐ False Exemption ☐ Unsubstantiated Income ☐ Unreported Income ☐ Failure to Withhold Tax
☐ False Deductions ☐ Earned Income Credit ☐ Narcotics Income ☐ Failure to File Return
☐ Multiple Filings ☐ Public/Political Corruption ☐ Kickback ☐ Failure to Pay Tax
☐ Organized Crime ☐ False/Altered Documents ☐ Wagering/Gambling ☐ Other *(describe in 5)*

4. Unreported income and tax years
Fill in Tax Years and dollar amounts, if known *(e.g., TY 2010- $10,000)*

TY ____ $ ______ TY ____ $ ______ TY ____ $ ______ TY ____ $ ______ TY ____ $ ______ TY ____ $ ______

5. Comments *(Briefly describe the facts of the alleged violation-Who/What/Where/When/How you learned about and obtained the information in this report. Attach another sheet, if needed.)*

6. Additional information. Answer these questions, if possible. Otherwise, leave blank.
a. Are book/records available? *(If available, do not send now. We will contact you, if they are needed for an investigation.)* ☐ Yes ☐ No
b. Do you consider the taxpayer dangerous? ☐ Yes ☐ No
c. Banks, Financial Institutions used by the taxpayer

Name | Name

Street address | Street address

City | State | ZIP code | City | State | ZIP code

Section C – Information About Yourself

(We never share this information with the person or business you are reporting.)
This information is not required to process your report, but would be helpful if we need to contact you for any additional information.

7a. Your name | b. Telephone number | c. Best time to call

d. Street address | e. City | f. State | g. ZIP code

Please print and send your completed form to: Internal Revenue Service

XV. FRAUD..40

I. PURPOSE

This chapter describes the various due dates and extensions available and the statutes applicable to the original and subsequent returns.

II. DUE DATES

IITA § 505(a) contains the provisions for the due dates of original returns. The general statutory rule is that the postmark date establishes the legal filing date for an item of mail passing through the U.S. Postal Service. Ref: 5 ILCS 70/1.25.

INCOME TAXES

Tax or program	Form number	Filing Frequency	Due date
Individuals	IL-1040	Annually	On or before 15th day of 4th month following close of tax year
Individuals (estimated payments)	IL-1040-ES	Quarterly	April 15, June 15, September 15, January 15
Individuals (automatic extension payment)	IL-505-I	Annually	On or before due date of original return
Composite	IL-1023-C	Annually	15th day of 4th month following close of tax year. See note below
Composite (estimated payments)	IL-1023-CES	Quarterly	April 15, June 15, September 15, January 15 (will differ for fiscal year filers) – see note below.
Corporations	IL-1120	Annually	15th day of 4th month following close of tax year (for tax years beginning on or after January 1, 2016 and ending on a date other than June 30) 15th day of 3rd month following close of tax year (for tax years beginning on or after January 1, 2016 and ending on June 30)
Corporations (estimated payments)	IL-1120-ES	Quarterly	April 15, June 15, September 15, December 15 (will differ for fiscal year
Estates	IL-1041	Annually	15th day of 4th month following close of tax year
Exempt organizations	IL-990-T	Annually	15th day of 5th month following close of tax Year
Partnerships	IL-1065	Annually	15th day of 4th month following close of tax Year
S Corporations	IL-1120-ST	Annually	15th day of 3rd month following close of tax Year
Trusts	IL-1041	Annually	15th day of 4th month following close of tax Year

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Cooperatives	IL-1120	Annually	15th day of 9th month following close of tax Year
Businesses	IL-505-B	Annually	On or before due date of original return
Pass-through Entity Payment	IL-1000/IL-1000-P	Annually	See note below

Note: IL-1023-CES and IL-1000-P have been eliminated and cannot be used for making prepayments for tax years ending on or after December 31, 2014, and that the IL-1023-C and IL-1000 are retired for years ending on or after December 31, 2014. The payment vouchers (1023-CES and 1000-P) are replaced by Forms IL-516-I and IL-516-B for years ending on or after December 31, 2014.

Estimated payments & Returns Individuals and Corporations

Year ending	1st installment due	2nd installment due	3rd installment due	4th installment due	Ind. return due	Corp. return due
1/31	5/15	7/15	10/15	2/15 Ind. 1/15 Corp	4/15	5/15
2/28	6/15	8/15	11/15	3/15 Ind. 2/15 Corp	5/15	6/15
3/31	7/15	9/15	12/15	4/15 Ind. 3/15 Corp	6/15	7/15
4/30	8/15	10/15	1/15	5/15 Ind. 4/15 Corp	7/15	8/15
5/31	9/15	11/15	2/15	6/15 Ind. 5/15 Corp	8/15	9/15
6/30	10/15	12/15	3/15	7/15 Ind. 6/15 Corp	9/15	10/15
7/31	11/15	1/15	4/15	8/15 Ind. 7/15 Corp	10/15	11/15

11/30	3/15	5/15	8/15	12/15 Ind. 11/15 Corp	2/15	3/15
12/31	4/15	6/15	9/15	1/15 Ind. 12/15 Corp	2/15	4/15

Employer's Withholding Income Tax

Tax or program	Form number	Filing frequency	Due date
For tax years on or after January 1, 2014:			
Withholding payment. (Purchasing the rights to future payments of Illinois lottery winnings)	IL-501	Pay by the 15th day of the month following the purchase with the IL-501.	

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Withholding tax (Purchasing the rights to future payments of Illinois lottery winnings)	IL-941	Due the last day of January following the year in which the rights are purchased.	
For tax years on or after January 1, 2008:			
Withholding payments	IL-501	Semi-weekly Monthly- 15th of month Annually- January 31 of the following year	>$12,000 – semi-weekly >$1,000 - $12,000 – monthly $1,000 or less – annually
Withholding tax	IL-941	Quarterly	April 30, July 31, October 31, and January 31 of the following year
	IL-941-A	As of January, 1, 2011 became obsolete, now filed on IL-941	January 31 of the following year
For tax years prior to January 1, 2008:			
Withholding payments	IL-501	based on accumulated amount of withholding	$1,000 or more – weekly $500 - $999 – monthly Less than $500 – annually
Withholding tax	IL-941	Quarterly	April 30, July 31, October 31, and January 31 of the following year
Note: If the accumulated amount withheld is less than $500 for the year, a taxpayer may file Form IL-941 and pay any accumulated amount of withholding on or before January 31 of the following year. Use Form IL-941 for the fourth quarter as your annual return.			
Annual reconciliation	IL-W-3	Annually	February 28 of year following Reporting period regardless of filing status

A. Exceptions

The IITA and departmental policy allow for several exceptions to the general due date.

1. Federal

If the return of a corporation is due (without regard to extensions) for federal purposes on a return with a due date later than the 15th day of the third month following the close of the taxable year, the same due date will apply to the corresponding Illinois return. Ref: IITA § 505(a)(1)

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

2. **Partnerships and Fiduciaries**

   Partnership and fiduciary returns are due on or before the 15th day of the fourth month following the close of the taxable year, unless extensions are granted. Ref: IITA § 505(a)(2)

   S Corporations and personal service corporations are able to file their Illinois income tax returns in accordance with 26 CFR § 1.444.3T(c)(1)(i).

   - They can take advantage of the automatic Illinois filing extensions in addition to the extended due date allowed by IRC § 444 election.
     - The automatic Illinois extension applies only to the filing of the return, not to paying the taxes. Ref: Informational Bulletin FY 89-7.

3. **Certain Exempt Organizations**

   The returns of organizations exempt from federal taxation which determine base income under IITA § 205(a) are due by the 15th day of the fifth month following the close of the taxable year, unless extensions are granted. Ref: IITA § 505(a)(3)

4. **52/53 week filer**

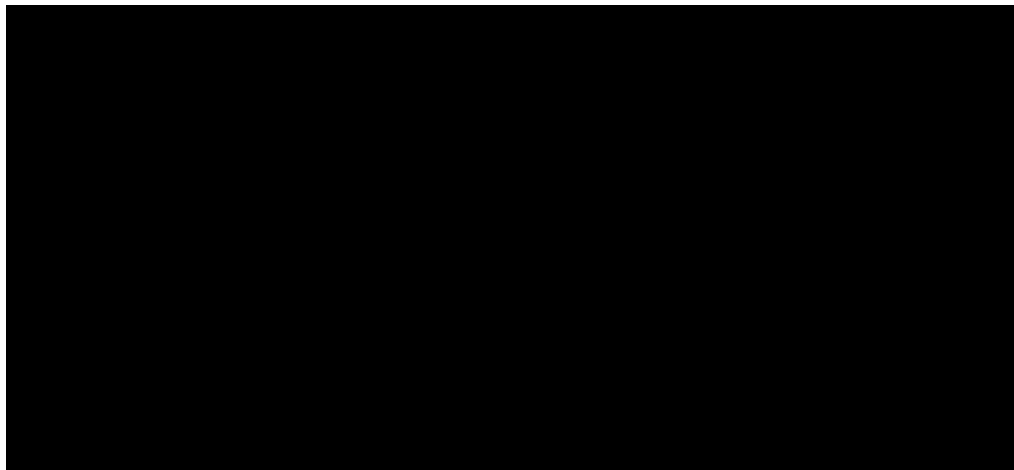
   A 52/53 week filer is a taxpayer that has elected under IRC § 441(f) to have a fiscal year that varies from 52 to 53 weeks. For filing purposes, the last day of the taxable year is deemed to be the last day of the calendar month ending nearest to the last day of the taxpayer's actual year.

   Note: Taxpayers with short-year returns due to liquidations, mergers, IRC § 338 elections, etc., often reflect year-ends that are not at the end of a month. In these cases, the due date is calculated based on the 15th day of the third full month following the close of the tax year.

   - This is not the same rule that applies to 52/53-week filers. If a taxpayer is being incorrectly billed for a late-filing penalty because of a short year return being treated by the Department as a 52/53 week filer, the taxpayer should use the contact information provided on the correspondence to request to have penalty removed.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Example of fiscal filer reported on GenTax:



5. **Cooperatives**

   The annual return of a cooperative is required to be filed on or before the 15th day of the ninth month following the close of the cooperative's taxable year. For these purposes, a cooperative is any taxpayer that determines its federal taxable income in accordance with 26 USC §§ 1381 through 1388. Ref: IAC § 100.5000(a)(3) and IITA § 203(e)(2)(F)

6. **Saturday/Sunday/Holiday**

   If the due date for any return, other report or payment falls on Saturday, Sunday or a holiday, a return or report filed, or payment made, on the next business day is considered timely. Ref: IAC § 100.5000(b)

III. DEEMED ASSESSED (ADMITTED) LIABILITIES (NOTICE AND DEMAND)

A deemed assessed liability is one for which the taxpayer has no recourse before payment. We also refer to this type of liability as “admitted liability”, since the taxpayer has reported and “admitted” to owing this liability to the Department.

- The taxpayer has conceded that a liability exists based on:
  1. An original Illinois return reflecting tax due (along with any applicable interest or penalties).

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

2. An amended return reflecting additional tax liability (along with any applicable interest or penalties), or
3. Any amount of tax liability understated on the return due to a mathematical error (along with any applicable interest or penalties).

For liabilities deemed assessed, the Department is required to only issue a Notice and Demand for payment.

- Any amount which has been timely issued is then protected against statute expiration.
- The taxpayer has no right of protest a Notice and Demand, as it does not constitute a Notice of Deficiency. Ref: IITA § 902(a) & 903(a) and IAC § 100.9200(a)(1)(A).

A Notice and Demand is the last notice sent to a taxpayer prior to the filing of a lien.

- If the taxpayer disagrees with the adjustment, their only recourse is to pay the Notice and Demand and file a claim for refund.
- The payment should be received within 30 days after the issuance.
  - If payment is not received the Department may then file a lien and/or initiate other seizure activities, as warranted. Ref: IITA §§ 1101 and 1109.

A. NOTICE AND DEMAND

1. **In General**

Any tax, which is shown on the face of an original return but not paid, and any applicable interest or penalties, becomes deemed assessed upon the filing of the return.

- The Department must issue a Notice and Demand for payment of the tax due.
  - o The Department has 3 years from the date the original or amended return is filed to issue a Notice and Demand for payment of the liability due. Ref: IITA §§ 902(a) and 903(a)(1)
- An additional liability resulting from adjusting a taxpayer's return for a math error (as defined in IITA § 1501(a)(12)) is also considered deemed assessed on the date the return is filed.
  - o For an in-depth explanation of mathematical errors (math errors), refer to Chapter 20 Income Tax Audit Procedure.

A deemed assessment is subject to the lien provisions as described in IITA § 1101. The statute of limitations on a liability resulting from tax shown on the original return or a math error cannot use form IL-872 to extend the statute date, based on being deemed assessed as opposed to being proposed. This three-year rule also applies to an amended return concerning the changes made on a return resulting in additional tax being due.

2. **Math-error corrections (IITA § 1501(a)(12)**

   The term “mathematical error” includes the following types of errors, omissions, or defects in a return filled by a taxpayer which prevents acceptance of the return filed by a taxpayer which prevents acceptance of the return as filed for processing:

   (A) Arithmetic errors or incorrect computations on the return or supporting schedules;
   (B) Entries on the wrong lines;
   (C) Omission of required supporting forms or schedules or the omission of the information in or in part called for thereon; and
   (D) An attempt to claim, exclude, deduct, or the provisions of the Act and regulations thereunder any item of income, exemption, deduction, or credit.

3. **Court Case**

   In the case of the Department of Revenue v. William J. Walsh, 1990 the Circuit Court ruled that a subtraction modification not specifically provided for in the Act could NOT be construed by the Department to be a math error. Therefore, a Notice of Deficiency should have been issued allowing taxpayer the right to protest prior to payment of the additional liability. This ruling was made in August 1988 and the Department subsequently requested reconsideration by the Court. In March of 1990, the Appellate Court REVERSED the Circuit Court's Judgment. Therefore, the Department's policy remains: if a taxpayer claims an item of deduction not specifically provided for in the IITA, the questionable deduction will be disallowed, considered a math error and a Notice and Demand will be issued for the additional amount due.

4. **Amended returns**

   Additional tax shown to be due on an amended return is deemed assessed on the date of filing of the return. A Notice and Demand shall be issued for any tax shown and not paid upon the filing of the amended return. The interest and demand on that amended return would need to be issued within 3 years of the amended filing, an extension cannot be obtained to extend the statute for a Notice and Demand.

   If a taxpayer files a claim for refund, the Department has three years from the date the claim was filed to reduce the refund due to a math error discovered on the claim.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

IV. PROPOSED LIABILITY (NOTICE OF DEFICIENCY & PROPOSED NOTICE OF DEFICIENCY)

A. Notice of Deficiency-Original Return

Regarding an original return filing, a Notice of Deficiency shall be issued by the Department within 3 years of:

- The automatic extension date, OR
- The date the return was filed, using the later of the two dates.

The following chart summarizes the statutes of limitation:

ORIGINAL RETURN FILED	DEFICIENCIES	CLAIMS FOR REFUND
On or Before Extended Due Date	Statute of Limitations begins on Extended Due Date	Statute of Limitations begins on Extended Due Date, or one year after the tax was paid, whichever is later
After the Extended Due Date	Statute of Limitations begins on Date the Return was Filed	Statute of Limitations begins on Date the Return was Filed, or one year after the tax was paid, whichever is later

There are many exceptions to this rule- please see discussion within the Extension section below.

B. Mandatory Filing of Combined Returns

Years ending on or after December 31, 1993

Eligible members are required to file a combined return and be treated as one taxpayer for purpose of original and amended returns,

Each combined group is required to properly complete and file a combined return (using Form IL-1120 and Schedule UB) by the due date of the return (including extensions). For the first year for which a combined return must be filed, a single combined request for extension of time to file the return can be made by one member acting as designated agent on behalf of the entire combined group, even though the designated agent will not actually be appointed until the combined return is filed.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

If, on audit, the Department determines that two or more corporations are members of a unitary business group for which no combined return was filed, the following rules apply:

1. Any audit liabilities determined by the Department will be processed on a combined return basis. Because each member of a combined group is jointly and severally liable for the tax liability of the entire group, if any Notices of Deficiency are issued:

   a) The Notices of Deficiency shall reflect the combined return income and liability of the entire combined group; and

   b) A Combined Notice of Deficiency must be issued to each Illinois taxpayer, unless a designated agent has been appointed under IAC §100.5220(f), in which case the Department may issue a Notice of Deficiency solely to the designated agent and to any corporation which has requested the Department to be allowed to represent itself pursuant to IAC § 100.5220(f)(2).

If two or more corporations have filed a combined return and, on audit, the Department determines that one or more additional corporations belonged to the combined group and should have joined in the filing of the combined return, any audit liabilities shall be proposed and processed as follows:

1. If, prior to the issuance of a Notice of Deficiency, any of the corporations which did not join in the combined return and the designated agent of the combined group agree that such corporation is a member of the combined group or the designated agent pays all audit deficiencies the audit liabilities related to that corporation and the combined group will be proposed and processed on a combined return basis. In this instance, the Department treats the designated agent as having corrected the combined return in accordance with IAC § 100.5210(b).

2. If the designated agent of the combined group, or any corporation which did not join in the combined return, does not agree that such corporation is a member of the combined group prior to the issuance of a Notice of Deficiency, the audit liabilities for that corporation will nevertheless be proposed and processed on a combined return basis. Because each member of a combined group is jointly and severally liable for the tax liability of the entire group, if any Notices of Deficiency are issued:

   a) The Notices of Deficiency shall reflect the combined return income and liability of the entire combined group; and

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

b) A Combined Notice of Deficiency will be issued to the designated agent and to each new eligible member corporation, which did not join in the filing of the combined return, but which the Department is asserting is an eligible member of the combined group. Each Notice of Deficiency shall state that the designated agent shall represent each corporation whose membership in the combined group is in dispute unless such corporation requests the Department to be allowed to represent itself pursuant to IAC § 100.5220(f)(2).

Note: If an amended return is audited and an additional liability above what was reflected on the amended return is proposed, a Notice of Deficiency shall be issued for the proposed liability in accordance with the provisions of IITA § 905. While an amended return does not extend the statute for issuing a Notice of Deficiency for issues reported on the original return, if the amended return reports an overpayment, the expiration of the limitations period for issuing an NOD does not prevent the Department from raising any issue that will reduce the amount of the overpayment.

Example

Corporation A filed Form IL-1120 for the calendar year 2006 on October 15, 2007. On the original return Corp. A claimed non-business income from CD's. On March 10, 2009, Corp A filed Form IL-1120X reporting additional liability due to the reporting of a previously unreported addition modification and the reclassifying of interest income received from trade receivables as nonbusiness income.

An audit was completed on the 2006 year in December 2010. The interest from CD's and trade receivables was determined to be business income. The period for issuing a Notice of Deficiency due to the disallowance of the CD interest as nonbusiness income, (the original return) expires October 15, 2010. The period for issuing a Notice of Deficiency due to the disallowance of the trade receivable interest as non-business income expires March 10, 2012.

An extension of the period for issuing a Notice of Deficiency is allowed under IITA § 905(f) if, prior to the expiration of the time period allowed under IITA § 905, both the Department and the taxpayer consent, in writing, to extend the time period.

C. Amended Return not treated as original

The Department's position is amended returns (where no original filed) do not constitute the equivalent of "original" returns. Therefore, no statute is involved on any proposed liability resulting from the amounts shown in Column A ("As originally

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights.”

reported") of the Illinois return. Ref: Rockwood Holding Company v. Department of Revenue, 2000

- The auditor should advise the taxpayer that the Department has no proof of an original return filed and allow the taxpayer a chance to supply proof of filing.
  - o "Proof of filing" in this instance, would be a copy of the original signed Illinois return dated by the Department, or
  - o Cancelled check for any amount of tax paid with the original return.
    - ▪ If the taxpayer cannot supply proof of filing of the original return, a liability shall be proposed to the taxpayer using the best information available.
- This information is based on the amounts shown on the amended return.

Example

Corporation A files an amended return for calendar year 2006 on June 30, 2008. The amended return is filed as a result of a federal RAR, which increased federal taxable income (and Illinois Line 1) from $400,000 to $500,000. The Department has no record of an original return filed and taxpayer cannot provide proof of filing for the original. There is no statute of limitation on the proposed liability resulting from the calculation of taxpayer's liability based on the $400,000 taxable income shown on the amended return. However, the statute of limitation on the proposed liability resulting from the $100,000 federal change begins on June 30, 2008(the date "notification" given to the Department).

D. Notice of Deficiency – Federal Changes

An NOD must be issued within 2 years after a federal change return is filed. If a taxpayer fails to notify the Department where notification is required by IITA §§ 304(c) or 506(b), or fails to report a change or correction as if it were a deficiency for federal income tax purposes, then:

- An NOD may be issued:
  - o At any time or
  - o On or after August 13, 1999:
    - ▪ For any taxable year in which the taxpayer may carry an Article 2 credit, or IITA § 207 loss, earned, incurred, or used in the year for which the notification is required.
    - ▪ The deficiency is limited to the amount resulting from recomputing the taxpayer's net income. The deficiency may be assessed on an NOD issued under this provision. The deficiency cannot exceed the results from the federal change.

IITA § 601(a) refers only to the "return," and does not mention amended returns. Accordingly, it is referring only to original returns. Badaracco v. Commissioner, 464 US 386 (1984) and Hillsboro National Bank v. Commissioner, 460 US 370 (1983). If payment was not due before the federal change report was due, no interest would accrue prior to that date.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

A taxpayer who timely files a federal change return and pays the additional tax due is not subject to a late-payment penalty imposed on that amount under UPIA § 3-3(b)(1), (b-5)(1), (b-10)(1), (b-15), or (b-20)(2), whichever is applicable. The statute literally exempts the taxpayer from penalty if the return is timely filed, but the Department's policy is to require timely payment as well.

E. Federal changes/Increase

The taxpayer must report to Illinois any change to its federal income tax liability, which also changes its base income allocable to Illinois.

- Notification shall be made to Illinois in the form of an amended return, no later than 120 days after the alteration agreement or finally determined for federal income tax purposes.
- If the taxpayer sends the Department a letter stating that a federal audit was completed, the letter does NOT constitute notification to the Department.
- This includes if the taxpayer has attached a copy of the federal audit report to the letter. Ref: IITA § 506(b)

A federal change resulting from a federal audit is often referred to as an `RAR' an acronym for Revenue Agent's Report (the document, which reflects the federal audit changes).

- A federal change is finally determined when a deficiency is paid or assessed and any opportunity to appeal the deficiency is past, whichever occurs first. Ref: Sunshine Letter IT83-0737.
  - The taxpayer may protest a proposed deficiency to the Tax Court within ninety days after the IRS mails the notice of deficiency.
  - The federal change is not final during those ninety days.
  - If a taxpayer has filed a petition in the United States Tax Court to contest a federal Notice of Deficiency, then the federal change has not yet been "finally determined" for Illinois purposes. Ref: Sunshine Letter IT88-0029.

The amended return reflects a proper increase to line 1 but taxpayer offsets the reported increase to line 1 with a corresponding increase to nonbusiness income which results in no tax due. Upon audit, the auditor determines the NB adjustment is not allowable, the Department must issue a NOD for the RAR increase within 2 years of the received date.

When a federal change is unreported, the Notice of Deficiency (NOD) may be issued at any time. Ref: IITA § 905(d) When the federal changes have been reported, the Department has two years from the date the amended return was filed to issue an NOD, if necessary. Ref: IITA § 905(e). IITA § 909(d) requires that a claim for refund must be in writing and filed with the Department on the form prescribed by the Income Tax Regulations.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Note: It is the taxpayer's responsibility to know and comply with Illinois tax laws. Reliance on an auditor's failure to advise the taxpayer should not, by itself, create a "reasonable cause" argument for the taxpayer's own failure to timely report a federal change and pay any increase in tax resulting from that change. However, the auditor's acceptance of an insufficient report (without informing the taxpayer that it is inadequate) could be construed by a court as creating reasonable cause to abate the penalty or as reflecting a Department policy of allowing informal refund claims.

IITA § 903(a) provides that additional tax shown on returns (including any amended returns) is deemed assessed upon the filing of the return. Interest is statutory under IITA § 1003(b) and deemed assessed when the increase in tax is assessed. UPIA penalties are deemed assessed, too.

An acceptance of an amended (IL-1120-X) return cannot occur until the federal change has been finally determined or accepted for federal purposes. If a portion of the proposed liability is agreed upon (and/or paid) and a portion protested, it is the Department's position that the taxpayer should report the agreed portion to Illinois under IITA § 506(b).

Each member of the group who is an Illinois filer when separate unitary returns are filed must report a federal change that affects the unitary base income of the group. If one member reports the change, but others in the group do not, the statutes remain open for those failing to report the change. Each Illinois filer is viewed as a separate entity and the statutes therefore apply on a separate basis.

Example

For calendar year 2004, Corporations A, B, C and D conduct a unitary business. Corporations A, B and C are all Illinois filers and file their 2004 Illinois Income Tax returns based on unitary apportionment. In April of 2007, an IRS audit increases the taxable income of Corporation D by $1,000,000. Corporation D agreed to the audit by signing Federal Form 870 on April 15, 2007. Under IITA § 506(b), Corporations A, B and C each must notify the Department of the finally agreed change in Corporation D's federal taxable income.

If a combined Illinois return (as allowed by IITA § 502(e)) for years ending 12/31/85 and after was originally filed, the Illinois filers are treated as a single taxpayer for purposes of amendments and assessments. Therefore, the amended return will apply to all members (BUT ONLY THOSE MEMBERS) who filed the original, combined return. REF: IAC § 100.5260(a).

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

V. PROPOSED ASSESSMENT/LIABILITY

A proposed assessment is the result of the Department proposing a higher liability than the taxpayer has admitted prior to the expiration of the pertinent statute.

- A taxpayer has the option of either agreeing or disagreeing to the proposal.
- If the taxpayer agrees to the assessment and signs Form IL-870, the proposed assessment then becomes a deemed assessment and the taxpayer must pay the additional liability.

For more information regarding the IL-870 and the procedures for processing audits with agreed and/or paid liabilities, refer to Chapter 20 Income Tax Audit Procedure.

1 If the taxpayer disagrees with the proposed assessment, the Notice of Deficiency shall be sent to the taxpayer in accordance with IITA § 904(a), which reflects the proposed adjustments and the reasons for the adjustments. The taxpayer has 60 days (150 days if the taxpayer is outside the United States) from the date the Notice of Deficiency is issued to either:
   a. File a protest with the Department;
   b. Agree by signing an IL-870; or
   c. Pay the proposed assessment.

2 If the taxpayer does not respond within the specific timeframe the liability is assessed in accordance with IITA §§ 903(a)(2) and 904(d) and a Notice and Demand can be issued under IITA § 902.
   - If taxpayer requests a hearing, the Department's action becomes final 30 days after the mailing of a notice of decision. If within that 30-day period, the taxpayer requests a rehearing on the decision the Department's action becomes final either upon:
     - Its issuance (within 10 days after the rehearing request is received) of a denial of the request or,
     - If such denial is not issued within that 10-day period, upon the Department's issuance (as soon as practicable) of a notice of final decision. Ref: IITA § 908 and IAC § 100.9100(b)(2).

Note: In an audit situation, a taxpayer forfeits its right to protest under IITA § 908 and to request an administrative hearing by signing an IL-870. However, the taxpayer may still file a claim for refund and protest the denial of the claim under IITA § 909.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

For a further discussion of un-agreed audit conclusion procedures, refer to Chapter 20 Income Tax Audit Procedure.

VI. EXTENSIONS

Withstanding the statute of limitations for original returns and reported federal changes, there are extensions available and exceptions to the general statutes.

A. Automatic

The Department has granted an automatic extension of 6 months (7 months for corporations) to file any Illinois income tax return except returns due under Article 7 of the IITA. No application form need be filed by a taxpayer to obtain this extension. (IAC § 100.5020(b)) If a balance of tentative tax is due, the taxpayer should transmit the payment with the appropriate form by the original filing due date in order to avoid the penalty for underpayment of tax (IITA § 1005) and statutory interest (IITA § 1003).

B. IRS Extension granted > 6 mos.

The Department will approve an extension of more than 6 months (7 months for corporations) if an extension of more than 6 months is granted by the Internal Revenue Service.

- For corporations the additional Illinois extension will be one month beyond any approved federal extension of longer than the automatic 6-month extension.
- For all other taxpayers, the additional extension will be for the length of time approved by the Internal Revenue Service.

All taxpayers must attach a copy of the approved federal extension to their return when it is filed.

C. 25% omission from Base Income IITA § 905(b)

Taxpayer omits from base income more than 25% of the amount properly includible.

- An NOD may be issued 6 years from the:
  - Automatic extension date, or
  - The date the return was filed, if filed after the extension date.

- The Department cannot include in the 25% calculation, any amount disclosed in the return or in a statement attached to the return, "in a

manner adequate to apprise the Department of the nature and amount of such item". Ref: IITA § 905(b)(1)

Note: The period for issuing a Notice of Deficiency may extend past the 6-year period allowed by IITA § 905(b) if the provisions of IITA § 905(f) (extension by agreement) are invoked.

Note: Auditor must obtain management approval for 25% omission.

D. Reportable transactions

Taxpayer fails to include on any return or statement for any taxable year any information with respect to a reportable transaction.

- An NOD may be issued not later than 6 years after the return is filed with respect to the taxable year in which the taxpayer participated in the reportable transaction and is limited to the non-disclosed item. Ref: IITA § 905(b)(2)

E. No return or fraudulent return IITA § 905(c)

If the taxpayer fails to file a return or files a fraudulent return, there is no limitations period for issuing an NOD. Ref: IITA § 905(c).

- If the taxpayer has reasonable cause for failing to file a return (non-filer), the limitations period is 6 years from the extended due date of the return. (UPIA § 3-10(b))
- If the taxpayer has participated in the Voluntary Disclosure Program, the limitations period is 4 years from the extended due date of the return. (UPIA § 3-10(c))
- Any taxpayer who is required to join in the filing of a return for a taxable year <u>ending on or after December 31, 2013</u> and is not included on that return and does not file its own return is deemed to have failed to file.
    - The amount of any proposed assessment is limited to the amount of increase in liability that should have been reported from proper inclusion on the return. Ref: IITA § 905 (c)

If a taxpayer files a fraudulent return, there is no limitations period for issuing an NOD. (IITA § 905(c)).

- If a fraudulent return is filed, the subsequent filing of a non-fraudulent amended return does not cause the running of any limitations period to begin. Badaracco v. Commissioner, 464 U.S. 386 (1984)

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

F. Erroneous refunds IITA § 905(g)

If an erroneous refund of tax has been paid:

- An NOD may be issued:
  - At any time within 2 years from the making of such refund, or
  - Within 5 years from the making of such refund if it appears that any part of the refund was induced by fraud or the misrepresentation of a material fact.
    - The deficiency is limited to the amount of such erroneous refund.

Note: Beginning July 1, 1993, in any case in which there has been a refund of tax payable under the IITA attributable to a net loss carryback as provided for in IITA § 207, and that refund is subsequently determined to be an erroneous refund due to a reduction in the amount of the net loss which was originally carried back, a notice of deficiency for the erroneous refund amount may be issued at any time during the same time period in which a notice of deficiency can be issued on the loss year creating the carryback amount and subsequent erroneous refund. The amount of any proposed assessment set forth in the notice shall be limited to the amount of such erroneous refund.

G. Request for prompt determination of liability

Certain taxpayers may request in writing for prompt determination of liability. In this situation, the Department must issue a Notice of Deficiency within 18 months after such written request is filed with the Department, but not more than 3 years after the automatic extension date or the date the return was filed, if filed after the extension date. Under IITA § 905(i) the taxpayers to whom this section applies are:

- A decedent or his estate during the period of administration,
- A corporation which notifies the Department that:
  - It is contemplating dissolution at or before the expiration of the 18-month period.
  - It is beginning the dissolution in good faith before the expiration of the 18-month period, AND
  - The dissolution is completed.

H. Transferee liability

An NOD may be issued to a transferee relative to a liability asserted under IITA § 1405 during time periods defined as follows:

- Initial Transferee.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- Up to 2 years after the expiration of the period of limitation for assessment against the transferor, except:
  - If a court proceeding for review of the assessment against the transferor has begun, then up to 2 years after the return of the certified copy of the judgment in the court proceeding.
- Transferee of Transferee.
  - Up to 2 years after the expiration of the period of limitation for assessment against the preceding transferee, but not more than 3 years after the expiration of the period of limitation for assessment against the initial transferor, except:
    - If before the expiration of the period of limitation for the assessment of the liability of the transferee, a court proceeding for the collection of the tax or liability in respect thereof has been begun against the initial transferor or the last preceding transferee, as the case may be, then the period of limitation for assessment of the liability of the transferee shall expire 2 years after the return of the certified copy of the judgment in the court proceeding.

I. Notice of decrease in net loss IITA §905(n)

On and after August 23, 2002, no NOD shall be issued as the result of a decrease determined by the Department in the net loss incurred by a taxpayer in any taxable year ending prior to December 31, 2002 under ITTA § 207, unless:

- The Department has notified the taxpayer of the proposed decrease within 3 years after the return reporting the loss was filed, or
- Within one year after an amended return reporting an increase in the loss was filed, provided that in the case of an amended return, a decrease proposed by the Department more than 3 years after the original return was filed may not exceed the increase claimed by the taxpayer on the amended return.

VII. LOSS REDUCTION "LR" PROCEDURE

Audits in which no additional liability is established, but adjustments are made that reduce a claimed net operating loss or excess credit amount should be considered Loss Reduction (LR) audits.

If the auditor is correcting an Illinois net loss (INL) or tax credits for a year in which there is no tax liability, and the taxpayer agrees with the changes, the auditor must obtain a signed amended return (not an IL-870) to correct the INL or credits. The taxpayer will then carry over the correct amount of INL or credit based on the amended return. If the taxpayer does not agree with the auditor's changes for years in which there is no tax liability due, then the taxpayer should be given an EDA-143-LR Net Loss and Credit Reductions. This letter provides written notification to the taxpayer that the Department does not agree with the return(s) as filed.

The taxpayer should understand that signing the letter does not indicate agreement with the Department's position; it is merely proof that the taxpayer was notified of the changes made to the INL or credit available for carryover. The taxpayer will have the right to protest any change in the carry year in which the adjustment to the loss/credit will create a deficiency. Refer to Chapter 20 and 35 for complete procedures.

For purposes of this section:

1. The term "closed year" refers to any year for which the statute of limitations for issuing notices or filing claims has expired.

2. The term "open year" refers to any year for which the statute of limitations for issuing notices or filing claims has not expired.

3. The term "barred deduction(s)" refers to any deduction on a return for a closed year.

4. The term "Article 2 credit(s)" refers to any or all of the various tax credits provided for in IITA Article 2, i.e., Replacement Tax Investment Credit (RTIC), Training Expense Credit, etc.

5. The term "loss" refers to either a federal net operating loss or an Illinois Net Loss unless specified otherwise.

If a loss is incurred in a closed year and was used to offset income in one or more open years the Department may examine the closed loss year to determine the correct amount of loss which may be carried (i.e. the apportionment percentage, addition and subtraction modifications, business and non-business income classification of the loss year), and the loss may be reduced or eliminated. The Department however, may not examine the loss year to

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

determine if the unitary filing or the composition of the unitary group was appropriate or correct. 40 Ill. Reg. 10925

If a claim is filed to carryback a net operating loss and the 3-year statute of limitations for issuing a Notice of Deficiency based on the original return for the carryback year has expired any item of income, modification, allocation or apportionment on the claim (even if the item claimed is on the original return also) may be examined, including the determination of whether unitary filing is appropriate or if the unitary group composition is correct. If any portion of the claim is found to be incorrect, the claim may be reduced to zero or the amount of the erroneous refund may be recoverable, but no additional liability may be proposed.

A. VARIOUS EXAMPLES

1. **Eliminate INLD**

Corporation ABC filed a calendar year 2002 IL-1120 reporting an Illinois Net Loss of $100,000 on October 15, 2003. ABC carried the INLD forward on its original return for 2003, which was filed October 15, 2004.

In February of 2007, an audit was performed on ABC's 2003 IL-1120. No adjustments were made to the 2003 return as filed except that, as part of the audit, the 2002 Illinois Net Loss was examined and it was determined that ABC overstated its US interest subtraction in 2002. If the US interest subtraction had been correctly reported, ABC would not have incurred a loss in 2002. Instead, ABC should have reported Illinois net income of $20,000. The INLD that was carried forward to 2003 was eliminated and a liability proposed for 2003. No liability was proposed on the $20,000 of income, which was reported on the 2002 return since the statute of limitations for issuing a Notice of Deficiency on 2002 had expired.

A taxpayer may also create or increase a loss in a closed year for any reason including a change in the unitary status or composition of the unitary group. The Department's prohibition against changing the unitary status or group composition in a closed year is based upon a Director's Policy Decision, dated May 29, 1986. This decision does not, however, bar a taxpayer from making a similar adjustment in a closed year to determine the proper amount of loss, which is available to be carried into an open year.

IRC Revenue Ruling 56-285 and Springfield Street Railway Co. v. U.S., 312 F.2d 754 (Ct. Cl. 1963) support the position a loss can be increased, decreased, created or eliminated in a closed year.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

2. **Extension by agreement/IL 872 IITA § 905(f)**

Before the expiration of the time set in IITA § 905 for issuance of a NOD, both the Department and the taxpayer can consent in writing to extending the date the Department may issue an NOD.

- Such NOD may be issued at any time prior to the expiration of the period agreed upon.
  - In the case of a taxpayer who is a partnership, Subchapter S corporation, or trust and who enters into an agreement with the Department pursuant to this subsection on or after January 1, 2003, an NOD may be issued to the partners, shareholders, or beneficiaries of the taxpayer at any time prior to the expiration of the period agreed upon.
    - Any proposed assessment in the notice shall be limited to the amount of deficiency resulting in re-computation of income, deduction, credits, or other amounts of the taxpayer that are taken into account in computing its liability.

The period agreed upon may be extended by subsequent agreements in writing made before the expiration of the period previously agreed upon. See discussion on Form IL-872, Consent to Extend the Time to Assess or Refund Income Tax below.

3. **Form IL-872, Consent to Extend the Time to Assess or Refund Income Tax**

If Form IL-872 is properly executed **prior** to natural statute expiration for a tax period, the extended date is the agreed upon date and the entire return is open for auditing purposes. . Ref: IITA § 905(f)

See Chapter 20, Audit Procedures for additional information

Any change made on the IL-872 must be initialed and dated by both the taxpayer and the Department for the change to be valid.

- For the Department, the Director's initials and the date should be placed next to the change by a member of management who has the authorization to affix the Director's signature to IL-872's.
  - Failure to affix the Director's signature prior to expiration of the statute of limitations could result in invalidation of an assessment.
  - That person's initials or authorization number should appear next to the Director's initials.
  - Auditors must not sign waivers or initial any changes on the IL-872.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Under IAC § 100.5220(b), the designated agent of a unitary business group filing a combined Illinois return will sign the IL-872 in its name and this signature is binding on all other electing members.

Public Act 92-0846 amended IITA § 905(f) to provide that a partnership, Subchapter S corporation, or a trust who executes an extension with the Department **on or after January 1, 2003**, will also extend the statute of limitations for **partners, shareholders, or beneficiaries** of the flow-through entity.

- However, any assessment shall be limited to the amount of the deficiency resulting from recomputing income, deduction, credits, or other amounts of the taxpayer that are taken into account by the partner, shareholder, or beneficiary in computing its liability under the IITA.
- If the taxpayer files an amended return from an RAR or other federal change, it re-opens the statute for that tax period for two years from the date the amended return is filed.

Important: Keep in mind who is signing the IL-872. If a POA is signing, make sure the POA has been given that authority on the IL-2848.

- Similarly, prior to its expiration, such extended period may be successively further extended for any or all of such taxable years by obtaining additional Forms IL-872.
  - If upon being requested to do so, the taxpayer delays or declines or for other reason fails to execute and furnish Form IL-872 for a taxable year or years which otherwise soon would become barred, the Department's recourse ordinarily is to issue a notice of deficiency, which is timely and within previously extended periods under IITA § 905, setting forth adjustments and reasons. Ref: IITA § 904(c).

  - If the Department has not requested Form IL-872, a taxpayer can prevent the expiration of the statutory period during which a credit or refund may be made in connection with items he specifies therein by filing a claim for refund in accord with IITA § 909(d) within the time limitations imposed in IITA § 911. Ref: IAC §100.9400 and 100.9410

Example 1:

On January 3, 2003 Partnership A signed and the Department executed Form IL-872, (Consent to Extend the Time to Assess or Refund Income Tax) to

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

extend the statute of limitation for the 1999 tax year until June 30, 2004. A notice of deficiency must be issued to the partners by June 30, 2004 for any adjustments from recomputing of Partnership A's income, deduction, credits, etc. that could be assessed to the partners.

Example 2:

An auditor is auditing Partnership B for calendar years 1998 and 1999. On April 1, 2002, the auditor secured a waiver for B's 1998 tax year, extending the statute of limitations through June 30, 2003. On February 1, 2003, the auditor secured an additional waiver which extended Partnership B's statute of limitations through June 30, 2004 for calendar years 1998 and 1999. Since the initial waiver for Partnership B's 1998 year was obtained prior to January 1, 2003, it does not extend the statute of limitations for B's individual partners for the 1998 tax year. However, a notice of deficiency may be issued to the individual partners for the 1998 year if the auditor had previously secured a waiver for the individual partners. Because partnership B's initial waiver for the 1999 tax year was obtained after January 1, 2003, it will allow the Department to issue a notice of deficiency to B's partners for the 1999 tax year.

VIII. LIMITATIONS ON CLAIMS FOR REFUND

A. Claim Statute- General

A claim for refund cannot occur after:

- The expiration of the 3-year period after the date the return was filed, or
- One year after the date the tax was paid.
  - If the claim is filed within the 3-year limitations period, the refund is limited to the amount of tax paid within the period prior to the claim filing date equal to 3 years plus any extension of time for filing the original return. IITA § 911(d)(1). Accordingly, if the taxpayer files its original return 1 year after the due date, a refund claim filed within 4 years after the due date would be timely, but no refund of amounts paid by the original due date would be allowed. For purposes of this provision, any amount paid before the due date for payment (i.e., March 15 for a calendar year corporation) is deemed to have been paid on that date. (IRC § 6513(b))
  - If the claim is filed within the 1-year limitations period, the refund may not exceed the amount of tax paid within 1 year prior to the filing date.

B. Federal Changes/Decrease

IITA § 506(b) discusses federal changes and requires taxpayers to notify the Department of such changes by filing an amended return within 120 days after the change is finalized (agreed to, or finally determined) with the IRS or the resulting refund is paid, whichever occurs first.

- A federal change may result from an IRS adjustment to the taxpayer's federal return,
- An IRS audit examination (RAR), or
- The taxpayer filing a federal amended return accepted by the IRS.

For Illinois purposes, the taxpayer is obligated to report the federal change whether or not it creates a change in Illinois income tax liability.

- When the federal change results in an overpayment, IITA § 911(b) allows a refund claim to be filed for that overpayment at any time within 2 years after the federal change notification is due.

Situations may arise where a taxpayer gives an auditor a copy of the federal RAR or summary work papers for inclusion into the audit. This does not meet the requirements for reporting a federal change that increases tax or for claiming a refund. IAC § 100.9200(a)(4) gives the procedures for reporting a federal change. This regulation also provides guidance on when a federal change (RAR) is considered finalized for reporting purposes under IITA § 506(b).

- The two-year statute of limitations to issue a Notice of Deficiency also commences to run on the "received date" of the return. Ref: IITA § 905(e)
    - An executed Form IL-872 may be obtained to extend the statute of limitations on a federal RAR if necessary.

C. Forms Required

IITA § 909(d) states that every claim for refund shall be filed with the Department in writing in such form as the Department may by regulations prescribe, and shall state the specific grounds upon which it is founded.

Example 1

Corporation A has an automatic extension through October 15, 2008 to file its IL-1120 for the year ended December 31, 2007. Corporation A files its 2007 return on June 30, 2008. Corporation A has until October 15, 2011 to file a claim for refund on this original return.

Example 2

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Corporation A filed timely IL-1120's for the calendar years 2000, 2001 and 2002. In 2009, an Illinois audit is performed on the 2000, 2001 and 2002 IL-1120's due to the finalization of a federal RAR. The Illinois audit resulted in a proposed liability for each year of $10,000, $20,000 and $30,000, respectively. On April 24, 2009 Corporation A paid the entire audit liability of $60,000.

For the calendar year 2003 Corporation A incurred a federal net operating loss which (for Illinois purposes) was never carried either back or forward to offset income. Corporation A would have until April 23, 2010 to file a claim carrying back the 2003 NOL to 2000 and offsetting up to $10,000 in tax for that year. The claim could not reduce the 2000 tax liability by more than $10,000.

Example 3

A claim postmarked September 15 and physically received by the Department on September 18 would be "deemed filed" by the Department on September 15.

If the taxpayer has evidence that its claim for refund was, in fact, postmarked earlier than the date the Department has recorded as the filing date The evidence may be submitted by the taxpayer to substantiate timely filing. This evidence can be in the form of a certified mail receipt or some other persuasive evidence sufficient to indicate the postmark date.

D. IL 872- Claim for refund

Under IITA § 911(c) and the instructions on Form IL-872, a claim for refund may be filed within 6 months after the date stated on the IL-872. For information regarding the acceptability of telefaxed IL-872's, refer to Chapter 20.

IAC § 100.9400(f)(2) specifies the date on which the Department will consider a claim for refund as having been filed.

- When filing a claim for refund, taxpayer should attach two photocopies of page one of the claim being filed and request in writing that one photocopy be date-stamped and returned to the claimant as a receipt.
- Upon receipt of the claim, the Department's designee will stamp the photocopies with the Department's Date Received Stamp and initial it for validation purposes.
  - One receipted photocopy mailed to the claimant.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- If no such validated photocopy is attached to the claim form, or if there is any dispute over the actual filing date, the taxpayer will have to provide proof of timely mailing. Therefore, a claim may have two actual filing dates:

  a) The actual filing date based on the postmark date (envelope date).

  b) The date ten days prior to the date the claim was received by the Department, if the claim was received without a legible postmark affixed to the envelope. This date is called the "deemed filing date" and is the date that is retained in the Department's records for claims. Ref: IAC § 100.9400(f)(2).

E. Unitary business groups

Under IAC § 100.5220(b), the designated agent of a unitary business group filing a combined Illinois return will sign the IL-872 in its name and this signature is binding on all other electing members.

F. Composite returns procedures

When obtaining a waiver (IL-872) for an IL-1023-C return, it is not necessary to get two separate waivers for the entity and the IL-1023-C filer.

Only one waiver is needed with a note on its face for both the entity (IL-1065, IL-1120ST, IL-1041, etc.) and the 1023-C. The same FEIN is used for both return types, therefore the entity and IL-1023-C could be in parenthesis following the FEIN.

Note: IL-1023-C will no longer be used for tax years ending on or after December 31, 2014

G. Notice of Claim Denial (Notice of Proposed Claim Denial)

For claims filed with the Department on and after July 1, l983 which the Department has failed to approve or deny the claim within 6 months from the date the claim was filed may be protested. On or after July 1, 2013, a protest with the Illinois Independent Tax Tribunal may be filed for matters subject to the jurisdiction of the Tax Tribunal. Ref: PA 83-818 and IITA § 909(e)

Per IITA § 909(f), if the Department denies a claim in writing prior to the 6-month period, the taxpayer has 60 days after the issuance of the notice

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

of denial to file a protest or a petition with the Tax Tribunal as provided by IITA § 910(a).

- If a protest is filed the Department will:
  - Review the claim,
  - If requested, grant the taxpayer a hearing within 6 months after the date such request is filed.

Per IITA § 909(g), an overpayment of tax shown on the face of an unsigned return shall be considered forfeited to the State if after notice and demand for signature by the Department the taxpayer fails to provide a signature and 3 years have passed from the date the return was filed.

Note: The Department will not accept a protest filed with a claim as timely. The protest is premature if filed prior to a denial of the claim or expiration of the six-month period. Ref: Sunshine Letter IT83-0112..

H. Separate Accounting/Special Apportionment

For the 1988 tax year and after, the instructions on the form IL-1120 figuring income allocable to Illinois were amended to read the following:

- If you fail to provide complete apportionment and allocation information, we will consider 100 percent of business income being attributable to Illinois for taxation purposes.

Note: If a taxpayer files an original return reporting zeroes for all financial information, the taxpayer is treated as having filed an original return.

Important: When auditing a non-filer, verify the legitimacy of payments made under IITA § 601(b)(2) (estimated payments made pursuant to Article 8 and 602(a) (extension payments made pursuant to Section 505).

- If a return is not filed within 3 years of its due date relative to the taxable year which payments are made the taxpayer must forfeit any overpayment subsequently discovered for this taxable year when a return is finally filed. Ref: IITA § 911(f)

For more information regarding the forfeiture of excess payments, refer to Chapter 20.

IX. STATUTORY CONTROL

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Recognizing applicable statutes of limitation and insuring the correct control over them should be a primary concern of all auditors and their supervisors. If statutes expire on cases under audit, disciplinary action can result. When statutes are in jeopardy of being lost, the supervisor should be notified immediately. **It is the Revenue Auditor Supervisor's (RAS) primary responsibility for monitoring statutes to ensure that no periods are lost to the statute of limitations on any cases.**

IF REVIEW RESULTS IN LESSER O/P OR $0	If above periods have expired, claim can be reduced to zero at any time	Lewis v Reynolds, 284 US 281, 52 Ct145 (1932)

A. Mandatory audits

Mandatory audits are those cases where the previous audit produced an established liability [redacted].

Audit Planning Section will generate a follow-up assignment from the end of the prior audit period. Audit Planning will enter the beginning audit period and statute date in GenTax.

Management is to ensure that no periods are lost to the statute of limitations on such cases. If any waivers are secured, GenTax should be updated to reflect the new expiration date.

Copies of all waivers are to be maintained by immediate supervisors until the audit is completed.

Should Management foresee the possibility of lost audit periods on mandatory audits, they should attempt to reassign such accounts within the field office. If this is not possible, the Division Manager is to be notified at the earliest possible date to allow for transfer of accounts to another field office prior to statute expiration.

B. Non-mandatory audits

All non-mandatory cases (i.e. Inventory Selection, Referrals, and Field Requests) are assigned on a First-In, First-Out basis (FIFO). Exceptions to this are geographical areas and auditor-level classification.

In the case of non-filers, it will be necessary for the auditor to commence the assignment in order to determine the beginning of the audit period. Once this determination is made, this date is to be entered in the appropriate GenTax field.

If there is no statute of limitations, 12/31/9998 should be entered in the GenTax statute date field.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

C. Audit procedure

There must be four months of statute remaining on a completed income tax audit prior to transmittal to the Income Tax Technical Review Section in Springfield.

In addition, make sure to allow sufficient lead-time to follow the Informal Conference Board (ICB) procedures that are in Chapter 20. Income Tax Audit Procedure.

A waiver of statute of limitations for all Income Tax audits is required no later than four months prior to the expiration of the statute of limitations.

If you cannot secure the waiver before above-stated period, all audits are to be transmitted to Income Tax Technical Review.

Once received by Income Tax Technical Review Section or Audit Perfection Section with the required four months left on the statute, responsibility for securing subsequent waivers lies with these sections.

1. General

An amended return reporting an increase to a tax liability, which is not due to a federal audit, may be filed at any time. An amended return reflecting a reduction in Illinois tax liability is referred to as a claim for refund ("claim"). A claim must be filed with the Department no later than 3 years after the automatic extension date or the date the return was filed, if filed after the extension date, or one year after the date the tax was paid, whichever is later. Ref: IITA § 911(a)(1), 911(e)

X. AMENDED RETURNS

A. Other State changes

Under IITA § 911(b), before September 11, 1989 a taxpayer could file a claim for refund within 2 years after the date notification of the state change was due (120 days from the date the change was finally determined or agreed to).
Ref: IITA § 506(b)

- After September 11, 1989, deleted from section.

For more information on state and federal changes, refer to Chapter 29

B. NOLs occurring on or after December 31, 1986

IITA § 911(g) provides a special statute of limitation on net operating losses (NOLs), which occur in tax years ending on or after December 31, 1986.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

These losses are referred to as Illinois net losses. An Illinois net loss may be carried back any time within whichever of the following expires later:

- 3 years from the automatic extension date of the loss year return, OR
- The extension period agreed to on Form IL-872 for the loss year, plus six months.

For more information regarding the IL-872, refer to the (Extensions - Form IL-872) section.

Example

Corporation A filed its calendar year 1986 Illinois return September 15, 1987. The taxpayer includes a copy of their 6-month federal extension with the return. The return reflected an Illinois net loss, which Corporation A could carryback to 1983. Under IITA Section 911(g), Corporation A has until October 15, 1990 to file an amended return to carryback the Illinois net loss.

On February 15, 1990, Corporation A signs Form IL-872 extending the statute of limitation for the 1986 return to June 30, 1991. Corporation A now has until December 31, 1991 to file an IL-1120-X to carryback the 1986 Illinois net loss.

XI. BANKRUPTCY

The filing of bankruptcy by a taxpayer will not necessarily alter normal audit procedure when an audit is required to establish a tax liability. When necessary, waivers should be obtained to protect the statute. The statutory period of assessment is still valid and does not change as result of the taxpayer filing bankruptcy. However, all work on an audit with a taxpayer in bankruptcy should be completed at least two weeks prior to the bankruptcy claim date.

BANKRUPTCY TRUSTEE

A bankruptcy trustee may submit a tax return during the administration of a case and request a determination of unpaid liability by the governmental unit charged with responsibility for collection or determination of the tax. The trustee, debtor, and any successor to the debtor is discharged from any liability for unpaid tax of the bankruptcy estate if the governmental unit to whom the request was made does not notify the trustee within 60 days of the request that such return has been selected for examination. If the return is selected for examination, the governmental unit must notify the trustee of any tax due within 180 days after the request or within the additional time permitted by the Court.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

XII. ILLINOIS NET LOSS CARRYBACK

PA 88-195 amended IITA §905(g) to state,

> ...in any case in which there has been a refund payable under this Act attributable to a net loss carryback as provided for in IITA Section 207 [i.e. an Illinois Net Loss carryback], and that refund is subsequently determined to be an erroneous refund due to a reduction in the amount of the net loss which was originally carried back, a notice of deficiency for the erroneous refund amount may be issued at any time during the same time period in which a notice of deficiency can be issued on the loss year creating the carryback amount and subsequent erroneous refund. The amount of any proposed assessment set forth in the notice shall be limited to the amount of such erroneous refund.

The amendments to IITA §905(g) which were enacted by PA 88-195 are effective as of July 1, 1993 for all erroneous refunds for which the time period for issuing a Notice of Deficiency for their recovery is still open.

Prior to this legislation if a taxpayer filed a claim carrying back an Illinois net loss and requesting a refund and the refund was issued, the Department had to issue a Notice of Deficiency to recover the amount of the refund which was later determined to be erroneous within 2 years of the date the refund was issued.

If an auditor extended the statute on the loss year but failed to extend the statute on the carryback year (or did not begin the audit on the loss year) within 2 years from when the erroneous refund was issued, the Department was unable to recover any money refunded in error. This required the Audit Bureau to monitor Illinois net loss refund statutes to prevent any revenue from being lost.

Because of the amendment contained in PA 88-195, the Department may recover any money erroneously refunded due to the carryback of an Illinois net loss at any time during the same period for issuing a notice of deficiency on the loss year. If the statute of limitation was extended on the loss year, the statute of limitations for recovering any erroneous refund was automatically extended.

Example

On October 17, 1994, Corporation ABC, a calendar year taxpayer, filed its IL-1120 for 1993 reflecting an Illinois net loss of $100,000. On December 1, 1994, ABC filed an IL-1120X for 1990 carrying back its INLD of $100,000 and

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

requesting a refund of $7,300. The refund (plus interest) issued January 15, 1995. Since the Department can examine the 1993, IL-1120 and issue a Notice of Deficiency at any time prior to October 17, 1997. The Department also has until October 17, 1997 to issue a Notice of Deficiency to recover any of January 15, 1995 refund is determined to have been refunded in error due to an incorrect amount of Illinois net loss being carried back. If the statute of limitations for issuing a Notice of Deficiency on the 1993 IL-1120 is extended, the statute for recovering any part of the January 15, 1995 refund determined to be erroneous is automatically extended.

XIII. NOLS AND ARTICLE 2 CREDITS

For more information regarding net operating losses, refer to Chapter 35.

Note: IITA § 207(d) suspended net loss deductions for tax years ending after December 31, 2010 and prior to December 31, 2014. IITA § 207(d) was then further amended to change the suspension to a $100,000 cap on the net loss deduction for tax years ending on or after December 31, 2012, and prior to December 31, 2014.

For more information regarding Article 2 credits, refer to Chapter 36.

When examining net operating losses and Article 2 credits it is important to remember that the statute of limitation provisions of the IITA apply to the issuance of a Notice and Demand, a Notice of Deficiency, a Notice of Claim denial and to the filing of a claim for refund. THERE IS NO STATUTE OF LIMITATIONS ON THE CORRECTION OF A RETURN. Ref: IRS Rev. Rul. 81-87, 1981-1 CB 580, IRC Sec(s). 6402 and 81-88, 1981-1 CB 585, IRC § 6511 respectively.

A. Increase Illinois Net Loss Deduction (INLD) Carry Forward (C/F)

Corporation DEF filed its IL-1120 for calendar year 2002 on October 15, 2003. On its IL-1120 for 2002, DEF reported Illinois income of $50,000 and properly and timely paid the resulting tax liability.

In January of 2007, DEF discovered that their Foreign Source Dividend subtraction had been understated. Correcting the subtraction modification would result in an Illinois Net Loss for 2002 of $20,000. Since the statute of limitations to file a claim for 2002 has expired, DEF cannot request a refund of any liability paid in 2002. However, DEF can correct the 2002 return to reflect the proper amount of Illinois Net Loss. DEF can also file a claim to carryforward the INLD to the 2003 return to offset income and reduce the 2003 tax liability. [Note – again, the years were changed to avoid the limitations on increasing a net loss in IITA § 911(g).

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

There is also no prohibition against creating, increasing, decreasing or eliminating the amount of Article 2 credits in a closed year. Again, no deficiency or refund may be established or claimed in the closed year but the proper amount of credits available to be carried into other open years may be determined at any time. This position is supported by IRS Revenue Ruling 82-49, which states; in part the following:

The failure to claim investment tax credit on qualified section 38 property placed in service in a year for which the period of limitations for filing a claim for credit or refund has expired...does not prevent any "unused credit" from the closed year being carried over to an open year...

B. **Unclaimed RTIC**

Corporation GHI files its calendar year 2000 IL-1120 on October 15, 2001. GHI reports a Replacement Tax liability of $10,000 on the 2000 return. In March of 2005, GHI discovers that it should have claimed a RTIC of $20,000 on its 2000 IL-1120. Since the statute of limitations for filing a claim for 2000 has expired, GHI cannot receive a refund of the Replacement Tax paid for 2000. However, GHI can correct the 2000 return to reflect the proper amount of RTIC and excess RTIC available to carry forward to the 2001 return. GHI can then file a claim for 2001 reducing its Replacement Tax liability in that year by the excess RTIC carried forward.

There is also no prohibition against either the taxpayer or the Department correcting the income, factors, credits, etc. in a closed carry year, if no loss or Article 2 credit was ever carried to that year to offset income or claim a refund. The closed year should be corrected to determine the proper amount of loss or Article 2 credits, carried into another carry year for which the statute of limitations is still open for filing a claim or issuing a Notice. This position is supported by numerous federal cases.

C. **Unclaimed Training Expense Credit (TEC) C/F**

Corporation XYZ timely files its calendar year 1999, 2000 and 2001 IL-1120s reporting an Income Tax liability of $30,000, $20,000 and $40,000, respectively. In January of 2005, XYZ discovers that it should have claimed $70,000 of Training Expense Credit in 1999. Since the statute of limitations for filing a claim for refund has expired on 1999 and 2000, XYZ cannot request a refund for those years however, XYZ must still offset the 1999 Training Expense Credit by the $30,000 of Income Tax liability in 1999 and the $20,000 of Income Tax liability in 2000 to determine the amount of credit available to be carried into 2001. XYZ may then file a claim for refund offsetting $20,000 of its $40,000 Income Tax liability by its 1999 Training Expense Credit carryforward.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

During an audit of the 2001 IL-1120 and IL-1120X, it is discovered that XYZ understated its Illinois income and, therefore understated its Illinois tax liability in 2000 by $15,000. Although the statute of limitations has expired for issuing a Notice of Deficiency on the 2000 return, the amount of 1999 Training Expense Credit carried forward to 2001 can be reduced by $15,000 and $15,000 of the 2001 claim for refund can be denied.

XIV. LIENS AND LEVIES

The Department may file a lien for any tax, penalty or interest on all real and personal property of any person assessed with a tax that has neglected or refused to pay the tax after a Notice and Demand has been issued. Ref: IITA § 1101(a)

However, a lien created by such assessment terminates unless the Department files a notice of lien in accordance with IITA § 1103 within 3 years from whichever of the following is applicable:

- The date all proceedings in court for the review of such assessment have terminated. Ref: IITA § 1101(d), 902(b).
- The time for taking the proceedings to court expires without the action taken. Ref: IITA § 1101(d)902(b).
- The automatic extension date or the date the return was filed, if filed after the extension date with the Department. Ref: IITA § 1101(d).

Note: Sunshine Letters IT 93-0083 provide additional information regarding the periods for filing liens.

IITA § 902(c) also provides that the Department may bring a court action for the recovery of taxes at any time within the period allowed by IITA § 1109 to commence proceedings for a levy, regardless of whether a lien has been filed. Under § 1109, a proceeding for a levy cannot begin more than 20 years from the date of filing a notice of lien or if no lien was filed, from the expiration of the three-year statute for filing the lien.

Example

A 2005 return is filed August 12, 2006 (deemed filed on the automatic extension date of October 15, 2006, the three-year statute for filing a lien expired October 15, 1999. However, since IITA § 1109 allows 20 years in which to commence a levy, IITA § 902(c) collection activity may be brought at any time prior to October 15, 2019.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

The Illinois Business Corporation Act (IBCA) of 1983, Section 12.80 (Ill. Rev. Stats, Ch. 32, Para.12.80 (Supp. 1988), currently found under 805 ILCS 5/12.80) however, limit an action against a dissolved corporation. Under that section, an action or proceeding to enforce a civil remedy available against a dissolved corporation for any right or claim existing, or any liability incurred, prior to such dissolution must be commenced within 5 years after the date of such dissolution.

XV. FRAUD

Prior to January 1, 1993, the statute for civil fraud was covered under IITA § 905(c). As of January 1, 1993, Civil Administrative Code (CAC), Section 39c-4 was added by PA 87-1246 and set forth limitation periods for the assessment of taxes by the Illinois Department of Revenue. This section ceased to exist on January 1, 1994 when PA 87-1129 added the exact same language to the UPIA, § 3-10. Each of these sections however, provides that a Notice of Deficiency may be issued at any time if a false and fraudulent return is filed with the intent to evade the tax imposed by any Act.

The statute for criminal fraud is covered under IITA § 1301. This section provides for criminal prosecution of any person who files a fraudulent return. Prosecution for any act in violation of this Section may be commenced at any time within five years of the commission of the act. (Prior to the enactment of PA 82-1009, which was effective September 17, 1982 action had to be commenced within 3 years) Therefore, if a person files a fraudulent return, the Department has five years from the date that return was filed to prosecute the taxpayer. The "date the return was filed" in this instance, refers to the actual date filed and not the date provided under IITA § 905(h). However, if the statute on actual filing has expired, but the deemed date is still open, the Audit supervisor should contact Technical Support for further guidance as the Department may still want to pursue the fraud prosecution.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

I. PURPOSE OF CHAPTER

The purpose of this chapter is to provide the auditor with the information necessary to determine if an entity and/or its activities have nexus in Illinois, and thus are subject to income taxation based upon these activities.

III. NEXUS DEFINITION

The following definition of nexus is a direct quote from the testimony of Walter Hellerstein before the Subcommittee on Commercial and Administrative Law: Committee on the Judiciary United States House of Representatives. A Hearing on State Taxation: The Role of Congress in Defining Nexus, which was conducted on February 4, 2010.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

> Nexus literally means connection. In the state tax context, nexus generally means the connection that a state must have with a person, property, transaction, or activity in order for a state to exercise its taxing power constitutionally over such person, property, transaction, or activity. Thus the U.S. Supreme Court has said that the Due Process Clause requires "some definite link, some minimum connection between a state and the person, property or transaction it seeks to tax" and that the Commerce Clause requires that a tax be applied only to activities "with a substantial nexus with the taxing state."
>
> The Court has frequently repeated this bedrock principle in a variety of contexts. It has declared that the Due Process and Commerce Clauses of the Constitution do not allow a State to tax income arising out of interstate activities-even on a proportional basis-unless there is a "minimal connection" or "nexus" between the interstate activities and the taxing State…." It has observed that sometimes the nexus question is "whether the State has the authority to tax…at all," and sometimes the nexus question is whether a state that has nexus " with the actor the State seeks to tax" also has the requisite "connection to the activity" that is the subject of the tax. And, in cases in which a state clearly has nexus with the taxpayer and the taxable transaction, such as a use tax-imposed on a state resident, the Court has focused on the "substantial nexus" that the state must have with an out-of-state-vendor to require it to collect the tax.

The determination of nexus for any particular company is important not only in establishing the taxability of the company in Illinois but also in computing the sales factor of the apportionment formula. In order to arrive at the proper amount of throwback sales to be included in the sales factor numerator, the taxability of the company in the sales destination states must be determined. (See new audit manual chapter 27 for the apportionment and throwback of sales.)

IV. NEXUS LIMITATIONS

The states' jurisdiction to tax is subject to three principal limitations.

1. The Federal constitutional limitations of the Commerce Clause and the Due Process Clause;
2. The limitations imposed by the Federal government under its authority to regulate interstate commerce (PL 86-272); and
3. Any limitations a state might itself impose.

A. THE COMMERCE CLAUSE

The Commerce Clause of the U.S. Constitution gives Congress the power "to regulate commerce with foreign nations, and among the several states." The Tenth Amendment to the Constitution provides that any powers not enumerated in the Constitution are

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

reserved for the states. The Commerce Clause has been viewed as both a grant of congressional authority and as a restriction on states' powers to regulate.

In the context of nexus the Commerce Clause prohibits a direct tax on the privilege of engaging in interstate commerce. In the Spector Motor Service, Inc v. O'Connor case (1951), The Supreme Court held that such a tax was in violation of the Commerce Clause if applied against exclusively interstate commerce. (see A.M. chapter 49)

In Northwestern States Portland Cement Co v Minnesota, 358 U.S. 450 (1959) the Court held that a state could tax exclusively interstate commerce as long as the tax did not create any effect forbidden by the Commerce Clause. (new audit manual chapter 49) Net income from operations of an exclusively interstate foreign company could be subjected to state taxation provided that:

- The levy is not discriminatory
- The levy is fairly apportioned; and
- A direct net income tax on a foreign company conducting activities within the taxing State forming sufficient nexus to support the tax levied.

In Complete Auto Transit, Inc. v. Brady, 430U.S. 274 (1977), (see audit manual chapter 49) the Court abandoned the Spector Rule. It also rejected the rigid Commerce Clause doctrine that provided the foundation for the Spector rule. Instead, the Court stressed those factors that were pertinent to the validity of a state tax under the Commerce Clause.

The Complete Auto Transit Court developed a four-prong test to determine whether a state tax is constitutional:

1) The tax applied to an activity that has a substantial nexus with the state;
2) The tax is fairly apportioned
3) The tax does not discriminate against interstate commerce.
4) The tax is fairly related to services provided by the state.

If there is a sufficient "contact" or "nexus" between the taxing state and the non-domiciliary taxpayer, and the tax imposed is fairly related to the non-domiciliary taxpayer's in-state activities, the tax will be upheld.

B. DUE PROCESS CLAUSE

The Commerce Clause specifically authorizes Congress to regulate commerce. The Supreme Court has interpreted this as prohibiting the states from enacting laws taxing out of state companies unless there is a substantial connection.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Unlike the Commerce Clause, the Due Process Clause specifically limits the states power to impose taxes. The Due Process Clause states that no state shall “deprive any person of life, liberty or property, without due process of law”.

The Supreme Court’s case of Wisconsin v. J.C Penney Co., 311 U.S. 435 (1940), is one of the most cited and quoted regarding Due Process. Justice Frankfurter stated:

> That test is whether property was taken without due process of law, or whether the taxing power exerted by the state bears fiscal relation to protection, opportunities and benefits given by the state. The simple but controlling question is <u>whether the state has given anything for which it can ask a return</u>. [emphasis added]

C. <u>PUBLIC LAW 86-272</u>

The second limitation to the states' jurisdiction to tax is imposed by the Federal government's authority to regulate interstate commerce. Under the United States Constitution, a state's net income tax (or a tax measured by income) must not unduly burden interstate commerce and must provide, to the taxpayer, due process of law.

Public Law (PL) 86-272 was passed and became law in 1959, as a reaction to a holding by the U.S. Supreme Court that a state could impose a tax on net income of a corporation derived from its activities within the state even though such activities were exclusively in interstate commerce. Northwestern States Portland Cement Co. v. Minnesota, 385 U.S. 450 (1959). REF: I00638.

PL 86-272 applies only to the sale of tangible personal property in interstate commerce. It precludes a state from imposing an income tax upon a person whose activities within a state do not exceed specific limits. This immunity from tax is limited to activities considered to be merely solicitation of orders for the sale of tangible personal property. Activity beyond the mere solicitation of orders can subject an out-of-state corporation to tax.

V. <u>GENERAL LIMITATIONS ON PL 86-272</u>

PL 86-272 affords no protection to a taxpayer who is incorporated in the State into which sales are being made. Also, since PL 86-272 applies only to sales of tangible personal property, it does not pertain to persons whose business activities consist of:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

1. Selling or providing of services;

2. Leasing, renting, licensing or disposition (other than by sale) of personal property;

3. Selling, leasing, renting, licensing or otherwise disposing of real estate, intangibles or any other type of property;

4. Sales which involve a mixture of tangible personal property and services, for example:
   - Photographic development,
   - Fabrication of customer's materials,
   - Installation of equipment, and
   - Architectural and engineering services.

   See Amway Corporation v. Missouri court case in the Audit Manual 37. (new Chapter 49)

   Note: State of Incorporation/Certificate of Authority. The state in which a company is incorporated has the authority to tax that company regardless of the amount of business activity that it conducted in the state. Also, any individual who is domiciled in or a resident of the state is considered taxable in that state.REF: PL 86-272, Sec.101(b).

VI. ILLINOIS INCOME TAX ACT

The third limitation to a state's jurisdiction to tax is any statutory limitation the state chooses to impose on itself. PA 88-361, which became effective August 16, 1993, created Section 205(f) of the Illinois Income Tax Act. This provides that a person not subject to tax under the IITA, will not become subject to the tax by:

- owning property at a printer in Illinois under contract;
- a person's employees at a contracted printer solely for quality control, distribution.

A person under this situation is defined under Section 1 of Title 1 of the US Code as being corporations, associations, firms, partnerships, societies, joint stock companies and individuals.

VII. SOLICITATION

The term "solicitation" is not defined by statute. Illinois interprets the term narrowly by concluding that any activity beyond the mere solicitation of orders will subject an out-of-state corporation to tax.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Supreme Courts review of the Wisconsin v. William Wrigley, Jr. Co. case (see court cases, audit manual chapter 49) involved the use of two tests for determining the scope of the term “solicitation” of orders.

1. Solicitation of orders falls "...between those activities...that serve no independent business function apart from their connection to the solicitation of orders (ancillary functions) and those activities that the company would have reason to engage in any way but chooses to allocate to its in-state sales force."

2. A de minimis rule applies for activities which go beyond solicitation of orders, however, "...whether in-state activity other than "solicitation of orders" is sufficiently de minimis to avoid loss of the tax immunity, depends on whether that activity establishes a nontrivial additional connection with the taxing State."

Using these two new rules the Court found that Wrigley’s activities exceeded “solicitation” and, therefore, Wrigley was taxable in the state of Wisconsin.

After the Wrigley decision, Illinois developed regulations on nexus which became effective on June 22, 2001. (See IAC § 100.9720)

IAC § 100.9720(c)(2)(C) defines solicitation as the speech or conduct that explicitly or implicitly invites an order. And, activities that neither explicitly or implicitly invite an order but are entirely ancillary to invitations for an order are considered solicitation. To be ancillary to invitations for orders, an activity must serve no independent function for the seller other than the solicitation of orders.

Activities that do not fall within this definition will cause the company to lose the protection under PL 86-272 unless these activities, taken together are de minimis. Activities are considered de minimis activities when they are taken together and establish only a trivial connection within this State. REF: IAC § 100.9720(c))2)(D)

- An activity conducted in this State on a regular or systematic basis or company policy is not considered trivial.
- An activity will be measured on a qualitative and quantitative basis for consideration of a trivial nature.
- Trivial determination is made on the basis of the taxpayer’s entire business activity, not just Illinois activities.
- An unprotected activity would not be de minimis if it was the only activity in this State.
- Amount of unprotected activities conducted relative to protected activities is not determinative to issue of de minimis.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- An unprotected activity that would not be deminimis if it were the only activity conducted in this state shall not be deminimis if done with a substantial amount of protected activities.

  Companies in the business of selling tangible personal property whose only connection with Illinois consists of being qualified to do business in the state (i.e. having a certificate of authority to do business in Illinois) have not exceeded the provisions of PL 86-272. REF: Sunshine Letter IT89-0199.

VIII. EXTENDED IMMUNITY – INDEPENDENT CONTRACTORS

Extended immunity exists under PL 86-272 for independent contractors. Independent contractors may not only solicit but approve or reject sales within a state as long as delivery of the merchandise is from an out-of-state location. REF: IAC § 100.9720(c)(6)

PL 86-272 contains its own definition of an “independent contractor” entitled to this extended immunity. Only a “commission agent” who holds himself out as selling goods for two or more principals qualifies for this immunity. A salesman working only for the taxpayer does not qualify, even if he is an independent contractor in the usual meaning of that term.

IX. EXAMPLES OF ACTIVITIES CREATING NEXUS IN ILLINOIS

A complete listing of activities that create nexus is contained within the regulations, these appear in IAC § 100.9720(c)(4)

A. EXAMPLES NOT CREATING NEXUS IN ILLINOIS

A complete listing of activities that do not create nexus is contained within the regulations, these appear in IAC § 100.9720(c)(5).

X. SERVICE TAXPAYERS

Since service taxpayers do not fall under the protection of PL 86-272, preconceived ideas of activities such as solicitation, sales offices, etc. are not governing factors in establishing nexus. A service taxpayer is generally considered to have nexus in Illinois if any of its business or nonbusiness income would be apportioned or allocated to Illinois under the provisions of Sections 301-304 of the IITA.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Although it would appear that there would be greater latitude in establishing nexus in these cases, the voiding of PL 86-272 protection actually places a much heavier responsibility on an auditor to gather enough data to provide a defendable position in case the taxpayer disagrees with the auditor's conclusion.

Prior to December 31, 2008 Illinois used a cost of performance basis to source sales of service to this state. Cost of performance methodology provides that the sale is assigned to the state in which a greater proportion of the income producing activity was performed. (see Historical Extracts and Appendix section)

For all tax years ending after December 31, 2008, Illinois changed the method of allocating the sales of service from a cost of performance approach to a market based approach. Currently Illinois is one of thirteen states that use the market based sourcing approach for the allocation of sales of services in the computation of the sales factor. As of November 1, 2012 the following states used market based sourcing rules:

> **Alabama, Arizona, California, Georgia, Illinois, Iowa, Maine, Maryland, Michigan, Minnesota, Oklahoma, Utah, Wisconsin.**

REF: AICPA Tax Advisor, November 1, 2012.

In the market based approach the sales of services are assigned to the state in which the service is received. (See IITA 304(a)(3)(C-5)(iv))

- Gross receipts from the performance of services provided to a corporation, partnership, or trust may only be attributed to a state where that corporation, partnership, or trust has a fixed place of business
- If the state where the services are received is not readily determinable or is a state where the corporation, partnership, or trust receiving the service does not have a fixed place of business, the services shall be deemed to be received at the location of the office of the customer from which the services were ordered in the regular course of the customer's trade or business.
- If the ordering office cannot be determined, the services shall be deemed to be received at the office of the customer to which the services are billed.

IITA § 304(a)(3)(C-5)(iv) contains a “throw out” provision that provides that if the taxpayer is **not taxable** in the state in which the services are received, the sale must be excluded from both the denominator and the numerator of the sales factor.

(Refer to audit manual new chapter 27, apportionment for discussion of this topic)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

A. FOREIGN TREATY SITUATIONS

IAC § 100.3200(a)(C) describes the treatment of sales conducted in a foreign country. In a foreign country or political subdivision of a foreign country the determination of whether a state has jurisdiction to subject the taxpayer to a net income tax will be treated as if it were a state of the United States or political subdivision thereof. If a person is not required to pay a net income tax by a foreign country as the result of a treaty provision exempting certain persons, business activities or sources of income from tax then this person is considered not subject to tax. For the purposes of services, this income would be thrown out of the denominator under IITA § 304(a)(3)(C-5)(iv).

XI. OUT-OF-STATE FRANCHISERS

The franchiser typically receives payments from a franchisee for the right to use a name, as well as for guidance as to the management of the business and for accounting services. The fact that a franchiser does not fall under the protection from state taxation under PL 86-272 does not necessarily mean that performance of these services within the state will automatically constitute nexus. Nexus is not a clearly defined issue and all the facts must be examined closely.

IAC § 100.9720(c)(4)(R) states that the following are unprotected activities under PL 86-272 within Illinois:

- entering into franchising or licensing agreements;
- selling or otherwise disposing of franchises and licenses; or
- selling or otherwise transferring tangible personal property pursuant to such franchiser or licensor to its franchisee or licensee.

Even if nexus is established, the apportionment of some or all of the taxpayer's business income to Illinois, and therefore creation of an Illinois tax liability, will not occur unless the royalty payments can be allocated to Illinois for purposes of the Illinois sales factor numerator using the test contained in IITA § 304(a)(3)(C)(ii) (i.e. location of income producing activity). If the income producing activity is performed wholly within Illinois or if a greater proportion of the activity is performed within Illinois than is performed in any other state (based on costs of performance), the receipts from the franchise would be attributable to Illinois for purposes of the sales factor and an Illinois tax liability could exist. REF IAC § 100.3370(c)(3)

The income producing activity which is associated with the franchise may include such activities as:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1. Actually receiving franchise royalty payments within the state;

2. Local (in-state) management training courses; and

3. Frequent visits to the franchisee to consult on business matters and occasional visits may create nexus depending upon the nature and length of the visits.

XII. CORPORATE PARTNERS

A corporate partner whose only contact with Illinois consists of an interest in a partnership doing business in Illinois is considered to have nexus in Illinois. This is true regardless of whether the interest is a limited or a general partnership interest. REF: Borden Chemicals and Plastics, L.P. v. Zehnder, 726 N.E. 2d 73, 312 Ill. App. 3d 35 (1st Dist. 2000).

XII. UNITARY BUSINESS GROUPS

Illinois statutes and regulations are based on the application of the Joyce Rule, Ref: IAC § 100.9720(f). When dealing with a unitary group of companies, nexus must be determined for **each** member individually, based on each company's own activities within the state. Even if the unitary group elects to file a combined Illinois return (available for tax years ending on or after December 31, 1985) and, in effect, is treated as one taxpayer in many respects, the taxability of each member of the group is still determined based on that member's activities within the state. This is true because combined apportionment is only an apportionment method; it does not create new Illinois taxpayers.

XIV. HISTORICAL EXTRACTS / EXHIBITS

A. PRIOR TO TYE 12/31/08 SERVICE TAXPAYERS

Section 304(a)(3)(C) states that sales, other than sales of tangible personal property, are in this State **prior to December 31, 2008** if:

- The income producing activity is performed in this State or;

- The income producing activity is performed both within and without this State and a greater portion of the income producing activity is performed within this State than without this State, based on cost of performance.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Under this provision, nexus would rarely be an issue for a taxpayer deriving all of its income from sales other than sales of tangible personal property. A service provider whose connection with Illinois was small enough to raise the nexus issue would almost never have sufficient income-producing activity in the State to source any of its sales to Illinois, while a service provider who had sufficient income-producing activity in Illinois to source a sale here would almost certainly have nexus.

B. NEXUS RELATED QUESTIONNAIRES

Determining whether a taxpayer has nexus is extremely fact-specific. It is imperative that taxpayer be asked a comprehensive set of questions to establish nexus during the audit. Simply being passive during the audit and asking the taxpayer to demonstrate the non-existence of nexus is an insufficient determination that may not hold up if protested.

Specific activities that go beyond mere solicitation and are unprotected by PL 86-272 are listed within IAC § 100.9720(c)(4). This is one of the areas of focus on the determination of whether or not a company has nexus with Illinois. The nineteen unprotected activities listed in subsection (c)(4)(A)-(S) can be researched by asking the taxpayer specific questions on these activities; using a questionnaire such as the **Multistate Tax Commission Business Activity Questionnaire.** This questionnaire may be referenced in an internet search simply by searching this title. A brief example is given below and a more comprehensive questionnaire is presented at the end of the chapter.

Example

The unprotected activities described in IAC§ 100.9720(c)(4)(A)-(F) are listed with corresponding question(s) from the MTC Business Activity Questionnaire which are in italics.

- A) Making repairs or providing maintenance or service to the property sold or to be sold.
  - *(13) Service or repair equipment or property of your customers in this state? Yes____ No ____*
  - *(16) Provide your customers in this state with technical information or advice? Yes ____ No ____*

- B) Collecting current or delinquent accounts, whether directly or by third parties, through assignment or otherwise.
  - *(18) Collect installments and/or delinquent accounts?*

Yes ____ No ____

- *(19) Repossess the company's products? Yes ____ No ____*
- *20. Does anyone acting on your company's behalf repossess products in this state? Yes ____ No ____*
- *21. Do employees in this state ever repossess products in this state? Yes ____ No ____*

- C) Investigating credit worthiness.
  - *(20) Investigate, recommend, or appoint potential dealers? Yes ____ No ____*

- D) Installation or supervision of installation at or after shipment or delivery.
  - *(14) Perform any installation or construction work within this state? Yes ____ No ____*
  - *18. Does your company have employees who install your product either by doing the actual installation or by supervising the installation by others?*
  - *Yes ____ No ____*

- E) Conducting training courses, seminars or lectures for personnel other than personnel involved only in solicitation of sales of tangible personal property.
  - *(16) Provide your customers in this state with technical information or advice? Yes ____ No ____*
  - *10. Does your company perform engineering functions in this state? Yes ____ No ____*

- F) Providing any kind of technical assistance or services, including, but not limited to, engineering assistance or design service, when one of the purposes of the assistance or service is other than the facilitation of the solicitation of orders
  - *(21) Conduct training courses or schools for your customers or dealers? Yes ____ No ____*

Note: For any "yes" answer, the taxpayer should furnish a written explanation. Conduct of activities must still exceed a de minimis threshold, in order for nexus to be established. However, an activity conducted within this State on a regular or systematic basis or pursuant to a company policy (whether such policy is in writing or not) is not normally considered trivial. Ref: IAC § 100.9720(c)(2)(D)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

C. ECONOMIC NEXUS

Illinois has not yet applied the economic nexus theory. Thirty states currently have provisions allowing some form of economic nexus. This section is strictly for informative purposes.

The concept of economic nexus is that a state may exercise its taxing authority over an out- of- state person who has no physical presence in that state but has an economic presence. The value of corporate trade names, trademarks, intellectual properties, intangible properties and services generate income even when there may be no physical presence, employees, or property within a non domiciliary state.

The Supreme Court ruled in 1967 that a state was barred by the Due Process Clause and the Commerce Clause from requiring an out-of-state vendor to collect **use** tax in the state of sale when the only connection was the solicitation of orders through mailed advertisements which orders were then shipped via mail or common carrier. In National Bellas Hess v. The Illinois Department of Revenue and in the 1992 case of Quill v. North Dakota the Supreme Court upheld this prohibition regarding use tax.

However, in Quill the court stated: "With certain restrictions, interstate commerce may be required to pay its fair share of state taxes", and " it was not the purpose of the commerce clause to relieve those engaged in interstate commerce from their just share of the state tax burden even though it increases the cost of doing the business." Quill v. North Dakota, 504 U.S. 298, 310 n. 5. The Court stated that a challenge against the Commerce Clause would be sustained so long as the tax met Complete Auto's four-part test. (See Complete Auto Transit in Commerce Clause Section above.)

Based on statutes, regulations, court decisions, or administrative announcements there are thirty states that currently allow for some form of economic nexus similar to the Geoffrey v. South Carolina case:

Washington, Oregon, Idaho California, Utah, Arizona, New Mexico, Colorado, Oklahoma, Arkansas, Louisiana, Iowa, Minnesota, Wisconsin, Michigan, Indiana, Ohio, Kentucky, West Virginia, North Carolina, South Carolina, Florida, Maryland, Delaware, New Jersey, New York, Connecticut, Massachusetts, New Hampshire, and Maine.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

With the exception of Arizona, these states also have provisions for economic nexus for financial institutions along with Idaho and New York City. REF Ernst and Young 03/29/2011.

1. Court Cases

There have been numerous court cases involving the issue of economic nexus. Four significant economic nexus cases are listed below with a summary of the issue(s).

- *Geoffrey v. South Carolina Tax Commission*, 437 S.E.2d 13, 18 (1993). The regular exploitation of a states marketplace, without physical presence, should subject a corporation to the states jurisdiction to impose an income tax. The Commerce Clause physical presence requirement established in Quill was not applicable to income tax cases. Additionally, the court held that the presence of intangible property within the state was sufficient to establish nexus.

- *Lanco, Inc v. Dir., Div. of Taxation*, 188 N.J. 380 (2006). The court held that New Jersey could tax the royalties received by a Delaware holding company even though it did not have a physical presence in New Jersey; and, the Quill physical presence test should be limited to sales and use taxes.

- *Tax Commissioner v. MBNA Am. Bank*, 640S.E.2d 226, 234-36(2006). The West Virginia Supreme Court of Appeals held that MBNA had “purposefully targeted the state and had significant economic presence.” The court held that the exploitation of the local market through “frequency, quantity and systematic nature of a taxpayer’s economic contacts with a state” was sufficient to establish nexus.

- *KFC Corp. v. Iowa Dept. of Revenue*, 792 N.W.2d 308 (Iowa, 2010). KFC, a Delaware corporation domiciled in Kentucky, licensed its trademark to franchisees in various states, including Iowa. The Iowa court held that the Quill physical presence test for sales and use tax did not extend to income tax. Further, the court held that KFC had, “received the benefit of an orderly society within a state” and was therefore subject to taxation. The court held that multiple franchises in Iowa were sufficient to establish the functional equivalent of physical presence.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

2. Attributional Nexus and Affiliate Nexus

In addition to physical presence nexus and the emerging application of economic nexus; attributional nexus and affiliate nexus are being applied by some states on out-of-state sellers and businesses.

Attributional nexus is broader and consists of a state's ability to assert nexus over an out-of-state taxpayer based on the activities of a related or unrelated entity engaging in in-state activities on behalf of the out-of-state retailer.

Affiliate nexus generally requires the existence of common ownership or control between an in-state taxpayer and an out-of-state company in order to create nexus for the out-of-state company.

a) Attributional Nexus

If an out-of-state seller is relying upon the activities of an in-state third party, this may have created nexus by attribution of a third-party's in-state activities when the third party is acting on behalf of the out-of-state seller, and the third party's activities are significantly associated with the taxpayer's ability to establish and maintain a market in this state for the sales.

The Supreme Court's decisions in *Scripto, Inc v. Carson* and in *Tyler Pipe Industries, Inc. v. Washington State Department of Revenue* have supported court rulings for attributional nexus. In invoking attributional nexus, the physical-presence nexus standard is not limited to the taxpayer's own activities. Income tax collection is based on the in-state activities of others for such activities as warranty repair services. PL 86-272 does not protect an out-of-state marketing company's repair activities in the taxing state. Accordingly MTC Nexus Bulletin 95-1 states the view that provision of warranty repair by a third party acting as agent for the taxpayer exceeds solicitation and is not a protected ancillary activity.

On August 2, 2013 an Illinois Administrative Law Judge (ALJ) supported a ruling in favor of the Department in finding that an out-

of-state company had Illinois income tax nexus due to the in-state activities of third-parties. The finding affirmed attributional nexus, in part, due to the out-of state company's registration for sales tax, and in part due to the activities of a third-party. The ALJ concluded that "a foreign corporation may be considered 'physically present' in a state because of the physical presence of independent contractors who are soliciting orders for the seller's goods." Ref: *Department of Revenue v. ABC Company,* Office of Administrative Hearings, No.IT13-05.

b) Affiliate Nexus

Affiliate nexus statutes Affiliate nexus is legislatively defined in various states and often includes situations where:

(1) an out-of-state entity sells to in-state customers,
(2) has an in-state affiliate, and
(3)The in-state affiliate uses identical or substantially similar business names, trademark, or goodwill, or sells similar products;

- or the in-state affiliate has a facility or employees to facilitate or promote sales;
- or the in-state affiliate has a warehouse or distribution center;
- or the in-state affiliate performs repair or maintenance services;
- or the in-state affiliate is a member of the out-of-state entity's controlled group.

Under IAC § 150.201(i)(5) Illinois does recognize affiliate nexus in the application of use tax. This section of the IAC provides that a retailer maintaining a place of business can include: being owned by or controlled by the same interests and engage in the same line of business.

3. Factor Presence Nexus Standard

On October 17, 2002 the Multistate Tax Commission amended MTC Policy Statement 02-02 and created a nexus standard for state business activity taxes: Factor Presence Nexus Standard for Business Activity Taxes. The MTC intention was to present a "simple certain and equitable standard for the collection of state business activity taxes." (Multistate Tax Commission) In its adoption of Policy Statement 02-02 the MTC created the definition of factor presence nexus which has five main considerations.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The first consideration is to define nexus for resident and non-resident entities. Individuals who reside or are domiciled and business entities who are commercially domiciled have substantial nexus within the state.

- The second consideration is the statement of a monetary benchmark to approximate a financial threshold at which an economic nexus is said to exist.

Nonresident individuals and business entities organized outside the state have substantial nexus and are subject to appropriate business activity taxes when in any tax period property, payroll or sales exceeds any of the following thresholds:

(a) a dollar amount of $50,000 of property,
(b) a dollar amount of $50,000 of payroll,
(c) a dollar amount of $500,000 of sales,
(d) or a 25% of total property, payroll or sales.

- The third consideration defines property payroll and sales including property of both a tangible and intangible nature.
- The fourth area of discussion focuses on UBG's.
- The final area of discussion discusses the protection of PL 86-272 and the lack of a states jurisdiction to tax

Factor Presence Nexus Standard for Business Activity Taxes may be viewed in its entirety by searching the internet using the title.

D. NEXUS QUESTIONNAIRE EXHIBIT

Note: The accompanying questionnaire example is targeted towards three factor, IITA 304(a) apportioning companies. Some questions would be formatted differently to research nexus for non IITA 304(a) companies. (transportation, insurance, and financial entities)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

ILLINOIS DEPARTMENT OF REVENUE
NEXUS QUESTIONNAIRE

For Taxable Years _____ Through _____

Company Legal Name_________________________

Company DBA_______________________________

Federal Employer Identification Number

(FEIN)___________________________

1. Does your company, or any affiliated company, now have, or has it at any time had, an office ( ), agency ( ), warehouse ( ) or other place of business ( ) in this state? Y / N

   If "yes", please state for each establishment (use additional sheets if necessary):

   (a) Location:

   ____

   (b) Appropriate beginning date of operation (and ending date if applicable):

   ____

   (c) Nature of the business activity:

   ____

   (d) Telephone number listed in a directory in this state.

   ____

   (e) WATS number for use by caller in this

   state:____

2. Does your company, or any affiliated company, own or rent real or tangible personal property located or being used in this state? Y / N

If "yes",

(a) Complete the following schedule for each year included in the audit. Include all items such as: merchandise, inventories, motor vehicles, railroad cars, office equipment, industrial equipment, buildings and land, etc.

YEAR	OWNED	TYPE	RENTED	TYPE
______	$_______	______	$_______	______
______	$_______	______	$_______	______
______	$_______	______	$_______	______

(b) In what name was the aforementioned property licensed or listed for tax purposes?

____

____

3. Does your company or any affiliated company lease or rent to others (or has it in the past leased or rented) any tangible property located and/or used in this state (such as motor vehicles, office space, industrial equipment, etc.)? Y / N
If "yes",

(a) Describe said property briefly, and state for what years it was rented or leased.

____

____

4. Have you licensed intangible rights for use in this state or sold real estate, services or intangibles in this state? Y / N
If "yes",

(a) Give location, dates and description of property, service or intangibles.

____

____

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

5. Does your company, or any affiliated company, maintain a bank account in a bank in this state? Y / N

6. Does the company have or has it ever had a security interest in any real or personal property sold or located in this state? Y / N

7. Does the company have or has it ever had advertising material in this state which it owned? Y / N

8. Is your company listed in any telephone or building directory in this state? Y / N

9. Does your company engage or has it engaged in any advertising (cooperative or otherwise) in this state? Y / N

10. Were any contracts ever executed by your company in this state? Y / N
If "yes",

(a) Detail location, dates and value of contracts:

____

____

10. Have you had employees or other representatives (such as a broker, manufacturer's agent, etc.) performing services within this state? (If you had employees whose base of operations was in another state, but whose duties includes occasional calls upon customers or clients within this state, answer this question "yes".) Y / N
If "yes",

a) In what year did your employees or other representatives begin performance of these services within this state?

____

Have these services been performed within this state by your employees or other representatives in every year since then?

____

If not please explain:

____

____

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(b) Identification of employees or representatives: (a separate sheet may be used if additional space is needed).

NAME	ADDRESS	TERRITORY COVERED FOR YOUR COMPANY	DESIGNATE IF EMPLOYEE OR INDEPENDENT CONTRACTOR

If the persons identified above are or were engaged in some form of sales or promotional work on your behalf, please complete items (c-1) through (c-13) below to describe their contacts with the customers.

(c) Do any of these employees or representatives:

1) Call upon customers in this state to collect on delinquent accounts? Y / N

2) Make adjustments for returned or damaged merchandise? Y / N

3) Investigate or authorize credit of existing or potential customers in this state? Y / N

4) Investigate complaints of customers in this state? Y / N

5) Authorize warranty work or replacement? Y / N

6) Receive purchase orders when calling upon a customer in this state? Y / N
If yes, do they have the authority to approve or reject the order? _____

7) Accept returned merchandise from customer in this state? Y / N

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

8) Make “on the spot” sales to customers in this state of any items carried by them? Y / N

9) Pick up damaged and/or out-of-date merchandise? Y / N

10) Inspect or have the right to inspect the marketing of your products or any use of your trademarks or tradenames? Y / N

11) Maintain an office of any kind, in a home or elsewhere within this state? Y / N
If “yes”, do they:

Store inventory there? Y / N

Store samples there? Y / N

Maintain a telephone listing under the company’s name? Y / N

Receive any office expense reimbursement from the company? Y / N

12) Assist your customers or their customers in this state in any of the following ways:

Train their employees in the sale, use or servicing of your products? Y / N

If “yes”, where does this take place?

____

____

Plan dealer promotions? Y / N

Call on dealers’ customers accompanied by dealer’s salesmen? Y / N

Inspect dealers’ inventories to insure adequacy? Y / N

13) Sell, or represent, other lines of merchandise besides yours? Y / N
If “yes”, please explain:

____

____

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. 14) Periodically or occasionally service or repair equipment or property of your customers in this state? Y / N

15) Perform any installation or construction work within this state? Y / N

16) Supervise or inspect the installation of products sold to your customers in this state? Y / N

17) Provide your customers in this state with technical information or advice? Y / N

18) Deliver products sold to your customers in this state? Y / N

19) Accept or secure deposits or down payments? Y / N

20) Collect installments and/or delinquent accounts? Y / N

21) Repossess the company's products? Y / N

22) Perform any inspection of the company's products? Y / N

23) Set up merchandising or advertising displays? Y / N

24) Arrange cooperative advertising agreements with customers? Y / N

25) Conduct lectures, films, etc., promoting or demonstrating company's product or service? Y / N

26) Investigate, recommend or appoint potential dealers, agents or distributors of the company? Y / N

27) Call on dealers' customers accompanied by dealers' salesmen? Y / N

28) Perform engineering functions? Y / N

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

29) Conduct training courses or schools for your customers, agents, distributors, etc.? Y / N

30) Provide sales or service manuals to customers, distributors, agents, etc.? Y / N

31) Supervise installation of company's product? Y / N

32) Perform installation, service or repair work? Y / N

33) Handle complaints, trouble shoot or give advice? Y / N

34) Hold meetings? Y / N

35) Reside in this state? Y / N

36) Engage in any other activities not fully explained by the above questions? Y / N
If yes, explain in detail:

____

____

____

____

(d) How does the company compensate such representatives (commission only, salary and commission, expense allowance, etc?)

____

____

(e) Do you have a standard form of written agreement with the representatives? Y / N
If yes, please enclose a copy for our review.

(f) If the salesman's or representative's duties have not been fully covered in the items above, please add sufficient further description as to give a comprehensive description of the services performed.

This manual is not a statement of Department policy. I. PURPOSE

In order to support a determination that companies are engaged in a unitary relationship, the auditor will need to gather documentary evidence. The determination of whether or not a group of companies are involved in unitary business activities is one of the most time-consuming and difficult parts of an audit. The purpose of this chapter is to assist the auditor in making the determination of whether a unitary relationship is present between companies by defining and clarifying what comprises a unitary relationship and to help identify the evidence needed to support this conclusion. However, all companies are not involved in unitary business operations.

See the Exhibits section for more a comprehensive listing of related unitary cases, and chapter 49.

III. IITA Definition OF A Unitary Business Group

The definition of a Unitary business group (UBG) is in Illinois Income Tax Act (IITA) § 1501(a)(27). A UBG is a group of persons related through common ownership whose business activities are integrated with, dependent upon, and contribute to each other.

Key points of IITA § 1501(a)(27) are:

a) Members of a UBG must be related through common ownership.

b) The business activities of the members must be integrated with, dependent upon and contribute to each other.

c) Unitary business activity will ordinarily be illustrated where the activities of the members are in the same line of business or steps in a vertically structured business or enterprise, and in either instance, the members are functionally integrated through the exercise of strong centralized management.

d) UBG's cannot include any member whose business activity outside the United States is 80% or more of the member's total business activity (an"80/20 company").

e) UBGs cannot be comprised of members who are ordinarily required to apportion income under different subsections of IITA § 304. See Audit Manual Chapter 27.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

IITA §1501(a)(27) indicates common ownership as the first requirement for a group of affiliated businesses to be considered as unitary in nature. Corporations must be more than 50% owned by the parent company to meet this test. Secondly, the members will usually be in the same general line of activities or be horizontally or vertically structured. Third, the members will usually be functionally integrated through the exercise of strong centralized management.

IV. DEVELOPING THE UNITARY DETERMINATION

A. IDENTIFYING THE COMPANIES INVOLVED

Gathering information to support the contention that either a unitary business relationship exists or does not exist is a very complex task. The first step in developing a unitary determination is to identify the companies involved, their business activities and relationships. The auditor should prepare a worksheet for the initial process of identifying companies and provide an overview of the types of unitary groupings which may be possible. Information that could be included in the worksheet is:

- Identify the companies by name and FEIN
- Was this company in existence during the audit period?
- Who owns or controls the voting stock of each company and in what percentage?
- Is this company considered to be a standard 3-factor company under IITA § 304(a) or must it use one of Section 304's special apportionment formulas?
- Is this an 80/20 company?
- What is the general business activity of the company (manufacturing, retailing, service, etc.)?
- Any other comments regarding the type of company, its product lines, its relationships with other affiliated companies being examined.

B. SUPPORT FOR THE UNITARY DETERMINATION

Where the evidence to support a unitary definition is found is dependent upon the case at hand. The following guidelines are a SAMPLE of the type of information needed and some possible sources of this information. It is not intended to be a mandatory directive for every case, nor is it meant to be an exhaustive list of guidelines in determining whether a unitary business group exists. Instead, it should be used as a tool in the development of a factual unitary determination. It will be necessary to assess the relative importance of each of the unitary criteria in each audit.

Many facts regarding the general structure of the business entities, their operations during the current year, their future plans and goals, and their interaction with affiliates can be found in such general sources as the Annual Report to the Stockholders, the 10-

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

K Report, the Federal returns, informational publications (such as Mergent Online and Standard and Poor's), magazine articles, etc. Any information obtained from these sources must be examined bearing the purpose of the report or return in mind. For instance, the Annual Report is written by the company to inform the stockholders of the operations, performances and goals of their company. It is also used to sell the company to potential investors. The reliability of the information about the companies must be weighed by this fact.

Information involving some of the internal aspects of the companies can be found in the following:

1. Corporate minutes of the Board of Directors meetings. These minutes can provide background information relating to corporate acquisitions, expansions, personnel transfers, etc. The amount of control exercised by this group of directors over the affiliated group can sometimes be substantiated by reports presented at these meetings.

2. Operating manuals. These manuals often discuss the internal controls and reporting requirements of the organization and may be used to confirm or contradict oral statements made by the taxpayer.

3. Procedures and forms manuals. These manuals might indicate various types of reports that are available, to the extent procedures and forms are standardized throughout the organization. This could provide other sources of information for establishing the existence, or nonexistence, of a unitary business relationship.

   When dealing with any type of manual it is very important to determine the date that the policies, procedures, etc. were put into effect or revised. Make sure to examine the version of the policy or procedure that was being used DURING THE AUDIT PERIOD.

4. Organizational flow charts present graphically a picture of the overall operation. Many of these charts show the chain-of-command or reporting lines and should be obtained.

5. Interviews with corporate personnel. Generally it is wiser to gather as much information regarding the companies, their operations and their relationships as possible before interviewing corporate personnel. These interviews can provide a large amount of information regarding the internal aspects of the corporations. However, their primary importance is to verify documented information or to provide additional sources of information to be examined.
   It is important to interview people who are knowledgeable in the area being discussed. The auditor's primary contact will usually be with the treasurer, director of taxes, tax manager of state and local taxes, controller, or an

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

independent certified public accountant (after obtaining an executed Power-of-Attorney). Their knowledge of the operations might be only general in nature and concerned mainly with record keeping. Answers to questions on specific issues should, therefore, be obtained by contacting individuals with primary responsibility, such as vice-president in charge of sales, an inventory control or distribution director, or someone in charge of payroll and withholding in the account department. Appointments to meet and interview these individuals should be made through proper channels.

6. Internal correspondence and memoranda. The auditor may want to review the general correspondence file of each principal officer. Data contained in the file is generally helpful in establishing unity. Discussions with the officer or secretary should disclose the type of file maintained and its availability. Because of its sensitive nature, good judgment should be used when requesting this data.

   Examination of telephone bills and telex messages may also be useful to determine the frequency of contact between entities and help to show control or dependence when attempting to establish unity.

   Usually, only key personnel use company aircraft. The log might be used to establish management and supervisory control when attempting to show dependency and unity between locations and entities.

7. Internal audit reports and recommendations, responses to such reports and follow-up action. These reports, follow-ups, etc. can provide insight into the company's internal policies and procedures and the amount of control one company or division has on other companies or divisions within the group.

The first specific step to take in determining a unitary business group involves establishing what companies are involved, the relationship of the companies, their business activities, and their corporate structures. The companies meeting the common ownership requirement should be identified. Some information which should be documented in the unitary determination relating to these areas follow. REF: MTC Corporate Income Tax Audit Procedure Guideline Manual, MTC Index 2104.

1. Documentation and Evidence

   Proper documentation is vital in the preparation of all unitary determinations. Simple statements such as "There are intercompany sales." are not adequate to support a conclusion that the companies are involved in unitary business operations. The field supervisor, Technical Review, or Administrative Hearings will return audits if the audit issue(s) are not fully developed. In addition to providing evidence to support the auditor's conclusions, information discovered during the audit (or provided by the taxpayer) that supports the taxpayer's

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

position should also be included. It is important to show that in arriving at the audit conclusions, all of the available facts were considered and not just those that supported the auditor's position. In this way the taxpayer's position and supporting documentation can be addressed and rebutted by the auditor and/or Legal Services before the hearing or court proceedings.

The details in arriving at the audit conclusions should discuss why taxpayer family members qualify or don't qualify within the context of IITA 1501(a)(27) (plus any other applicable authorities). It is not sufficient to state that the taxpayer is unitary because they were unitary during the last cycle. Neither is it sufficient to state that a taxpayer is unitary because they filed that way voluntarily. During each audit, we should confirm the taxpayer's unitary grouping, expanding or limiting the scope on a case by case basis. The rationale that we rely on to confirm (or deny) the taxpayer's position should be the same rationale used in our audit comments. Auditor comments must have sufficient detail supporting the rationale behind the unitary position.

Many audits have been lost at the appeal level because the auditor failed to properly document the facts in the audit. Facts stated in an audit narrative which are not properly documented can be simply denied later by a taxpayer. It is important to remember that it can take years from the time an audit is completed until the audit reaches the hearing stage. During that time the auditor who performed the audit may no longer work for the Department or will have forgotten where the information was obtained. Without proper documentation and evidence the Department's case is seriously jeopardized.

A great deal of judgment must be used in determining when to thoroughly document an issue in the audit. As a general rule, the facts of an audit should be thoroughly documented if there is a strong possibility that the issue or issues will be appealed and are significant. THIS DOES NOT MEAN HOWEVER THAT NO DOCUMENTATION IS NEEDED ON AGREED OR PAID CASES. The auditor must provide some documentation so that the audit can be reviewed by the audit supervisor and by Technical Review. Also, it is difficult to uphold adjustments where the auditor provided minimal documentation believing the adjustments were agreed only to have the tax manager or outside representative decide to disagree at the end of the audit. This could be the result of a deliberate attempt by the tax manager to mislead the auditor or the tax manager could be overruled by higher authorities within the corporation or outside counsel retained by the corporation. Finally, the tax manager could also agree and pay the audit only to file a claim for credit at a later date protesting the audit adjustments.

If a taxpayer refuses to provide requested information, formal document request procedures should be initiated as discussed in the following paragraph. However, if the information is never obtained at the field level, it is still important to identify

the information source documents and/or the persons responsible for those documents in the audit file. If the results of the audit are protested and the matter goes before the Illinois Tax Tribunal or the Administrative Hearing Section, the Department can formally request the information through Discovery.

Further information regarding the discovery and hearing process may be found in 86 IAC Part 200: Practice and Procedure For Hearings Before the IDOR.

a) Documenting Requests For Information

All requests for information need to be supported by a form of written documentation. Using the form EDC-5, write up all verbal contacts and what information was discussed. Any information that was verbally requested and received should be indicated on the EDC-5. Additionally, a confirmation e-mail should be created and shared with the taxpayer detailing what was discussed during any meetings between the auditor and the taxpayer. This e-mail should be referenced on the EDC-5.

The EDC-5 will act as a log for the auditor and to verify the extent of taxpayer compliance. All requests for information should be in writing. In the event of non-compliance a second or third request **must** be asked for in writing. The EDC-5 may be accessed on the auditor's computer under Standardized Forms, Audit Forms, and then select EDC-5.

The Department Form EDA-70 is provided with the sole purpose of documenting requests for records from the taxpayer. The EDA-70 can be accessed on the Department's Intranet under: Work Areas, Audit, and then Forms. See Audit Manual Chapter 20 for more information on the EDC-5 and EDA-70.

The general requirement for what constitutes the minimum books and records required to be kept by a person may be found in 86 IAC §100.9530. 86 IAC § 100.9530(a)(2) provides that the books and records shall be kept at all times available for inspection by the Department, its agents and employees. In situations where information has been requested from the taxpayer, and the taxpayer is refusing to provide the information requested, the Department can and will issue a subpoena to obtain the records. However, to enforce a subpoena the Department must be able to show that:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- The records requested are relevant to the inquiry;
- The request is reasonable;
- The taxpayer is the sole possessor of the records requested; and,
- A demand for the records was made by the Department and the taxpayer refused to provide the records requested.

In addition to using the EDA-70, we should implement the use of a formal unitary questionnaire. The Information and Document Request For Affiliated Companies, or EDA-132 should be used to obtain information related to affiliated companies. It may be issued in addition to any request for documents the auditor requires. A copy of the Form EDA-132 is located in the historical extracts and exhibits section for reference purposes and in the CIT standalone file on the auditor's computer.

b) Documenting Information Reviewed In the Audit

During the course of the audit, material may be examined that is not photocopied and included in the audit file due to volume or the nature of the information. Usually under these circumstances, notes about such material should be made and included in the audit.

Refer to audit manual chapter 20 for a further discussion of the Department's position and the procedures to follow in situations in which a taxpayer refuses to allow information to be photocopied during an audit.

It is not necessary for an auditor to restate information in his narrative report if the same information is located in the audit work papers or the audit exhibits. For example, if intercompany sales between corporations have been properly documented, the work papers should contain a schedule showing the dollar amount of sales between corporations by year. A brief summary in the narrative of the intercompany sales with reference to the specific page of the work papers is all the information that is necessary. This approach is similar to treating the audit narrative as a table of contents directing you to where the referenced support is in your documentation.

The most important thing to remember when developing the support for a unitary determination report is that, if the case is un-agreed, the protest proceedings may not take place for years after the audit has been completed. The State's position and case will be based on information that is obtained from the auditor and contained in the audit file. Therefore, it is imperative that as much information as can possibly be gathered be

included, documented and explained in the audit file so that the audit conclusions are adequately supported.

C. CORPORATE OWNERSHIP STRUCTURE

List each affiliate, year incorporated, date acquired (if an already existing business), and the percentage of stock owned. Identify any other affiliate or parent which owns any portion of its stock. If it is a complex second or third tiered ownership situation, an ownership chart may be a useful tool.

D. PARENT OPERATIONAL STRUCTURE

Describe the functions of EACH of the parent's operating divisions. Indicate the location of each manufacturing or other type of operational facility included in each division, the specific products made or otherwise processed at each plant or facility and/or the regular services rendered by each division; the names and positions of the key officials of each division and the city where each is headquartered. Whenever possible, obtain charts showing these divisions and any subunits and the reporting lines of authority.

E. SUBSIDIARY OPERATIONAL STRUCTURE

For EACH subsidiary describe where it is headquartered, where its manufacturing or other operating facilities are located, the specific products manufactured, processed or distributed at each facility and/or the regular services rendered at each location. Name its principal OPERATING officials and at what location the services are performed. Explain to what extent, if any, each subsidiary reports to and is under the operational control of the parent or of another affiliate.

The above information will essentially establish common ownership between the companies and which companies are involved in the same line of business or are steps in a vertically structured enterprise. The next step in determining a unitary business group involves the functional integration criteria. A portion of the following information is also based on procedures contained in the MTC Corporate Income Tax Audit Procedure Guideline Manual, MTC Index 2104.

F. COMMON OFFICERS AND DIRECTORS

For the PARENT corporation:

1. For each audit year, list the names and positions of all corporate officers through the assistant or vice levels (e.g., all vice-presidents, assistant secretaries and treasurers, etc.). Indicate the city where the corporation is headquartered, and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

list the city where the office of each of these officials is located (some may not regularly serve at the corporate headquarters).

2. For each audit year, list the names of each director, and indicate who are chairman and vice-chairman. Indicate which are officers of the parent and the position held there. For those board members who are NOT officers of the parent, indicate which officers are officers of any affiliate; name the affiliate and the position held there.

The same information should be obtained for each affiliate as is described above for the parent. If there is a large group of affiliates, then this information should be limited to all principal affiliates.

This is ESSENTIAL information. It avoids the frequent prior practice of stating only that "there are common officers or directors" without further identification of the names and at what position levels, which is an incomplete and useless generalization. The by-year coverage will be useful in showing any officer changes during the entire audit period.

G. PARENT/SUBSIDIARY MANAGEMENT STRUCTURE

1. Obtain a complete description of the parent's organizational structure showing the chain of command and reporting lines from the president and/or chief executive officer down the organization, including its divisions. A chart or charts to illustrate this should be obtained, if possible.

2. Obtain a complete description of the regular reporting procedures and requirements of all of the principal domestic affiliates to the parent on such items as:

   a) Current sales
   b) Current profit or loss statements
   c) Annual budget
   d) Requests for new or expanded production and distribution facilities
   e) Any other miscellaneous periodic reports

Identify each category of required report and indicate whether it moves through a particular division of the parent or directly to the parent's headquarters and, if so, to what official or unit at the parent's headquarters.

3. Obtain a complete description of the functions and responsibilities of each of the officers at the parent's headquarters regarding BOTH the parent's operations and the operations of any of the subsidiaries. Job descriptions of the officers and/or managers are an excellent source of information. Also interviews with the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

appropriate personnel in the organization may provide some information regarding the duties and responsibilities of key positions.

4. Obtain a complete description of the organization of the parent's Board of Directors, indicating to what extent it has committees such as Finance Committee, Budget Committee, Executive Committee, etc., and name the members of each committee. There may be a chart available showing this organization. Describe the duties and authority of EACH committee (and/or of the board as a whole) as they relate to budgets, acquisitions, financing, new or expanded facilities, salaries, of principal officers, etc., BOTH for the parent itself and any of the subsidiaries.

5. Does the Board of Directors of each subsidiary corporation report to the Board of the parent corporation?

6. Do officers or directors of the parent and subsidiary corporation meet in common committees?

7. Do any of the parent corporation's committees plan for or monitor the subsidiary corporations?

8. Does the parent corporation establish goals or formulate policy for the subsidiary corporations?

9. Does the Board of Directors of the parent corporation control the amount and/or distribution of any dividends paid by the subsidiary corporations?

10. If the subsidiary corporation pays dividends to the parent corporation, are these funds segregated from general funds of the parent corporation?

11. Does the subsidiary pay any management fees to the parent corporation or another affiliate? If so, for what services, property, etc.?

12. Does the board of directors of the parent corporation approve major expenditures of the subsidiary corporation (e.g., capital purchases, expansions, etc.)?

13. Does the parent corporation approve or sign contracts for the subsidiary corporation? If so;

    a) Are these contracts signed at the parent corporation's headquarters?

    b) Are countersignatures by the parent corporation necessary on any of the subsidiaries' contracts?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

c) Are countersignatures by the subsidiary corporation necessary on any of the subsidiaries' contracts signed by the parent corporation?

14. Are portions of the parent corporation's centralized overhead costs distributed to the subsidiary corporation for accounting purposes? If so, what type of overhead expense is distributed?

15. Are there any common terms of sale or sales contracts used by the parent corporation and the subsidiary corporation?

H. INTERCOMPANY SALES/PURCHASES

Sales may be made from parent to subsidiary, from subsidiary to parent, from subsidiary to subsidiary or by all of these methods. Summary schedules which lump subsidiaries as a group without further breakdown are not helpful in determining the extent of possible unitary activities of any particular subsidiary. As discussed previously in the “Functional Integration” section, the amount of intercompany sales or purchases made is not always the major factor. The type of product being sold or purchased and its availability from other sources are also important factors.

The following information should be included (for each audit year) in the unitary determination report, to support a conclusion that intercompany sales exist.

1. For the parent, regarding its sales TO subsidiaries:

    a) Total intercompany sales.
    b) The name of EACH subsidiary to whom it made sales.
    c) The separate amount of sales to each such subsidiary.
    d) Total sales to all buyers.

If the parent produces several different types of products, indicate also the general category or categories of products involved in these sales.

2. For the parent, regarding its purchases FROM subsidiaries:

    a) The name of each selling subsidiary.
    b) The separate amount and type of products purchased from it.
    c) The amount of the parent's total purchases from all sources.

3. For each subsidiary making intercompany PURCHASES:

    a) The separate amount and type of product purchased from EACH affiliate.
    b) The total amount of the purchasing corporation's purchases from all sources.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

4. For each subsidiary making intercompany SALES:

   a) The name of the affiliate.
   b) The separate amount and type of product sold to it.
   c) The selling subsidiary's total sales to all buyers.

Obtain copies of any agreements between the affiliates regarding intercompany sales, and review the agreements for evidence of an integrated business. For example, “requirements” and “output” provisions (which require the purchaser to buy only from the seller or require the seller to sell all of its output to the purchaser) or provisions requiring one or both parties to deal first with the other party are indications that the businesses are integrated. Also, failure to enforce the terms of a contract is evidence that the parties are sharing value between them, because otherwise each party would insist on receiving the benefit of its bargain. If possible, obtain information regarding the price and other terms at which intercompany sales are made and the price and other terms at which sales or purchases of the identical items are made with unrelated parties.

I. COMMON MARKETING

Common marketing can be a very important factor in determining the existence of a unitary business. In order to be noticed in a highly competitive market, products are likely to be nationally and locally advertised through the use of newspapers, general magazines, trade publications, radio, television or a combination of any of these methods. The answers to the following questions can help support a conclusion that common marketing exists:

1. To what extent does the parent operate an advertising division or department? What specific activities does it conduct for each principal category of products? How many people does it regularly employ for these activities? Which principal subsidiaries receive the benefits or utilize the advertising produced by the parent? To what extent are they charged for this central advertising activity and how are the charges determined? Which principal subsidiaries either independently produce their own advertising or do NOT use any of the centrally produced advertising materials? If possible, obtain the annual advertising costs of the parent for each audit year.

2. Do the parent and/or any of the subsidiaries advertise any of their products under a common brand name, company, symbol, logo or trademark?

3. Does a common or similar brand name, symbol, logo or trademark appear on stationary or other documents of the parent and/or any of the subsidiaries? Is there an “intangible holding company” that owns all the trademarks and trade names of the affiliates? Which affiliates pay a royalty for use of these

intangibles, and what were the terms of transfer of the intangibles from the affiliates to the holding company? Obtain copies of any royalty agreements or agreements regarding transfers of intangibles to the holding company. Also, determine if the holding company itself incurs the costs of registering and protecting the intangibles, or if the costs are incurred by other members of the group.

4. Do the parent and/or any of the subsidiaries engage in any common promotional activities of their products or services?

5. Does the parent or an affiliate advertise for any of the subsidiaries?

6. Does the parent or an affiliate pay for the advertising of any of the other subsidiaries?

7. Is the advertising of the parent and/or any of the subsidiaries handled by the same agency?

    Note: As discussed in the "Functional Integration" section above, the common use of an advertising agency is not, in itself, a major unitizing factor. It can, however, help to support a general common marketing characteristic of a group of companies.

8. Are there common customers or types of customers (e.g. retail stores, doctors, etc.) for any of the companies?

9. Do the subsidiaries make a reference to their parent in their advertising (i.e., ABC Corporation, a subsidiary of XYZ Corporation)?

10. Is there a common sales staff for the parent and/or any of the subsidiaries? Do salesmen routinely refer products produced by affiliates to their customers? Is there a common service or repair division for the products?

J. TRANSFER OR POOLING OF TECHNICAL INFORMATION

The transfer of technical information is another major factor in the determination of a unitary business group. Technical information can be in the form of patents, copyrights, general research and development facilities, and technical personnel. The following areas should be developed to support a conclusion that a sharing of technical information exists between a group of companies. One of the primary sources of the following information is the technical assistance agreements, which are in effect between the various companies.

1. For any royalties received by the parent, for each audit year:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

a) Identify the total amount received from all sources
b) The total amount received from all affiliates
c) The SPECIFIC amount received from EACH AFFILIATE

Also include a description of the particular type or types of rights controlled by the parent, which were exchanged for its right to receive these royalty payments from EACH AFFILIATE. If a patent originated with another affiliate, on what terms was the patent transferred to the parent? If a patent is also licensed to outsiders, how do the terms of licenses to affiliates compare with the terms of licenses with outsiders? Who incurs the costs of registering and protecting patent rights?

2. For any royalty payments received by a subsidiary either from the parent or some other affiliate, the same detailed information as indicated for the parent above should be provided.

3. Identify all situations where a manufacturing plant of the parent and a manufacturing plant of a subsidiary produce identical or similar products. To what extent in this situation are patents, processes, and trademarks furnished by the parent (or vice versa)? Are royalty payments paid for their use and to what extent?

4. Identify the location of each research facility of the parent, the scope of the facilities, the number of personnel at each, and the specific types of research conducted at each.

5. Provide the same data as above for each research facility maintained by a subsidiary.

6. Explain in specific detail to what extent, if any, there is coordination, exchange of data, associated programs, and any other links between a research facility of the parent and a research facility of a subsidiary (or between facilities of two subsidiaries). Is joint research conducted between the facilities of the parent and any subsidiary or between facilities of two subsidiaries?

7. Do the parent corporation and/or any of the subsidiaries use any common research and development data, or engineering or planning data?

8. Does the parent corporation conduct research for any of the subsidiaries? Do any of the subsidiaries conduct research for the parent or other subsidiaries?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

9. Are there any common research personnel or are there any intercompany transfers of this type of personnel during the audit period? Identify, if applicable, the personnel, the function, their qualifications and the reason for the transfer.

10. Identify all principal or brand name products sold during the audit years by subsidiary which are directly traceable to and/or result from research projects at the parent in current or prior years.

Information about the results of research projects is often found in Annual Reports for current and prior years and is usually available when the corporate group deals in such items as drugs, cosmetics, household appliances, toiletries, nonprescription medicines, or other types of mass production consumer products where new or improved products are periodically put on the market.

K. COMMON DISTRIBUTION SYSTEM

The following type of information can usually be found by examining financial statements, property leases, Mergent Online, Standard and Poor's, and any other reports involving the ownership, lease, or use of property.

1. Does the parent and/or subsidiaries share any of the following:

    a) Sales facilities
    b) Storage facilities
    c) Transportation operations
    d) Inventory control operations
    e) Sales accounting operations
    f) Communication systems

2. Are there any written lease contracts between the companies for any of the above?

3. Are there any intercompany management fees paid for the types of facilities or services listed above?

L. COMMON PURCHASING

Common purchasing is also a factor of major importance in determining a unitary group. The following areas should be examined to establish a common purchasing function.

1. Describe any central purchasing activities of the parent such as:

    a) Specific categories of purchases.
    b) Which principal subsidiaries receive the benefits of such activities?
    c) Which principal subsidiaries are NOT involved in such activities?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Try to obtain the amounts of such purchases for each audit year to determine whether the activities are significant or relatively minor.

2. Does the parent purchase raw materials for any of the subsidiaries?

3. Does the parent or affiliate purchase office supplies or equipment for any of the subsidiaries?

4. Does the parent make the decision or approve any major purchase contracts of any of the subsidiaries?

5. Are there volume benefits received by the parent as a result of purchasing for the subsidiaries?

6. Are there common suppliers from whom goods or equipment are purchased?

M. INTERCOMPANY FINANCING

Intercompany financing may be a significant unitizing factor if the purpose of the financing is for business expansion, day-to-day operations, or the functional integration of the business segments. In common terms this type of intercompany financing is known as a cash management system. If the purpose for the financing is simply to protect an investment of the parent or subsidiary, it becomes less important.

Also, any intercompany financing is evidence of sharing of value between members, because it is generally true that the interest rate will not reflect the market rate for one of the parties-either the borrower would not have been able to obtain that rate from an unrelated lender or the lender would not have been able to obtain the same rate on an identical loan to an unrelated party. However, interest rates and other terms of intercompany loans, and the enforcement of those terms that clearly do not reflect the market are even stronger evidence of the sharing of value that creates a unitary group. Some information which should be gathered to support an intercompany financing/cash management system conclusion follows:

1. Identify loans from the parent to subsidiaries existing at the beginning of the audit period. Show separate amounts for each borrowing subsidiary and find out the specific purpose for each substantial loan and whether it is interest bearing. An audit source may be the intercompany elimination on consolidation. Note whether the terms of the loan being enforced in the same manner as they would be enforced between unrelated parties. For example, are payments actually being made, and made on a timely basis? Is a loan extended beyond its term, when market conditions have changed so that an unrelated party would have terminated the loan or renewed it on different terms?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

2. Explain the extent of any repayments made on each loan identified above during each audit year.

3. Identify all new loans, and their amounts, made by the parent during each audit year separately for each borrowing subsidiary. Indicate the purpose of the loan and whether it is interest bearing. Is the loan made at the current commercial rate of interest?

4. Identify any loans made during each audit year by:

   a) Loaning affiliate.
   b) Borrowing affiliate.
   c) Purpose of the loan.
   d) If it is interest bearing and if so, is the loan made at the current commercial rate of interest?

5. Obtain data showing to what extent, if any, the parent corporation was a GUARANTOR of any loan obtained by a subsidiary during the audit period or which was still outstanding during that period. Identify the year when each loan was made, its amount, the name of the borrowing subsidiary and the purpose of each loan.

6. Identify for each subsidiary the amount of loans (for each audit year) that it independently obtained from outside sources and on which the parent was NOT a guarantor.

7. Review the consolidating workpapers for information regarding intercompany elimination of loans payable and receivable. If this analysis is not available, the loan file is an alternate source to obtain the data.

8. If any of the subsidiaries need to borrow funds, are they REQUIRED to borrow only from the parent or another subsidiary? Are they required to use the parent or another subsidiary as a first source for the needed funding?

9. Do any of the subsidiaries borrow from outside sources based upon the financial strength of the parent or the affiliated group as a whole?

10. Do the parent and/or any of the subsidiaries utilize common banking facilities?

11. Does the parent negotiate loans or obtain capital for any of the subsidiaries?

12. Does the parent approve loans for any of the subsidiaries?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

13. Do the parent and/or any of the subsidiaries loan or advance money to each other, either by direct loans or intercompany assignments of accounts receivable? If so, are there written agreements regarding these loans or advances? Are the loans or advances made with interest rates set by the parent?

14. Do the parent and/or any of the subsidiaries borrow from common financial institutions?

V. DETERMINING THE DESIGNATED AGENT

In order to process any unitary return or audit, a designated agent (DA) should be selected by the taxpayer. Both 86 IAC §100.5220(a) and the Schedule UB Instructions provide the guidance on who should be the DA for members of a UBG. The DA must be:

- a member of the UBG and an Illinois taxpayer
- if the controlling corporation is a member of the group and an Illinois taxpayer, it **must** be the DA.

If the controlling corporation is not an eligible member of the group, the members must choose another DA. Ideally, the Illinois filing member with the largest consistent liability **should** be selected.

There are instances of when a controlling corporation will not be a member of the combined group, when:

- the combined group is combined of corporations that are wholly owned by an individual. (no controlling corporation);
- the owning corporation and members are required to use different apportionment formulas (e.g. IITA § 304(a) and IITA § 304(c)); or,
- the controlling corporation does not have Illinois nexus.

Once a designated agent is appointed for the group, it should remain the DA for all future periods unless the DA ceases to be a member of the group; the controlling member becomes eligible, or is replaced by an eligible member. During audit it may be determined that a change in the DA is required. If a change in DA is required, the auditor must obtain a statement from the group authorizing the change of DA. This statement must accompany the auditor's workpapers in order to: combine tracks, correct Gentax information, merge groups, and inform audit areas (planning, technical review, audit perfection) to merge dual or multiple designated agents.

Note: **The Change of Designated Agent Form (IDR-229-UB, see Sub section c below)** should be submitted at the **beginning** of the audit in order to inform Technical Review and Audit Perfection of the change in DA(s) so that they can prepare the proper adjustment documents to transfer the returns, set up additional tracks and audits and/or cancel tracks and audits.

A. WHEN TO CHANGE THE DESIGNATED AGENT

1. If the controlling corporation was an eligible (Illinois nexus) member, but did not file as the designated agent, then the IDR-229-UB should be completed. An EDA-25 should be prepared on a combined basis with the payments and return information from all the other eligible members transferred to the designated agent's FEIN. The IL-870 should show which companies are being combined, so the information can be transferred by Audit Perfection.

   ✓ The auditor must inform the taxpayer that the unitary members are required to file under the controlling corporation for future years.

2. If the controlling corporation (or the chosen designated agent) was not an eligible (no Illinois-nexus) member, but filed as the designated agent, then a new DA must be chosen by the group. The entire group must consent to the appointment of the new designated agent. Therefore, the auditor **must** obtain the signed change in designated agent form to make the correction.

   ✓ The new designated agent's number is to be used on all audit documents.

3. Two or more unitary groups are being combined into a single large group by the audit. If the following criteria are met, only the signatures of the old designated agent(s) and the new designated agent are needed to appoint the proper designated agent for the new group:

   i. The taxpayers agreed to the unitary group change.

   ii. The designated agents for each of the old groups met the requirements of the Regulations. (The agent was the controlling corporation (if eligible), or another eligible member (if the controlling corporation was ineligible)).

   iii. The designated agent for the new group was a designated agent for one of the old groups).

4. The taxpayer files an IL-1120-X combined Amended Return to change the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

designated agent or to change the members of the group. Once a taxpayer has filed an amended return to make the changes to the group, amended returns must be used rather than EDA-25's to make the group corrections. The old designated agent must zero out its return and state that it is changing the designated agent. Eligible members that are being added to the combined group must file separate amended returns showing no net income, overpayment or underpayment. They must state that they are joining in the filing of the combined amended return. Ineligible members that are being removed from the group must file a separate amended return for their own filing. (REF: 86 IAC §100.5260).

B. DESIGNATED AGENT FUNCTIONS AND RESPONSIBILITIES

While the requirements of who can be DA are specified in 86 IAC §100.5220(a), 86 IAC § 100.5270 specifies the DA's responsibilities. The DA is responsible for computing the combined net income and tax of the group. The DA will compute the combined group's current year combined taxable income, or combined Illinois net loss if the groups combined taxable income is less than zero. The DA is responsible for applying any modifications to the amount of combined net income by correctly determining the combined groups combined Illinois addition and subtraction modification amounts.

Certain Illinois items that the DA is responsible for including:

- Carrybacks or carryovers will be determined for individual members of the group and a pro rata share of the loss is attributable to each of the loss members. The application of 86 IAC §§ 100.2250(c)(3) and (4) provides the determination for carrybacks and carryovers.

- NOL addition modifications as provided for in 86 IAC § 100.2340, and 86 IAC §§ 100.2350(c)(3) and (4).

- Combined nonbusiness and nonunitary partnership income allocable to Illinois.

- Combined Illinois net loss deduction (NLD), the DA will compute the NLD by determining the amount available for each member of the group as provided for by 86 IAC §§ 100.2330, 100.2340 and 100.2350.

- Combined credits allowed by the IITA will be based on the combined activities of the members of the combined group. Credits will be applied against the combined liability of the combined group. See chapter 36 section on "Unitary Group Filing Combined IL Returns" for an expanded discussion of credits.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

1. Common Taxable Year

When members of a UBG have different accounting periods, it is necessary to compute unitary business income and the apportionment formulas of all group members using a common accounting period. 86 IAC §100.5265(a) provides that the taxable year of the designated agent of the group is to be used as the common taxable year (CTY) for years ending after December 31, 1998. The combined group must thereafter use the taxable year of the designated agent.

For taxable years ending prior to1998 the regulations allowed the use of the parent's accounting period and considered this as the CTY. If there was no common parent, the accounting period of the Illinois filing member who is expected to have, on a recurring basis, the largest Illinois tax liability could be generally used. However, this portion of the regulation was repealed August 23, 2002.

Once a CTY is determined, members with a different taxable year must adjust their income and factors to reflect their activities for the common taxable year. 86 IAC §100.5265(b) provides three methods which are allowable for the combined group to adjust a members' taxable year:

1. Pro-forma taxable income from books and records for the CTY, where the taxable year is calculated using a number-of-months method obtained from the original accounting periods.

2. Pro-rated shares of its taxable income beginning and ending in a CTY, as this may be used when the member's taxable year begins after the beginning of the combined common taxable year, and ends after the common taxable year.

3. Separate company taxable income of the member, for any taxable year ending in the CTY is to be included in the combined net income of the combined group.

86 IAC §100.5265(b) provides two examples for the second method; the first example is restated here:

Example:
Corporation A is a calendar-year member of a combined group having a common taxable year ending July 31. If Corporation A uses the method described in this subsection (b)(2), its taxable income for the taxable year ending July 31, 2005 would be five-twelfths of its 2004 taxable income and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

seven-twelfths of its 2005 taxable income. Rather than using months to pro-rate its income, Corporation A may use the number of days in its taxable year or (in the case of a corporation using a 52/53 week taxable year) the number of weeks in the taxable year. The combined return for the common taxable year ending July 31, 2005, may not be filed until after December 31, 2005, the close of Corporation A's taxable year which begins during that common taxable year.

a) Consistency of Method

Each taxpayer whose taxable year differs from the CTY may separately elect which of these three methods it will use for its first combined return. Once a member has used a particular method it will be required to continue to use the same method on subsequent returns for consistency in use. A change in method will be allowed when the change in method is disclosed in an attachment to the first return for which period the change is effective. The attachment must show:

- each year in which the member changing its method has been in the combined group, including the change year,
- the net income of the group under the former method,
- the net income of the group under the new method, and
- the totals computed using each method,
- If the net income computed under the new method in prior years exceeds the net income computed using the old method, the excess is added to the net income of the group in the year of method change. If the net income computed under the old method in prior years exceeds the net income computed using the new method, the excess is subtracted from the net income of the group in the year of method change. These adjustments prevent the change from excluding income or double-taxing income.

b) Change of Group's Common Taxable Year

A combined group's designated agent, or its members, may undergo change and leave the combined group, or cease doing business within Illinois. This may cause a change to the CTY. If the taxable common year of the combined group is changed, with its year ending prior to the year end it had been using:

- All separate company items of each member of the combined group (which occurred after the end of the previous CYT but before

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

the change) must be included in the combined return filed for the first CTY after the change.

- Any separate company item reported on a combined return of a prior common year shall be excluded from the combined return filed for the first common taxable year after the change.

If the CTY of a combined group is changed and the new CTY ends after the end of the former CTY during which the change occurs:

- The combined group must file a combined return for the period ending with the date the CTY is changed, and a short year combined return for the period beginning with that date through the end of the new CTY.

C. Members Entering and Leaving a Combined Group

If a corporation joins the group, the group's CTY accounting cycle will probably be in progress. If the new corporate member was not a member of another group previously, it will file a separate return for the period prior to joining (short year) with the period ending on the day prior to its joining the group. Regardless of which method under subsection (b) is used by a member with a taxable year other than the common taxable year, if a corporation becomes a member of the combined group after the beginning of the corporations taxable year:

- If the corporation was not part of another combined group, it would simply file a short year return for the period prior to joining the combined group. The income for the separate return will equal the amount of the corporation's income for the year that is not included in the combined return using one of the three methods previously discussed above that is chosen for determining the income included in the combined group's income for the year.

- If the joining corporation had been in another combined group prior to joining this second combined group, it must use Method 1 or Method 2 above to determine its separate income, and would report this income to the respective group(s) for the time it was in that group.

In the case of a corporation which ceases to be a member of a combined group:

- If separate income is reported to the first group, it will be excluded from being reported on a second combined return with a second group, or on a separate company return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

D. CHANGE OF DESIGNATED AGENT FORM: IDR-229-UB

An example of the Change of Designated Agent Form is presented in the Historical Extracts and Exhibits section. The form will act as a flag to Audit Perfection. The forms layout will allow the Department to:

- Identify the old and new DA by name, FEIN and controlling company,
- Provide the contact information for the responsible officer for the schedule,
- Identify by name and FEIN the members of the UBG,
- Provide the authorization signatures of the officers confirming the change

The last section of the form is comprised of blank lines. This will allow an area to provide specific comments and instructions for the auditor to guide the Audit Perfection area to accurately process the change(s). The IDR-229-UB may be accessed by going on to the Sp-IDOR web page, selecting Work Areas, Audit, and Forms.

VI. COMMON OWNERSHIP

86 IAC §100.9700(e) provides guidance on what level of ownership is necessary to constitute a unitary level of ownership.

- In the relationship of a corporation common ownership is the ownership of more than 50% of the outstanding voting stock.

- In any other entity it is the amount of ownership at which point there is sufficient interest to exercise control over the entity. This can be either direct or indirect ownership.

For a corporation, common ownership means direct or indirect control or ownership of more than 50% of outstanding voting stock. For all other entities, common ownership means direct or indirect ownership of an interest sufficient to exercise control over the entity. An example of direct or indirect ownership regarding a non-corporate entity would be the ownership of a general partnership interest. If the partner has the authority to act on behalf of the partnership and enter binding agreements, this is considered ownership regardless of the actual ownership share. For corporations any combination of direct or indirect ownership exceeding 50% will satisfy the ownership requirement for inclusion in a UBG. However, other tests must be satisfied as well.

86 IAC § 100.9700(e) contains several examples of common ownership, one of which follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Example 1
Corporation A owns 60% of the outstanding voting stock of Corporation B which in turn owns 60% of the outstanding voting stock of Corporation C. There is common ownership of Corporations A, B and C by reason of Corporation A's direct ownership of more than 50% of the outstanding voting stock of Corporation B and indirect control of more than 50% of the outstanding voting stock of Corporation C.

There are numerous supporting documents which will assist in determining whether a group of corporations meet the ownership requirement of the IITA for unitary purposes.

- Unitary Questionnaire: EDA-132 Information and Document Request for Affiliated Companies (see historical extracts and exhibits section)
- The Form 851 is filed with a federal consolidated Form 1120 to identify the parent company and affiliated members. These members are required to be at least 80% owned by the parent.
- Organization Chart
- List of Officers
- SEC 10-K reports (available from EDGAR, the SEC internet web site)
- Board of Directors minutes
- Internet Research
- CPA Auditor's Report
- Internal Audit Reports
- Operating Manuals showing degree of internal controls
- Copies of contracts showing intercompany financing
- Schedule showing common customers
- Breakdown of intercompany eliminations on the federal Form 1120

Note: The Form 851 will indicate those members of the consolidated group who are owned 80% or more and file with the parent company. The Form 851 will not provide the information for which members may be within the 50% to 80% unitary threshold. It is through the work of the audit that these members will be identified.

A. Rules Of Attribution

It is not necessary for two companies to be commonly owned by another COMPANY to be members of a UBG. The common ownership requirement may be met if an individual, a trust, estate, partnership, association, firm, Limited Liability Company (LLC) or fiduciary owns in excess of 50% of the common stock of each of the two corporations. In addition, the "person" does not have to actually be a member of the UBG for common ownership to exist. REF: IITA §1501(a)(18) and 86 IAC § 100.9700(f).

86 IAC § 100.9700(f) further states that a person is considered having indirect control over any stock that he is considered owning under IRC § 318(a). Section 318 contains various rules of attribution of stock owned by family members to other members, between partners and partnerships, trusts and estates and their beneficiaries, and corporations and controlling shareholders.

Note: 86 IAC § 100.9700(f) was amended effective June 30, 2008 to incorporate all of IRC § 318(a) and to apply to all persons. Previously, it applied only to individuals and used only the attribution rules in IRC § 318(a)(1), dealing with attribution of ownership between family members.

IRC § 318 (a)(1) states that an individual will be considered to own stock which is either directly or indirectly owned by a spouse (unless they are legally separated), children (adopted or blood), grandchildren or parents. An individual is not considered to own stock which is either directly or indirectly owned by siblings.

EXAMPLE 1

Mr. Smith owns 35% of Corporation A and 40% of Corporation B. His wife owns 35% of Corporation A. Each of the Smith's 3 children owns 10% of Corporation A and 20% of Corporation B. Following the federal rules, Mr. and Mrs. Smith each are considered to own (by attribution) 100% of Corporations A and B. Therefore, the common ownership requirement of IITA §1501(a)(27) has been met for Corporations A and B.

EXAMPLE 2

In 2013, Mrs. Jones owns 40% of Corporations C and D. Her son owns 30% of Corporation C. Her daughter owns 30% of Corporation D. Following the federal rules, Mrs. Jones owns (by attribution) 70% of Corporations C and D. Therefore, in 2013, the common ownership requirement of IITA §1501(a)(27) has been met for Corporations C and D.

On January 1, 2014, Mrs. Jones dies and each of her children inherits half of her holdings in each corporation. Her sons now own 50% of Corporation C and 20% of Corporation D. Her daughter now owns 50% of Corporation D and 20% of Corporation C. Based on the federal attribution rules, one sibling is not considered to own another sibling's stock holdings. Therefore, for 2014, the common ownership requirement of IITA §1501(a)(27) HAS NOT been met for Corporations C and D.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

EXAMPLE 3

A mother and her two children owned virtually all of the stock of 18 companies in similar lines of business. All of the stock of each corporation was subject to written stock purchase agreements that prohibit the transfer of stock by a shareholder to anyone other than the corporation or its other shareholders. The mother, children and son-in-law held virtually all corporate officer positions in each of the corporations. The greater than 50% ownership test was met for each of the companies because “of the mother and her children.”

B. INSTANT UNITY

Some states have a set rule which states that a newly acquired corporation either can or cannot become a member of a unitary business group immediately upon the date of acquisition. Illinois has no set rule for instantly unitizing or not unitizing newly acquired corporations.

The determination of whether or not any corporation should be a member of a unitary business group will be based on the facts of the individual case. Ordinarily a corporation will NOT be unitary with an acquiring corporation immediately upon the date of acquisition because the necessary functional integration will not be present. However, it is possible that a sufficient degree of integration could be present upon acquisition (or shortly thereafter) that would support a unitary determination.

EXAMPLE

Corporation A manufactures steel rods and sells 90% of its output of steel rods to Corporation B every year. In 2010 B begins to implement a plan to purchase 100% of A's stock by December 2012. During the two year purchase period, B becomes very involved in the management and control of A. On December 10, 2011, B purchases enough of A's stock to own 51% of A and is sufficiently integrated with A that a unitary determination could be supported. A can become a member of B's unitary business group immediately on December 10, 2011.

VII. SAME LINE OF BUSINESS/VERTICAL INTEGRATION

What is the same “general” line of business? 86 IAC §100.9700(h)(3) and (4) defines what is considered to be a general line of business. This can ordinarily be illustrated where the activities of the members are in the same general line such as: manufacturing, retailing of tangible personal property, wholesaling, insurance, transportation or finance. Illinois does not distinguish between types of products to determine whether a business is in the same line. A manufacturer in theory could produce engine parts and pacifiers: manufacturing is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

manufacturing, and retailing merchandise is retailing merchandise. It is the act of retailing or manufacturing that is to be considered what the line of business activity is.

IITA § 1501(a)(27) provides that unitary business activity "can ordinarily be illustrated" where the related entities are engaged in the same general line of business or are vertically integrated. The courts in other jurisdictions have also determined that a strong indication of a unitary relationship exists when a group of companies are engaged in the same line of business or in a vertically structured enterprise.

In the Supreme Court case of *Container Corporation of America v. Franchise Tax Board*, 463 U.S. 159. (1983), the Supreme Court supported that vertically integrated companies usually constitute a unitary business. The reasoning behind this stance in treating vertically integrated companies as a unitary business is that they benefit from "an umbrella of centralized management and controlled interaction". In a vertically integrated company the interaction between the various components in the long range planning has been a focus of the court. Other areas of focus have included:

- Development of a group of company's policy and procedures
- Financing, accounting systems, personnel, legal counsel, and public relations
- Central management activities including companies engaged in oil and natural gas production, mining and mineral extraction which produce finished goods from the raw resources are prime examples of vertical integration.

When the Supreme Court reviewed the Container Corporation case, it held that when a corporation invests in a subsidiary that is in the same line of work as it is, several benefits occurred.

- Most notably, the investment makes better use of the parents existing business through economies of scale and an operational integration of shared expertise could be obtained.

A synopsis of the Container Corporation case appears in Chapter 49.

Two or more entities may also be steps in a vertically structured enterprise or process. These companies may comprise a UBG even if some of the steps in the vertical structure are performed by companies that cannot be included in the same UBG because of IITA § 1501(a)(27) limitations (80/20 companies, different apportionment formulas). Even if there is common ownership and a same general line of business, a functional integration must be present as well in order to establish a unitary basis.

If the companies that are involved in business together are in the same general line of business, this is the first step in determining that they are in a unitary relationship. It is not determinative in itself.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- A unitary determination in audit should not be solely based upon companies being in the same line of business.

A. Discrete Business Rule

If a corporation has divisions that are involved in multiple, discrete businesses, it is necessary to determine the business income attributable to each separate trade or business. The income for each business segment is then apportioned to Illinois by an apportionment formula which takes into account the in-state or out-of-state factors for that segment of the business only. The Illinois income for each segment is then totaled to arrive at Illinois income for the company as a whole.

86 IAC § 100.3010(b)(3) provides that the determination of whether the activities of the person comprise a single trade or business, or more than one trade or business, will be on a case by case basis according to the specific facts involved. A single trade or business will be evident when the segments are integrated with, dependent upon, or contribute to each other and other operations of the person as a whole.

The following factors are considered to be good indicia of a single trade or business, and presence of any one of these factors creates a strong indication that the activities of the person constitute a single trade or business:

1. Same type of business
2. Steps in a vertical process
3. Strong centralized management

86 IAC §100.3010(b)(2) contains an example of an entity involved in three "discrete business" operations.

The discrete business rule is not considered to be a part of IITA § 304(f). There is, therefore, no requirement that a company petition the Department for permission to file its Illinois return in this manner. However, any contention that two or more separate and discrete businesses exist within a single entity is subject to approval by the Department through audit. If it is determined that the company's contention is in error, the Department will assess any additional liability through issuance of a Notice of Deficiency.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

VIII. STRONG CENTRALIZED MANAGEMENT

Functional integration of affiliates through the exercise of strong centralized management is a very common element of a unitary business group. IITA § 1501(a)(27) and 86 IAC § 100.9700(g) provide us guidance in this area. Strong centralized management is the primary indicator of: mutual dependency, contribution and integration between persons that are necessary to compose a UBG.

Strong centralized management will be deemed to exist when there is a central management authority over such matters as: purchasing, financing, tax compliance, product line, personnel, marketing, and capital investment. Individual members will defer these controls to a controlling member of the group.

When executive officers of one of the persons are normally involved in the operations of the other persons in the group and there are centralized units that perform for some or all of the persons functions that truly independent persons would perform for themselves, a group of persons could be considered as comprising a UBG under IITA § Section 1501(a)(27).

The mere existence of central management authority, or the exercise over a particular function, is not determinative of strong centralized management in itself. The entire operations of the group must be examined as a whole to determine if strong centralized management exists. Both strong central management authority and the exercising of this authority must exist in order to support a unitary finding under IITA §1501(a)(27).

IX. FUNCTIONAL INTEGRATION

If the companies under audit are found to be in the same general line of business or part of a vertically structured enterprise, they may or may not be in a unitary relationship.

- The second requirement for determining a unitary relationship is the establishment of functional integration.

86 IAC § 100.9700(g) states that no group of persons can be considered a UBG unless they are functionally integrated through the exercise of strong centralized management. This varies from the wording of IITA §1501(a)(27), which states that a unitary business "can ordinarily be illustrated" by horizontal or vertical relationship and strong centralized management. As a practical matter, however, strong centralized management exists in virtually every case where a unitary business has been found to exist. It is by this **exercise of authority** that the companies are caused to be dependent upon, contribute to or integrated with each other. It is

not, however, necessary for the person who has the authority and is exercising that authority to be a member of the group.

86 IAC § 100.9700(g) provides that strong centralized management is deemed to exist:

- when the authority in matters like purchasing, financing, tax compliance, product line, personnel, marketing and capital investment are not left to individual members,
- when executive officers of one of the persons are normally involved in the operations of other persons, or;
- when there are centralized units which perform operations for some or all of the functions independent persons would perform for themselves.

Neither the existence of central management authority, nor the exercise of that authority over a particular function is determinative in itself. The entire operations of the group must be examined to determine a finding that centralized management exists. A finding of strong centralized management cannot solely be supported by an ownership of more than 50%, or showing that there is an incidental benefit to the group such as an improved financial position.

Under this provision, if the functions listed in the regulation are combined or centralized for the two entities, the strong centralized management test is deemed to be met, while merely showing the existence of centralized authority strong enough to run the businesses as a single operation is not sufficient. If a partnership is involved, the operations of the partner and the partnership need to be examined to verify that there are centralized functions or sharing of costs or values in the operations of the two entities. If it is shown that there is sufficient centralization or sharing, we can prove functional integration.

The mere presence of centralized management is therefore, insufficient to support a finding of functional integration. The management activities must contribute to the integration of the companies and not just fulfill normal investment stewardship responsibilities. Some centralized management activity is considered to be consistent with the holding of investments and does not necessarily establish unitary business ties. For instance, in the case of Container Corp. v. California Franchise Tax Board, the court held that a distinction must be made between capital transactions that had an operational function and those that merely had an investment function. The court stated that the required flow of value had to be demonstrated by something more than the mere flow of funds arising out of a passive investment or a distinct business operation.

The determination of functional integration through the exercise of strong centralized management must be based on the facts of each case. Generally, several factors of functional integration will be present in a unitary business. A UBG can exist however based on only a few factors or even one, if the factor or factors are particularly significant to the business operations. For example, if one company purchases raw materials which are used in a manufacturing process by a second company and 100% of the first company's sales are made

to the second company, that factor alone could be significant enough to prove functional integration exists between the two companies.

Some major unitizing factors follow. The presence or absence of one or more of the factors does not necessarily mean that functional integration does or does not exist. The factors are listed in descending order of general importance based on unitary case law. Again, the actual significance of any of the factors depends on the type and nature of the businesses involved. However, the absence of ALL of the first five factors will generally indicate a lack of functional integration between the companies. The actual information and documentation that is necessary to support the conclusion that any of these factors exist in a specific group is discussed in the “Development of and Support for the Unitary Determination” section.

A. MAJOR UNITIZING FACTORS

1. Intercompany Transactions

Various intercompany sales, exchanges, product transfers, providing of services and intangibles can be a significant factor. The significance of intercompany sales will be based on both the character of the item sold and the ratio of the intercompany sales as compared to the total sales made. As the percentage of intercompany sales increases, so does the importance of this factor. Any amount of intercompany sales takes on greater significance, however, if:

a) There is a limited sales or purchasing market for the product involved; or

b) There are valuable trade names or other intangibles associated with the sales.

The taxpayer may attempt to minimize the significance of the intercompany sales activity by showing that the sales are taking place at fair market or arm's-length prices. The selling price is not the only factor of importance. Intercompany sales are one of the important criteria of functional integration because they reflect an assured market for the seller and a guaranteed source of supply for the purchaser.

2. Common Marketing

If the various entities share common marketing features that result in an advantage to the individual companies which would not be present if they were not part of the group, these features can be an important sign of functional integration. Common marketing exists when:

a) A substantial portion of the group's products, services, intangibles, etc. are distributed or sold to a common customer. The common customer is not necessarily one entity or even an affiliated group of companies. A certain type of customer could also qualify, such as, grocery stores, retail stores, lawyers, doctors, etc. The importance of this factor is that the companies are receiving a benefit (e.g. shelf space, product referrals to clients/patients) from being a part of a group of companies, which they may not receive if they were on their own.

b) The companies use a common trade name, trademark or logo that is a significant factor in a customer's decision to purchase the products or services. An affiliated group that has set up an intangible holding company to hold the trademarks, trade names and similar intangibles of the group, and to which the affiliates pay royalties for the use of the intangibles, is evidence of functional integration. This is especially true if the intangibles were contributed to the holding company, rather than sold at arm's-length prices, and if the costs of administering and protecting the intangibles are incurred by affiliates other than the holding company.

Common use of an advertising agency (whether it is an independent agency or an affiliated company) usually does NOT, in itself, constitute common marketing. The value of common marketing is that it allows one company to benefit from the goodwill of another. The use of a common advertising agency does not necessarily cause this to happen.

3. Transfer or Pooling of Technical Information

The transfer or pooling of technical information, know-how, or research and development can be a significant factor of functional integration if the pooling yields an economy of scale or the information shared is of particular importance to the companies' operations. Sharing of accounting or legal services is not usually considered a significant pooling of resources; however, depending on the type of companies involved, these functions may take on greater importance. For instance, when dealing with a group of utility companies or other regulated companies, the sharing of a legal staff could provide the companies, as a group, better representation at the industry's regulatory meetings, hearings, etc. than any one of the companies would have alone.

4. Common Distribution System

A common network for the control and accounting, storage, trafficking, and transportation of inventory can also be evidence of functional integration between the companies. Common warehousing alone, however, is not normally considered a significant factor.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

5. Common Purchasing

The common purchasing of a substantial quantity of products, services, intangibles, etc. from the same source can also be an important factor when determining whether or not companies are functionally integrated. When purchasing as a group results in an economy of scale for the companies or where the items, services or rights are not readily available from other sources and are important to the group's operations, the purchasing becomes a more important factor. As discussed above, under COMMON MARKETING, the importance of this factor is the economic benefit received by the companies by purchasing as a group rather than as a separate company, not from whom the purchasing is done.

6. Intercompany Financing

Intercompany financing has always been considered a major unitary tie. The decision in the Container Corp. case however, contained the additional requirement that the intercompany financing must be made for an **operational purpose** rather than merely as an investment function in order for it to be considered a significant unitizing factor. This type of intercompany financing is commonly known as a cash management system. It is, therefore, a cash management system that must be present to support a unitary business conclusion and not simply intercompany financing.

In the case of Citizen's Utilities Company of Illinois v. The Department of Revenue, the type of intercompany financing present was felt to be a very significant unitary factor. In discussing the reasons for allowing a unitary return to be used in Illinois, the decision states:

> Finally, and perhaps most illuminating, is the parent's use of the intercompany [bank] account. As previously noted, the account gives the parent access to revenues received by all its subsidiaries. The parent can withdraw revenues from one subsidiary and invest them in the form of an interest-free loan with another subsidiary. Both the borrowing and lending corporations are governed by the same directors, officers and management strategies, so the lender controls how the loan is used and the investment cannot be considered passive within the meaning of Container Corporation. By these transfers, the revenue-producing subsidiary loses income from the time-value of its revenues, and the borrowing subsidiary's income is increased by eliminating interest.

A synopsis of the Citizen's Utility Company case appears in Chapter 49.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Intercompany financing is therefore a significant unitary factor only when the financing contributes to the functional integration of the business segments. Some indications of the cash management system that would help to establish a unitary group would be:

1. A pooling of investments to obtain better returns on the investment.

2. Centralizing loan requests for cash needs in order to obtain the best borrowing rates available and then allocating the funds back to the individual entity, based on their need.

3. Centralizing the budgeting process including such things as funds for expansion, capital improvements, etc.

4. Centralizing the approval tolerances for spending by the various entities.

5. Shifting of cash from one entity to another to maintain a stable economic position for all of the entities involved.

6. Centralizing other types of financial controls

B. Other Factors

The following list of factors would not, either alone or in combination with other factors on this list, normally be sufficient to prove functional integration. They can, however, help to support a determination of functional integration based on one of the above significant factors. These factors include common or intercompany:

1. Labor Relations
2. Pension Plans
3. Insurance
4. Personnel Recruitment
5. Intercompany Personnel Transfers
6. Legal Services (except as described above)
7. Computer Services
8. Centralized Accounting
9. Tax Administration
10. General Administrative Services

Once it has been established that functional integration exists through the exercise of strong centralized management, the group of companies involved may be considered to be in a unitary business relationship.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The following information should be obtained to further support a unitary determination. In most instances, interdependence ONLY in these areas is not enough to substantiate the formation of a unitary business group, however, as always; they must be evaluated on a case by case basis.

1. Labor Relations

   a) Is the workforce of the parent and/or any of the subsidiaries represented by the same labor union, local or bargaining unit?

   b) Does the parent negotiate or approve any of the subsidiaries' contracts?

   c) Do the parent and/or any of the subsidiaries negotiate a common labor contract?

2. Pension Plans

   a) Describe in detail EACH pension plan of the group, indicating which categories of officers or employees are eligible for each plan, whether it is contributory or noncontributory, its general provisions as to when benefits become payable, and indicate to what extent it involves any stock option provisions. (If a stock option plan is a separate plan, explain its program separately.) Indicate to what extent one of the affiliates administers each plan and, if not, name the outside firm responsible for its administration.

   b) Indicate to what extent, if any, officers and/or employees of other affiliates are eligible for any of affiliate's pension plans. If they are eligible, identify which particular principal affiliatesare presently included in each of the plans and which principal subsidiaries are not included.

   c) Provide the same information as above for each pension plan at each principal affiliate.

3. Insurance

Typical types of insurance carried by the parent and its subsidiaries would include (1) fire, (2) comprehensive casualty, (3) theft, (4) group health, (5) group life, and others.

   1. For insurance held by the parent, identify the specific type of coverage it has. In any instance where more than one type of coverage is negotiated through a single agent, identify the agency and the particular types it handles. Indicate to what extent any type of insurance coverage is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

negotiated separately at the division or other unit level rather than as an overall coverage for the entire parent corporation.

2. As to the principal subsidiaries explain, for EACH, which particular type or types of insurance coverage is obtained through the same agent or agents which the parent above utilizes and the extent, if any, of any premium reductions which might result from this broader base of insurance coverage.

3. Identify each subsidiary which independently negotiates its own insurance coverage.

4. Does the parent or another affiliate administer casualty insurance policies for any common facilities?

5. Are common group insurance plans available for any employee of the parent and/or any of the subsidiaries?

6. Does the parent and any of the subsidiaries utilize a common or similar workers' compensation insurance policy?

7. Are the parent and/or subsidiaries self-insured, or do they insure through a captive insurance company?

4. Personnel Recruitment/Policies

Training Programs and Manuals

Either or both of these methods can be utilized by a corporation for such matters as sales training, service training, internal accounting procedures, programs to train people in technical skills for key manufacturing positions, employee or personnel manuals, etc.

1. Obtain a detailed description of each of the major operational and administrative areas for which the parent has developed and uses written manuals. Are these manuals used by any of the subsidiaries?

2. Explain which of these, if any, are likewise utilized by any principal subsidiary. Explain which principal subsidiaries use these manuals and which do not.

3. Obtain a description of each type of major periodic training program or school conducted by the parent. Indicate how many people and at what

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

position levels are trained annually under each program and the specific scope of the program coverage.

4. Indicate the extent to which people from which principal subsidiaries, if any, are involved in each of the programs or schools identified above.

5. Intercompany Personnel Transfers

These may be significant depending on the number of transfers and the level of the officer or employee positions involved.

1. For EACH person who became a NEW officer of the parent corporation during the audit years, find out which of them, if any, had previously been an officer or key employee in a subsidiary of the parent. Give the name of each, the position formerly held in the subsidiary, the year each became an officer in the parent, and the number of prior years' service in that subsidiary or any other affiliated corporation.

2. Obtain a list of any NONOFFICER key-employee transfers between affiliates for each audit year. These would include persons at a supervisory level or above at production plants, distribution centers and on administrative staffs, management analysts, key computer personnel, etc. Identify each such key person by name, the year of transfer, the old position held in which affiliate, and the new position held in which affiliate. The list should also include transfers between the parent and subsidiaries and also transfers between subsidiaries.

3. Are there any common personnel policies and procedures implemented or utilized by the parent and/or any of the subsidiaries?

4. Are there any common hiring policies between the parent and any of the subsidiaries?

5. Do both the parent and/or any of the subsidiaries use any common pre-employment tests or screening procedures?

6. Do executives of the parent travel to locations including, but not limited to, manufacturing facilities, office facilities, selling facilities or shipping facilities of any of the subsidiaries?

7. Do executives of any of the subsidiaries travel to the corporate headquarters of the parent?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

8. Have officers and/or employees of the parent or an affiliate transferred to any of the subsidiaries?

9. Have officers and/or employees of any of the subsidiaries transferred to the parent or another subsidiary?

10. Does the parent approve promotions, salary increases, bonuses or other personnel actions of the affiliate's management personnel?

11. Do the employees of the parent and any of the subsidiaries have a common policy and procedures manual?

6. Legal Services

1. Describe the specific services performed by the legal staff of the parent. Also include the number of attorneys on that staff.

2. Describe which particular subsidiaries, if any, are provided services by the legal staff described above. Explain what services it provides for each such subsidiary, and the parent.

3. Explain to what extent and for what specific services private law firms are retained by the parent, or by any particular subsidiary, and indicate to what extent, if any, the same law firm regularly provides services to more than one affiliate.

7. Computer Services

Any major parent corporation today will probably have its own computers to provide a wide variety of services for itself and possibly its subsidiaries.

1. Obtain a list of each location where the parent corporation maintains computer facilities or a data processing system. Explain what type of processing is being performed at each location (such as production data, sales data, inventory control data, shipping data, personnel data, accounting data, etc.) and obtain a complete description of the scope covered by each.

2. Does the parent charge the subsidiaries for these types of services?

3. Obtain a list of each location where each subsidiary maintains computer facilities or a data processing system. Provide the same information as above for each location. Explain the extent to which each of these

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

locations is tied in with one or more computer facilities of the parent to receive or exchange particular data. Also indicate which ones are not using the parent's facilities.

4. Do any of the subsidiaries charge the parent for any other administrative data processing functions?

8. Centralized Accounting

1. Is there a common Chart of Accounts for the parent and subsidiaries?

2. Does the parent or an affiliate perform the accounting functions for any of the subsidiaries?

3. Do the parent and/or any of the subsidiaries use the same system of accounting? Which subsidiaries do not use the system?

4. Do the parent and/or any of the subsidiaries use the same accounting data processing system? Which subsidiaries do not use the system?

5. Are the accounting reports for any of the subsidiaries prepared by the parent or by the parent's data processing system?

6. Do any of the subsidiaries prepare operational reports for use by the parent?

7. Is the payroll of any of the subsidiaries prepared by the parent or by the parent's data processing system?

8. Are any of the subsidiaries charged by the parent for accounting services?

9. Do auditors of the parent audit the books and records of any of the subsidiaries?

10. Do the internal auditors of the parent perform the same functions for any of the subsidiaries?

9. Tax Administration

1. Do the parent and/or any of the subsidiaries use the same CPA firm?

2. Does the parent prepare income tax returns for any of the subsidiaries?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

3. Does a common CPA firm prepare the income tax returns for the parent and any of the subsidiaries?

10. General Administrative Services

1. There may be centralized services rendered at the headquarters of the parent or subsidiaries for itself and some or all subsidiaries other than those services separately covered elsewhere in this check list. If so, describe each of them and indicate to what extent they also are for the benefit of any particular subsidiaries. These could include items such as public relations, affirmative action, governmental regulations, etc.

2. The costs of centralized services may or may not be charged to subsidiaries for whose benefit they are performed. If the parent does apportion these costs, determine the total costs for each audit year, the specific items of service or activity by the parent which these costs represent, the actual amount charged to each principal subsidiary, an explanation of the method or methods used for apportioning these charges to the subsidiaries, and the name of each principal subsidiary which was not charged any portion of these costs.

3. Does the parent sell these services to any of the subsidiaries?

4. Does the parent purchase these services from any of the subsidiaries?

5. Do any of the subsidiaries or affiliates purchase/sell these services from/to other subsidiaries?

6. Does the parent or any of the subsidiaries sell these services to persons outside the group?

7. Is there a centralized relocation program utilizing a major (or company owned) moving company, a real estate company, finance company, etc.?

In conclusion, it must be remembered that the above items are an attempt to provide guidelines for the support of a unitary determination. Not all of the items will be pertinent to every case.

The extent of the evidence necessary to support the determination will depend on the nature of the businesses, the manner in which the companies originally filed their Illinois returns, etc. Whether or not the taxpayer agrees with the auditor's conclusions can also be a factor in the amount of support necessary, however, it is important not to rely too extensively on this factor since the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

taxpayer's opinion might change, a higher ranking official for the group might disagree or the company might simply pay the audit and protest the determination by filing claims. In any of these situations it could be much harder at the later date to obtain any additional information necessary to support a unitary determination than it would have been in the initial audit proceedings.

X. 80/20 COMPANIES

The Department, by definition, uses a waters-edge, domestic combination approach to exclude from the unitary group members with 80% or more of their business activity performed outside the United States.

In addition to determining the composition of the unitary business group, the 80/20 company test is used in determining the amount of sales, which should be excluded from the Illinois numerator of the sales facto under IITA § 304(a)(3)(B)(ii).

For more information regarding the Sales Factor, refer to Chapter 27.

When performing the 80/20 company test:

1. The term “the United States” includes only the fifty states and the District of Columbia. It does not include any territory or possession of the United States or any area over which the United States has asserted jurisdiction or claimed exclusive rights with respect to the exploration for or exploitation of natural resources, such as the Outer Continental Shelf. REF: IITA § 1501(a)(27).

2. The means by which the business activities within the United States are measured will depend upon which apportionment method the company is required to use under IITA § 304.

86 IAC §100.9700(c) defines the mechanics on how to determine whether a company is excluded from the UBG as an 80/20 company or not, as well as excluded Illinois sales under IITA § 304(a)(3)(B)(ii). The appropriate factors to be used in the 80/20 test for different apportioning groups (i.e. IITA § 304 (a), (b), (c), or (d)) apportionment is defined here as well.

86 IAC §100.9700(c)(2)(B) states that the computation of the 80-20 U.S. **business activity test** requires the formation of one or two fractions, as the case may be. These fractions are then averaged to arrive at an overall U.S. business activity in relation to world-wide business activity. The numerators of the fraction represent U.S. property, and U.S. payroll and the denominator represents property and payroll worldwide. If two fractions are present, divide by two. If property or payroll is absent the fraction is divided by one.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

When performing the 80/20 company test for an IITA § 304(a) company, property and payroll within the US, and property and payroll everywhere are formed into two fractions, and averaged together.

$$\left(\frac{\text{Property outside the US}}{\text{Total Property Everywhere}} + \frac{\text{Payroll outside the US}}{\text{Total payroll everywhere}}\right) /2$$

For example if property were .75, or 75%, outside the U.S. and payroll were .95 or 95% outside the U.S. adding the .75 and .95 together and dividing by two would yield a combined .85 or 85% level of activity outside the U.S. This company would not be included as a member under the 80/20 provisions.

The figures shall be the gross figures without any elimination. If the entities involved fall under different apportionment treatment under IITA Section 304 for transportation, insurance, or financial organizations: the numerators will include, "U.S. revenue miles, insurance premiums on property or risk in the U.S. or financial organization business income from sources within the U.S.; the respective denominators are world-wide figures."

- If the person would normally be required to use the formula described in IITA § 304(b) for insurance companies, the test is computed as the ratio of insurance premiums on property or risk in the United States to the worldwide premiums.
- If the person would normally be required to use the apportionment formula described in IITA § 304(c) for financial organizations, the test is computed as the ratio of financial organization business income from sources within the United States to worldwide business income.
- If the person would normally be required to use the apportionment formula described in IITA § 304(d) for transportation companies, the test is computed as the ratio of revenue miles in the United States to Worldwide revenue miles.

Whichever formula is applicable, the figures used should be gross amounts without any elimination, as the elimination of intercompany transactions is appropriate only after it is determined that the two parties are part of a UBG. REF: 86 IAC §100.9700(c).

If either the **property** fraction **or** the **payroll** fraction is zero, the sum of the fractions is divided by one. The companies must have in excess of 20% of their business activities within the United States to be included in the UBG and the companies must be required to use the same subsection of Section 304 of the IITA to apportion their income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Property outside the US (.75)	Payroll outside the US	(0)	(.75) / 1 = 75%
Property Everywhere	Total payroll everywhere		

Property outside the US (0)	Payroll outside the US	(.95)	(.95) /1 = 95%
Total Property Everywhere	Total payroll everywhere		

In the event that if either property or payroll were zero, the result would have the remaining factor divided by one. If it were .95 as in the above example, .95 would be the factor and the company would **not be** included as a member under the 80/20 provisions. If the factor were .75, it would fail the 80/20 test and it **would be** included within the group.

If both property and payroll are zero, the company cannot be an 80-20 company because none of its business activity is outside the U.S.

In computing the property fraction of the 80/20 test, only **property** which is used, **available for use** or **capable of being used** during the tax year in the production of business income should be included. Only real and tangible property is considered in this calculation. Intangible property and property which is used in the production of non-business income, construction-in-progress or property which is permanently withdrawn from use should not be included. REF: 86 IAC § 100.3350(a) and (b).

The 80/20 company test should be performed using the **common accounting period** of the UBG of which the company in question might be a part. Generally, the accounting period of the parent of the possible UBG is used. If there is no common parent, the common accounting period can then be determined on the basis of the accounting period of the member filing an Illinois return who is expected to have, on a recurring basis, the greater or greatest Illinois tax liability. The proration of factors can be done on a specific accounting basis or using the number-of-months method. REF: 86 IAC §100.5265(b)

For potential members which would be entering or leaving the UBG during the taxable year, the 80/20 company test should be applied only to the company's business activities during that part of the year for which the prospective member otherwise qualifies for membership in the UBG. REF: 86 IAC § 100.9700(c)(2)(C).

The property and payroll calculated in the numerator may be stated by the company as a directly paid cost of office ownership, lease or rental, and payroll may be stated through dedicated employees that are paid directly by the foreign operating company. However, the foreign operative may have an arrangement with its U.S. based affiliates and the amounts paid may be more indirect. There are several areas to review when determining the correct amounts to be included in the numerator.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If a corporation is using the property of another entity free of charge (or for a nominal fee), the net annual rental rate for the property in the computation of the property fraction of the 80/20 test of the corporation using the property will be determined on the basis of a reasonable market rate for such property. REF: 86 IAC §100.3380(b)(2).

If a corporation pays a management fee to another entity for (among other things) property being used, the amount of the fee constituting rental reimbursement for the property (or, if this is a nominal amount, a reasonable market rental rate) can be considered rent expense of the corporation using the property and can be included in the computation of the property fraction for the 80/20 test.

A few areas that the auditor may want to question follow.

- Has the foreign corporation hired employees and management directly in the U.S? Or, does the foreign company rely on the management and employees of its U.S. affiliated companies?

- If the U.S. company(s) is performing work for the foreign company, using its U.S. employees and their U.S. office space, what costs may be imputed from these activities? The fair market value of these considerations should be included in the property and payroll numerator.

- The situation may arise where the taxpayer attempts to attribute property or payroll as being US based in order to claim an NOL. The taxpayer may attempt to argue that a portion of U.S. property that was federally capitalized as an intangible asset was actually tangible property and should be used in the 80/20 calculation. The use of property and payroll should be verified for its nature (tangible or intangible), its country of use, and the situation that it is presented in (inclusion for NOL use or its exclusion for tax avoidance) by the taxpayer.

- Who are the corporate officers of the company, and where are they located? A corporate officer is an employee of the corporation if he or she performs services for the corporation and is compensated for that service, directly or indirectly. Treas. Reg. § 31.2121(d)-1(b). An officer or other employee of the parent company who is also a corporate officer of a subsidiary is an indication that the two are unitary, and his or her compensation attributable for services performed for the subsidiary could be US payroll for purposes of the 80/20 test.

Further reference is provided in 86 IAC § 100.3350 for the property factor and 86 IAC § 100.3360 for the payroll factor. A list of waters-edge states is provided in the Exhibits Section. The Audit Manual Chapter 27 discusses the property and payroll factors in detail in the Historical Extracts and Exhibits section.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

A. 80/20 DISREGARDED ENTITY

If a disregarded entity (DE) is entirely foreign in operation, with no US payroll or property, but is owned by a US corporation the 80/20 provisions do not apply in the usual manner. IITA § 102 provides that any term used by IITA shall have the same meaning as when used in comparable context in the United States Internal Revenue Code of 1954.

86 IAC § 100.9750(b)(1) states that any entity treated as a corporation for federal income tax purposes must be treated as a corporation for all purposes of the IITA, and that no entity (other than a cooperative) that is not treated as a corporation for federal income tax purposes may be treated as a corporation for purposes of the IITA. Any entity that elects not to be treated as a corporation separate and distinct from its owners is not a corporation separate and distinct from its owners for Illinois income tax purposes. Consequently, an entity that elects to be disregarded as an entity separate and distinct from its corporate owner pursuant to Treasury Regulations Section 301.7701-3(a) and its corporate owner are a single corporation for all purposes of the IITA. 86 IAC§ 100.9750(b)(1)(A).

Under IITA §§ 102 and 203, the federal treatment of a disregarded entity and its owner applies for Illinois income tax purposes. An entity that is disregarded for federal income tax purposes is disregarded as an entity for Illinois purposes, and the items of base income of the disregarded entity are considered the items of the owner and are taken into account in computing the Illinois base income of the owner. The same treatment extends to the determination of the apportionment factor of the owner of a DE. The activities of the DE are considered the activities of the owner for purposes of applying the apportionment provisions of IITA Article 3.

For purposes of the IITA, the DE's are treated as disregarded. All items of income and loss, as well as the apportionment factors of the DE's, would be included on the parent company's return. Ref: GIL IT 14-0012

If the DE were a US company controlling and holding foreign companies the situation would not apply. Because the US entity were considered disregarded, the 80/20 test would use the DE's parent company's property and payroll along with its own, and any other parent held DE. It would not be considered to be a separate entity from the parent.

XI. UNITARY PARTNERSHIPS

86 IAC § 100.9700 contains the unitary business group rules. Originally, 86 IAC § 100.9700(b) provided that unitary groups could include individuals, trusts & estates, and partnerships as well as corporations. On July 8, 1987 that regulation was amended to provide that only corporations may be members of a unitary business group and 86 IAC § 100.3380(d) [originally § 100.3700(d) and later § 100.3380(c)] was adopted to provide for special apportionment method for corporate partners who are unitary with their partnerships. At the time this section stated: "When the activities of a corporate partner... and the activities of a partnership, disregarding ownership requirements, constitute a unitary business relationship, then the partner's share of the partnership's income and factors shall be combined with the business income and factors of the partner..." As the Department interpreted these rules, § 100.3380(d) only allowed the income and factors of a partnership to flow-up to a corporate partner based on that partner's percentage of ownership in the partnership. Non-corporate partners (including other partnerships in a tiered partnership structure) could not be unitary with their partnerships and the apportionment rules in IITA § 305(a) would apply.

86 IAC § 100.3380(d) was amended effective for tax years <u>beginning</u> on or after June 20, 2002, to require flow-up of a partnership's business income and factors to any unitary partner. Some taxpayers could apply the regulation retroactively as explained later in this section.

For many years the Department took the position that a corporate "general" partner in a partnership was automatically unitary with its partnership while a "limited" partner was not unitary. That policy was in error. The unitary requirements for a partnership are the same as for corporations, except that the provision in IITA §1501(a)(27) requiring more than 50% ownership applies only to ownership of corporations. The ownership requirements for partnerships may be met by a smaller percentage.

86 IAC §100.9700 was amended June 30, 2008 to clarify effective control of a partnership. In 86 IAC §100.9700(e) the language was changed to include not only common ownership being a corporation owning or controlling more than 50% of outstanding stock, but any other entity that possesses <u>direct or indirect ownership sufficient enough to exercise control</u> over the activities of the entity. An example of this relationship would be found where ownership of a general partnership interest gives the partner the authority to act on behalf of the partnership and bind the partnership, <u>regardless of actual ownership share.</u>

Note: This change is effective for all tax years.

Nothing in IITA § 1501(a)(27) prevents a limited partner from being unitary with the partnership as long as the unitary criteria are present. If the auditor determines that a partnership is unitary with a partner, then comments will be included in the auditor's report as to why the partnership meets the unitary criteria in IITA §1501(a)(27).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

A. PARTNERSHIPS OWNED MORE THAN 90% BY PARTNERS

Starting with tax years beginning on or after June 30, 2008 (calendar year 2009) unitary partnerships, other than publicly traded partnerships, owned more than 90% by its unitary partners are included on the Schedule UB. In that case the income and factors of the partnership will be included on the Schedule UB following the instructions for the 2013 and later forms. Intercompany income and sales between the partnership and the unitary group will be eliminated under 86 IAC § 100.5270. The IL-1065 will be completed on a "separate unitary basis" (same as a unitary IL-1120-ST) as defined in 86 IAC § 100.5201(a)(l) and will share in the unitary income and unitary everywhere factors from the Schedule UB.

> Note**:** A publically traded partnership is specifically excluded from this provision under 86 IAC § 100.3380(d)(4) and cannot be included on the Schedule UB. However a publically traded partnership will still flow-up its income and factors to a unitary partner under 86 IAC §100.3380(d)(2).
>
> **Example**
> In 2008 and 2009 an individual owns 100% of corporations A and B that operate car dealerships and 50% of Partnership C, which owns the real estate used by the dealerships. The remaining 50% of Partnership C is owned by corporations A and B. The auditor determines that a unitary relationship exists between Corp A and B, and Partnership C. In 2008 only the corporations can be unitary because they are owned by the same individual. However starting in 2009 the partnership can be included in the unitary group and listed on the Schedule UB under 86 IAC § 100.3380(d)(4). The individual and each of Corporations A and B are "related parties" under IRC § 267(b)(2), so the individual's ownership share is included with the ownership shares of actual members of the unitary group (Corps A & B) in determining the greater than 90% rule.

If a corporation member of the unitary group itself owns an interest in the partnership, then the partnership will be allowed the subtraction modification for income distributable to entities subject to replacement tax for that partner's share of its base income. In addition, if the unitary partnership received any Illinois nonbusiness income or Illinois non-unitary partnership income, that income, net of the share that is distributable income, net of the share that is distributable to a partner subject to replacement tax, would be subtracted from base income in the computation of apportionable business income under the IL-1065 instructions found in Step 6, lines 37 and 38 for 2009 and lines 36 and 37 for subsequent years.

- Write the amount of all nonbusiness income or loss included in base income, net of any related deductions
- plus any recaptured business expenses from Illinois Schedule NB, Column A

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- and any amount distributable to partners subject to replacement tax, from Illinois Schedule NB, Column A
- Include any nonbusiness income from Illinois Schedules K-1-P or K-1-T.

For the TYE 2009 Step 6, Line 38 (line 37 for subsequent years), the IL-1065 instructions provide to:

Write the amount of all **non-unitary** business income or loss included in base income received from any partnership, trust, or estate, of which you are a partner, or a beneficiary, net of any amount distributable to partners subject to replacement tax.

Any Illinois partnership income that flows through to other members of the unitary group will be allocated under IITA § 305: Allocation of Partnership Income by Partnerships and Partners Other Than Residents (86 IAC § 100.3500). Therefore, if the partnership is owned by other members of the unitary group, such as C-Corps, the income that flows through to the IL-1120 from the unitary partnership will be reported on the pass-through lines for non-unitary partnership income. There's no place else to report the pass-through income on the IL-1120. Therefore, if the C-Corps on the Schedule UB own 100% of the partnership, the IL-1065 will show no RT tax liability even though it reports an Illinois apportionment factor because of the subtraction modification for income distributed to entities subject to replacement tax. The RT tax and IT tax will be paid on the groups combined IL-1120, where the business income of the partnership apportioned to Illinois on the separate unitary basis will be included on the Illinois business income from non-unitary partnerships line.

The instructions for the Schedule K-1-P(1) provide guidance for partnerships on how to report the partnership income and apportionment factors to its holding partner when this partner is either unitary or non unitary.

The instructions for the Schedule K-1-P(2) provide guidance for the partner to report the income and apportionment shares that its partnership had reported to it on the Schedule K-1-P in a unitary or non unitary relationship. To determine its portion of business income from a unitary partnership that is not substantially wholly owned by the members of the UBG that is taxed by Illinois, the partner must include its unitary share of the partnership's income and apportionment factors with its own business income and apportionment factors. If the unitary partnership is substantially wholly owned by members of the group, the partnership's business income is apportioned to Illinois using separate unitary apportionment, and the group's share of that income is included on the line for nonunitary partnership business income apportioned to Illinois (line 33 of the 2014 form).

Prior to the amending of the IL-1065 instructions, the pass-through income to the unitary partners was reported by preparing a pro forma IL-1065 using the instructions that

existed for reporting pass-through income from an Illinois partnership on an IL-1023-C. Those IL-1023-C instructions stated:

> "Use a blank Form IL-1065 as a worksheet and complete Steps 4 through 6. Write the amounts from Line 14, of partnership's return. Write zeros on Lines 21 [amount of loss distributed to partner subject to replacement tax], 26 [personal service income], and 27 [share of income distributed to a partner subject to replacement tax]. On Line 20, write the amount of any guaranteed payments made to a partner included in this composite return."

B. INTERCOMPANY ELIMINATIONS – TAX YEARS BEGINNING ON OR AFTER 6/30/2008

86 IAC §100.3380(d)(2)(A) was amended effective for tax years beginning on or after June 30, 2008 (calendar year 2009). This amendment provided that:

- The partner's distributive share of the business income and apportionment factors of the partnership shall be included in that partner's business income and apportionment factors.
- In determining the business income of the partnership, transactions between the unitary partner (or members of its unitary business group) and the partnership shall not be eliminated.
- However, all transactions between the unitary business group and the partnership shall be eliminated for purposes of computing the apportionment factors of the partner and of any other member of the unitary business group.

  EXAMPLE
  As indicated in the worksheet below partner and partnership are engaged in a unitary business. Partner owns a 20% interest in the partnership. Partnership has $10,000,000 in sales Everywhere, $3,000,000 of which are to the partner, and $4,000,000 in Illinois sales, $1,000,000 of which are to the partner. In computing its apportionment factor, the partner will include $1,400,000 from partnership in its Everywhere sales (20% of partnership's $10,000,000 in Everywhere sales, after eliminating the $3,000,000 in sales to partner) and $600,000 from partnership in its Illinois sales (20% of partnership's $4,000,000 in Illinois sales, after eliminating the $1,000,000 in sales to the partner). Also, the partner must eliminate any sales it made to the partnership.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The following schedule illustrates the example in 86 IAC § 100.3380(d)(2)(A):

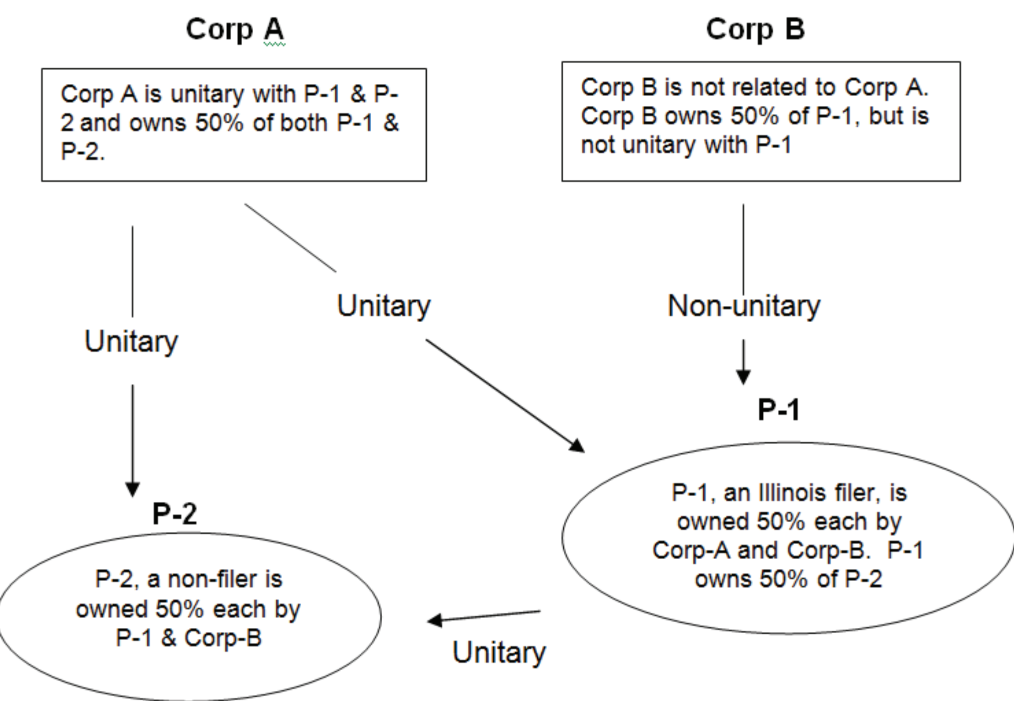
Partner owns 20% of unitary partnership			
	~~	Partnership	~~~~~~~
	Non-IL	ILL sales	TL Sales
Total outside sales	4,000,000	3,000,000	7,000,000
Total sales to partner	2,000,000	1,000,000	3,000,000
Total Line 1 sales	6,000,000	4,000,000	10,000,000
		Reported on IL-1065	
20% partnership flow-	~~~~~~~	Partner	~~~~~~~
up to partner:	Non-IL	ILL sales	TL Sales
Total line 1 sales	6,000,000	4,000,000	10,000,000
Less intercompany	2,000,000	1,000,000	3,000,000
total net sales	4,000,000	3,000,000	7,000,000
20% flow-up	800,000	600,000	1,400,000
		Included in sales factor on IL-1120	

Under the former rule for tax years beginning prior to June 30, 2008, there was no sales elimination between a unitary partner and a partnership or vice versa, unless that elimination is allowed under IITA § 304(f). Under the revised rule sales eliminations are allowed on any intercompany sales that would be included in the sales numerator or denominator of a unitary filer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

C. EXAMPLE – NEW RULES - UNITARY MULTI-TIERED PARTNERSHIP

1. Ownership Flowchart

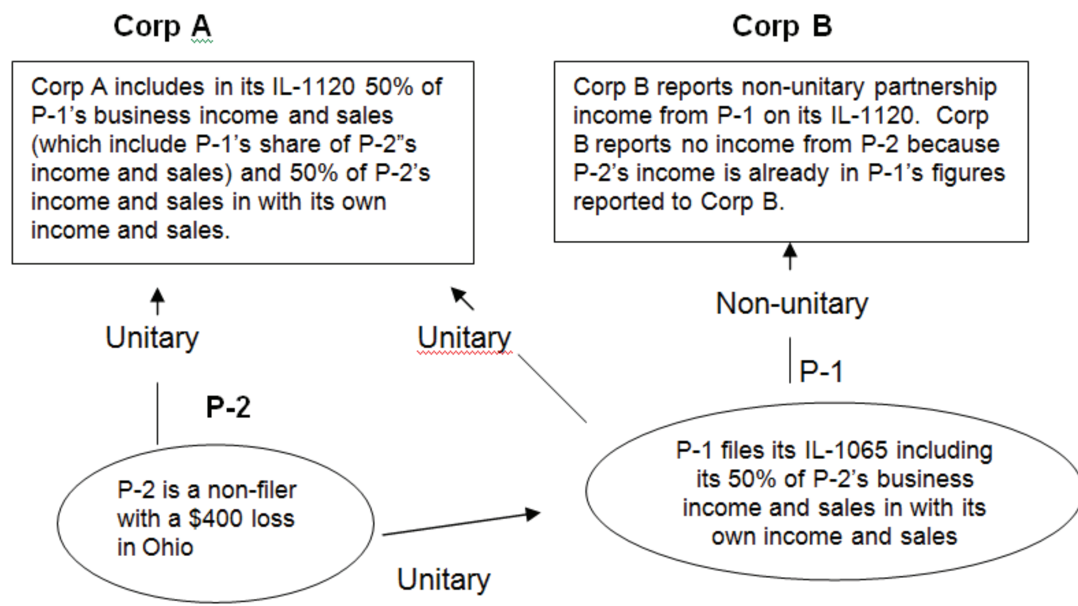


All four entities use a calendar year. For calendar year 2012 Corp A and Corp B are partners in P-1. Corp A is unitary with P-1 and P-2. Corp B is not unitary with P-1.
Corp A and Corp B are each 50% partners in P-1.

- Corp A and P-1 are each 50% partners in P-2.
- P-1 earned $100 profit on rental property in Illinois.
- P-2 had a ($400) loss on rental property in Ohio. P-2 is a non-filer.
- Assume that the rental receipts received by P-1 are $10,000 allocated to Illinois and that the rental receipts received by P-2 are $20,000 allocated to Ohio.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

2. Income Flowchart



Corp A, Corp B and P-1 should file their 2012 returns as follows:

Because P-1 and P-2 are unitary, P-1 must apportion its business income to Illinois by including its 50% share of P-2's business income with its own business income and by including its 50% share of P-2's Everywhere sales with P-1's own Everywhere sales. Line 1 of the IL-1065 of P-1 would show negative $100 [$100 + ($-400 x 50%)], which is $100 of its own income plus 50% of the loss from P-2. P-1's Illinois apportionment factor is 50% which is P-1's $10,000 numerator, divided by $20,000 consisting of P-1's sales Everywhere of $10,000 plus P-2's denominator flow-through of $10,000 ($20,000 x 50%). Ignoring the subtraction modification on the IL-1065 for income distributable to partners subject to replacement tax, P-1's apportioned Illinois income on its IL-1065 is a $50 loss ($-100 x 50%).

Because Corp A is unitary with P-1 and P-2, Corp A would include its share of P-1 and P-2's business income with its own (Corp A's) business income (Already included in federal taxable income on the U.S. 1120). Also Corp A would include on its IL-1120 its 50% share of P-1's Illinois sales and Everywhere sales from P-1's IL-1065. The flow-through factors from P-1 are Illinois sales of $5,000 ($10,000 x 50% ownership) and sales everywhere flow-through from P-1's IL-1065 of $10,000 (P-1's $10,000 in sales Everywhere plus P-1's 50% share of (P-2's sales Everywhere of $20,000, x Corp A's 50% share of P-1).

On its 2012 IL-1120 since Corp B is not unitary with P-1, Corp B must allocate its income separately from P-1. Corp B's U.S. 1120 federal taxable income already includes its 50% share of P-1's gross income $-50 ($-100 x 50%). Therefore this income needs to be backed out of base income on the IL-1120, Part III, line 2b. Corp B then includes on its IL-1120, Part III, line 8 its 50% share of P-1's Illinois net loss reported on P-1's IL-1065 of $-25 (-$50 x 50%).
Note: No income or factors from the partners ever flow down to a lower tier partnership. In the above example, although P-1 and P-2 are unitary, no business income or factors of P-1 flow down to P-2. Also, no income or factors of Corp A flow down to P-1 or P-2.

The following is an example of a unitary, multi-tiered partnership applying the rules prior to years beginning on June 20, 2002.

D. UNITARY CHANGE – TAX YEARS BEGINNING ON OR AFTER 6/20/2002

Effective for tax years beginning on or after June 20, 2002, 86 IAC § 100.3380(d) was amended so that any unitary partner, and not just corporate partners, must include in its business income and apportionment factors its partnership share of the business income and factors of the partnership (including a publically traded partnership). If the partner is itself a partnership, it will include the business income and factors flowed up to its unitary partner, or in the case of a nonunitary partner, in the computation of Illinois income that partner must include in its net income under IITA § 305(a).

Note: If the partnership is owned greater than 90% by a unitary partner for a tax year beginning on or after June 30, 2008 (calendar year 2009), then refer to the section "Partnerships owned more than 90% by unitary partners".

86 IAC § 100.3380(d)(3) allows a partner's shares of business income and apportionment factors to be included in a UBG with the partnership if the following occur:

- the partnership is itself a partner in a second partnership and one of its partners is engaged in a unitary business with the second partnership, and;

- the partner and partnership are not required to use differing apportionment formulas (86 IAC § 100.3380(d)(3)(A))under IITA § 304, or;

- the partner is to be excluded under the 80/20 provisions(86 IAC § 100.3380(d)(3)(B)).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

That partner shall include in its business income and apportionment factors its share of the partnership's share of the second partnerships business income and apportionment factors.

This provision became effective for tax years beginning on or after June 20, 2002. 86 IAC § 100.3380(a) provides the following:

For tax years beginning prior to the effective date of the rulemaking adopting a method of apportioning business income, the Department will not require a taxpayer to adopt that method; provided, however, if any taxpayer has used that method for any such tax year, the taxpayer must continue to use that method that tax year. Moreover, a taxpayer may file a petition under 86 IAC § 100.3390 of this Part to use a method of apportionment prescribed in this Section for any open tax year beginning prior to the effective date of the rulemaking adopting that method, and such petition shall be granted in the absence of facts showing that such method will not fairly represent the extent of a person's business activity in Illinois.

Therefore if the original returns filed by the taxpayer for tax years beginning prior to June 20, 2002 reported the flow up of the business income and factors from a second-tiered partnership, then no petition is required to apply revised 86 IAC §100.3380(d) retroactively. However the auditor must determine that the taxpayer followed the examples in 86 IAC § 100.3380(d)(4) because it's possible for the taxpayer to use a unitary method that is not identical to the method prescribed in 86 IAC § 100.3380(d), which is not allowed unless the taxpayer received a PLR authorizing an alternative apportionment method.

If the taxpayer did not apply the method described in new subsection (d) to a tax year beginning before June 20, 2002, and now wants to use that method, a petition must be filed with Legal Services requesting permission to do so, which will ordinarily be granted if the year is in statute. If the taxpayer wants to file for permission to use revised 86 IAC §100.3380(d) retroactively, then the taxpayer should give the auditor a signed letter requesting permission to apply revised 86 IAC 100.3380(d) retroactively along with any amended returns for years that are in statute. The auditor should then submit the request to technical support. See Chapter 27 of Audit Manual for more information on Section 304(f) relief.

The following comprehensive example best illustrates how the taxpayer should file. Note that this example will also apply to a publically-traded partnership.

E. EXAMPLE – OLD RULES - UNITARY MULTI-TIER PARTNERSHIP

Here is an example of the actual mechanics involved in reporting the incomes and factors from a unitary partnership and lower tiered partnerships that are not unitary. The example is as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Corporation owns a 40% general partnership interest in partnership A. Partnership A owns a 40% interest in each of partnership B and partnership C. Partnership A's income consists entirely of interest income and its shares of the incomes of B & C. Partnership A has no payroll or tangible property. A unitary relationship exists between Corporation and partnerships A, B, and C.

The Corporation and A are required to be unitized on the corporation's separate or combined Form IL-1120. Included in the Corporation's business income will be the Corporation's 40% share of A's interest income, Corporation's factor will include its apportionable 40% share of A's Illinois and everywhere receipts, property and payroll. Since A has no property or payroll, only the 40% share of A's receipts factor will be included in the Corporation's factors. No portion of B's and C's factors will be reported on the Corporation's IL-1120 and no portion of their business income will be included in its business income.

Partnership B & C must determine the fraction of their business income which is apportionable to Illinois using their own factors. Partnership A must then include its partnership share, or 40%, of the Illinois portion of the income of B & C in its Illinois net income. Corporation must then include its 40% share of A's shares of the business income apportioned to Illinois by B & C in its Illinois net income. Corporation would report its Illinois portion of the incomes of B & C by (i) subtracting its 40% share of A's share of the business incomes of B & C from its base income as "Non-unitary partnership business income (loss)" on Line 2b of Part III of its 1997 IL-1120 and (ii) adding its 40% share of A's share of the Illinois portion of the business incomes of B & C as "Non-unitary partnership business income (loss) apportionable Illinois" on Line 10 of Part III of its 1997 Form IL-1120.

F. IL-1065 Return and Audit

In the case of a partnership that is owned less than 90% by the unitary partner or the unitary group that the partner is a member of, then the partnership will not be included on the Schedule UB and its IL-1065 will not share in the income and everywhere factors of the unitary partner. The IL-1065 will continue to be filed on a separate basis and only the income and factors of the partnership will flow up to the unitary partner. Since the IL-1065 is on a separate, non-unitary basis, there are no sales eliminations shown on the IL-1065. Only the sales that flow-up to the unitary partner are eliminated.

Example

For calendar year 2009 Corporation A and Corporation B are unrelated oil companies. Each corporation (partner) owns a 50% interest in Partnership P, an oil refinery. Partnership P is unitary with Partner A (Corp A), but not Partner B

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(Corp B). Partner A sells $500 million in crude oil to Partnership P ($100 million destination Illinois) to be processed into gasoline. Partnership P then sells $750 million ($100 million destination Illinois) in gasoline back to Partner A and $500 million in gasoline to Partner B. Partner A has total sales everywhere on line 1 of its federal Form 1120 of $1 billion ($200 million in Illinois) and Partnership P has $2 billion sales everywhere on its federal Form 1065 ($300 million in Illinois). Partner B has sales of $1 billion on its federal Form 1120 (None in Illinois) and makes $100 million in crude oil sales to Partnership P. Assume each company has base income of $100 million.

Partnership P files its IL-1065 as follows:

IL-1065	2009
Unmodified base income	100,000,000
Income distributed to partners subject to replacement tax	-100,000,000
Base Income	0
Sales everywhere	2,000,000,000
Illinois sales	300,000,000
Illinois sales factor	0.1500
+++++++++++	
Net income subject to RT tax	0

Partnership P checks the box on its IL-1065, Step 1, Line G indicating that it is a member of a unitary group and writes Partner A's federal ID number in the box indicating that Partner A is the UB filer.

> Note: Since unitary Partner A owns 90% or less of Partnership P, the IL-1065 is filed on a separate basis; no income or factors flow down to the IL-1065 from unitary Partner A. The sales factor on the IL-1065 is NOT reduced by intercompany sales because that would distort the Illinois partnership income distributed to non-unitary partners, as in this case Partner B.

Partnership P then sends both partners A and B a Schedule K-1-P indicating each partner's share of the federal taxable income in Column A, and in Column B reports the Illinois portion of that income. In the example Partnership P indicates on each K-1-P,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Step 4, Column A each partner's share of total federal income, which is $50,000,000 ($100,000,000 x 50%) and in Column B shows the amount allocated to Illinois, which is $7,500,000 ($50,000,000 x 15%).

Since the K-1-P does not show any sales figures, Partnership P will have to send unitary Partner A a separate schedule indicating total sales, intercompany sales with Partner A, and Illinois sales net of eliminations. That schedule will show the following amounts:

	Everywhere	**Illinois**
Total Sales everywhere and Illinois	2,000,000,000	300,000,000
Less 100% of sales to Partner A	-750,000,000	-100,000,000
Sales net of intercompany	1,250,000,000	200,000,000
Partner A's ownership percentage	50.00%	50.00%
Sales flow-through to Partner A	625,000,000	100,000,000

The year-end sales flow up from the partnership to the unitary partner is 100% of the partnership's sales as reported on the federal Form 1065 less 100% of sales made by the partnership to any unitary partners times unitary partner's ownership percentage. The unitary partner then includes these sales amounts on its IL-1120.

G. IL-1120 FILERS

Continuing the above example Partner A and Partner B each reported Illinois base income (net of modifications but before apportionment) of $100,000,000. This already includes Partner A and Partner B's 50% share of Partnership P's unmodified taxable income. A's federal Form 1120 line 1 sales are $1 billion, which includes $200 million in Illinois sales. This includes $500 million in crude oil sales made to Partnership P, including $100 million Illinois sales to P. Non-unitary Partner B also reported line 1 sales of $1 billion on its federal Form 1120. Partners A and B complete their IL-1120's as follows:

	Partner A	Partner B
IL-1120	2012	2012
Base Income	100,000,000	100,000,000
Less Non-unitary partnership income	0	50,000,000
Base income subject to apportionment	100,000,000	50,000,000
Sales everywhere per federal 1120	1,000,000,000	1,000,000,000
Add sales flow-through from P	625,000,000	0
Less 100% of Partner A's sales to P	-500,000,000	0
Total sales everywhere on IL-1120	1,125,000,000	1,000,000,000
Illinois sales	200,000,000	0
Add IL sales flow-through from P	100,000,000	0
Less 100% of IL sales to P	-100,000,000	0
Total IL sales on IL-1120	200,000,000	0
Illinois sales percentage	0.1778	0
Illinois net income	17,777,778	0

Partnership P is unitary with Partner A, but not Partner B. Partner A includes it's 50% share of Partnership P's total sales and P's Illinois sales, net of intercompany eliminations, in with its own sales on the IL-1120. Since Partner A made $500 million in crude oil sales to Partnership P ($100 million in Illinois), it reduces its sales factor by 100% of these sales.

Since Partner B is not unitary with Partnership P, its 50% share of P's income is reported as non-unitary partnership income. None of the factors of partnership P flow up to Partner B's IL-1120; nor is there any sales elimination between B and P. On its 2009 IL-1120, Step 4, Line 35 Partner B reports its non-unitary share of Illinois income from Partnership P of $7,500,000 (($100,000,000 x 15%) x 50%).

H. 80/20 PARTNERSHIPS OR PARTNERS

If either the partnership or the partner is an 80/20 company, then the unitary rules under 86 IAC § 100.3380(d) do not apply. In that case an Illinois partnership will file an IL-1065 on a separate basis, and the corporate partner will report the partnership's income or loss as non-unitary.

> Note: In determining if the partnership is an 80/20 company, only the property and payroll of the partnership is considered, if it's a three-factor company. No factors of the partners will be included in the 80/20 test.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

In addition, the partnership cannot be included in a unitary group if the partnership and the partner apportion their income under different apportionment formulas under IITA § 304. Ref: 86 IAC § 100.3380(d)(3)(A).

I. PARTNERSHIPS OWNING CORPORATIONS

Occasionally a partnership will own one or more corporations. In the first paragraph of 86 IAC § 100.3380(d)(1) partnerships may be members of unitary business groups and, if a member, will have to use combined apportionment. That subsection then creates an exception to the combined apportionment requirement in the case of a partnership that is unitary with one of its partners. A partnership must use unitary apportionment if it owns one or more corporations and is in a unitary business with them.

In that situation, the group will have to complete a Schedule UB that includes the partnership, and follow the Schedule UB form instructions for a unitary group that includes an S corporation. The Schedule UB Instructions were updated in 2013 to include detailed instructions on how a partnership would file its return if a member of a unitary business group.

86 IAC § 100.9700(b) was amended effective June 30, 2008 to allow non-corporations to be members of the unitary group. That change is retroactive, but taxpayers may have a valid claim under the Taxpayer's Bill of Rights that no deficiency can be assessed for prior years.

J. UNITARY GROUPS COMPRISED ONLY OF PARTNERSHIPS

A unitary group can be composed only of partnerships It was only the prohibition in 86IAC §100.9700(b) that limited unitary groups to corporations that prevented partnerships from forming their own unitary group. 86 IAC §100.9700(b) has since been amended to allow unitary groups composed of non-corporations. The change is not based on a statute change, so it is effective for all years.

The filing will be undertaken with one Schedule UB (unless there are partnerships with different taxable years, in which case a separate Schedule UB will need to be prepared for each taxable year),and each partnership filing an individual IL-1065 with the Schedule UB attached.

K. SCHEDULE AUB II

Unitary partnerships will be processed using the supplemental schedule AUB II.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

XII. HOLDING COMPANIES

A holding company is generally formed to hold the stock, assets or liabilities of another corporation or other corporations. Holding companies can appear in any tier of a corporate structure and can perform a large variety of functions or virtually no functions at all.

A holding company with no assets or employees can be unitary with its subsidiaries as long as the subsidiaries control the operations of the holding company. It is not necessary for functional integration to exist in the normal manner when one of the companies is a shell company. Ref: Consol, Inc. v. Glen Bower, Cook County Circuit Court, No. 01 L 51196 (2003).

The unitary combined apportionment law in Illinois generally provides for the unitization of whole corporations. To the extent that a taxpayer or the Department would attempt to unitize a whole corporation or group of corporations with a portion of another corporation, either the requirements of 86 IAC § 100.3010(b) of the regulations pertaining to discrete businesses within a single corporation would have to be met or IITA § 304(f) relief would have to be granted.

One common example of the application of the discrete business rule arises when unitizing holding companies. If a holding company is unitary with two or more unitary business groups that are not unitary with each other, a portion of the holding company's net income or loss and factors should be allocated to each of the unitary business groups. IITA § 1501(a)(27)(B) provides not only for the inclusion of a holding company within a unitary group under subsections of IITA § 304, but the splitting of the holding group in a pro rata basis with more than one group when members of the group fall into the different subsections of IITA §304 (a)-(d). However, this principle would apply when there are two three-factor groups that are not unitary with each other because they are engaged in discreet businesses.

For information regarding the unitary determination for Holding Companies, refer to Audit Manual Chapter 29.

XIII. OIL AND GAS INDUSTRY

Companies operating in the oil and gas sector are predominantly involved in vertically integrated processes (a hallmark of unitary relationships). This portion of our discussion will concentrate on the oil and gas segment of the business and discuss the relative audit issues which are most commonly encountered in the audits of oil companies. A listing of terms which are commonly used in the oil and gas industry and their definitions may be accessed in Chapter 47 of the Audit Manual.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

While the oil and gas industry is predominantly engaged in steps in a vertical process, during the last few decades the major oil companies have diversified into businesses which were not traditionally associated with the oil sector. For example, some of the oil companies are engaged in agriculture and meat packing, manufacture of electronic parts, packaging materials and containers, real estate development, food marts, underwriting life & casualty risks, etc. However, a typical oil and gas company would normally be engaged, either through its divisions or subsidiaries, in the following businesses or operations:

1. Exploration and Production.
2. Refining and marketing.
3. Transportation of oil, gas and feedstock. For example, pipeline companies, marine transportation companies, etc.
4. Chemical products and by-products.
5. Research and development of related products, processes and methods.
6. Motor club operations.
7. Credit card operations.

In addition to the above, an oil company will typically have a credit corporation as a subsidiary which will cater to the group's financial needs, and more specifically, finance the marketing of gasoline. It may also have subsidiaries engaged in coal and metal mining.

As in any audit, alterations that are made to the unitary business group (particularly in respect to pipeline and/or credit subsidiaries) must be supported by as many facts as possible relating to the actual operations and the interrelationships of the companies involved.

> Note: For years prior to tax years ending 12/31/2000 oil and gas companies were subject to the three factor apportionment regimen. For a discussion of specific issues pertaining to the oil and gas company property and payroll factors (for audits prior to the tax years ending 12/31/00, or applicable Section 304(f) situations) see the Historical Extracts and Exhibits section. A more comprehensive discussion of the property and payroll factors at large can be found in Audit Manual Chapter 27.

A. Partnerships and Joint Ventures

It is not unusual for a production and exploration subsidiary of an oil company to conduct its activities through partnerships, joint ventures or joint operating agreements with other oil companies. There are, basically, three types of agreements which oil and gas companies become involved in:

1. General and/or limited formal partnerships
2. Joint ventures
3. Joint operating agreements

IITA § 1501(a)(16) provides the definition of partnership and parallels the IRC § 761(a) definition of a partnership. A partnership may be considered a syndicate, group, pool, joint venture or other unincorporated organization through or by means of which any business, financial operation, or venture is carried on. It is not considered to be a trust, estate or a corporation.

The related IRC regulations specify that a simple, joint undertaking, in which expenses are shared or in which there is a mere co-ownership of property does not constitute a partnership. Tenants in common may be partners "if they actually carry on a trade, business, financial operation or venture and divide the profits thereof." REF: IRC § 1.761-1(a).

A discussion of partnerships and the oil and gas industry can be found in ARTHUR YOUNG'S OIL AND GAS, Federal Income Taxation, 1988 Edition, chapter 26. The following is an excerpt from that chapter.

> The hallmarks thus laid down by the Code and regulations are broad enough to encompass most, if not all, of the forms of joint operation of properties in use in the oil and gas production industry, including not only formal partnerships, general or limited, but also joint ventures and, subject to the exception provided on the making of timely elections, co-owners operating through joint operating agreements. It would appear that the latter-i.e., joint operating agreements-are included even though the participants have reserved the right to take their respective shares of production in kind or to dispose separately of such shares. Even though it can be said that by reason of such terms such organizations do not have a joint profit objective, they must, under the partnership regulations, be deemed to have made or make timely elections to be excluded from the partnership provisions of the Code [and from the requirement of filing federal Forms 1065]...

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

A joint operating agreement that contains a "take-in-kind" clause may still have a joint profit objective, and therefore, have the necessary business purpose to qualify as a partnership. This position is supported by the case of Madison Gas and Electric Company case, 72 TC 521 (1979). In that case, the Tax Court found that a valid partnership may exist for federal income tax purposes even though a joint operating agreement contained a take-in-kind provision.

> A synopsis of the Madison Gas and Electric Company case can be found in the audit manual chapter 49.

Formal partnerships, general and limited, are subject to the provisions of Subchapter K of the Internal Revenue Code. They are required to file federal Forms 1065. A limited partnership is used to a greater extent in the oil and gas industry than a general partnership since it provides a way to attract financing from a large number of investors in return for a limited liability for the partnership's debts. The IRC also contains some beneficial provisions to limited partners regarding intangible drilling costs. In comparison, general partnerships have the disadvantage of unlimited liability for partnership debts.

Joint ventures and joint operating agreements are, essentially, informal partnership arrangements. They are also subject to the provisions of Subchapter K, however, they can, if they meet certain qualifications, elect to be excluded from the provisions. If this election is made, they are not partnerships for Illinois purposes. See 86 IAC § 100.9750(d)(1)(B) .

To qualify for the exclusion election, the organization must be for:

1. Investment purposes only and not for the active conduct of a trade or business; or

2. The joint production, extraction, or use of property, but not for the purpose of selling services or property produced or extracted; or

3. Dealers in securities for a short period of time for the purpose of underwriting, selling or distributing a particular issue of securities. REF: IRC Section 761(a)

The second qualification was added to the Code specifically to cover the joint operation of oil and gas producing properties through so-called joint operating agreements.

IRC § 761(a) also requires that the members must be able to compute their separate shares of income without the necessity of computing the taxable income of the partnership.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

B. Rules Governing the Treatment of Partnership Income

The operations of oil and gas partnership operations are, generally, steps in the vertical integration of an oil company. Therefore, the corporate partner's share of the partnership's income and factors are unitary and should be accounted for using 86 IAC § 100.3380(d). The unitary nature of the operations cannot simply be ASSUMED however. The nature of these partnerships and their relationship with the corporate partner must be examined and documented in the audit file.

The income from an oil and gas partnership is not excluded from 86 IAC § 100.3380(d) treatment simply because it is limited in nature. If the limited partner is operationally involved in the partnership and the other limitations of 86 IAC § 100.3380(d) do not apply, the partner's pro rata share of the income and factors can be included in the partner's return.

If the operations of the partnership and the corporate partner are not unitary or the limitations prohibiting the use of 86 IAC §100.3380(c) apply, IITA § 305 would govern the allocation of the partnership income. Refer to IITA §305, 86 IAC §100.3380(d) and the Partnership Income section of the Audit Manual Chapter 28 for additional information on the treatment of partnership income.

C. THE OUTER CONTINENTAL SHELF (OCS)

The Outer Continental Shelf Lands Act extended the jurisdiction of the United States to property located beyond the 3-mile state jurisdictional limit to the area of the ocean where the outer continental shelf ends. The federal jurisdiction in the area extends to all artificial islands and fixed structures erected on the shelf. The states are prohibited from imposing taxes, either directly or indirectly, on the revenues derived from areas under federal jurisdiction, such as the OCS.

Taxpayers have contended that since the states are prohibited, by federal statute, from taxing the revenues from the OCS, those revenues should be excluded from the tax base. They further felt that the property, payroll and revenues from these activities should be excluded from the apportionment formula computations. The states, on the other hand, have taken the position that OCS activities are includable in both the tax base and in the denominators of the apportionment formula factors.

On November 8, 1988 the Supreme Court held, in the case of Shell Oil Company vs. Iowa Department of Revenue, 488 U.S. 19 (1988) that the Federal preemption is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

"exclusively concerned with preventing the adjacent states from asserting, on the basis of territorial claims, jurisdiction to assess direct taxes on the Outer Continental Shelf...This is a far cry from prohibiting a State from including income from OCS-derived oil and gas in a constitutionally permissible apportionment scheme."

The Court further held that the inclusion of earnings derived from these offshore drilling operations were includable in a state's pre-apportioned tax base:

> It is irrelevant for the makeup of the apportionment formula's unitary tax base that third party sales occur outside of the State...Actual sales on the OCS (as opposed to internal accounting sales) are not taxed directly by any State because they are not included in the numerator of the sales ratio...From the inclusion of such sales in the apportionment formula's tax base, it does not follow that the dollar amount derived from the formula (which is a fraction of the unitary tax base) includes income not fairly attributable to Iowa.

When dealing with offshore drilling operations then, earnings from any activities occurring on the OCS should be included in the tax base and any property, payroll and sales should be included in the everywhere factors of the apportionment formula. Oil in transit from this area should be included in the destination state's property factor numerator. Sales taking place on the OCS would not be included in any state's sales factor numerator, however any oil that is piped out or hauled out of the OCS area by the driller and subsequently sold can be allocated to the destination state for sales factor purposes.

The Florida Supreme Court in the case of Shell Oil Company vs. Department of Revenue, State of Florida, also upheld the position that revenues from offshore drilling operations could be included in business income. Refer to Chapter 49 (new) for synopses and the complete case citations of the Shell Oil Company cases.

XIV. UNITARY PROCESSING ISSUES

If the audit results in affiliated companies being separated into multiple unitary groups, then multiple audits should be prepared.

The IDR-229-UB will be submitted at the beginning of the audit. Each audit will be transmitted on a separate track number, as generated by Gentax. The audits must also contain separate PROD-1s. However, the tracked documents must be kept together when transmitted to Technical Review. A note requesting that the cases be kept together should be attached to

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

the outside of the files and each audit should contain cross-references to the other track numbers involved.

The Audit Planning Section should be contacted to obtain the additional track assignment(s).

Note: For tax years ending on or after December 31, 1993, any Illinois filer who is a member of a unitary business group MUST file a combined return for Illinois.

A. Original Returns Filed on a Separate Company Basis

If original returns were filed on a separate company basis and the audit determines that the taxpayers are members of a unitary group, do the following:

- One combined Auditor's Report (EDA-25) should be prepared under the designated agent's name and FEIN.
- The UB-229 should be completed and signed by the taxpayer.
- The as-filed figures from each member's GenTax account should be totaled and entered in Column A. Column C should reflect the combined audit adjustments.

Note: Column A obviously will not match the GenTax information for any one of the members. Also, it will not be necessary to "zero out" the returns of the members who are being combined with the designated agent. When the audit is processed, the original returns of those members will be transferred by Audit Perfection.

The as-filed combined factor for EDA-25 Column A purposes is determined by dividing Illinois business income by Apportionable Business Income.

B. Audit adds and/or deletes members

(1) **Adding Member(s) -** One combined Auditor's Report (EDA-25) should be prepared. Column A should reflect the original combined return figures plus the as-filed figures for the added member(s). Column C should reflect the combined audit adjustments.

(2) **Deleting member(s)** – The combined EDA-25 should reflect the as-filed figures of the combined return in Column A. Column C should reflect the combined audit adjustments with the deleted member's figures removed.

The deleted member or members should have their liability established on an EDA-25 and a signed IL-870 should be obtained.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- If the deleted member is a loss company, the Auditor should prepare an IL-1120-X and obtain the taxpayer's signature. Column A on both the EDA-25 and the IL-1120-X should reflect zeros. However, the company will retain the combined return's filing date, statute, etc. In the comment section on both the EDA-25 and the IL-1120-X, it should be noted that this taxpayer was included in the original unitary combined return for FEIN: XX-XXXXXXX. In both cases, the audit should be closed with its own track, audit report, workpapers, PROD-1, etc.

- If the deleted companies are members of their own unitary group, a designated agent should be selected and the EDA-25 or IL-1120-X should be completed on a combined basis.

C. Audit both adds and deletes member(s)

If members are both added and deleted from the combined return, the EDA-25 will still be completed on a combined basis with the as-filed figures of the combined return and the added members totaled in Column A and the combined audit figures in Column C.

D. No Liability APE's/ IL Filer(s) within a Separate Filing UBG

- If there are no line changes to the returns as filed, EDA-25s are not needed for no liability audits (NL) of Illinois filers who are members of a unitary group filing separate unitary returns.

- If during the course of an audit which results in a liability, it is determined that there are NL years (APEs) for a company (or companies), whether separate apportionment, separate unitary or combined Illinois returns have been filed, an EDA-25 does not need to be prepared if there are no line changes involved.

- If there are audit adjustments, which result in line changes but in no additional liability, and the taxpayer agrees with the changes, the auditor should secure a signed IL-1120-X detailing these changes. This is the only manner in which a taxpayer is bound to an agreement of the specific audit findings.

  - A signed IL-870 does not serve the same purpose as a signed IL-1120-X in a NL situation. By signing the IL-870, the taxpayer is agreeing only to an increase or decrease in tax liability, not to the specific line changes. The IL-1120-X will be processed into GenTax and the audit adjustments will be finalized.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- If, however, there are audit adjustments, which result in line changes but in no additional liability and the taxpayer does not agree with the changes, EDA-25s should be prepared to reflect the line changes.
    - Usually these audits involve Illinois net losses, which may be carried forward to offset liabilities in later years. The taxpayer will have the ability to disagree with the adjustments to the loss year when the loss is carried forward and a liability or overpayment is established. Although the line changes in this situation are not finalized, they will be entered into GenTax for future use.

E. Un-agreed Audits

1. Separate original returns determined to be unitary

When returns are filed on a separate company basis and the audit determines that the taxpayers are members of a unitary group:

one combined Auditor's Report (EDA-25) should be prepared as detailed under tax years on or after 12/31/93, Agreed Audits. The Notice of Deficiency (NOD) will be based on the combined EDA-25 and issued to each company which is included in the combined return.

2. Combined return filed. Audit adds/or deletes member(s)

The EDA-25 should be prepared as detailed under Tax Years on or after 12/31/93, Agreed Audits, in each situation for agreed audits. In the case of added members, the NOD will be issued to the designated agent and the added member(s).

In the case of deleted member(s), the NOD will be issued to the designated agent. A separate NOD will be issued to the deleted member(s) establishing their separate company liability.

3. EDA-27 Explanation of Adjustments

Adjustments combining separate companies or adding them to the combined return will not be reflected on the EDA-27 because Illinois business income changes are not captured. Only the changes made for the other issues appear in Column B and flow through to the EDA-27.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

XV. Application of the EDA-25

Note: Verifying Col A of the EDA-25 is discussed in Audit Manual Chapter 20 under the section, “Reviewing Tax Returns For Column A Determination”. Specific applications for completing the EDA-25 are discussed in Audit Manual Chapter 20 under the section, “Documentation Needed in Completing an Audit”.

For information regarding restricted interest, refer to Chapter 42.

A. Obtaining the Figures for Column A of the EDA-25

1. UB Spreadsheets 2010 09-09-14

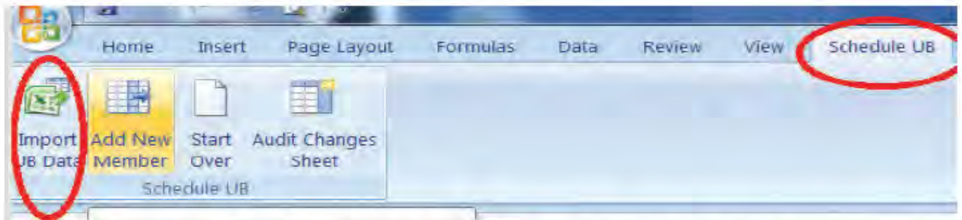
Note: For the years 2010 and forward, the schedule UB is found within the return in Gentax, attached as part of the return.
For the years 2009 and prior, the schedule UB is found separately from the return within Gentax. There are two separate macros which reflect this difference. Use care when selecting the appropriate macro to use the spread sheet which will be imported from Gentax.

In Gentax: select the business accounts, returns, and the return year and the schedule UB from within the year of audit. Select the export button, and select the export to Excel button.

Before using the macro workbook, the information needs to have been exported from Gentax using the “Export to Excel” option and saved as an Excel workbook.

On the macro worksheet, select the Schedule UB.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights



Four buttons on the Schedule UB tab of the ribbon (toolbar) will be present.

1. The "Import UB Data" button runs a macro that imports UB data from the file that was exported from Gentax, and saved as an Excel workbook.

2. The "Add New Member" button runs a macro that adds one additional column (if the last used "Per Audit" worksheet column contains entries)

3. The "Start Over" button runs a macro that deletes everything but the instructions worksheet.

4. The "Audit Changes Sheet" button runs a macro that adds two additional worksheets: "Audit Changes" and "Adjusted UBG".

   - Audit Changes worksheet summarizes the audit changes made on the "Per Audit" worksheet. It will be used to enter the audit changes into Gentax.

   - Adjusted UBG worksheet reflects the UBG after the audit changes.

Specific instructions for working with the worksheets are contained in the instruction page for the macro for the fill in fields (shaded light blue).

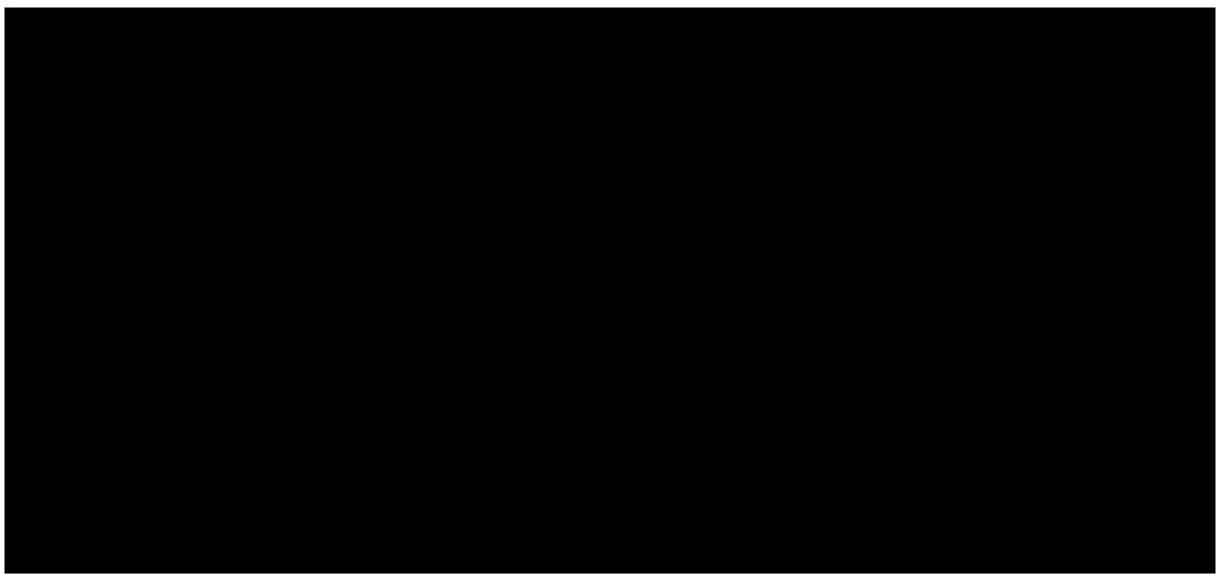
2. <u>UB Spreadsheets 2009 09-09-14</u>

   Note: For the years 2009 and prior, the schedule UB is found separately from the return within Gentax. For the years 2010 and forward the schedule UB is found within the return on Gentax. There are two separate macros which reflect this difference. Use care when selecting the appropriate macro to use the spread sheet which will be imported from Gentax.

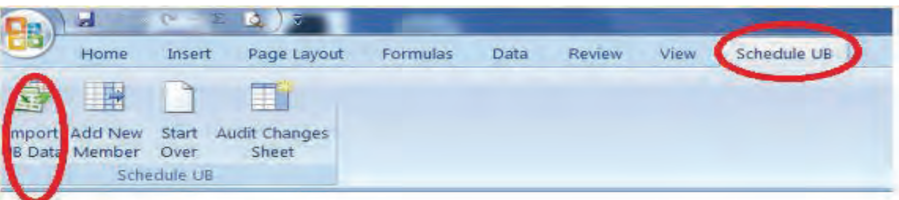
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

In Gentax: select the business accounts, returns, and the schedule UB for the year of audit. Select the export button, and select the export to Excel button.

Before using the macro workbook, the information needs to have been exported from Gentax using the "Export to Excel" option and saved as an Excel workbook.



On the Macro for the 2009 or prior year, select Schedule UB button. There are four buttons on the "Schedule UB" tab in the upper left corner.



1. The "Import UB Data" button runs a macro that imports UB data from the file that was exported from Gentax, and saved as an Excel workbook.

2. The "Add New Member" button runs a macro that adds one additional column (if the last used "Per Audit" worksheet column contains entries)

3. The "Start Over" button runs a macro that deletes everything but the instructions worksheet.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

4. The "Audit Changes Sheet" button runs a macro that adds two additional worksheets: "Audit Changes" and "Adjusted UBG".

    - Audit Changes worksheet summarizes the audit changes made on the "Per Audit" worksheet. It will be used to enter the audit changes into Gentax.
    - Adjusted UBG worksheet reflects the UBG after the audit changes.

Specific instructions for working with the worksheets are contained in the instruction page for the macro for the fill in fields (shaded light blue).

B. Using The CXC25SUP

In The Excel Stand Alone Program To Obtain Col A Figures On The EDA-25
This supporting schedule is **required** to be used to calculate the EDA-25 "As Filed" column when the auditor is adding separate Illinois filers to a combined return or combining two or more unitary groups that did not originally file as one unitary group.

The auditor must include in the audit comments that this schedule has been prepared for the audit and a copy of this schedule must be put in the audit file immediately following the EDA-25.

Complete the CXC25SUP, the auditor should complete all of the information requested in the fill in boxes that pop up in the schedule. Once the requested information has been entered in the beginning of the schedule and the auditor can view the completed schedule, a few additional items are required to be done to complete the schedule. These changes have to be made manually on the schedule at this time.

To complete the necessary changes the auditor will need to unprotect the schedule. To do this the auditor will have to use the tool bar at top of the excel spreadsheet and click on Review and then click on Unprotect Sheet.

CXC25SUP - Supporting Schedule

See Example of adding separate Illinois filers to a combined return on following page.

SCH XVIII — COMBINED AS-FILED CALCULATION FOR AUDITOR'S REPOI — 09/09/1999
Supporting Schedule

XX 9/9/1999 — XXX Inc — FEIN: 22-XXXXXXX

FEIN	22-XXXXXXX	54-XXXXXXX	59-XXXXXXX	58-XXXXXXX	52-XXXXXXX	36-XXXXXXX

Total Tax As-Filed	401,415	0	5	5,799	91,612	4,819	503,650

Complete the supporting schedule and add separate Illinois filers to a combined return, note that for the parent name column, enter the name of the combined group filer that the separate filers are being added to. In the subsidiary's name columns, enter the information for the separate filers that are being added to the combined return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Changes that are needed on this schedule when it is being completed are as follows:

1) See the above number one - in the cell above the tax year – enter FEIN and then in the same column above each filer name enter the federal identification numbers for those filers.

2) See the above number two – The auditor needs to enter the Illinois business income amount for each filer identified on the Supporting Schedule. If the audit includes one or more loss companies, the auditor must enter the word "loss" into the Illinois business income line for that taxpayer in order for the schedule to calculate correctly. The auditor can also enter the number "0", but it gives a clearer picture when the word loss is typed in the line.

3) See the above number three – Type in "Total Tax As-Filed" over the field "Other interest paid". This line is needed to verify that the payment information entered will crossfoot and downfoot correctly. The filer totals must sum to agree with the group total figure.

   Total Tax As-Filed per parent name column:
   784,358 - 382,943 = **401,415**

   Total Tax As-Filed per sub 1 name column:
   91,000 - (31,014+59,594+392) = **0**

   Total Tax As-Filed per sub 2 name column:
   100-95= **5**

   Total Tax As-Filed per sub 3 name column:
   (13,783+3,457) - (1,996+1,206+1,001+7,238) = **5,799**

   Total Tax As-Filed per sub 4 name column:
   (16,922+97,900) - (36+23,160+14) = **91,612**

   Total Tax As-Filed per sub 5 name column:
   7,654 - (251+2,584) = **4,819**

   Group Total
   Total Tax As-Filed per the Total Column for this schedule:
   (899,934+98,000+13,783+3,457) - (2,032+406,198+32,485+63,179+7,630) = **503,650**

   Sum of Filer Totals
   (401,415+0+5+5,799+61,612+4,819) = **503,650**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

C. Required Schedules/ Entering Lines off of the Schedule UB

The EDA-25 Supplemental (CXC25SUP) and the Schedule UB will reflect the changes when members have been either added or removed from the group. These forms must be included for processing the CXC25SUP and are required:

- when adding separate Illinois filers to a combined return, or
- when combing two or more groups that did not originally files as one unitary group.

A corrected Schedule UB must be provided when there are changes to:

- the IL-1120 Line 1 figures on the return, and
- the Sales Everywhere and to Illinois Sales on the return.

In the case of multiple EDA-25's, supporting documentation must be attached to each EDA-25 as needed.

Schedules – the following need to be attached to the EDA-25 for proper processing in GenTax:

Tax Year	Required Schedules
2007 - 2008	Schedule 1299-D and Schedule UB
2009	Schedule 1299-D, IL-4562, Schedule M, Schedule UB
2010	Schedule 1299-D, IL-4562, Schedule M, Schedule 80/20, Schedule UB
2011 - 2013	Schedule 1299-D, IL-4562, Schedule M, Schedule 80/20, Schedule INL Schedule UB
Fiscal year 2011 only	Schedule 1299-D, IL-4562, Schedule M, Schedule 80/20, Schedule INL Schedule UB, AND Schedule SA

Lines that need to be entered off of the Schedule UB for members being added, deleted or changed are as follows:

Step 2, Line 28
Step 2, Line 29a
Step 2, Line 29b
Step 4, Line 2
Step 4, Line 3
Step 4, Line 6
Step 4, Line 7
Step 4, Line 9

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

For a more detailed discussion on specific processing notes, see the Chapter 20 discussion on Auditor Comments, conclusions, and specific processing notes.

(Attach additional page(s) if needed)

Step 4: Authorization

As the eligible members of a combined return filed under designated agent________________________________ , we hereby authorize ____________________________________ to become the new designated agent of the combined return. We also authorize the transfer of all payments of tax, penalty, interest, and any signed waivers to the new designated agent for the tax years ending ______________________ and forward.

Signature of authorized officer(s) Signature of authorized officer(s)

Comments

IDR-229-UB (N-08/14)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

B. UTILIZING COMPUTER ASSISTED AUDIT OPTIONS

Some type of sampling method may be required to verify the accuracy of a large number of transactions in an audit. CAA personnel can assist the auditor when dealing with such transactions.

The Audit Bureau's position is that statistical sampling is the preferred method in large case auditing. CAA techniques will be used in these instances. **The auditor should contact CAA personnel on these cases as soon as the case is assigned.**

- CAA will be able to discuss the information with the taxpayer to determine the proper way to proceed.
- CAA personnel may be able to secure the data necessary to perform the audit prior to the first audit appointment. In these instances, the auditor may walk into the taxpayer's business with reports in hand.
- If the taxpayer has a large volume of transactions or the case took a large number of hours in the prior cycle, these cases are prime targets for CAA techniques.
- Even if a statistical sample is not used in the audit, CAA should still be contacted for advice on the sampling method that the auditor may want to employ.

1. GENERAL CAA ASSISTANCE

CAA personnel can aid the auditor by:

- Assisting in obtaining data from the taxpayer
- Validating data
- Converting taxpayer files into an auditor friendly format
- Generate reports, and calculate amounts
- Make large files more manageable

2. AREAS OF POTENTIAL USE

The list below is intended to provide some potential areas that CAA may be able to assist in and how CAA deals with that area. This list is not intended to be all-inclusive, but is provided to give ideas of potential areas where CAA can benefit the audit process. This list is contained in the Standardized forms folder on the auditor's computer, under CAA-CIT Activities. The potential uses are reprinted below for reference, and on the auditor's computer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- US Government Interest
  - Identify file-containing data supporting subtraction. Summarize type of obligations claimed with dollar totals and record counts.

- Sales Factor Calculations
  - Obtain file containing sales transactions summarized in order necessary to identify the proper calculation of the factor. Summarize data in file and provide correct amounts for the factor.

- Bonus Depreciation
  - Convert files and process data. Calculate Illinois Depreciation amounts.

- IL-1023-C Partnership Test
  - Review of 1023-C filers for accuracy based on information pulled from Gentax. This is also useful in reviewing S-Corp shareholders for non-filing of Illinois returns. List of shareholders SSN's can be matched against IDOR income tax files to identify missing periods.

- Filer Verification
  - Review of companies listed on federal Form 851, federal Form 7004 or other source to verify who is on GenTax as a filer. This is useful in verifying that we do not miss a company for waiver purposes. Also may be able to use as a replacement for the AUB schedule.

- Consolidated Group File
  - File may be in Excel, for example. Such a file should contain all consolidating information for all members of the Federal consolidated group. This should allow for assistance and speed in determining the impact of adding or removing companies from unitary groupings.

3. PRIOR AUDIT THAT UTILIZED CAA ASSISTANCE

The CAA staff needs to be contacted if the prior audit utilized CAA, and the auditor is considering using the prior audit results in the current audit. It will be necessary to obtain the taxpayer's computer records to recreate the same populations that were used in the prior CAA samples.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- CAA will provide reports to ensure that any changes in locations, cost centers or accounts can be addressed. If any new changes exist from the prior audit, separate audit procedures may need to be utilized depending upon their significance.

- CAA will recreate the population that was utilized in the prior cycle. The newly created population will be stratified on the same basis as the prior cycle. This should be compared to the stratification report from the prior audit to determine if any significant changes exist between the two periods.

a) Management Approval

It is mandatory that Management participates in any decision-making on cases utilizing prior audit results. Approval of the audit supervisor is required and must be documented.

After an error rate projection is made based on the prior audit results, any subsequent audit periods may only be projected with the written approval of the Assistant Division Manager. Only AGREED audits can be processed when this method is used.

4. CAA REQUEST FORM

To request CAA assistance, the auditor should complete and submit the form – "Request for Services of Computer Assisted Audit Group". This form is found in the CAA folder within the Standardized Forms folder on the auditor's computer/laptop.

C. UNITARY APPORTIONMENT CASE LAW

A large number of unitary apportionment cases have been decided by state courts (especially California) and the US Supreme Court throughout the years. Some of the cases of major importance are cited below in order of relevancy, with a brief synopsis. A review of these cases will give an understanding of how the unitary apportionment method has developed over time and how the courts have reacted to its application and interpretation by the states. A synopsis of these and other important court cases may be found in the Audit Manual Chapter 49.

U.S. Supreme Court

Exxon Corp. v. Wisconsin Department of Revenue, 447 U.S. 207 (1980) (functional departments were not discrete business enterprises nor does Due Process Clause

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

require income to be allocated to various states through separate accounting if feasible; income was part of unitary business and subject to fair apportionment among all states having sufficient nexus).

Mobil Oil Corp. v. Commissioner of Taxes of Vermont, 445 U.S. 425 (1980) (unitary relationship between corporation and foreign affiliates provided sufficient basis for including foreign dividends in apportionable income).

ASARCO, Inc. v. Idaho State Tax Commission, 458 U.S. 307 (1982) (intangible income from foreign operations could not be included in apportionable income absent a unitary relationship; subsidiaries were discrete business enterprises unrelated to parent's in-state activities).

F.W. Woolworth Co. v. Taxation & Revenue Department of New Mexico, 458 U.S. 354 (1982) (parent with complete ownership had potential to operate companies as integrated divisions of a single unitary business; absent showing of actual integration of business activities or centralization of management, subsidiaries were not part of a unitary business).

Container Corp. of America v. Franchise Tax Board, 463 U.S. 159 (1983) (must be more than occasional oversight in a distinct investment; flow of value must exist between in-state and out-of-state activities).

MeadWestvaco Corp. v. Illinois Department of Revenue, 553 U.S. 16 (2008) (operational function test not intended to serve as a separate basis of apportionment; finding that an asset serves an operational function supports the conclusion that it was a unitary part of the business conducted in the taxing state; where the asset in question is another business, the traditional hallmarks of a unitary relationship—functional integration, centralized management and economies of scale—must be shown).

Other Federal Courts

In re: Envirodyne Industries, Inc., 354 F. 3d 646 (7th Cir. 2004) (subsidiaries must depend upon and contribute to each other; dependence on common parent insufficient).

Illinois Courts

Caterpillar Tractor Co. v. Lenckos, 84 Ill. 2d 102 (Ill. Sup. Ct. 1981) (finding overall design of IITA § 304 is to determine amount of business income fairly attributable to Illinois).

Citizens Utilities Co. v. Department of Revenue, 111 Ill. 2d 32 (Ill. Sup. Ct. 1986) (must be more than mere flow of funds).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Miami Corp. v. Illinois Department of Revenue, 212 Ill. App. 3d 702 (1st Dist. App. Ct. 1991) (alternative apportionment).

A.B. Dick Co. v. McGaw, 287 Ill. App. 3d 230 (4th Dist. App. Ct. 1997) (functional integration and strong centralized management not separate tests).

Borden, Inc. v. Illinois Department of Revenue, 295 Ill. App. 3d 1001 (1st Dist. App. Ct. 1998) (control over financing, tax compliance and at least some aspects of purchasing, personnel and marketing demonstrated functional integration).

Hormel Foods Corp. v. Zehnder, 316 Ill. App. 3d 1200 (1st Dist. App. Ct. 2000) (flow of knowledge, significant level of control by parent over subsidiaries, and centralization of a number or corporate services sufficient to show unitary relationship).

Zebra Technologies Corp. v. Topinka, 344 Ill. App. 3d 474 (1st Dist. App. Ct. 2003) ((a) taxpayer failed to demonstrate percentage of activities conducted within and without the United States was sufficient to exclude subsidiaries from unitary group based on 80/20 test; (b) only portion of investment portfolio income that was used as working capital for corporate acquisitions could be included in apportionable income).

Dow Chemical Co. vs. Department of Revenue, 359 Ill. App. 3d 1 (1st Dist. App. Ct. 2003) ((a) similarity of business activities is sufficient to satisfy same general line of business requirement; (b) significant direct sales from parent to subsidiary is evidence of vertically structured enterprise or process; (c) evidence that companies dealt extensively with each other is not sufficient for a unitary business finding absent functional integration and centralized management; (d) during the post transition years, parent's oversight in the form of receiving reports is indicative of an investment relationship and not integration of business activities; (e) parent was divested of management authority, each had separate departments for administrative functions, and parent did not influence subsidiary's operations in ways grounded in its own operational expertise and overall strategy).

Clarcor, Inc. v. Hamer, 2012 IL App (1st) 111674 (1st Dist. App. Ct. 2012) (centralized cash management significant feature of horizontal integration).

Shaklee Corp v. Department of Revenue, No. 1-96-3780, unpublished order (1st Dist. App. Ct. 1998) (inserting additional layer of non-operating holding companies in corporate structure does not break unitary chain).

A.E. Staley Mfg Co. v. Zehnder, No. 1-99-1822, unpublished order (1st Dist. App. Ct. 2001) (evidence suggested subsidiary operated independently and was responsible for its own business operations).

Tomen America, Inc. v. Zehnder, No. 1-98-3841, unpublished order (1st Dist. App. Ct. 2001) (use of stock sale proceeds to pay down lines of credit and make short-term investments, including purchasing CDs and commercial paper, was sufficiently operational for Illinois income tax to attach to dividends and capital gains realized from the sale of non-unitary stock).

BP Oil Pipeline Co. v. IDOR, Nos. 1-01-2364 & 1-01-2365, consolidated with Unocal Pipeline Co. v. IDOR, unpublished order (1st Dist. App. Ct. 2004) (unitary partnership income must be apportioned based on combination of all unitary members' respective factors).

Cincinnati Casualty Company v. Glen Bower, No. 00 L 50254 (Cir. Ct. Cook County 2001) (in order to be a holding company included in the unitary business group of insurance companies, must be formed solely to hold stock in one or more other corporations and not engage directly in own business operations).

Consol, Inc., vs. Glen Bower, Illinois Circuit Court, Cook County, No. 01 L 51196 (Cir. Ct. Cook County 2003) (parent not involved in day-to-day operations but loaned subsidiaries vast sums and earned interest).

Abernathy Specialties, Inc. v. Department of Revenue, Administrative Decision IT 02-9 (2002) (three separate divisions of company were not sufficiently integrated to constitute a single trade or business).

D. EDA 132 : UNITARY QUESTIONNAIRE

Illinois Department of Revenue

EDA-132 Information and Document Request For Affiliated Companies

General Information

The purpose of this document request is to obtain information related to affiliated companies. If you prefer to receive this document in an electronic format, it can be provided as an attachment to an email, as long as you waive any issues of confidentiality or privacy pertaining to the information requested. This informational request is authorized under 35 ILCS 5/914 and 5/916, and 20 ILCS 2505/2505-315. The information is requested in addition to any other document request we may issue. It is not intended to be inclusive, and we may request additional information as the result of any response we receive. If you have any questions, please contact me at the phone number or address listed below.

Identify the taxpayer and audit period (auditors)

Name: Submitted to:

Address: Date submitted:

Audit Period: Auditor's Name:

FEIN: Auditor's mailing address:

Auditor's phone no.:

Step 1: Provide the following contact information (taxpayers)

1. Write the name and phone of the person we should contact if we have any questions about the information you submit to us.

Name of contact person ____________ phone number ____________

2. Write the names and titles of all persons who responded to or assisted in any way in responding to this questionnaire and the information that you are submitting to us. If you need additional space, you may attach a separate sheet of paper.

Name	Title	Name	Title
Name	Title	Name	Title
Name	Title	Name	Title
Name	Title	Name	Title
Name	Title	Name	Title

EDA-132 (N-5/06)
IL-492-4478

Step 2: Provide the following documents and information for the entire audit period (taxpayers)

1. U.S. Form 851
2. U.S. Form 1120, Schedule K, including corporate ownership, affiliation attachments, and supporting answers to line items 3 and 5.
3. List any corporation that is owned directly or indirectly, by more than 50 percent by this company and is not already listed on U.S. Form 851, and U.S. Form 1120, Schedule K.
4. List all partnerships in which you or any corporation on U.S. Form 851, Schedule K, or the list referred to in line item 3 has a general partnership interest.
5. List any member-managed LLC's in which you or any corporation on U.S. Form 851, Schedule K, or the list referred to in items 3 or 4 has an interest.
6. Provide an organizational chart showing the relationship of each of the entities referenced in line items 1 through 5.
7. Identify all entities listed in items 1 through 5 with an Illinois activity, even if you believe that it is protected from Illinois income taxation by P.L. 86-272, by another federal law, or by treaty.
8. For any entity listed in items 1 through 5 that you assert to be an 80/20 company, provide all supporting calculations.
9. If you file annual reports with the SEC, please provide copies of Forms 10-K or 20-K for each year in the audit period.
10. If you do not prepare annual reports or SEC Forms 10-K or 20-K, provide a detailed description of your business operations/segments, locations, and products.
11. Supply documentation to support any of the entities listed in items 1 through 5 being treated as financial organizations, transportation or insurance companies.
12. Explain the basis for the filing method you used on your Illinois tax return, specifically indicating the reason for filing the way you did. If any business entity is included in any of the lists in line items 1 through 5 but is not included in your unitary business group, as indicated on Schedule UB, explain why.
13. If you filed on a unitary basis, did you make any changes to the unitary group since the return you filed for the last year prior to the audit period? Identify new members, as well as members no longer included in the group. If anyone is included in line items 1 through 5, but is not included in your unitary business group as filed, explain why.
14. Do you file a unitary tax return in other states? If yes, list those states.
15. Is the unitary group, as reported to Illinois, the same unitary group as reported to other unitary states? If not, identify the entities listed in items 1 through 5 that are treated differently for Illinois purposes than for purposes of any of the other states in which you file a unitary return, and why those members were not included in (or excluded from) the unitary group as reported to Illinois and treated otherwise for another state.
16. Provide the verification/source data for your apportionment work papers. Include
    a) Forms U.S. 941 and IL-941;
    b) Illinois Department of Employment Security Form "UI-3/40"
    c) Other source documents that might reveal the cost of labor, which is included in the costs of goods sold;
    d) "Source" documents for any apportionment data given to the auditor.
    e) Property, rent, and inventory apportionment data
    f) Identify all origin and destination sales for each entity listed in item numbers 1-5 above.

EDA-132 (N-5/06)
IL-492-4478

17. Provide detail of all eliminations made on the consolidated U.S. Form 1120 and the Illinois Schedule UB.

18. Identify all of the manuals used in your business, including operational, and policy or procedural, and make those manuals available to auditor upon arrival at your facility. If reporting requirements are not included in any of these manuals, but are memorialized on any other form, provide those documents.

   a) Examples of these manuals include, but are not limited to:
      1) Advertising
      2) Marketing
      3) Accounting
         - Budget requirements, procedures, and limitations
         - Capital authorization levels
         - Large expenditure approval requirements
      4) Personnel
      5) Records retention
      6) Treasury functions
      7) Forms manuals
      8) Internal audit manuals (e.g., employee handbooks)

19. Identify all centralized functions/departments within the entities listed in items 1 through 5 and the reporting requirements of these centralized functions/departments, including parent to affiliate or subsidiary, or subsidiary or affiliate to parent.

   a) Identify the services provided by each function/department to any entity listed in items 1 through 5, and indicate if there is any payment for such services among those members. Examples of centralized functions/departments include, but are not limited to
      1) Purchasing
      2) Financing
         - Inter-company lending (identify source of funds; identify lender and borrower by name, amounts lent or borrowed and interest income and expense accrued or paid in each taxable year in the audit period).
         - What was the total amount of inter-company loans that were repaid by the company indicating the payor and payee and the dollar amount?
         - Requirements and procedures regarding borrowing from unrelated third parties for the parent corporation, divisions, and subsidiaries or affiliates.
            - Identify the amount below which no approval or authorization is required by the parent corporation.
            - Identify each financing of this type during the audit period by date, borrower, lender and amount.
            - Who provided the approval or authorization for each financing?
            - Who sets the borrowing limits?
            - What is the process for seeking the approval or authorization?
            - What is the frequency of request for approval or authorization? Provide this information by date, company making the request, and the amount requested.
         - Lists of all banks with which any entity listed in items 1 through 5 does business or has accounts.
         - Access to all inter-company loan agreements between entities listed in items 1 through 5 as well as payment or pay-off schedules, including bank statements evidencing such payments.
      3) Tax Compliance
      4) Product Line
      5) Personnel/Hiring/Transfers
      6) Marketing
      7) Capital Investment
      8) Research and Development
      9) Accounting and Budgets
      10) Data Processing and MIS/Computers
      11) Internal Audit
      12) Insurance (provide copies of policies)

EDA-132 (N-5/06)
IL-492-4478

13) Employee Benefits (if separate from personnel information)
14) Legal Services
15) Physical Facilities Use
16) Advertising
17) Warehousing
18) Transportation
19) Technical Services or Licensing Agreements
20) Labor Relations
21) Training

20. Identify the manager of each centralized function or department by name, title, location, telephone number, job description, the entity the manager works for, and the person to whom the manager reports, identifying that person by title and the entity for whom that individual works.

21. If centralized functions or departments do not exist, identify all of the redundant functions and departments in the entities listed in items 1 through 5.
    a) Identify each separate department of the parent organization, and
    b) Identify each separate department of each entity listed in items 1 through 5 by title, location and manager of the department.

22. Identify all inter-company transactions (other than loans identified under "Financing" in item 19(a)(2)), between any of the entities listed in items 1 through 5. Identify these transactions by the names of the entities and the related dollar amounts.
    a) Identify each inter-company account in the detail of the general ledge by account number
    b) Identify inter-company sales of components or finished goods to purchasing subsidiaries and whether that subsidiary purchased the components form any other source. Identify the subsidiary by name and by amounts purchased internally and externally.
    c) Identify the total amount of inter-company sales (purchases) made by each entity for each year, and identify the percentage that those amounts bear to the total sales (purchases) of that entity.

23. Identify and provide a list of all officers, directors, managers and partners of all entities listed in items one through five.

24. Provide Board of Directors minutes, committee minutes, and shareholder minutes of the parent corporation for the audit period. (It may be necessary to review other committee minutes and affiliated members after we've reviewed the parent's minutes.) Examples of committees of the Board of Directors include, but are not limited to:
    a) Audit committee
    b) Personnel committee
    c) Executive Compensation committee
    d) Environmental committee

    This request includes any and all minutes that refer to any of the information requested in this questionnaire.

25. Provide any reports, statements, or certifications required by local, state, or federal regulatory agencies for each entity listed in items 1 through 5 that is engaged in a "regulated" industry.

EDA-132 (N-5/06)
IL-492-4478

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

E. GUIDANCE – PARTNERSHIP/PARTNER SALES ELIMINATION

Under 86 IAC § 100.3380(d) sales made by the partnership to a unitary partner or vice versa are not eliminated from the partner's sales factor for tax years beginning prior to June 30, 2008. For tax years beginning on or after June 30, 2008, intercompany sales are eliminated from the unitary partner's sales factor. 86 IAC § 100.3380(a) provides that, for tax years beginning prior to June 30, 2008 if the unitary partner did eliminate sales on its returns as filed, then that elimination will be allowed. If eliminations were not made, then the taxpayer may petition the Department under IITA § 304(f) to apply the regulation retroactively.

Auditors should instruct any taxpayer seeking to eliminate transactions for years beginning before June 30, 2008 to provide the auditor with an amended return along with a petition for alternative apportionment that complies with the requirements contained in IAC § 100.3390. Once the auditor receives the petition and amended return(s), the following procedures will be followed:

1. After confirming that the amended return is signed and contains the proper attachments, the auditor should accept it by writing "Received by the IL Dept. of Revenue" on the return and initialing & dating it. (The same can be done for the for the taxpayer's copy.)

2. The audit supervisor must review the petition to ensure that it meets the requirements of 86 IAC § 100.3390(e)(2).

3. The petition along with the amended return(s) will be forwarded to Technical Support at:

   Illinois Department of Revenue
   Income Tax Technical Support, 3-329
   101 West Jefferson Street
   Springfield, Illinois 62704

4. Incorrect petitions will be returned to the taxpayer (through the auditor) along with written instructions on how to make the petition compliant with our regulation.

5. Technical Support will issue a memo approved by Legal Services authorizing the elimination.

6. The auditor will allow the elimination in their audit.

7. Auditors must include a memo in their audit file and thoroughly discuss the circumstances in their Audit Comments.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Auditor Initiated Requests
At this time the Department is NOT imposing IITA § 304(f) adjustments on taxpayers during the normal course of an audit, except as noted above.

F. WATERS EDGE / WORLD WIDE APPORTIONING STATES

Worldwide combination is the term used to describe a unitary business group composed of entities whose business activities are performed anywhere in the world. The terms domestic and water's-edge are used synonymously below to describe a unitary business group whose members are limited to entities with greater than 20% of their business activities being performed within the fifty United States and the District of Columbia. The two terms are used since some state statutes refer to domestic combination and others to water's-edge combination. The following states currently have provisions in their statutes for using the unitary apportionment method to compute the amount of income which is properly taxable in their state:

ALASKA	domestic/water's edge combination for non-oil companies
ARIZONA	domestic/water's-edge combination
CALIFORNIA	worldwide combination or water's-edge at the taxpayer's option
COLORADO	domestic/water's-edge combination
HAWAII	domestic/water's-edge combination
IDAHO	worldwide combination or water's-edge at taxpayer's option
ILLINOIS	domestic/water's-edge combination
INDIANA	water's-edge is mandatory
KANSAS	domestic/water's-edge combination
KENTUCKY	domestic/water's-edge combination
MAINE	domestic/water's-edge combination
MICHIGAN	domestic/waters-edge mandatory
MINNESOTA	domestic/water's-edge combination
MISSISSIPPI	domestic/water's-edge combination
MONTANA	worldwide combination or water's-edge at taxpayer's option
NEBRASKA	domestic/water's-edge combination
NEW HAMPSHIRE	domestic/water's-edge combination
NEW MEXICO	water's-edge combination at taxpayer's option
NEW YORK	domestic/water's-edge combination
NORTH DAKOTA	worldwide combination or water's-edge at taxpayer's option
OHIO	
OREGON	domestic/water's-edge combination
UTAH	domestic/water's-edge combination
VIRGINIA	domestic/water's-edge combination
WEST VIRGINIA	domestic/water's-edge combination

REF: 2010 Multistate Corporate Tax Guide, Volume 1, and RIA Checkpoint 2014.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

G. PROPERTY FACTOR ISSUES PERTAIINING TO OIL COMPANIES

For the tax years ending prior to December 31, 1998, Illinois had relied upon a three-factor apportionment formula of property, payroll and sales. In 1998 the Department began phasing out the property and payroll factors over a three year period, leaving a single sales factor in the third year. For tax years ending on or after December 31, 2000, only sales are used in Illinois to figure the apportionment factor.

However, in the event of a 304(f) application or the need to audit an oil or gas concern for tax years ending prior to December 31, 1999 this information may be required. A complete recitation of the property factor discussion (except oil) may be found in Chapter 27 in the Historical Extracts and Exhibit section. The following pertains to the oil and gas property factor.

1. Property Factor-Depletable Property and Depletion

A frequent issue in audits of oil companies is whether or not depletable property should, for the property factor, be valued at "original cost" (before deduction of accumulated depletion). It is the Department's position that including depletable property at original cost is consistent with the rules relating to the property factor, and to do otherwise will be in violation of the Act. There is also, at this time, no method for making any adjustment to inventory or the sales factor due to the depletable property.

a) Property Factor-Intangible Drilling and Development Costs

The IRS regulations define intangible drilling costs (IDCs) as any cost incurred that, in itself, has no salvage value and is "Incident to and necessary for drilling of wells and the preparation of wells for the production of oil and gas." The federal regulations furnish examples of these costs, which include such items as wages, fuel, repairs, hauling, supplies, etc., incurred in drilling, clearing and draining of the ground, road making and so on.

At the taxpayer's option, the IDC may be charged to capital or expensed. This election is available to the taxpayer under IRC § 1.612-4(a). Most oil and gas companies will make the election to expense the IDC.

Illinois had always taken the position that only capitalized IDCs could be included in the property factor since, if the taxpayer expensed the IDCs,

the taxpayer had never "acquired" an asset for federal purposes. However, in September of 1992, the Circuit Court of Cook County handed down a decision in the case of Shell Oil Company et al v. Illinois Department of Revenue which caused the Department to reverse this position. Therefore, for all tax years for which the statute of limitations for issuing a notice of deficiency or filing a claim has not expired, IDC's should be included in the property factor whether or not they have been capitalized or expensed for federal purposes.

Since Illinois had no published position (statutes, regulations, etc.) regarding the treatment of IDCs in the property factor, the court relied on positions taken by other states, other states' courts and the MTC. The court put a tremendous amount of weight on an Oregon Supreme Court decision, Atlantic Richfield Company v. Oregon Department of Revenue (1986). In the Atlantic Richfield case, Oregon noted that one of the main goals of UDITPA was "uniformity of application of the statutes' among jurisdictions" and that the majority of jurisdictions that had considered the IDC question required that they be included in the property factor whether the IDCs were expensed or capitalized.

The Illinois court also placed significant importance on the 1988 amendment to the MTC regulations which requires that IDCs be included in the property factor whether they are expensed or capitalized. The Illinois court stated,

> Illinois embodied the MTC's principles in the IITA and has given no further guidance with regard to IDCs such as a rule, regulation or statutory language. Therefore, including IDCs in the property factor of the apportionment formula is consistent with the only stated expressions of legislative intent behind the IITA with regard to the apportionment formula, property factor and IDCs.

Refer to Chapter 49 for a synopsis of the Shell Oil Company v. Illinois case, and the Atlantic Richfield Company v. Oregon case and for complete citations for both cases.

86 IAC § 100.3350(e)(2) was promulgated by the Department . This change to the IAC allowed for the inclusion of capitalized IDC whether or not they were expensed or not for federal or state tax purposes. IDC was defined to include wages, fuel, repairs, hauling, draining, road-building,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

surveying, geological works, construction of derricks, tanks, pipelines, and other physical structures necessary for the drilling of wells and their preparation for the production of oil and gas, and supplies incident to and necessary for the drilling of wells and clearing of ground

A good portion of any IDC claimed is usually related to joint venture operations, however, most of it will generally be accounted for in the income statement or balance sheet of the production and exploration company (the partner). If it is determined that the joint venture is not unitary with the partner and the partnership income is going to be allocated per Section 305(a) of the IITA, it is important to verify that all IDC relating to the joint venture operations is excluded from the partner's taxable income and/or balance sheet accounts.

b) Oil Company Property Factor-Rent/Royalty Expense

A second area of the property factor computation which, must be given special attention when dealing with the oil and gas industry is rent expense. The rent expense figure reported on the federal return may include other types of expenses which are not properly includable in the property factor.

A typical oil and gas lease may stipulate that the lessee pay to the lessor three general types of consideration:

(i) LEASE BONUS AMOUNTS

These are generally negotiated in conjunction with the royalty amount. LEASE BONUS amounts are sometimes referred to as advance royalties since the BONUS is a cash payment made by the lessee to the landowner in consideration for granting a lease on the property whereby the lessee acquires the right to enter upon the leased premises and explore for oil and gas, customarily for a year from the date of the lease.

Generally speaking, the higher the BONUS, the lower the royalty and the lower the BONUS, the higher the royalty. A lower BONUS amount is usually negotiated for land where the production potential is very speculative. Once the productivity is proven, the higher royalty corresponds to the actual value of the property.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

2. Delay Rentals

These are periodic payments made to keep a lease in effect during the period prior to production. The payments are made to the landowner for additional time in which to commence exploration and drilling of the property. For example, a lease may be in effect for a period of five to ten years however the lessee may be required to commence drilling within one year. If drilling has not started by that time the lease could be terminated unless the lessee pays the lessor DELAY RENTALS.

Delay rentals are considered rents since they accrue by mere lapse of time.

3. Royalties

Royalties are periodic payments made based on production. A royalty is NOT burdened with the costs, i.e. bears no portion of costs of development or operation of the property. A royalty interest is the interest in oil and gas or minerals in place that is retained by the landowner (the lessor) which entitles him to a specified portion of the production. Most royalties are paid either in cash or in-kind. The rights to production, granted under oil leases, are generally determined by industry custom and most commonly are; 7/8th in cash (or in-kind) to the lessee and 1/8th in cash (or in-kind) to the lessor.

Royalties are paid to the owner of the land because the owner retains an ECONOMIC INTEREST in the property being leased. The royalty payment represents a defined fraction of production reserved for the owner or sold for his account. Conversely, rent is paid because an oil and gas lease grants a lessee the right to a fixed portion of production in return for the risks undertaken in exploring and developing the property; and reserves for the lessor a fixed portion of the production for the retained royalty interest. The lease agreement may also include some, or all, of the following types of payments:

a) Overriding Royalties

This type of payment is similar to a royalty except that it is created from the working interest of the lessee. The lessee assigns his working interest to a third party and retains 1/8th of his 7/8th interest in the minerals in place. The lessee's share (1/8th x 7/8th) is said to be the overriding royalty. An overriding royalty is also free of development and operation costs.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

b) Shut-In-Royalties

If a producing well is shut for some reason, the leases provide for shut-in payments. These payments are regarded as rent as opposed to royalty. This is because shut-in-royalties are paid, not in contemplation of production, but are payments made solely because there will be no production.

Including the rent expense of non-producing leases is not in violation of the "used in the trade or business" requirement of Section 304(a)(1)(A) of the IITA, since the exploration for oil is a crucial element of the industry. In the case of the State Department of Revenue v. Amoco Production Co., 676 P.2d 595 (Alaska 1984), the Alaska Supreme Court held that the non-producing leases did constitute property "used" in the State within the meaning of the UDIPTA property factor regulations.

The Court held that:

> The non-producing oil and gas leases are an example of non-obvious contributions to Amoco's production of income. The exploration and development of what later turn out to be unproductive oil or gas wells is a necessary and integral part of Amoco's eventual discovery and exploration of productive oil and gas wells. To say that only property values associated with oil and gas leases which are known to contain recoverable quantities of oil and gas should be included within the property factor is to ignore the actual business activities that lead up to Amoco's ability to derive oil and gas income.

A synopsis of the Amoco Production Company case can be found in Chapter 49.

Delay rentals and shut-in-royalties received by the lessor are not subject to depletion allowance. Whereas production (and other) royalties and income received by the lessor because of his right to share in the production of the minerals-in-place are subject to depletion allowance.

The following paragraph, taken from Arthur Young's Oil & Gas, 1986 Edition, (page 163, 11.7), further explains the difference between the various types of royalties:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Royalty payments, though sometimes referred to as rents, are distinguished on the grounds that they represent a division of the mineral produced. Rents, such as DELAY RENTALS in an oil and gas lease, accrue by mere lapse of time. A delay rental differs from a BONUS in that such rental is not paid for oil to be produced but for additional time within which to begin utilization of the land. So-called SHUT-IN ROYALTIES have been characterized as rent for federal income tax purposes because of their similarity in providing the lessee with additional time to begin production, rather than according him a basic right to produce the mineral. (Emphasis added)

In summary, when determining the correct amount of rent expense, we should allow the inclusion of payments made in respect of delay rentals and shut-in-royalties. Payments of production royalties, bonus/advance royalties and overriding royalties should not be included in rent expense.

The Department held the opinion that for the rent expense, we should allow the inclusion of payments made in respect of delay rentals and shut-in-royalties, but payments for production royalties, bonus/advance royalties and overriding royalties should not be included in the rent expense. However, the issue was revisited during a Protest Act case.

The Department reversed its position in November of 2000 and determined that ALL royalty payments for a leasehold interest in land should be included in rent expense for property factor purposes.

When verifying the apportionment formula factors, it is important to determine if any of the lessor's share of production-in-kind has been sold by the lessee, and is included in the gross sales of the lessee. The reimbursements to the lessor for the same, would then be expensed as royalty payments. In these instances, these sales are not actually sales of oil owned by the lessee, but rather, are sales on account for the lessor. As such, the receipts from these sales should not be included in the sales factor of the lessee.

I. PURPOSE

To assist auditors in making a determination of properly reportable income for Illinois income tax purposes in order to arrive at Illinois taxable income or base income. Base Income is defined in IITA § 203 as equal to the taxpayer's taxable income modified by certain items specified within the Act. For corporations, the numerous addition modifications begin at IITA § 203(b)(2)(A). These modifications are elaborated upon within this chapter of the Income Tax Audit Manual. Partnerships, Trusts and Estates are discussed in Audit Manual chapter 28 and Individual income taxpayers are covered in chapter 45. Subtraction modifications are discussed in Chapter 25.

26 CFR § 1.482-1
26 CFR § 301.7701

III. GENERAL INFORMATION

The type of return filed with Illinois is dependent upon the return filed with the IRS.

A. Partnerships, S-Corps, Trusts and Estates

Chapter 28 of the Audit Manual covers partnerships, Subchapter S corporations, trusts & estates. Refer to that chapter regarding the rules for determining income for IL-1065 (Partnership), IL-1120ST (S-Corp) or IL-1041 (Trusts and Estates) filers.

B. Illinois Taxable Income

Unitary determination is made based on Audit Manual Chapter 23. The next step is to compute the proper amount of federal taxable income. This computation will vary depending on whether the company is filing:

1. a “separate” Illinois return, or
2. as part of a unitary business group.

C. Federal Schedule M-3

Any domestic corporation or group of corporations required to file Form 1120, U.S. Corporation Income Tax Return, that reports on Form 1120, Schedule L, Balance Sheets per Books, total assets at the end of the corporation's tax year that equal or exceed $10 million must complete and file Schedule M-3 instead of Schedule M-1, Reconciliation of Income (Loss) per Books With Income per Return. A corporation or group of corporations that is required to file Schedule M-3 must also file Schedule B, Additional Information for Schedule M-3 Filers.

Schedule M-3, Part I, asks certain questions about the corporation's financial statements and reconciles financial statement net income (loss) for the corporation (or consolidated financial statement group, if applicable), as reported on Part I, line 4a, to net income (loss) of the corporation for U.S. taxable income purposes, as reported on Part I, line 11.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Schedule M-3 parts II and III reconcile financial statement net income (loss) for the U.S. corporation (or consolidated tax group, if applicable), as reported on Schedule M-3, part I, line 11, to taxable income on Form 1120, page 1, line 28.

There is a unique separate Schedule M-3 for taxpayers required to file Form 1065, U.S. Return of Partnership Income; Form 1120S, U.S. Income Tax Return for an S Corporation; Form 1120-F, U.S. Income Tax Return of a Foreign Corporation; and for Forms 1120-PC or 1120-L. No Schedule M-3 is required for taxpayers filing Form 1120-REIT, U.S. Income Tax Return for Real Estate Investment Trusts; Form 1120-RIC, U.S. Income Tax Return for Regulated Investment Companies; Form 1120-H, U.S. Income Tax Return for Homeowners Associations; and Form 1120-SF, U.S. Income Tax Return for Settlement Funds.

D. Modifications

IITA § 203(b) provides for numerous modifications to corporate taxable income to arrive at base income. Furthermore, IITA § 203(h) and IAC § 100.2405(g) explains that no modification shall be made unless authorized by the Act. Therefore, the only additions or subtractions to taxable income which are allowed in the computation of base income are those that are expressly authorized by the Act.

When dealing with a unitary group of companies it is important to remember that the modifications apply to all members of the unitary group, not just the Illinois filers. Due to the nature of some of the modifications, an Illinois filer may be the only one affected by a specific modification (such as the Illinois Income Tax deducted addition or the Illinois Income Tax refund subtraction), however, in general all unitary group members should be examined to determine applicability of Illinois modifications.

Public Act 88-660, effective September 16, 1994, created IITA § 250. This section provides that all exemptions, credits and deductions enacted after September 16, 1994 shall be limited by a reasonable and appropriate sunset date. If a sunset date is not specified in the Public Act which creates the exemption, credit or deduction, the exemption, credit or deduction will automatically expire for tax years beginning on or after five years after the effective date of the Public Act creating the exemption, credit or deduction unless exempt from Section 250 or extended by other applicable law. For example, Public Act 97-0636 added subsection (b) to provide that any exemption, credit, or deduction scheduled to sunset in years 2011, 2012, or 2013 are extended an additional five years. These would be extended to then expire in 2016, 2017, or 2018.

IV. APE SPECIFIC LAW APPLICATIONS

A. Separate Corporate Taxable Income

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A corporation's Illinois pro forma income should agree with its federal taxable income if the company files a separate company return both federally and for Illinois. If the corporation is a member of a federal consolidated group, however, the determination of a corporation's Illinois pro forma income amount, which they are required to compute regardless of the type of Illinois return filed, can be a complex task.

1. Illinois Pro Forma Income

a) Auditors should examine:

(1) All federal returns filed by the affiliated (not consolidated) group
(2) Supporting schedules
(3) Backup workpapers

IITA §§ 913 and 506(a) provide the authority to examine the federal returns, including supporting schedules, filed by the taxpayer in order to determine the proper Illinois pro forma income amount.

Federally, corporations can file either a separate or consolidated return depending on the makeup of their group. Regardless, they must calculate separate taxable income in accordance with 26 CFR § 1.1502-12. In some circumstances, affiliated corporations may not all file as part of the same federal return.

Example: Corp A, a domestic company, owns 100% of Corp F, a foreign subsidiary. Corp F owns 100% of domestic Corp D. Corp A is therefore the indirect parent of Corp D; however, since Foreign Corp F is the direct owner of Corp D, Corp D may not file as part of Corp A’s federal return.

Federal "separate taxable income" of all members of the consolidated return is recorded on a spreadsheet of the consolidated return. Federal consolidating adjustments which are required by 26 CFR § 1.1502-12 may either be identified as such on the spreadsheet or may have already been incorporated into these "separate taxable income" figures. Many of these adjustments would not have been made had the companies not filed a federal consolidated return in the current year or in preceding years.

The "separate taxable income" reported by a company on the federal consolidated return spreadsheet should not be routinely accepted as Illinois pro forma income. The federal "separate taxable income" should be examined and adjusted to reflect the income which the company would have reported on its federal return, if it had filed separate company returns for the current year and all preceding taxable years.

Example: Company A owns 100% of the stock of Companies B, C, and D. The four companies have filed a federal consolidated return for the years 2008, 2009, 2010

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

and 2011. In 2008, 2009 and 2010 Company B incurred federal net operating losses, which reduced the amount of consolidated income the group reported on its US 1120's. Due to 26 CFR § 1.1502-11, Company A is required to reduce its basis in Company B's stock in each year in which Company B incurred a loss. In 2011, Company A declares the stock of Company B worthless. The capital loss reflected on Company A's federal "separate taxable income" statement is based on the reduced basis of Company B's stock.

For Illinois purposes, the companies file separate Illinois returns in all years. Since each company's Illinois pro forma income is computed as if the companies had filed separate federal returns for the current year and each of the preceding years, Company A would not have been required, on a federal separate company basis, to make the adjustment to the basis of Company B's stock in the preceding years. Therefore, in the year in which the stock was declared worthless (2011), Company A would compute its capital loss for Illinois pro forma purposes on the original basis of Company B's stock.

Example: Corp M filed a combined IL-1120 for 2015 that included Corp Z. Corp Z reported a federal capital gain of $10 million from the 30% sale of partnership interests to Corp F, the financial arm of Corp M. Corp F filed a separate US 1120 because it is owned by a subsidiary of Corp M in Europe. The taxpayer excluded Corp F from the unitary group as an 80/20 company. The $10 million gain is properly included in federal taxable income on the IL-1120 of Corp M. If the auditor determines that Corp F is not an 80/20 and should be a member of the Corp M's unitary group, then the capital gain will be eliminated from federal taxable income as an intercompany adjustment under IAC § 100.5270(a)(1).

Example: The parent corporation, Corp P, is a holding company that owns 100% of Sub 1. Sub 1 owns 50% of Sub 2 and Corp P owns the remaining 50% of Sub 2. Sub 1 is selling its entire 50% interest to Corp P. Corp P will then directly own 100% of Sub 2. Corp P, Sub 1, and Sub 2 file as members of a consolidated US 1120. Under consolidating federal rules, the gain is deferred and eliminated as intercompany.

On a separate company basis, the gain is not deferred. However, if Corp P and Sub 1 are proper members of a unitary business group, IAC § 100.5270(a)(1) requires members of the unitary group to follow the federal consolidated return regulations, so the gain is eliminated on the Illinois Schedule UB.

For tax years ending on or after December 31, 1986 taxable income for Illinois purposes can be less than zero in loss years. Loss carryforwards from taxable years ending prior to December 31, 1986 may not exceed the sum of federal taxable income for the taxable year before the net operating loss deduction plus the excess of addition modifications over subtraction modifications for the taxable year. For information regarding tax years ending before December 31, 1986 see the "Historical Extracts" section later in this chapter. For

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

more information regarding net operating losses and net operating loss deductions refer to Chapter 35.

If the company is filing a separate company return for Illinois, the federal pro forma taxable income is entered on Line 1 of the IL-1120. When computing this figure take special care to consider charitable contributions and capital gains computations on the federal return.

The total amount reported on the US 1120 charitable contributions line (19 on the 2012 form) cannot exceed ten percent of taxable income (Line 30) calculated without regard to specified deductions. Refer to IRC § 170 and federal Form 1120 instructions for more information.

Capital losses (Line 8 on the 2012 federal Form 1120) are only allowed to the extent of capital gains. Taxpayers are required to attach federal Schedule D to show the calculations of this line.

Auditors need to review these items to confirm the amounts reported prior to arriving at the federal taxable income reported on Line 1 of the IL-1120.

2. Special Rules for Certain Filers

IAC § 100.2405(c) provides several special rules for specific types of entities. The following entities have special rules relating to taxable income, IAC § 100.2405(c)(1)-(6):

a) Certain life insurance companies – IITA § 203(e)(2)(A);
b) Mutual insurance companies – IITA § 203(e)(2)(B);
c) Regulated investment companies (RICs) – IITA § 203(e)(2)(C);
d) Real estate investment trusts (REITs) – IITA § 203(e)(2)(D);
e) Consolidated corporations – IITA § 203(e)(2)(E)
f) Cooperatives – IITA § 203(e)(2)(F)

Insurance companies are discussed in Chapter 31. In addition, IAC § 100.2405(c)(7) and (8) refers to the computation of Subchapter S corporation and partnership federal taxable income. Chapter 28 contains information regarding these types of entities.

B. Unitary Corporate Income

Under IAC § 100.5270(a)(1) for corporations who are members of a unitary group filing an Illinois combined return, unitary taxable income is computed by treating all members of the unitary business group (other than ineligible members) as if they constituted a federal consolidated group. 26 CFR § 1.1502-11 on Consolidated Taxable Income will be used to determine unitary taxable income for those members included in the unitary group. See section below on “Other Federal Rules Regarding Consolidated Adjustments.”

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The unitary taxable income is computed on the Schedule UB, Part II, by adding the Illinois pro forma incomes of all the members of the unitary group. In addition, certain "consolidating" adjustments and offsets are allowed.

1. Consolidating Adjustments

a) Federal Net Operating Losses:

A federal net operating loss incurred by one member of the group is allowed to offset income of other members of the group, and can result in the unitary group incurring a net operating loss for the taxable period. For more information, refer to Chapter 35.

b) Intercompany Transactions:

Intercompany transactions between members of the same unitary business group may result in income and/or expenses which, if not eliminated, will distort the unitary business group's combined income. Examples of such income items are not limited to:

(1) fees received from other members of the group for management and other services, rents, royalties, interest and dividends.
(2) transactions resulting in charges to expense, asset, surplus or other accounts, which must be eliminated if they cause a distortion of income.
(3) unrealized profit contained in a unitary business group member's ending inventory as a result of intercompany sales of merchandise unless the unrealized profit in ending inventory tends to remain constant from year to year, thus not causing a substantial distortion to income. REF: IAC § 100.5270(b)(1)

c) Capital Losses:

A capital loss incurred by one member of the group is allowed to offset the capital gains incurred by other members of the group. No capital loss is allowed in excess of the unitary group's capital gains. Any excess capital loss must be used in carryback or carryforward years in accordance with 26 CFR § 1.1502-22 on consolidated capital gain or loss. For more information, refer to Chapter 35

d) Capital Loss Carryovers:

Capital loss carryovers are allowed to offset unitary capital gains in the same manner and subject to the same limitations as net operating loss carryovers for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

losses incurred in years ending prior to December 31, 1986. A capital loss may be used to offset capital gains only. It may not be used to offset ordinary income.

Refer to Chapter 35 for further information regarding the limitations on net operating loss and capital loss carryovers.

e) Charitable Contributions:

The charitable contributions made by the members of the unitary group are allowed as a unitary group and in accordance with 26 CFR § 1.1502-24. In the case of a corporation, IRC § 170(b)(2)(A) provides in general that the total deductions for any taxable year shall not exceed ten percent of the taxpayer's taxable income.

2. Part Year and Different Year End Members

The income of part-year members of the group is included in the unitary taxable income figure for the portion of the year for which the corporation is a member. The amount of income to be included can be computed using one of the three methods described in IAC §§ 100.5265 and 100.5270(f).

For tax years ending on or after December 31, 1987, members of a combined group may have different taxable year-ends. Per IAC § 100.5265(b), members of the unitary group with different tax year-ends must adjust their income, modification and apportionment figures to reflect the same time period as the remainder of the unitary group. Three options for making the adjustment are presented in IAC § 100.5265.

Taxpayers are allowed to choose which method they want to follow, but generally they must apply that method to all subsequent returns unless one of the exceptions in IAC § 100.5265(c) applies.

3. Other Federal Rules Regarding Consolidating Adjustments

It is the auditor’s job to determine if adjustments are allowable – not whether they were shown as an adjustment on the federal return, or removed before the computation of the federal return figures. The information in the following paragraphs will be helpful when the unitary business group has different members than the consolidated return group (or where multiple federal returns are filed by the members of a unitary business group).

26 CFR §1.1502-11 (Consolidated Taxable Income) states that consolidated taxable income is computed beginning with "separate taxable income". The "separate taxable income" of each member of the group is computed in accordance with the provisions of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

the Code covering the determination of taxable income of separate corporations, subject to modifications. Refer to 26 CFR §1.1502-12 through 1.1502-42 and those referenced within.

"Separate taxable income" is then modified to arrive at consolidated taxable income by the following adjustments:

a) The addition of any consolidated capital gain net income which is computed in accordance with 26 CFR § 1.1502-22.

b) The subtraction of any consolidated charitable contributions (defined in IRC § 170) deduction (computed in accordance with 26 CFR § 1.1502-24).

(1) can be carried forward five (5) taxable years.
(2) shall consist of
   (a) any excess contributions of the group, plus
   (b) any excess contributions of members of the group arising in separate return years of such members.
(3) is allowed if the contributions made during the carryforward year are less than the 10% limitation.
(4) contributions for the carryforward year plus the carryover cannot exceed the 10% limitation.

Note: The federal consolidated return regulations also provide that the deduction should not include any excess contributions apportioned to a corporation for a separate return year pursuant to 26 CFR § 1.1502-79(e). However, IAC § 100.5270(a)(1) expressly provides that the separate return limitation rules do not apply to the computation of pro-forma federal taxable income, and so this limitation should be ignored.

c) Any consolidated Section 922 deduction for Western Hemisphere Corporations (computed in accordance with 26 CFR § 1.1502-25, however, *this deduction is allowed for tax years ending prior to 1981* only);

d) Any consolidated dividends received deduction (computed in accordance with 26 CFR § 1.1502-26),

e) Any consolidated Section 247 deduction for dividends received from public utilities (computed in accordance with 26 CFR § 1.1502-27);

f) Any consolidating adjustments required due to the disposition of the stock of a subsidiary (computed in accordance with 26 CFR § 1.1502-11(b)(2)).

g) 26 CFR § 1.1502-21 allows a consolidated net operating loss deduction.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For greater detail, refer to the 26 CFR section listed with each adjustment.

The amount of consolidating adjustments which are necessary and/or allowable to corporations filing a consolidated federal return are numerous and complex. In any situation in which the combined return group is made up of different members than the federal consolidated group, the applicability of these adjustments must be examined. It is also important to review the filing history of the combined return members to determine if the carryover provisions relating to the consolidated adjustments are in any way limited. The preceding explanation should be considered a general guideline for computing taxable income.

C. Banks for Cooperatives

The U.S. Supreme Court has ruled that a lending institution under the federal farm system consisting of banks for cooperatives is not exempt from state taxation. Refer to Chapter 30 for more information on financial institutions.

D. Federal 1120-F Filers

Federal taxable income for foreign corporations (federal 1120-F filers) is determined in accordance with IRC §§ 881 and 882 and generally includes only income connected with the conduct of the corporation's trade or business in the United States (rather than worldwide). Therefore, the amount of taxable income of a federal 1120-F filer, which would be included in unitary taxable income, would be limited to the amount which was reportable federally.

Federal taxable income to be used in computing Illinois base income is the sum of U.S. source fixed or determinable annual or periodic gains, profits, and income (“FDAP income”) items reported in Section I of federal Form 1120-F (lines 1 -10, col. B), plus the amount of U.S. source income that is effectively connected with the conduct of a U.S. trade or business (“ECI”) reported in Section II of Form 1120-F (Line 31). Addition and subtraction modifications would then be applied to determine total base income.

E. REMIC

Holders of Real Estate Mortgage Investment Conduits, (REMICs) are subject to the federal IRC provisions for REMICs. These provisions are a self-contained set of definitions and guidelines under IRC § 860A-G, when read as a whole, intend that federal taxable income would never be less than the excess inclusion income amount from such REMICS. (Refer to IRC § 860E(a)(1)). All members of an affiliated group filing a consolidated return are treated as one taxpayer for purposes of IRC § 860E. REMIC owners who report a federal loss on Line 28 prior to application of IRC § 860E must adjust their federal taxable income so as to not be less than the excess inclusion income amount. Excess Inclusion Income is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

calculated on federal Schedule Q for Form 1066 and reported on federal Form 1120, Line 30. Therefore, if federal Form 1120, Line 28 is lower than Line 30, it is a good indication that a REMIC adjustment has been made. Because Illinois follows federal taxable income, IL-1120, Line 1 will also include the excess inclusion income limitation. More information on REMIC related adjustments is available in Chapter 35, Losses.

F. Limited Liability Company / Disregarded Entity

Federal rules governing limited liability companies (LLCs) are in 26 CFR § 301.7701-3, classification of certain business entities. Illinois follows the federal rules on LLCs for filing purposes as explained in IAC § 100.9750(b).

1. LLC characteristics

   a) Owners are called members and may include:
      (1) Individuals
      (2) Corporations
      (3) Other LLCs
      (4) Foreign entities
   b) May have only one or up to an unlimited number of owners
   c) Owners have limited personal liability for debts & actions of the LLC
   d) Management flexibility
   e) Benefits of pass-through taxation

2. Businesses generally not eligible to be LLCs

   a) Banks
   b) Insurance companies
   c) Nonprofit organizations

3. Multiple-member LLCs

   a) Generally file as a partnership on Form 1065
   b) May file as a corporation
      (1) Must file Form 8832, Entity Classification Election

4. Single-member LLCs

   a) If bringing losses into the group,
      (1) See IAC § 100.4500 Carryovers of Tax Attributes paragraphs (a)(1)&(2)
   b) Member is an individual
      (1) File Form 1040
      (2) Schedule C, E or F

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

c) Member is a corporation
   (1) File Form 1120 or
   (2) File Form 1120S

V. FEDERAL RARS

IITA § 506(b) requires that any changes affecting federal income tax (income, deductions, liability, credits, etc.) be reported to the Department within 120 days after the final determination is made or 2 years and 120 days if seeking a refund.

This provision allows the Department to assert a deficiency only for the underpayment that is attributable to the federal change. As a general rule, the correct amount of income, deductions, credits and resulting liability should always be computed correctly in order to ensure that any items carried to other years are correct and to ensure that the taxpayer does not receive a refund when it has not actually overpaid its liability and is not required to pay more tax when it has already paid its actual liability in full. To reconcile these two principles, the auditor should compute the taxpayer's correct liability (including the federal changes) and its correct liability (ignoring the federal change), and issue a notice of deficiency only for the excess of the correct liability over the taxpayer's total payments or the excess of the correct liability over the liability computed ignoring the federal change, whichever is smaller. In the case of a refund, the allowable refund cannot exceed the taxpayer's overpayment, computed using its correct liability, or the excess of its liability computed by ignoring the federal change over its correct liability, whichever is smaller.

For example, a taxpayer who failed to report an item of business income on its federal income tax return may be required to increase both its base income and its sales factor to properly take into account the unreported income.

Any reclassification of the amount of income classified as business or nonbusiness income and/or verification/adjustment of the allocation or apportionment methods is limited to the amount of the federal change in a situation where these federal changes result in additional tax due to the state.

For instance, if the statute of limitations for issuing a Notice of Deficiency on the original return has expired and the company has a federal change that increases income, as in the example below, the Department has the authority to examine and classify the federal audit increase as business or nonbusiness in nature and properly allocate that increase. However, the Department does not have the authority, in this situation, to recompute the apportionment formula of a company that originally filed on a separate company basis by determining that the company should have been filing as part of a unitary group. The classification of income, allocation or apportionment reported on the original return had to have been examined and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

adjusted within the statute of limitations time period for the original return. REF: *Caterpillar Tractor Co. v. Lenckos*, 1979 (See Chapter 49 for a synopsis of this case and a complete case citation.)

Example: Corporate taxpayer timely files a 2004 Illinois return reporting federal taxable income of $100,000. There are no modifications or partnership income involved and all income is classified by the taxpayer as business income. The company reports a 50% Illinois apportionment formula, which results in a tax liability, originally computed on Illinois base income of $50,000. Had the return been audited by the Department it would have been determined that $10,000 of income should have been classified as nonbusiness income and allocated entirely to Illinois. The "correct" Illinois base income would have been $55,000 ($90,000 x 50% = $45,000 + $10,000 = $55,000).

In 2007, as a result of a federal audit, federal taxable income was increased to $150,000. The taxpayer reports the federal change on an amended return and continues to treat all income as business income. The Illinois base income figure is increased to $75,000 ($150,000 x 50% = $75,000).

Upon examination by the Department it is determined that of the $150,000 in revised federal taxable income, $40,000 is actually nonbusiness in nature ($10,000 of the original $100,000 and $30,000 of the federal change amount) and should be completely allocated to Illinois. Based on IITA § 905(e) the Department has the authority to propose an assessment based on reclassifying the $30,000 of the federal change amount as nonbusiness income and allocating it entirely to Illinois; however, it cannot reclassify the original $10,000 of income which should have been considered nonbusiness income on the original return since the statute of limitations had expired for issuing a notice of deficiency on that change. The Department would therefore have the authority to propose an assessment based on revised Illinois base income of $90,000 ($150,000 - $30,000 = $120,000 x 50% = $60,000 + $30,000 = $90,000).

IAC § 100.9200(a)(4) gives the procedures for reporting a federal change. This regulation also provides guidance on when a federal change (RAR) is considered finalized for reporting purposes under IITA § 506(b).

A. Taxpayer Informs the Auditor There Is a Finalized RAR,

or that an RAR may be finalized soon.

1. Auditors may not accept the following to incorporate finalized federal adjustments into their audits.
   a) a copy of the federal RAR

b) IRS settlement
c) the taxpayer’s workpapers

2. Auditors must instruct the taxpayer to report all finalized federal changes on the form prescribed by the Department (IL-1040-X, IL-1120-X, etc.).

3. Auditors are to advise the taxpayer, in writing, to file an amended return within 120 days of IRS finalization date and to pay the additional tax due, if any, to avoid late-payment penalties.

Simply informing the auditor that there is an RAR without providing a processable amended return does not comply with the 120-day statute for notification in order to avoid the underpayment penalty or with the requirement that a refund claim be filed within 2 years and 120 days after federal finalization.

Where the taxpayer has reached a finalized partial settlement/agreement with the IRS on one or more (but fewer than all) issues resulting in a change to base income, it is the Department's position that the taxpayer should report the agreed portion within the appropriate time period stated by IITA § 506(b).

IAC § 100.5030(a) states that if a company is a member of a federal consolidated group and the consolidated return is adjusted, any member whose "separate taxable income" is altered by the federal adjustment and who files an Illinois separate company return must report the adjustments as if the company had filed a separate federal return. If the company is a member of a unitary business group, any adjustments to the federal consolidated return that affects unitary income must be reported even if the actual federal adjustment was made to the income or expenses of a company that is not itself an Illinois filer. Since its income is a component part of the unitary income, any adjustments to that income must be reported.

B. Procedures for Handling RAR’s

If the auditor is at the taxpayer’s location, the taxpayer should give the amended returns directly to the auditor to expedite handling. A return is considered officially filed with the Department on the date it is presented to an auditor because he/she acts as an agent of the Department. The two-year statute of limitations to issue a Notice of Deficiency also commences to run on the “received date” of the return [IITA § 905(e)]. An executed Form IL-872 may be obtained to extend the statute of limitations on a federal RAR if necessary. Refer to Audit Manual chapter 39 for procedures on proper handling of RAR amended returns.

C. Expanding the Audit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

If the federal change encompasses tax years within or adjoining the audit assignment

- Be cognizant of the statute of limitations and prepare any necessary Form IL-872.
- Discuss the matter with your supervisor, who will approve and make the necessary changes to the period and statute on GenTax.
- If the federal change year(s) is outside of the audit period or involves tax years preceding the audit period, complete Form SC-137 to request a new assignment.
- Refer to Chapter 20 of the Audit Manual for procedures

VI. FEDERAL SCHEDULE J ADJUSTMENTS

As a result of changes made to IRC §§ 453(j) and 453C by the Tax Reform Act (TRA) of 1986, taxpayers may compute federal income tax on items of income which have not been included in federal taxable income ("Schedule J adjustments"). The Department has taken the position that the Schedule J adjustments should be included in federal taxable income for Illinois income tax purposes.

The Illinois effect of the 1986 amendments to the IRC is that federal tax may be paid on deemed payments but, since some taxpayers compute the tax as a Schedule J adjustment only, the deemed payments may never be included in the computation of federal taxable income. In addition, future actual installment payments may be included in federal taxable income net of the prior reported deemed payments. The result is that, unless an adjustment is made to reported federal taxable income, a portion of the gain or income from an installment sale may never be included in income for Illinois income tax purposes.

Taxpayers may take the position that the income has not been included in federal taxable income and cannot, therefore, be included in Line 1 of the Illinois return. However, IITA § 203(e)(1) states that taxable income is that which is "properly reportable" under the Internal Revenue Code and Schedule J adjustments are included in taxable income. The reason these items are not included in taxable income as shown on the first page of the federal return is that they are subject to tax at the highest marginal rate, regardless of the taxpayer’s income. See, for example, IRC § 197(f) and IRC § 1291. To implement these provisions, the federal Schedule J computes tax on the taxpayer’s income without regard to these items and then adds in an amount of tax on these items, computed at the highest statutory rate. Even though the taxpayer may have elected to calculate the tax effects of the TRA of 1986 adjustments on Schedule J and not include the income in Line 30 of the federal return, the income is still "properly reportable" taxable income and is, therefore, includible in the computation of Illinois net income.

Auditors must review the federal Schedule J to determine if there is tax calculated on income that is not reported in federal taxable income on page one of the return. Care should be taken in examining statements submitted to verify information reported on the “Other” line (9f on the

2012 Form 1120) of the Schedule J. Once determined, the auditor will ensure the Schedule J income is properly reported for Illinois purposes.
If the auditor finds Schedule J income has not been properly reported for Illinois purposes, they must extensively document their findings and submit a request for Illinois Line 1 change approval to their supervisor. Supervisors will forward Line 1 audit adjustment requests to the Income Tax Audit Planning and Technical Support supervisor for review.

VII. ADDITION MODIFICATIONS

A. Federally Tax-Exempt Interest

(IITA § 203(b)(2)(A))

Interest excluded from gross income in the calculation of taxable income, and after December 31, 1987, all distributions from regulated investment companies are required to be added back to federal taxable income.

Any federally-exempt interest is required to be reported on the US 1120, Schedule M-1. It should appear on Line 7 (based on the 2012 form) of that schedule. The amount may also be verified by looking at the federal Schedule K, Line 9.

The addition modification is not limited to, but will primarily consist of, state and municipal interest income. The interest must simply be exempt from federal taxation. A distinction must be made between interest which is exempt from federal taxation and that which is beyond the reach of federal taxation (i.e. foreign source income not effectively connected with the United States). An example of this latter type of interest is the interest elimination, which would appear on the Schedule M-1 of a US 1120F filer.

The figure appearing on Line 7 may or may not be netted by amortization of bond premium (discussed next). It is important, when examining this interest, to research additional schedules and documents provided by the taxpayer to determine exactly what is included in this figure and to determine if the proper amount of interest recorded on the books is identified as such on the Schedule M-1.

Another type of interest, which should be included in the addition modification amount, is ESOP (Employee Stock Option Plan) interest. IRC § 133(a)(1) allows a certain percentage of this income to be excluded from the computation of federal taxable income. The amount of interest excluded should be added back to Illinois base income by virtue of IITA § 203(b)(2)(A).

Some interest, which is exempt from federal taxation, has also been exempted from Illinois taxation. See IAC §100.2470(c) and (f) and Publication 101 for a complete listing of these obligations. Since the income is not included in federal taxable income, it must first be added back to Illinois pro forma income before it can be claimed as a subtraction

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

modification on the line for U.S. government interest. For information on subtraction modifications, refer to Chapter 25.

Any accrued interest, which is paid by the taxpayer to the seller when a bond is purchased between interest payment dates is interest income of the seller, and so is deducted from the amount of interest the taxpayer is considered to have earned for the year, and only the remaining amount of interest income is added back for Illinois purposes.

If, due to the amount of "paid for interest" or amortization of premium, the federally-exempt interest addition modification is a negative number, it should be shown as a positive subtraction modification (and properly identified as such) on the Other Subtraction line of the IL-1120.

The amendment enacted by Public Act 85-731 which changed the addition modification to include all distributions from regulated investment companies (RIC), requires corporations (for years ending on or after December 31, 1987) to add back any interest or dividends received from mutual funds investing in federally tax-exempt securities. If a stock dividend is received, the fair market value of the stock dividend on the date of distribution must be included in Illinois base income. If, however, the distribution is actually a "return of capital" which is tax free for federal purposes, the distribution would also be tax free for Illinois purposes.

Illinois taxes zero coupon municipal bond interest as it is accreted each year. For more information regarding the accretion of discount, refer to number two below, Accretion of Discount section.

1. Amortization of Bond Premium

Bond premium is the amount a purchaser pays for the bond, which exceeds the bond's face value. When a bond sells at a premium, it is generally because the interest it bears exceeds the rate of return on similar securities in the market at the time of the sale. Because of this, the purchaser pays a "premium" price for the bond over its face value. The interest received on the bond each period is taxable to the purchaser/owner. The amount of interest received, however, is not the bond's true yield since a portion of that interest is actually a return of the premium paid. Under IRC § 171, the owner of a federally taxable bond may offset the interest income it must include in taxable income each year by the amount of that income which is actually the return of premium. This is known as amortization of the bond premium. The basis of these bonds is also reduced each year and when the bonds are ultimately sold (whether federally taxable or tax-exempt) the capital gain or loss is computed on the adjusted basis of the bonds.

The IITA allows taxpayers to subtract the bond premium amortization required by IRC § 171 for that year to the extent the taxpayer was prohibited from deducting the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

amortization by IRC § 171(a)(2). Illinois does not provide any adjustment to federal taxable income (adjusted gross income in the case of an individual) related to gains or losses on the sales of bonds. The only subtraction is for the amortization of bond premium that is allocable to that particular tax year. If the bond is called before maturity, then there is no subtraction for periods after the call date.

Although IAC § 100.2455(b) is for subtraction modifications, the taxpayer could net bond premium amortization against the addition modification for state and municipal interest. The instructions to the IL-1120 state that the addition modification should match Schedule M-1, Line 7 (or equivalent). The interest reported on the M-1 could be gross or net of premium amortization. If it is gross, then the taxpayer would claim the premium amortization as a subtraction modification and include it on the Illinois Schedule M.

2. Accretion of Discount

a) Original Issue Discount

If a bond is acquired from an issuer for an amount that is less than the maturity value, the issuer will have to pay the difference between the selling price and the maturity value to the holder of the bond when the bond matures. The difference between the selling price and the maturity value is known as Original Issue Discount (OID). Under federal law, if the interest from the obligation is taxable federally, the holder of the obligation that was issued with the OID must include a portion of the OID in gross income each year even though the OID is not paid until maturity. For some exceptions to this federal rule, refer to IRC § 1272.

For Illinois purposes, the holder of the obligation should increase the addition modification claimed for interest income earned on the federally tax-exempt bonds by a pro rata amount of the OID if, had the obligation been taxable federally, the holder would have had to report it as such on the federal return.

b) Market Discount

If a bond is acquired from someone other than the issuer at a discount, the difference between the acquisition amount and the maturity value is known as a market discount. A market discount on obligations issued after July 18, 1984 whose interest is taxed at the federal level is not taken into consideration until the bond matures or is sold. At that time, the amount of the gain reported which is attributable to the market discount is considered ordinary income and taxed as such. Therefore, for Illinois addition modification purposes, any accretion of market discount is not included in the modification amount until the bond has matured.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Insurance Company Interest Federally Exempt
(IITA § 203(b)(2)(A))

Refer to Chapter 31 for information regarding the computation of the addition modification for federally tax-exempt interest when dealing with insurance companies.

B. Illinois Income and Replacement Tax Deducted
(IITA § 203(b)(2)(B))

As a general rule, the amount of Illinois Income Tax deducted on the federal return (US 1120, Page 1, Line 17) for the year is the amount of the Illinois addition modification (Step 2, Line 4 on the 2012 IL-1120). A state by state breakdown of the Line 17 amount showing, specifically, the amount of Illinois income and replacement (if applicable) tax deducted should be included in the audit file. In some cases where there has been subsequent payments made to an account for a specific year (due to billings, amended returns, state or federal audits, etc.), the additional tax expense might be claimed on the Other Deductions line of the federal return.

If the corporation is using the accrual method of accounting in preparing their federal tax return, the state income tax deduction is an estimate. It is possible and very likely, that in a subsequent year it will be determined that the amount of state taxes was over or under accrued for a prior period. An adjustment for the over/under accrual is then made to the deduction computed in the later year. The accrual adjustment should be reflected in the Illinois modification in the later year also. In some cases, this may result in a negative addition modification. Since a negative addition modification cannot be processed, it should be shown as a positive subtraction modification, and reported (with a proper explanation) on the Other Subtraction line of the IL-1120.

Also see IAC § 100.2450 IIT Refunds

C. Capital Gains Addition
(IITA § 203(b)(2)(C))
FOR REGULATED INVESTMENT COMPANIES (“RICs”)

A RIC's computation of federal taxable income (US 1120-RIC) does not include capital gain income. The computation of capital gain income and the deduction for dividends paid to shareholders is done on US Schedule D (Form 1120), line 17, and reported in part two of the US 1120-RIC (after the computation of federal taxable income). Based on IRC § 852(b)(3), the excess of capital gain income over dividend distributions to shareholders has not been included in federal taxable income, thus, the need for the addback required under IITA § 203(b)(2)(C).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

D. Net Operating Loss Deduction After 12/31/86

(IITA § 203(b)(2)(D))

This section requires taxpayers to add back the amount of net operating loss deducted in arriving at taxable income unless carried forward from a tax year ending prior to December 31, 1986.

Refer to Chapter 35 for information regarding the computation of the Illinois Net Loss Deduction.

E. Net Operating Loss Carried From Before 12/31/86

IITA § 203 (b)(2)(E)

In general, this modification states that taxable income may be less than zero (but not less than the NOL for the year) provided that when taxable income is less than zero, and addition modifications exceed subtraction modifications, an NOL addition modification must be made for any taxable year to which the NOL is applied.

Net operating loss deductions are reported on US 1120 line 29a and carried to Step 2, Line 2 on the IL-1120. For information regarding Net Operating Losses, including the related modifications, refer to Chapter 35.

F. Remediation Costs Addition

(IITA § 203(b)(2)(E-5))

This modification applies to taxpayers who, for tax years ending after December 31, 1997 and on or before December 30, 2001, claimed a credit for unreimbursed environmental remediation costs.

The credit was calculated on Schedule 1299-D and reported in Part V on the Form IL-1120. The addition modification was reported in Part I on the Other Additions line of the Form IL-1120. The taxpayer is required to have a “No Further Remediation” letter that was issued by the Illinois Environmental Protection Agency (IEPA) to justify the credit and subsequent addition modification. The credit had to have been claimed for the taxable year in which the IEPA approval of the eligible costs was granted.

For more information on Income Tax credits, refer to Chapter 36 of the Audit Manual.

G. Federal Bonus Depreciation

(IITA § 203(b)(2)(E-10))

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The auditor's primary responsibility will be to verify that the taxpayer does not claim too much in subtraction modifications on bonus depreciation previously reported as an addition modification. However, it is advised that the addition modification, if reported, be verified as well. For information regarding the bonus depreciation subtraction modification, refer to Chapter 25.

IRC § 168 originally provided that taxpayers were to deduct bonus depreciation of 30% of the cost of capital assets acquired and placed in service after September 10, 2001, and before January 1, 2005. Taxpayers depreciate the remaining 70% of the cost using their normal depreciation method. For most assets, the normal depreciation is 70% of what the amount would be if no bonus depreciation were claimed. The bonus depreciation allowable on property placed in service after May 3, 2003, increased to 50%.

IRC Section 168(k) has been amended several times through the following Acts, primarily to extend its application.

- Economic Stimulus Act of 2008
- American Recovery and Reinvestment Act of 2009
- Small Business Jobs Act of 2010
- American Taxpayer Relief Act of 2012
- Tax Increase Prevention Act of 2014
- Protecting Americans from Tax Hikes (PATH) Act of 2015

The most recent amendments reflect the intention of Congress to provide for bonus depreciation rules that are substantially identical to the bonus depreciation rules originally enacted in 2002 and 2003. A comprehensive set of regulations were promulgated in connection with the former rules. *See* 26 CFR § 1.168(k)-0 *et. seq*. The IRS in 2008 issued a notice confirming that the existing regulations continue to apply. See IRS News Release (IR-2008-58) (April 11, 2008).

Federally, bonus depreciation has generally been available since September 11, 2001, with a period of expiration in 2005, 2006, and 2007, and has ranged from 30 percent to 100 percent over the years as shown in this chart:

Start Date	End Date	Bonus Rate
09/11/2001	05/05/2003	30%
05/06/2003	12/31/2004	50%
01/01/2008	09/08/2010	50%
09/09/2010	12/31/2011	100%
01/01/2012	12/31/2017	50%
09/27/2017	12/30/2022	100% for qualifying assets

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Public Act 92-603 effective June 28, 2002, “decoupled” Illinois from the federal legislation by reversing its effects on depreciation.

- First, it requires taxpayers to add back on their Illinois return, the federal bonus depreciation.
- Second, it allows taxpayers to deduct the depreciation amount that would have been allowed on their federal return if the bonus depreciation law had not been enacted.
- This deduction is allowed for each year that depreciation is claimed for an asset, not just for the year in which the bonus depreciation on the asset is added back.

For most taxpayers, the bonus depreciation for "listed property" such as automobiles used in business is claimed in Part V of federal Form 4562. For all other property, most taxpayers claim the bonus depreciation in Part II, of the Form 4562. The amount of the bonus depreciation is then subtracted from the cost basis of the property, and the net amount is used to compute regular depreciation in column (c) of Line 19 or Column (e) of Line 26 of the 2012 form. The instructions indicate that the bonus depreciation is computed on the cost basis of the property, minus any IRC § 179 deduction claimed with respect to that property, for both Lines 14 and 25.

All deductions taken on US Form 4562, Part II, Lines 14 and 25 must be added back as an addition modification. Auditors will refer to these sections of the form to verify amounts reported for Illinois.

As initially enacted, the modification in IITA § 203(b)(2)(T) assumed that the taxpayer had actually taken bonus depreciation equal to 30% of its basis in the property, so that its regular depreciation is computed on only 70% of the basis it would otherwise use. The depreciation deduction is therefore equal to 70% of what it would be if IRC § 168(k) had not been enacted. Multiplying the 70% times 0.429 gives 30% which is the reduction in regular depreciation caused by taking the bonus depreciation. However, the amounts on Line 19 of Form 4562 also include depreciation on other property, so we cannot simply multiply those amounts by 0.429 to compute this adjustment. Auditors will review a breakdown of all items listed for Line 19 to determine on which bonus depreciation was claimed.

H. Bonus Depreciation - Effect on Federal Gain & Loss

(IITA § 203(b)(2)(E-11))

Under the IRC, the gain or loss realized by a taxpayer on the disposal of a depreciable asset is the sales price minus the depreciated basis. Thus, if the depreciation deductions taken over the life of an asset exceeded its actual decline in value, the taxpayer will realize a gain on its sale, recapturing the excess depreciation. If the depreciation was less than the decline in value, the taxpayer will realize a loss on the sale. Either way, the total of all depreciation

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

expenses plus the loss (or minus the gain) realized on the sale will equal the actual decline in value of the asset.

If not for subsections (E-11) or (U), the Illinois accounting for the decline in value of an asset would be wrong unless the asset was fully depreciated prior to the sale. Only then would the total subtractions allowed in subsection (T) offset the addition required in (E-10), so that the Illinois depreciation would equal the federal depreciation, and the federal gain would equal the gain that should be recognized for Illinois purposes. At any other time, the depreciation effectively allowed for Illinois purposes would be less than the depreciation allowed for federal purposes, and the federal gain flowing through to Illinois would be greater than the gain that a taxpayer should realize (or the federal loss would be less than the proper Illinois amount).

With subsections (E-11) and (U) reversing all the Illinois adjustments, the total depreciation allowed for Illinois purposes will be the amount allowed for federal purposes, and the net gain or loss recognized federally and passed through to the Illinois return is exactly what the gain or loss should be for Illinois purposes. The taxpayer is required to make this addition modification only once under this subparagraph with respect to any one piece of property.

Form IL-4562 is used to compute the addition and subtraction modifications for the bonus depreciation. The form must be attached to the Illinois return. If the Illinois tax return has already been filed, then the taxpayer must file an amended return. The IL-4562 must be attached to the amended return. Auditors should review the IL-4562, Step 2, Line 3 for accuracy and request any other documentation necessary to make a determination.

If an amended return reversing the bonus depreciation was filed by October 15, 2002, no penalties or interest were assessed on the resulting underpayment.

1. IL-1040 Filers

The computation of the Federal Bonus Depreciation addition and subtraction modifications can be different for IL-1040 filers because some individuals report their depreciation expenses on federal Form 2106 for Employee Business Expenses. Refer to Chapter 45 for more information on Individual Income Tax audits.

2. Expiration of the Federal Bonus Depreciation

The Federal Job Creation and Worker Assistance Act of 2002 that created bonus depreciation expired in 2004. However, there have been several other Acts extending the provisions of IRC § 168(k). The most recent Act passed relating to federal bonus depreciation has extended the provision through tax year 2026. Unless a new Act is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

ratified further extending the federal bonus depreciation, there will be no addition modifications after 2026; subtraction modifications will continue in succeeding years. See the example below following the next issue.

3. Federal Bonus Depreciation at 50%

The federal bonus depreciation started out at 30% for assets placed in service on or after September 11, 2001. The percentage increased to 50% for certain assets acquired after May 5, 2003. Public Act 94-776 amended the IITA for tax years ending after December 31, 2005, to allow the subtraction of 100% of the federal depreciation deduction of an asset on which 50% bonus depreciation was claimed.

The following example illustrates how property acquired between May 5, 2003 and December 31, 2005 will be handled.

> Example: As a result of the disallowance of the 50% Federal bonus depreciation, an asset for Illinois purposes will not get the full depreciation deduction over its life because of the 3/7 (.429) factor applied to the remaining federal deprecation not including the bonus depreciation. In the example below a $10,000, 5-year asset purchased in 2004 gets a 50% federal bonus depreciation deduction of $5,000 = ($10,000 x 50%) plus regular federal depreciation of $1,000 = ($5,000 x 20%) in 2004. For Illinois, the $5,000 bonus is added back to income and 3/7 of the regular federal depreciation, or $429 = ($1,000 x .429), is allowed as a deduction in 2004.

	Add-back	Subtraction	
2004	5,000	429	($5,000 x 20% x .429)
2005	0	1,600	($5,000 x 32%)
2006	0	960	($5,000 x 19.2%)
2007	0	576	($5,000 x 11.52%)
2008	0	576	($5,000 x 11.52%)
2009	0	288	($5,000 x 5.76%)
Total	5,000	4,429	

Under current law, there is no deduction for the remaining $571 in basis. However, all addition and subtraction modifications are reversed in the year the asset is disposed of, so over the life of the asset the taxpayer will be allowed to deduct the entire basis of the asset, either as depreciation or in determining the gain or loss on disposition.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. Related Party Expenses

(IITA §§ 203(b)(2)(E-12) and (E-13))

Public Act 93-0840 created new addition and subtraction modifications for related party transactions with 80/20 companies effective for taxable years ending on or after December 31, 2004. Originally the new modifications only applied to interest and intangible expenses incurred in transactions with related companies that would have been included in the unitary group if not for the 80/20 rule. Later, Public Act 95-0233 and Public Act 95-0707 for taxable years ending on or after December 31, 2008 expanded the modifications to include interest expenses, intangible expenses and insurance premium expenses incurred in transactions with a related party foreign or domestic that would have been a member of the unitary group if not for the prohibition in IITA § 1501(a)(27) that requires all members of the unitary group to apportion their income under the same subsections of IITA § 304 (noncombination rule). Schedule 80/20, Related Party Expenses, was revised along with IAC § 100.2430, Addition and Subtraction Modifications for Transactions with 80/20 and Noncombination Rule Companies. Effective for tax years ending December 31, 2017 and after, Public Act 100-0022 amended the IITA in a manner to affect related party addition and subtraction modifications by eliminating the aforementioned noncombination rule.

Related party expense modifications are reported on the IL Schedule 80/20. It is possible that a parent company is 100% foreign and not incorporated in the US. Auditors will review the schedule and any supporting documents to verify the modifications are calculated correctly.

1. 80/20 Company Specific Modifications

The addition and subtraction modifications relate to all taxpayers including individuals, corporations, trusts & estates, and partnerships that own or transact business with 80/20 companies starting with taxable years ending on or after December 31, 2004. Schedule 80/20 Related-Party Expenses was created for taxpayers to report these modifications. The Schedule 80/20 Related-Party Expenses is for corporations (including Subchapter S corps), trusts & estates and partnerships. Individuals report the addition and subtraction modifications on Schedule M.

> Note: For individuals, corporations, trusts & estates, and partnerships the legislation created two addition modifications and three subtraction modifications each for a total of 20 new addition and subtraction modifications to the Act.

The addition modifications are for interest expenses (IITA § 203(b)(2)(E-12)) and intangible expenses (IITA § 203(b)(2)(E-13)) incurred in transactions with a person who would be a member of a unitary business group with the taxpayer, if not for the 80/20 test. This is for interest expenses and intangible expenses, including royalties, that reduced

federal taxable income or federal adjusted gross income reported to Illinois. These additions are included on Schedule 80/20, Step 2, Lines 3 and 6; however, these amounts in Step 2 are reduced by any dividend income received from the 80/20 company that is included in Illinois base income. A dividend is included in base income only to the extent that it is neither deducted from federal taxable income or adjusted gross income, nor claimed as a subtraction modification under IITA § 203. See IAC § 100.2430(b)(1) for more information.

In the simplest tax-reduction scheme, the U.S. corporation creates an 80/20 subsidiary, contributes a large amount of cash to the subsidiary, and borrows the cash back. After that, the U.S. corporation pays interest to the 80/20 subsidiary and deducts the interest payments on the federal return, thereby reducing its Illinois taxable income. The 80/20 subsidiary is typically set up in a foreign "tax haven" such as the Bahamas, where Illinois has no authority to tax it on its interest income and the foreign government does not tax it at all. The 80/20 subsidiary returns the cash it receives to the U.S. corporation either as new loans or as dividend payments, which are at least partially exempt from Illinois tax and usually are entirely exempt. At the end of all these transactions, the U.S. corporation has all the cash it started with but has created federal deductions to reduce its Illinois tax liability.

Example:

Calendar Year 2004 Description	Domestic Parent	Virgin Islands Co
Line 1 Sales	12,000,000	
Dividend income from 80/20	2,000,000	
Royalty Income		1,000,000
Interest Income		1,000,000
Total Income	14,000,000	2,000,000
Wages	4,000,000	
Depreciation	500,000	
Royalty Expense paid to 80/20	1,000,000	
Interest Expense paid to 80/20	1,000,000	
Other Expenses	2,500,000	10,000
Total Expenses	9,000,000	10,000
Federal Line 28	5,000,000	1,990,000
Sch C dividend exclusion	2,000,000	
Federal Line 30	3,000,000	1,990,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In this example, the domestic parent owns a subsidiary in the Virgin Islands that is incorporated in Delaware, so the subsidiary is included in the consolidated federal return as indicated above. The auditor does an 80/20 test on the Virgin Islands subsidiary and determines that it is excluded from the unitary group under IITA § 1501(a)(27). The parent has transferred substantial capital to the 80/20, which it has borrowed back resulting in a $1 million interest payment to the 80/20. The interest income appears on the pro forma federal return for the 80/20 with the income being excluded from unitary income; however, the corresponding interest expense has reduced Illinois unitary income. In addition, the parent has transferred intellectual property to the 80/20 and pays the 80/20 royalty expenses of $1 million for the use of the intangible property.

In return, the 80/20 has paid the domestic parent a dividend of $2,000,000, which was eliminated from federal taxable income as a federal dividend exclusion. Therefore, the dividend income is not included in Illinois base income.

On Schedule 80/20 for 2004 the $1,000,000 in interest expense and $1,000,000 in royalty expenses paid to the 80/20 are reported in Step 2, Lines 3 and 6 respectively. Since all of the $2,000,000 in dividend income received from the 80/20 was excluded from federal taxable income reported on the Illinois return, the dividend income is not in Illinois base income and therefore not included on Schedule 80/20, Step 2, Line 4. This would be the same result as if the dividends were included in Illinois federal taxable income, but deducted on Illinois Schedule J. The effect of the additions is to increase Illinois base income by the $2,000,000 in interest and royalties paid to the 80/20.

If the taxpayer failed to prepare the Schedule 80/20, then the auditor should prepare the Schedule 80/20 to assure that the audit schedule is computing the correct amount of additions and subtraction modifications.

Note: Because this is a tax year ending prior to December 31, 2008, if the 80/20 company is a one-factor financial organization and the domestic parent is a three-factor company that apportions its income under IITA § 304(a), the addition modifications on Schedule 80/20 will not apply because the 80/20 company would not be a member of the same unitary business group as the parent even if it failed the 80/20 test for exclusion from the group.

Example: A unitary transportation group that apportions its income under IITA § 304(d) creates an 80/20 company in 2007 in a foreign country with $1 billion in capital. The 80/20 then loans money to the transportation group and in 2007 received interest of $50 million. The unitary group deducts the interest paid to the 80/20, but the income received by the 80/20 is not subject to Illinois tax. Since the 80/20 company is not a transportation company, it cannot be included in the unitary group even if it was not an 80/20 and therefore the transaction is not subject to the Schedule 80/20 modifications in 2007. However, for tax years ending on or after December 31, 2008 and prior to

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

December 31, 2017, Schedule 80/20 would be applicable because of the expanded rules that applied to noncombination rule companies.

J. Captive Insurance Companies

(CURRENT IITA § 203(b)(2)(E-14))

Starting with tax years ending on or after December 31, 2008 and prior to December 31, 2017, the addition modifications on Schedule 80/20 include insurance premium expenses that are paid to an insurance company excluded from the unitary group because of the noncombination rule. Consequently, the insurance company must be at least 51% owned (captive insurance company) so that it could qualify for inclusion in the unitary business group if it were not for the noncombination rule. For tax years ending December 31, 2017 and after, Public Act 100-0022 discontinued the noncombination rule found in IITA § 1501(a)(27)(B).

Refer to Chapter 31 for information regarding the computation of the addition modifications for insurance companies.

1. Exceptions to the Use of Schedule 80/20

There are five provisions, commonly referred to as “safe harbor provisions” which if met, would make the Schedule 80/20 inapplicable to the transaction involving interest or intangible expenses. There is no safe harbor provision applicable to insurance premiums. The safe harbors in IAC § 100.2430(c) are basically the same for both interest and intangible expense as defined in IAC § 100.2430(b). Also, see IAC § 100.2430(c) for more information.

a) Tax Paid in a Foreign Country or State

The Department’s position is that foreign or other state tax returns:

(1) must show a tax liability based on the interest or intangible expenses that relate to the 80/20 transaction
(2) taxpayer should actually be paying the tax rather than accruing the tax
(3) cannot be based on a minimum flat-rate tax
(4) cannot be just an informational return.

If the foreign tax return is in a foreign language, the auditor will need to request that copies, translated to English, be provided, including form instructions and any supporting documents. The purpose of reviewing foreign tax returns for the payment of tax is to see if Illinois’s addition modification on the interest or intangible expenses creates any double taxation between Illinois and the foreign country. If the auditor is

not satisfied with the documents provided, acting as an authorized agent of the Department, they may request more information as necessary to determine if what was provided was clear and convincing evidence and validates the taxpayers claim. When translated tax returns are not available, all three of the following would be necessary to document foreign tax was applied to the interest or intangible expenses:

- Form 8833
- An independent, third party description of the tax requirements in the foreign country
- An affidavit from the tax manager or similar officer that all filing requirements were met

Problems may arise when Form 8833 is not filed. In that case, it may be acceptable to obtain a letter from the taxing authority verifying that the interest or royalties from the US affiliate were included in taxable income. Any documentation provided by the taxpayer as support for this safe harbor exemption must be submitted to Audit Technical Support to be approved by Legal.

If the taxpayer will not comply, the auditor should make the appropriate adjustments.

If a taxpayer is not required to file in a foreign country because of an international treaty, the taxpayer is not taxable in that foreign country under IAC § 100.3200(a)(2) and the sale is subject to throwback. However, that regulation applies to whether a taxpayer is deemed “taxable” for purposes of apportionment and nonbusiness income, not for purposes of the 80/20 safe harbor provisions. The taxpayer must be “subject to tax”, not merely “taxable” for 80/20 safe harbor, and as stated earlier, must be reporting and paying income tax in the foreign jurisdiction. So, whether the taxpayer does not file due to a treaty, or is “taxable” but not required to file and pay income tax in the foreign jurisdiction is irrelevant: it would not qualify for 80/20 safe harbor.

Both the Act and Regulations state that the foreign person or (prior to December 31, 2017), noncombination rule company has to be subject to tax in the foreign country or state, however this safe harbor does not apply in the case of a country or state in which the taxpayer and the foreign company or noncombination rule company are required to file unitary returns. The purpose of the safe harbor is to eliminate the Illinois addition modification if it will create a double taxation between Illinois and another state or country. Since transactions between companies required to be included in a unitary group are either eliminated in combination or a wash (i.e. the deduction allowed to the payor will offset the income of the recipient), the income is not actually subject to tax in the other state. The taxpayer will not qualify for the safe harbor provision because there is no double taxation between Illinois and the other state.

b) Arm’s Length Transactions

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The taxpayer could claim that they engaged in an "arm's length" transaction with their affiliate. Illinois has no definition of an arm's length transaction; however, IITA § 102 provides that terms used in the IITA shall have the same meaning as when used in the same context in the IRC. There are IRC rules for arm's length transactions in 26 CFR § 1.482-1, Allocation of income and deductions among taxpayers.

It will be very difficult for the Department to argue the actual viability of an arm's length agreement (i.e. whether or not the terms equate to an arm's length agreement). Instead, the auditor should verify whether or not the terms of the agreement are being met.

If the transaction involves a loan or other agreement where substantial payments are being made, then there should be a signed agreement(s) between the parties.

(1) The auditor should verify that the parties are abiding by the terms specified in the contracts or written agreements.
(2) The auditor should list all of the provisions in the agreement and then check off which provisions the taxpayer is abiding by, and note any provisions the taxpayer is consistently in violation of.
(3) If the taxpayer is not abiding by the terms of its written agreements, then this would indicate that the transaction(s) is not arm's length.
(4) Also, while reviewing the transactions the auditor should note any of the following:
  (a) Are payments being made timely between the subsidiaries?
    (i) If the taxpayer is making only one payment under a contract every three to five years, then the contract is unlikely to be at arm's length.
  (b) Is the taxpayer actually making cash payments or are they just making debit and credit entries in their books?
    (i) Ask for bank statements to verify that payments are being made.
  (c) Are penalties being charged for any late payments or other violations as specified under the contract?
  (d) If the transaction involves floating interest payments, are fluctuations in the floating rate being adjusted in a timely manner?

c) Documentation

In most cases it will be difficult for the taxpayer to claim a safe harbor for payments made to an 80/20 company in a tax haven country, or an 80/20 company or for applicable years, noncombination rule company with little or no property or payroll. These are cases where the auditor should definitely challenge the taxpayer's assertion that the related party modifications do not apply.

However, the related party modifications can apply to transactions with any affiliate including a foreign parent. If there are substantial payments for interest and intangible

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

expenses to an affiliate that would be unitary with the taxpayer but for the 80/20 test or prior to December 31, 2017, noncombination rule, and the affiliate is not taxed on the income, then the auditor should determine if the taxpayer engaged in a tax strategy to shift income off of its Illinois return because the safe harbor provisions do not apply if a principal purpose of the transaction was Illinois tax avoidance. This may require a review of historical information going back years before the audit period to see if there were substantial transfers of funds or intellectual property from the unitary group to the affiliated member outside the unitary group. If the taxpayer claims one or more safe harbor provisions, then the taxpayer must provide the auditor with proof that the safe harbor applies to the transaction(s).

The burden of proof is on the taxpayer and not the auditor to support any safe harbor claim. Auditors should not prepare workpapers to support any safe harbor claim made by the taxpayer, especially a claim that the transaction(s) is at arm's length since proving that can be very complex under rules set by the IRC.

Nevertheless, the taxpayer must provide some proof that a safe harbor provision applies to the transactions. If the taxpayer will not supply any documentation, then the safe harbor claim should be disallowed.

Below is a list of items that the auditor could request, depending on the facts and circumstances. If there are dozens of transactions, then the auditor should test check the items.

- All written agreements setting up the questionable transaction(s) or tax plan. (For example: stock purchase agreements, credit agreements, licensing agreements, etc.)
- All written agreements evidencing any intercompany loans and payments.
- Any other documents (i.e., books and records, wire transfers, transaction slips, bank statements, journal entries, etc.) tracing the exchange of funds.
- Board of Directors meeting minutes, consents of the board of directors, and resolutions approving the arrangement in question.
- Accounting firm proposal, if any, explaining the arrangement to reduce/shelter taxes. (The accounting firm's pitch for the created tax plan).
- Any tax department interoffice recommendations or correspondence regarding the approval or ideas for the tax plan at issue.
- Any documentation evidencing the transfer of assets and cash to set up the arrangement (i.e., transfer of intellectual property to an 80/20 company, loans, etc.)
- A detailed balance sheet matching up expenses with income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Exhibits should be created documenting the auditor's findings. See IAC § 100.2430(c) for more information.

d) Economic Substance Doctrine

Although the economic substance doctrine is a provision of federal statute, auditors can utilize the guidelines it provides in making determinations of whether to allow certain modifications. We would apply the economic substance doctrine only for purposes of determining whether the taxpayer can meet one of the safe harbors that apply, only when tax avoidance is not one of the primary purposes of the transaction. The lack of economic substance is an indicator that a transaction was tax-motivated and thereby not allowable under statute. The most likely application of the doctrine will relate to taxpayers involved in transactions with 80/20 companies.

Section 1409(a) of the Health Care and Education Reconciliation Act of 2010 (the "2010 Act") codified a conjunctive economic substance test in new IRC § 7701(o). The new statute defines the economic substance doctrine as the common law doctrine under which certain tax benefits are not allowable if the transaction does not have economic substance or lacks a business purpose.

The statute states that "[i]n the case of any transaction to which the economic substance doctrine is relevant, such transaction shall be treated as having economic substance only if—

(A) the transaction changes in a meaningful way (apart from Federal income tax effects) the taxpayer's economic position, and

(B) the taxpayer has a substantial purpose (apart from Federal income tax effects) for entering into such transaction."

As a result, enactment of IRC § 7701(o) resolved the longstanding conflict among various circuit courts of appeal regarding how the doctrine should be applied by codifying a two-part conjunctive test.

(1) Analyzing a Transaction

The following facts and circumstances tend to show that application of the economic substance doctrine may be appropriate. Auditors need to utilize these guidelines to evaluate transactions in which taxpayers claim safe harbor to make the proper determination as to whether the transactions are valid for income tax reporting.

- Transaction is promoted/developed/administered by tax department or outside advisors
- Transaction is highly structured

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Transaction includes unnecessary steps
- Transaction is not at arm's length with unrelated third parties
- Transaction creates no meaningful economic change on a present value basis (pre-tax)
- Taxpayer's potential for gain or loss is artificially limited
- Transaction accelerates a loss or duplicates a deduction
- Transaction generates a deduction that is not matched by an equivalent economic loss or expense (including artificial creation or increase in basis of an asset)
- Taxpayer holds offsetting positions that largely reduce or eliminate the economic risk of the transaction
- Transaction involves a tax-indifferent counterparty that recognizes substantial income
- Transaction results in separation of income recognition from a related deduction either between different taxpayers or between the same taxpayer in different tax years
- Transaction has no credible business purpose apart from tax benefits
- Transaction has no meaningful potential for profit apart from tax benefits
- Transaction has no significant risk of loss
- Tax benefit is artificially generated by the transaction
- Transaction is pre-packaged
- Transaction is outside the taxpayer's ordinary business operations.

The converse of the aforementioned circumstances tends to show that the application of the economic substance doctrine may not be appropriate. Also consider that transactions that generate targeted tax incentives, in form and substance, and are consistent with Congressional intent in providing the incentives, would not have the doctrine applied.

In addition, it is likely not appropriate to raise the economic substance doctrine if the transaction being considered is related to the following circumstances.

- The choice between capitalizing a business enterprise with debt or equity
- A U.S. person's choice between utilizing a foreign corporation or a domestic corporation to make a foreign investment
- The choice to enter into a transaction or series of transactions that constitute a corporate organization or reorganization under subchapter C
- The choice to utilize a related-party entity in a transaction provided that the arm's length standard of IRC § 482 and other applicable concepts are satisfied.

(2) Development of Case

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If after applying the guidance set forth above the auditor believes a transaction does not present characteristics of being eligible for safe harbor, the following series of inquiries should be evaluated before making adjustments to the applicable modifications.

- Is the transaction a statutory or regulatory election?
- Is the transaction subject to and in compliance with a detailed statutory or regulatory scheme?
- Does precedent exist (judicial or administrative) that either rejects the application of the economic substance doctrine to the type of transaction or a substantially similar transaction or upholds the transaction and makes no reference to the doctrine when considering the transaction?
- Does the transaction involve tax credits (e.g., low income housing credit, alternative energy credits) that are designed by Congress to encourage certain transactions that would not be undertaken but for the credits?
- Does recharacterizing a transaction (e.g., recharacterizing debt as equity, recharacterizing someone as an agent of another, recharacterizing a partnership interest as another kind of interest, or recharacterizing a collection of financial products as another kind of interest) more appropriately address the noncompliance that is being examined?

If the answer to any of the above is affirmative, the economic substance doctrine would not apply and adjustments should be made using other justification or disregarded altogether.

Examples are provided in the Exhibits section of this chapter.

K. Captive Real Estate Investment Trust (REIT)

(IITA § 203(b)(2)(E-15))

Public Act 95-0233, as amended by Public Act 95-707, created an addition modification for corporations effective for taxable years beginning after December 31, 2008, relating to a captive real estate investment trust (REIT). The definition of a REIT is found in IITA § 1501(a)(1.5). Since most REITs are calendar year filers, the effective date for most will be the calendar year 2009 IL-1120.

Under IITA § 1501(a)(1.5)(C), apply the constructive ownership rules in IRC § 318(a) as modified by IRC § 856(d)(5), for the more than 50% test. Note that under IITA § 1501(a)(1.5)(B) there are several exceptions to these provisions relating to captive REIT that are exempt under IRC § 501, foreign REITs and an “Australian property” REIT. See IITA § 1501(a)(1.5) for more information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The captive REIT addition modification is only for corporations (because REITS are taxed as corporations) and is reported in Step 2 of the business Schedule M. The purpose of the addition modification is to close a tax loophole where the captive REIT, which is a member of the unitary group, pays a dividend to a corporation, usually a REIT holding company that is not a member of the unitary group either because it meets the 80/20 test, or prior to December 31, 2017, because the REIT and the holding company apportion their income under different subsections of IITA § 304. When the REIT pays a dividend, it claims a federal dividends-paid deduction on Form 1120-REIT. This reduces federal taxable income reported by the REIT on its IL-1120 or the unitary group's Schedule UB. IITA § 203(e)(2)(D) defines REIT taxable income as "real estate investment trusts taxable income" which is line 22 of Form 1120-REIT (line reference based on 2012 federal form). The corresponding dividend income received by the REIT holding company is received outside the unitary group. However, there is nothing in the addition modification to suggest that it only applies if entities are excluded from the UBG. The new addition modification reverses the federal dividends-paid deduction in the computation of Illinois base income.

Example PER US 1120s

Description	2009 Domestic Parent	REIT Chicago	REIT Holding Co Bahamas	2009 Total for All Companies
Dividend Income	700,000	0	29,676,000	30,376,000
Interest Income	168,000,000	31,000,000	1,000	199,001,000
Other Income	105,000,000	0	0	105,000,000
Total Income	273,700,000	31,000,000	29,677,000	334,377,000
Salaries & Wages	51,500,000	12,000	4,500	51,516,500
Rent Expense	400,000	12,000	24,000	436,000
Interest Expense	70,000,000			70,000,000
Other Deductions	156,000,000	1,300,000		157,300,000
Total Expenses	277,900,000	1,324,000	28,500	279,252,500
Federal Taxable Income	-4,200,000	29,676,000	29,648,500	55,124,500
Federal Dividend Deduction	0	-29,676,000	0	-29,676,000
Federal Line 30	-4,200,000	0	29,648,500	25,448,500

Per IL-1120	IL-1120 2009 Domestic Parent	IL-1120 REIT Chicago	IL-1120 Unitary Group FTI	REIT Holding Co Bahamas
Federal Taxable Income	-4,200,000	0	-4,200,000	29,647,500
				Excluded Under 80/20

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The above example shows how the loophole works. In this case the parent is the UB filer that has two subsidiaries – REIT Chicago and REIT Holding Co. Bahamas (REIT Bahamas). REIT Chicago has offices and employees in Chicago and REIT Bahamas is a holding company that has no employees, but is listed on the consolidated federal return because it is incorporated in Delaware. The taxpayer is a three-factor company; so the 80/20 test is based on property and payroll. The taxpayer contracts with a third party in the Bahamas to operate its Bahamas subsidiary and claims that all property and payroll is in the Bahamas.

REITs cannot be included in a federal consolidated group. However, this arrangement has no federal income tax effect, because IRC § 857(c) provides that no dividends-received deduction is allowed to corporations for REIT dividends, and IRC Section 861 provides that dividends from US corporations are US-sourced, making them taxable even to non-US taxpayers. Accordingly, REIT Holding Co. Bahamas is fully taxable on the dividends that REIT Chicago pays to it.

However, for Illinois income tax purposes, on the IL-1120 Schedule UB, REIT Chicago still gets the federal dividends-paid deduction, but the corresponding dividend income received by REIT Holding Co. Bahamas is excluded from the group's base income and the dividend income is not sourced to Illinois. As a result, federal taxable income for all of the parties is 25,448,500, but the Illinois unitary business group shows a federal loss of -4,200,000.

The addition modification reverses the federal dividend subtraction of $29,676,000 and gives REIT-Bahamas a subtraction modification of $29,676,000 (if it were an Illinois filer) as follows:

Per IL-1120	2009 Domestic Parent	REIT Chicago	Unitary Group FTI	REIT Holding Co Bahamas
Federal Taxable Income	-4,200,000	0	-4,200,000	29,648,500
REIT Addition Mod.		29,676,000	29,676,000	
REIT Subtraction Mod.				-29,676,000
Base Income after PA 95-0233	-4,200,000	29,676,000	25,476,000	-27,500
				Excluded Under 80/20

Under the addition and subtraction modifications REIT Bahamas is still an 80/20 company; however, the income and expenses have now been properly matched to each company. Assuming there are no other addition or subtraction modifications, base income on the Schedule UB will be $25,476,000 thereby eliminating the tax loophole.

The same facts above except that REIT Bahamas is included in the unitary group. In that case there is no tax loophole since the federal taxable income of all of the members is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

included in the group's base income. The addition and subtraction modifications still apply, but they result in zero tax effect as follows:

2009 Per IL-1120	2009 Domestic Parent	REIT Chicago	REIT Holding Co Bahamas	Unitary Group FTI
Federal Taxable Income	-4,200,000	0	29,648,500	25,448,500
New REIT Addition Mod.		29,676,000		29,676,000
New REIT Subtraction Mod.			-29,676,000	-29,676,000
Base Income	-4,200,000	29,676,000	-27,500	25,448,500

L. IITA § 218 College Prepaid Tuition Credit Addition
(IITA § 203(b)(2)(E-16))

This modification applies to taxpayers who, for tax years ending on or after December 31, 2009 and on or before December 30, 2020 claim a credit for making a matching contribution to a specified college savings plan.

The credit is calculated on Schedule 1299-D and reported in Step 7 on the Form IL-1120. The addition modification is reported on Schedule M and included in Step 2 on the Other Additions line on the Form IL-1120. IAC § 100.2193(f) instructs the taxpayer to keep sufficient documentation regarding the contribution. Auditors should refer to this documentation to verify the modification.

For more information on Income Tax credits, refer to Chapter 36 of the Audit Manual.

M. Domestic Production Activities Deduction
(IITA § 203(b)(2)(E-17))

This modification applies to taxpayers who, for tax years ending on or after December 31, 2017, claim the deduction allowed under IRC § 199 for businesses that perform domestic manufacturing and certain other production activities. This addition is required for corporations, partnerships, individuals, trusts, and estates. The domestic production activities deduction is reported on federal Form 1120, Line 25 (2016 form). Taxpayers are required to calculate the deduction on federal Form 8903. For Illinois, the modification is reported on Schedule M – Other Additions and Subtractions, Line 9 (2017 form). Auditors should review the applicable forms to ensure the correct amount is added back on the Illinois return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

N. Business Expense Recapture

(IITA § 203(e)(3))

For tax years ending on or after July 30, 2004, if the taxpayer claims any item of income (If a corporate return, lines 1 through 10 of page 1 of the US 1120) as nonbusiness income, and if in earlier years the taxpayer reported the same item as business income, then all related business expenses, without limitation, for the current year and the two preceding taxable years must be recaptured in the current year. Schedule NB was revised in 2004 to calculate this recapture. The recapture is explained in IAC § 100.2405(d).

Business expenses that are recaptured must relate to the item of nonbusiness income and must have been expenses deducted from federal taxable income that flowed through to the Illinois return. It does not matter if the business expenses are not in Illinois. If the recapture relates to the gain or loss on the sale of the stock of a unitary subsidiary, then the business expenses will be all of the expenses of that subsidiary that are listed on the Schedule UB. These expenses can include:

- Salaries and wages
- Employee benefits
- Repairs & maintenance
- Bad debts
- Rent expense
- Interest expense
- Depreciation & depletion expenses
- Advertising
- Other deductions not included in cost of goods sold*

*Note: Cost of goods sold, including purchases of inventory, is not an expense and so is not subject to recapture under IITA § 203(e)(3).

If the nonbusiness income relates to a sale of stock in a company that is not unitary, or if the nonbusiness income relates to interest, dividends or royalties, then it will be challenging for the auditor to determine what business expenses relate to the holding of that asset. Business expenses on those items may include:

- Salaries and benefits of company employees who monitor the asset
- Outside attorney, brokerage fees, and bank fees
- Interest expenses, if any, in the holding of investments
- Research and development costs in the case of royalty income

The recaptured expenses are reported as an addition modification to the current year's return along with a corresponding increase to nonbusiness income reported on the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Schedule NB. The recaptured expenses are then reported as an adjustment to Illinois nonbusiness income based on the total recaptured expenses times the Illinois apportionment factor that is either three-year average factor or the current year's apportionment factor, whichever is greater. The modification is calculated on IL Schedule NB, Line 11 and reported on IL Schedule M, Line 4. Refer to Chapter 26 for discussion on nonbusiness income and related expenses.

Example:

The audit period covers calendar years 2013 and 2014. ABC and XYZ have been filing unitary since at least 2002. XYZ is located in California and never had nexus in Illinois. In December of 2014 ABC sells XYZ and recognizes a gain of $2 million that is reported on ABC's 2014 IL-1120 as nonbusiness income allocable to the State of California. The auditor determines that the gain is nonbusiness income and that there is $200,000 in nonbusiness expenses for attorney and accounting fees incurred by ABC in its sale of XYZ.

Note: If this scenario was real, we would probably treat the gain as business income, and the recapture of business expenses would be mentioned in the auditor's comments as an alternative tax computation that must be made if it is determined that the gain is nonbusiness. It is shown here as nonbusiness income only for illustrative purposes.

The US 1120 and IL-1120s show the following amounts for 2012, 2013 and 2014:

	2012	**2012**	**2012**
	PER US 1120 RETURN		
	ABC	XYZ	Total
Gross income	1,000,000	400,000	1,400,000
Interest Income	100,000		100,000
Total Income	1,100,000	400,000	1,500,000
EXPENSES			
Wages	500,000	85,000	585,000
Interest Expense	100,000	100,000	200,000

Deduct out nonbusiness expenses incurred by ABC	**-200,000**	**-200,000**
Total nonbusiness income everywhere per audit	1,800,000	3,235,000
Base income subject to apportionment	1,300,000	1,300,000
Illinois apportionment factor	58.00%	58.00%
Illinois net income	754,000	754,000
Nonbusiness income allocable to Illinois		
Recapture of $1,435,000 x 58% factor		
(Show as nonbusiness income allocable to ILL)		**832,300**
Total Illinois income	754,000	1,586,300
Total Income tax due at 7.3%	$55,052	$157,999

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note 1	
Apportionment factor for 2012	42%
Apportionment factor for 2013	50%
Apportionment factor for 2014	58%
Sub Total	150%
Average factor, divide by 3	50%

The factor used is the greater of the current year's factor, or the three-year average. The current year's factor of 58% is used since it is greater than the three-year average.

Note that Illinois business income is the same with or without the recapture.
Also, the Illinois net operating loss in one of the years has no effect on the recapture computation.

There are three audit adjustments for 2014:

1. Increase other addition modifications by $1,435,000.

IITA § 203(e)(3) requires recapture of **all** of the business expenses incurred by XYZ over the current year and two most recent prior years. A short-period return counts as one year. Therefore on the EDA-25 the auditor adds back, as an addition modification, all of XYZ's business expenses for 2012, 2013 and 2014, which are $435,000, $600,000, and $400,000 respectively.

The EDA-27 will state the following adjustment: "We recaptured business expenses related to your nonbusiness income. Ref: IITA § 203(e)(3)".

2. Increase nonbusiness income everywhere for $1,435,000.

The same $1,435,000 in business expenses above is then shown as an increase to nonbusiness income everywhere per audit. This is the way it is shown on the Schedule NB. The adjustment is necessary so that the Illinois portion of these business expenses can be allocated to Illinois in the adjustment below.

The EDA-27 will state the following adjustment: "We adjusted your nonbusiness income by the amount of recaptured business expenses. Ref: IITA § 203(e)(3)".

3. Increase nonbusiness income allocable to Illinois for $832,300.

The auditor has to calculate the Illinois portion of the recaptured business expenses based on the Illinois apportionment factor for the entire unitary group. Under IITA § 203(e)(3) the Illinois factor is the greater of the three-year average factor or the current year's apportionment factor. In the example above the current Illinois factor of 58% is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

greater than the three-year average of 50%. Therefore the portion of business expenses allocable to Illinois is $832,300 ($1,435,000 x 58%).

The EDA-27 will state the following adjustment: "We recaptured Illinois business expenses related to your nonbusiness income. Ref: IITA § 203(e)(3)."

Summary:

In the above example since XYZ is included in the unitary group, all of its expenses are subject to recapture since they are federal business expenses on the Illinois Schedule UB.

If the auditor concludes that XYZ should not have been included in the unitary group and makes an audit adjustment to exclude the company from the group for all years within statute, then the audit report will reflect only the first adjustment above for the $200,000 in nonbusiness expenses. There would be no recapture of XYZ's business expenses since they were not used to reduce federal taxable income reported on the IL-1120, Schedule UB. The recapture provision is only for business expenses that were used to reduce federal taxable income.

If the auditor concludes that the gain is business income, then there will be no recapture of business expenses. However, if the taxpayer disagrees with Audit's determination that the gain is business income, then the auditor's workpapers detailing the recapture must be attached to the auditor's letter of comments for future reference.

Step 2: Figure your income or loss

1	Federal taxable income from U.S. Form 1120, Line 30. **Attach** a copy of your federal return.	1	203(e)(1) .00
2	Net operating loss deduction from U.S. Form 1120, Line 29a. This amount cannot be negative.	2	203(b)(2)(D) .00
3	State, municipal, and other interest income excluded from Line 1.	3	203(b)(2)(A) .00
4	Illinois income and replacement tax deducted in arriving at Line 1.	4	203(b)(2)(B) .00
5	Illinois Special Depreciation addition. **Attach** Form IL-4562.	5	203(b)(2)(E-10) & (E-11)
6	Related-party expenses additions. **Attach** Schedule 80/20.	6	203(b)(2)(E-12)(E-13) & (E-14)
7	Distributive share of additions. **Attach** Schedule(s) K-1-P or K-1-T.	7	.00
8	Other additions. **Attach** Schedule M (for businesses).	8	See Schedule M .00
9	Add Lines 1 through 8. This amount is your income or loss.	9	.00

Step 3: Figure your base income or loss

10	Interest income from U.S. Treasury and other exempt federal obligations.	10	.00		
11	Enterprise Zone or River Edge Redevelopment Zone Dividend subtraction. **Attach** Schedule 1299-B.	11	.00		
12	Enterprise Zone or River Edge Redevelopment Zone Interest subtraction. **Attach** Schedule 1299-B.	12	.00		
13	High Impact Business Dividend subtraction. **Attach** Schedule 1299-B.	13	.00		
14	High Impact Business Interest subtraction. **Attach** Schedule 1299-B.	14	.00		
15	Contribution subtraction. **Attach** Schedule 1299-B.	15	.00		
16	Contributions to certain job training projects. See instructions.	16	.00		
17	Foreign Dividend subtraction. **Attach** Schedule J. See instructions.	17	.00		
18	Illinois Special Depreciation subtraction. **Attach** Form IL-4562.	18	.00		
19	Related-party expenses subtraction. **Attach** Schedule 80/20.	19	.00		
20	Distributive share of subtractions. **Attach** Schedule(s) K-1-P or K-1-T.	20	.00		
21	Other subtractions. **Attach** Schedule M (for businesses).	21	.00		
22	Total subtractions. Add Lines 10 through 21.			22	.00
23	**Base income or loss.** Subtract Line 22 from Line 9.			23	.00

STOP

A If the amount on Line 23 is derived inside Illinois only, check this box and write the amount from Step 3, Line 23 on Step 5, Line 35. You may not complete Step 4. (You must leave Step 4, Lines 24 through 34 blank.) ☐

B If any portion of the amount on Line 23 is derived outside Illinois, check this box and complete all lines of Step 4. See instructions. ☐

Step 4: Figure your income allocable to Illinois (Complete only if you checked the box on Line B, above.)

24	Nonbusiness income or loss. **Attach** Schedule NB.	24	.00		
25	Trust, estate, and non-unitary partnership business income or loss included in Line 23.	25	.00		
26	Add Lines 24 and 25.			26	.00
27	Business income or loss. Subtract Line 26 from Line 23.			27	.00
28	Total sales everywhere. This amount cannot be negative.	28			
29	Total sales inside Illinois. This amount cannot be negative.	29			
30	Apportionment Factor. Divide Line 29 by Line 28 (carry to six decimal places).	30	.		
31	Business income or loss apportionable to Illinois. Multiply Line 27 by Line 30.			31	.00
32	Nonbusiness income or loss allocable to Illinois. **Attach** Schedule NB.			32	.00
33	Trust, estate, and non-unitary partnership business income or loss apportionable to Illinois.			33	.00
34	**Base income or loss allocable to Illinois.** Add Lines 31 through 33.			34	.00

Step 1: Provide the following information

Write your name as shown on your tax return. ______________________
Write your Federal Employer Identification no. (FEIN) ___ ___ – ___ ___ ___ ___ ___ ___ ___

Step 2: Figure your additions

Write the amount of

1	Capital gain taxed under IRC Section 852(b)(3).	1	203(b)(2)(C) .00
2	Notes, bonds, debentures, or obligations issued by the Governments of American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands.	2	203(b)(2)(A) .00
3	Lloyd's plan of operation loss if reported on your behalf on Form IL-1023-C and included in your federal taxable income.	3	.00
4	Business expense recapture.	4	203(e)(3) .00
5	Any other state's income tax deducted from federal taxable income **(Form IL-1041 filers only)**.	5	.00
6	Capital loss to be carried forward **(Form IL-1041 filers only)**.	6	.00
7	Credit taken on Schedule 1299-A or 1299-D for college savings plan contributions you made as an employer.	7	203(b)(2)(E-16) .00
8	Dividends paid by a captive REIT.	8	203(b)(2)(E-15) .00
9	Other additions - Identify each item. ______________	9	203(b)(2)(A)(E)(E-5)
10	**Total additions.** Add Lines 1 through 9. Write the amount here and on your Form IL-1120, Line 8, Form IL-1120-ST, Line 21, Form IL-1065, Line 22 or Form IL-1041, Line 10. →	10	.00

Step 3: Figure your subtractions

Write the amount of

11	Exempt interest dividends paid by regulated investment companies (IRC § 852(b)(5)).	11	.00
12	Notes, bonds, debentures, or obligations issued by the Governments of American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands to the extent the amounts were required to be added back on Line 2.	12	.00
13	Lloyd's plan of operation income if reported on your behalf on Form IL-1023-C.	13	.00
14	Income for which you claimed a credit under IRC § 1341.	14	.00
15	Expense deductions disallowed federally under IRC §§ 171(a)(2), 265, 280C, 291(a)(3), or 832(b)(5)(B)(i). Specify any amount relating to the following:		
a	Interest expenses relating to municipal income (IRC § 291)	a	.00
b	Interest and other expenses related to federally tax-exempt interest (IRC § 265)	b	.00
c	Bond premium amortization on federally tax-exempt bonds (IRC § 171)	c	.00
d	Expenses related to certain federal credits (IRC §280C)	d	.00
e	Reduction in insurance company reserves (IRC §832)	e	.00
f	Reduction in depreciation related to railroad maintenance credits (IRC § 45G)	f	.00
g	Gross income resulting from alternative energy credits (IRC § 87)	g	.00
16	Add Lines 15a through 15g.	16	.00
17	Add Lines 11 through 14 and Line 16. Write the amount here and on Line 18.	17	.00

Schedule M (R-12/12) Page 1 of 4

B. Economic Substance Doctrine Examples

The following examples, although occurring prior to the codification of the economic substance doctrine, outline instances where the doctrine would likely apply in regard to denying safe harbor and making adjustments to certain modifications.

1. Royalty Expense

- No. 4762 (Ore. T.C. July 1, 2008)

PACIFICARE HEALTH SYSTEMS Inc. (PCHS) is the parent of an affiliated group of health maintenance organizations. PCHS filed a consolidated federal return. For Oregon tax purposes, PCHS and its non-insurance subsidiaries filed a combined return, while the insurance subsidiary filed a separate return.

PCHS contributed the trademarks and other intellectual property used by the affiliated group to the insurance subsidiary on Oct. 1, 1998, and the insurance subsidiary began collecting royalties.

The Oregon Department of Revenue (Department) disallowed the royalty expense deductions claimed by the PCHS group in 1999 and 2000. The Department did not dispute the arm's-length nature of the royalty payments. Instead, the Department argued that the initial transfer of intellectual property should be disregarded for tax purposes. In other words, PCHS remained the owner of the intellectual property for tax purposes.

The Oregon Tax Court concluded that "the proper analysis is to consider which corporation was, for tax purposes, the owner of the Intellectual Properties." On that question, federal tax law governs.

- The first step is to address "whether in substance, as well as form, there had in fact been a transfer of the intellectual property." *Eli Lilly & Co. v. Comm'r*, 856 F.2d 855, 860 (7th Cir. 1988); *GD Searle & Co. v. Comm'r*, 88 T.C. 252, 341 (1987).
- The leading case on when ownership changes for tax purposes is *Comm'r v. Sunnen*, 333 U.S. 591 (1948).
- Control of assets is a primary determinant of tax ownership, according to *National Lead Co. v. Comm'r*, 336 F.2d 134 (2d Cir. 1964).

The tax court reasoned their decision as follows:

> A careful review of the legal and practical relationships among the members of taxpayer's corporate family leads the court to the conclusion that the purported transfer of the Intellectual Properties to the Insurance Subsidiary should not be respected for income tax purposes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

> First, and most important, if not decisive, the purported transfer was one that could be rescinded at any time at the option of taxpayer. Notably, the Insurance Subsidiary bound itself, in the license agreements, to make no assignment of the license agreements other than to a commonly controlled or controlling entity without the consent of the licensee corporation.

The license agreements also provided PCHS with the right to demand re-conveyance. The tax court continued:

> Under the governing case law, courts have found no tax transfer to have occurred where either control of property or the economic benefits of the property have been retained. The question is whether the purported transfer results in any substantial change in the economic position of the purported transferor.

Various credit arrangements resulted in a circular flow of cash, which evidenced a lack of change in PCHS's economic position.

2. <u>Both Interest And Royalty Expenses</u>

- Nos. C282754, C295077, C299008 (Mass. App. Tax Bd. Jan. 31, 2011), affirmed, No. 2011-P-0632 (Mass. App. Ct.)

Kimberly-Clark Corp. (K-C) had a centralized cash management system. All affiliate cash receipts were deposited into a lockbox on a daily basis and swept up to K-C. Various subsidiary expenses were paid out of the common pool, and the excess cash net of expenses was recorded as a payable on the general ledger. Interest was calculated on the last day of each month. None of the cash was ever returned to the subsidiaries.

In its audit of tax years 2001-2003, the Massachusetts Commissioner of Revenue denied a deduction for interest expense associated with the cash management system. For a transaction to give rise to a valid interest deduction, it must constitute true indebtedness. Based on the fact that the advances remained with K-C indefinitely, coupled with the failure of the affiliates to request repayment, the Board concluded that the parties never intended to repay the cash advances.

K-C also transferred its patents to Kimberly-Clark Worldwide Inc. (K-C W Inc.) and appointed K-C W Inc. as the exclusive agent with respect to its trademarks. K-C paid K-C W Inc. a royalty for the patent license and trademark sublicense. Employees involved in manufacturing, R&D and patent protection were also transferred to K-C W Inc. The only personnel with significant involvement in the reorganization were those responsible for tax matters.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The record did not indicate that any licensing agreements were entered into with third parties. Royalty payments were returned to K-C by virtue of its cash management system. The Commissioner disallowed the deduction for royalties paid to K-C W Inc.

- The sham transaction doctrine "gives the commissioner the authority 'to disregard, for taxing purposes, transactions that have no economic substance or business purpose other than tax avoidance.'" (quoting *The Sherwin-Williams Co. v. Comm'r of Revenue*, 438 Mass. 71, 79 (2002)) This doctrine "prevents taxpayers from claiming the tax benefits of transactions that, although within the language of the tax code, are not the type of transaction the law intended to favor with the benefit." (quoting *Syms Corp. v. Comm'r of Revenue*, 436 Mass. 505, 510 (2002))

- Massachusetts had adopted an add-back statute with an exception for transactions that have a valid business purpose and economic substance.

Noting that the royalties were immediately returned to K-C, the Massachusetts Appellate Tax Board concluded that "[s]uch a circular flow of funds among related entities does not indicate a substantive economic transaction for tax purposes." The Board distinguished *Sherwin-Williams*, where the court emphasized the absence of a circular flow of funds and the subsidiaries' ability to invest the royalties. Also, the subsidiaries in *Sherwin-Williams* entered into licensing contracts with third parties.

- "[A] transfer and license-back transaction between a parent and its wholly-owned subsidiary which results in a *de facto* exclusive license arrangement is not an arm's-length transaction." (quoting *The TJX Cos. Inc. v. Comm'r*, Mass. ATB Findings of Fact and Reports 2007-790, 854)

3. <u>Tax Avoidance Restructuring</u>

- No. 07-I-17, Wis. Tax Appeals Comm'n (March 29, 2010), appeal dismissed, No. 2010CV002271 (Dane County Cir. Ct.)

In 1998, the treasurer of Hormel Foods Corp. made a presentation to the board of directors recommending a restructuring. Intellectual property (IP) would be transferred to a subsidiary and licensed back. State tax savings were estimated at $1.6 million annually. The treasurer did not discuss business savings or increased profits resulting from the restructuring.

On July 27, 1998, the board of directors approved the transfer of Hormel Foods patents, trademarks and copyrights to Foods LLC; the transfer of the equipment and personnel involved in R&D to Foods LLC; and the license of the intellectual property (IP) to Hormel Foods. The board of directors identified 6 objectives related to better management of the IP.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Ernst & Young performed a study to determine arm's-length rates for royalties. Under an administrative services agreement, Hormel Foods continued to provide all accounting, payroll, data administration, risk management, legal and financial reporting and other services.

The Wisconsin DOR audited Hormel Foods for tax years 1996 through 1999. The Department made adjustments for the royalties paid by Hormel Foods to Foods LLC and intercompany interest expense. The Wisconsin Tax Appeals Commission analyzed the transactions for economic substance, business purpose, and a showing that the transaction was not shaped solely for tax avoidance. Hormel Foods argued that the business purpose for forming Foods LLC was to protect and promote the IP.

The Commission concluded that the primary purpose for creating Foods LLC was tax avoidance. The idea to restructure originated with Ernst & Young and Hormel Foods's tax director as a plan to reduce state income taxes. The new structure created a circular flow of funds. Hormel Foods's other alleged purposes were a mere fig leaf covering the real purpose. Hormel Foods's licenses were exclusive, and no IP was licensed to third parties.

Hormel Foods failed to prove the royalty deductions were ordinary and necessary expenses.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IX. HISTORICAL EXTRACTS

A. Line 1 Less Than Zero

For many years, the Department had taken the position that Line 1 of the Illinois return could not be less than zero even if the federal return showed a NOL. As a result of Public Act 83-951 and the Illinois court decision in the case of Chicago Title the Department has changed that position. Refer to Chapter 49 for a synopsis of this case and the complete case citation.

For tax years ending on or before November 30, 1983, the Chicago Title court decision governs. That case overruled the Department's interpretation that federal taxable income entered on Line 1 of the Illinois return could not be less than zero. The decision was not limited to loss years; however, it did state that the loss could not be used twice.

For tax years ending on or after December 1, 1983 (the effective date of Public Act 83-951) and ending prior to December 31, 1986, the amount of taxable income to be entered on Line 1 for Illinois purposes could be an amount less than zero in a loss year only.

B. Bonus Depreciation

Taxpayers have claimed that they received no tax benefit from the federal bonus depreciation in the current period and therefore should not be required to add-back the bonus depreciation.

The fact that they would have had the same taxable income had they elected not to take bonus depreciation does not mean they did not actually take the deduction, nor does it mean they derived no benefit from it. The bonus depreciation helped offset current gross income and helped produce a loss that can be taken in future years. In any event, the IITA contains no exception for cases when taxpayers do not derive any benefit from taking bonus depreciation.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. PURPOSE

To assist auditors in determining Illinois taxable income or base income; Illinois base income is defined in IITA § 203 as equal to the taxpayer's adjusted gross income (taxable income for corporations) modified by those amounts specified within the Act. For corporations the numerous subtraction modifications begin at IITA § 203(b)(2)(F). These modifications are elaborated upon within this chapter of the Income Tax Audit Manual.

This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

III. GENERAL INFORMATION

A. PARTNERSHIPS, S-CORPS, TRUSTS AND ESTATES

Chapter 28 of the Audit Manual covers partnerships, Subchapter S corporations, trusts & estates. Refer to that Chapter regarding the rules for determining income for IL-1065 (Partnership), IL-1120-ST (S-Corp) or IL-1041 (Trusts and Estates) filers.

B. SUBTRACTION MODIFICATIONS

If the taxpayer does not claim a subtraction modification, auditors should not search for amounts the taxpayer may have omitted. If the taxpayer provides additional information to substantiate a subtraction modification that was not claimed or it is discovered that the taxpayer has not claimed a subtraction modification but was entitled to claim one, an amended return should be filed by the taxpayer to correct the error. Additional subtraction modifications can be allowed without an amended return being filed, but filing an amended return claiming the subtractions and requesting a refund may be necessary to preserve the taxpayer's right to the refund.

When dealing with a unitary group of companies it is important to remember that the modifications apply to all members of the unitary group, as determined in Chapter 22, not just the Illinois filers. Due to the nature of some of the modifications, an Illinois filer may be the only one affected by a specific modification (such as the Illinois Income Tax refund subtraction) however, in general, all unitary group members should be examined to determine if any of the Illinois modifications exist.

Subtraction modifications for items of income allowed by IITA § 203(b)(2) may be claimed on the Illinois return only to the extent of the amounts otherwise included in base income. It is important that auditors confirm the item has been included in base income, and not subtracted under some other provision before a taxpayer has subtracted an item of exempt income. IITA § 203(g) explicitly prohibits items of income to be deducted more than once.

Public Act 88-660, effective September 16, 1994, created IITA § 250. This section provides that all exemptions, credits and deductions enacted after September 16, 1994, shall be limited by a reasonable and appropriate sunset date. If a sunset date is not specified in the Public Act which creates the exemption, credit or deduction, the exemption, credit or deduction will automatically expire for tax years beginning on or after five years after the effective date of the Public Act creating the exemption, credit or deduction unless exempt from IITA § 250 or extended by other applicable law. For example, Public Act 97-0636 added subsection (b) to IITA § 250 to provide that any exemption, credit, or deduction scheduled to sunset in years 2011, 2012, or 2013 are extended an additional five years.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

These would be extended to then expire in 2016, 2017, or 2018. Several subtraction modifications within IITA § 203(b)(2) are explicitly exempt from the provision of IITA § 250 as noted within this chapter.

IV. APE SPECIFIC LAW APPLICATIONS

A. ILLINOIS INCOME TAX REFUNDS

(IITA § 203(b)(2)(F))

This modification is for the amount of any refund of tax imposed by the IITA that is included in federal taxable income. It does not include sales taxes, use taxes, federal or state excise taxes, or taxes from other states. This subtraction also applies in situations where an accrual-basis taxpayer reports a negative Illinois income tax expense because the accrued liability at the beginning of the tax year is greater than the sum of the year-end accrual plus payments. In this case, the taxpayer has accrued a refund into income, even if no refund has been paid, and is entitled to the subtraction.

It is important to verify the subtraction modification is:

- The amount of the refund that is actually included in federal taxable income for the taxable year
- Limited to Illinois income and replacement tax

The Illinois modification is reported on Schedule M Line 23 (on the 2011 and subsequent forms). See 86 IAC § 100.2450 for more information.

B. FOREIGN DIVIDEND GROSS-UP

(IITA § 203(b)(2)(G))

This modification is for any amount calculated under IRC § 78 and included in federal taxable income. Federally, a corporation has the option to deduct its shareholder's percentage of the foreign taxes paid by a foreign subsidiary from its computation of federal taxable income or to claim a foreign tax credit for those taxes. If a credit is chosen, the company must "gross-up" the related foreign dividends or Subpart F income to include the amount of the credit in taxable income.

- For tax years ending on or after January 1, 1975, the corporation has been allowed a subtraction modification for foreign dividend gross-up.
- For tax years ending prior to January 1, 1975, if a corporation elected to claim a Foreign Tax Credit for federal purposes and included a "gross-up" of the foreign

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

dividends in federal taxable income, no deduction of this "gross-up" was allowed for Illinois purposes.

There is not and never has been an Illinois subtraction modification for the actual amount of foreign taxes paid or deemed paid.

Foreign dividend gross-up is reported on the federal Form 1120, Schedule C, Line 15. This amount should appear on the appropriate subtraction modification line of the IL-1120 or, for tax years ending on or after December 31, 1982, it is included on the IL-1120, Schedule J, (Line 14 on the 2006 and subsequent forms) which is used to compute the foreign dividends subtraction modification. Taxpayers are never allowed to claim a subtraction amount for the foreign dividend gross-up reported on the federal Form 1120, Schedule M-1. The Schedule M-1 is a reconciliation of book and tax income, not a computation of taxable income. The amount actually included in taxable income is shown on Schedule C of the federal Form 1120, and allowing the subtraction for any amount shown on the Schedule M-1 would either allow the same amount to be subtracted twice or allow a subtraction that is not actually included in taxable income.

When examining the foreign dividend gross-up subtraction it is important to verify:

- The amount of gross-up
- It has not been included as a subtraction modification twice (on the Other Subtraction Line and in the Schedule J computation).

Numerous errors on the IL Schedule J have been identified throughout the years. Those errors are outlined in the Appendix of this chapter.

C. EXEMPT INTEREST DIVIDENDS

FOR REGULATED INVESTMENT COMPANIES (RIC) ONLY—
(IITA § 203(b)(2)(H))

This modification is for the amount of exempt interest dividends paid to shareholders as defined in IRC § 852(b)(5). IRC § 852(b)(2)(D) allows a RIC to deduct dividends paid, but does not allow the deduction of dividends attributable to tax-exempt interest, because that interest is already excluded from taxable income. In order to prevent a RIC from paying Illinois tax on the add-back of exempt interest that it paid out as an exempt interest dividend, it is allowed to subtract the amount it paid out. IRC § 852(b)(5)(A)(i) states the dividends are, “reported by the company as an exempt-interest dividend in written statements furnished to its shareholders.” The auditor should request the statements for review of the subtraction.

D. EXPENSE DEDUCTIONS DISALLOWED FEDERALLY

(IITA § 203(b)(2)(I))

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

86 IAC § 100.2455, Subtraction Modification for Federally Disallowed Deductions, is effective for tax years ending on or after August 13, 1999 and summarizes the following federal expense items as they appear on the Illinois Schedule M in Step 3, (Line 15 on the 2009 and subsequent forms). These items are listed in IITA § 203(b)(2)(I) and are explained in the sections below. Subparagraph (I) is exempt from the provisions of IITA § 250.

1. Interest Expenses Relating To Municipal Bond Interest Income

IRC § 291(a)(3) contains special rules for certain financial institution preference items. Financial institutions and their related modifications are discussed in Chapter 30.

2. Expenses Related To Federally Tax-Exempt Interest

IRC § 265 provides that no deduction shall be allowed for expenses and interest relating to tax-exempt income. These amounts of expense and interest, determined in accordance with the provisions of the IRC, are allowable subtractions for Illinois income tax purposes. For more information, refer to 86 IAC § 100.2455

3. Bond Premiums Amortization On Federally Tax-Exempt Bonds

IRC § 171(a)(2) disallows the deduction normally allowed for amortization of bond premium (which represents a return of the bondholder’s investment included in the stated amount of interest payable on the bond) on federally tax-exempt bonds because the payment is already excluded from taxable income. Prior to the effective date of this modification the amortization of bond premium was not allowed as an offset to the addition modification for federally tax-exempt interest. The amount of amortizable bond premium for each year is computed using IRC § 171(b)(2) and (3).

Bond premium is the excess of the purchase price of the bond over the face value of the bond. The deductible amortization of bond premium is computed by multiplying the premium by the number of months in the taxable year of ownership by the taxpayer, and by dividing that amount by the number of months from the date of acquisition to the date of maturity. For more information, refer to 86 IAC § 100.2455.

4. Expenses Related To Federal Credits

IRC § 280C lists several expenses and wages that are not allowed as a deduction on the federal return because a federal credit was claimed instead. 86 IAC § 100.2455 lists the most popular federal credits. For a corporation the subtraction modifications that qualify are claimed on Schedule M, Step 3. The language on the Schedule M can change from

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

year to year. It is important to verify that the federal deduction is disallowed under IRC § 280C and not a different federal section not referenced by the IITA.

In addition to the Hurricane Katrina relief mentioned in 86 IAC § 100.2455(d), the taxpayer may claim disallowed federal expenses relating to the following federal credits, as long as they claimed the federal credit in lieu of the federal deduction:

- Work Opportunity Credit, Form 5884
- Empowerment Zone Employment Credit, Form 8844
- Welfare-To-Work Credit, Form 8861
- Credit for Increasing Research Activities, Form 6765
- Indian Employment Credit under IRC § 45A
- Qualified Clinical Testing Expense (“orphan drug”) Credit - Form 8820
- Agricultural Chemicals Security Credit – Form 8931

Federal deductions are NOT allowed as a subtraction modification under IITA § 203(b)(2)(I) regarding the following credits:

- Energy Efficient Home Credit, Form 8908
- Credit for Small Employer Pension Plan Startup Costs - Form 8881
- Credit for Enhanced Oil Recovery - IRC § 43(d)
- Credit for the portion of employer Social Security taxes paid with respect to employee cash tips, IRC § 45B, Form 8846
- Alcohol Fuel Credit - IRC § 40

If the auditor encounters a federal credit not listed above, then IRC § 280C must be reviewed to see if it qualifies. Merely being listed in IRC § 280C qualifies a credit for an allowable subtraction regardless of where in the IRC the credit is further detailed.

5. Reduction In Insurance Company Reserves

IRC § 832 applies to a non-life insurance company’s share of state and municipal interest. See Chapter 31 for information regarding insurance companies and their modifications.

6. Reduction In Depreciation Related To Railroad Maintenance Credits

IRC § 45G was created for the railroad maintenance credit and defines it as an amount equal to 50% of the track maintenance expenditures paid or incurred by an eligible taxpayer during the taxable year. IRC § 45G(e)(3) describes the adjustment for the reduction in the basis of the track. Public Act 097-0507 created the subtraction modification for tax years ending on or after December 31, 2011.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

7. Gross Income Resulting From Alternative Energy Credits

IRC § 87 refers to alcohol and biodiesel fuels credits. Public Act 097-0507 created a subtraction modification for taxable years ending on or after December 31, 2008, for any amount included in gross income under this section. For the computation of taxable income, any amount included in gross income is comprised of:

a) the amount of the alcohol fuel credit determined with respect to the taxpayer for the taxable year under IRC § 40(a), and
b) the biodiesel fuels credit determined with respect to the taxpayer for the taxable year under IRC § 40A(a)

E. EXEMPTIONS BY VIRTUE OF STATUTE OR CONSTITUTION

(IITA § 203(b)(2)(J))

Taxpayers may subtract all amounts included in federal taxable income exempt from taxation by this State either due to Illinois' statutes or Constitution or to the U.S. Constitution, treaties or statutes. Any income from bonds or other obligations exempted will be net of bond premium amortization. Publication 101, Income Exempt from Tax is revised periodically and contains a complete list of the income exempt from tax. These exemptions are discussed in detail in 86 IAC § 100.2470 and briefly as follows.

1. U.S. Interest

86 IAC § 100.2470(b)

- Limited to the amount of U.S. government securities themselves and the interest paid thereon, exempt from state income taxation pursuant to 31 USC § 3124,
- Certain interest income that is exempt from federal taxation is also exempt from state taxation (such as interest on obligations of Puerto Rico, the Virgin Islands, or Guam).
    - In these cases the interest must first be added back as an Illinois addition modification to be deducted as an Illinois subtraction modification. See Chapter 24 for discussion on the addition modification.
- The capital gain from the sale of the U.S. government obligations is not exempt from Illinois taxation.
- The modification is for "interest net of bond premium amortization" (Bond premium amortization is discussed in detail in Chapter 24.)

Currently all interest income is reported on the federal Form 1120, Page 1, Line 5. It is necessary to obtain workpapers, which break down the sources of the interest income. The instructions to the federal Form 1120 state that interest income should:

- not be netted against related interest expense,
- the gross amount of interest should be reported on Line 5

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- related expenses are reported on the appropriate expense line,

This should also be verified in audit. If any adjustment is made to the amount of U.S. interest claimed, a schedule should be prepared indicating:

- the type of security,
- issue date,
- maturity date,
- rate of interest and
- amount of interest received

2. Obligations Of The United States

86 IAC § 100.2470(b)

Federal statute exempts stocks and obligations of the U.S. Government, as well as the interest on the obligation(s), from state income taxation. The regulation describes several characteristics of this type of obligation including among other things that they bear interest and have congressional authorization. Refer to 86 IAC § 100.2470(b) for more information.

Original issue discount (OID) bonds, the issue price is below the redemption price, and the holder receives part or all of the expected return in the form of price appreciation. The difference between the issue price and the redemption price is the OID, and a portion of the OID is required to be accrued and included in the income of the holder annually. A number of letter rulings have stated that accretion on discount of original issue discount bonds qualifies for the U.S. Government interest subtraction.

Market discount bonds are acquired for a price that is less than the principal amount of the bond. Market discount generally arises when the value of a debt obligation declines after issuance (typically, because of an increase in prevailing interest rates or a decline in the credit-worthiness of the borrower). Accrued market discount should be the total that's accrued up to the time of sale.

Under federal law the gain on the disposition of a tax-exempt obligation or any other market discount bond, purchased by the taxpayer after April 30, 1993 (regardless of the date the bond was issued) and acquired for a price that is less than the principal amount of the bond, generally will be treated as ordinary income (instead of capital gain) to the extent of accrued market discount.

Only the portion of the accrued market discount that relates to the OID bond qualifies for the US government subtraction, but only on qualified US Government bonds that have reached maturity.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Other Income Exempted By Federal Statutes
   86 IAC § 100.2470(c)

Other federal statutes provide exemption from state income taxation with respect to various specifically named types of income. Refer to the regulation for the complete list (intended to be exhaustive) of exempt income and the specific statutes to which each item relates.

4. Distributions From Money Market Trusts (Mutual Funds)
   86 IAC § 100.2470(d)

Income received from any of the obligations listed in 86 IAC § 100.2470 (b) & (c) may be subtracted in the computation of base income, even if the obligations are owned indirectly by owning shares in a mutual fund. Refer to the regulation section for an in-depth analysis on determining the amount of subtraction.

If tax was paid on these state-exempt distributions, an amended return may be filed to claim a refund for any year still within the statute of limitations.

5. Interest On Obligations Of State/Local Governments
   86 IAC § 100.2470(f)

Only income from state and local obligations specifically exempt by Illinois statute may be subtracted from federal taxable income. Auditors must ensure that the income from exempt bonds is first shown as an addition and then as a subtraction on the Illinois income tax return. Income from these bonds is not exempt if the bonds are owned indirectly through owning shares in a mutual fund. A complete list of these obligations is found on the Schedule M in Step 3 (Line 19 on the 2009 and subsequent forms).

6. Other Income Exempted by Illinois Statutes
   86 IAC § 100.2470(g)

Illinois Pre-Need Cemetery Sales Act (815 ILCS 390/16) and Illinois Funeral or Burial Funds Act (225 ILCS 45/4a(c)) – income earned on funds held in a trust fund suspense account is excluded from tax until the final determination is made as to the payee of the account. Note that there is no provision in the IITA that requires this income to be added to any taxpayer's federal taxable income or adjusted gross income when this "final determination" is made, so the income will go untaxed by Illinois if it is subtracted under this provision.

Family Practice Residency Act (110 ILCS 935/4.01; PA 86-926 (HB 1494), eff. September 17, 1989) – income in the form of education loan repayments made for primary care physicians who agree to practice in designated areas for a specified period of time.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Public Utilities Act (220 ILCS 5/8-508.1) – income earned by nuclear decommissioning trusts established pursuant to Section 8-508.1. There are two types of nuclear decommissioning trusts. One is exempt from federal income taxation the other is not. Income earned by either of these types of trusts is exempt from Illinois income taxation. REF: Sunshine Letter IT93-0162.

Home Ownership Made Easy Program [310 ILCS 55/5.1] – income earned on investments made pursuant to the Act

Illinois Prepaid Tuition Act [110 ILCS 979] – income from the Illinois prepaid tuition program, other than disbursements to beneficiaries which are not used in accordance with the applicable prepaid tuition contract. A similar subtraction is allowed for disbursements from the College Savings Pool under the State Treasurer Act [15 ILCS 505/16.5].

If a prepaid tuition contract qualifies under IRC § 529, earnings on contributions made to the Illinois Prepaid Tuition Trust Fund or the College Savings Pool under the contract are exempt from federal income taxation (and therefore Illinois income taxation) until distributed. The legislative intent in creating the Illinois prepaid tuition program does not guarantee that every prepaid tuition contract or the College Savings Pool will qualify under IRC § 529 and there is no guarantee that IRC § 529 will continue in effect. However, Section 55 of the Illinois Prepaid Tuition Act [110 ILCS 979/55] and Section 16.5 of the State Treasurer Act [15 ILCS 505/16.5] provide that assets of those programs and their income and operation shall be exempt from all taxation by the State and that disbursements to a beneficiary shall be similarly exempt from all taxation by the State of Illinois and any of its subdivisions, so long as they are used for educational purposes in accordance with the provisions of the program.

College Savings Programs – up to $2,000 of income derived by individuals from investments made under former Section 30-15.8(a)

7. U.S. Interest Income **Not** Exempt From Illinois Income Taxation

86 IAC § 100.2470(h)

86 IAC § 100.2470(h) lists specific interest bearing securities of the U.S. government which are not exempt from Illinois taxation. This list includes items such as FNMA, GNMA and Freddie Mac securities, interest earned on federal refunds and repurchase agreements as well as others. For the full list and detailed descriptions refer to the regulation.

a) FNMA, GNMA, FREDDIE MAC

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Obligations (debentures, notes or bonds) issued by the Federal National Mortgage Association (FNMA), including mortgage-backed bonds issued under authority of 12 USC § 1719(d) and guaranteed by the Government National Mortgage Association (GNMA) under 12 USC § 1721(g), are not exempt from Illinois income taxation unless the obligation is defaulted upon and has been taken over by the Federal Assets Financing Trust or the Federal Assets Liquidation Trust.

Obligations issued by GNMA which are commonly referred to as GNMA "Pass-through Securities" or "Mortgage-backed Securities" are also not exempt from Illinois income taxation. These securities are actually issued by approved issuers and guaranteed by GNMA under 12 USC § 1721(g). This position was supported by the decision in the property tax case of the Rockford Life Insurance Co. v. Department of Revenue (Illinois).

The Federal Home Loan Mortgage Corporation (often abbreviated as FHLMC or Freddie Mac) was created on July 24, 1970 by the enactment of Title III of the Emergency Home Finance Act of 1970. Freddie Macs are principally mortgage pass-through securities called Freddie Mac Mortgage Participation Certificates and collateralized Mortgage Obligations. Both of these types of obligations are commonly referred to as Freddie Mac obligations.

The Federal Home Loan Mortgage Corporation, as an entity, is exempt from state taxation. However, the income received from the holding of Freddie Mac obligations is not exempt and should not be included in the Illinois subtraction modification.

b) Repurchase Agreements

Under a repurchase agreement, a corporation with excess cash will purchase an obligation from a financial institution or a securities broker. At the time of the purchase, an agreement will be made that the investment is very short-term in nature (generally less than six months but possibly as short as one day). The purchaser agrees to sell the obligations back to the bank or dealer within the specified period of time and the seller agrees to repurchase the obligations. The obligation is usually purchased and resold at a price, which is higher than the price the obligation would be traded on the open market. The higher price represents the original purchase price plus interest for the repurchase agreement period at the current market rate.

If the obligations used as collateral in the repurchase agreement are U.S. government obligations, corporations will, at times, include the repurchase agreement interest as U.S. interest in their Illinois subtraction modification. THIS IS NOT ALLOWABLE. The Department has consistently taken the position that the repurchase agreement is actually a loan by the corporation to the securities holder and the obligations are held by the corporation as collateral. As such, the interest which is earned on the U.S.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

government obligation is properly allowable as a subtraction modification to the financial institution or the securities dealer and not to the corporation. This position was upheld in the Andras case. For case synopses of the Andras case and the Loewenstein case (and complete case citations), refer to Chapter 49.

Generally, repurchase agreements have the following characteristics:

(1) The broker can recall the bond at any time by repaying the amount that was received from the taxpayer.
(2) The taxpayer can demand return of the original purchase price, regardless of market conditions, by releasing the taxpayer’s hold on the bond.
(3) The taxpayer cannot sell the bond to anyone else, nor can the taxpayer refuse to release the bond if the broker chooses to recall it.
(4) The taxpayer never gains control of the bond; it is placed in a bank, picked by the broker, as security for the money invested.
(5) With the taxpayer's permission, the broker can exchange the deposited security for another, while retaining the invested money.
(6) The bond "purchased" by the taxpayer is usually not readily marketable by the broker; thus its value may or may not be equal to the investment made by the taxpayer.
(7) The interest rate to be paid to the taxpayer is based on the interest rate in the money market and is usually in excess of the interest rate authorized by the bond.
(8) The broker clips the interest coupons and redeems them, and also exchanges the security on deposit (with the taxpayer's permission) and cashes it with the federal government.

By applying the above criteria it can be determined if a taxpayer actually owns an obligation and therefore has a right to the U.S. Interest subtraction modification. The following are some additional clues to pinpointing repurchase agreements:

(9) The resale price is ALWAYS stated if the resale date is fixed, or is determined by a formula that reflects accrual of interest over the period between the purchase and resale if the resale date is not fixed.
(10) Obligations are ALWAYS purchased from and resold to the same person.
(11) Transactions are usually short term in nature (generally less than six months).
(12) Interest paid is usually higher than the stated rate.

8. Other Income Not Exempt From Illinois Income Taxation

a) U.S. Bond Gain Issue

Bond Gain refers to the capital gains realized on the sale of U.S. government obligations such as notes, bonds, debentures, etc. Even though not allowed by the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Illinois Income Tax Act, some taxpayers include the gain in the subtraction modification for interest from U.S. government obligations. More information related to this is offered in the Historical Extracts section of this chapter.

b) Federal Home Loan Bank Dividends

Dividends (cash or stock) from the holding of federal home loan bank (FHLB) stock are not exempt from state taxation. Daily investment deposit (DID) accounts of federal home loan banks are not considered "other such obligations" and interest from such accounts is not exempt from Illinois income taxation. See compliance alert dated February 2010 on the IDOR web site. The Illinois Circuit Court of Cook County in the case of Bell Federal Savings and Loan Association also upheld the position that interest received on DID accounts is not exempt from state income tax. A synopsis of the Bell Federal case and a complete case citation can be found in Chapter 49.

In some cases, FHLB stock dividends are not included in federal taxable income. Instead, the FHLB stock dividends reduce the taxpayer's basis in the FHLB stock and the income is only included in federal taxable income when the FHLB stock is sold. In this situation, the FHLB stock dividends are shown as an adjustment on the taxpayer's schedule M-1 for income recorded on the books and records but not included in federal taxable income. Since the FHLB stock dividends are not included in federal taxable income and there is no addition modification for Illinois purposes requiring a taxpayer to add back an FHLB stock dividend, an FHLB stock dividend that is not included in federal taxable income is not subject to Illinois income tax.

c) Gross V. Net

(1) FOR TAX YEARS BEGINNING ON OR AFTER JANUARY 1, 1992

All interest which qualifies for the IITA § 203(b)(2)(J) subtraction modification should be eliminated from income in the computation of base income, net of premium amortization.

Beginning with tax year 2005, the IL-1120 was dramatically overhauled moving the Other Subtractions line to Step 3, Line 23. A Schedule M must be attached when an amount is entered on this line.

(2) FOR TAX YEARS BEGINNING ON OR AFTER JANUARY 1, 1991 BUT PRIOR TO JANUARY 1, 1992

The 1991 instructions to Line 5a of the IL-1120 (and corresponding lines of the other Illinois returns) were rewritten to state;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Write the total interest received or accrued from U.S. Treasury bonds, notes, bills, and savings bonds that is included in federal taxable income. The amount is net of any bond premium amortization deducted federally.

The subtraction of Illinois tax-exempt interest, other than interest from the U.S. Treasury obligations referred to above was entered on Line 5f of the IL-1120. The Line 5f instructions were not changed to include the statement above. Therefore, the gross amount of interest (other than interest from U.S. Treasury obligations) which qualifies for the U.S. interest subtraction may be subtracted.

In 1991, three letter rulings were issued which stated that the U.S. interest subtraction modification should include the gross amount of U.S. interest received or accrued for the year. Those rulings: IT 91-0053, IT 91-0054 and IT 91-0103, were revoked on March 7, 1994, by letter rulings IT 94-0009, IT 94-0010 and IT 94-0011.

(3) FOR TAX YEARS BEGINNING PRIOR TO JANUARY 1, 1991

The subtraction modification allowed by IITA § 203(b)(2)(J) regarding income exempt from Illinois taxation due to Illinois or federal law is for the GROSS amount of interest received. No adjustment is to be made to this amount for expenses relating to the interest received. Specifically, the modification should NOT be adjusted for bond premium amortization.

F. ENTERPRISE / RIVER EDGE REDEVELOPMENT ZONE DIVIDENDS (IITA § 203(b)(2)(K))

The organization must show that at least 95% of its business activity is within an enterprise zone (EZ) to qualify for the EZ dividend subtraction. The subtraction modification was expanded by Public Act 94-1021 effective July 12, 2006 to include corporations conducting operations in a River Edge Redevelopment Zone. With respect to a financial institution, refer to Chapter 30. Any distributions from a Subchapter S corporation conducting substantially all of its business operations in an Enterprise Zone or zones would not be deductible under IITA § 203(b)(2)(K) by the shareholders. Public Act 97-905 amended IITA § 203(b)(2)(K) by eliminating references to enterprise zones effective August 7, 2012. The subtraction will continue to apply to qualified river edge redevelopment zone dividends. Refer to 86 IAC § 100.2480(b) for more information. Subparagraph (K) is exempt from the provisions of IITA Section 250.

The formula used to apportion income of an organization is utilized in determining the percentage of business activity conducted within the EZ to apportion income between the EZ and all other locations. The apportionment formula may be found in IITA § 304.

When auditing a taxpayer that is claiming this subtraction it is important to verify that the dividends, net of any dividends-received deduction claimed for those dividends on the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

federal return (Line 29(b)) are subtracted, not gross dividend income. Only the amount of dividends included in taxable income may be subtracted here.

Also, the timing of the dividend payment is important. Qualifying dividends may only be subtracted if paid after the latest of:

1. The date the EZ or river edge redevelopment zone in which the corporation paying the dividends is located was officially designated by the Department of Commerce and Economic Opportunity (formerly Commerce and Community Affairs);

2. The date the corporation paying dividends commenced operations in the EZ or river edge redevelopment zone.

3. The effective date of the public act enacting this subtraction (December 7, 1982).

It is the responsibility of the auditor to verify each business location is within an EZ or river edge redevelopment zone. The auditor will first analyze the maps provided at the DCEO website:

http://www.illinois.gov/dceo/ExpandRelocate/Incentives/taxassistance/Pages/EZmaps.aspx

If a determination cannot be made, the auditor will submit the inquiry and documentation to the audit supervisor including:

- the exact street address,
- local business name and
- any additional information

This information will then be:

- forwarded to the Technical Support Supervisor,
- analyzed
- Technical Support will contact DCEO if needed
- final determination will be provided to the auditor by the audit supervisor

The subtraction is reported in Step 3 of the IL-1120 and calculated on an IL Schedule 1299-B using figures obtained from the federal Form 1120, Schedule C. Auditors will refer to the schedules listed to verify the amounts reported after confirming eligibility.

G. FOREIGN TRADE ZONE (SUBZONE)/HIGH IMPACT BUSINESS DIVIDENDS

(IITA § 203(b)(2)(L))

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This subtraction of “an amount equal to dividends paid by a corporation” is allowed to taxpayers whose:

1. Qualifications include

   a) Conducting business in a federally designated Foreign Trade Zone or Sub-Zone and
   b) Designation as a High Impact Business

Dividends subtracted under Section 203(b)(2)(K) may not be subtracted under this provision. Taxpayers are entitled to this subtraction in the taxable year in which qualifying dividends are included in taxable income of the taxpayer.

2. Limitations to this subtraction are:

   a) Distributions must be dividends,
   b) Only dividends that are included in federal taxable income of the taxpayer (for an individual, adjusted gross income) can be subtracted,
   c) The dividends are not eligible for the subtraction provided in IITA § 203(a)(2)(J), IITA § 203(b)(2)(K), IITA § 203(c)(2)(M), or IITA § 203(d)(2)(K), and
   d) The dividends cannot be subtracted under any other provision of IITA § 203.

The subtraction is reported in Step 3 of the IL-1120 and calculated on an IL Schedule 1299-B using figures obtained from the federal Form 1120, Schedule C. Auditors will refer to the schedules listed to verify the amounts reported after confirming eligibility. See 86 IAC § 100.2490 for more information.

H. INTEREST INCOME ON LOANS SECURED BY EZ PROPERTY
FOR FINANCIAL INSTITUTIONS ONLY
(IITA § 203(b)(2)(M))

A financial organization within the meaning of IITA § 304(c) qualifies for a subtraction modification for the amount included in its taxable income as interest income from a loan or loans the collateral of which is property which is “eligible” for the EZ Investment Credit or the River Edge Redevelopment Zone Investment Credit. Effective on and after August 7, 2012, interest received or accrued from a loan secured by EZ property does not qualify for the subtraction.

For information regarding this subtraction modification refer to the Financial Organizations Chapter 30 and 86 IAC § 100.2655. Subparagraph (M) is exempt from the provisions of IITA Section 250.

I. LOANS SECURED BY HIGH IMPACT BUSINESS PROPERTY
FOR FINANCIAL INSTITUTIONS ONLY

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

(IITA § 203(b)(2)(M-1))

A financial organization within the meaning of IITA § 304(c) qualifies for a subtraction modification for the amount included in its taxable income as interest income from a loan or loans the collateral of which is property which is “eligible” for the High Impact Business Investment Credit and the operations of which are placed in a Foreign Trade Zone or Subzone within Illinois.

For information regarding this subtraction modification refer to the Financial Organizations Chapter 30 and 86 IAC § 100.2657.

J. CONTRIBUTIONS MADE TO DESIGNATED ZONE ORGANIZATIONS (DZO)

(IITA § 203(b)(2)(N))

1. Eligibility Criteria

There are two criteria, which must be met before a corporation can claim this modification.

a) The contribution must qualify as a charitable contribution under IRC § 170(c).
b) The corporation must have a certificate of approval from the Department of Commerce and Economic Opportunity (DCEO), (formerly Commerce and Community Affairs).
   (1) To apply for the deduction a corporation must fill out a Designated Zone Organization Corporate Contribution Application.
   (2) DCEO is providing the Department of Revenue with copies of any certifications issued.

The taxpayer needs to provide adequate proof of DCEO certification. If documentation is not available, contact the Technical Support supervisor.

2. Ineligibility Criteria

a) A debt, which is owed by a DZO to a creditor and is written off by the creditor, is not considered a charitable contribution eligible for the subtraction modification. The contribution must be used for a specific project approved by DCEO. By its nature, the cancellation of a debt is a general type of contribution and therefore, would not qualify.
b) The value of legal services rendered to assist a DZO in a project, which are donated as in-kind contributions, does not qualify for the subtraction modification.
c) Incubator or start-up businesses operating for profit do not qualify as a "project" of a DZO. Consequently, contributions to such operations would not qualify for the subtraction modification.
d) Grants received from the DCEO under the Illinois Coal Technology Development Assistance Act (ICTDAA) cannot be claimed as a subtraction modification. The

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

ICTDAA itself, 30 ILCS 730/1 et seq., contains no provision exempting grants awarded there under from Illinois income taxation. IITA § 203(h) prohibits any subtraction that is not expressly allowed in IITA § 203.

The subtraction, effective December 7, 1982 , is reported in Step 3 of the IL-1120 and calculated on an IL Schedule 1299-B using figures obtained from the federal Form 1120, Schedule C. Auditors will refer to the schedules listed to verify the amounts reported after confirming eligibility. Subparagraph (N) is exempt from the provisions of IITA Section 250.

K. FOREIGN SOURCE DIVIDEND SUBTRACTION

(IITA § 203(b)(2)(O))

The purpose of the modification is to tax foreign dividends in the same manner and amount as domestic dividends. Subparagraph (O) is exempt from the provisions of IITA Section 250.

- TY ending after December 31, 1992, the modification is for a percentage equal to the percentage allowable under IRC § 243(a)(1):
  - 70% if the dividends were received from less than 20% owned corporations
  - 80% if the dividends were received from 20% or greater owned corporations, but less than 80% owned
- TY ending on or after December 31, 1982, and prior to December 31, 1992, the modification is for:
  - 85% of the foreign source dividends included in taxable income that exceed the IITA § 203(b)(2)(G) modification [foreign dividend gross-up] plus
  - 100% of the dividends that exceed the IITA § 203(b)(2)(G) modification, and were received from a foreign entity that would be a member of the affiliated group which includes the dividend recipient, if it were not for the exclusion in IRC § 1504(b)(3)
- TY ending on or after December 31, 1988 the modification applies to the amount by which any dividends received or deemed received or paid or deemed paid under IRC §§ 951 through 964 [Subpart F income] exceed the foreign dividend gross-up related to such dividends.
- TY ending on or after December 31, 2008, the modification includes dividends received from a captive real estate investment trust

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IRC § 1504(b)(3) specifically excludes foreign corporations from the term "includible corporation". Prior to tax years ending on or after December 31, 1988, Subpart F income was not includible in this subtraction amount.

Corporate taxpayers report a breakdown of their dividend income on the federal Form 1120, Schedule C. Examination of federal Forms 5471 and 5472 will confirm ownership for foreign dividends claimed. For Illinois, IL-1120, Schedule J is used to compute the amount of the foreign source or REIT dividend subtraction allowed for a specific tax year. Although correct since 2005, this schedule was rife with errors in years prior. Those errors are outlined in the Appendix of this chapter.

1. Dividends from Multi-Tiered Foreign Corporations

A taxpayer claiming the 100% subtraction modification must directly own 80% or more of the foreign corporation, or one or more of the other members of the taxpayer's affiliated group must together own directly the requisite 80% or more of the foreign corporation. In determining whether the taxpayer qualifies for a 70% or 100% subtraction modification, the distribution must be a dividend from a foreign corporation, and thus the taxpayer must directly own stock of the distributing foreign corporation. In a string of multi-tiered foreign corporations, we would only look at the percentage of ownership in the first-tiered corporation to determine the percentage of dividends that qualified for the subtraction.

> For example, the taxpayer owns 85% of the stock in a foreign corporation (FC#1). FC#1 owns 65% of the stock in a second-tier foreign corporation (FC#2). The taxpayer's subtraction modification with respect to a distribution from FC#1 is not affected by the fact that the economic source of the dividend can be traced to FC#2. The taxpayer's subtraction modification depends on its relationship to FC#1. In this example FC#1 owns less than 80% of FC#2, but the dividends declared payable by FC#1 to the taxpayer still qualify for the 100% deduction because FC#1 is owned more than 80% by the taxpayer.

2. Dividends Flowing Through From A Foreign Partnership

Foreign dividends that are received from a partnership are much more complicated. Chapter 28 of the Audit Manual covers partnerships, Subchapter S corporations, trusts & estates. Refer to that Chapter regarding the rules for determining income and modifications for these taxpayers.

3. Subpart F Income

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In October 1991, the Illinois Supreme Court denied an appeal of an appellate court decision in the case of Kraft, Inc. v. The Illinois Department of Revenue. The appellate court held that, prior to the effective date of Public Act 82-1029, Subpart F income was not includible in the subtraction modification amount for foreign source dividends since the Subpart F income involved the undistributed income of subsidiaries that were controlled foreign corporations and not dividends actually received from those foreign sources.

For more information regarding the water's-edge combination method of reporting and unitary business groups in general, refer to Chapter 23. A synopsis of the Kraft decision and a complete case citation can be found in Chapter 49.

4. Foreign Dividend Flow-Through From A Mutual Fund

Dividends received by a taxpayer from a mutual fund such as Acorn International that invests exclusively in foreign corporations may not be claimed by the taxpayer as a subtraction modification for foreign dividends. Taxpayers have taken the position that it is an allowable subtraction modification because in the Andras v. Department of Revenue case a taxpayer that received a dividend from a mutual fund that invested U.S. Government securities was allowed a subtraction modification.

In Andras the Court allowed the subtraction modification to flow through to the taxpayer because there is a federal statute that provides that states cannot impose a direct or indirect tax on U.S. Government interest. If the taxpayers were not allowed a flow through of the U.S. Government interest, it would amount to an indirect tax. The theory applied by the Court in this case would not apply to any other type of income.

A similar issue occurs with interest on obligations of state and local governments that are specifically exempted by the IITA. 86 IAC § 100.2470(f) explains that the bond income is not exempt if they are owned indirectly through shares in a mutual fund. Although, it is not stated in the regulations, the same would be true for foreign dividends.

5. Captive REIT

The REIT addition modification in IITA § 203(b)(2)(E-15) could result in double taxation if the REIT holding company is subject to Illinois tax because the dividends received by the REIT holding company do not qualify for the federal deduction under IRC § 243.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note that a legislative error created different start dates for the addition and subtraction modifications.

Language was added to the Schedule J to allow dividends from a captive REIT to be included in the subtraction modification for tax years ending on or after December 31, 2008, while the addition modification is not required until after 2008. See Chapter 24 for an example of the related addition and subtraction modifications.

A consent dividend is a device to allow a RIC or REIT to meet its income distribution requirements after the end of the tax year, so it can continue to qualify as a RIC or REIT. Consent dividends are treated the same as other dividends paid by the RIC or REIT. REIT dividends are not deductible under IRC § 243 and RIC dividends can be deducted only to the extent they represent distributions of dividends that would qualify for the IRC § 243 deduction that are received by the RIC and that the RIC has certified to its shareholders, so treating consent dividends as true dividends rarely matters. However, consent dividends from a captive REIT are subtractable under IITA § 203(b)(2)(O), the same as other captive REIT dividends.

L. JOB TRAINING PROJECT CONTRIBUTIONS

(IITA § 203(b)(2)(P))

This modification is effective for tax years ending on or after January 1, 1986, and is equal to any contribution to a job training project related to the Tax Increment Allocation Redevelopment Act (TIARA). TIARA does not provide for a contribution program. The IITA subtraction modification assumes that TIF district taxpayers will contribute to such job training projects voluntarily.

When auditing a return, on which the Job Training Project subtraction modification is claimed, the following information should be obtained:

1. A written redevelopment plan for the TIF district or project area involved.

2. A copy of the job training project to which they have contributed.

3. A detailed list of the contributions made including the nature of the contributions and a description of how the contributions were appropriate to the described job training project.

4. A list of the persons being trained whether currently employed or prospectively employed in a redevelopment project area.

This subtraction modification is not for general training expenses of an employer located in a TIF District but for contributions to a specific TIF district project. If the taxpayer refuses to provide a written job training project agreement, the subtraction modification should be denied.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Informational Bulletin FY 90-40 explains the Job Training Projects subtraction and is available on the Department website. Key elements of the modification are:

1. The contributions will NOT qualify for the modification if the contributions are reimbursed.

2. The subtraction must be taken in the year in which the contribution is made and applies only to contributions made on or after January 1, 1986.

The subtraction modification is reported in Step 3 on the 2005 (and subsequent) IL-1120.

M. CLAIM OF RIGHT

(IITA § 203(b)(2)(Q))

Available to any taxpayer that has taken a federal credit for amounts repaid under IRC § 1341 "claim of right." The subtraction is equal to the amount which would have been deducted from income had the federal credit not been claimed. If the taxpayer claims the deduction federally, no Illinois subtraction modification is allowed.

The claim of right doctrine applies where a taxpayer has an apparent right to unrestricted income. A possibility may exist at the time of receipt that repayment of all or part of the income will be required at a later date. Examples include:

- Amounts the taxpayer has contracted, before receipt, to pay to a person
- Illegal payments
- Amounts the taxpayer may repay voluntarily
- Amounts received under a mistake of fact
- Litigation awards
- Amounts received subject to a contingency

Income received under a claim of right must be reported in the year of receipt. Repayment of the income (or any part of the income) in a later year does not entitle the taxpayer to file an amended return for the earlier year. Instead, a deduction for the amount of the repayment is allowed in the year it is made if using a cash accounting method. Any other accounting method will require the credit be claimed only for the tax year in which it is a proper deduction under that method. In either case, IRC § 1341 allows many taxpayers to elect to claim a credit in lieu of the deduction for the year, with the credit being equal to the reduction in tax that would have resulted if the taxpayer had excluded the repaid amount from income in the year it was received or accrued.

The subtraction modification for the credit taken is reported on the IL Schedule M, in Step 3 (line 14 of the 2009 and subsequent forms). If an amount is included on this line, the auditor will request a copy of the taxpayer's Form 1139, Corporation Application for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Tentative Refund, with the attached computation of the credit to verify the amount reported. Rarely, the taxpayer may report the credit on federal Form 1120X. In this instance, it should be reported in the Payments and Credits Section, on the Overpayment in prior year allowed as a credit Line, and a calculation sheet should still be available for review.

N. ATTORNEY-IN-FACT

(IITA § 203(b)(2)(R))

IRC § 835 allows an interinsurance or reciprocal insurance company and the attorney-in-fact that manages its business to elect to consolidate their operations for tax purposes. If the election is made, the reciprocal insurer is disallowed a deduction for the fees it pays the attorney-in-fact to the extent of the net income of the attorney-in-fact that is attributable to its activities on behalf of the reciprocal insurer. The reciprocal insurer is allowed a federal credit equal to the portion of the attorney-in-fact's federal income tax liability attributable to the income from its activities on behalf of the reciprocal insurer. If this election is made, the attorney-in-fact's income is included in taxable income on two separate returns, resulting in double Illinois taxation because Illinois has no credit provision. This modification eliminates the double tax by allowing the attorney-in-fact to subtract an amount equal to the expenses disallowed on the reciprocal insurer's federal return when the reciprocal insurer makes an IRC § 835 election. Subparagraph (R) is exempt from the provisions of IITA Section 250. Refer to Chapter 31 for additional information regarding this modification.

O. INCOME DISTRIBUTABLE TO SHAREHOLDERS SUBJECT TO REPLACEMENT TAX

(IITA § 203(b)(2)(S))

Applicable to tax years ending on or after December 31, 1997, in order to prevent the same income from being subject to replacement tax twice, Subchapter S corporations are allowed to deduct the portion of their net income that is distributable to a shareholder who is subject to replacement tax or to certain exempt organizations. Subparagraph (S) is exempt from the provisions of IITA Section 250. Refer to Chapter 28 for information regarding partnership, trust and estate returns.

P. FEDERAL BONUS DEPRECIATION

(IITA § 203(b)(2)(T))

IRC § 168(k) originally provided that taxpayers were to deduct "bonus depreciation" of 30% of the cost of capital assets acquired and placed in service after September 10, 2001, and before January 1, 2005. Taxpayers depreciate the remaining 70% of the cost using their normal depreciation method. For most assets, the normal depreciation is 70% of what the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

amount would be if no bonus depreciation were claimed. The bonus depreciation allowable on property placed in service after May 3, 2003, was increased to 50%.

IRC Section 168(k) has been amended several times, through the following Acts primarily to extend its application.

- Economic Stimulus Act of 2008
- American Recovery and Reinvestment Act of 2009
- Small Business Jobs Act of 2010
- American Taxpayer Relief Act of 2012
- Tax Increase Prevention Act of 2014
- Protecting Americans from Tax Hikes (PATH) Act of 2015

The most recent amendments reflect the intention of Congress to provide for bonus depreciation rules that are substantially identical to the bonus depreciation rules originally enacted in 2002 and 2003. A comprehensive set of regulations were promulgated in connection with the former rules. *See* 26 CFR § 1.168(k)-0 *et. seq*. The IRS in 2008 issued a notice confirming that the existing regulations continue to apply. See IRS News Release (IR-2008-58) (April 11, 2008).

Federally, bonus depreciation has generally been available since September 11, 2001, with a period of expiration in 2005, 2006, and 2007, and has ranged from 30 percent to 100 percent over the years as shown in this chart:

Start Date	**End Date**	**Bonus Rate**
09/11/2001	05/05/2003	30%
05/06/2003	12/31/2004	50%
01/01/2008	09/08/2010	50%
09/09/2010	12/31/2011	100%
01/01/2012	12/31/2017	50%
09/27/2017	12/30/2022	100% for qualifying assets

Public Act 92-603 effective June 28, 2002, “decoupled” Illinois from the federal legislation by reversing its effects on depreciation.

- First, it requires taxpayers to add back on their Illinois return, the federal bonus depreciation.
- Second, it allows taxpayers to deduct the additional depreciation amount that would have been allowed on their federal return if the bonus depreciation law had not been enacted. This subtraction is provided for corporations in IITA § 203(b)(2)(T). This

deduction is allowed for each year that depreciation is claimed for an asset, not just for the year in which the bonus depreciation on the asset is added back.
- When the asset is disposed of or reaches the end of its depreciable life, the original add-back of the bonus depreciation deduction is subtracted and the subtractions under this subparagraph (T) are added back. So that the net effect of all the modifications is to change only the timing of depreciation deductions.

The auditor’s primary responsibility will be to verify that the taxpayer does not claim too much subtraction modification on bonus depreciation previously reported as an addition modification. The reversal modifications, specifically subparagraph (E-11), will correct any over-reported bonus depreciation subtractions taken on the assets in prior years, open or closed. Based upon the language of the statute and the Duty of Consistency principle, the taxpayer must reverse the aggregate amounts actually reported and allowed under (T), not what they should have reported.

Subparagraph (E-11) cannot be used as a “catch-all correction”. It may only be used to reverse reported and allowed (T) subtractions regarding specific assets that have either been sold, transferred, abandoned, disposed of, or fully depreciated.

As initially enacted, the modification in IITA § 203(b)(2)(T) assumed that the taxpayer had actually taken bonus depreciation equal to 30% of its basis in the property, so that its regular depreciation was computed on only 70% of the basis it would otherwise use. The depreciation deduction is therefore equal to 70% of what it would be if IRC § 168(k) had not been enacted. Multiplying the 70% times 0.429 equals 30%. This is the reduction in regular depreciation caused by taking the bonus depreciation. However, the amounts on Line 19 of the Form 4562 also include depreciation on other property, so we cannot simply multiply those amounts by 0.429 to compute this adjustment.

Q. BONUS DEPRECIATION - AFFECT ON FEDERAL GAIN & LOSS (IITA § 203(b)(2)(U))

Under federal law, when an asset is sold the gain or loss on the sale of the asset is equal to the price, minus the cost of the asset, reduced by all depreciation deductions. By computing gains this way, taxpayers are allowed a deduction for the entire cost of the asset, either through depreciation or when the asset is sold. Whatever gain or loss is reported for federal purposes is reported for Illinois purposes as well.

After the Illinois modifications to bonus and regular depreciation are made, total Illinois depreciation on an asset that is not fully depreciated will be less than total federal depreciation. This means that if Illinois takes into account only the federal gain or loss on the asset without adjustment, taxpayers may be required to include in base income a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

greater amount of gain (or a smaller loss) than properly includible. To correct this problem, Public Act 92-603 added IITA § 203(b)(2)(E-11) and (U) which require all of the Illinois changes to bonus and regular depreciation for an asset to be reversed in the year the asset is sold or the last year that federal depreciation is allowed to the taxpayer on the asset. After the changes are reversed, total Illinois depreciation will equal total federal depreciation and taxpayers will have received the proper deduction with respect to the asset. Subparagraph (U) is exempt from the provisions of IITA Section 250.

Form IL-4562 is used to compute the modifications for bonus depreciation. The form must be attached to the Illinois return. If the Illinois tax return has already been filed, then the taxpayer must file an amended return. The IL-4562 must be attached to the amended return. Auditors should review the IL-4562, Step 2, Line 3 for accuracy and request any other documentation necessary to make a determination.

If an amended return reversing the bonus depreciation was filed by October 15, 2002, no penalties or interest were assessed on the resulting underpayment.

1. IL-1040 Filers

The computation of the federal bonus depreciation modifications can be different for IL-1040 filers because some individuals report their depreciation expenses on federal Form 2106 for Employee Business Expenses. Refer to Chapter 45 for information on Individual Income Tax audits.

2. Excess Subtraction Modifications

There are times when the subtraction modification for the bonus depreciation computed on Step 3, Line 8, of the IL-4562 can exceed the addition modification computed on Step 2, Line 1, of the IL-4562, but for 2001 the subtraction modification can never exceed the addition modification in Step 2 since it is the first year for the bonus depreciation. The subtraction modification could be greater in other years depending on timing differences; however, the subtraction modification can never be greater than the addition modification over a period of time.

For example, for 2001, 2002, 2003 and 2004 the taxpayer reported addition modifications of $4,000,000 on Step 2, Line 2. The total subtraction modifications on Step 3, Line 8, over that same period cannot exceed $4 million. Unless additional bonus depreciation is allowed and claimed in

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

subsequent years, the total subtraction modifications claimed on Step 3, Line 8, in all years from 2001 onward cannot exceed $4 million.

Note: Due to rounding, 42.9% is actually too high. The more precise subtraction would be 42.857%. As a result, total subtractions on Step 3, Line 8 of Form IL-4562 may eventually exceed total additions on Step 2, Line 1. For example, if $4,000,000 in bonus depreciation is added back and the property on which bonus depreciation was taken is fully depreciated by the taxpayer in later years, the total subtractions on Step 3, Line 8, will be $4,004,000.

However, correcting prior year errors can be tricky. We cannot "modify" certain modifications to address taxpayer errors in prior years to recapture them in a later year, beyond what the modification expressly provides.

For example, if taxpayer has over-reported its (T) subtraction in closed years by $300 million, we cannot simply recapture that $300 million in a current year under (E-11) unless it meets the reversal criteria for those over-depreciated assets.

The modifications under (T) and the reversal modifications (E-11) and (U) do allow for some restrictions on improper Illinois subtractions and ultimately the reversal of improperly claimed amounts, so as long as taxpayer continues to be an Illinois filer, we should be able to eventually correct the improperly subtracted amounts in closed years.

The reversal modifications, specifically subparagraph (E-11), will correct any over-reported bonus depreciation subtractions taken on the assets in prior years, open or closed. Based upon the language of the statute and the Duty of Consistency principle, the taxpayer must reverse the aggregate amounts actually reported and allowed under (T), not what they should have reported. REF:

3. Expiration of the Federal Bonus Depreciation

The federal Job Creation and Worker Assistance Act of 2002 that created the bonus depreciation expired in 2004. However, there have been several other Acts extending the provisions of IRC § 168(k). The most recent Act passed relating to federal bonus depreciation has extended the provision through tax year 2026. Unless a new Act is ratified further extending the federal bonus depreciation, there will be no addition modifications after 2019; subtraction modifications will continue in succeeding years. See the example below, following the next issue.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

4. Federal Bonus Depreciation at 50%

The federal bonus depreciation started out at 30% for assets placed in service on or after September 11, 2001, but the percentage increased to 50% for certain assets acquired after May 5, 2003. Public Act 94-776 amended the IITA for tax years ending after December 31, 2005, to allow the subtraction of 100% of the federal depreciation deduction of an asset on which 50% bonus depreciation was claimed.

The following example illustrates how property acquired between May 5, 2003 and December 31, 2005 will be handled.

> Example: As a result of the disallowance of the 50% Federal bonus depreciation, an asset for Illinois purposes will not get the full depreciation deduction over its life because of the 3/7 (.429) factor applied to the remaining federal deprecation not including the bonus depreciation. In the example below a $10,000, 5-year asset purchased in 2004 gets a 50% federal bonus depreciation deduction of $5,000 = ($10,000 x 50%) plus regular federal depreciation of $1,000 = ($5,000 x 20%) in 2004. For Illinois, the $5,000 bonus is added back to income and 3/7 of the regular federal depreciation, or $429 = ($1,000 x .429), is allowed as a deduction in 2004. For 2005 and later, the subtraction is equal to the regular federal depreciation of the asset.

	Add-back	Subtraction	
2004	5,000	429	($5,000 x 20% x .429)
2005	0	1,600	($5,000 x 32%)
2006	0	960	($5,000 x 19.2%)
2007	0	576	($5,000 x 11.52%)
2008	0	576	($5,000 x 11.52%)
2009	0	288	($5,000 x 5.76%)
Total	5,000	4,429	

There is no deduction for the remaining $571 in basis. However, all addition and subtraction modifications are reversed in the year the asset is disposed of, so over the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

life of the asset the taxpayer will be allowed to deduct the entire basis of the asset, either as depreciation or in determining the gain or loss on disposition.

5. Federal Bonus Depreciation at 100%

The 100 percent bonus depreciation provided under IRC § 168(k)(5) for property acquired after September 8, 2010 and before January 1, 2013, is effectively allowed by Illinois; no adjustments are required. Technically, the bonus depreciation must be added back, but, because the year in which the asset is placed in service is also the last year of its depreciable life, the taxpayer is also allowed to subtract in that year whatever bonus depreciation was added back. (REF: IL-4562 Instructions)

R. RELATED PARTY 80/20 AND NONCOMBINATION RULE

(IITA §§ 203(b)(2)(V), (W), (X) & (Y))
86 IAC § 100.2430

Public Act 93-0840 created new addition and subtraction modifications for related party transactions with 80/20 companies effective for taxable years ending on or after December 31, 2004. Public Act 95-0233 and Public Act 95-0707 for taxable years ending on or after December 31, 2008, expanded the modifications to include interest expenses, intangible expenses and insurance premium expenses incurred in transactions with a related party, foreign or domestic, that would have been a member of the unitary group if not for the prohibition in IITA § 1501(a)(27) that requires all members of the unitary group apportion their income under the same subsections of IITA § 304 (noncombination rule). Schedule 80/20, Related Party Expenses, was revised along with 86 IAC § 100.2430, Addition and Subtraction Modifications for Transactions with 80/20 and Noncombination Rule Companies. Effective for tax years ending December 31, 2017 and after, Public Act 100-0022 amended the IITA in a manner to affect related party addition and subtraction modifications by eliminating the aforementioned noncombination rule.

Related party expense modifications are reported on the IL Schedule 80/20. Auditors will review the schedule and any supporting documents to verify the modifications are calculated correctly. Subparagraphs (V), (W), (X) & (Y) are exempt from the provisions of IITA Section 250.

1. IITA § 203(b)(2)(V) allows a subtraction for:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Any interest income (net of expenses) to the extent the payor had to add back the payment under IITA § 203(b)(2)(E-12),

b) Any income from intangible property (net of expenses) to the extent the payor had to add back the payment under IITA § 203(b)(2)(E-13), and

c) Any insurance premium income (net of expenses) if the payor had to add back its payment for the premium under IITA § 203(b)(2)(E-14).

2. IITA § 203(b)(2)(W), and (X) allow a person who is required to add back interest or intangible expenses paid to a related party under IITA § 203(b)(2)(E-12) or (E-13), respectively, to subtract any interest or intangible income received from the same related party, up to the amount of the addition. The purpose of these provisions is to require taxpayers to add back only net interest or intangible expense payments if there are payments being made both ways.

3. IITA § 203(b)(2)(Y) (for tax years ending on or after December 31, 2011) allows a taxpayer who was disallowed a deduction for premiums paid to subtract any loss it would have been allowed to deduct federally if not for reimbursements received on that insurance policy. If the taxpayer elects to take this subtraction, the insurer must add back the reimbursements paid.

S. SUBTRACTION FOR IRC § 965 INCOME

(IITA § 203(b)(2)(Z))

If the taxpayer received controlled foreign corporation (CFC) dividends qualifying for deduction under IRC § 965, federal taxable income should be recalculated without applying IRC § 965(e)(2)(A) (which provides that taxable income may not be less than nondeductible controlled foreign corporation dividends), and without regard to any net operating loss deduction. The taxpayer may claim the excess of actual taxable income over the recomputed amount. Subparagraph (Z) is exempt from the provisions of IITA Section 250.

The American Jobs Creation Act of 2004 added section 965 to the IRC. In general, and subject to limitations, IRC § 965(a) provides that a corporation that is a U.S. shareholder of a CFC may elect, for one taxable year, an 85% dividends received deduction (DRD) with respect to certain cash dividends it receives from its CFCs.

In IRC § 965(e)(2)(A), taxable income may not be less than the amount of nondeductible CFC dividends received during the election year. If this causes the taxpayer to lose the benefit of some deductions that would otherwise cause it to have a smaller taxable income (or even a loss), those lost deductions become a net operating loss that the taxpayer may carry back (when applicable) or forward. Prior to the enactment of Section 203(b)(2)(Z),

This manual is not a statement of Department policy. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the taxpayer would get no Illinois income tax benefit from these deductions because the net operating loss deduction would have to be added back.

For Illinois purposes, this subtraction modification is reported on Schedule M. For the 2011 and subsequent forms it is found on Line 32.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. Step 2: Figure your income or loss

1	Federal taxable income from U.S. Form 1120, Line 30. **Attach** a copy of your federal return.	1	.00
2	Net operating loss deduction from U.S. Form 1120, Line 29a. This amount cannot be negative.	2	.00
3	State, municipal, and other interest income excluded from Line 1.	3	.00
4	Illinois income and replacement tax deducted in arriving at Line 1.	4	.00
5	Illinois Special Depreciation addition. **Attach** Form IL-4562.	5	.00
6	Related-party expenses additions. **Attach** Schedule 80/20.	6	.00
7	Distributive share of additions. **Attach** Schedule(s) K-1-P or K-1-T.	7	.00
8	Other additions. **Attach** Schedule M (for businesses).	8	.00
9	Add Lines 1 through 8. This amount is your income or loss.	9	.00

Step 3: Figure your base income or loss

10	Interest income from U.S. Treasury and other exempt federal obligations.	10	203(b)(2)(J)	.00		
11	Enterprise Zone or River Edge Redevelopment Zone Dividend subtraction. **Attach** Schedule 1299-B.	11	203(b)(2)(K)	.00		
12	Enterprise Zone or River Edge Redevelopment Zone Interest subtraction. **Attach** Schedule 1299-B.	12	203(b)(2)(M)	00		
13	High Impact Business Dividend subtraction. **Attach** Schedule 1299-B.	13	203(b)(2)(L)	.00		
14	High Impact Business Interest subtraction. **Attach** Schedule 1299-B.	14	203(b)(2)(M-1)	.00		
15	Contribution subtraction. **Attach** Schedule 1299-B.	15	203(b)(2)(N)	.00		
16	Contributions to certain job training projects. See instructions.	16	203(b)(2)(P)	.00		
17	Foreign Dividend subtraction. **Attach** Schedule J. See instructions.	17	203(b)(2)(G)	.00		
18	Illinois Special Depreciation subtraction. **Attach** Form IL-4562.	18	203(b)(2)(T)&(U)	0		
19	Related-party expenses subtraction. **Attach** Schedule 80/20.	19	203(b)(2)(V) (W) (X)&(Y)			
20	Distributive share of subtractions. **Attach** Schedule(s) K-1-P or K-1-T.	20	203(b)(2)(S)	.00		
21	Other subtractions. **Attach** Schedule M (for businesses).	21	See Sch M	.00		
22	Total subtractions. Add Lines 10 through 21.				22	.00
23	**Base income or loss.** Subtract Line 22 from Line 9.				23	.00

STOP

A If the amount on Line 23 is derived inside Illinois only, check this box and write the amount from Step 3, Line 23 on Step 5, Line 35. You may not complete Step 4. (You must leave Step 4, Lines 24 through 34 blank.) ☐

B If any portion of the amount on Line 23 is derived outside Illinois, check this box and complete all lines of Step 4. See instructions. ☐

Step 4: Figure your income allocable to Illinois (Complete only if you checked the box on Line B, above.)

24	Nonbusiness income or loss. **Attach** Schedule NB.	24	.00		
25	Trust, estate, and non-unitary partnership business income or loss included in Line 23.	25	.00		
26	Add Lines 24 and 25.			26	.00
27	Business income or loss. Subtract Line 26 from Line 23.			27	.00
28	Total sales everywhere. This amount cannot be negative.	28			
29	Total sales inside Illinois. This amount cannot be negative.	29			
30	Apportionment Factor. Divide Line 29 by Line 28 (carry to six decimal places).	30	.		
31	Business income or loss apportionable to Illinois. Multiply Line 27 by Line 30.			31	.00
32	Nonbusiness income or loss allocable to Illinois. **Attach** Schedule NB.			32	.00
33	Trust, estate, and non-unitary partnership business income or loss apportionable to Illinois.			33	.00
34	**Base income or loss allocable to Illinois.** Add Lines 31 through 33.			34	.00

Write the amount of

1	Capital gain taxed under IRC Section 852(b)(3).	1	.00
2	Notes, bonds, debentures, or obligations issued by the Governments of American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands.	2	.00
3	Lloyd's plan of operation loss if reported on your behalf on Form IL-1023-C and included in your federal taxable income.	3	.00
4	Business expense recapture.	4	.00
5	Any other state's income tax deducted from federal taxable income **(Form IL-1041 filers only)**.	5	.00
6	Capital loss to be carried forward **(Form IL-1041 filers only)**.	6	.00
7	Credit taken on Schedule 1299-A or 1299-D for college savings plan contributions you made as an employer.	7	.00
8	Dividends paid by a captive REIT.	8	.00
9	Other additions - Identify each item. ______	9	.00
10	**Total additions.** Add Lines 1 through 9. Write the amount here and on your Form IL-1120, Line 8, Form IL-1120-ST, Line 21, Form IL-1065, Line 22 or Form IL-1041, Line 10. →	10	.00

Step 3: Figure your subtractions

Write the amount of

11	Exempt interest dividends paid by regulated investment companies (IRC § 852(b)(5)).	11	203(b)(2)(H)	.00
12	Notes, bonds, debentures, or obligations issued by the Governments of American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands to the extent the amounts were required to be added back on Line 2.	12	203(b)(2)(J)	.00
13	Lloyd's plan of operation income if reported on your behalf on Form IL-1023-C.	13		.00
14	Income for which you claimed a credit under IRC § 1341.	14	203(b)(2)(Q)	.00
15	Expense deductions disallowed federally under IRC §§ 171(a)(2), 265, 280C, 291(a)(3), or 832(b)(5)(B)(i). Specify any amount relating to the following:			
	a Interest expenses relating to municipal income (IRC § 291)	a	.00	
	b Interest and other expenses related to federally tax-exempt interest (IRC § 265)	b	.00	
	c Bond premium amortization on federally tax-exempt bonds (IRC § 171)	c	.00	
	d Expenses related to certain federal credits (IRC §280C)	d	.00	
	e Reduction in insurance company reserves (IRC §832)	e	.00	
	f Reduction in depreciation related to railroad maintenance credits (IRC § 45G)	f	.00	
	g Gross income resulting from alternative energy credits (IRC § 87)	g	.00	
16	Add Lines 15a through 15g.	16	203(b)(2)(I)	.00
17	Add Lines 11 through 14 and Line 16. Write the amount here and on Line 18.	17		.00

Schedule M (R-12/12) Page 1 of 4

Step 3: Continued

18	Write the amount from Line 17.			18 ______ .00
19	Interest on the following obligations of Illinois state and local government, only if included in Illinois income (see instructions). **Attach** a copy of the statement that identifies the payer and the amount of interest for each obligation.			
	a Illinois Housing Development Authority bonds and notes (except housing-related commercial facilities bonds and notes)	a	______ .00	
	b Illinois Development Finance Authority bonds, notes, and other obligations (venture fund and infrastructure bonds only)	b	______ .00	
	c Illinois Sports Facilities Authority bonds	c	______ .00	
	d Illinois Development Finance Authority bonds (only those issued under the Illinois Development Finance Authority Act, Sections 7.80 through 7.87)	d	______ .00	
	e Illinois Development Finance Authority bonds or Illinois Finance Authority bonds issued under the Asbestos Abatement Finance Act	e	______ .00	
	f Bonds issued by the Illinois Finance Authority under the Illinois Finance Authority Act	f	______ .00	
	g Southwestern Illinois Development Authority bonds	g	______ .00	
	h Illinois Power Agency bonds issued by the Illinois Finance Authority under Other Powers Article in the Illinois Finance Authority Act	h	______ .00	
	i Central Illinois Economic Development Authority bonds issued under the Central Illinois Economic Development Authority Act	i	______ .00

VI. HISTORICAL EXTRACTS

A. U.S. BOND GAIN ISSUE 1988 - 1996

Three issues related to U.S. Bond gains include:

1. A deduction on an original return and/or a claim for refund filed for capital gains from the sale of any U.S. Government Obligations prior to May 24, 1996.
2. Losses carried forward or back which were increased because of the deduction for bond gain are included.
3. Bond premium amortization included in the U.S. Government Obligation subtraction modification prior to March 7, 1994.

If the audit includes the period of January 1, 1988 through May 24, 1996 (i.e. any tax year that includes any part of this period) for the bond gain issue or the period prior to March 7, 1994 for the bond premium amortization issue and the taxpayer has done the following:

1. Claimed a subtraction modification for the gains on the sale of U.S. government obligations or for gross interest,
2. Filed amended returns claiming a subtraction modification for the gains on the sale of U.S. government obligations or for gross interest, and/or
3. Carried Illinois net losses that are increased due to a subtraction modification for the gains on the sale of U.S. government obligations or for gross interest

The Auditor should allow the subtraction modification and make no adjustments for that issue in the audit. The capital gains should be allowed **without** netting out the capital losses. Adjustments should be made for all other issues.

If the taxpayer has not claimed the subtraction, filed amended returns or increased losses for the increased subtraction modification but has raised the issue during the audit, the adjustment should be allowed.

If the losses resulting from the subtraction of the bond gain are carried into 1997, 1998 or 1999, the Auditor should make adjustments to the losses to reflect disallowance of the subtraction, allow only the carry forward of any remaining loss and prepare the appropriate workpapers and audit schedules. However, those workpapers and schedules should not be given to the taxpayer until reviewed by Income Tax Technical Support personnel. The workpapers should be sent to the Supervisor, Income Tax Technical Support for review.

The Auditor should include the EDA-25s, supporting schedules for the subtraction modification and loss carry forward. Detailed schedules should be included that show the amount of the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

bond gain and/or premium amortization. In the case of insurance companies, Schedule D, Part 4 of the insurance company annual statement provides the necessary information. Companies other than insurance companies would report this information on Schedule D of the Form 1120. Also, any comments that would be helpful in reviewing the workpapers should be included. A note that states the date the statute will run should be prominently displayed on front of the package of workpapers.

A Technical Support Auditor will be assigned to review the case and return it with instructions for completion.

If the Auditor determines that the taxpayer has incurred gains on the sale of bonds but not claimed a subtraction modification for that gain or indicated that they want the adjustment made, the Auditor should keep silent. The taxpayer has filed the return correctly and no adjustments are needed.

If asked about the status of bond gain refund claims, the auditor should tell the taxpayer that no subtraction is allowed.

B. AUDIT ISSUES - BONUS DEPRECIATION

Form IL-4562 Instructions – 2001

It states on the IL-4562, Step 3, Line 5: “Write the total amount of depreciation allowance claimed on federal Form 4562, **Line 17**, plus Line 19, Column g, or Line 26, Column h**, for property for which you reported an addition modification** on Form IL-4562, Step 2, Line 1, for this tax year or any prior tax year.” [emphasis added].

Then, on the 2001 U.S. Form 4562 for line 17 it states: “MACRS deductions for assets placed in service in tax years **beginning before 2001**.” [emphasis added].

The language on the IL-4562 for 2001 indicates that the taxpayer can have amounts from line 17 of the Form 4562, but the Form 4562 for 2001 indicates that this does not apply for the 2001 year. The explanation for this is that the IL-4562 is intended to be a multi-year form. Even though you wouldn’t include Line 17 amounts on the IL-4562 for 2001, you would for succeeding years. If the taxpayer is including Line 17 amounts on the IL-4562 for 2001, then the taxpayer isn’t following the instructions where it says “for property for which you reported an addition modification.”

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

IL-4562, Step 3, Line 5 Instructions:

The IL-4562, Step 3, Line 5 says: "Write the total amount of depreciation allowance claimed on U.S. Form 4562, Line 17, plus Line 19, Column g, or Line 26, Column h, for property for which you reported an addition modification on Form IL-4562, Step 2, Line 1, for this tax year **or any prior tax year.** [Emphasis added]. Some taxpayers are claiming that this means they can claim a subtraction modification on all bonus depreciation deductions from prior years. The response from Legal Services is:

"Prior years' depreciation deductions are not reported on Line 5. Only the current year's depreciation deductions on property for which bonus depreciation was claimed (whether the bonus depreciation deductions were claimed in the current year or a prior year). What Illinois law does is to disallow the 30% bonus depreciation in the first year. And instead, 30% of the basis of the asset is depreciated over the normal recovery period that applies to the asset. The purpose of Line 5 is to figure the Illinois depreciation deduction that applies to the 30% adjusted basis of the property." (Ref: Email response from Legal Services dated February 6, 2004).

The biggest problem that Audit is having with the IL-4562 is in Step 3 above where taxpayers are claiming 100% of the amounts from Lines 17, 19 and 26 on the Form 4562. Based on examples of problem IL-4562's that auditors have sent in, the amounts that should be picked up on the IL-4562 should include only a portion of these federal amounts. Unfortunately, many taxpayers who complete their own state returns only have one or two people in their tax department and therefore do not have hours to spend completing a particular state schedule. They may simply pick up 100% of the federal line reference even though they are aware that the amounts include depreciation on assets for which no bonus depreciation was claimed.

If this is the case and the taxpayer has made no effort to identify what amounts were claimed for the bonus depreciation assets, then the auditor will have to examine federal workpapers that support Lines 17, 19, and 26 on the Form 4562 and determine what amounts were reported for the bonus depreciation assets. This can be particularly challenging where there are many subsidiaries since the bonus depreciation is applicable to all companies – Illinois filers as well as non-filers. Since other states have also reversed the effects of the bonus depreciation, the auditor could compare the Illinois bonus depreciation on the IL-4562 with amounts reported on other state returns; however this will not work with states like California which have their own method of computing federal depreciation. If the taxpayer is unwilling or unable to document to the satisfaction of the auditor all of the items of depreciation expense on Lines 17, 19, and 26 on the Form 4562 that relate to assets for which bonus depreciation was added back, then the subtraction should be disallowed for any item of depreciation that is not documented.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

VII. APPENDIX

A. SCHEDULE J – ERRORS FOR 2004

Column B, Lines 5 and 6 of the 2004 Schedule J were mistakenly shaded, and as a result, taxpayers may not have made entries to those lines when they were legally required to. If the taxpayer did not report any amounts on Columns A or C, Lines 5 and 6, no action is needed.

If 2004 is an audit year, and amounts are entered on Lines 5 and 6 of the pre-printed 2004 Schedule J, the auditor must secure a corrected copy of the Schedule J for 2004 (using the 2005 Schedule J available on-line) and mail it to the Income Tax Technical Support supervisor.

The auditor cannot include the additional tax associated with the 2004 Schedule J error on the IL-870 because this tax increase is subject to the math error provisions under IITA § 903(a). Taxpayers do not have any rights to protest this math error. However, auditors must abate the late pay penalties associated with this tax. For more information regarding the 2004 Schedule J error refer to Informational Bulletin FY 2006-10.

B. SCHEDULE J – ERRORS FOR 1996 THROUGH 2002

Some of the line items on the Schedule J reflect the wrong percentages allowed under IRC § 243(a)(1). Basically the taxpayer is entitled to the foreign dividend subtraction in the following percentages:

- 70% deduction if the dividends are received from less than 20% owned foreign corporations.
- 80% deduction if the dividends are received from 20% or greater, but less than 80% owned corporations
- 100% deduction if 80% or more of the stock is owned.
- 100% on all foreign dividend gross-up

Auditors should refer to the 2003 IL-1120 Schedule J that was changed to reflect the proper percentages.

The Schedule J is essentially unchanged for calendar years 1996 through 2002. The following is a summary of the amounts that are included on the Schedule J along with an explanation of the errors on the form itself.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Amounts from the following lines of the U.S. Schedule C are entered on the Illinois Schedule J:

Schedule J, Line 3

The U.S. source portion of dividends that are received from 20% or more owned foreign corporations and that qualify for the 80% deduction under IRC § 245(a) are entered on this line from U.S. Schedule C, Line 7. Dividends which are received from a 20% or more owned FSC that are attributable to income treated as effectively connected with the conduct of a trade or business within the United States (excluding foreign trade income) and that qualify for the 80% deduction provided in IRC § 245(c)(1)(B) are also included on this line.

a) Schedule J, Line 3 Error:

This line states: "Write the portion of Line 7 that is from less than 80% owned foreign corporations". Column D should show the allowable percentage of 80% - not 70%. The dividends on Line 7 of the Form 1120, Schedule C are received from 20% owned, but less than 80% owned corporations, therefore there is no 70% limitation on any of these dividends. Refer to the 2003 Schedule J.

b) Schedule J, Line 6 Error:

This line states: "Write the portion of Line 13 that is from less than 80% owned foreign corporations". The percentage listed in Column D is 70%. The allowable subtraction is limited to 70% only if the dividends were received from less than 20% owned corporations. The 2003 Schedule J breaks down this line between:

- Dividends received from less than 20% owned foreign corporations and
- Dividends received from 20% or more owned corporations, but less than 80%.

If the dividends are from greater than 20% or more owned, but less than 80% owned corporations, the subtraction modification is 80%. If the dividends are less than 20% owned, then the subtraction is limited to 70%.

c) Schedule J, Line 8 Error

Same as Line 6 above except this line is for dividends reported on the Form 1120, Schedule C, Line 14. The dividends on this line are subject to a 70% deduction only if they are from corporations less than 20% owned. Otherwise they get an 80% deduction if they are from corporations greater than 20% or more owned, but less than 80%.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor will have to breakdown the amounts reported on Schedule J Lines 6 & 8 based on the percentage of stock ownership, same as on the 2003 Schedule J.

For years prior to 1996, auditors will have to create their own schedules to reflect the above percentages keeping in mind the 85% limitation for years ending before 12/31/1992.

Note: Auditors should apply the correct percentages to the foreign dividends and allow any claims that are generated.

C. SCHEDULE J – ERRORS FOR 1993 AND 1994

The 1993 and 1994 Schedule J's contain two errors. The form allows taxpayers to incorrectly subtract 100% of certain dividends and makes a distinction between corporations that are less than 20% owned and those that are at least 20% owned but less than 80% owned.

a) Incorrect Allowance of 80% subtraction on certain dividends

The error is on Line 1c, Column B. The Schedule J allowed a taxpayer to subtract 80% of these dividends. The amount should be 70%.

b) Incorrect allowance of 100% subtraction on certain dividends:

The problem lies in Line 3 of the Schedule J. The form instructs the taxpayer to multiply the dividend amount in Line 3, Column B by 100% even though these dividends have been identified as only qualifying for the 70% subtraction. Therefore the Schedule J for both 1993 and 1994 erroneously allowed a taxpayer to claim a greater subtraction modification than is statutorily provided.

The errors on the Schedule J have been corrected on the 1995 version of the form. In audit, the subtraction modification for foreign source dividends for 1993 and 1994 should be recomputed, based on the correct subtraction percentages. Technical Support should be contacted on any case where the taxpayer is going to disagree to the liability resulting from the recalculation.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. PURPOSE

To assist auditors in making a determination of base income or loss allocable to Illinois as defined in Article 3 of the Illinois Income Tax Act (IITA). General rules are presented in IITA § 301 with regard to allocation and apportionment of base income. Apportionment is discussed in Chapter 27 of the Audit Manual.

II. REFERENCE SOURCES

86 IAC § 100.3010
86 IAC § 100.3015
86 IAC § 100.3500

III. GENERAL INFORMATION

A. Attribution of Income

Unless the company's base income is derived solely from Illinois (in which case 100% of its base income is taxable in Illinois) or the special attribution rules of IITA § 304(f) are in effect, the attribution of income is accomplished by using:

- Allocation rules in IITA § 301(c) and IITA § 303
- Apportionment rules in IITA § 304.

Before these rules can be applied, the auditor must properly classify income as either business or nonbusiness in nature. Taxpayers may claim certain items as business income in order to apportion the income to Illinois. This would be to a taxpayer's benefit if the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

commercial domicile is in Illinois or if the property from which the income is received is located in Illinois.

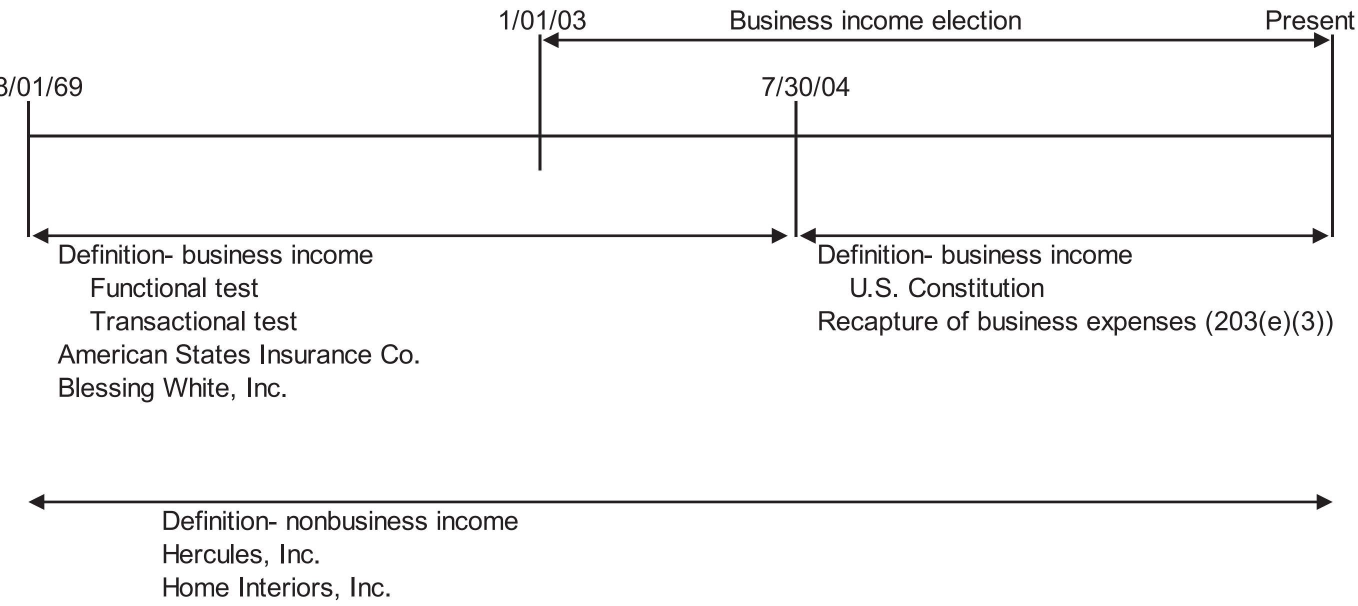
It is also possible for a specific item of LOSS to be considered nonbusiness in nature. The loss would then be allocated to the appropriate state in the same manner as nonbusiness income. Nonbusiness income is reported in Step 4 of the 2012 IL-1120.

B. Partnerships, S-Corps, Trusts and Estates

Chapter 28 of the Audit Manual covers partnerships, Subchapter S corporations, trusts & estates. Refer to that chapter regarding the rules for determining income for IL-1065 (Partnership), IL-1120ST (S Corp) or IL-1041 (Trusts and Estates) filers. Discussion on this topic within this chapter will focus on the amount of business income or loss from these taxpayers as allocable to Illinois.

1. Partnership income for nonresident partners is attributed in accordance with IITA § 305 (IAC § 100.3500),
2. Estate and trust income is attributed in accordance with IITA §§ 306 and 307.
3. S corporation income is attributed in accordance with IITA § 308.

IV. APE SPECIFIC LAW APPLICATION



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A. Business Income Election Effective 1/1/2003

IITA § 1501(a)(1) states that for each taxable year on or after January 1, 2003, a taxpayer may elect to treat all income, other than compensation, as business income. A check box was added to Step 1 of the IL-1120 for the taxpayer to make the election. If the box is checked, there should be no amounts on the income tax return for nonbusiness income. IAC § 100.3015 provides guidance for the election such as the following:

- Must be on the original return, or on a corrected return filed by the due date (including extensions) and is irrevocable.
- Each tax year stands on its own. For instance, for calendar year 2018 the taxpayer could elect to treat all income as business income. The election for 2018 would be irrevocable but would not apply to subsequent years.
- In the case of a partnership, trust, estate, or subchapter S corporation, an election made by such pass-through entity return is binding on its partner, beneficiary or shareholder. However, if the partner, beneficiary, or shareholder elects to treat all income as business income, then all nonbusiness income received from the partnership, trust or estate, or subchapter S corporation will be treated as business income.
- The election made by a designated agent is binding on all members required to join in a combined return.

Example: For 2018 Illinois corporate filers A, B and C file an IL-1120 combined return with the designated agent electing to treat all income as business income. Corporation D was not included in the unitary group and filed its own IL-1120 reporting nonbusiness income of $10,000. Upon audit an adjustment is made to include Corporation D in the combined return. Although Corporation D did not make the election to treat all income as business income, all of its income is automatically business income since it should have been a member of the combined return and the designated agent had made the election.

B. Nonbusiness Income

The taxpayer bears the burden of proof to show that income was properly classified as nonbusiness on its return.

1. Transactions Occurring On or After July 30, 2004

P.A. 93-840 changed the IITA § 1501(a)(1) definition of business income to all income that may be treated as apportionable business income under the Constitution of the United States. This is further discussed after the next section.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2. Business Expense Recapture

If a taxpayer claims any item of income (federal Form 1120, Lines 1 through 10 of page 1) as nonbusiness income, and if in earlier years the taxpayer reported the same item as business income, then all related business expenses, without limitation, for the current year and the two preceding taxable years must be recaptured in the current year. Although IITA § 203(e)(3) refers to the recapture of business expenses on "disposition of an asset or business", it is not necessary to have a sale of an asset to trigger the recapture of business expenses. Recapture will occur only when an item of income has been treated as business income in the prior year **and** is being treated as nonbusiness income in the current year. Note that recapture is triggered when a taxpayer makes the election to treat all income as business income in one year, and then fails to make that election in a subsequent year, so that the same item of income or income from the same asset or business is treated as business income in the year to which the election applies and as nonbusiness income in the year no election is made. 86 IAC § 100.2405.(d)(1).

Recaptured expenses are reported as an addition modification to the current year's return along with a corresponding increase to nonbusiness income reported on the Schedule NB. The recaptured expenses are reported as an adjustment to Illinois nonbusiness income based on the total recaptured expenses times the Illinois apportionment factor that is either a three-year average factor or the current year's apportionment factor, whichever is greater. The recapture amount is calculated on IL Schedule NB, Line 11 and reported with the nonbusiness income or loss allocable to Illinois (IL-1120, Line 32 of the 2012 form). Refer to Chapter 25 for in-depth discussion and an extensive example of business income expenses recapture. Also, see IITA § 203(e)(3) and IAC § 100.2405(d) for more information.

3. The U.S. Constitutional Standard

The constitutional standard for determining whether an item of income is business or nonbusiness consists of two distinct tests:

- Unitary Business Relationship Test
- Operational vs. Investment Function Test.

a) Unitary Business Relationship Test

Income earned from property located or activities conducted outside the taxing state may be apportioned if the taxpayer is engaged in a unitary business enterprise. Whether a unitary relationship exists will depend on traditional unitary principles as applied to the facts and circumstances of a particular taxpayer. Unitary determination is explained in Chapter 23. Although Illinois still requires a corporation unitary group member to be owned more than 50% for a combined return, the Constitution does not require majority ownership. Under the Constitution, a unitary relationship can exist as long as there is evidence of:

(1) strong centralized management,
(2) functional integration and
(3) economies of scale

b) <u>Operational vs. Investment Function Test</u>

The distinction between an investment function and an operational function depends on the relationship between the asset generating the income and the taxpayer's trade or business.

- Operational function - there is a connection between the asset and the taxpayer's <u>existing</u> business activity in the state
- Investment function – the asset has no <u>existing</u> relationship to any ongoing business activity.

An operational function can exist, even though no unitary relationship existed between the payor and payee. In order for an asset to be deemed operational, the taxpayer must have, while owning the asset, used it in its trade or business. What constitutes "use" is largely undefined, except that "use" is not synonymous with "available." An asset must actually be put in use for, or applied to, a known purpose that is related in some way to the taxpayer's trade or business. For example, interest earned on a bank account used as working capital is business income, and gain on the sale of futures contracts used to guarantee a price for raw materials is business income. Therefore, assets that are specifically set aside for working capital have a business purpose in addition to generating income. Income generated from assets that do not have a specified purpose other than to generate income will probably constitute nonbusiness investment income.

Example: An Illinois domiciled manufacturer has most of its operations in Illinois. In 2018 all of the stock is sold under IRC § 338(h)(10) resulting in a gain of $10 million. The taxpayer treated the gain as nonbusiness income. With the new definition of business income the structure of the transaction is irrelevant. Under the Constitution, all that is needed is some link between the income and the taxpayer's business activities in Illinois. Even if the taxpayer has nexus, the income still must somehow relate to the in-state activities to satisfy constitutional considerations. In this case, because the assets were previously used in operations, the gain should be treated as business income. In order for the gain to be considered nonbusiness under the new definition of business income the gain would have to relate to a separate line of business with no connection to Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

4. Transactions Prior To July 30, 2004

Three tests determined whether income was business or nonbusiness in nature:
a) Unities;
b) Transactional; and
c) Functional

Meeting either the transactional test or functional test resulted in business income under Illinois's statutory definition.

a) Unities Test

This test evolved as a result of Federal Supreme Court decisions in such cases as

- Mobil Oil Corp. v. Commissioner of Taxes,
- ASARCO Inc. v. Idaho State Tax Comm., and
- F.W. Woolworth Co. v. Taxation and Revenue Dept.

If the source of the income was the result of activities between entities involved in a unitary relationship then it was business income. To determine if the income was from a unitary source, the recipient's trade or business must be established. A person may have more than one "trade or business." If the income in question was received from a source which had a unitary relationship with any of the "trades or businesses" of the recipient, the income was considered business income.

For determining business income, the main criterion for establishing a unitary relationship was:

- functional integration through the exercise of
- strong centralized management.
  - Common ownership was not required.
  - Entities were not required to use the same apportionment formula (as prescribed in IITA § 304).
  - 80% or more of their business activities could be outside the United States.
  - Entities were not required to be in the same line of business or to be vertically integrated.

If a unitary relationship existed and the entities involved were determined to be members in the same unitary business group, any intercompany income and/or expense amounts should have been eliminated in the computation of unitary taxable income.

Refer to Chapter 23 Unitary Determination, for more information regarding:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- what constitutes functional integration,
- what a unitary relationship is, and
- examples of the supporting documents, records and evidence needed to support a decision that a unitary relationship exists,

b) The Transactional Test

This test was derived from the first part of the definition of business income in IITA § 1501(a)(1) which stated that business income arose from transactions and activities which occur in the regular course of the trade or business. It included any activities of a person, which were performed in the normal course of business activities. The frequency and regularity of the activities may or may not be a decisive factor depending on the nature of the activity.

(1) Companies that routinely bought and sold other businesses

Buying and selling other businesses could constitute a regular business activity for purposes of the transactional test. See:

- PPG Industries Inc. v. Department of Revenue,
- Atlantic Richfield Co. v. State of Colorado,
- Kimberly Clark Corporation and Kimberly-Clark Worldwide, Inc. v. Alabama Department of Revenue

For any transactions except for IRC § 338(h)(10) elections, if an auditor believes that the gain in question should be re-classified as business income under the transactional test, the auditor must gather information regarding the nature and frequency of business acquisitions and dispositions over a period of time.

(2) Working Capital

Income from the temporary investment of working capital pending the use of the funds in the business generally constituted operating, business income. See:

- Howard Johnson Co. vs. Illinois Department of Revenue (short-term, business)
- Dover Corporation et al v. the Illinois Department of Revenue (long-term, nonbusiness)
- Allied-Signal, Inc. v. Director, Division of Taxation, New Jersey
- Home Interiors & Gifts, Inc., v. Illinois Department of Revenue (short-term, nonbusiness)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Investments, which lie between the two extremes of the business and nonbusiness spectrum, must be examined and a determination made based on which side of the spectrum the specific investment tends to fall.

c) Functional Test

This test was derived from the second phrase in the statutory definition that business income was "income from tangible and intangible property if the acquisition, management, and disposition of the property constitute integral parts of the taxpayer's regular trade or business operations." The infrequency or extraordinary nature of the transaction was irrelevant in determining if the resulting income was business or nonbusiness.

If a corporation sold property which it previously used in its business operations, the gain from the sale of the property was business income. An exception to this rule was if the property had been taken out of the production of business income prior to its sale. One indication that a particular piece of property was used in the production of business income is if it was included in the property factor.

Some of the rules and examples for determining if income is business or nonbusiness in nature contained in IAC § 100.3010(c) involve the functional test.

In *Blessing/White, Inc. v. Zehnder*, the court surmised that the modified functional test applied when the disposition of assets was made pursuant to a corporate liquidation in cessation of business. Under the liquidating sale exception to the functional test a complete liquidation and cessation of a separate line of business, where the proceeds were not used in furtherance of any ongoing concern but distributed in their entirety to shareholders, the gain was treated as nonbusiness income. If both the asset and the proceeds were used in the business, then the gain was classified as business income under the functional test.

(1) Short-Term Investments

The taxpayer must prove that it did not use the funds in its business. In order to successfully challenge this classification, the auditor must determine the true nature and use of the funds in question. The following factors should be considered where working capital funds have been segregated and/or classified as "excess working capital":

- Are the "excess working capital" funds invested in a similar manner as the other working capital funds?
- Does the taxpayer have an investment plan in which the "excess working capital" is an integral part?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- What is the type and maturity of investments in “excess working capital” funds?
- How are these funds classified on internal documents?
- How are these funds classified on public documents (i.e., annual reports, form 10-K, etc.)?
- What is the frequency of transactions involving the “excess working capital” funds? What is the source of deposits and use of funds dispersed?
- What is the likelihood that these funds would be used in the ordinary course of business given the nature of the taxpayer’s business?
- Did the taxpayer also classify these funds as “excess working capital” funds on other state tax returns? This is especially important with respect to the taxpayer’s business domicile.
- Were these funds earmarked for future use in the taxpayer’s business?
- How did the taxpayer determine its “excess working capital”?

The central focus of the inquiry is to determine if the taxpayer’s classification of funds as “excess working capital” is artificial. In order to make this determination, an in-depth examination, including proper documentation, is necessary to evaluate the true nature of the funds and determine whether they are being used in the taxpayer’s ordinary course of business.

d) Deemed Asset Sales
IRC § 338(h)(10)

Every 338(h)(10) transaction will involve a deemed liquidation of the target corporation. The object of the audit will be to identify the taxpayer and whether the other *Blessing/White* elements are satisfied.

(1) Sale of Unitary Subsidiary

When a consolidated group is involved, auditors should investigate whether the recipient of the proceeds (1) terminated a separate line of business, and (2) reinvested the gain in its ongoing business operations. If the liquidation did not represent a complete cessation of a separate line of business, as in *Texaco-Cities*, or the proceeds were used in the continuing business operations, such as for working capital needs or paying down debt, as in *Mead*, then the gain should be classified as apportionable business income consistent with those decisions.

(2) Sale of Non-unitary Subsidiary.

In cases like *American States*, where the target is a separate filer which distributes the proceeds to a non-unitary shareholder, the gain should be treated as nonbusiness income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

C. IAC § 100.3010 Specific Income Items

IAC § 100.3010(c) provides rules and several examples for determining whether specific items of income are classified as business or nonbusiness. Some of these rules and examples incorporate the transactional test while others involve the functional test. Documentation to support the classification of each type of income as business or nonbusiness is discussed in the Exhibits section of this chapter.

1. Rental Income-
   IAC § 100.3010(c)(2)

Considered business income if the property with respect to which the income was received is used in the person's trade or business or is attendant thereto.

Rental income from safe harbor leases is considered business income. The safe harbor leases are (presumably) entered into for business reasons to minimize expenses and maximize federal tax incentives, and therefore any income arising from such lease is income arising from transactions and activity in the regular course of the taxpayer's trade or business and constitutes business income. See Kewannee Industries, Inc. v. Reese, 114 N.M. 784; 845 P.2d 1238 (1993)

2. Gains or Losses From the Sale of Assets-
   IAC § 100.3010(c)(3)

Constitutes business income if the property, while owned, was used in the trade or business. If utilized in the production of nonbusiness income, not used during an extended period of time prior to sale (normally 5 years) or was removed from the property factor before its sale, the gain or loss constitutes nonbusiness income.

Gains or losses from the disposition of the stock of a subsidiary will be considered to be business income if the subsidiary was in a unitary relationship with the parent. If the unitary relationship did not exist the gains or losses may still be considered business income if the income is earned in the course of activities related to those carried out in Illinois.

Gains or losses from the disposition of a non-unitary subsidiary's stock may also be considered business income if the taxpayer is in the business of buying and selling businesses. In such a case, the taxpayer would be considered to be in the separate

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

unitary business of investing in businesses and be entitled to business income treatment of capital gains and dividends even though the business of the underlying subsidiaries is not unitary.

Gains or losses from the disposition of stock of unrelated corporations will be considered to be business income if the corporations are in a unitary relationship with the holder of the stock OR if the earning of the income forms part of the taxpayer's unitary trade or business.

3. Interest-
   IAC § 100.3010(c)(4)

Is business income if the intangible is held or was created in the regular course of the trade or business operations or if the purpose for acquiring or holding the intangible is related or attendant to such trade or business.

4. Dividends-
   IAC § 100.3010(c)(5)

When the stock with respect to which dividends are received is held or was acquired in the regular course of trade or business operations or if the purpose for acquiring or holding the stock is related or attendant to trade or business operations, they are classified as business income.

Per the instructions to the IL-1120 under General Information, Part 1--Who Must File, corporate shareholders of a DISC or FSC will include actual and deemed distributions from the DISC or FSC in business income. (References to the FSC were added in the 1985, IL-1120 instructions.)

Dividend income is considered business income if the payor and the recipient are unitary. If the payor and the recipient are members of the same unitary group the dividend income will be eliminated as an intercompany transaction. If the dividends are received from foreign subsidiaries, a portion (if not all) of the dividend income will be eliminated as a subtraction modification to taxable income.

5. Royalties-
   IAC § 100.3010(c)(6)

If the patents or copyrights are held or were created in the regular course of trade or business or the purpose for acquiring or holding the patents or copyrights is related or

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

attendant to the trade or business operations, then royalties paid are considered business income.

6. Covenant Not To Compete-

Private letter ruling (IT-99-0005-PLR) issued 7/12/99 indicated that, in the absence of facts to the contrary, income from a covenant not to compete is business income.

7. Subpart F Income-

For tax years ending prior to December 31, 1988, Subpart F income was included in base income and was presumed to be business income. REF: Director's Decision for PAT #7 dated December 10, 1991. For subsequent years, corporations are allowed to subtract Subpart F income as part of the foreign dividends received subtraction in IITA Section 203(b)(2)(O).

The IITA was amended such that for tax years ending on or after December 31, 1995, Subpart F Income is not included in the sales factor.

8. Proration of Deductions-

Nonbusiness income is allocated “together with any item of deductions directly allocable thereto” IITA Section 303(a). Accordingly, if a deduction can be clearly attributed to a particular item of business or nonbusiness income, the deduction should be attributed as such. However, if a deduction can be attributed to both business and nonbusiness income it must be prorated between the different classes involved. The deduction can be prorated in any manner, which fairly distributes it between the classes of income. If a taxpayer modifies the manner of prorating from prior years, disclosure of the nature and extent of the modification should be included on the current year return. If returns or reports filed with all states to which the taxpayer reports are not uniform in the attribution or proration of any deduction, disclosure of the nature and extent of the variance is required. REF: IAC § 100.3010(d)(2)

D. Non-Unitary Partnership Income

IITA § 305 provides for the allocation of partnership income by partnerships and partners other than residents.

- Identify all partnerships.
- Determine whether the partnerships are unitary with the corporate partner.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- Determine the Illinois income (loss) for each of the non-unitary partnerships.
- Multiply the total Illinois income for each of the non-unitary partnerships by the distributive share of partnership income to be received by the corporate partner.

A partner conducting unitary business with its partnership must include its share of the partnership's business income as business income on its own return. The distributable share of the partnership's business income is not subtracted in Step 4 of the IL-1120 and is governed by IAC § 100.3380(d). This provision applies only if the partnership is not substantially wholly owned by members of its unitary business group. A partnership that is substantially wholly owned by members of its unitary business group must apportion its business income using the separate unitary method, and each partner (unitary or nonunitary) will include in its Illinois net income its share of the business income apportioned to Illinois by the partnership. See the instructions to the Schedule UB.

E. Trust and Estate Income

IITA § 306 indicates that the items of income and deduction that comprise trust and estate income paid or required to be distributed are treated as distributed pro-rata among the beneficiaries. In other words, each beneficiary is deemed to receive his or her share of each item of business income, nonbusiness income, and related deductions, additions, and subtractions.. IITA § 307 states that the beneficiaries of trusts and estates will proportionately include income (business or nonbusiness) earned from trusts and estates in their computation of net income. These items are reported in Step 4 on Lines 25 and 33 of the 2012 Form IL-1120. Auditors should reconcile these amounts to those reported on Schedule NB and Schedules K-1-P or K-1-T.

IV. EXHIBITS

A. Documentation and Support

Some of the information needed to make a determination on the business/nonbusiness income issue can be found in the corporate taxpayer's Annual Report and/or the 10K statements filed with the SEC.

It is very important to specifically identify the source and amount of all income in question. Vague statements such as, "The interest income was from investments of working capital and excess cash" do not adequately identify the source of the income. Auditor's Comments and workpapers are the Department's primary source of information to defend the positions taken in an audit.

The main points to remember are:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- ✓ Adequately identify each item of income by type, source and amount.
- ✓ Identify the actual trade(s) or business(es) of the recipient.
- ✓ Provide a detailed explanation of the activities surrounding the acquisition, management, and disposition of each source of income.
- ✓ If a unitary relationship is involved between the payor and the recipient of the income, provide detailed information and evidence to support the unitary determination.
- ✓ Follow the rules of documentation and evidence outlined in Chapter 23.

Depending on the type of income involved, the following information should be gathered (if applicable). In all instances the amount of related deductions should also be indicated.

1. Rental Income

- A listing of the specific type of property involved and the amount of rental income received from each type, if not piece, of property.

- A complete description of the property and its location.

- An explanation for the reason for acquisition of the property, its use (prior to being rented) by the company, and the relationship (if any) of the property to the trade or business.

2. Gains Or Losses

- A complete breakdown by individual transaction for each item claimed giving the general description and the amount.

- For the sale of tangible assets, provide a complete description of the property, its use in relation to the operations as a whole, situs at time of sale, date acquired, date sold, sales price and gain or loss on disposition.

- For the sale of intangible assets such as patents, copyrights, stock and interest-bearing securities, the same information should be gathered as discussed in the royalty, dividend and interest section below.

- In the case of a gain/loss from a liquidation, a description of the operations and activities of the subsidiary corporation. If possible, also provide a copy of the plan of liquidation and IRS ruling on the liquidation.

- In the case of foreign currency contracts, a listing of the transactions and an explanation of the purposes for which the taxpayer engaged in this activity.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Interest

- A breakdown by major category showing the source and amount of income from:
  - Government, state, municipal, etc. obligations
  - Loans to subsidiaries
  - Customers notes, trade receivables
  - Bank certificates, accounts
  - Commercial paper
  - Employee notes
  - Supplier notes
  - Other miscellaneous sources.

- A complete description of the activities involved in investing the funds, the type of funds invested, the purpose for the investments (excess cash, portfolio, expansion, business reserves, etc.), the length of the investments (short or long term in nature), etc.

- In the case of loans to subsidiaries or affiliates, describe the relationship between the companies (Does a unitary relationship exist? What was the purpose of acquiring the company?).

4. Dividends

- The names and ownership of the companies whose stock is the source of the dividend income.

- The reason for the acquisition and holding of the stock (i.e. to control the company, for an investment portfolio, to provide access to needed raw materials or supplies, as a short-term investment of excess cash, etc.).

5. Royalties

- The names of the payor companies and the amount received from each.

- Copies of the contractual agreements explaining the patent, trademark, licenses and know-how involved.

- Describe the development and utilization of the patents and trademark in the trade or business.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Describe the research and development activities of the company.

B. Examples of Business/Nonbusiness Income

1. Unitary Business Relationship Test

TAXPAYER claimed the capital gains and losses realized from the sale of the stock of ABC Company as nonbusiness income. The facts in this case were very similar to the facts in the U.S. Supreme Court case of Allied-Signal v. Director, Division of Taxation. TAXPAYER, through its disregarded entity TAXPAYER FINANCIAL, LLC, owned 9% of the stock of ABC Company. There were intercompany sales from TAXPAYER to ABC since ABC had acquired DEF Company, a competitor, and TAXPAYER had existing supply contracts with DEF Company. All transactions between TAXPAYER and ABC Company (formerly DEF Company) were at market prices.

There were no intercompany loans, loan guarantees, or common trademarks/trade names between TAXPAYER and ABC. TAXPAYER received no royalty income, interest income, rental income, service income, etc. from ABC. There was one common director in earlier years since the chairman of TAXPAYER was also a director of ABC. There were no common directors and officers between TAXPAYER and ABC during the audit period. Since the facts of this case were similar to Allied-Signal, the capital gains and losses were allowed as nonbusiness income since the transaction did not meet the Unitary Business Relationship Test in that no unitary relationship existed between the two companies.

As far as applying the Operational v. Investment Function Test to this case, the U.S. Supreme Court in Allied-Signal, also agreed as follows:

> …the payee and the payor need not be engaged in the same unitary business as a prerequisite to apportionment in all cases. What is required instead is that the capital transaction serves an operational rather than an investment function. To be sure the existence of a unitary relation between the payor and the payee is one means of meeting the constitutional requirement. It remains the case that in order to exclude certain income from the apportionment formula, the company must prove that the income was earned in the course of activities unrelated to those carried out in the taxing State. The existence of a unitary relation between the payee and payor is one justification for apportionment, but not the only one.

In this case, it was determined that the capital transaction served an investment function rather than an operational function and the capital gains and losses were allowed as nonbusiness income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2. Operating vs. Investment Function Test

Ohio Corp A classified portfolio interest as nonbusiness income, claiming that under the due process and commerce clauses of the Constitution, Illinois is barred from taxing interest of the Ohio based corporation. The funds are available, but not used, as working capital in its business operations. Ohio Corp A relies on the Home Interiors position that the mere availability of invested funds for day-to-day business operations is insufficient to establish a minimum connection between the taxing state and the taxpayer. Ohio Corp A used the portfolio fund as collateral for a line of credit obtained in its regular trade or business. The portfolio interest would be reclassified as business income based on the discussion below.

In applying the operational vs. investment function test, the "use" of funds is important. In this test, "used" does not mean spent. A taxpayer can "use" funds in several ways without actually spending the money. For example, funds would be considered "used" if they were pledged as collateral. Funds would be considered "used" if the taxpayer has letters of credit requiring it to keep a certain amount of funds. If the long-term bonds issued by the taxpayer required it to maintain a certain level of funds, these funds would be considered "used" in its operations. Funds required to support a corporation's bond rating may be considered "used" in its business. These are a few examples of how funds may be "used" without actually being spent.

Additionally, if a taxpayer does not know it has excess working capital until the end of a period, then technically all of the funds in a particular account are being "used" as working capital. In other words, the funds are there to be "used" and form a part of working capital which is different than the "available" distinction made in the Home Interiors decision. These funds are more than "available" in that they are to be "used" as needed and are actually earmarked for a business purpose. Conversely, an investment or excess cash is always "available" for working capital, but is not actually earmarked for any particular purpose or to be used as working capital.

C. Court Cases Involving Business Income

Throughout the years a number of court cases have been decided which involved the issue of business and nonbusiness income. Some of the larger cases appear below. For a synopsis of the case and the complete case citation, refer to Chapter 37 (new 49). Cases from other states are provided for informational purposes only and should not be cited as precedent for a position taken during the course of an audit.

1. US Supreme Court

Mobil Oil Corp. v. Commissioner of Taxes of Vermont, 445 U.S. 425 (1980)
Exxon Corp. v. Department of Revenue of Wisconsin, 447 U.S. 207 (1980)
ASARCO Inc. v. Idaho State Tax Commission, 458 U.S. 307 (1982)
F.W. Woolworth Co. v. Taxation and Revenue Dept of N. Mexico, 458 U.S. 354 (1982)
Container Corp. of America v. Franchise Tax Board, 463 U.S. 159 (1983)
Allied-Signal, Inc. v. Division of Taxation, New Jersey 504 U.S. 768 (1992)
MeadWestvaco Corp. v. IL Department of Revenue, 128 S. Ct. 1498 (2008)

2. Illinois Supreme Court

Texaco-Cities Service Pipeline Company v. IL Department of Revenue (1998)

3. Appellate Court

National Realty and Investment Co. v. IL Department of Revenue (1986)
Dover Corporation, et al v. IL Department of Revenue (1995)
Kroger Co. v. IL Department of Revenue, (1996)
Automated Data Processing, Inc. (ADP) v. IL Department of Revenue, (2000)
Home Interiors and Gifts, Inc. v. IL Department of Revenue, (2000)
Hercules, Inc. v. IL Department of Revenue, (2001)
Blessing/White, Inc. v. IL Department of Revenue, (2002)
PPG Industries Inc. v. IL Department of Revenue (2002)
American States Insurance Co. v. IL Department of Revenue, (2004)
Shakkour v. IL Department of Revenue, (2006)
National Holdings, Inc. v. IL Department of Revenue, (2007)

4. Functional Test

Sperry & Hutchinson Co. v. Oregon Department of Revenue (1974)
Appeal of Borden, Inc. California SBE (1977)
Kroger Co. v. Kentucky Department of Revenue (1977)
Arkansas Department of Finance and Administration v. Montgomery Ward & Co. (1979)
Atlantic Richfield Company v. The State of Colorado (1979)
Appeal of Standard Oil of California, California SBE (1983)
American Home Products Corp v. Ohio Tax Commissioner (1990)
Laurel Pipeline Company v. Commonwealth of Pennsylvania (1994)
Texaco-Cities Service Pipeline Co. v. IL Department of Revenue (1998)
Hoechst Celanese Corp v. Franchise Tax Board (California) (2001)

5. Unities Test

ASARCO Inc. v. Montana Department of Revenue, (1982)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

6. <u>Transactional Test</u>

Phillips Petroleum Company v. Iowa Department of Revenue and Finance (1993)
Kimberly Clark Corporation and Kimberly-Clark Worldwide, Inc. v. Alabama Department of Revenue (2012)

D. Hercules Inc. v. Illinois Department of Revenue (2001)

Hercules sold all of its stock in Himont, Inc, a 38% owned corporation that Hercules had formed in a joint venture with an Italian company to produce polypropylene. The court ruled that the stock was an investment and served no operational function even though Hercules purchased 80% of the products that Himont produced. The gain was nonbusiness income.

The following factors might be considered when a taxpayer has structured a disposition of assets or a business similar to the facts occurring in *Hercules*.

1. Identify the asset before and after the transaction forming the new entity.

2. How did taxpayer treat the income and expenses relating to the asset when it was part of the taxpayer's business?

3. How do annual reports, 10-Ks, board of directors meeting minutes, documents relating to the transaction itself, or other public information describe this portion of the taxpayer's assets or business prior to, during, or after its disposition?

4. Determine if the taxpayer engaged in similar transactions divesting other assets or businesses over the past ten to twenty years.

5. Determine if the taxpayer owns more than 50% of the newly formed entity. If so, do a unitary analysis to see if other unitary factors are present between the taxpayer and newly formed entity.

6. <u>Acquisition:</u> Obtain contracts, any binding agreements or similar documents between the taxpayer and the other entity involved in the transaction.
   * What benefits did the taxpayer receive from disposing of its assets or business into the newly formed entity?

7. <u>Management</u>: Look at the newly formed entity to determine how it was managed and operated:

   a) Were there inter-company transactions between the taxpayer and the newly formed entity?
   b) For any employees/officers who resigned their positions with the taxpayer and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

took positions with the newly formed entity, did the taxpayer continue to pay any benefits to these employees/officers?

c) Did these employees/officers of the newly formed entity retain any of their seniority/benefits they had with the taxpayer?
d) Did the taxpayer actually purchase what was now being produced by the newly formed entity? Did the taxpayer actually purchase that product from any unrelated entity?
e) Note the market conditions for that product, in the case of Hercules there was no shortage of supply.
f) Did taxpayer provide services to the new entity? If so, what was the cost of those services? Did the new entity ever actually purchase the same services from an unrelated party? If so, what was the cost of those services?

8. Disposition: Review contracts, binding agreements, and similar documents detailing the form of the disposition of the asset.

   a) How and why was the disposition structured in that manner?
   b) What were the benefits to the taxpayer as a result of the disposition?
   c) Who determined when the disposition should occur?
   d) What did taxpayer do with the proceeds?

9. Did taxpayer use the newly formed entity as a depository for working capital or use it to supply a particular need for taxpayer's business?

10. Identify taxpayer's Illinois business activities to show a relationship between the gain and the taxpayer's Illinois business activities.

11. Obtain copies of returns, audit reports, administrative decisions, etc. from other states and the IRS to determine how the taxpayer:

    a) Treated income and expenses from the asset giving rise to the gain while owned by taxpayer.
    b) Treated the gain upon disposition of the asset.

I. PURPOSE OF CHAPTER

The purpose of this chapter is to provide the auditor with the information necessary to determine the correct apportionment of business income according to the provisions of IITA § 304. Within the framework of the Due Process and Commerce Clauses and multi-state, multi-national corporate entities, Illinois relies upon the apportionment of business income and allocation of nonbusiness income to determine the fair and equitable amount of tax to be paid. This chapter concentrates on the apportionment provisions provided for under the Illinois Income Tax Act Section 304(a).

Morton International, Inc. v. Glen Bower, Illinois Circuit Court, Docket 01 L 50752, July 8, 2004,
Exelon vs the Department of Revenue, 234 Ill 2d 266 (2009).
PPG, Inc. Docket No. 1-99-2487, Appellate Court of Illinois, First District 262 Ill Dec 208, 765 NE2d 34(2nd Division) Issued: 01/29/2002

III. GENERAL INFORMATION

A. APPORTIONMENT OF INCOME

Once the correct amount of business income (as defined under IITA § 1501(a)(1)) has been determined, the next step is to apportion this business income in accordance with the provisions of IITA § 304. Special apportionment rules apply to business income of Insurance Companies, Financial Organizations (as defined under IITA §1501(a)(8)), and Transportation Companies. These rules are referenced under IITA § 304(b), 304(c), and 304(d) respectively.

- Insurance Companies are discussed in the Audit Manual Chapter 42, (new 31). Guidance for the apportionment of Insurance companies may be found in IAC § 100.3420

- Financial Organizations are discussed in the Audit Manual Chapter 41 (new 30). Guidance may be found in IAC § 100.3405 (taxable years ending on or after December 31, 2008). For the taxable years ending prior to December 31, 2008 the rules are found in IAC § 100.3400. A detailed definition of a Financial Organization may be found in IAC § 100.9710.

- Transportation Companies are discussed in the audit manual Chapter 43, (new 32).

Prior to 12/31/1998 Illinois used a three factor apportionment formula consisting of property, payroll and sales factors. Illinois phased out the property and payroll portion of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the apportionment formula during the tax years ending on or after 12/31/1998 and 12/31/1999 leaving only the sales factor for years ending on or after 12/31/2000. Information regarding the apportionment formula prior to the years ending 12/31/2000 is located in the exhibits and historical extracts section at the end of the chapter.

Note: While Illinois uses only the sales factor for years ending on or after12/31/2000 the terminology “three factor” and “single factor” is still used by the Department to describe the treatment of apportionment under IITA § 304 Companies meeting the criteria to apportion under IITA § 304(a) are still referred to as three factor companies whereas the term single factor filers is used in referencing insurance companies (IITA § 304(b)), financial organizations (IITA §304(c)), and transportation companies (IITA § 304(d)).

1. DIFFERENCES IN COMPUTING THE APPORTIONMENT

Depending on the structure of a taxpayer's business enterprise and certain filing elections made by the taxpayer, several different methods of computing the apportionment formula may result.

a) Separate Company Basis

Businesses would file an IL-1120 using the separate company formula method in the following situations:

- An unaffiliated taxpayer (i.e. a business having no subsidiaries) operating in numerous states
- A subsidiary company is determined not to be a member of a unitary business group.

EXAMPLE 1

Company A, an unaffiliated corporation, has manufacturing and sales operations in Illinois, Indiana, California, and Florida for the tax year ended December 31, 2010. Company A would file an IL-1120 whereby a portion of the income is assigned to Illinois based on the business activity in Illinois (as reflected by the Illinois percentages of sales).

EXAMPLE 2

Corporations B, C, D, and E are affiliated corporations who file a Federal consolidated 1120 for the tax year ended December 31, 2010. Corporations B, C, D, and E all have operations in Illinois, Texas, and California. After a unitary determination is performed it is determined that companies C, D, and E form a unitary business group for Illinois purposes. Company B is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

determined not to be a member of the unitary business group. Company B would file an IL-1120 whereby a portion of the income would be assigned to Illinois based on the business activity in Illinois (as reflected by the Illinois percentages of sales).

In both examples the separate company filer would apportion business income based on the sales factor using only its own business's data in computing the numerators (Illinois figures) and denominators (Everywhere figures) of each factor.

b) Separate Unitary Basis

IAC §100.5201(i) provides that non corporate taxpayers and S corporations that are members of a unitary business group are not eligible to file as a combined member with corporations or in combination with other non corporate taxpayers or S corporations. Some partnerships and all S corporations that are members of a unitary group must file separate unitary returns using Schedule UB. Specific instructions for filing may be found in the Schedule UB Instructions for both. In a separate unitary filing, the taxpayer apportions the combined business income of the unitary group to Illinois using its separate-company Illinois numerators for each factor and the combined everywhere denominators of the members of the group.

c) Combined Unitary Basis

Under the combined unitary basis, the numerator of each of the apportionment factors would be made up of all applicable Illinois activity of all members required to file an IL-1120 which are included in the combined return election. The denominator of each factor would be made up of all applicable activity of all members (i.e. those required to file IL-1120's as well as those not required to file Illinois returns and those not included in the combined return election.) Dividing the Illinois activity of all of the combined return members by the unitary business group's everywhere activity would result in the combined return apportionment factors.

C corporations are the only UBG members required to file combined returns. Individuals, S corporations, partnerships, trusts and estates may not file combined returns. Since 1987, members of a combined group may have different taxable years. See IAC § 100.5265 Common Taxable Year. If a unitary business group includes both C corporations and one or more other entities, the C corporations must file a combined return that includes the Illinois numerators of the C corporations' factors and the combined

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

business income and everywhere denominators of all members of the group, and the other members must file separate unitary returns.

Example

Companies B, C, D, and E are affiliated corporations who file a federal consolidated return for taxable year ending December 31, 2010. Corporations B, C and D all have operations in Illinois, California, and Texas. E has operations in Texas and California. A unitary determination revealed a unitary relationship exists between all four corporations. Corporations B, C, and D file a combined return.

When filing the combined return, B, C, and D compute the group's combined sales factors. In determining these factors, B, C, and D's combined Illinois sales (the numerators) are divided by the total sales everywhere (the denominators) of the unitary business group (i.e. Corporations B, C, D, and E). The results would appear on one IL-1120.

For more information regarding part-year members of a unitary group, refer to the (Computation of The Corporate Tax Liabilities) section.

d) Partnership Percentages in the Factors

When the activities of a partner (or the activities of a unitary business group including the partner) and the activities of a partnership, constitute a unitary business relationship, then the partner's share of the partnership's business income and factors shall be combined with the business income and factors of the partner or with the combined business income and factors of the unitary business group, including the partner, as the case may be.

The partner will include its percentage share of the partnership’s sales (everywhere and Illinois) with its own sales (everywhere and Illinois). The partner's share of the factors should be determined using the percentage of profits to each partner per the partnership agreement. This treatment would be consistent with the inclusion of the same percentage (of profit) in the unitary business group's income. IAC § 100.3380(d)(4).

When substantially all (more than 90%) of the interests in a unitary partnership are owned by partners who are members of the unitary group, (determined without regard to the 80-20 rule and the noncombination rule), the flow-up rule in IAC § 100.3380(d) does not apply. Instead, the partnership and the partners must file separate unitary returns. This rule must be followed for tax years beginning on or after June 30, 2008 (the effective date of the amendment adopting IAC § 100.3380(d)(4)). For prior years, taxpayers may petition to use this rule. See IAC § 100.3380(a)(2).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

For more information regarding partnership income, refer to the Partnership Chapter 28.

e) Intercompany Eliminations

Elimination of income and deduction items arising from transactions between members of the group must be done whenever necessary to avoid distortion of the group's income, the denominators used by all members of the group in calculating apportionment factors, or the numerators used by any particular member of the group in calculating its apportionment factors. REF: IAC § 100.5270(b)(1).

Note: IAC §100.5270(b)(1) is only for intercompany eliminations of income and federal deductions. Factor intercompany eliminations are made under:

- Sales factor (Three-factor): IAC § 100.3370(a)(2)(D)(ii)
- Sales between a partner and partnership: IAC § 100.3380(d)(2)(A)

Two of the most common areas of intercompany transactions, which affect the apportionment formula, involve sales and rents. Sales between members of a unitary business group filing a combined return must be eliminated. The sales should be eliminated from the company originating the sale. By doing this, the applicable amount of sales to the final non-related party would be reflected in the factor of the member making such sale outside the group.

Management fees paid by subsidiaries to their parents would be another example of potential intercompany eliminations, which can affect the sales factor computation.

2. IITA SECTION 304(f) ALTERNATIVE ALLOCATION OR APPORTIONMENT

In the event that IITA § 304(a) through (e) and (h) do not fairly represent the extent of a person’s business activity in Illinois there are the provisions found within IITA § 304(f) to offer a more fair representation. Under 304(f) the taxpayer may petition for, or the Director may require:

- separate accounting
- exclusion of any one or more factors
- inclusion of one or more factors, or;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- another method to ensure a fair and equitable allocation and apportionment of the persons income.

An IITA Section 304(f) petition for alternative apportionment or adjustment is often referred to as a "304(f) petition" or "304(f) adjustment". Further guidance for § 304(f) adjustments can be found in IAC § 100.3380 which reiterates the above and details the determination by the Director. Only the Director has the authority to grant an alternative apportionment method. The outline for making a 304(f) petition is listed in IAC § 100.3390.

The petition must be clearly labeled "Petition for Alternative Allocation or Apportionment" The petitioner must include supporting facts and information to meet the burden of proof under IAC § 100.3390 (c). If the petitions sole basis for alternative apportionment is a different percentage, it will be rejected. The petition must be sent to:

Illinois Department of Revenue
Legal Services Bureau/Income Tax
101 W. Jefferson St
Springfield, IL 62797-9001

IAC § 100.3390(e) gives guidance on the timing for filing situations regarding the IITA § 304(f) petitions. For an original return, the petition to file for an alternative apportionment method must be requested in writing 120 days prior to the due date of the return (including extensions). If the taxpayer does not allow the 120 day period for approval they must file and pay tax according to the statutorily approved method of allocation or apportionment.

A 304(f) petition may be filed as an attachment to a return amending the original return (which used the statutory apportionment methods). A taxpayer whose petition was originally rejected may also file an amended return with an attached 304(f) petition.

If a notice of deficiency ("NOD') is issued as the result of an audit, a 304(f) petition may be filed as related to the audit adjustments. However, if the NOD is not the result of an audit and the taxpayer failed to petition for a 304(f) adjustment through an original or amended return, no petition may be filed with the protest.

IAC § 100.3390(f) lists three potential outcomes in the consideration of a petition. The Director will issue a letter ruling advising the taxpayer whether the petition has been determined to be one of the following:

- **Acceptance** of the alternative apportionment formula.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- **Partially accepted** - the Director has established that relief is warranted, but disagrees with the proposed method. The taxpayer can then submit a modified formula or protest the Director's rejection and request an administrative hearing

- **Rejected** -the petition is entirely rejected, the Director will state the reasons for the rejection.

If the taxpayer has filed the petition according to the procedures, a denial is not the final administrative decision. The denial may be protested in administrative hearing on appeal. A detailed discussion to the appeal process, bifurcated administrative hearings, and the Directors decision can be found in IAC §100.3900 (g)-(i).

B. ALLOCATION OF INCOME

Once taxable income has been adjusted by the addition and subtraction modifications, the proper allocation of the income must be made to determine the proper Illinois tax liability. Unless the company's base income is derived solely from Illinois (in which case 100% of its base income is taxable in Illinois) or the special allocation rules of IITA § 304(f) are in effect, this sourcing of income is accomplished either by using the allocation rules provided in IITA § 301(c) and § 303 or the apportionment rules provided in IITA § 304. In addition, income from:

1. Except in the case of a unitary partner subject to IAC § 100.3380(d), a partner allocates or apportions income passed through from partnerships in accordance with IITA § 305,

   Note: Refer to the partnership income section of Chapter 22, (28 new) for the proper treatment of unitary and nonunitary partnership income.

2. Beneficiaries allocate or apportion income passed through from estates and trusts in accordance with IITA § 306 and § 307.

Refer to Chapter 34, (28 new) for a discussion of S-Corp, Partnerships, 1040-T&E, Composite, PTE Returns and audit procedures.

Section 303 governs the allocation of nonbusiness income. The section has remained essentially the same (with the exception of the reference to the Illinois Lottery Law and the specification that the rules relate to nonresidents only) since the inception of the IITA in 1969. In subsection (a) it states that:

- any item of capital gain or loss

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- income from rents or royalties from real or tangible personal property
- interest
- dividends
- patent or copyright royalties
- Illinois Lottery prizes awarded and proceeds from sales of rights to receive prizes
- Unemployment benefits
- (minus related deductions)

To the extent such item constitutes nonbusiness income along with any related deductions shall be allocated by non residents.

The remainder of the section deals with the allocation rules of various types of nonbusiness income. Before these rules can be put into effect however, income must first be determined to be business or nonbusiness in nature.

The (Illinois Allocable Income) section discusses the allocation rules for nonbusiness income.

The (Apportionment of Income) section deals with apportionable income and the computation of the apportionment formula.

IV. APE SPECIFIC LAW APPLICATION

A. SALES FACTOR

IITA § 304(a)(3) and IAC §100.3370, § 100.3371 and § 100.3380(c) govern the sales factor. In general, the sales factor used to apportion business income is expressed as a fraction. The numerator is the total sales of a person in this State during the taxable year, and the denominator of the fraction is the total sales of the person everywhere during the taxable year.

1. SALES OF TANGIBLE PERSONAL PROPERTY – DENOMINATOR

IITA Section 1501(a)(21) defines "sales" as the gross receipts of a taxpayer not allocated under Sections 301, 302, and 303. For this reason, the sales factor can include all receipts, which are generated in the regular course of the taxpayer's trade or business. Receipts of a nonbusiness nature are never included in the sales factor.

The first step in determining what constitutes "sales" for purposes of the denominator of the sales factor for any specific taxpayer is to identify the taxpayer's trade or business. In the audit situation, this has already been

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

established during the formation of a unitary group or in the nonbusiness income examination. It is important to remember that a person may be involved in more than one trade or business. IAC § 100.3370(a) provides examples of what would constitute "sales" for taxpayers in various trades or businesses. These examples are paraphrased below.

a) Receipts Included In the Sales Factor

1. A person selling goods or products should include all gross receipts from the sales of such goods or products (including other property, which could be included in the inventory of such person). Gross receipts for this purpose means gross sales less returns and allowances but including:

    - Interest income.
    - Service charges.
    - Carrying charges.
    - Time-price differential charges which are attendant to such sales.
    - Federal and state excise taxes (including sales taxes) are included if the taxes are passed on to the buyer or included as part of the selling price of the product.

2. A person involved in cost plus fixed fee contracts should include the entire reimbursement cost, including the fee.

3. A person engaged in providing services should include the gross receipts from the performance of such services including fees, commissions and similar items.

4. A person engaged in renting real or tangible property should include the gross receipts from the rental, lease or licensing of the use of such property.

5. A person engaged in the sale, assignment or licensing of intangible personal property such as patents or copyrights should include the gross receipts from such sale, assignment or licensing.

6. A person who sells tangible property (including real estate) and equipment used in the business should include the gross receipts from such sales, unless the sale is excluded as an occasional sale under IAC § 100.3380(c)(2). See the Special Rules section below.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

b) Receipts Excluded From the Sales Factor

- Occasional sales of assets (tangible or intangible) Ref: IAC § 100.3380(c)(2)

- Gross receipts that are excluded or deducted in the computation of federal taxable income or federal adjusted gross income that are not added back in the computation of Illinois base income. This includes the Extraterritorial Income Exclusion on federal Form 8873. See discussion in Exhibit and Historical Extracts section at the end of the chapter. Ref: IAC § 100.3370(a)(2)(B)

- Intercompany sales between members of a unitary business group. Ref: IAC § 100.5270(b)(1)

c) Occasional Sales of Assets

Gross receipts arising from incidental or occasional sales of assets used in the regular course of a taxpayer's trade or business are **entirely excluded** from the sales factor. IAC § 100.3380(c)(2)). This can include the sale of an entire division or product line since its inclusion in the sales factor would also materially affect the amount of income apportioned to Illinois (IAC § 100.3380(c)(2)). This regulation can also apply to a large, one-time sale of business intangibles such as stock or goodwill.

The key in determining whether or not this special rule applies is to determine if the receipts from asset sales are derived from the regular or routine disposition of assets. For example, if a large manufacturing concern owns its own fleet of delivery trucks, and replaces them on a regular replacement program, then the receipts were derived from the regular or routine disposition of assets. These receipts are included in the sales factor.

If, however, the manufacturing concern decided to make its business smaller and more economical by making a onetime reduction of 50% of its truck fleet, the receipts generated from this transaction would be excluded from the sales factor if the amounts were extraordinary. In this situation, a 50% truck disposition would not be considered regular or routine, and the inclusion in the sales factor of the gross receipts from the sale of those trucks could distort the factor.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example
A major oil company sells an entire operating division that manufacturers special packaging products for the food industry for $1.3 Billion. Of this amount $900 Million is for real and tangible assets, $400 Million is from intangible assets including goodwill. The entire $1.3 Billion in proceeds is excluded from the sales factor under IAC § 100.3380(c)(2).

Note: IAC § 100.3380(c) specifically refers to the sales factor in IITA § 304(a)(3). Therefore it would not apply to other subsections in Section 304 such as 304(c) which is financial organizations.

d) Intercompany Sales-Eliminations

Elimination of income and deduction items arising from transactions between members of the group must be done whenever necessary to avoid distortion of the group's income, the denominators used by all members of the group in calculating apportionment factors, or the numerators used by any particular member of the group in calculating its apportionment factors. REF: IAC § 100.5270(b)(1).

In addition, IAC § 100.3370(a)(2)(D)(ii) states under receipts that are excluded from the sales factor that the gross receipts from intercompany transactions between two corporate members of a federal consolidated group, which income is deferred under Treas. Reg. § 1.1502-13 will be included in the sales factor of the recipient, unless;

- these are subtracted under a provision of IITA § 203, or;
- eliminated in combination of the two corporations as members of a unitary business group.

Intercompany sales are not included in the sales factor because the federal taxable income from the transaction is deferred until such time as the receipts leave the group. Two of the most common areas of intercompany transactions, which affect the apportionment formula, involve sales and rents. Sales between members of a unitary business group filing a combined return must be eliminated. The sales should be eliminated from the company originating the sale. By doing this, the applicable amount of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

sales to the final non-related party would be reflected in the factor of the member making such sale outside the group.

Management fees paid by subsidiaries to their parents would be another example of potential intercompany eliminations, which can affect the sales factor computation.

Sales eliminations between a partner and partnership are under IAC § 100.3380(d)(2)(A). This was amended effective for tax years beginning on or after June 30, 2008 (calendar year 2009). Under this section:

- The partner's distributive share of the business income, and apportionment factors of the partnership shall be included in the partners business income and apportionment factors.
- The partnership's income will be determined by including transactions between the unitary partner, or members of its unitary business group and the partnership.
- All transactions between the unitary business group and the partnership shall be eliminated for purposes of computing the apportionment factors of the partner and of any other member of the unitary business group.

EXAMPLE

Partner and Partnership are engaged in a unitary business. Partner owns a 20% Interest in Partnership. Partnership has $10,000,000 in sales everywhere $3,000,000 of which is to the Partner. Illinois sales are $4,000,000 of which $1,000,000 are to Partner. In computing its apportionment factor, Partner will include $1,400,000 from Partnership in its everywhere sales ((10,000,000 – 3,000,000) x 20%) and $600,000 from Partnership in its Illinois sales (($4,000,000 – 1,000,000) x 20%).

EXAMPLE

Partner owns 50% of a unitary partnership. Partner makes $1,000,000 in sales to the partnership which would be included in Partner's IL-1120 sales factor. Since 100% of the sales made to the unitary partnership are included in sales on the IL-1120, 100% of the sales are eliminated and not 50%.

Under IAC § 100.3380(d), sales eliminations are allowed on any intercompany sales that would be included in the sales numerator or

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

denominator of a unitary filer. Prior to tax years ending June 30, 2008 there were no sales eliminations between a unitary partner and a partnership, or vice versa. If the partner did eliminate intercompany sales between the partnership and unitary partner prior to the effective date, then that elimination will be allowed for all years. If the taxpayer did not eliminate sales, but now wants to apply the revised regulation retroactively, then the taxpayer must give the auditor an amended return and petition for alternative apportionment under IITA § 304(f).

Once the proper amount of sales has been determined for purposes of the denominator of the sales factor, the sales must then be allocated to the appropriate state for purposes of the numerator of the sales factor. IAC § 100.3370(c) provides the general allocation rules. The following discussion is based primarily on that regulatory section.

e) EXTRATERRITORIAL INCOME EXCLUSION (See Exhibit and Historical Extracts Section)

2. SALES OF TANGIBLE PERSONAL PROPERTY IN ILLINOIS

The allocation of sales of tangible personal property (other than to the U.S. government) is governed by IITA § 304(a)(3)(B). These sales are in Illinois if:

- The property is delivered or shipped to a purchaser within Illinois regardless of the F.O.B. point or other conditions of the sale and the seller is taxable in Illinois
(the destination rule), OR

- The property is shipped from an office, store, warehouse, factory, or other place of storage in Illinois and the seller is not taxable in the state of the purchaser (the throwback rule).

a) The Destination Rule

The first part of the above allocation rule is known as the destination rule. Property delivered or shipped to a purchaser within Illinois is assigned to Illinois, even though the property is ordered from without this state. Property is delivered or shipped to a purchaser within Illinois if the shipment terminates here, even though the property is later transferred by the purchaser to another state.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note: See Section below on Dock Sales.

The term "purchaser within Illinois" includes the ultimate recipient of the property if the seller, at the designation of the purchaser delivers or ships the property directly to the ultimate recipient, a customer of the purchaser, in Illinois [i.e. third-party drop shipment].

When the property being shipped by a seller to a purchaser in another state is diverted, while en route, to a recipient in Illinois, the sale is in Illinois.

An exception to the destination rule is in effect for sales to the United States Government. These sales are allocated to Illinois if the property is shipped from an office, store, warehouse, factory, or other place of storage in Illinois to the U.S. Government within or without Illinois. Only sales for which the U.S. Government makes direct payment to the seller pursuant to the terms of its contract constitute sales to the U.S. Government. Thus, as a general rule, sales by subcontractors to a prime contractor (the prime contractor being the party of the contract with the U.S. Government) do not constitute sales to the U.S. Government. REF: IAC § 100.3370(c)(2).

The destination rule may be illustrated by the following examples:

Example 1
"A" with inventory in Iowa sells $100,000 of its products to a purchaser having branch stores in several states including Illinois. The order for the purchase is placed by the purchaser's central purchasing department located in New York. $25,000 of the purchase is shipped directly by rail car to the purchaser's branch store in Illinois. The balance of the purchase ($75,000) is shipped directly to the purchaser's branch stores in other states. The branch store in Illinois is the "purchaser within Illinois" with respect to $25,000 of the $100,000 sale.

Example 2
The facts remain the same as in Example 1 except that the purchaser maintains a central warehouse in Illinois, which receives all merchandise purchased for branch stores located in the Midwest. The entire $100,000 order is shipped to this Illinois warehouse from which the purchaser reships $75,000 of the goods to branch stores in other states. The entire $100,000 sale is in Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example 3

"B" sells merchandise to a purchaser in Indiana. Pursuant to the purchaser's instructions, "B" ships the merchandise directly to the purchaser's customer in Illinois. The sale by "B" is in Illinois.

Example 4

"C", a produce grower in California, begins shipment of perishable produce to a purchaser in New York. Due to delay in shipment, it becomes necessary for the purchaser to divert the shipment to its produce warehouse in Illinois. The sale is in Illinois.

Example 5

"E" contracts with the General Services Administration to deliver a number of trucks, which are paid for by the U.S. Government. The sale is an Illinois sale only if the trucks are purchased from a place of storage in Illinois since the government directly paid for the trucks.

Example 6

"F" contracts with the National Aeronautics and Space Administration to build a rocket.
"G", a subcontractor builds a component of the rocket and delivers the component to "F" in Florida. The component is shipped from Illinois. The sale is not a sale to the U.S. Government even though the component becomes part of a rocket paid for by the government. Thus, whether the sale is an Illinois sale or a Florida sale depends on whether "G" is taxable in Florida (i.e. The Throwback Rule).

b) Dock Sales

“Dock sales” are transactions in which an out-of-state purchaser picks up the seller's products at the seller's shipping dock for delivery to the purchaser's location outside the state. Either the customer picks up the products in their own vehicles, or contracts for delivery by common carrier. In these cases the sales are consummated when the goods are picked up at the seller's dock.

IITA § 304(a)(3)(B)(i) provides that sales of tangible personal property are in Illinois if the property is delivered or shipped to a purchaser, other than

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

the U.S. government, within this State, regardless of the f.o.b. point or other conditions of sale. Ref IAC § 100.3370(c)(1).
Therefore, even though a taxpayer's customer may receive physical possession of the property outside Illinois, a sale may nonetheless constitute an Illinois sale where the destination of the property sold is Illinois. Ref: IT 03-0034-GIL

Example
ABC manufactures various products, consisting of tangible personal property. ABC manufactures its products in six states, including California, Georgia, North Carolina, Ohio, Texas, and Wisconsin. ABC's products are shipped from its manufacturing facilities in these states to unaffiliated, third party distributors located in Illinois and other states. There are three methods of shipment or delivery of the products to the distributor's Illinois facilities:

1. The Illinois distributor picks-up the products from the ABC manufacturing facility in one of the six states and transports the products in the distributor's vehicles to the distributor's Illinois facilities.

2. The Illinois distributor arranges with common or contract carriers to pick-up the products from the ABC manufacturing facility in one of the six states and deliver the products to the distributor's Illinois facilities.

3. ABC arranges with common or contract carriers for shipment of the products to the distributor's Illinois facilities.

In all three cases above the sale should be allocated to Illinois, provided that ABC has nexus with Illinois.

Even if 100% of the sales of tangible, personal property have been allocated by the taxpayer to some state, the auditor **must verify** the taxpayer's apportionment workpapers as to the Illinois destination amount. The auditor will need to question the taxpayer's method of accounting for dock sales, especially in cases where the cost of delivery of the goods may be substantial. The taxpayer could easily be confused as to which state the sale should be allocated to if the purchaser contracts for delivery.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor may want to spot-check some sales invoices or purchase orders to check for customer pickups, and then trace those sales to the sales journal. If the taxpayer is not accounting for dock sales properly, and it is impossible to determine from examination of the taxpayer's sales ledgers what the correct amount of Illinois sales are, then the auditor will need to contact CAA to determine an appropriate method of test checking the taxpayer's sales.

Note: If customer pickups are occurring but are undocumented these may be referred to the sales tax audit area for further review of any sales taxes owed.

c) The Throwback Rule

The second part of the allocation rule of IITA § 304(a)(3)(B) is known as the throwback rule. A sale of tangible personal property is assigned to Illinois if the merchandise is shipped from any place of storage in Illinois, and the seller is not taxable in the state of destination. The length of time that merchandise is stored in Illinois is irrelevant when determining whether or not a sale should be "thrown back" to Illinois. Even "temporary" storage would constitute the point of origin for a sale. REF: Sunshine Letter IT93-0152.

Throwbacks apply only to sales of tangible personal property. There are no throwbacks for sales of services.

Note: However, IITA § 304(a)(3)(C-5)(iv) does contain a "throw out" provision for the sales of service which is discussed later in the sales of service section.

IITA § 304(a)(3)(B) states that sales of tangible personal property are in this State if:

- it is shipped from an office, store, warehouse, factory or other place of storage in this State and either of the following:
- it is purchased by the United States Government; or
- the person is not taxable in the state of the purchaser (and shipped from this State)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(1) Taxability in Other State

IITA § 303(f)(1)/ IAC § 100.3200(a)(1)(A)

IITA § 303(f) determines the "taxability in another state" for purposes of allocating nonbusiness income. IAC § 100.3200 adopts the principles of this statute for purposes of the throwback rule. It states that a taxpayer is taxable in another state (including a foreign country) if:

- IAC § 100.3200(a)(1)(A) In that state the taxpayer is subject to a net income tax, a franchise tax measured by net income, a franchise tax for the privilege of doing business, or a corporate stock tax; or

- IAC §100.3200(a)(1)(B) That state has jurisdiction to subject the taxpayer to a net income tax regardless of whether, in fact, the state does or does not.

(a) Franchise Tax and Corporate Stock Tax

The taxpayer can avoid sales throwback to a particular state if subject to one of the taxes in IAC § 100.3200(a)(1)(A) including:

- a franchise tax measured by net income,
- a franchise tax for the privilege of doing business, and
- a corporate stock tax.

IAC § 100.3200(a)(2) states that the taxpayer has to be "subject to such tax by reason of income-producing activities" in that state or country. Although nexus under P.L. 86-272 is not required in order to be subject to a franchise tax or a corporate stock tax, nevertheless the taxpayer has to have some business activities in the state (or foreign country) in order to be subject to the franchise tax or corporate stock tax.

Consequently, a corporation which pays a minimum franchise tax in order to qualify for the privilege of doing business in a state is not considered to be taxable in that state if the minimum tax bears no relation to the corporation's activities with such state. However, if the franchise tax is anything more than a "minimum"

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

tax, a taxpayer who is subject to the tax and pays it would be considered to be taxable in that state.

A taxpayer that claims to be taxable in a state based on the IITA § 303(f)(1)/ IAC § 100.3200(a)(1)(A) requirements must establish not only that under the laws of that state the taxpayer is subject to one of the specified taxes, but also that the tax is PAID. If the taxpayer is subject to the tax but does not, in fact, pay it, the taxpayer is not considered to be “taxable in the other state.” If, on the other hand, the taxpayer is not subject to any of the taxes in a certain state but establishes that his activities in that state are sufficient to subject to a net income tax if the state had enacted such a tax, the taxpayer is considered taxable in the other state under IITA § 303(f)(2).

Illinois is one of the few states that require a person to not only be subject to a tax based on income in a destination state but also to file a return if that state has imposed such a tax. Most other states’ regulations and the MTC model regulation provide that failure to file a return with another state merely creates a presumption that the taxpayer is not taxable in that state. The Illinois rule was upheld in Dover Corp. v. Dept. of Revenue, 271 Ill.App.3d700 (1995).

(2) Examples of Non-Income Taxes Under IITA § 303(f)(1) & IAC § 100.3200(a)(1)(A)

(a) State of Texas

Effective January 1, 2008

Texas franchise tax is a gross income or “margin” component based tax. Taxable “margin” means either 100% of gross receipts, minus either costs of goods sold or employee compensation paid by the taxpayer, or 70% of gross receipts. This new component will not be subject to Public Law 86-272. Consequently, starting in 2008 if the taxpayer is paying any kind of a tax measured by the amount of business activities in Texas, the taxpayer will be taxable in Texas under Section 100.3200.

Between January 1, 1992 and December 31, 2007, Texas imposed a franchise tax on entities doing business in the state. Schedule A of the Texas Franchise Tax return, was a tax on the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

measurement of the taxpayer's capital apportioned by the percentage of gross receipts in Texas. This portion of the tax fell under IAC §100.3200(a)(1)(A), which included the franchise tax and corporate stock tax. Consequently, if the taxpayer reported business activity in the State of Texas and paid more than the minimum tax, the taxpayer would be taxable in Texas.

The second component of the pre-2007 Texas Franchise tax was a tax on "earned surplus," and is an income tax covered by Public Law 86-272.

(b) State of Washington

The State of Washington imposes the State Business and Occupation Tax upon several specific businesses. This tax is calculated upon gross income, and is based upon the proportion of business activity conducted in the state.

Therefore, sales made by taxpayers subject to this tax cannot be thrown back to Illinois, since it meets the requirements of IAC § 100.3200(a)(1)(A).

(3) Tax Based On Net Income

IITA § 303(f)(2)/IAC § 100.3200(a)(1)(B)

Under this provision, a taxpayer is subject to tax by a state even if it does not file a return or pay any tax to that state if the other state could impose an income tax on the taxpayer, but does not. If the taxpayer claims it is subject to a tax based on net income in a foreign state or country, then it has to have nexus by reason of P.L. 86-272. IAC §100.3200(a)(2)(B) provides the following:

- In the case of any state (with the exception of a foreign political entity), the Constitution, statutes and treaties of the United States are the deciding factors in whether a state has the jurisdiction to levy tax on a taxpayer.

- A state doesn't have jurisdiction to impose a tax if Public Law 86-272 prohibits the states taxing authority. (Additional Reference: IAC § 100.9720 Nexus, and Chapter 36 of Audit Manual, (new 23)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IAC § 100.3200(a)(2)(C) states that in the case of any foreign country or a political subdivision thereof:

- The determination of whether a state has jurisdiction to subject the taxpayer to a net income tax will be determined as if the foreign country or division of foreign country were a state of the United States or political subdivision of a U.S. state.

- A person who is not required to pay a net income tax by a foreign country as the result of a treaty exempting certain persons or business activities or sources of income is not subject to net income tax in that jurisdiction.

While IAC §100.3200(a)(1)(B) provides that the taxpayer is considered taxable in another state if that state has jurisdiction to tax but does not tax. IAC § 100.3200(a)(2)(D) provides guidance on when that state or country imposes a tax on net income and the person can show a specific provision which exempts the taxpayer from taxation in that state. A person is not subject to tax in another state or in a foreign country if that state's or country's constitution, statutes or regulations, or a holding of that county or state's courts, exempts that person from taxation even though that person could be subject to a net income tax under the US Constitution, statutes and treaties.

In the event a sale is made by a taxpayer to a state where nexus is established, but returns are not required to be filed, the sale is not subject to reversionary treatment. A destination state, such as Nevada may have the jurisdiction to tax, but because it currently chooses not to exercise the jurisdiction does not provide justification for the state of Illinois to include the sale in the numerator of the Illinois sales factor.

Currently four states do not impose a corporate tax based on net income: Nevada, South Dakota, Washington State, and Wyoming. Ref: Federation of Tax Administrators-January 2013

IAC § 100.9720(f) discusses the application of the Joyce Rule. For more information regarding the Joyce rule, the Finnigan case from California, and the Dover Corporation case, refer to the (Unitary Business Groups) section and audit manual court cases chapter 37 (new 49).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The following are some examples of the throwback rule:

Example 1
A corporation, although subject to the provisions of the net income tax statute imposed by State X, has never filed income tax returns in that jurisdiction and has never paid income tax to X. For purposes of allocation and apportionment of A's income, A is not considered taxable in State X because it does not meet either of the tests contained in IAC § 100.3200(a).

Example 2
"D" has its headquarters and factory located in Pennsylvania. It maintains a branch office and warehouse in Illinois. Its only activity in Indiana is the solicitation of orders by a resident salesman. All orders by the salesman in Indiana are sent to the branch office in Illinois for approval and are filled by inventory located in Illinois. "D" is not taxable in Indiana because Indiana does not have the jurisdiction to subject "D" to a net income tax by virtue of Public Law 86-272. Therefore all sales of merchandise to purchasers in Indiana from the Illinois warehouse are Illinois sales.

Example 3
Corporation A has a warehouse in Illinois. "A" has no nexus in the state of Michigan. "A" ships $100,000 of merchandise from its Illinois warehouse to a customer located in Michigan. Since "A" is not taxable in Michigan, destination cannot be used as a basis for assigning sales. The $100,000 sale is reverted or "thrown back" to the numerator of the Illinois' sales factor.

Example 4
Company A has taxable locations in Illinois, Indiana, and Nevada. State Income Tax returns are filed in each state except Nevada. Sales to Indiana are not subject to reversionary treatment since A is taxable in Indiana. Nevada does not impose a tax based on net income. Therefore, although no return was filed in Nevada, A is still considered "taxable in Nevada" and sales into that state would not be subject to the throwback rule.

(4) Drop Shipments

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The throwback rule also applies to transactions involving drop shipments. Drop shipments occur when the origin of the shipment is from inventory of taxpayer's supplier that is shipped by the supplier directly to the taxpayer's customer.
The Illinois Supreme Court's decision in GTE Automatic Electric v Allphin (1977) upheld the principle of including single and double throwbacks in the sales factor as it relates to direct and drop shipments, respectively. In that case the Supreme Court found that "drop shipment" sales of tangible personal property shipped by a seller's supplier from the supplier's inventory in Illinois or in a state in which the taxpayer was not taxable to a purchaser in a state in which the seller is not taxable fall squarely within the language of the IITA § 304(a)(3)(B)(ii). REF: Sunshine Letter IT90-0200. See sections on The Double Throwback Rule and The Triple Throwback Rule.

A synopsis of the GTE Automatic Electric case can be found in the old Chapter 37 (new 49).

The following example illustrates how the single throwback rule applies to drop shipments:

Corporation A is located in Illinois. Goods are shipped to A's customer by its supplier. A's customer is located in Michigan but A's supplier, and the supplier's warehouse are both located in Illinois. A is not taxable in Michigan. Under IITA § 304(a)(3)(B)(ii) the sales are included in the Illinois numerator because the taxpayer is not taxable in the state of the purchaser.

This example illustrates the single throwback rule. The "double throwback rule" applies where the supplier's warehouse is not in Illinois or in any state in which the taxpayer is taxable, so that the taxpayer is not taxable in either the origination or the destination state.

d) The Double Throwback Rule

IAC § 100.3380(c)(1) provides for the double throwback rule. A sale of tangible personal property is assigned to Illinois if the sale is made from Illinois and the seller is not taxable either in the state of origin (supplier's place of shipment) or destination (where goods were shipped to taxpayer's customer). This type of transaction is prevalent in drop shipment sales.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This section of the IAC enables the seller to classify the destination of sales by the purchaser's invoice address, without making it necessary for the seller to examine the facts as to the purchaser's reshipment or trans-shipment of the goods.

A legitimate argument could be raised to use the "ultimate destination" (i.e. ultimate market or destination state). However, this construction would introduce time consuming and burdensome complexities that would require sellers to examine into the course of goods after they are turned over to the purchaser. REF: Sunshine Letter IT88-0247.

The MJK Corporation, an Illinois based toy manufacturer, sold $100,000 of merchandise to the FUN Corporation. MJK did not have the items in stock, so it contacted its supplier, the Party Store to ship the items to FUN. The Party Store shipped the items from its New York warehouse to FUN's California assembly plant. MJK Corporation is not taxable either in California or New York. MJK's sales office is located in Illinois. Because MJK's sales office is located in Illinois, it can be said that the business activity that generated the sale was performed in Illinois. For this reason, the $100,000 sale by MJK would belong in the numerator of its sales factor as an Illinois sale.

Note: The “triple” throwback previously discussed in earlier manuals is only a continuation of the double throwback methodology. In effect there is no “triple” throwback, only double throwback.

e) Joyce Rule

IAC § 100.9720(f) gives the Department’s long-standing position of the Joyce Rule. The determination of nexus must be performed independently for each member of the unitary business group. If a member does not have sufficient contacts with Illinois to establish nexus, then that member cannot have nexus attributed to it because other affiliates in the unitary business group do have nexus. A member of the unitary business group without nexus would have zero Illinois sales for the combined apportionment factor numerator, while it’s everywhere sales would be included in the combined apportionment factor denominator.

f) Foreign Throwback Sales

(1) Sales of Tangible Personal Property for Resale to Foreign Subsidiaries

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Gross receipts are specifically excluded from the sales factor numerator if the buyer is excluded from the same unitary group per the 80/20 rule under IITA § 304(a)(3)(B)(ii). Sales of tangible personal property are not in this State if the seller or purchaser conduct 80% or more of total business activity outside of the United States, and the property is purchased for resale.

Therefore, if a taxpayer sells tangible personal property for resale to a foreign subsidiary that is at least 50% owned, and the subsidiary was excluded from the unitary group due to the 80/20 rule, those sales cannot be included in the sales factor numerator. The auditor will have to determine if the foreign subsidiary is at least 50% owned, if unitary ties exist and if the sale is for resale. Sales for use or consumption would not be excluded from the numerator.

The above restriction does not apply to sales of real property or income from intangibles such as royalties and interest.

(2) Other Foreign Sales

Sales of tangible personal property shipped to foreign destinations other than to subsidiaries that are owned more than 50%, are treated as any other non-Illinois destination sale. For throwback purposes the auditor will have to determine if the taxpayer is subject to a tax based on income in the foreign country **and** actually files and pays tax in the foreign country. In the last sentence in IAC § 100.3200(a)(2) it states that the determination of whether a foreign country or political subdivision has the jurisdiction to subject a taxpayer to a net income tax will be determined as if the foreign country or subdivision were a state of the United States.

IAC § 100.9720(c)(8)(B) further clarifies the Departments position regarding the treatment of business activities and sales involving businesses in foreign countries.

Illinois will apply the same principles of protected sales, immunity from taxation, and throwback provisions, to business activities conducted regarding foreign commerce. This will apply whether the sale is from Illinois a company in a foreign country, or if the sale originates in a foreign country and is received in Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Department's position on foreign throwback sales has been upheld in a number of court cases, including:

Beatrice Companies v. IDOR, 292 Ill. App. 3d 532; 685 N.E.2d 958; (1st Dist 1997)

PPG, Industries Inc. v. DOR, 328 O;;/ App3d 16, 765 N.E. 2d 34 (1st Dist. 2002)

However in Morton International, Inc. v. Bower, Docket 01 L 50752, (Cir. Ct. Cook County July 8, 2004), the court held that DOR cannot throw back foreign destination sales if the taxpayer is "taxable" in the foreign jurisdiction, even when the taxpayer is not taxable on those particular sales. This means that if the taxpayer paid an income tax in a foreign country, they are taxable in that country. In this situation, the auditor should confer with the audit supervisor and IT Technical Support as to whether the sales in question are subject to throwback.

Example

Corporation B, an Illinois corporation, is actively engaged in manufacturing farm equipment in Foreign Country Y. Y does not impose a franchise tax measured by net income or a corporate stock tax. It does impose a franchise tax for the privilege of doing business, but B is not subject to that tax because the income tax statute grants an exemption to corporations manufacturing farm equipment. For purposes of allocation and apportionment of B's income, B is taxable in Y. B does not meet the test of IAC Section 100.3200(a)(1)(A), but does meet the test in IAC § 100.3200(a)(1)(B) since Y has jurisdiction to impose a net income tax on B and B can show why it does not owe income tax to Y even though Y has jurisdiction. Ref: IAC § 100.3200(b).

(3) Foreign Treaties

IAC § 100.3200(a)(2)(B) determines whether a foreign country has jurisdiction to tax a "person" using the same standards used for states, and does not have jurisdiction to subject the taxpayer to a net income tax if it would be prohibited from imposing such a tax by reason of the provisions of Public Law 86-272.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IAC § 100.3200(a)(2)(C) describes the situation where a person is not required to pay net income tax by a foreign country as the result of a treaty provision exempting certain persons, business activities, or sources of income. The protections of PL 86-272 and the determination of whether a state has jurisdiction to subject the taxpayer to a net income tax, will basically afford a foreign nonresident the same protections that a state or political subdivision of the U.S. receives. However, if a treaty with the U.S. government prevents that foreign country from taxing the income, then the person is not taxable in that country and the sale is subject to throwback.

Example

XYZ Corporation is domiciled in Illinois and is a manufacturer of test equipment sold worldwide. The taxpayer claimed that sales shipped from Illinois to a number of foreign countries should not be subject to throwback because under a U.S. treaty the income was not subject to tax since there was no "permanent establishment" in the foreign country. If the foreign country lacks jurisdiction to subject the taxpayer to a tax, then taxpayer is not taxable on income in the foreign country and the sale is subject to throwback.

If no U.S. treaty exempts the income from tax, but that foreign country has no income tax or its income tax law exempts the business for activities of a taxpayer who is doing business in the country, the sale will not be subject to throwback. For that reason, IAC § 100.3200(a)(2)(D) clarifies this situation.

A person is not subject to tax in another state of foreign country if that country or state imposes a tax on net income, unless that country's or state's constitution, statutes or regulations, or courts exempt the person from taxation (and the person can show the specific provision of this exemption).

Some countries including Argentina, Costa Rica, Dominican Republic, Honduras, Lebanon, Panama, Saudi Arabia, and Taiwan impose a tax based on income, but only if the business activities pass a certain threshold. Even if they have nexus under P.L. 86-272, taxpayers don't have to file unless the threshold is passed for that country. In that case, they would not be paying tax only because that country has

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

chosen not to tax them. If this is the case, then the auditor should verify that the taxpayers are actually under the threshold, because, if they exceed it, they are not taxable in that country unless they actually file and pay.

If the taxpayer is allowed a foreign tax credit under section 901 of the IRC with respect to a withholding tax, that tax should be considered a “net income tax” for purposes of IAC § 100.3200(a)(1)(A). IAC § 100.3200(a)(2)(A) provides that a net income tax is a tax for which an individual may claim a deduction under 26 USC 164(a)(3) or for which a foreign tax credit may be claimed under 26 USC 901. However, the taxpayer must file an actual return and not just pay the withholding, unless the other country's law expressly provides that, if a taxpayer has sufficient tax withheld, it does not have to file a return.

Example
A domestic taxpayer is subject to a 10% Canadian withholding tax on a loan to a Canadian partnership controlled by the taxpayer. The partnership accrued interest due on the loan during 2001, 2002, & 2003, and in 2003 the partnership withheld 10% of the interest payment to the taxpayer as a tax and reported it on Canadian Form NR4. The withholding is considered a “net income tax” under IAC § 100.3200(a)(1)(A) if the taxpayer claimed a foreign tax credit on federal Form 1118. For throwback purposes the taxpayer is considered taxable in Canada for its 2003 taxable year, but not its 2001 and 2002 year since no tax was paid on those years.

3. COMPUTER SOFTWARE

Receipts from the sale or lease of computer software programs are included in the sales factor whether the programs are "canned" or "custom" in nature. In general, computer software is considered intangible personal property for Illinois income tax purposes. Accordingly, receipts from transactions involving computer software may be included in the numerator of the taxpayer’s sales factor as either:

a) Gross receipts from the licensing, sale, or other disposition of a copyright or similar item of intangible personal property under IITA § 304(a)(3)(B-1);

b) Gross receipts from intangible personal property under IITA § 304(a)(3)(C-5)(iii); or

c) Gross receipts from sales of service under IITA § 304(a)(3)(C-5)(iv).

For taxable years ending prior to December 31, 2008, gross receipts under categories b) and c) would be sourced under IITA § 304(a)(3)(C), which assigns gross receipts based on the income-producing activity.

In general, each transaction involving computer software must be analyzed separately in order to determine which of the above sourcing rules applies. For this purpose, the auditor may rely on federal Treasury Regulations § 1.861-18 Classification of transactions involving computer programs. Treasury Regulations § 1.861-18(b)(1) assigns a transaction involving a computer program into one or more of the following categories:

(i) A transfer of a copyright right in the computer program;
(ii) A transfer of a copy of the computer program (a copyrighted article);
(iii) The provision of services for the development or modification of the computer program;
(iv) The provision of know-how relating to computer programming techniques.

The treasury regulations then provide rules for determining the category into which a transaction is assigned. In addition, Treasury Regulations § 1.861-18(b)(2) states that any transaction consisting of more than one of the transactions described above shall be treated as separate transactions, with the appropriate category being applied to each such transaction. However, any transaction that is deminimis, taking into account the overall transaction and the surrounding facts and circumstances, is not treated as a separate transaction. The auditor may use the federal rules in order to determine which sales factor rule applies.

Transactions categorized federally by applying Treasury Regulations § 1.861-18 produce the following results for sales factor purposes:

a) The transfer of a copyright right in the computer program are assigned for sales factor purposes as gross receipts from the license, sale, or other disposition of a copyright under IITA § 304(a)(3)(B-1);

b) A transfer of a copy of a computer program is assigned for sales factor purposes as gross receipts from intangible personal property under IITA § 304(a)(3)(C-5)(iii);

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

c) The provision of services for the development or modification of a computer program are assigned for sales factor purposes as gross receipts from sales of service under IITA § 304(a)(3)(C-5)(iv);

d) The provision of know-how relating to computer programming techniques are assigned for sales factor purposes as gross receipts from the license, sale, or other disposition of a copyright under IITA § 304(a)(3)(B-1).

Treasury Regulations § 1.861-18 provide eighteen examples illustrating the categorization of transactions to various fact patterns. The auditor may consult these examples for further guidance. Four of these examples are in the Exhibits and Historical Extracts section for reference.

4. BUSINESS INTANGIBLES

This section covers the following:

- Net gains from the sale of intangibles / Interest income
- Royalties and other income from intellectual property including gains and losses from the sale of that property

It is the auditor's responsibility to obtain evidence necessary to establish whether or not the income producing activity generating the intangible income can be identified: What funds are used to invest? Who decides to invest in a particular vehicle? Who monitors the account balances? What is done when the investment becomes unproductive? If the answers to these and any other questions indicate company personnel are actively involved in the investment activity, the income producing activity can be linked to the income recipient.

Receipts from real and tangible personal property or receipts from sales of services are discussed later.

a) Net Gains From the Sale of Intangibles / Interest Income

IAC § 100.3380(c)(3), (4) and (5) deal with income from intangible personal property. If the income producing activity in respect to the income from the intangible property can be readily identified and the income is considered business income, the income should be included in the sales factor. If the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

income producing activity cannot readily be identified, the income cannot be included in the sales factor.

Note: IAC Section 100.3380 only covers three-factor filers under IITA Section 304(a). It does not cover receipts under other subsections of Section 304 including financial organizations.

Only the net gains from the sale of intangible personal property are included in the sales factor under IAC § 100.3380(c)(5). This special rule applies to sales of intangibles in the ordinary course of business, and not to "occasional sales" that are excluded entirely from the numerator and denominator of the sales factor under IAC § 100.3380(c)(2). The gross receipts' rule under IAC § 100.3370(a)(1)(E) is disregarded.

Under this special rule, losses and gains are netted, however, no amount less than zero will be included in the sales factor. For example, if a taxpayer during the year:

1. Sells intangible A at a gain of $5.00 and
2. Sells intangible B at a loss of $8.00

The amount which would be included in the sales factor due to the sale of intangibles would be $-0-.

Interest income included in Illinois base income (net of modifications) is included in the sales factor. This includes interest on state obligations excluded from federal taxable income but included on the Illinois return as an addition modification. Ref: IAC § 100.3370(a)(2)(D). Interest income allowed as an Illinois subtraction modification is excluded from the sales factor. (Ref: IAC § 100.3370(a)(2)(C)(i))

b) Sales Numerator – Interest & Gains on Intangibles

(1) Tax Years Ending On Or After December 31, 2008

(a) A Dealer of Intangible Personal Property Within the Meaning of IRC Section 475

For tax years ending on or after December 31, 2008, the Act contains a special rule for a dealer in intangible personal property within the meaning of IRC Section 475 (26 USCA 475).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Under IITA § 304(a)(3)(C-5)(iii)(a) the income or gain is received in this state if:

- the customer is an individual, trust or estate who is a resident of this State, or
- for all other customers, if the customer's commercial domicile is in this state.

Note: The customer shall be deemed to be a customer in this State if the billing address of the customer, as shown in the records of the dealer, is in this State (unless the dealer has actual knowledge of the residence or commercial domicile of a customer during a taxable year).

Section 475(c)(1) defines the term "dealer in securities" as a taxpayer that:

(A) regularly purchases securities from or sells securities to customers in the ordinary course of a trade or business; or

(B) regularly offers to enter into, assume, offset, assign or otherwise terminate positions in securities with customers in the ordinary course of a trade or business.

For this purpose, a taxpayer is a dealer with respect to an item of intangible personal property if the taxpayer is actually a dealer with respect to the item under IRC Section 475, or would be a dealer with respect to the item under IRC Section 475 if the item were a security as defined in IRC Section 475(c)(2). Taxpayers in the business of selling a certain intangible item assign gross receipts based on the location of their customers, while taxpayers not in the business of selling such item assign gross receipts based on the income-producing activity.

Note: A web-based discount membership club in CT & NY offers discounts for hundreds of third-party attractions, hotels, restaurants, etc. for which it receives

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

membership fees. The club occasionally sends employees to Illinois to sign up merchants. The member contacts the merchant directly for services. If the taxpayer meets the definition of a dealer under IRC Section 475, then the receipts are allocated to the location of the customer. If not, then the receipts are allocated under the cost of performance rule in IITA § 304(a)(3)(C-5)(iii)(b).

(b) Taxpayers Who Are Not Dealers

For calculating the Illinois sales numerator of a taxpayer who is not a dealer with respect to an intangible, IITA § 304(a)(3)(C-5)(iii)(b) provides that income from the intangible is sourced to Illinois:

- if the income-producing activity of the taxpayer is performed in this state, or;
- if the income-producing activity of the taxpayer is performed within and without this state and the greatest proportion is in Illinois compared to other states based on performance costs.

This eliminates the requirement that none of the sale is sourced to Illinois if the cost of performance in Illinois is less than 50%. The sale will be sourced to Illinois if a "greater proportion" of the cost of performance is in Illinois than any other single state. For example, if the cost of performance on a single income-producing activity is determined to be 30% Florida, 30% Indiana, and 40% Illinois, 100% of the receipt will be sourced to Illinois.

(2) Tax Years Ending Before December 31, 2008

Interest income, services charges, gain on sale of property **not** connected with sale of real estate or tangible personal property is sourced under IAC § 100.3370(c)(3), which states that sales other than sales of tangible personal property are in Illinois when:

- The sales factor includes gross receipts from transactions other than sales of tangible personal property (including transactions with the United States Government)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- These gross receipts are attributed to Illinois because the income producing activity giving rise to the receipts is performed in Illinois or;
- Regarding a particular item, its income producing activity is performed in Illinois based on costs of performance.

c) Dividend Income

IITA § 304(a)(3)(D) states the provisions for the treatment of dividend income.

- For taxable years ending on or after December 31, 1995 dividend income shall not be included in the numerator or denominator of the sales factor:
- Amounts included under Section 78 of the Internal Revenue Code, and Subpart F income as defined in Section 952 of the Internal Revenue Code are excluded from the Illinois sales factor numerator and denominator.

Prior to 1995, dividends, net of any dividend subtraction modifications, were included in the sales factor.

d) Royalty Income

For taxable years ending on or after December 31, 1999, gross receipts from the licensing, sale, or other disposition of a patent, copyright, trademark, or similar item of intangible personal property may be included in the sales factor only if the gross receipts from licenses, sales, or other disposition of such items comprise **more than 50%** of the taxpayer's total gross receipts included in gross income during the tax year and during each of the 2 immediately preceding tax years; provided that, when a taxpayer is a member of a unitary business group, such determination shall be made on the basis of the gross receipts of the entire unitary business group. This is commonly referred to as the 50% B-2 test in IITA § 304(a)(3)(B-2). If not excluded from the sales factor under the 50% B-2 test, these receipts are sourced according to IITA § 304(a)(3)(B-1).

In computing the numerator of the 50% B-2 test (B-2 receipts), gross receipts include:

- Amounts received as damages or settlements from claims of infringement.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Gross receipts from the licensing, sale, or other disposition of a patent received from a person using the patent in the production, fabrication, manufacturing or other processing of a product or from a person producing, fabricating or manufacturing a product subject to a patent.

- Gross receipts from the licensing, sale, or other disposition of a copyright received from a person engaged in printing or other publication of the material protected by the copyright. The term does not include gross receipts from publishing, broadcasting or advertising within the meaning of IAC § 100.3373.

  (SEE EXAMPLES OF THE B-2 TEST ROYALTY DETERMINATION IN ARCHIVE – EXHIBIT SECTION)

(1) Royalties – Sales Numerator

If it is determined that the B-2 receipts should be included in the sales factor under subsection B-2, Section 304(a)(3)(B-1) provides that the receipts are sourced to Illinois to the extent that the intangible personal property associated with the receipts is utilized in Illinois.

Patents are utilized in Illinois to the extent that they are employed in production, fabrication, manufacturing, or other processing in Illinois OR to the extent that a patented product is produced in Illinois. **Copyrights** are utilized in Illinois to the extent that printing or other publication originates in Illinois.

If patents or copyrights are utilized in more than one state, the receipts received by the taxpayer associated with the patents or copyrights are sourced to Illinois based on a fraction:

- The numerator of the fraction is the gross receipts of the licensee or purchaser from the utilization of the patents or copyrights within Illinois, and

- The denominator of the fraction is the total gross receipts of the licensee or purchaser from the utilization of the patents or copyrights everywhere.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Trademarks and other similar items of intangible personal property are utilized in Illinois if the commercial domicile of the licensee or purchaser is in Illinois.

If the taxpayer does not have sufficient information in its books and records, or the books and records of a person “related to the taxpayer”, to determine where an item of B-2 property is utilized by the licensee or purchaser, the gross receipts attributable to that item of property are excluded from the taxpayer’s sales factor numerator and denominator. This information may be available in, for instance, the contractual agreements relating to the intellectual property. The taxpayer may also attempt to obtain utilization information from unrelated licensees, however, we cannot demand that the taxpayer obtain such information.

If the agreement is between the taxpayer and a related person, however, we can demand to review the books and records of that related person to determine the utilization location. IRC Section 267(b) is used to determine whether a person is “related to the taxpayer” for the B-2 books and records provision. Section 267(b) recognizes many different types of relationships. The ones most commonly encountered are listed below. For more information, refer to IRC Section 267(b).

Corporations that are members of the same controlled group. A controlled group is:

- A group of corporations that are more than 50% owned, directly or indirectly, by a common parent, or
- Two or more corporations, if 5 or fewer persons who are individuals, estates or trusts own more than 50% of the stock of each corporation.
- A corporation and a partnership if the same persons own more than 50% of the stock of the corporation and more than 50% of the capital interests or profits interest of the partnership.
- An individual and a corporation if more than 50% of the value of the outstanding stock of the corporation is owned, directly or indirectly, by or for the individual.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- An S corporation and another S corporation if the same persons own more than 50% of the stock of each corporation.

- An S corporation and a C corporation if the same persons own more than 50% of the stock of each corporation.

- Members of a family. Family is defined as brothers and sisters (whether by the whole or half blood), spouse, ancestors and lineal descendants.

5. RECEIPTS FROM THE SALE OR LEASE OF REAL OR TANGIBLE PERSONAL PROPERTY

Special rules for determining when the income producing activities are performed in this State may be found in IAC § 100.3370(c)(3)(D).

IAC § 100.3370(c)(3)(D)(i) states that gross receipts from the sale, lease, rental or licensing of real property are in this State if the real property is located in this State.

IAC § 100.3370(c)(3)(D)(ii) states that:

- The principal cost of performance in a rental, leasing or licensing transaction is the depreciation or amortization of the tangible personal property, and the depreciation or amortization expense is incurred in the state in which the tangible personal property is located.

- The rental, lease, licensing or other use of tangible personal property (TPP) in this State is a separate income producing activity from the rental, lease, licensing or other use of the same property while located in another state.

- If property is within and without this State during the rental, lease or licensing period, gross receipts attributable to this State shall be measured by the ratio which the time the property was physically present or was used in this State bears to the total time or use of the property everywhere during such period.

Example

Corporation X is the owner of 10 railroad cars. During the year, the total of the days each railroad car was present in this State was 50 days. The receipts attributable to the use of each of the railroad cars in this State are a separate item of income. Total receipts attributable to this State shall be determined as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(10 x 50)/3650 x Total Receipts

Note: For tax years on or after December 31, 2008 the IAC § 100.3700(c)(3)(D)(i)&(ii) was copied into the IITA § 304(a)(3)(C-5)(i)&(ii). Whereas the IAC Section uses the term "gross receipts" in its definition, the IITA definition relies on the term "sales". Effectively they are the same.

Example
Taxpayer buys advertising space on the sides of Chicago city buses and then rents the space to advertisers. Taxpayer has no employees in the state and no other business activity in the state. Under Section 304(a)(3)(C-5)(ii) the rental payments are in Illinois to the extent that they apply to Chicago bus routes, since the buses are tangible personal property.

Example
In 2008 a taxpayer provides administrative services, maintenance and repair assistance services, and other related services to lessees of mobile property. This includes paying bills on behalf of the customer, arranging for maintenance and repairs, preparing government licenses, etc. Customers pay the taxpayer a monthly fee for this service. Since the subject matter of the administrative services performed by the taxpayer is the customer's tangible personal property, the services are received in Illinois to the extent that the property is located in Illinois. If the location of the property cannot be determined, then the sale is allocated to the location of the office of the customer from which the services are ordered. If that cannot be determined, then the sale is allocated to the customer's billing address.

6. SALES OF SERVICE

Sales of Service – TYE **before** December 31, 2008 (see Archive/Historical Extracts)

a) Sales of Service - TYE on or **After** December 31, 2008

Telecommunication services and broadcast services rules are under IITA § 304(a)(3)(B-5) & (B-7). Those rules are not covered under this section. See separate sections for telecommunications and broadcasting.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IITA § 304(a)(3)(C-5)(iv) describes the treatment of sales of service. This section is broken down into its component sentences below with further meaning of the sentence following the components in italics:

- Sales of service are in this State if the services are received in this State.

  This applies to all taxpayers-corporate, individual, partnership, trust, etc. All of them source sales of service to the state where the service is received.

- For the purposes of this section, gross receipts from the performance of services provided to a corporation, partnership, or trust may only be attributed to a state where that corporation, partnership, or trust has a fixed place of business.

  When the customer is a corporation, partnership or trust, a sale of service cannot be sourced to a state unless the customer has a fixed place of business in that state. This rule also applies to all taxpayers-corporate, individual, partnership, trust, etc. It does not apply when the customer is an individual or an estate.

- If the state where the services are received is not readily determinable or is a state where the corporation, partnership, or trust receiving the service does not have a fixed place of business, the services shall be deemed to be received at the location of the office of the customer from which the services were ordered in the regular course of the customer's trade or business.

  If there is no fixed place of business in the state where the services are received by a corporation, partnership or trust, or if the place of sale cannot be readily determined, the receipts are sourced to the customer's ordering office.

- If the ordering office cannot be determined, the services shall be deemed to be received at the office of the customer to which the services are billed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the second step would source the sales to the customer's ordering office, but that office cannot be determined, the sales are sourced to the place where the service provider sends its bill.

- If the taxpayer is not taxable in the state in which the services are received, the sale must be excluded from both the numerator and the denominator of the sales factor.

  If the taxpayer is not subject to tax in the state to which the sales are sourced under the first 3 steps, the sales are excluded from both the numerator and denominator.

Note: The only difference between individual customers and other customers is the fixed place of business rule. With the exception of the fixed place of business provision, the provisions of IITA § 304(a)(3)(C-5)(iv) for businesses and individuals are the same.

The last portion of IITA § 304(a)(3)(C-5)(iv) is the "throw out" provision of the statute. See section below on the "throw out" provisions.

Example

A taxpayer with no physical presence in Illinois operates a call center outside of Illinois to facilitate maintenance work for a variety of corporate retailers. Once a repair order is received from a retailer, the taxpayer uses its own software to locate an outside vender to provide the best service at the best price. The taxpayer arranges for the service and then bills the retailer for the cost of the service plus a markup. Prior to 2008 none of the receipts would be included in the Illinois numerator because the taxpayer has no cost of performance in Illinois. However for tax years ending on or after December 31, 2008, if the taxpayer has nexus under the U.S. Constitution, then the sale is allocated to Illinois if the customer has a fixed place of business in Illinois, which would be the location of the Illinois retailer. In the event that cannot be determined then the sale is allocated to the location of the office of the customer from which the services are ordered. If that cannot be determined, then the sale is allocated to the customer's billing address.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(1) Fixed Place of Business

Under IITA § 1501(a)(9.5) the term fixed place of business has the same meaning as that given in IRC § 864 and related Treasury Regulations. IAC § 100.3405(b)(1) further provides that a fixed place of business is a facility such as a place, site or structure through which the taxpayer operates its business; and that:

- A taxpayer does not have a fixed place of business in Illinois merely because it sporadically uses the office of a related company such as a subsidiary.
- A fixed place of business used by an agent of the taxpayer is not a fixed place of business of the taxpayer unless the agent "has the authority to negotiate and conclude contracts in the name of the taxpayer, and regularly exercises that authority." Ref: IAC § 100.3405(b)(1)(C).
- A fixed place of business used by an independent agent of the taxpayer is never a fixed place of business of the taxpayer. An independent agent means a "general commission agent, broker or other agent of an independent status acting in the ordinary course of his or her business in that capacity." Ref: IAC §100.3405(b)(1)(E).

Example

A taxpayer in Texas provides poker training to individuals via the internet. Fees received for taxable years ending on or after December 31, 2008 are included in the Illinois numerator if the customer's billing address is in Illinois. Prior to 2008 none of the receipts would be included in the Illinois numerator since there is no cost of performance in Illinois.

(2) Throw Out Provision Under 304(a)(3)(C-5)(iv)

Under IITA § 304(a)(3)(C-5)(iv), if the taxpayer is not taxable in the state in which the services are received, the sale must be excluded from both the numerator and the denominator of the sales factor.

Whether the sale can be excluded from the sales factor depends upon if the taxpayer is taxable where the services are received or not, as

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

stated in the provision above. The sale can only be thrown out of the factor if the taxpayer is not taxable where its customer receives the services that were provided. IITA § 303(f) provides guidance on what is considered taxable in another state. For purposes of allocation of income a taxpayer is taxable in another state if:

- In that state the taxpayer is subject to a net income tax, a franchise tax measured by net income, a franchise tax for the privilege of doing business or a corporate stock tax; or

- that state has jurisdiction to subject the taxpayer to a net income tax regardless of whether, in fact, the state does or does not.

In order to be "subject to tax" under the first prong, the taxpayer must actually pay a tax that is related to its income-producing activities in the state. A minimum tax for the privilege of doing business does not qualify, because it is not related to income-producing activities. If no tax is paid, the taxpayer is not subject to tax. See IAC § 100.3200(a)(2).

In contrast, under the second prong of the "taxable in another state" test, if the taxpayer has nexus, but the other state's law causes the taxpayer to have no liability, the taxpayer is subject to tax even though no tax is paid. If the taxpayer can show that it has nexus and is in **compliance** with the other state's law in not paying tax, the service income remains in the denominator.

Example

Illinois taxes services on a marketplace approach. Indiana is a cost of performance state. A multistate company provides legal services which are sold to a customer, and received in Indiana with the actual legal work being done more than 50% in Illinois. Indiana, a cost of performance state, will not assess tax. Illinois, a marketplace based state, will also not include the sales in the apportionment factor numerator but allow the sales to remain in the denominator. If the services were sold in a marketplace state and the taxpayer did not pay tax, they would **not be in compliance** with that state and the sales would be "thrown out" of the Illinois denominator.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

As of November 1, 2012 there were thirteen states which use market based sourcing rules:

Alabama, Arizona, California, Georgia, Illinois, Iowa, Maine, Maryland, Michigan, Minnesota, Oklahoma, Utah, Wisconsin.

REF: AICPA Tax Advisor, November 1, 2012.

Another situation that will cause the taxpayer to be in compliance with another state's law, while incurring no income tax liability, if sales of services can be found in the taxation of S-corporations and partnerships. Very few states actually tax S corporations on their income. With the exception of Illinois, virtually no states tax partnerships on their income.

b) Telecommunications

Under IITA § 304(a)(3)(B-5) and IAC §100.3371, sales of telecommunication, **for TYE on or after December 31, 2008**, services are allocated under six subparagraphs:

- Individual call-by-call
- Postpaid telecommunications
- Prepaid telecommunications
- Private communication services
- Ancillary services
- Receipts to access a carrier's network

(1) Individual Call-By-Call

The receipts are in Illinois if:

- The call both originates and terminates in Illinois
- The call either originates or terminates in Illinois and the service address is located in Illinois. The service address is defined as:
- The location of the telecommunications equipment to which a customer's call is charged
- If that location is unknown, then the signal's origination point

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If that is also unknown, then the location of the customer's place of primary business

(*2*) Postpaid Telecommunications

These are credit card calls and calls charged to a telephone number other than the number from which the call originated or at which the call terminated. The sale is in Illinois if the signal's origination point is in Illinois.

(*3*) Prepaid Telecommunications

This is prepaid services (such as phone cards) sold in predetermined dollar units which allows access to a network by entering an access number or authorization code. The receipts are in Illinois if the user acquired the prepaid card from a retailer in Illinois. Receipts from recharging the phone card are in Illinois if the purchaser's billing information indicates a location in Illinois.

(4) Private Communication Services

This is private lines over secure channels for purposes of voice or data transmissions such as for credit card verification and debits, computer transmission and internet. Receipts from private communication services are in Illinois if:

- The charges for each channel with a termination point in Illinois.
- The charges for the "total channel mileage between each channel termination point" are in Illinois.
- 50% of the receipts are in Illinois if either the origination point and termination point is in Illinois and the charges are separately billed for each point.
- If the receipts in the preceding example are not separately billed, the receipts are in Illinois based on a percentage determined by dividing the number of customer channel termination points in Illinois by the total number of customer channel termination points everywhere.

(5) Ancillary Services

Ancillary services are separately billed items that are incidental to the supplying of telecommunications services including: Individual call information separately stated, directory assistance, advanced call features such as, teleconferencing, caller ID and voicemail.

Receipts from ancillary services at retail are sourced to the customer's primary place of use of those services. If the service provider cannot determine the state of use, then it is sourced to the location of the purchaser.

(6) Receipts to Access a Carrier's Network and from Sales of Telecommunications Services for Resale.

These receipts are sourced to Illinois under four paragraphs:

- If 100% of the receipts are for access fees attributable to intrastate communications that originate and terminate in Illinois, then the receipts are in Illinois.
- 50% of the receipts from access fees are in Illinois if the call either originates or terminates in Illinois.
- 100% of the receipts on interstate calls are in Illinois if the customer's service address is in Illinois.
- Receipts from ancillary services provided to other telecommunication providers for resale are sourced to Illinois using "the apportionment concepts used for non-resale receipts of telecommunications services if the information is readily available to make that determination. If the information is not readily available, then the taxpayer may use any other reasonable and consistent method." Ref: IAC § 100.3371(h)(4).

For tax years ending prior to December 31, 2008

Receipts from telecommunication services for tax years ending prior to December 31, 2008 are allocated based on cost of performance. (See cost of performance section in Historical Extracts and Exhibit section at end of chapter.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

c) Publishing Industry

(1) For Tax Years Ending On Or After December 31, 2008

IITA § 304(a)(3)(C-5)(iv) provides guidance for determining where publishing services are received. This Section applies only to the gross receipts from publishing services of a taxpayer who is required to source these gross receipts under IITA§ 304(a)(3)(C-5). Specific rules regarding publishing services are found in IAC §100.3373 which lists four key definitions.

- Circulation factor
- Publication or published material
- Publishing or publishing services
- Purchaser and subscriber

The circulation factor is a ratio computed on published material containing advertising. It is expressed as in state purchasers/subscribers of published material to purchasers/ subscribers everywhere. The determination of the circulation factor can be based upon:

- o The geographic location of the purchaser/subscribers.
- o The books and records of the taxpayer
- o Rating statistic sources such as Audit Bureau of Circulations, Internet World Stats or comparable sources. The source selected should be used consistently from year to year for that purpose.

Publication or published material includes the physical or printed version of any thought or expression: a play, story, article, column, literary, commercial, educational, artistic or other written or printed work. This printed work may be in the form of a book, magazine, periodical, trade journal or any other form of printed matter including internet, but not broadcasting.

Publishing or publishing services means deriving business income from publishing, selling, licensing (excluding licensing to another person for printing/publishing licensed material) or distributing

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

newspapers, periodicals, trade journals or other published material. Publishing or publishing services does not include:

- Delivery of materials published by a third party.
- Delivery or materials by the taxpayer when billed separately

Delivery fees charged by a non publisher who merely delivers (newspaper carrier), or that are charged separately by the publisher are sourced under IAC §100.3373(b)(3)~~3370(c)(5)~~

<u>Purchaser and subscriber</u> are the resident, or business, that is the recipient of the published item. This does not include a wholesaler, retailer or other distributor of the published item.

Publishing sales within Illinois include:

- Gross receipts derived from the sale of published materials as **tangible** personal property.

- Gross receipts derived from the sale of published materials from **non tangible** personal property: property from advertising and from the sale, rental or other use of the taxpayer's customer lists for a publication or portion of publication is attributed to Illinois using the taxpayer's circulation factor. Ref IAC § 100.3373(c)

In IAC § 100.3373(d), the treatment of the sales of non tangible personal property lists the situations when the gross receipts from these sales can be included in the sales factor or thrown out, as provided for in IITA § 304(a)(3)(C-5)(iv). IAC § 100.3373(d) mirrors the previously listed throw out provisions. The gross receipts from the performance of publishing services will be attributed to a state based on if the entity providing publishing services has a fixed place of business in that state, or not. When the circulation factor is determined by a method other than the taxpayer's own books and records this does not apply.

- If it cannot be determined where the publishing services are received, or the receiving entity does not have a fixed place of business the location of the ordering office will be used. When the circulation factor is determined by a method other than the taxpayer's own books and records this does not apply.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- If the ordering office cannot be determined, the billing office will be used. When the circulation factor is determined by a method other than the taxpayer's own books and records this doesn't apply.

- If the taxpayer is not taxable in the state in which the publishing services are received, the sale must be excluded from both the numerator and the denominator of the sales factor.

(2) <u>For Tax Years Ending Prior to December 31, 2008</u>

Receipts from publishing, including advertising, are allocated based on cost of performance. Whether a specific type of revenue is classified as being received from tangible or intangible sources is important in the computation of the sales factor of the apportionment formula. If the revenues are considered intangible in nature (received as a result of the performance of services, for example), the income is assigned to the state where the income producing activity takes place. If the revenues are considered tangible in nature (received as a result of sales of tangible personal property), they are generally assigned to the state of destination of the sale.

The Illinois appellate court in New Yorker Magazine, Inc., vs. the Department of Revenue upheld the Department's position that the sale of advertising space is an integral part of the publication and sale of magazines and periodicals and that the revenues from these types of sales should, therefore, be classified as tangible in nature. The court felt that the advertising revenues were merely one part of the creation of the magazine as a whole since the magazine publisher did not perform any traditional advertising services such as creating the advertising concept or writing or designing the copy.

Because of this classification of the revenues as being tangible in nature, the income from the sale of advertising space could be assigned to Illinois based on the percentage of publication functions taking place.

Refer to Chapter 37(new 49) for a synopsis of the New Yorker Magazine case and the complete case citation.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

When auditing publishing businesses, these types of revenues and the activities surrounding them should be examined for possible classification as tangible receipts and for inclusion in the Illinois numerator of the sales factor based on the destination of the sales of the related tangible product due to the amendment of IITA § 304(a)(3)(B)(ii).

"The premises of a person who has independently contracted with the seller for the printing of newspapers, periodicals or books shall not be considered to be an office, store, warehouse, factory or other place of storage for purposes of [the sales factor]..."

This prohibits an independent printer's premises to be a point of origin for throwback sales purposes.

Advertising revenues should not, however, be considered sales of tangible personal property in every case in which sales of advertising space occurs. For instance, if the taxpayer is an advertising agency or, in addition to producing tangible personal property for sale, is also involved in creating advertising or performing other advertising services which ARE separable from the tangible property being sold, the revenues from these activities may properly be considered intangible in nature and assigned to the apportionment formula based on the location of the income producing activity.

d) Sports Team Receipts

All receipts of the sports team or organization should be included in the sales factor. Some examples of the types of receipts involved follow:

1. Gate receipts, attributed to each team in accordance with the league or association arrangement where there is a realistic division. In some cases the home team may receive 100% of the gate receipts while in other situations the visiting team may receive a portion of the gate receipts. Also some entertainers may simply receive a set fee for their services while others may receive a share of the ticket sales. Individual contracts and arrangements must be examined to determine the proper amount of receipts, which should be included in the denominator.

Gate receipts would be attributed to Illinois if the event took place in Illinois.

2. The allocation of receipts from contracts entered into for the production and broadcasting of sporting events is based on the contracts involved. Receipts for the physical production of events, which take place in Illinois, are attributed to Illinois per IAC §100.3370(c)(3)(D)(iii) . Receipts for the rights to broadcast the events and receipts from commercial advertising would be attributable to Illinois if the income-producing activity is performed in Illinois, based on cost-of-performance.

3. Receipts from player contract transactions and franchise fees. This income is considered intangible in nature, therefore they would be assigned to the state where the income-producing activity is managed and controlled.

4. Receipts from concession income, attributed to the physical location where the activity, which gave rise to such, receipts occurred.

e) Broadcast Industry

(1) Tax Years Ending on or After December 31, 2008

IITA § 304(a)(3)(B-7) applies to radio and television broadcasting (including cable and satellite broadcasting). For taxable years ending on or after December 31, 2008, the following sales are in Illinois:

- For advertising revenue from broadcasting, the customer is the advertiser and the service is received in Illinois if the commercial domicile of the advertiser is in this State.

  Example
  The XYZ Corporation operates a chain of restaurants in multiple states but has its commercial domicile in Illinois. ABC contracts with the Smith Corporation, an advertising agency, to create commercials to be aired in a number of states. Smith creates the commercials and then contracts with broadcast companies on behalf of XYZ in various states to air the commercial. The broadcasting companies will include 100% of their advertising receipts received from XYZ in their sales numerators because XYZ has its corporate headquarters in

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Illinois. It is irrelevant that Smith Corporation contracted with some non-Illinois broadcast companies or that Smith Corporation created the programming outside of Illinois.

- For fees paid to the broadcaster by the recipient (viewer or listener of the broadcast), service is received in Illinois as measured by the portion of recipients located in this state.
- For fees paid to the broadcaster by the person who provides the programming, the portion of broadcast service received by the broadcaster is in Illinois as measured by the portion of recipients located in this state utilizing the audience factor.

In this scenario, the graphic provides that the fees paid to the TV Distributors, Networks or Local Stations may come from either: Content Creation or Networks & Local Stations and are sourced based on the location of the end Consumer.

Example
In 2009 Allen Cable Company, located in Danville, Illinois, receives a $10,000 fee from Viacom to broadcast a National Geographic program. Allen's books and records indicate that 80% of its cable subscribers that are eligible to receive the cable channel that will air the show (based on the individuals' cable contract) are in Illinois. Allen Cable will include $8,000 in its Illinois sales factor (10,000 x 80%).

Note: Only the subscribers who can receive the channel count.

Example
In 2009 Jones Radio Broadcasting in Moline, Illinois received $5,000 in fees to air a syndicated radio show. The Arbitron ratings (similar to the Nielsen ratings) indicate that its audience share is split evenly between Illinois and Iowa. Jones will include $2,500 (5,000 x 50%) of the fee in its Illinois sales factor.

a) Fees, paid by the broadcaster to a network or station who provides the programming, are sourced to the business location of the broadcaster from which the broadcasting service was ordered.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In the following illustration, this is shown as the flow of fees paid by the TV Distributors to the Networks & Local Stations.

Example
John Doe is an Illinois resident and a subscriber to Jones Cable Services to provide television programming for a monthly cable fee. Mr. Doe orders a pay-per-view program and pays Jones Cable a $10 fee for providing the program. Jones includes the fee in the Illinois numerator since program is received by a customer in Illinois.

b) Fees paid by the broadcaster to a person who provides the programming that is not a network or station, are sourced according to the business location of the broadcaster from which the programming was ordered.

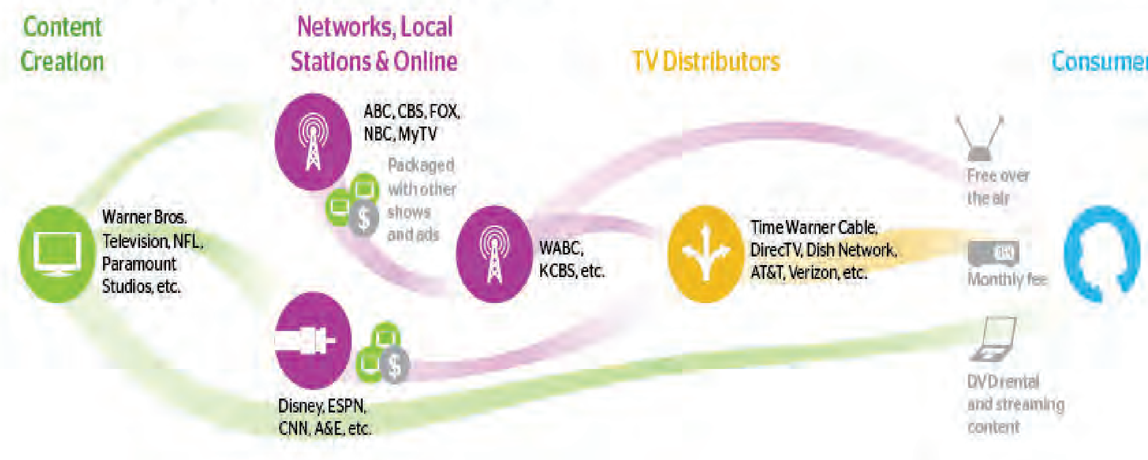
This is illustrated below as the TV Distributors paying fees to the Content Creation providers.

Time Warner Cable offers the following graphic on their website, twccommunications.com, which helps to illustrate some of the information provided in (B-7).

Example
Corp A produces syndicated television shows in New York. Corp A receives $10,000 from Corp B, a broadcaster located in Chicago, for the rights to broadcast a program. Corp B ordered the program from its Chicago offices. Corp A includes the sale in its Illinois sales numerator since the customer ordered it from an office in Illinois. It is irrelevant what Corp B does with the program. Note that if Corp A and B are in the same unitary business group, the $10,000 received by Corp A will be subject to an intercompany elimination.

Note: There is no so-called throw out rule for broadcasting services, which excludes from the sales factor sales to a state where the taxpayer is not subject to tax.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.



(2) Broadcast Industry - TYE Prior to December 31, 2008

For taxable years ending before December 31, 2008, all broadcasting receipts fall under IITA § 304(a)(3)(C) which states that sales other than sales governed by paragraph (B), sales of tangible personal property) and (B-1) Patents, copyrights, trademarks and similar items) are in this state if:

- The income-producing activity is performed in Illinois; or
- The greater percentage of income generating activity is performed in Illinois, than other states based on costs of performance.

(a) Selling Programming to Broadcast Companies

Programming revenues, including any advertising associated with the program, are based on costs of performance. Some revenues from cable companies are from the rights to broadcast the programming, but the majority of the revenues are from commercial minutes built into the shows.

The income producing activity has to be identified, which is likely to be each individual contract for programming. The majority of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the costs of performance are likely to be in the state where the show is produced.

Example 1

Company A located in New York produces a TV program which it then sells to broadcast companies throughout the U.S. In 2006 it receives $10,000 from a TV station in Illinois to broadcast the show. The income producing activity is the production of the show and the costs of performance are the direct costs in producing the show. None of the receipts can be included in the numerator of Company A since the costs of performance are in New York.

Example 2

In 2007 Company A in Chicago pays $10,000 to buy a syndicated show produced by Company B in New York, an unaffiliated company. Company A then sells the rights to the show to Company C in Gary, Indiana for $15,000 which will then be broadcast to viewers in Illinois and Indiana. Company A includes 100% of the $15,000 sale to Company C in its numerator. The costs incurred by Company B to produce the show are irrelevant since third-party costs cannot be included as direct costs in Company A's costs of performance test under IAC § 100.3370(c)(3)(A). In addition, it is irrelevant what Company C does with the program.

Example 3

The same facts in Example 2 except that Company A and Company B are members of a unitary business group. The 50% costs of performance test is applied on a unitary basis in which case the costs incurred by Company B are included in the costs of performance test of Company A, for that particular activity. In this case, greater than 50% of the costs of performance is likely to be in New York where the show is produced, and if so, then none of $15,000 in receipts would be included by Company A in its numerator.

Example 4

Company A in Ohio, with no employees or operations in Illinois, produces TV ads for various companies that want to advertise

their products. In 2007 Company A receives a contract for $100,000 from Company B in Indiana to produce a TV ad and to pay TV stations to air it. Company A sends a mobile truck and film crew to Illinois to produce the ad, and then pays a TV station in Fort Wayne, Indiana (with no viewers in Illinois) $50,000 to air the ad to viewers in Indiana and Ohio. Company A incurred $30,000 in direct costs to produce the ad with $20,000 of the direct costs incurred in Illinois and $10,000 incurred in Ohio. Company A has nexus in Illinois due to the temporary Illinois presence of the film crew. Activities of third-parties including activities of the TV station in Indiana are not income-producing activities of the taxpayer, so that the $50,000 paid to the Indiana station cannot be considered in Company A's costs of performance test. Since greater than 50% of the direct costs of producing the ad was incurred in Illinois, all of the $100,000 in receipts from Company B is included in Company A's sales numerator. It is irrelevant that the ad was never viewed in Illinois.

(b) Local Broadcast Studio – TV or Radio

This would consist of newsroom operations as well as the broadcasting of daily or weekly programs, movies, and sporting events. Revenues from operating a broadcast studio will consist generally of:

- Advertising revenue
- Monthly cable fees
- Pay-per-view

(i) Advertising Revenues

Generally, product advertisers are buying minutes based on the type of show or event since different advertising rates are involved for each show, especially as they relate to the time of day. Therefore the income producing activity is the broadcasting of ads during the various shows. The taxpayer will have to give the auditor a breakdown of the specific ad revenues and identify the specific programming when those ads were run. The auditor should contact CAA

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

to develop a statistical sample. The next step would be to identify the direct costs associated with the income producing activities chosen for the test check.

There are four possibilities for sourcing an ad receipt:

- The ad could have been run while broadcasting a program that was purchased from a unitary company.
- The ad could have been run while broadcasting a program purchased from a non-affiliated company.
- The ad could have been run while broadcasting one of its own programs produced locally, such as a local news program or local sporting event.
- The ad could have been run during a combination of the above.

If the broadcast company is unitary with companies that are providing the programming, then the unitary group's cost of producing national news stories, movies, national game shows, etc will have to be included in the costs of performance test. The auditor will have to work with the taxpayer to develop a cost figure for the shows that are produced. However the cost of the programming received from unitary companies will not include mark-up, executive officer salaries, administrative costs, rent and depreciation on those portions of the buildings not involved in production, and payments made to non-unitary companies to bounce the signal off of a satellite.

If the broadcast company is not unitary with the producer of the shows, then all payments made to those producers or suppliers will be excluded from the costs of performance test since they are for third-party activities, not activities of the taxpayer.

The ad could have been shown during the broadcast of a locally produced news show, local sporting event, or other

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

local programming. For local programming the direct costs will be:

- Wages and benefits for news reporters, camera crews, and studio workers directly involved in producing newscasts.

- Depreciation or rent expense on camera and broadcasting equipment, television vans, and other equipment used by reporters and cameramen.

- Depreciation, rent expense, and utility costs on the portion of the building used for newsroom operations and areas of the building directly involved in sending the signal to the TV viewer or cable subscriber. This would include broadcast towers and satellite dishes owned by the taxpayer.

The cost of programming paid to third parties that are not members of the unitary group along with news wire stories and other third-party payments will not be included in costs of performance. These are third-party activities under IAC § 100.3370(c)(3)(A).

If a broadcast company sends a crew to broadcast a sporting event, then greater than 50% of the costs of performance is likely to be at the location of that event. Ref: IT 88-0243.

If the ad was run during a combination of programming, then some proration will be needed.

(ii) Cable Fees and Pay-Per-View

Revenues are primarily fees paid by cable subscribers. This income also falls under the costs of performance rules. The direct cost included in the costs of performance tests include:

- Most of the direct costs determined under advertising above, except for third-party costs

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Depreciation and maintenance on cable lines
- The costs of any cable box or satellite dish that is owned by the cable company

If an Illinois cable company has 100,000 cable subscribers located in Illinois and Indiana, then there are 100,000 income producing activities. It's likely that an Illinois cable company has greater than 50% of its direct costs in Illinois, including the cable subscribers adjacent to Illinois (depending on how much cable line the company owns out-of-state). In this case 100% of the cable revenues should be allocated to Illinois, except for any one-time hook-up fees on Indiana subscribers.

The same methodology applies to a cable company in Indiana that has subscribers in Illinois. Unless that company incurs greater than 50% of the cost in Illinois on some income producing activity, then none of the receipts would be allocated to Illinois.

On a hookup fee or other separately billed service that requires a visit to the subscriber's location by a technician, greater than 50% of the direct costs associated with that income will likely be in the state where the cable subscriber is located.

Example 5
Company A is a television station in Danville, IL which serves cable subscribers in Illinois and Indiana. Company A owns the lines and cable boxes to service each subscriber and has a satellite dish in Illinois to receive the signals from producers. The income producing activity of Company A is each receipt from advertising, each monthly cable fee, and each pay-per-view receipt. In 2007 Company A receives $10,000 from Company B to run TV ads produced both locally and in New York. If Company A is not unitary Company B, then all of the $10,000 is included in Company A's sales numerator. It is irrelevant where the ads were produced since third-party costs

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

cannot be included in direct costs. If Company A is unitary with Company B, then the auditor will have to do a cost of performance test and include the direct costs of Company B in the 50% test. If the auditor determines that greater than 50% of the direct costs of both A and B are not in Illinois, then none of the $10,000 in receipts is included in the numerator.

Company A also receives $40 in monthly cable fees from each subscriber and occasionally receives $10 from subscribers for pay-per-view. The auditor determines that to service subscribers in Indiana direct costs are 70% in Illinois and 30% in Indiana (Indiana costs consist of line depreciation, line maintenance, and cable boxes). Since greater than 50% of the direct costs are in Illinois, Company A includes all of the monthly service fees in the numerator, including those from Indiana subscribers. For each $10 pay-per-view receipt, the taxpayer paid $8 for the programming. None of the $8 is included in the costs of performance test since it is an indirect expense paid to third parties. Therefore the cost of performance test is the same as for monthly subscribers.

Note: The answer is different for pay-per-view if the program were purchased from a non-Illinois unitary company as indicated in Example 6.

Example 6

Company A is a producer of television programs in New York. Company A incurs $70 million in direct costs (about 70% of its selling price) to produce a series of shows, and sells the right to broadcast the series for:

- $70 million to Company B, a wholesale distributor and a member of Company A's unitary group
- $30 million to Company D, an unaffiliated broadcast company

Company A's total sales are $100 million; however $70 million in sales are subject to an intercompany elimination

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

on sales to Company B, so it reports $30 million in sales everywhere on its Illinois Schedule UB which consists only of sales to Company D. Company A's direct cost to produce the shows is about 70% of the selling price with the remaining 30% representing markup, executive salaries and administrative costs, which are not direct costs in computing costs of performance.

Company B, located in New York is a middleman and a distributor mostly for programming produced by Company A. Of its $70 million in purchases from Company A, it sells:

- $30 million to Company C, a broadcast company located in Illinois and a member of the unitary group
- $60 million to Company E, an unaffiliated broadcast company

On the Schedule UB Company B eliminates the $30 million in sales to Company C as an intercompany elimination.

Company C is a broadcasting company in Illinois. It purchased programs from the unitary group for $30 million and also purchases $30 million in programming from non-affiliated companies. Other costs include $50 million to operate the Illinois studio, generate an air signal and to service cable subscribers. For 2007 Company C has receipts of $160 million consisting of $100M in advertising income, $50M in monthly cable fees, and $10M in pay-per-view.

<u>Analysis</u>
On programming sold by Company A and B it is irrelevant where Companies C, D, and E are located. Company A and B have no numerator since there is no Illinois costs of performance.
In this example Company C has three types of income producing activities: the receipts from each advertiser for each ad, each monthly subscriber fee, and each pay-per-view receipt. On each of the receipts the direct costs would

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

have to be greater than 50% in Illinois in order to include any of the receipts in the numerator. This will have to be determined on a test check basis. The auditor should contact CAA (Computer Assist Auditing) who will then work with the auditor to develop a statistical sample. Below are three items from the test check:

- $10,000 from Company Z, an unrelated advertising agency
- $40 from a cable subscriber in Illinois
- $10 from a pay-per-view subscriber

The majority of the direct cost for the $10,000 is likely to be the cost of the programming in which the ad was shown. If the ad was shown only during the programming purchased from Company B, then it's likely that greater than 50% of the costs of performance are in New York in which case none of the receipts would be included in the numerator. If the ad was shown while broadcasting local programming, or during programming purchased from non-affiliates, then it's likely that greater than 50% of the costs of performance are in Illinois. If the ad was run during a combination of programming, then some proration will be needed. It is irrelevant where the ad was produced or what Company Z's costs were in producing the advertisement.

The monthly cable fees will also be based on costs of performance. The direct costs for the 50% costs of performance test should be most of Company C's costs and the "direct costs" of programming purchased from Company B and Company C, since all of those costs are necessary to fulfill Company C's commitment to its subscribers. The $30M in programming paid to non-unitary third parties would not be included in the 50% test. The direct costs in Illinois for Company C's cable subscribers, less whatever direct cost are incurred in servicing non-Illinois cable subscribers (See Example 5) are as follows:

$50 million IL - Company C's direct costs

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

$21 million NY - Company A's direct costs on programming ($30M x 70%)

$ 3 million NY - Company B's selling expenses ($30M x 10%)

Note that the actual computation of costs of performance would be on each income producing activity rather than aggregate numbers above.

On the pay-per-view receipts if the $10 receipt were received while broadcasting a program purchased from Company B, then none of the $10 is included in the numerator. If the $10 is received for a show purchased from a non-affiliated company, then all of the $10 will be included in the numerator. Although payments to non-affiliates are not included in the 50% test, greater than 50% of the direct costs should still be in Illinois.

7. ELECTRIC UTILITIES

The sales and distribution of electricity have historically been treated as the sale of service. As a result of the 2009 Illinois Supreme Court case of *Exelon v Department of Revenue*, the sale of electricity has been determined to be a sale of tangible personal property.

- For taxable years beginning after July 15, 2009, sales of electricity are sales of tangible personal property sourced under IITA § 304(a)(3)(B) based on Exelon Corp. v. Department of Revenue, 234 Ill 2d 266 (2009).

As tangible personal property, the sale of electricity is considered to be in Illinois if:

- The property is delivered to a purchaser, other than the U.S. government, within this state.
- The electricity is shipped from a place within this state and the purchaser is either the U.S. government or the person is not taxable in the purchasers state.
- The sale of electricity would not be in this state if the seller and purchaser would be excluded from being in the same unitary group due to one having

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

80% or more business activity outside the U.S. and the property was for resale.

- For the taxable years ending after December 31, 2008 and prior to July 16, 2009 sales of electricity are sales of service sourced under IITA § 304(a)(3)(C-5)(iv).

Sales of service are in this State if:

- Gross receipts from the performance of services are attributed to the place the customer receives the service, unless the customer is a corporation, partnership or trust that has no fixed place of business in the state where the service is received.
- If the state of receipt is not readily determinable or the customer is a corporation, partnership or trust that does not have a fixed place of business in the state of receipt, the ordering location for these services, where the customer transacts its regular course of business will be used.
- If the ordering office cannot be determined, the services shall be deemed received at the customers billing address.
- If the taxpayer is not taxable in the state in which the services are received, the sale is excluded (thrown out) from the numerator and denominator of the sales factor.

For taxable years ending prior to December 31, 2008, sales of electricity are sales other than sales of tangible personal property sourced under IITA § 304(a)(3)(C).

a) Tax Years Ending Before December 31, 2008

Gross receipts from sales of electricity are in Illinois if the income-producing activity with respect to such sales is performed both within and without Illinois, but the greater proportion of such activity is within Illinois based on costs of performance. The income producing activities are the generation of electricity and transmission of such electricity to its consumers. Transmission costs are generally billed separately and therefore are a separate income producing activity.

If customers in Illinois are supplied electricity from generating plants both within and without, and if the greater amount of costs in operating those plants are out-of-state, then no Illinois sales would be attributed to the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Illinois customers. However if the transmission costs are greater in Illinois than outside of Illinois, then Illinois will get 100% of the transmission receipts on those customers.

This analysis requires auditors to determine where the electricity is generated, at what cost, where and how the electricity is being transmitted, and at what costs. Likewise, it must be determined how much electricity the taxpayer is producing from out-of-state power plants. Simply “purchasing” the electricity from an out-of-state plant will not add to its “cost of performance” since the generation of electricity by a third party is not an “income producing activity” of the taxpayer.

b) Sales Flow-Through From Partnerships

For a brief overview, when corporations own an interest in a general or limited partnership they receive a federal Schedule K-1 from the partnership that shows the partner’s share of various pass-through items of income, deductions and credits from the U.S. 1065. Ordinary income or loss reported on Schedule K-1, Part III, line 1 is normally included on the partner’s U.S. 1120 line for other income or other deductions as a separate item, but the other separately stated items could be combined with other figures on the U.S. 1120.

If the partnership files an IL-1065 then it must send all of its partners an Illinois Schedule K-1-P Partner’s or Shareholder’s Share of Income, Deductions, Credits, and Recapture plus a Schedule K-1-P(2) Partner’s and Shareholder’s Instructions. Step 3 of the Schedule K-1-P reports each partner’s share of nonbusiness income. Column A is for nonbusiness income everywhere and Column B is for the nonbusiness income allocable to Illinois. The determination of nonbusiness income is made at the partnership level. In Step 4 of the K-1-P the partnership reports each partner’s share of business income. Column A is the partner’s share of everywhere income from the federal K-1 and Column B are the business income amounts for each partner allocable to Illinois. Column B of the K-1-P is Column A times the partnership’s Illinois apportionment factor.

If the partnership is unitary with its partners, then the partnership is required to attach a schedule to the Schedule K-1-P showing the partner’s percentage share of sales everywhere and Illinois sales from Form 1065

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

U.S. Return of Partnership Income. The partner then includes these sales in with its own sales when completing the IL-1120. If there are intercompany sales between the partnership and partner, see section on intercompany sales.

Note: There are no flow-through sales from S corporations to its shareholders. For further discussion and guidance on the treatment of partnerships and S-corporations refer to audit manual chapter 34 (new 28).

V. EXHIBITS - HISTORICAL EXTRACTS

A. EXTRATERRITORIAL INCOME EXCLUSION

In 2000 Congress enacted IRC Section 114, which excluded extraterritorial income from gross income on the federal return and disallowed related federal deductions. Generally, the extraterritorial income exclusion applies to taxpayers with respect to transactions after September 30, 2000. The amount of the federal exclusion is calculated on Form 8873. This amount is then transferred to the U.S. 1120 and reported on the line for “Other deductions” or “Other expenses” and is identified as “Extraterritorial income exclusion from Form 8873”. Ref: Form 8873 Instructions.

The federal exclusion from gross income applies with respect to extraterritorial income, which is a taxpayer’s gross income attributable to foreign trading gross receipts. This income is eligible for the federal exclusion to the extent that it is “qualifying foreign trade income” (QFTI). QFTI is the amount of gross income that, if excluded, would result in a reduction of taxable income by the greatest of:

- 1.2% of the foreign trading gross receipts derived by the taxpayer from the transaction;
- 15% of the foreign trade income derived by the taxpayer from the transaction; or
- 30% of the foreign sale and leasing income derived by the taxpayer from the transaction.

In 2004, Congress repealed IRC Section 114, but included a phase-out provision that allowed an 80 percent exclusion of extraterritorial income for 2005 and 60 percent exclusion for 2006. The percentage exclusion is calculated on a transaction-by-transaction basis based on when the binding contract was made. Ref: Form 8873 Instructions.

How the federal exclusion is calculated for each year requires no special adjustment to Illinois base income since Illinois begins with federal taxable income. However an adjustment may be required to the sales factor, since income that is excluded from Illinois base income subject to apportionment is excluded from the sales factor under Regulation 100.3370(a)(2)(B) that states:

> "(2) The following gross receipts are not included in the sales factor."

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

(B) "Gross receipts that are excluded from or deducted in the computation of federal taxable income or federal adjusted gross income, and that are not added back in the computation of base income..."

Therefore the sales factor does not include that amount of foreign trading gross receipts that is attributable to the taxpayer's excluded qualifying foreign trade income. The amount so attributable may be determined by multiplying the taxpayer's total foreign trading gross receipts by the percentage of the taxpayer's gross income from qualifying foreign trade property excluded from gross income under IRC section 114, or by applying the percentage of the taxpayer's foreign trade income treated as qualifying foreign trade income.

The Department explained this in Compliance Alert #2008-1. It can currently be found on the website (tax.Illinois.gov) in the section under Compliance Alerts, August 2007.

The Compliance Alert provides the following example:

Assume a taxpayer has the following scenario for its 2003 taxable year:

Foreign trading gross receipts	**$1,000**
(less) allocable cost of goods sold	$600
Total extraterritorial income	$400
Other allocable expenses	$100

- The taxpayer's Section 114 exclusion is the amount of its extraterritorial income that is qualifying foreign trade income.
- The taxpayer's qualifying foreign trade income is $60 (i.e., 15 percent of foreign trade income of $45 ($400 x 15%) grossed up for disallowed deductions of $15 ($100 x 15%)).
- Accordingly, the taxpayer must exclude from the numerator and denominator of its Illinois sales factor $150 or ($1,000 × $60/$400).

Note: The example from Compliance Alert #2008-1 says to exclude the $150 from the sales numerator and denominator. The $150 would be excluded from the numerator only to the extent that those sales were originally included in the numerator.

Since the example is for the year 2003, the exclusion is not subject to the 2005 and 2006 phase-out period. For 2005 and 2006 Form 8873 is essentially the same as for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

earlier years except for line 53 at the bottom of the second page that allows amounts subject to an exclusion of 60%, 80%, or 100% based on when the sale was made. The taxpayer could list amounts subject to all three percentages. Therefore the auditor will have to reduce the sales elimination based on the percentage of extraterritorial income actually excluded.

> For example, if the taxpayer is auditing 2005 or 2006 and the normal sales exclusion based on the Alert Bulletin is $100,000, but the taxpayer has amounts on Form 8873, page 2, line 53 that allow an average 83% phase-out exclusion, then the auditor will exclude $83,000 from the sales everywhere factor.

The Department prefers that the sales factor exclusion be based upon the example in Compliance Alert 2008-1 above since that is the formula that would be used to defend the audit adjustments in administrative hearings and in the courts. The auditor will have to request the information from the taxpayer on an EDA-70 rather than rely upon the figures on Form 8873.

> Note: Federal Form 8903 has replaced Form 8873. Form 8903 is for the domestic production activities deduction, not the extraterritorial income exclusion. Although similar to Form 8873, the Department will not make any adjustments to the sales factor for Form 8903.

B. ROYALTY TEST – EXHIBITS

Example 1

Company A is determining whether to include B-2 receipts in its sales factor for 1999. In calendar year 1999, Company A reports the following amounts on its federal return –

	1999
Royalties (patents)	$20,000,000
Gains on sale of patents	
Rcpts from sale of patents	
Total B-2 receipts	$20,000,000
Total gross receipts	$700,000,000
B-2 percentage	3%

Since the B-2 receipts do not exceed total gross receipts for the current year, it is unnecessary to perform the test on one or both of the prior tax years. The $20,000,000 in royalties will be excluded from Company A's 1999 sales factor.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example 2

Company B is determining whether to include B-2 receipts in its sales factor for 1999. In calendar years 1997, 1998 and 1999, Company B reports the following amounts on its federal return –

	1997	1998	1999
Royalties (patents)	$80,000,000	$60,000,000	$20,000,000
Gains on sale of patents		$20,000,000	$22,000,000
Rcpts from sale of patents		$250,000,000	$350,000,000
Total B-2 receipts	$80,000,000	$310,000,000	$370,000,000
Total gross receipts	$500,000,000	$600,000,000	$700,000,000
B-2 percentage	16%	52%	53%

The B-2 receipts would not be included in the sales factor for 1999 because, although they exceed 50% of the total gross receipts in 1998 and 1999, they do not exceed 50% of total gross receipts for 1997.

If an entity is not in existence for either one or more of the 2 preceding tax years, the test will be applied on as many years as the taxpayer is in existence.

Example 3

Company C is determining whether to include B-2 receipts in its sales factor denominator for 1999. Company C was incorporated on January 1, 1998. In calendar years 1998 and 1999, Company C reports the following amounts on its federal return -

	1998	1999
Royalties (patents)	$60,000	$70,000
Gains on sale of patents		
Rcpts from sale of patents		
Total receipts B-2	$60,000	$70,000
Total gross receipts	$100,000	$100,000
B-2 percentage	60%	70%

Since Company C has only been in existence for the current year and the one preceding tax year, the 50% of total gross receipts test is conducted on these two years. Company C's B-2 receipts exceed its total gross receipts for the current year and the previous year, so C will include the B-2 receipts in its sales factor in 1999.

If a person is a member of a unitary business group, the test is performed using the total gross receipts of the entire unitary business group as the denominator and the B-2

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

receipts of the entire unitary business group as the numerator. Gross receipts from transactions between members of the unitary group are eliminated from both the numerator and denominator of the computation.

At times, the unitary group membership may change during the test period. If it is necessary to compare gross receipts for the preceding years, the comparison will be made using the gross receipts and B-2 receipts for the same companies that comprise the unitary group for the current year.

Example 4

In 1999, a unitary group is comprised of companies A, B, C, and D. In computing ABCD's sales factor, the B-2 gross receipts test is performed. B-2 receipts exceed 50% of total gross receipts for ABCD for 1999. Therefore, the test must also be performed on 1998.

In 1998, the unitary group is comprised of ABC and company E. Company D was an unrelated company for 1998 and was not purchased until 1/1/99. Company E was sold on 12/31/98. B-2 receipts for ABC and D will be compared to total gross receipts of ABC and D for 1998. If the B-2 receipts do not exceed 50% of gross receipts, ABCD will not include B-2 receipts in its sales factor for 1999. If the B-2 receipts exceed 50% of gross receipts for 1998, the test must be performed on 1997, again using the receipts of A, B, C, and D.

Note: PA 91-541 allowed the taxpayer to make an election to exclude B-2 receipts for tax years prior to December 31, 1999. If the election was made, the taxpayer could not receive a refund but could offset the liability from an Illinois audit or a federal RAR.

C. CATEGORIZING COMPUTER SOFTWARE EXAMPLES

Federal Treasury Regulations § 1.861-18 provide eighteen examples illustrating the categorization of transactions to various fact patterns. The auditor may consult these examples for further guidance. Four of those examples are considered below.

Example 1

(i) Facts. Corp A, a U.S. corporation, owns the copyright in a computer program, Program X. It copies Program X onto disks. The disks are placed in boxes covered with a wrapper on which is printed what is generally referred to as a shrink-wrap license. The license is stated to be perpetual. Under the license no reverse engineering, decompilation, or disassembly of the computer program is permitted. The transferee receives, first, the right to use the program on two of its own computers (for example, a

laptop and a desktop) provided that only one copy is in use at any one time, and second, the right to make one copy of the program on each machine as an essential step in the utilization of the program. The transferee is permitted by the shrink-wrap license to sell the copy so long as it destroys any other copies it has made and imposes the same terms and conditions of the license on the purchaser of its copy. These disks are made available for sale to the general public in Country Z. In return for valuable consideration, P, a Country Z resident, receives one such disk. (ii) Analysis. (A) Under paragraph (g)(1) of this section, the label license is not determinative. None of the copyright rights described in paragraph (c)(2) of this section have been transferred in this transaction. P has received a copy of the program, however, and, therefore, under paragraph (c)(1)(ii) of this section, P has acquired solely a copyrighted article. (B) Taking into account all the facts and circumstances, P is properly treated as the owner of a copyrighted article. Therefore, under paragraph (f)(2) of this section, there has been a sale of a copyrighted article rather than the grant of a lease.

Because the transaction is categorized federally as the transfer of a copy of a computer program (a copyrighted article), for sales factor purposes Corp A has gross receipts from intangible personal property under IITA Section 304(a)(3)(C-5)(iii). Under the facts of the example, Corporation A would be considered a "dealer" within the meaning of IRC Section 475. Therefore, the transaction would not be considered a sale in Illinois.

Example 8

(i) Facts. Corp A, a U.S. corporation, transfers a disk containing Program X to Corp D, a foreign corporation engaged in the manufacture and sale of personal computers in Country Z. Corp A grants D the non-exclusive right to copy program X onto the hard drive of an unlimited number of computers, which Corp D manufactures, and to distribute those copies (on the hard drive) to the public. The term of the agreement is 2 years, which is less than the remaining life of the copyright in Program X. Corp D pays Corp A an amount based on the number of copies of Program X it loads on to computers. (ii) Under paragraph (c)(2)(i) of this section, Corp D has acquired a copyright right enabling it to exploit Program X by copying it on to the hard drives of the computers it manufactures and then sells. For purposes of paragraph (b)(2) of this section, the disk containing program X is a de minimis component of the transaction. Taking into account all of the facts and circumstances, Corp D has not, however, acquired all substantial rights in the copyright to Program X (for example, the term of the agreement is less than the remaining life of the copyright). Under paragraph (f)(1) of this section, this transaction is, therefore, a license of Program X to Corp D rather than a sale and the payments made by Corp D are royalties. (The result would be the same if Corp D included with the computers it sells an archival copy of Program X on a floppy disk.)

Because the transaction is classified federally as the transfer of a copyright right in a computer program, for sales factor purposes Corp A has gross

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

receipts from the license, sale, or other disposition of a copyright under IITA Section 304(a)(3)(B-1). Assuming that more than 50% of Corp A's gross receipts are from such items, gross receipts would be assigned to Country Z, the place where D's use of the copyright originates.

Example 15

(i) Facts. Corp H, a country Z corporation, enters into a license agreement for a new computer program. Program Q is to be written by Corp A, a U.S. corporation. Corp A and Corp H agree that Corp A is writing Program Q for Corp H and that, when Program Q is completed, the copyright in Program Q will belong to Corp H. Corp H gives instructions to Corp A programmers regarding program specifications. Corp H agrees to pay Corp A a fixed monthly sum during development of the program. If Corp H is dissatisfied with the development of the program, it may cancel the contract at the end of any month. In the event of termination, Corp A will retain all payments, while any procedures, techniques or copyrightable interests will be the property of Corp H. All of the payments are labeled royalties. There is no provision in the agreement for any continuing relationship between Corp A and Corp H, such as the furnishing of updates of the program, after completion of the modification work. (ii) Analysis. Taking into account all of the facts and circumstances, Corp A is treated as providing services to Corp H. Under paragraph (d) of this Section, Corp A is treated as providing services to Corp H because Corp bears all of the risks of loss associated with the development of Program Q and is the owner of all copyright rights in Program Q. Under paragraph (g)(1) of this section, the fact that the agreement is labeled a license is not controlling (nor is the fact that Corp A receives a sum labeled a royalty).H

Because the transaction is classified federally as the provision of services for the development or modification of a computer program, for sales factor purposes Corp A has gross receipts from sales of service under IITA Section 304(a)(3)(C-5)(iv).

Example 16

(i) Facts. Corp A, a U.S. corporation, and Corp I, a Country Z corporation, agree that a development engineer employed by Corp A will travel to Country Z to provide know-how relating to certain techniques not generally known to computer programmers, which will enable Corp I to more efficiently create computer programs. These techniques represent the product of experience gained by Corp A from working on many computer programming projects, and are furnished to Corp I under nondisclosure conditions. Such information is property subject to trade secret protection. (ii) Analysis. This transaction contains the elements of know-how specified in paragraph (e) of this section. Therefore, this transaction will be treated as the provision of know-how.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Because the transaction is classified federally as the transfer of know-how, for sales factor purposes Corp A has gross receipts from the license, sale, or other disposition of a patent, copyright, trademark or similar item of intangible personal property under IITA Section 304(a)(3)(B-1). Assuming that more than 50% of Corp A's gross receipts are from such items, gross receipts from the transaction would be assigned to the commercial domicile of Corp I.

D. SALES OF SERVICE

Sales of Service - Tax years ending before December 31, 2008

For transactions other than the sale of intangible personal property and receipts from patents, copyrights and trademarks (royalties), for tax years ending before December 31, 2008 sales are in this state under IITA § 304(c)(3)(C) if:

(i) The income-producing activity is performed in this State

(ii) The income-producing activity is performed both within and without this State and a greater proportion of the income-producing activity is performed within this State than without this State, based on cost of performance.

Therefore if "a greater proportion" (over 50%) of the income producing activity occurs in Illinois, then all of the receipts will be included in the Illinois sales numerator. However, if less than 50% of the income producing activity occurs in Illinois, then none of the receipts are included in the sales numerator. Consequently all receipts from intangibles, other than from royalty income, will be allocated based on a 50% cost of performance test.

The first step in applying the 50% test is to identify the "income producing activity". Income producing activity is defined in IAC § 100.3370(c)(3)(A) and applies to each separate item of income activity directly engaged in for profit in a person's regular trade or business.

The intent of the regulation is to measure the income producing activity by each individual transaction rather than a group of transactions. See section below on Income Producing Activity.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The second step in determining the 50% test is to measure the “cost of performance”. This is defined in IAC § 100.3370(c)(3)(B).

Once the income-producing activity has been identified, the cost of performance can be measured based on the “direct costs” for that activity. Third-party costs including costs incurred by independent contracts are not direct costs. Once the direct costs have been identified, each individual sale of service must be analyzed in order to determine where the greater costs are performed. If greater than 50% of the “direct costs” are in Illinois, then 100% of the sales of service on that specific sale would be allocated to Illinois. This process can be done on a test check basis. See sections below on Income Producing Activity and Cost of Performance.

1. COST OF PERFORMANCE

For tax years ending prior to December 31, 2008 all receipts that fall under IITA § 304(a)(3) that are not receipts from the sales of tangible personal property, or receipts from patents, copyrights, and trademarks are apportioned under Section 304(a)(3)(C)(i)&(ii). That states that receipts, other than receipts governed by paragraphs (B) and (B-1), are in this State if:

(i) The income-producing activity is performed in this State; or

(ii) The income-producing activity is performed both within and without this State and a greater proportion of the income-producing activity is performed within this State than without this State, based on performance costs.

For sales of real property and rental or leasing of real or tangible personal property, the income-producing activity centers around the property, and so the receipts are sourced to the location of the property. Rental income from tangible personal property used in multiple states is prorated by time of use.

For tax years ending on or after December 31, 2008, the cost of performance test applies only to income from intangibles realized by taxpayers who are not dealers in that property. In that case, all of the receipts will be included in the Illinois sales numerator if the cost of performance in Illinois is greater than any other single state, even if the percentage is under 50%.

Example

In 2007 the taxpayer receives a contract to design a custom software package. The order is received from an office in Illinois. In order to complete the contract

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

the taxpayer incurred direct costs of performance of 40% in Illinois, 30% in Florida and 30% in Indiana. Under the provision in Section 304(a)(3)(C)(ii) a sale is included in the Illinois sales numerator only if the costs of performance within Illinois are greater than the costs of performance outside Illinois. In this example none of the receipts would be allocated to Illinois because less than 50% of the costs of performance were incurred in Illinois.

a) Income Producing Activity

IAC § 100.3370(c)(3)(A) provides the definition of what constitutes income producing activity under the IITA:

- Transactions and activity directly engaged in by the person in the regular trade or business, for the purpose of making a profit.
- It applies to each separate item of income.
- It does not include transactions and activities performed on behalf of a person like an independent contractor.

The regulation refers to **"**each separate item of income**".** The intent is to measure the income producing activity by each individual transaction rather than groups of transactions. Taxpayers will often argue that each separate item of income means each individual sales account number in their books and records thereby bringing in direct costs from all of the states that the taxpayer does business, but this was never the intent of the regulation.

Examples of income producing activities:

- Telecommunications: each individual call or data transmission
- Stock broker: individual stock transactions
- Broadcast company: each individual broadcast or cable fee receipt

b) Direct Costs

Costs of performance are defined as "direct costs" consistent with generally accepted accounting principles (GAAP), which is a set of accounting and financial reporting standards administered by the Financial Accounting Standards Board (FASB).

A "direct cost" of a service is a cost that is incurred only in the provision of a particular service, in comparison to an "indirect cost" that is incurred in support of more than one activity. A direct cost, then, is a cost that is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

incurred only in connection with one activity, and is therefore attributable entirely to that activity. The most important aspect to identifying direct vs. indirect costs is defining the activity.

Example: The labor of an employee in providing the service and materials actually consumed in providing the service are direct costs. The time spent by a company president supervising the general affairs of the business, on the other hand, even when it is attributable in part to service provided, would be an indirect cost.

Example: A stock broker/dealer operates in Chicago and New York. The income producing activity is the individual stock transactions. Direct costs are:

- Compensation to traders;
- Compensation to runners and assistants to floor traders;
- Compensation to processing clerks;
- Compensation to management and support employees for activities directly related to a sale;
- Seat Leases;
- Rent expense allocable to office space used in an activity directly related to a sale;
- Depreciation on office equipment attributable to its use in activities directly connected to a sale,
- Communication and data processing costs incurred in connection with a sale;
- Travel and airline costs for employees traveling in connection with a particular sale

(1) Costs That Do Not Qualify As Direct Costs:

- Compensation to management and support employees for activities that are not related to a particular sale are not direct costs;
- Rent expense allocable to office space used in support activities, rather than in connection with an activity directly related to a sale;
- Payments to third-party clearing brokers and floor brokers and “payments for order flow” to third-party brokers.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

c) Contracts

Some taxpayers have signed contracts to perform services over a period of years, then collect monthly payments for the services provided. The original contract will show what the different income producing activities are. The income producing activity will be determined separately for each separate sale of service. The taxpayer must have backup documentation for each contract that would show a breakdown of the estimated costs to perform that contract. The taxpayer must have some assurance before it enters into the contract that it is not going to lose money over the life of the contract. This would be the same as a construction contractor developing a bid sheet that would show the construction materials, cost of labor, rent or lease of equipment, etc. All of this backup documentation should be examined.

E. PROPERTY AND PAYROLL FACTORS

1. THE ELIMINATION OF PROPERTY AND PAYROLL 1998-2000

Prior to the tax year ending December 31, 1998, Illinois had relied upon a three factor apportionment formula of property, payroll and sales. In 1998 the Department began phasing out the property and payroll factors over a three year period, leaving a single sales factor in the third year. For tax years ending on or after December 31, 2000, only sales are used in Illinois to figure the apportionment factor.

Refer to the form instructions for each year on the Department web site and review the proper factor weighting for those tax years affected. Instructions are on the Departments web site under forms, prior years, and the specific year in question. For tax years ending December 31, 1998, and December 31, 1999 property and payroll weighting was reduced by the following:

Tax Years Ending On or After December 31, 1998 - 16 2/3% of the property factor, 16 2/3% of the payroll factor plus 66 2/3% of the sales factor. (See Example 1)

Tax Years Ending On or After December 31, 1999 - 8 1/3% of the property factor, 8 1/3% of the payroll factor plus 83 1/3% of the sales factor. (See Example 2)

Tax Years Ending On or After December 31, 2000 - 100% the sales factor.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example 1 - Tax Years Ending On or After 12/31/1998 (Public Act 90-615)

	Factors Before PA	Times %	Factors After PA
Property Factor	30.0000%	16.6667%	5.0000%
Payroll Factor	50.0000%	16.6667%	8.3333%
Sales Factor	10.0000%	66.6666%	6.6667%
Sales Factor	10.0000%	0	0.0000%
Total Factors	100.0000%		20.0000%
Divided by	4		
Apportionment Factor	25.0000%		20.0000%

Example 2 - Tax Years Ending On or After 12/31/1999 (Public Act 90-615)

	Factors Before PA	Times %	Factors After PA
Property Factor	30.0000%	8.3333%	2.5000%
Payroll Factor	50.0000%	8.3333%	4.1667%
Sales Factor	10.0000%	66.6666%	6.6667%
Sales Factor	10.0000%	0	0.0000%
Total Factors	100.0000%		20.0000%
Divided by	4		
Apportionment Factor	25.0000%		15.0000%

2. PROPERTY AND PAYROLL FACTORS IITA § 304(a) PRE 12-31-00

Auditors may need to reference these factors for information under several instances:

- In the event an audit is required on years prior to 2000.
- In the question of whether nexus may be present for a company, as reference.
- In the situation where a petition for alternative apportionment is filed under IITA Section 304(f) and an additional factor may be presented.
- In the computation of the 80/20 calculation for foreign taxpayers

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Property Factor

The property factor is addressed under IITA Section 304(a)(1) and in IAC §100.3350. There have been no amendments to the property factor provisions of the Act since 1969.

IITA § 304(a)(1) provides that the property factor used in apportioning business income is a fraction. The numerator is the average value of real and tangible personal property owned or rented and used in the trade or business of the taxpayer in Illinois during the taxable year. The denominator is the average value of all of the person's real and tangible personal property owned or rented and used in the trade or business during the taxable year.

What this fraction attempts to reflect is the percentage value that the Illinois property contributed to the earning of business income. Several words and phrases in this statutory definition should be expanded upon.

1. "Real and tangible personal property." This includes land, buildings, machinery, equipment, inventories, stocks of goods, livestock, poultry, and growing crops, as well as all other real and tangible personal property used in the production of business income. It does not include coin or currency.

2. "Used in the trade or business." In order to be included in the property factor the property in question must be used to derive business income.
   If property is used to derive both business and nonbusiness income, the components of the property relating to the generating of business income should be included in the factor while the nonbusiness income components should be excluded.

3. “Value” means the original cost of the property owned by the taxpayer, without reduction for depreciation or amortization, or, in the case of property rented by the taxpayer for use in its trade or business, 8 times the net annual rent for the property.

4. "Average value." This is normally determined by adding the values of all the aforementioned property at the beginning of the tax year and at the end of the tax year. The sum of, which is divided by two (2). However, if significant fluctuations in the value of the property exist between the beginning or ending of a tax period, monthly values should generally be analyzed and an average obtained. Additionally, if significant amounts of property are acquired or disposed of during

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

the year, then monthly values would be applied. REF: IAC §100.3350(g).

EXAMPLE 1

The beginning and ending values of property as reported on the Balance Sheet of a federal 1120 of a calendar year taxpayer in the business of operating a number of office supplies, retailer locations were as follows:

	1/1/20--	12/31/20--
Inventories	$1,000,000	$1,100,000
Land	$4,000,000	$4,000,000
Fixed Assets	$9,500,000	$9,600,000
TOTALS	$14,500,000	$14,900,000

A review of the applicable General Ledger Accounts determined that no significant fluctuations existed between the beginning and end of the year or between any given months.

The average property would be computed as follows:

$14,500,000 + $14,900,000 = $29,400,000
$29,400,000 divided by 2 = $14,700,000 = AVERAGE PROPERTY

EXAMPLE 2

The beginning and ending values of property as reported on the Balance Sheet of the Federal 1120 of a calendar year ending taxpayer operating a number of ice cream wholesalers were as follows:

	1/1/20--	12/31/20--
Inventories	$1,000,000	$1,100,000
Land	$4,000,000	$4,200,000
Fixed Assets	$9,500,000	$9,600,000
TOTALS	$14,500,000	$14,900,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A review of the Monthly Inventory Accounts of the taxpayer revealed the following information:

Jan	$1,000,000	Jul	$7,500,000
Feb	$1,010,000	Aug	$8,800,000
Mar	$1,005,000	Sep	$2,000,000
Apr	$1,100,000	Oct	$800,000
May	$4,000,000	Nov	$810,000
Jun	$6,800,000	Dec	$1,100,000
		TOTAL	$35,925,000

A review of the Land and Fixed Asset Accounts of the taxpayer did not reveal any fluctuations in the values throughout the year. Therefore the values were obtained from the balance sheet as follows:

	1/1/20--	**12/31/20--**
Land	$4,000,000	$4,200,000
Fixed Assets	$9,500,000	$9,600,000
TOTALS	$13,500,000	$13,800,000

In this situation, the average property would be computed as follows:

INVENTORIES:	$35,925,000 divided by 12 months	= $ 2,993,750
LAND & F/A	$13,500,000 + $13,800,000	= $27,300,000
	$27,300,000 divided by 2	= $13,650,000

AVERAGE INVENTORIES	= $ 2,993,750
AVERAGE LAND & F/A	= $13,650,000
AVERAGE PROPERTY	= $16,643,750

EXAMPLE 3

For illustrative purposes, assume that the facts remain the same as in EXAMPLE 2 above except that the ending balance in the fixed asset account amounted to $33,600,000. A review of the appropriate General Ledger account noted that several new production lines were purchased on April 1st.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The average property would be computed as follows:

- INVENTORIES: $35,925,000 divided by 12 months = $2,993,750

	1/1/20--	12/31/20--
• Land	$ 4,000,000	$ 4,200,000

  - AVERAGE LAND = $4,000,000 + $4,200,000 = $8,200,000
    $8,200,000 divided by 2
    = $4,100,000

FIXED ASSETS

The average Fixed Asset computation would be computed as follows:

STEP #1

	1/1/20--	12/31/20--
Fixed Assets	$9,500,000	$33,600,000

$ 9,500,000 + $33,600,000 = $43,100,000
$43,100,000 divided by 2 = $21,550,000 = SUB TOTAL

STEP #2:

A $24,000,000 purchase of assets is represented in the ending fixed asset values. Therefore, 50% of this value is taken into consideration in STEP #1 above. However, as the assets were acquired April 1st, 75.34 % of this value should be represented as follows:

Jan	**$9,500,000**	**Jul**	**$33,600,000**
Feb	$9,500,000	Aug	$33,600,000
Mar	$9,500,000	Sep	$33,600,000
Apr	$33,600,000	Oct	$33,600,000
May	$33,600,000	Nov	$33,600,000
Jun	$33,600,000	Dec	$33,600,000
		TOTAL	$330,900,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The average fixed asset value would therefore be:
$330,900,000 divided by 12 months = $27,575,000

(1) Schedule VI-A For Adjustments For Fluctuating Inventory/Assets

This schedule was used to assist auditors in the calculation of inventory when large fluctuations occurred during the course of a taxable year. Basically this was a spread sheet program. This tool was kept on the auditor's computer to create a month to month schedule in order to obtain the average value of inventory as property for the taxable year. As a general rule, this form was used if the amount of change had a 40% fluctuation (either plus or minus) during the audit period. The same information can be ascertained by creating a spread sheet to calculate the average monthly inventory for property valuation.

(2) Schedule VI-A For Fluctuating Assets

This schedule was used to assist auditors in the calculation of assets when purchases or dispositions of assets occurred during the course of a taxable year. Basically this was a spread sheet program. This tool was kept on the auditor's computer to obtain the average value of assets as property for the taxable year, to ensure that part year assets were added into the value of whole year assets.

The number of days the acquired or sold asset was held was divided by the number of days in the year multiplied by the acquisition cost of the asset. In this manner, the property value of the asset was not over or under valued. Another type of adjustment was allowed in the case an assets value fluctuated (the impairment or capitalized improvement of an asset). As with obtaining the valuation for fluctuating inventory, a spreadsheet can be created to correctly obtain the average asset value for the year.

(3) Valuation of Owned Property
