IITA § 304(a)(1)(B) and IAC § 100.3350(e)- Valuation of owned property is valued:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- at the original acquisition cost of purchase,
- without federal adjustments afterwards like depreciation, depletion, or amortization,
- by adding capital improvements to the acquisition cost, and;
- by subtracting any partial dispositions through sale, exchange or abandonment.

The use of original cost is an authoritative rule to be complied with, rather than an area of departmental discretion. The use of original cost to value property is consistent with both UDITPA and the Multistate Tax Commission. The use of original cost obviates any differences due to varying methods of depreciation, and has the advantage that the basic figure is readily ascertainable from the taxpayer's books.

(a) Cost Sources of Original Owned Property

The following are items to be considered in verifying original cost:

i. The use of the annual report & the US 1120 returns to test the denominator of the property factor are the quickest methods to use. If annual reports are not available, year-end trial balances or CPA audited balance sheets provide a satisfactory source for verifying owned property.

ii. The depreciation schedule per the US 1120 shows property at the federal tax basis. If the balance sheet amounts vary significantly from the cost as shown for depreciation purposes, the balance sheets may not be on a federal tax basis or other differences such as construction-in-progress may be included.

For more information regarding construction-in-progress refer to the (Construction-In-Progress) section.

iii. The property ledger may be used for the reconciliation or verification of the differences if material. For example, fully depreciated property may not appear on the US 1120 balance sheet however it should still be included in the property factor if it is still used in the production of business income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

iv. If the taxpayer reports its foreign subsidiaries' inventory at a different cost basis for book purposes but adjusted to the parent's basis for determining the unitary business income, the adjusted amount should be reflected in the denominator. This would only apply to foreign subsidiaries that perform in excess of 20% of their business activities within the United States and, therefore, are included in the unitary business group.

(4) Capitalized Interest

Capitalized interest payments should be included in the property factor only if it is included in the original federal income tax basis of the property or the basis of some improvement to the property.

(5) Unbilled Contract Costs on Long Term Contracts

This issue came up in an administrative hearing case on [redacted], a manufacturer of specialized communications and information systems that sold many of its products under long-term contracts. Under a fixed price contract, unbilled costs are not recoverable under the terms of the contract. These costs must be separately disclosed on the financial statements in accordance with Generally Accepted Accounting Principles (GAAP). The taxpayer claimed that these unbilled costs are much the same as inventory.

The Department held the opinion that unbilled contract costs should not be considered "inventoriable goods in process" because the expenses are deducted in the year incurred to arrive at federal taxable income. Therefore they should **not** be accumulated as inventory and therefore should be excluded from the property factor.

The Department then lost the administrative hearing decision on [redacted], when the ALJ ruled that [redacted] unbilled costs come within the definition of property to be included in the property factor". However, the Department still takes the position unbilled contract costs **should not** be included in the property factor. The Departments position is set forth below.

Although we must follow the Hearings decision, the Department is not required to include any balance in an "Unbilled Cost Account" in the property factor because its "value" for property factor purposes is $0 under IAC § 100.3350(e). IAC §100.3350(e) states that the value of

property for property factor purposes is as follows: property owned by the person shall be valued at its original costs.

- original cost is the basis of property for federal income tax purposes at the time of acquisition
- original cost does not reflect subsequent federal adjustments afterwards like depreciation, depletion, or amortization

However, original cost will include the cost at acquisition, any capital improvements and any partial dispositions through sale, exchange or abandonment.

The property that relates to the taxpayer's Unbilled Cost Account has a basis for federal income purposes at acquisition of $0 because the costs of the contract are immediately expensed for income tax purposes. As the taxpayer recognizes revenue from the contract, that recognition results in the taxpayer having a basis in the long-term contract, not the underlying property. Subsequent gain or loss is recognized on the contract.

And even if the taxpayer could be considered to have a basis at acquisition, the valuation would have to be decreased to $0 under IAC §100.3350(e)(1) because the percentage of the property completed has been disposed of for tax purposes.

The Hearings decision did not determine the valuation issue, and thus the Department may apply the regulations by valuing the Unbilled Cost Account at $0.

(6) <u>Valuation of Rented Property</u>

The inclusion of rents in the property factor is addressed under IAC § 100.3350(f).

Rented property used to generate business income is included in the property factor at 8 times the annual rental rate. The annual rental rate is generally the rent expense paid less the aggregate annual sub-rents paid by the tenants of the person.

Several words and phrases in the statutory definition should be expanded upon.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1. "Annual Rental Rate." This is the amount paid as rent for the property in a 12-month period. Where property is rented for less than a 12-month period, the rent paid for the actual period of rental shall constitute the "annual rental rate" for the period. In the case of a short year, the rent expense may be adjusted to cover a 12-month period to show a fair value of rented property. REF: IAC §100.3350(f)(2).

EXAMPLE 1

Corporation A rented property with an 8-month lease. The monthly lease payment amounted to $2,500. The annual rental rate would be computed as follows:

$2,500 multiplied by 8 months = $20,000

EXAMPLE 2

Corporation A, which ordinarily files its returns based on a calendar year, is merged into Corporation B on April 30th. The net monthly rent paid on a 5-year lease with 3 remaining years is $2,500 a month. The rent expense for the period January 1st to April 30th is $10,000. The annual rental rate would be computed as follows:

$2,500 multiplied by 12 months = $30,000

In Example 2 the monthly rent is annualized since the corporation has rented the property for a period of more than 12 months even though the current tax period covers a period of less than 12 months.

2. "Aggregate annual sub-rents paid by sub-tenants." Where a taxpayer leases property and then, in turn, sub-leases this property (or a portion of this property) to sub-tenants, the annual sub-rents received should be subtracted from the annual rent expense.

However, if these sub-rents constitute business income, due to the property, which produces these sub-rents being used in the regular course of the trade or business, then these sub-rents SHOULD NOT be subtracted from the rent expense. (IAC §100.3350(f)(1))

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXAMPLE 1

Corporation A rents a food market. A receives sub-rents from a bakery concession in the food market. Since the sub-rents are business income they SHOULD NOT be deducted from the rents paid A for the food market

EXAMPLE 2

Corporation C rents a 20-story office building and uses the lower 2 floors for it's general corporate headquarters. The remaining 18 floors are subleased to others. The rental of the other 18 floors is separate from the operation of C's trade or business. Since these sub-rents are nonbusiness income they should be subtracted from the rent expense paid by C.

The reasoning behind subtracting nonbusiness income sub-rents is consistent with the position that components of nonbusiness income should not be included in the factors when apportioning business income. This is accomplished by subtracting the (nonbusiness income) sub-rents from the rent expense.

3. "Annual rent." This is the actual sum of money or other consideration payable, directly or indirectly, by the person or for its benefit for the use of the property. Other consideration would include any amounts payable as a percentage of sales, profits, or otherwise.

EXAMPLE 1

Corporation A, pursuant to the terms of the lease, pays a lessor $1,000 per month as a base rental and at the end of the year pays the lessor 2.5 % of the gross profit. At the end of the year Corporation A had $1,000,000 in gross profit.

The annual rent would be computed as follows:

$1,000 multiplied by 12 months	=	$12,000
$1,000,000 multiplied by 2.5 %	=	$25,000
Total Annual Rent		$37,000

Other consideration would also include any amount payable as additional rent or in lieu of rents, such as interest, taxes, insurance, repairs, or any other items which are required to be paid by the terms of the lease or other arrangement. This

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

would not include amounts paid as service charges, such as utilities, janitor services, etc.

EXAMPLE 2

Corporation A, in accordance with the terms of a lease, agrees to pay the lessor $12,000 a year rent plus taxes in the amount of $8,000 and interest on a note in the amount of $2,000.

The annual rental would be computed as follows:

12,000 + 8,000 + 2,000 = $22,000

4. Annual rental does not include incidental day-to-day expenses such as hotel accommodations or daily rental of autos. Ref: IAC § 100.3350(f)(3)(C).

5. Rent Includes Royalties on Natural Resources. IAC §100.3350(f)(3) was amended on 8/23/2002 to add subparagraph (C). Subparagraph (C) provides guidance for annual rent and what is to be included in calculating this amount. Annual rent is to include royalties based on extraction of natural resources, delivered or purchased. For this purpose, a royalty includes any consideration or credit conveyed to the holder of an interest in property which is, or will be producing natural resources. It doesn't matter how the payment is characterized; as rent, royalty, advance royalty, or otherwise.

(7) Free Use of Facilities

If a taxpayer uses tangible property or rental property for free or property for which only a nominal fee is paid, a fair market value of this property should be established. The fair market value of this property should be included in the property factor computation. REF: IAC §100.3380(b)(2).

At times a parent corporation may be renting facilities to an affiliated company. The rent expense may be hidden in an account called management fees. This account can be a "catch-all" account where a parent corporation charges the affiliate fees for administrative functions performed on the affiliate's behalf by the parent. An

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

examination of this account may be beneficial in developing the property factor.

(8) Construction In-Progress

Property or equipment that is under construction during the year is excluded from the factor until such time that the property or equipment is used in the regular course of the trade or business. If the property or equipment does not appear in the depreciable assets or on the depreciation schedule, it will appear as a separate entry on the balance sheet. (IAC § 100.3350(b))

The reasoning behind excluding construction-in-progress from the property factor hinges on the IITA definition that the property must be "used in the trade or business". If the property in question is being constructed it is not being used and accordingly is not generating business income. It should, therefore, not be included in the property factor.

(9) Property in Transit

Property in transit is discussed in IAC § 100.3350(d). When property is in transit between locations of the person who owns the property, the property in question shall be considered to be at its destination for purposes of the property factor.
Example:

Corporation A manufactures cabinets in California. After these cabinets are completed, they are shipped to A's warehouse in Illinois. At the end of A's tax year, $5,000,000 of these cabinets are in transit between the California manufacturing location and the Illinois warehouse. Since the final destination is Illinois, the cabinets should be included in the numerator as Illinois inventory.

When property is in transit between a buyer and seller and, in accordance with its regular accounting procedures, the seller includes the property in the denominator of the property factor, then the property in question should be included in the numerator based on the state of destination of the property. It should be noted however, that a taxpayer would not have a property factor in Illinois if the protection offered by PL 86-272 has not been forfeited.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXAMPLE 1

Corporation A has a manufacturing location in California and sales offices in Illinois. At the close of A's tax year $5,000,000 in goods are in transit between A's manufacturing location in California and A's customer in Illinois. A's accounting procedures are such that these goods in transit are included in the denominator of the property factor. As such, these goods should be included in the numerator, as Illinois inventory.

EXAMPLE 2

Assume the same facts as in Example 1 except that A does not have a sales office in Illinois. Furthermore, A has no other presence in Illinois and its activities in Illinois have not exceeded those permitted under PL 86-272. In this situation the goods in transit would not be included in the numerator of A's property factor.

The above regulations allow taxpayers limited flexibility in determining what inventory to include in the property factor. To take advantage of the tax savings opportunity allowed by this flexibility in determining the composition of the property factor, companies may review in-transit inventory when it comes on the books. A determination may be made to include or exclude this in-transit inventory from the factor depending on how it affects the overall tax liability.

It is important for an auditor to determine that the taxpayers are consistent from year-to-year in the manner in which they include (or exclude) in transit inventory in the property factor. If in transit inventory is not being uniformly treated among the various states in which a taxpayer operates, this non-uniform treatment may give rise to property being classified as "nowhere property" and, therefore, not includible in the denominator. REF: paraphrased from MTA discussion of Property factor Maryland.

(10) Mobile or Movable Property

The value of mobile or movable property such as construction equipment, trucks, or leased electronic equipment, which are located within and without this state during the tax period shall be determined (for numerator purposes), based on the total time within the state during the tax period. This determination can be made (depending on the property in question) based on revenue, miles, time, etc. in Illinois divided by the like basis everywhere. This percentage would then be applied to the original cost of the property. REF: IAC § 100.3350(d).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example

Corporation W owns $33,000,000 of construction equipment, which is used during the year throughout the United States. During the current tax year the taxpayer's records showed that the equipment in question was used in Illinois for 122 days. The equipment was used outside Illinois for the other 243 days of the year. W should therefore compute the Illinois portion of this equipment as follows:

IL Property = (122/365 X $33,000,000) = $11,000,000

An automobile assigned to a traveling employee should be included in the numerator of the factor of the state to which the employee's compensation is assigned under the payroll factor or in the numerator of the state in which the automobile is licensed. REF: IAC §100.3350(d).

In the case of an airplane, helicopter, etc. the time computation would include flight time over Illinois territory. REF: Sunshine Letter IT91-0274

(11) Computer Industry – Property Factor

Corporations engaged in the development of computer software, which conduct activities within and without this state are required to determine and report business income derived from sources within this state by an apportionment formula.

(a) Software In The Property Factor

In general, for Illinois income tax purposes computer software is considered intangible personal property. The cost of computer software should generally not be included in the computation of the property factor under IITA § 304(a)(1). However, where for federal income tax purposes of the cost of computer software is included in the adjusted basis of computer hardware or other tangible personal property, such treatment applies for purposes of the IITA. Therefore, software costs may be included in the property factor only to the extent they are treated as part of the cost of the hardware or other tangible personal property for federal income tax purposes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For federal income tax purposes, the cost of computer software is generally either expensed as incurred, or capitalized as an item of intangible personal property. However, in certain limited circumstances software costs are capitalized as part of the cost of computer hardware or other tangible personal property. Treasury Regulations §
1.236(a)-4 provide rules regarding the capitalization of costs for intangible assets. These rules explicitly extend to costs of computer software.

(12) Inventory Kept At a Printer By a Publisher

Any paper stocks of a publisher shipped to an Illinois printer by the publisher should be reflected as Illinois inventory in the computation of the property factor. REF: Audit Review Bulletin FY 84-1.

(13) Idle Property

Property used in the regular course of the trade or business of the person shall remain in the property factor until its permanent withdrawal is established by an identifiable event such as its conversion to the production of nonbusiness income, its sale, or the lapse of an extended period of time (normally five years) during which the property is held for sale. REF: IAC § 100.3350(b).

(14) Intangible Drilling Costs

The IRS regulations define intangible drilling costs (IDCs) as any cost incurred that, in itself, has no salvage value and is "Incident to and necessary for drilling of wells and the preparation of wells for the production of oil and gas." The federal regulations furnish examples of these costs, which include such items as wages, fuel, repairs, hauling, supplies, etc., incurred in drilling, clearing and draining of the ground, road making and so on.

At the taxpayer's option, the IDC may be charged to capital or expensed. This election is available to the taxpayer under IRS Regulations Section 1.612-4(a). Most oil and gas companies will make the election to expense the IDC.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Illinois had always taken the position that only capitalized IDCs could be included in the property factor since, if the taxpayer expensed the IDCs, the taxpayer had never "acquired" an asset for federal purposes. However, in September of 1992, the Circuit Court of Cook County handed down a decision in the case of Shell Oil Company et al v. Illinois Department of Revenue which caused the Department to reverse this position. Therefore, for all tax years for which the statute of limitations for issuing a notice of deficiency or filing a claim has not expired, IDCs should be included in the property factor whether or not they have been capitalized or expensed for federal purposes.

In January 1994, the Department of Revenue officially published its position by adopting IAC § 100.3350(e)(2). This section provides that capitalized IDC's shall be included in the property factor, regardless of whether they have been expensed for federal or state tax purposes. Intangible drilling and development costs include such elements as wages, fuel, repairs, hauling, draining, road building, surveying, geological works, construction of derricks, tanks, pipelines, and other physical structures necessary for the drilling of wells and their preparation for the production of oil and gas, and supplies incident to and necessary for the drilling of wells and clearing of ground.

(15) The Outer Continental Shelf (OCS)

The Outer Continental Shelf Lands Act extended the jurisdiction of the United States to property located beyond the three-mile state jurisdictional limit to the area of the ocean where the outer continental shelf ends. The federal jurisdiction in the area extends to all artificial islands and fixed structures erected on the shelf. The states are prohibited from imposing taxes, either directly or indirectly, on the revenues derived from areas under federal jurisdiction, such as the OCS.

Taxpayers have contended that since the states are prohibited, by federal statute, from taxing the revenues from the OCS, those revenues should be excluded from the tax base. They further felt that the property, payroll and revenues from these activities should be excluded from the apportionment formula computations. The states, on the other hand, have taken the position that OCS activities are includible in both the tax base and in the denominators of the apportionment formula factors.

On November 8, 1988 the Supreme Court held, in the case of Shell Oil Company vs. Iowa Department of Revenue, that the Federal

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

preemption is "exclusively concerned with preventing the adjacent states from asserting, on the basis of territorial claims, jurisdiction to assess direct taxes on the Outer Continental Shelf...This is a far cry from prohibiting a State from including income from OCS-derived oil and gas in a constitutionally permissible apportionment scheme." The Court further held that the inclusion of earnings derived from these offshore drilling operations were includible in a state's pre-apportioned tax base;

"[I]t is irrelevant for the makeup of the apportionment formula's unitary tax base that third party sales occur outside of the State...Actual sales on the OCS (as opposed to internal accounting sales) are not taxed directly by any State because they are not included in the numerator of the sales ratio...From the inclusion of such sales in the apportionment formula's tax base, it does not follow that the dollar amount derived from the formula (which is a fraction of the unitary tax base) includes income not fairly attributable to Iowa."

When dealing with offshore drilling operations then, earnings from any activities occurring on the OCS should be included in the tax base and any property, payroll and sales should be included in the everywhere factors of the apportionment formula. Oil in transit from this area should be included in the destination state's property factor numerator. Sales taking place on the OCS would not be included in any state's sales factor numerator, however any oil that is piped out or hauled out of the OCS area by the driller and subsequently sold can be allocated to the destination state for sales factor purposes.

The Florida Supreme Court in the case of Shell Oil Company vs. Department of Revenue, State of Florida, also upheld the position that revenues from offshore drilling operations could be included in business income.

Refer to audit manual Chapter 37 (new 49) for synopses and the complete case citations of the Shell Oil Company cases.

(16) Leased Property

When a taxpayer leases property to another person, the use of the property in Illinois by the lessee would create sufficient nexus to tax the owner-lessor of the property. Accordingly, the original cost of the leased property should be included in the numerator of the property factor of the taxpayer.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXAMPLE 1

Corporation T leases trucks to other companies that travel through Illinois. T is commercially domiciled in Tennessee and has no other activity than the leasing of the trucks. T would include the original cost of these leased vehicles used in Illinois in the numerator of the property factor (also in the denominator).

EXAMPLE 2

Corporation V leases DVD movies and DVD players to a non-related corporation. The lessor is incorporated in the state of Texas. V has no offices or employees in Illinois. The lessee rents the movies and DVD players to hotels and motels throughout the country. Movies and players valued at $1,000,000 are leased to hotels in Illinois. V would be taxable in Illinois and would include, in the numerator of the Illinois property factor, these $1,000,000 in movies and players.

The IITA and Regulations are specific in their definition of property to be included in the numerator of the property factor. These definitions include the phrase "used in this state". It is for that reason that a lessor would include the leased goods in their computation of the numerator of the property factor. They are using this property in Illinois. The use is the leasing activity.

It should be noted that in both the above examples, the lessee would also have a property factor in Illinois. The numerator would be developed from the rental of the property in Illinois (i.e. annual lease payments multiplied by 8).

(17) Entertainment Industry

These paragraphs deal with issues and problems, which are somewhat unique to the entertainment industry. Definitions of terms used commonly in the entertainment industry appear at the end of the section. The following types of business activities should be considered part of this industry:

1. Motion picture producers (major, independent and television)
2. Television commercial producers
3. Television networks
4. Independent television stations which

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Operate as network affiliates, or

b) Are unaffiliated with a network but which operate collectively in purchasing properties for telecast or in marketing air time, or

c) Operate as a producer in a manner similar to the entities identified above.

The problems associated with these businesses involve the type of property owned or rented (and appropriate amounts) and revenues generated in the normal course of their trade or business activities. The following paragraphs discuss these problems and provide some direction in computing the factors for the entertainment industry.

(a) Entertainment Industry – Property Factor

(i) Everywhere

The basis for the computation of the property factor can be found in IITA § 304(a)(1)(A). When dealing with producers or television networks the property factor should include:

1. Sets, props, wardrobes, etc. These items are all considered tangible personal property used in the business.

2. Videocassettes and disks valued at their cost. These assets are usually found in the Inventory accounts.

3. Films. Films are also considered tangible personal property. This position is supported by judicial decisions regarding IRC, "Section 38 property." Section 38 of the IRC provides for an investment credit on the cost of such property. Section 38 property is limited to tangible personal property and certain structures on real property. In the case of Walt Disney Productions v. United States [71-2 USTC para. 9507], 327 F. Supp. 189 (C.D. Cal. 1971), affirmed as modified, [73-2 USTC para. 9484], 480 F. 2d. 66 (9th Cir. 1973), cert. denied. the US Tax Court held that motion picture negatives are tangible personal property and allowable

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

for Investment Tax Credit purposes.

Films (whether incomplete or complete but not yet released) should not be included in the property factor until their release date(s) since, until their release, they are not being used in the trade or business. Films may be released to theaters, television stations and television networks. They may also be released by a television network for telecast. Syndicated television programs should be included in the property factor only when they are actually in syndication and shown on the air. However, films, which have been previously released but are currently, temporarily in storage, should also be included in the property factor. This position is based on IAC § 100.3350(b)).

Films should be valued at original cost regardless of whether they are being released for the first time or being re-released. The original cost of the film should include all capitalized costs associated with producing the film, as determined for federal income tax purposes. Some examples of these costs are:

a) General overhead costs as they apply to the film such as, preparing a script from a story, building sets, hiring and rehearsing talent, editing of original film negatives, etc.

b) Compensation paid to actors, production personnel, directors, and producers.

c) Costs of the "first" distribution of prints.

d) Costs of the screen rights and other material being filmed.

e) "Residuals" payable under contracts with labor organizations.

f) Participations payable as compensation to actors, production personnel, directors and producers.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

REF: IRC Section 48(k)(5), and the case of Walt Disney Productions v. United States, [74-2 USTC para. 9623], [76-2 USTC sec. 9606], affirming and remanding District Court decision, [77-1 USTC sec. 9398] (as amended).

4. Rented property should be valued at eight times the annual rental expense. The amount of rental expense used should include:

a) Lump-sum net rental payments for a period, which encompasses more than a single income year, assigned ratably over the rental period.

b) Amortized film rentals.

c) License fees paid for the exhibition or telecast of films or television series. These fees are paid under leases, which allow the films or series to be shown or broadcast for a scheduled number of times and/or during a limited period of time. Since the films or series are considered tangible personal property, the fees are considered rent expense and should be included in the property factor.

   Also, in the case of United Artists Corporation v. Taylor (New York), the court held that a film was tangible personal property and that a transfer of the film to the motion picture theaters with a license to show the film constituted a taxable rental or license to use the film as tangible personal property under the New York City Retail Sales and Use Tax Law. The complete case citation can be found in Chapter 37(new chapter 49)

d) When dealing with rented studios, the amount of the basic or flat rental charge by the studio for the use of a stage and other permanent equipment such as sound recording equipment.

e) Additional equipment rented from other sources or from the studio that is not covered in the basic or flat rental charge.

(ii) <u>The Numerator</u>

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

When computing the Illinois numerator of the property factor, tangible personal property should be assigned to Illinois if it is located or used in this state at any time during the taxable year. Its value for numerator purposes should be determined using a ratio which compares the number of days the property was located in Illinois to the total number of days the property was owned or rented during the taxable year. Daily Shooting Schedules can be a useful tool in establishing the daily location of property.

The original cost of the film (as defined above) should be prorated over the number of copies of the film in release. The cost, per copy, should be allocated to Illinois for numerator purposes based on a fraction the numerator of which is the number of days the copy was located in Illinois and the denominator of which is the number of days it was in release anywhere.

(18) Operating Lease v Capital Lease

(a) Book Purposes

Leases can be classified as capital leases or operating leases. Many complex tests must be performed to determine if a lease is an operating or a capital lease. Simply put, however, these two types of leases can usually be distinguished by asking four questions:

1. Is ownership transferred?
2. Does a bargain purchase option exist in the language of the lease?
3. Do the terms of the lease extend beyond 75 % of the asset's life?
4. Does the present value of the minimum lease payments equal or exceed 90 % of the leased property's fair market value less investment tax credit retained by lessor?

(b) Lessee

If the answer to any of these questions is yes, then the lease should be treated as a capital lease. Among other book entries,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the property will appear on the lessee's balance sheet, and the lessee will compute a depreciation expense on the property for purposes of its income statement.

If none of the questions are answered with a yes, the lease should be classified as an operating lease. In this case, the lessee will claim rental expense for purposes of its income statement.

(c) Lessors

Lessors would also classify the lease as an operating lease if the answers are "NO". If any of these questions were answered "YES" a lessor would subject the lease to further tests. These tests would deal with rent collectability; future cost predictability, dealer profit, etc. REF: A PRACTITIONER'S GUIDE TO ACCOUNTING FOR LEASES, The Journal of Accountancy, August 1977 and FAS No. 13.

(d) Federal Purposes

For federal purposes, the lease agreement is evaluated to determine whether it is a lease or a conditional sale. If the agreement is determined to be an actual lease, the lessee is allowed a rental deduction in the computation of federal taxable income (IRC Sections 162 and 263). If the agreement is determined to be a conditional sale, no rental deduction is allowed, however, the lessee is allowed to deduct depreciation expense on the assets.

If the agreement is determined to be an actual lease, the lessor must report rental income on its federal return and is allowed a depreciation expense for the property being leased. If the agreement is determined to be a conditional sale, the lessor must report a capital gain on the sale of the property.

(e) Illinois Purposes

Illinois will generally rely upon the federal determination of whether an agreement is an actual lease or a conditional sale. However, the Department will also be guided by the "economic substance" of the transaction in determining whether a sale, license or lease has occurred for Illinois income tax purposes. The agreement should reflect an arm's length negotiation. In the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

absence of a bona fide non-tax motive, the form of a transaction may not be recognized. The economic substance of a transaction necessarily depends upon the particular facts of each case. REF: Sunshine Letter IT91-0082.

When computing the property factor, a problem can arise if an agreement is classified as a capital lease for book purposes and an actual lease for federal income tax purposes since the taxpayer is allowed to use the book balance sheet as Schedule L on its federal return. It is possible for the taxpayer to inadvertently "double up" the capital lease in the property factor by including the capitalized value from the balance sheet and the rent expense from Page 1 of the 1120.

In these cases (unless the federal determination is going to be disregarded), if the taxpayer is allowed to claim a rent expense on the federal return, the rent expense is included in the property factor and the capitalized value of the property is eliminated. If the taxpayer is not allowed to claim a rent expense on the federal return, the capitalized value of the property should be included in the computation of the property factor.

(f) Safe Harbor Leasing

Safe harbor leasing was removed from the IRC. Simply put, safe harbor leasing deemed certain arrangements to be true leases. For purposes of Illinois taxation, the property factor follows the characterization of an arrangement as a lease for federal purposes.

b) The Payroll Factor

The payroll factor is addressed under IITA § 304(a)(2) and in IAC § 100.3360. There have been no amendments to § 304(a)(2) of the Act since 1969. The following discussion is based primarily on those sources.

IITA § 304(a)(2) provides the guidance on how compensation/payroll is treated in apportionment. The payroll factor is a fraction with the numerator being the total amount of compensation paid within Illinois during the taxable year. The denominator is the total amount of compensation paid everywhere during the taxable year.

The total amount "paid" during the taxable year is determined on the basis of the employer's accounting method. If the employer uses the accrual

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

method of accounting for payroll purposes, then all compensation properly accrued would be deemed paid during the taxable year for which it was accrued.

The payroll factor includes only compensation paid to employees primarily engaged in the production of business income. Compensation paid to employees primarily engaged in the production of nonbusiness income is excluded from the payroll factor. In general, however, compensation of general executive officers with company-wide authority is included in the payroll factor.

(1) Compensation Paid In Illinois

The numerator of the Illinois payroll factor consists of compensation paid in Illinois. The tests for determining whether compensation is paid in this state are substantially the same as those used in other states. Compensation is paid in this state if:

1. The individual's service is localized in this state because it is performed entirely within this state.

   For tax years ending on or after December 31, 1992, when services are performed (pursuant to a personal service contract for sports performances) by any member of a professional sports team which is based in a state that imposes a comparable tax liability on members of professional sports teams headquartered in Illinois, the performance of that personal service at a sporting event taking place in Illinois shall be considered to be a performance entirely within this State. REF: PA 87-0880.

   NOTE: For more information regarding the effect of PA 87-0880, refer to the (Personal Services – Professional Athletes) section below.

2. The individual's service is localized within this state although it is performed both within and without this state but the service performed outside this state is incidental to the individual's service performed within this state.

3. The individual's service is not localized in any state, but some of the service is performed within this state and either:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) The base of operations, or if there is no base of operations, the place from which the service is directed or controlled is within this state, OR

b) The base of operations or the place from which the service is directed or controlled is not in any state in which some part of the service is performed, but the individual's residence is in this state.

REF: IITA § 304(a)(2)(B).

(2) Entertainment Industry Payroll

The payroll factor should include:

1. Compensation paid to all employees during the taxable year, including talent salaries.

   When examining the amount of talent salaries or determining the proper assignment of those salaries by state, UC-3/40's should not be relied upon. Daily Shooting Schedules will provide more accurate data for payroll factor purposes.

2. Residual and profit participation payments paid to employees.

3. Any amount paid by a producer to a corporation for providing (or loaning) the services of an actor or director who is an employee of the corporation or is under contract with such corporation. These payments should be included in the producer's payroll factor as if the amount paid was compensation paid to an employee of the producer.

For purposes of the payroll factor numerator, compensation of employees engaged in the production of a film on location should be attributed to Illinois if the services were performed in Illinois.

(3) Professional Athletes Payroll

The discussion below assumes that the athletes are involved in an employer-employee relationship with a team. If an athlete is an independent contractor (a golfer, a racer, a bowler, etc.) and is a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

nonresident of Illinois, any business income received should be apportioned to Illinois individually by use of a 3-factor formula. SUNSHINE LETTER IT 88-0403.

For purposes of the denominator, the payroll of the actual players and all other employees required to travel with the team should be included. Bonus payments, optioned player payments and other remunerations should also be included in the payroll factor only if they are the result of play (such as performance bonuses) or are conditioned upon the player making the team or performing services. This type of payroll information can be obtained by examining the contracts entered into between the teams and owners.

For tax years ending prior to December 31, 1992, there was no specific provision in the Act or Regulations for any type of apportionment of compensation paid to a professional athlete. Therefore, any salaries paid to employees of the organization (players, coaches, support crews, etc.) would be considered compensation paid in this state and attributed to Illinois for purposes of the numerator of the payroll factor based on the following tests which are contained in IITA § 304(a)(2)(B) of the IITA.

Any individual who:

1. Performs all of his/her services within Illinois, or performs services within and without Illinois but the services performed outside of Illinois are incidental to the ones performed within Illinois, or

2. Performs some services within Illinois and the base of operations or the location from which the services are directed or controlled is located in Illinois, or

3. Performs some services within Illinois and there is no base of operations or location from which the services are directed or controlled and the individual is a resident of Illinois.

IITA § 304(a)(2)(B)(iii) governs when compensation is paid in Illinois. This section of the IITA was amended by PA 87-0880 to read that a comparable tax liability would be imposed on residents of those states

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(professional athletes) which tax residents of this state. Services by professional athletes at a sporting event taking place in Illinois shall be deemed to be a performance entirely within this State. This has been in effect for all taxable years ending after December 31, 1992.

Since Wisconsin and Michigan are reciprocal states, Illinois will recognize the reciprocal agreement with regard to PA 87-0880 to the extent that the reciprocal state does not tax players from Illinois teams. REF: Sunshine Letter IT93-0117.

For players and other team employees who are subject to this provision, the amount of income constituting compensation paid in Illinois will be determined by multiplying the person's total compensation for performing such personal services by a fraction, the denominator of which is the total number of duty days in the taxable year and the numerator of which is the number of duty days in Illinois during the taxable year. REF: IAC § 100.3120(a)(3)(A)

EXAMPLE

The California Turtles is a professional sports team whose operations are directed and controlled in California. The Turtles play their home games in California and their away games in several other states, including Illinois.

On the Turtles' IL-1120, a payroll factor would exist for tax years ending on or after December 31, 2012. Per IITA § 304(a)(2)(B)(iii), each sporting event taking place in Illinois is considered a performance entirely within Illinois, if the resident state imposes a comparable tax on Illinois players. Any compensation paid by the Turtles for a sporting event taking place in Illinois, is compensation paid in Illinois per IITA § 304(a)(2)(B)(i).

Duty days are days during any part of which the person is under a duty to perform personal services under the terms of his or her personal service contract.

Total duty days for players includes:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1. All days from the beginning of the official pre-season training period through the last game in which the team competes.

2. If a team is involved in post-season (play-off) games, all days through the last post-season game in which the team participates.

3. Any all-star games falling outside the preseason, regular season and postseason period, in which the player is chosen to participate.

4. Off days, practice days and travel days.

With the exception of travel days, a duty day in Illinois equals one day for any part of a duty day during which the employee is physically present in Illinois. In the case of a travel day, only days in which the person spends at least 8 hours in this State will be considered a duty day. REF: IAC § 100.3100(e).

(4) Sources Of Payroll Information

The taxpayer has the option of using either an accrual or cash method of accounting for wages in the payroll factor. The taxpayer should be consistent and use the same basis for computing the numerator and the denominator.

Generally, whichever method the taxpayer uses in computing the payroll factor (i.e. cash method or accrual method) is the method that should be utilized when auditing the payroll factor. If the taxpayer uses the cash method and the accrual method is utilized by the auditor (or vice versa), differences may be noted in the results of the factor values. These discrepancies are the result of timing differences. In general, however, the cash basis is the preferred method in computing the payroll factor. This is due to the ease in preparing and checking the computation.

Sources for obtaining information relating to wages paid can usually be obtained from the following:

(a) Cash Method

In verifying everywhere payroll figures (i.e. the denominator) these Federal Withholding Tax forms will generally be utilized:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1. Federal Form 941 [Quarterly return]
2. Federal Form 940 [Annual return]

In verifying Illinois payroll figures (i.e. the numerator) the values can generally be obtained from the Illinois Unemployment Compensation form known as IL UC-3. This return is filed quarterly for unemployment taxes withheld by an employer. The withholding of these unemployment taxes is not dependent on where the employee resides but rather where the employee's duties are performed.

Generally, the UC-3 should be used in obtaining Illinois payroll instead of the IL-941. The reason the IL-941 may not be a reliable and accurate source in determining Illinois payroll is because the IL-941 would not reflect wages paid to employees working in Illinois who are not residents of Illinois.

The State of Illinois has Reciprocal Withholding Agreements with the States of Iowa, Kentucky, Michigan, and Wisconsin. Indiana was in a reciprocal withholding agreement with Illinois up until the tax year ending December 31, 1997. The agreements allow Illinois employers to withhold the appropriate state income taxes from these non-IL residents. These wages would not be reflected on the IL-941's.

The cash basis may be most conveniently used when the taxpayer's year-ends on a calendar quarter (i.e. March 31st, June 30th, September 30th, or December 31st). However, it is possible to use the cash basis when the taxpayer's year ends on any date. This may pose a slightly more time consuming computation but it can be done since the taxpayer will have payroll records that support these Federal and State tax forms on a payroll period basis (i.e. weekly, bi-weekly, monthly, etc.).

In verifying everywhere payroll figures total wages can be obtained from the Federal 1120 Return line items titled:

1. Compensation of Officers [from Page 1]
2. Salaries and Wages [from Page 1]
3. Costs of Labor [from Sch A--COGS Schedule]

In verifying Illinois payroll figures the values would have to be obtained from the detail that made up the Federal 1120 line items mentioned above. At times this may prove to be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

somewhat time consuming and difficult. The most common error made by the taxpayer in using this method is in making improper accruals or no accruals at the beginning or end of the year for the Illinois payroll of the payroll factor.

Differences between the accrual and cash method will be due primarily to the fact that the Federal 941 reports and the State UC-3 reports are prepared on a cash basis while the Federal 1120 is usually prepared on an accrual basis.

(5) 401(k) Earnings

Earnings included in a qualified cash or deferred compensation arrangement under IRC Section 401 (k) which are excluded from federal taxable income are included in both the numerator and denominator of the Illinois payroll factor if they were earned by a resident of Illinois. If they were earned by a nonresident of Illinois, these amounts would only be included in the denominator of the payroll factor. REF: IAC § 100.3120(c).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. I. PURPOSE

This chapter deals with the statutes, regulations and procedures involved in auditing partnerships, Subchapter S corporations, trusts and estates and composite and pass-through entity returns. In some instances, the procedures for auditing a certain area of these returns are similar to those involved in auditing an 1120 return. In these cases, cross-references are made to the appropriate paragraphs or chapters.

III. GENERAL INFORMATION

A. Tax Rates

Current and prior year Business Income Tax rates, Individual Income Tax rates and Personal Property Replacement Tax rates can be found at the Illinois Department of Revenue website at:

https://www2.illinois.gov/rev/research/taxrates/Pages/default.aspx

The current 1.5% replacement tax rate for partnerships, trusts and S corporations has been in effect since the tax was enacted effective July 1, 1979.

- The tax increases under P.A. 096-1496 effective for income received on or after January 1, 2011 and P.A. 100-0022 effective for income received on or after July 1, 2017 does not affect the replacement tax rate but does affect the income tax rate on pass-through income received by individuals, trusts & estates, and corporations (other than S corporations).

Schedule SA
The purpose of Schedule SA, Specific Accounting, is to provide a means for calculating your income and tax at separate rates, due to an income tax rate increase in the middle of the tax year. The Schedule SA allows you to figure your tax based on the specific accounting method, which allows you to treat your net income or loss and modifications as though they were earned in two different taxable years. Schedule SA must be used if the blended rate method of computing tax was not elected. The blended rate method taxes your income as if you received it evenly throughout the year.

There is a separate Schedule SA for composite returns, individuals, corporations, fiduciaries and exempt organizations. For fiscal year filers Schedule SA contains instructions on how to prorate the income between the two periods.

The income tax rates preprinted on the 2010 income tax returns were not changed, however the Department created the new “Schedule SA” to attach to the return that separates income earned before and after January 1, 2011 and then calculates tax at the correct rate.

If prior to 12/31/2014, an S corporation or partnership files Form IL-1000, Pass-through Entity Payment Income Tax Return, on behalf of its nonresident partners

This manual is not a statement of Department policy. B. IL-872 Extension of State of Limitations

Public Act 92-0846 amended IITA § 905(f) to provide that a partnership, Subchapter S corporation, or a trust who executes an extension with the Department on or after January 1, 2003, will also extend the statute of limitations for partners, shareholders, or beneficiaries of the flow-through entity. However, any assessment shall be limited to the amount of the deficiency resulting from the recomputation of income, deduction, credits, or other amounts of the taxpayer that are taken into account by the partners, shareholder, or beneficiary in computing its liability under the IITA.

IV. APE SPECIFIC LAW APPLICATIONS

A. Partnerships

Partnerships can be complex business entities. They are similar to post-1982 Subchapter S corporations; however, they are more complicated due to the fact that there is no limit on the number of partners, nor is there a restriction on who can be a partner. Partnerships may have corporate partners, individual partners, partnerships as partners, etc. This can make tracing the flow of income and expense items through to the partners' returns difficult.

Partnership Definition

IRC § 761(a) defines a partnership to include the following:

> a syndicate, group, pool, joint venture, or other unincorporated organization through, or by means of which any business, financial operation, or venture is carried on, and which is not within the meaning of this title..., a corporation or a trust or estate.

IITA § 1501(a)(16) defines a partnership in the same way, but adds:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The term “partnership” includes any entity, including a limited liability company formed under the Illinois Limited Liability Company Act, classified as a partnership for federal income tax purposes.

The term “partnership” does not include a syndicate, group, pool, joint venture, or other unincorporated organization established for the sole purpose of playing the Illinois State Lottery.

IRC § 761(a) also permits a partnership to elect to be disregarded, so that all of its income and other tax items are deemed earned directly by its partners. An entity that makes this election is not a partnership for Illinois income tax purposes. See 86 IAC § 100.9750(d) for more detail.

A partner under this section of the IITA is defined as “a member in such syndicate, group, pool, joint venture or organization.”

In 1996, the Treasury adopted the “check the box” regulations in 26 CFR §§ 301.7701-1 thru -4. Under these regulations, entities formed under one of a long list of domestic and foreign laws are taxed as corporations. All other entities (especially including limited liability companies) may elect to be treated as corporations. If no election is made by an entity with only one owner, the existence of that entity separate from its owner is disregarded. If the entity has more than one owner, it is treated as a partnership unless it elects corporate treatment.

The following is a brief list of definitions which are used in describing partnerships and their activities.

- **Partner** - is a "person" who owns an interest in a partnership which was acquired through either contributions of capital or services or both.

- **General Partner** - is involved in the management of the partnership and has unlimited liability.

- **Limited Partner** - usually is not liable for general debts of the partnership and has no voice in the operation of the business. Limited Partners are, by definition, inactive in the Partnership. Their distributive share of IRC Sec. 702(a)(8) taxable income is not “compensation,” and as such, cannot be “reasonable compensation” for purposes of the PSI/Reasonable compensation subtraction modification (IITA 203(d)(2)(H)).

- **Principal Partner** - is one who has a 5% or more interest in the profits or capital of the partnership. A partner's share of income, gains, losses,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

deductions, or credits is usually controlled by the partnership agreement. REF: IRS Publication 541.

- **Publicly Traded Partnership** - as defined in IRC § 7704(b), means any partnership, if:

    - Interests in the partnership are traded on an established securities market; or

    - Interests in the partnership are readily tradable on a secondary market.

  Most publicly traded partnerships are treated as corporations for tax purposes.

- **Non-Recourse Loans** - are liabilities of the partnership for which none of the partners have any personal liability.

- A partner is considered **"AT-RISK"** in an activity to the extent of their cash and the adjusted basis of other property which they contributed to the activity and certain amounts borrowed for use in the activity. In other words, "at-risk" usually means the amount that the partner stands to lose economically in the event that the enterprise should fold altogether. IRC § 465 essentially limits a partner's loss (that is, distributive share of income or loss minus distribution for the entire time the partner was a partner) to the amount that the partner has at risk and could actually lose from an activity.

- **Material Participation** - is the involvement in the operations of the activity of the partnership on a regular, continuous, and substantial basis. Material participation is determined by a number of tests under IRC § 469(h).

- **Passive Activity** - is an activity which involves the conduct of a trade or business, but in which the taxpayer does not "materially participate". REF: IRC § 469(c).

Prior to 1996

For years before the check-the-box rules were adopted, the determination of whether or not an entity was a partnership for income tax purposes could be difficult. A partnership is an association of two or more persons (partners) who join together to operate a trade or business, with each person contributing money, property, or services and with all such persons agreeing and expecting to share in the profits and losses of the business. A partnership, under the IRC, is treated as a pass-through entity rather than a taxable entity, functioning primarily as a conduit

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

for transferring income and loss items directly to the individual partners who report such items on their own income tax returns. The partnership, however, is entitled to make most federal tax elections affecting the computation of partnership income.

Generally, the only real distinction between a joint venture and partnership is the scope of the business activity and the duration of the association. Joint ventures are ordinarily formed to conduct some limited business activity or transaction, for example, to develop a particular tract of land, and are intended to exist only so long as necessary to complete the project. Partnerships are generally engaged in a wider range of business activities and are intended to exist for a longer period of time.

For purposes of distinguishing a partnership from an association taxable as a corporation, a business entity is considered a partnership if it has more non-corporate characteristics than corporate characteristics.

The following “common law” characteristics were developed by the courts, and are not statutory:

- It must have associates.
- There must be an objective to carry on a business.
- It must have continuity of life.
- There must be centralization of management.
- There is limited liability for corporate debts.
- There is free transferability of interest.

Both partnerships and corporations must have associates and an objective to carry on a business. Therefore, the corporation/partnership determination is based on the remaining four characteristics (otherwise referred to as the four-factor test prior to January 1, 1997). In order to be characterized as a corporation, the entity must meet at least 3 of these other characteristics. Otherwise, the entity will be characterized as a partnership. There is no requirement that a partnership be labeled as such in order to be one. Conversely, merely labeling it as a partnership does not guarantee it will be treated that way for tax purposes. Generally, this determination will have been made at the federal level.

IRC § 761(a) provides a special opt out for partnership treatment of certain passive investment and joint production and extraction entities. This election allows the parties to treat themselves as co-owners rather than as partners. In these

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

instances, partnership tax returns do not have to be filed. See IRC § 761 Election below.

General vs. Limited

A partnership may be either general or limited. In a general partnership, each partner has broad liabilities. In a limited partnership, there must be at least one general partner who has broad liabilities and any number of limited partners whose liabilities are limited to the amount of their contribution to the partnership. They do not take part in the management of the partnership, but they do share in the profits or losses with the general partner(s). REF: Federal Taxation of Partners and Partnerships, Warner, Gorham and Lamont.

If a partnership is not recognized as such for federal tax purposes, it will most likely be treated as an "association" taxable as a corporation.

1. Federal Taxation of Partnerships

The federal tax treatment of any partnership item is determined at the partnership level, i.e., most elections affecting the computation of income from a partnership are made by the partnership, not by the separate partners. The income flows through to each partner who reports that partner’s distributive share of the partnership's tax items, regardless of whether or not there has been an actual distribution of cash or other property by the partnership. This also applies to losses. That is, the partner reports a loss even if it has not been directly incurred. Generally, a partner's distributive share of the partnership loss is limited to the adjusted basis of the partnership interest at the end of the partnership year in which the loss was incurred. Much of the above information is contained in IRS Publication 541. This publication provides some good basic information about Federal taxation of partnerships.

a) Federal “Check-The-Box” Rules

The “check-the-box” regulations allow a “domestic eligible entity” with two or more members that is not a corporation (or a foreign entity that is not deemed by the regulations to be a corporation) to elect to be classified as either an association (and thus as a corporation) or a partnership. Although the classification is generally elective, the “check-the-box” regulations contain some default provisions. Under the default provisions, a multimember entity will be classified as a partnership unless it makes an affirmative election (i.e., checks the box) to be classified as a corporation.

The "check-the-box" regulations provide similar default provisions for entities which are not corporations and which have only one owner, such as single-

member limited liability companies. Under these provisions, a single owner entity is disregarded as an entity separate from its owner unless it makes an election to be treated as a corporation. An eligible entity with a single owner cannot elect to be treated as a partnership. If a single entity elects to be disregarded as an entity separate from its owner, its activities will be treated in the same manner as a sole proprietorship, branch, or division of the owner.

The "check-the-box" rules can't be applied to determine the classification of a business entity prior to January 01, 1997. Thus, classification of an entity formed prior to January 01, 1997 must be analyzed under the four-factor test described under Section A, Partnerships, to determine their classification as a partnership or a corporation. If an entity claims to be a partnership, but it is later determined that the entity is taxable as a corporation, the entity will be treated as a corporation prior to January 01, 1997. If the entity then elects to be a partnership for periods beginning on and after January 01, 1997, the entity may be treated as distributing its assets in a taxable liquidation.

b) <u>Foreign Entities</u>

The "check-the-box" regulations provide that a "foreign eligible entity" with two or more members, where at least one member does not have limited liability, is classified as a partnership unless it makes an election to be treated as a corporation. A "foreign eligible entity" where all members have limited liability is classified as a corporation unless it makes an election to be treated as a partnership. A "foreign eligible entity" with one member, where the member does not have limited liability, is disregarded as an entity separate from its owner unless it makes an election to be treated as a corporation.

Classification of Entities for Illinois Purposes

IITA § 102 states:

> Except as otherwise expressly provided or clearly appearing from the context, any term used in this Act shall have the same meaning as when used in a comparable context in the United States Internal Revenue Code of 1954 or any successor law or laws relating to federal income taxes and other provisions of the statutes of the United States relating to federal income taxes as such Code, laws and statues are in effect for the taxable year.

IITA § 1501(a)(4) states:

> The term "corporation" includes associations, joint-stock companies, insurance companies and cooperatives. Any entity, including a limited liability company

> formed under the Illinois Limited Liability Company Act, shall be treated as a corporation if it is so classified for federal income tax purposes.

IITA § 1501(a)(16) states:

> ... Any entity, including a limited liability company formed under the Illinois Limited Liability Company Act, shall be treated as a partnership if it is so classified for federal income tax purposes. ...

Accordingly, the Department will follow the federal classification of entities under the "check-the-box" regulations (i.e., an entity which elects to be treated as a corporation for federal income tax purposes under the "check-the-box" rules will be treated as a corporation for Illinois income tax purposes and an entity electing to be treated as a partnership will be a partnership for purposes of the IITA) which became effective on January 01, 1997. The one exception to following the federal classification in IITA § 501(a)(16) is for partnerships established for the sole purpose of playing the Illinois State Lottery, which are not treated as partnership for Illinois purposes. Also see 86 IAC § 100.9750(d).

c) Tax Year Permitted

For partnership tax years beginning in 1987, all partnerships generally were required to adopt the same taxable year as the partner (or partners) who owned a majority (more than 50%) interest in the partnership profits and capital. If no combination of partners with the same tax year owns a majority interest, then the partnership must adopt the same tax year as that of all principal partners (a partner having an interest of at least 5 percent in partnership profits and capital). If a tax year cannot be determined under either of the above provisions, then the partnership must use the tax year resulting in the least aggregate deferral of income to the partners (26 CFR 1.706-1. Also see IRC § 706(b)). For most partnerships, the above provisions result in a calendar tax year being adopted.

One exception to this requirement is that a partnership is permitted to use its natural business year. (A natural business year ends shortly after a company's peak period of business.) In order to qualify for this exception, the partnership had to establish an acceptable business purpose for using a year end other than the required year end. REF: Publication 538

Another exception to the required year end is available under IRC § 444. A partnership may elect, under this section, to have a different year end, if certain conditions are met. IRC § 444 applied to the first taxable year beginning after December 31, 1986. See Section 444 Returns in Archives.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

d) Federal Form 1065

A partnership files a federal Form 1065 with the IRS. It is not required to file until the first year in which the partnership has income or deductions. Thereafter, a partnership is required to file every year whether or not it has actual income. The federal Form 1065 separately reports each class of partnership income, gain, loss, deduction, or credit taken into account in the separate income tax computation of the partners.

A partner is deemed to have received their entire distributive share of a partnership's income (loss) on the last day of the partnership's taxable year. If the partnership has a 12-month year end and a short taxable year end in the same tax year of the partner, the income (loss) from both years shall be included in the partner's return for the year. REF: IRC § 706(a).

The due date of the partnership return is the fifteenth day of the fourth month following the close of the taxable year, except that if the partnership consists totally of nonresident aliens, the due date of the partnership return is the fifteenth day of the sixth month following the close of the year. REF: CFR § 1.6031(a)-1(e)(2).

When a partnership is dissolved, the return for the short tax year must be filed within 3 1/2 months after dissolution. REF: CCH Standard Federal Tax Reports, Para.25362.013, Explanation for IRC Regulation 1.701-1.

Various information about the partnerships appear on the face of the federal Form 1065, including the number of partners and whether or not the partnership is a limited partnership; etc.

Income and expenses derived only from a trade or business activity are considered in determining the ordinary income (loss) of the partnership. These items are reported on page one of the federal Form 1065. The supporting schedule for cost of goods sold is reflected on Form 1125-A for tax years 2011 and forward. (Cost of goods sold was reported on Schedule A (Form 1065) for tax years 2010 and prior). The ordinary income (loss) for the partnership is then carried to Schedule K. Note that income from other rental activities and portfolio income are not included on page one. They are entered directly on Schedule K.

Form 8825 (which was effective with the 1990 return) was developed to report income and expenses from rental real estate activities of the partnership. It replaced the former Schedule H (Form 1065). The net income (loss) from the rental real estate activities is reflected on Schedule K.

Schedule K of the federal Form 1065 is a summary schedule of all the partners' shares of the partnership's income, credits, deductions, etc. which have been

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

distributed, or deemed distributed, to its partners. This schedule must be completed by all partnerships.

For years ending prior to December 31, 1987, Schedule K was not required to be completed if there were ten or fewer partners.

Schedule K-1 (Form 1065) is prepared for each partner and shows that specific partner's distributive share of the income, deductions, credits, etc. included in the partnership figures on Schedule K.

Schedule L is the partnership's balance sheet.

Schedule M is the reconciliation of the partners' capital accounts, which reflects the total equity of all partners in the partnership at the beginning of the tax year, any adjustments that occurred and the equity at the end of the tax year.

Domestic partnerships with ten or fewer partners may not be required to complete Schedules L and M.

2. Illinois Taxation

The Illinois definition of a partnership parallels that of the Internal Revenue Code (IRC). 86 IAC § 100.9750(d)(1) states:

> 26 USC 761 provides that the term "partnership" includes a syndicate, group, pool, joint venture or other unincorporated organization through or by means of which any business, financial operation or venture is carried on, and which is not, within the meaning of this Title 26, a corporation or a trust or estate. This definition is essentially identical to the definition in IITA Section 1501(a)(16)). Also, IITA Section 1501(a)(16) provides that *any entity, including a limited liability company formed under the Illinois Limited Liability Company Act, shall be treated as a partnership if it is so classified for federal income tax purposes.* Accordingly, every entity treated as a partnership for federal income tax purposes is a partnership for purposes of the IITA, and no entity that is not treated as a partnership for federal income tax purposes is a partnership for purposes of the IITA…

Prior to the enactment of the Personal Property Replacement Income Tax (Replacement Tax), partnerships did not incur a tax liability under the Illinois Income Tax Act. As a result of the enactment of PA 81-1stSS-1, partnerships earning and receiving income in Illinois on or after July 1, 1979 are subject to Illinois Replacement Tax at the rate of 1.5% of net income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

IITA § 502(d) requires every partnership with base income allocable to Illinois (per IITA § 305(c)) to file an information return setting forth "specific information", including the following: all items of income, gain, loss and deduction; the names and addresses of all partners or other persons who would be entitled to share in the partnership's base income if distributed; and the amount of each distributive share. The requirement to file an Illinois partnership return is not, therefore, contingent upon the filing of a federal partnership return. Additionally, every partnership which has Illinois net income or loss is required to file an IL-1065 with the Illinois Department of Revenue. REF: Sunshine Letter IT91-0011.

A partnership return is required to be filed with the Department on or before the 15th day of the fourth month following the close of the taxable year. (IITA § 505(a)(2)). However, 86 IAC § 100.5020(b) gives all partnerships an automatic 6-month extension of time to file. Also, when the partnership has been granted an extension or extensions of time to file its federal income tax return, the Department shall automatically extend the due date of the partnership return for an equivalent period with the filing of a copy of such extension or extensions with the Department. (IITA § 505(3)(b)).

See Chapter 21 for an in-depth discussion of Illinois automatic filing extensions.

Partnerships do not have to make estimated income tax payments, but may do so voluntarily in 2014 and subsequent years using the Forms IL-516 and IL-516-B. Partners, however, are required to include partnership income in their estimated tax computations, but, because the partnership income is deemed received by the partner on the last day of the partnership’s taxable year, a partner whose tax year is the same as the partnership’s might have no estimated tax obligation using the annualization method of computing his or her required installments and estimated or composite return payments made by the partnership may cover any liability to make estimated payments.

a) IRC § 761 Election

Check this box if you made an IRC § 761 election. ☐

IRC Section 761(a) allows an unincorporated organization, at the request of all its members, to be excluded from treatment as a partnership, if it is:

1) For investment purposes only and not for the active conduct of a trade or business,
2) For the joint production, extraction, or use of property, but not for the purpose of selling services or property produced or extracted, or
3) By dealers in securities for a short period for the purpose of underwriting, selling or distributing a particular issue of securities,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

if the income of the members of the organization may be adequately determined without the computation of partnership taxable income.

Section 100.9750(d)(1)(B) of the IAC supports the above in stating:

"An entity that makes an election under 26 USC 761(a) to not be treated as a partnership is not a partnership for purposes of the IITA"

If the partnership has elected out of partnership treatment, there is no Illinois filing requirement. For entities other than corporations and residents, Illinois returns are only required when there is a liability, and there won't be a liability.

If there is an agreement among the members that the organization be excluded from subchapter K, the organization must make the election, by attaching a statement to the federal Form 1065 for the first taxable year for which the exclusion is desired, by the extended due date for filing the partnership return.

If the election is made at the time of the formation of the organization, no IL-1065 would be required to be filed.

If the election is made subsequent to the formation of the organization and federal Form 1065 and IL-1065 filings, an IL-1065 should be filed in the year of the election checking the box electing out of partnership treatment, so that we know why they are discontinuing filing returns.

The Department would accept the federal filing status (electing out of partnership treatment) unless there is some reason to suspect a specific mistake or to conduct a general audit.

Partnerships that elect Section 761 treatment will not issue Schedules K-1-P, since the partnership does not exist for tax purposes. Nor will they withhold from nonresident partners.

Any income from the partnership will be reflected on the partner's returns.

The IRC § 761 election is also available for qualified joint ventures conducted by a husband and wife who file a joint return for the taxable year, effective for all taxable years beginning after December 31, 2006.

A qualified joint venture is defined by IRC § 761(f)(2) as:

> …any joint venture involving the conduct of a trade or business if –
>
> (A) The only member of such joint venture are a husband and wife,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(B) Both spouses materially participate (within the meaning of section 469(h) without regard to paragraph (5) thereof) in such trade or business, and

(C) Both spouses elect the application of this subsection

Such joint venture shall not be treated as a partnership. All items of income, gain, loss, deduction, and credit shall be divided between the spouses in accordance with their respective interests in the venture. Each spouse shall take into account such spouse's respective share of such items on his or her own separate Schedule C as if they were attributable to a trade or business conducted by such spouse as a sole proprietor.

b) Audit Procedures

Taxable income of a partnership is defined by IITA § 203(e)(2)(H) as:

> ...taxable income determined in accordance with Section 703 of the IRC, except that taxable income shall take into account those items which are required by Section 703(a)(1) to be separately stated...

In auditing the IL-1065, it is imperative to verify all items reported, as well as tracing all items of income and modifications to the individual partner's federal and Illinois income tax returns. Form EDA-92, IL-1065 Auditor's Report, is completed to disclose adjustments proposed in the audit.

If the partnership is a non-filer and presents the auditor with signed original returns, copies should be retained for the audit file and the originals should be forwarded to Audit Planning in Springfield for processing. The statute of limitations will commence running on the date the auditor receives the signed returns. The taxpayer is no longer considered a non-filer.

If the proposed changes result in a no liability audit or a no liability year within the audit period, the only way to process any line change(s) is to complete an IL-1065-X Amended Partnership Replacement Tax Return, (for tax years prior to 2006 an IL-843 Amended Return or Notice of Change in Income) and have the taxpayer sign it. This is necessary because the taxpayer must be given the opportunity to agree or disagree with PROPOSED changes resulting from an audit. That does not occur in a no-liability year or audit because a Notice of Deficiency is issued only when there is an increase (or decrease) in the tax liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If the audit findings create an underpayment or an overpayment, then the auditor must complete an EDA-92, IL-1065 Auditor's Report for Partnerships and accompanying IL-870 (for non-APT audits) and EDA-27.

c) Nexus Issues

A partnership or Subchapter S corporation that has nexus in Illinois creates nexus for its partners (general or limited) or shareholders even if those partners and shareholders are not unitary with the partnership or Sub-S. It states in 86 IAC § 100.9720(f):

> Application of the Joyce Rule. In determining whether the activity of a nonresident taxpayer conducted in this State is sufficient to create nexus for application of Illinois income tax or replacement tax, the principles established in Appeal of Joyce Inc., Cal. St. Bd. of Equal. (11/23/66), commonly known as the "Joyce rule," shall apply. Only activity conducted by or on behalf of the nonresident taxpayer shall be considered for this purpose. **Because the income of a partnership, a Subchapter S corporation or any other pass-through entity is treated as income of its owners, activity of a pass-through entity is conducted on behalf of its owners. Activity conducted by any other person, whether or not affiliated with the nonresident taxpayer, shall not be considered attributable to the taxpayer, unless the other person was acting in a representative capacity on behalf of the taxpayer.** [Emphasis added]

Example: Partnership A is an operating partnership owned 99% by Partnership B, a Delaware limited partner and 1% by Corporation C, the general partner. Partnership A filed an IL-1065 but did not owe any replacement tax because all of its income is subject to a subtraction modification for income distributed to entities subject to replacement tax. The two partners have no connection to Illinois other than through their ownership of Partnership A. The 99% limited partnership and 1% general partner owe replacement tax on its flow-through income from Partnership A since partnerships create nexus for their partners. Borden Chemicals and Plastics, L.P. v. IDOR, Cite: 312 Ill. App. 3d 35; 726 N.E.2d 73; 2000 Ill. App. LEXIS 84; 244 Ill. Dec. 477 (2000).

Although the Illinois partnership or S corporation creates nexus for the partner or shareholder, the Illinois partner or shareholder generally does not create nexus for the partnership or S corporation unless the partner or shareholder "was acting in a representative capacity on behalf of the taxpayer."

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Example: Corp A is headquartered in NY and purchases products from its foreign parent that are drop shipped to Corp A's distribution center in Illinois. However, all non-Illinois destination sales are actually made to Partnership B, which has no Illinois nexus and is owned 100% directly or indirectly by Corp A. Corp A drop ships the products from its Illinois distribution center to B's non-Illinois customers. Title to the goods passes to Partnership B at B's customer locations. Partnership B claims that it does not have Illinois nexus and therefore is not subject to Illinois' sales throwback provisions.

The auditor obtains a copy of the service contract between Corp A and Partnership B which shows that Corp A is responsible for storing the finished product "on behalf of" Partnership B at Corp A's Illinois distribution center. In addition, the auditor is able to document that there is a transfer of inventory from Corp A to Partnership B. Corp A is now acting as an agent of Partnership B and the inventory at Corp A's Illinois warehouse gives Partnership B nexus in Illinois and subjects B to Illinois throwback provisions on products shipped from Illinois to customers in states where B is not subject to tax.

d) Investment Partnerships

Investment partnerships are not subject to replacement tax nor do they have to file IL-1065 returns starting with taxable years ending on or after December 31, 2004. However, an investment partnership can elect to file the IL-1065. If they elect to file an Illinois return, then starting with 2006, the IL-1065 has a "check-the-box" on the front page indicating that it is an investment partnership. If they mark the box, then zeros are entered on all lines after the line for base income or net loss (taxable income net of modifications).

If the investment partnership is an Illinois filer, then it would report all of its income/loss to its partners on Schedule K-1-P. An investment partnership only completes Column A of Steps 3 and 4 of the Schedule K-1-P. Column B of the Schedule K-1-P is left blank leaving the partner to determine if any of the income should be reported to Illinois.

Investment partnerships are not required to withhold from nonresident partners under IITA § 709.5.

Note: See section below on Partners of Investment Partnerships for information on how partners report income from investment partnerships.

The definition of an investment partnership is found in IITA § 1501(a)(11.5) and further explained in 86 IAC § 100.9730. Under that regulation an investment partnership must meet ALL three of the following:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

1. At least 90% of the partnership's total assets must consist of:

    - Qualifying investment securities
    - Deposits at banks or other financial institutions
    - Office equipment and office space needed to carry on the business of the partnership

2. At least 90% of the investment partnership's income consists of interest, dividends, and gains from the sale or exchange of qualifying investment securities.

3. The partnership IS NOT a dealer of qualifying investment securities as "dealer" is defined in IRC § 475(c)(1).

    (Note: If partnership is trading its own account and sells securities on an exchange or to persons it does not deal with directly, the purchasers are not its customers, but customers of the brokers who bought from it. In that event the partnership will qualify as an investment partnership. IRC §475(c))

IITA § 1501(a)(11.5) and 86 IAC § 100.9730(b) list 12 items as "Qualifying Investment Securities":

1. Common and Preferred Stock
2. Bonds, debentures and other debt securities
3. Foreign and domestic currency deposits secured by federal, state, or local government agencies
4. Mortgage or asset-backed securities secured by federal, state, or local government agencies
5. Repurchase agreements and loan participations that are not characterized as loans
6. Foreign currency exchange contracts
7. Stock and bond index securities and futures contracts
8. Options for the purchase or sale of any of the securities, currencies, contracts, and financial instruments mentioned in items 1 through 7 above
9. Regulated futures contracts
10. Certain other commodities not described in IRC § 1221(a)(1)
11. Derivatives (See 86 IAC § 100.9730(b)(11))
12. A partnership interest in another partnership that is an investment partnership

(1) The 90% Tests

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The total assets test is the percentage of the qualifying assets as of the beginning of the taxable year, plus the percentage of qualifying assets as of the end of each month of the taxable year and computing the average of these percentages. The test is on a separate company basis as opposed to a unitary basis. Included in qualifying assets is the cost of office space and equipment necessary to carry on the activities of an investment partnership. Note that the statute does not provide for the inclusion of capitalized rents in the 90% test (Rents times 8 as in the calculation of the property factor).

In addition, it states in 86 IAC § 100.9730(d) Cost of Assets:

> … the cost of an asset shall be determined for federal income tax purposes without regard to depreciation or amortization of the asset, except that the cost of an asset shall include any accrued interest or discount, and shall be reduced by any premium amortization, that has been recognized in the computation of federal taxable income of the partnership and that is included on the partnership's balance sheet as of the date the cost of assets is determined.

The 90% gross income test is total sales minus cost of goods sold and minus the cost of any intangible asset sold or traded. In addition, the gross income for the test must be items included in base income subject to apportionment but would exclude the income from any one-time occasional sale of assets, such as the sale of equipment.

Example 1: A partnership owns a restaurant building in Illinois. The building is leased under a net lease arrangement under which the partnership receives gross rent only. The only expense of the partnership is depreciation. Under the definition of an investment partnership the building owned by the partnership does not meet the definition of “qualifying investment securities”. In addition, the cost of the building is not the cost of a qualifying asset for purposes of IITA § 1501(a)(11.5)(A)(i), nor is the rental income considered qualifying income for purposes of IITA § 1501(a)(11.5)(A)(ii).

Example 2: A partnership makes loans to its partners. The partnership does not qualify as an investment partnership because the partnership's loans to its partners would not be "debt securities" because they are not securities nor are they loan participations because no other lender is involved.

Example 3: Several partnerships operate as general partnerships, single member LLCs and S-Corps. Some elect IRC § 475 mark-to-market accounting to convert capital gains and losses into ordinary gain or loss

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

treatment. Only entities characterized as partnerships for federal income tax purposes may be an "investment partnership". Subchapter S Corporations and single-member LLCs that elect corporate treatment (or that elect to be disregarded and are not owned by a partnership so that they are treated as part of the partnership) cannot qualify.

Example 4: An LLC has 86% of its assets in stocks and bonds. The only other asset is a life insurance policy on the life of one of the members. All the members are related individuals or related beneficiaries of trusts (father, sons, and trusts for the benefit of the sons.) The cost basis in the policy is equal to the premiums paid. All (100%) of the taxable income from the LLC is from the stocks and bonds. Insurance policies are not qualifying assets, so the LLC is not an investment partnership since the 90% asset test is not met.

See 86 IAC § 100.9730 for more information.

A "Investment Partnership 90% Tests" worksheet has been added to the IL-1065 folder in the APT Bundle for use in completing the 90% Total Asset and 90% Gross Income tests.

Partners of Investment Partnerships

Unless there is an integral relationship between the partner and the investment partnership as described below under Business Income Treatment of Income from Investment Partnerships, then IITA § 305(c-5) and 86 IAC § 100.3500(d)(1) treat income passed through from an investment partnership to its partners as nonbusiness income that is allocated to the state of residency if the partner is an individual, or to the state of commercial domicile if the partner is a corporation. Although the statute in IITA § 205(b) gives an effective date of an investment partnership as tax years ending on or after December 31, 2004, the statute on the partnership flow-through in IITA § 305(c-5) does not give an effective date. Therefore, the effective date on the partner flow-through is tax years of an investment partnership ending on or after July 30, 2004, which is the date that PA 93-840 was signed into law.

Example: An investment partnership has a fiscal year-end September 30, 2004 and is owned by non-resident individuals. It has to file an IL-1065 and is subject to replacement tax since its year ends prior to December 31, 2004; however, the income distributed to the nonresidents is nonbusiness income allocated to the state of residency, since the income was distributed from an investment partnership having a tax year ending on or after July 30, 2004.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(3) Election to Treat All Income as Business Income

A partnership that meets the definition of an investment partnership under IITA § 1501(a)(11.5) and 86 IAC § 100.9730 must treat its income as nonbusiness income under IITA § 305(c-5). If an investment partnership files an IL-1065, it does not actually report the income as nonbusiness income but checks the box on the IL-1065 indicating that it is an investment partnership and enters zeros on all lines after base income thereby having the same effect as reporting the income as nonbusiness. Therefore, an investment partnership cannot make the election to treat all income as business income.

However, the partner of an investment partnership can make the business income election under 86 IAC §§ 100.3015(c) and 100.3500(d)(2). In that case the partner will include all of its income from an investment partnership as income subject to apportionment, but under 86 IAC § 100.3500(d)(3) none of the investment partnership's factors will flow up to the partner. See paragraph below for unitary partners.

e) Business Income Treatment of Income from Investment Partnerships

Normally the flow-through income from investment partnerships is treated by the partner as nonbusiness income and allocated to the partner's state of residency, if an individual, or to the state of commercial domicile with respect to corporations. In the case of a nonresident individual the income would be reported as non-Illinois income on the Schedule NR attachment to the IL-1040. In the case of any other non-resident partner the income/loss is eliminated from the partner's net income either as non-unitary partnership income/loss or as nonbusiness income, which on a 2013 IL-1120 is reported on Part 4, lines 24 and 25. There is no factor relief since all of the investment partnership's income or loss is eliminated from base income subject to apportionment.

However, there is an exception to the normal rule above. 86 IAC § 100.3500(d)(2) states that:

> Any income distributable to a nonresident partner shall be treated as business income … if such income is from investment activity:
>
> 1. that is directly or integrally related to any other business activity conducted in this State by the nonresident partner (or any member of that partner's unitary business group) (IITA § 305(c-5)(1));

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

2. that serves an operational function to any other business activity of the nonresident partner (or any member of that partner's unitary business group) in this State (IITA § 305(c-5)(2)); or

3. where assets of the investment partnership were acquired with working capital from a trade or business activity conducted in this State in which the nonresident partner (or any member of that partner's unitary business group) owns an interest (IITA § 305(c-5)(3)).

This allows the income received from the investment partnership to be treated by the nonresident partner as business income, as long as the above tests are met, so that the income or loss is included in net income subject to apportionment. However, the partner does not flow up any factors from the investment partnership if it is unitary because the income remains nonbusiness income in the hands of the investment partnership. Nonbusiness income does not generate any apportionment factors either for the partnership or the partner.

Example 1: In 2008 an investment partnership is owned 99% and 1% respectively by two members of a unitary business group of C-corps. Not only is the investment partnership unitary with its partners but also invests substantial capital through the unitary group. Whether or not the investment partnership files an IL-1065, its income or loss is included in Illinois base income of the unitary group, because it is included in federal taxable income, but the unitary group does not flow up any factors from the investment partnership (i.e. no sales/income items are included in the apportionment factor, both everywhere and Illinois.)

(1) Investment Clubs

For federal income tax purposes, an investment club is considered a partnership. However, pursuant to IRC § 761(a)(1), an unincorporated organization used for investment purposes only, and not for the active conduct of a trade or business (i.e., an investment club), may “opt out” of partnership treatment, in whole or in part, at the election of all of its members. If an investment club makes the Section 761(a) election according to the procedures in 26 CFR § 1.767-2(b), the organization will not be required to file federal Form 1065 and will not be treated as a partnership for Illinois income tax purposes, either. An investment club must file Form IL-1065 if it has not elected to opt out of partnership treatment under IRC § 761(a).

(2) Lottery Partnerships

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

Effective November 30, 1989, any partnerships which have been formed solely to play the Illinois State Lottery will not be responsible for filing Form IL-1065 and paying replacement tax on their earnings. REF: Sunshine Letters IT90-0120 and IT90-0198.

The individual partners report the income on their IL-1040 return including nonresident individuals. Ref: IITA § 303(e). Illinois income taxes withheld on Form W2-G on payments to the partnership may be claimed by the individual partners.

f) Form IL-1065

Form IL-1065 underwent a major revision in 2006 to make it easier to complete and process, although the computation of income subject to tax remains the same. In addition, Schedule M was created in 2006 that itemizes most of the addition and subtraction modifications.

A partnership with Illinois business income must send each partner a Schedule K-1-P, along with the Schedule K-1-P(2) Partner Instructions, to report each partner's share of income, deductions, credits, and recapture amounts.

(1) Portfolio Income

Portfolio income consists of interest, dividends, royalties and any other income from intangible assets. Portfolio income is business income apportionable to non-resident partners based on the partnership's Illinois factor if it is business income of the partnership or if the partnership made the election to treat all income as business income on its IL-1065.

Example 1: A partnership in Chicago is owned 50% by a Subchapter S corporation in Michigan and 50% by a nonresident individual in Indiana. The partnership, which is non-unitary with the Sub S, has an Illinois apportionment factor of 75% and reports $1 million in interest income on federal Schedule K-1, Part III, line 5. The partnership files its IL-1065 and checks the box in Step 1 that elects to treat all income as business income; so the interest income will be business income for both partners under 86 IAC § 100.3015(c). The partnership will send each partner a Schedule K-1-P showing $500, 000 ($1 million x 50%) in Step 4, Column A, line 23, and $375,000 ($500,000 x .75) in Column B. The Indiana individual will include the interest income, along with other business income of the partnership, on Schedule NR, Step 3, Line 15, Columns A & B. The Michigan Sub S will treat the income as business income from a nonunitary partner, and include

the amount apportioned to Illinois by the partnership as Illinois income.

If the partnership determines that the portfolio income is nonbusiness income, then it will be allocable (not apportioned) to the partners under IITA § 305(b) and 86 IAC § 100.3500(c). Each partner will allocate the non-business interest income by applying IITA §§ 301 and 303 and 86 IAC §§ 100.3220 and 100.3300.

Example 2: Same facts as above except that the partnership has determined that the $1 million in interest income is nonbusiness (and the auditor allows it as nonbusiness). Schedule K-1-P for each partner will show $500,000 in Step 3, line 10, Column A only. Nonbusiness interest and dividend income is allocable to the state of residency for non-resident individuals and to the state of commercial domicile of a corporation or partnership under IITA § 301(c)(2) and 86 IAC § 100.3300(b)(2).

(2) Unmodified Base Income

Taxable income of a partnership is defined by IITA § 203(e)(2)(H) as:

> ...taxable income determined in accordance with Section 703 of the IRC, except that taxable income shall take into account those items which are required by Section 703(a)(1) to be separately stated...

Computation of the partnership's taxable income begins with the ordinary income (loss) reported on the federal return. Other items of income, loss and deductions that are required to be separately stated for federal purposes are then taken into account in Steps 2 and 3 of the IL-1065 (for tax years 2006 and after, Part 1A for years through 2005.) in calculating unmodified base income. Those items are obtained from Schedule K of federal Form 1065

Under 86 IAC §100.2405(c)(8)(A) the following pass-through items on the federal Schedule K are included or excluded from unmodified base income on the IL-1065 Steps 2 and 3 (Part 1A, Lines 2 and 4 for years prior to 2006):

- Gains and losses from sales or exchanges of capital assets
- Gains and losses from sales or exchanges of property described in IRC section 1231 (relating to certain property used in a trade or business and involuntary conversions);

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- Charitable contributions under IRC § 170(c);
- Dividends entitled to capital gains treatment under IRC § 1(h)(11) or to the corporate dividends-received deduction under part VIII of subchapter B of the IRC;
- Taxes for which the foreign tax credit may be allowed under IRC § 901, paid or accrued to foreign countries and to possessions of the United States; and
- Any other items of income, gain, loss, deduction or credit as listed in 26 CFR 1.702-1.

IRC § 965 Transition Tax

In 2017, Congress passed the Tax Cuts and Jobs Act of 2017. The law introduced new provisions that changed which earnings, profits, and deductions owners of controlled foreign corporations (CFC) must report. Under the old rules, US taxpayers were generally taxed on all income whether earned in the US or abroad, but foreign income earned by a foreign subsidiary of a US corporation would not be subject to US tax until it was "repatriated" to the US as dividends. So, US taxpayers could defer US taxes on net income by keeping the assets in a foreign company. The new law removes this ability and requires US taxpayers to pay tax on previously untaxed assets. IRC § 965 requires US shareholders as defined by IRC § 951(b) to pay a transition tax on untaxed foreign earnings of certain specified foreign corporations going back to 1987, as if those earnings had been repatriated to the U.S. The transition tax effectively bridges the old rules with the new by taxing certain previously untaxed foreign income.

This new section applies to the last taxable year of specified foreign corporations beginning before 01/01/2018, and the tax is includible in the US shareholder's tax year in which or with which the specified foreign corporation's year ends.

Illinois Modification

For 2017, the IRC § 965 income is reported to the IRS on a statement separate from the federal income tax return. Due to the nature of the separate statement, this income may not be included in the federal taxable income. However, it must be included when determining Illinois Base Income. If the income was not included in the federal taxable income, an Illinois taxpayer must make the appropriate modifications.
Partnerships are required to make the following modification for tax year 2017

	IRC 965 Transition Tax Statement	Form IL-1065
IRC § 965 (a)	Line 1	Step 2, Line 6
IRC § 965 (c)	Line 3	Step 3, Line 11

Attach the Statement to your return.

Any IRC Section 965 income or deduction passed through to partners must be identified by attaching a statement to Schedule K-1-P.

For 2018 tax years and after, the foreign earnings are included in the federal taxable income.

Note: IITA § 203(e)(2)(H) permits a deduction without application of the federal limitations imposed on how much the partner can deduct, such as the charitable contributions deductions.

Note: See 86 IAC § 100.2405(c)(8)(C) for information on special rules covering oil and gas partnerships and the discharge of indebtedness, if applicable to the audit.

Refer to Exhibit A for an example of a 2017 IL-1065 line verification.

(3) Modifications

Prior to the enactment of the Personal Property Replacement Income Tax, partnerships incurred no income tax liability in Illinois. PA 81-1st SS-1 (effective September 19, 1979) added current IITA § 203(d).

If the taxpayer claimed any modifications not listed here, refer to the IL-1065 or Schedule M instructions for that year.

(a) Additions

The IL-1065, Step 4 and Schedule M, Step 2 (Schedule M is for 2006 and after) lists the following addition modifications relating to partnerships.

Refer to Exhibit B and Exhibit C for an example of a 2017 IL-1065 and Schedule M addition modification cite reference.

(i) Federally Tax-Exempt Interest

(IITA § 203(d)(2)(A))

This includes income, which is recorded on the books but not included in the tax return and can be verified through a breakdown of the amount recorded on Schedule M-1 Line 6a (for tax years 1992 and forward) of federal Form 1065. This amount is reported in Step 4 of IL-1065.

Other income exempt from Illinois income tax that is also federally tax-exempt so the income is not included in federal taxable income includes:

- Bonds issued by the governments of Guam, Puerto Rico, Virgin Islands, American Samoa and Northern Mariana Islands
- Mutual Mortgage insurance fund bonds

Since this income is not presently included in federal taxable income, under Illinois law, it must be added back to federal taxable income and then claimed as a subtraction.

This amount is reported on Schedule M, Step 2

For a detailed discussion of this modification, refer to Chapter 24.

(ii) Illinois Income and Replacement Tax Deducted

(IITA § 203(d)(2)(B))

This is the amount of replacement tax subtracted from ordinary income of the partnership and can be verified by obtaining a breakdown of the deductions for taxes on page one of federal Form 1065.

This addition modification passes through to nonresident partners which must report it as a flow-through addition modification (86 IAC § 100.2450(b)). A non-resident individual would include the flow-through on Schedule NR, Step 4, under “Other Additions” (Line 40, Column A & B, for tax years 2009 and forward; line 42 for tax years 2005 thru 2008. For tax years 2007 and prior the line number varied) which would be based on the amounts reported to the partner on Schedule K-1-P, Step 5, line 33, Column A & B (since the inception of the K-1-P in 1998). Although individuals are not subject to replacement tax, IITA § 203(a)(2)(B) requires an addition modification for any deduction for taxes paid under the IITA. The deduction for replacement tax that flows through from a partnership is taken into account in computing adjusted gross income of an individual partner and must be added back.

For a detailed discussion of this modification, refer to Chapter 24.

(iii) Guaranteed Payments to Partners

(IITA § 203(d)(2)(C))

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

Provides an addition modification for "The amount of deductions allowed to the partnership pursuant to IRC § 707(c) in calculating its taxable income." IRC § 707(c) relates to guaranteed payments made to partners. REF: Sunshine Letter IT90-223. These payments are a deduction from income on page one of federal Form 1065. This amount is therefore verified from the applicable line on page one of federal Form 1065. Guaranteed payments under IRC § 707 are just distributions of partnership earnings but are deducted in computing taxable income of a partnership because doing so simplifies the computation of all amounts of income distributable to partners. The addition modification is made so that this distribution of income is included in the net income of the partnership. Guaranteed payments are included in the federal taxable income or adjusted gross income of partners, so the addition does not flow through to the partners.

A partnership may have two types of partners, capital partners and income partners.

- Capital partners have a percentage of ownership in the partnership and receive a distribution of the partnership income based on that percentage. Capital partners may also receive guaranteed payments.
- Income partners do not have a percentage ownership in the partnership but instead receive guaranteed payments based on their employment contract and may also receive annual bonuses based on their performance.

Effective November 17, 2003 86 IAC § 100.3500(a)(4) was added which states:

> Except as provided in this subsection (a), all items of base income of a partner that are derived from the partnership shall be allocated or apportioned pursuant to this Section, including all items required to be separately stated to the partner under IRC section 703(a)(1), all guaranteed payments under IRC section 707(c), and all addition and subtraction modifications, but excluding items described in IRC section 707(a).

Prior to the regulation change it was the Department's position that we would not apportion to Illinois any guaranteed payments issued to non-resident income partners. However, the regulation change above is effective for all years within statute; therefore, all guaranteed payments are subject to apportionment for nonresidents.

All resident partners, capital partners and income partners will include 100% of their guaranteed payments in Illinois base income and then attach

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Schedule CR to their IL-1040 to claim credit for any taxes paid to other states.

Nonresident capital partners and income partners will apportion their guaranteed payments along with their distributive share of net income to Illinois based on the apportionment factor of the partnership.

(iv) Capital Gains Addition

(IITA § 203(d)(2)(D))

Provides for an addition modification for "an amount equal to the amount of the capital gain deduction allowable under the IRC, to the extent deducted from gross income in the computation of taxable income."

For tax years prior to December 31, 1987, IITA § 203(d)(2)(B) allowed an addition modification for "an amount equal to the amount of the deduction allowable under IRC § 1202, to the extent deducted from gross income in the computation of taxable income". At the time, IRC § 1202 allowed a partial deduction from taxable income for income received from capital gains.

Since IRC § 1202 had been repealed for tax years beginning after December 31, 1986, there was no longer a necessity for the addition modification, which was repealed by PA 85-731.

(v) Federal Bonus Depreciation

(IITA § 203(d)(2)(D-5))

For a detailed discussion of this modification, refer to Chapter 24.

The amount of the modification is calculated on IL-4562 and reported on IL-1065, Step 4.

(vi) Bonus Depreciation – Reversal of Subtraction on Disposition or End of Depreciable Life

(IITA § 203(d)(2)(D-6))

For a detailed discussion of this modification, refer to Chapter 24.

The amount of the modification is calculated on IL-4562 and reported on IL-1065, Step 4.

(vii) Related Party Expenses

(IITA §§ 203(d)(2)(D-7), (D-8))
(86 IAC §100.2430)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

For a detailed discussion of this modification, refer to Chapter 24.

Related party expense modification is calculated on the IL Schedule 80/20 and reported on IL-1065, Step 4 and flows-through to the partner on Schedule K-1-P, Step 5.

(viii) Captive Insurance Companies

(IITA § 203(d)(2)(D-9))

For a detailed discussion of this modification, refer to Chapter 24.

The modification is calculated on Schedule 80/20 and reported on IL-1065.

(ix) Section 218 College Prepaid Tuition Credit

(IITA § 203(d)(2)(D-10))

This modification applies to taxpayers who, for tax years ending on or after December 31, 2009 and on or before December 30, 2020, claim a credit for making a matching contribution to a specified college savings plan.

The credit is calculated on Schedule 1299-A. Each partner's share of the credit is reported on Schedule K-1-P, Line 52i.

(x) Domestic Production Activities Deduction

(IITA § 203(d)(2)(D-11))

Effective for tax years ending on or after December 31, 2017, requires an addition for the federal deduction amount allowed under IRC Section 199 as reported on Line 25 of federal Form 1120.

The amount of the addition is reported on Schedule M.

(26 U.S. Code § 199 – repealed. Pub. L. 115-97, title I, § 13305 (a), Dec. 22, 2017, 131 Stat. 2126) for tax years beginning after December 31, 2017

(xi) Business Expense Recapture

(IITA § 203(e)(3)
(86 IAC § 100.2405(d))

No recapture is required relating to investment partnerships. (86 IAC § 100.2405(d)(2)). If the partnership, subchapter S corporation, and trust or

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

estate is required to recapture business expenses, then the partner, shareholder in a subchapter S corporation, or beneficiary of a trust or estate is also required to report the recapture, unless that partner, shareholder or beneficiary elected to treat all income as business income in the subsequent year. (86 IAC § 100.2405(d)(3))

The amount to be recaptured is calculated on Schedule NB and reported on Schedule M.

For a detailed discussion of this modification, refer to Chapter 24.

(xii) Distributive Share of Additions

If the partnership is a partner in another partnership or a beneficiary of a trust or estate, the partnership's distributive share of any additions from any of these entities must be added to the computation of base income. Each of the entities is required to provide the partnership with a federal Schedule K-1, and if the partnership is an Illinois filer, Schedule K-1-P will be sent to each partner indicating the distributable share allocable to Illinois. If the partner is another partnership, then the flow-through addition modification will be reported on the IL-1065 in Step 4.

(xiii) The Amount of Loss Distributable to a Partner Subject to Replacement Tax

Refer to the corresponding subtraction modification Share of Income Distributable to a Partner Subject to Replacement Tax.

(xiv) Lloyd’s Plan of Operation Loss

(IITA § 502(f))

Add back any loss that was included in your adjusted gross income from a Lloyds plan of operation and was reported on Form IL-1023-C (for tax years ending prior to December 31, 2014) or IL-1065 (for tax years ending on or after December 31, 2014).

Income tax on a Lloyd’s Plan of Operation income is taxed separately from the taxpayer’s other income and paid on the taxpayer’s behalf by Lloyd’s. Therefore, if Lloyd’s losses are included in the taxpayer’s FTI (or AGI), it must be added back.

This addition modification is reported on Schedule M.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

(b) Subtractions

The IL-1065, Step 5 and Schedule M (Sch M is for 2006 and after) lists the following subtraction modifications relating to partnerships.

Refer to Exhibit D and Exhibit E for an example of a 2017 IL-1065 and Schedule M subtraction modification cite reference.

(i) Valuation Limitation Subtraction

(IITA § 203(d)(2)(E))

Provides a subtraction modification for the valuation limitation amount, which excludes appreciation attributable to the period prior to August 1, 1969. It is computed on Form IL-1065, Schedule F. Although Replacement Tax on Partnerships began on July 1, 1979, the computation for the Valuation Limitation amount is based on August 1, 1969, the effective date of the Illinois Income Tax. REF: Chen et al., Partners in Monroe-Franklin Properties, Illinois Appellate Court, Cook County, March 30, 1990.

For a synopsis of the Chen case and a complete case citation, refer to Chapter 49 (Old 37).

(ii) Illinois Income Tax Refunds

(IITA § 203(d)(2)(F))

When examining this subtraction modification, it is important to verify the amount of the refund that is actually included in the computation of federal taxable income.

See 86 IAC § 100.2450 for more information.

For a detailed discussion of this modification, refer to Chapter 25.

(iii) Exemptions by Virtue of Statutes or Constitution

(IITA § 203(d)(2)(G))
(86 IAC §100.2470)

Interest income of a partnership is reported on Schedule K as portfolio interest. In order to verify this subtraction, the taxpayer's supporting workpapers should be examined. If this is not sufficient, the bond ledger should also be reviewed. (Some taxpayers may refer to this as the bond account, bond portfolio, etc.) The interest subtracted must be allowable per

Publication 101 and 86 IAC § 100.2470. Finally, it must be verified that the income has actually been included in federal taxable income.

Note: Federally exempt state and municipal interest is subject to an addition modification under IITA § 203(d)(2)(A), but any exempt state and municipal interest listed in 86 IAC § 100.2470(f) is allowed as a subtraction modification under IITA § 203(d)(2)(G) and claimed on the line for U.S. government interest. The auditor should verify that any exempt Illinois state and municipal interest was not received through a mutual fund. Although U.S. Government interest received through a mutual fund is exempt, interest on exempt state and municipal interest received through a mutual fund is not exempt under 86 IAC §100.2470(d).

Income from the following items will be subtracted on Schedule M, Step 3 only if they were required to be added back in Step 2 on Schedule M:

- Bonds issued by the governments of Guam, Puerto Rico, Virgin Islands, American Samoa and Northern Mariana Islands
- Mutual Mortgage insurance fund bonds

For a detailed discussion of this modification, refer to Chapter 25.

(iv) Personal Service Income/Reasonable Allowance for Compensation Paid

(IITA § 203(d)(2)(H))

Allows a partnership, for purposes of computing its personal property tax replacement income tax under Section 201(c) and (d), the following subtraction modification:

> Any income of the partnership which constitutes personal service income as defined in Section 1348(b)(1) of the Internal Revenue Code (as in effect December 31, 1981) or a reasonable allowance for compensation paid or accrued for services rendered by partners to the partnership, whichever is greater.

The IL-1065 instructions state that the subtraction is the greater of:

- Your PSI as defined in the now-repealed IRC § 1348(b)(1); or

- A reasonable allowance for compensation paid or accrued for services rendered by partners to you.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

APPLICABLE FEDERAL STATUTES AND REGULATIONS

Section 1348(b)(1) of the Internal Revenue Code, as in effect on December 31, 1981, provided that "personal service income" means:

> Any income which is earned income within the meaning of section 401(c)(2)(C) or section 911(b) or which is an amount received as a pension or annuity which arises from an employer-employee relationship or from tax-deductible contributions to a retirement plan.

Section 911(b) of the Internal Revenue Code (as in effect on December 31, 1981) deals with income earned by an individual for personal services in a foreign country and provides:

> For purposes of this section, the term "earned income" means wages, salaries, or professional fees, and other amounts received as compensation for personal services actually rendered, but does not include that part of the compensation derived by the taxpayer for personal services rendered by him to a corporation which represents a distribution of earnings or profits rather than a reasonable allowance as compensation for the personal services actually rendered. In the case of a taxpayer engaged in a trade or business in which both personal services and capital are material income-producing factors, under regulations prescribed by the Secretary, a reasonable allowance as compensation for the personal services rendered by the taxpayer, not in excess of 30 percent of his share of the net profits of such trade or business, shall be considered earned income.

Note that Section 1348(b)(1)(A) provided that:

> For purposes of this subparagraph, section 911(b) shall be applied without regard to the phrase ", not in excess of 30 percent of his share of net profits of such trade or business".

Regarding the Code definition of earned income, Treasury Regulation § 1.911-2(b)(3) provided as follows:

> Earned income includes all fees received by a taxpayer engaged in a professional occupation (such as a doctor or lawyer) in the performance of professional activities. Professional fees constitute earned income even though the taxpayer employs assistants to perform part or all of the services rendered, provided the taxpayer's patients or clients look to the taxpayer as the person responsible for the services.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Treasury Regulation § 1.1348-3(a)(2) provided:

> The entire amount received as professional fees shall be treated as earned income if the taxpayer is engaged in a professional occupation, such as a doctor, dentist, lawyer, architect or accountant, even though he employs assistants to perform part or all of the services, provided that the patients or clients are those of the taxpayer and look to the taxpayer as the person responsible for the services performed.

Effective December 18, 2018 the Department adopted Regulation 100.2850 Subtraction Modification for Personal Service Income or Reasonable Allowance for Compensation to Partners (IITA Section 203(d)(2)(H)) to provide guidance on what amounts qualify for the PSI/RC subtraction under IITA 203(d)(2)(H).

GENERAL INFORMATION – THE DEDUCTION

IITA Section 203(d)(2)(H) states that the subtraction modification is equal to the greater of any income which constitutes personal service income or a reasonable allowance for compensation paid or accrued for services rendered by partners to the partnership.

Both prongs (Personal Service Income & Reasonable Compensation) will need to be evaluated.

PERSONAL SERVICE INCOME (PSI)

Only an individual (or grantor trust or estate in the case of income in respect of a decedent) may receive personal service income.

If the partnership is a business performing only personal services (with little to no capital), then the distributive share and guaranteed payment of the individual (or grantor trust or estate in the case of income in respect of a decedent) are included in the subtraction for personal service income.

A partnership that performs only personal services can include accounting, architecture, actuarial science, consulting, engineering, health, law or the performing arts.

When a partnership incurs a loss from a trade or business (as reflected on Line 1, IL-1065), it does not have personal services income.

If the loss is shared by all partners, then there is no increase in the partner's capital account balance for the taxable year, so there can also be no subtraction for reasonable compensation.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

This is not changed even if the partnership makes distributions to the partners during the taxable year.

If the partner received a guaranteed payment, they would be allowed a subtraction for the amount of the guaranteed payment.

If, after reviewing the reported deduction, applying the above guidance and requesting a detailed computation of the deduction from the taxpayer, Auditor is unable to determine if the amount of the deduction claimed is appropriate, the following calculation may be performed.

PSI Calculation

For each tax year, calculate the percentage of service income. This financial information comes from the Form 1065 Schedule K and attached statements, if applicable.

(Note: Calculation is service income (ordinary income from the US 1065) divided by total income (service income plus all other income from the US Schedule K).

Management Fees	$7,484,259
Rental Income	$0
Interest	$71
Dividends	$43,068
Royalties	$0
Short Term Cap Gain	$0
Long Term Cap Gain	$24,865,939
1231 Gain	$0
Other Income	$0
Total	$32,393,337

Ordinary Income	$7,484,259	=	23.10%
Total Income	$32,393,337		

For each tax year, calculate Total IL Income without regard for the Subject to Replacement Tax (SRT) deduction for the PSI/RC deduction.

Income after Add. Mods	$27,520,242
Sub. Mods other than PSI & Sub to RT	$0
Total Income	$27,520,242

For each tax year, multiply the Total IL Income times the percentage of service income.

Total Income	$27,520,242
Service Income %	23%
	$6,358,364

For each tax year, multiply the above number by the ownership percentage NOT subject to replacement tax (partnership ownership percentage from IL-1065 Schedule B). This is the potential PSI deduction, **if it is greater than the amount allowable for RC.**

	$6,358,364
Ownership % not subject to RT	99.98%
PSI not subject to RT	$6,357,092

Percentage of Service Income Calculation:

Management Fees	$7,484,259
Rental Income	$0
Interest	$71
Dividends	$43,068
Royalties	$0
Short Term Cap Gain	$0
Long Term Cap Gain	$24,865,939
1231 Gain	$0
Other Income	$0
Total	$32,393,337

Ordinary Income	$7,484,259	=	23.10%
Total Income	$32,393,337		

PSI Deduction Calculation:

Income after Add. Mods	$27,520,242
Sub. Mods other than PSI & Sub to RT	$0
Total Income	$27,520,242
Service Income %	23%
	$6,358,364
Ownership % not subject to RT	99.98%
PSI not subject to RT	$6,357,092

REASONABLE COMPENSATION FOR SERVICES (RC)

The allowance for reasonable compensation is equal to the sum of the distributive shares of all partners who render services to or on behalf of the partnership of the income of the partnership, to the extent that the distributive share would have been allowed as a deduction to the partnership under 26 USC 162 (IAC § 100.2850(c)).

26 CFR 1.162-7(b)(3) limits the deduction for compensation for services to a reasonable allowance:

"it is, in general, just to assume that reasonable and true compensation is only such amount as would ordinarily be paid for like services by like enterprises under like circumstances."

Per Legal, in other words, what would the partner's salary be if one could be paid?

IAC § 100.2850(c)(1)

…the amount allowed under this subsection… with respect to any partner may not exceed the increase, if any, in the capital account balance of the partner for the taxable year of the partnership in which the subtraction is claimed…without regard to contributions of money or property by the partner and without regard to distributions of money or property to the partner, but including a guaranteed payment made to the partner.

Increase in Capital Account Balance

If the Partnership reports book capital under 26 USC 704 Partner's distributive share (verified by taxpayer checking the box for "Section 704(b) book" on Schedule K-1, Section L), then the subtraction modification would be limited to the increase reflected on Schedule K-1, Section L. If the partnership reports tax capital, GAAP, or something else, then the information in Section L may not reflect the limitation.

Independent Investor Test

The taxpayer may establish a presumption of reasonableness under the "independent investor test". The premise behind the independent investor test is that an independent investor will demand a certain level of return on investment. If the return received is at or above that level, the compensation being paid by the entity is presumptively reasonable.

In Exacto Spring Corp. v. Commissioner, 196 F.3d 833 (7th Cir. 1999), the court held that where an amount claimed as compensation for services rendered satisfies the "independent investor test" there arises a rebuttable presumption that such compensation is reasonable and therefore deductible under 26 USC 162(a)(1). Accordingly, where income of the partnership is allocated to partners in such amounts as to result in a satisfactory return on partnership capital, a rebuttable presumption shall arise that any remaining amount of income allocated to partners for services actually provided to the partnership is a reasonable allowance and therefore deductible under this Section. (See also, Menard, Inc. v. Commissioner, 560 F.3d 620 (7th Cir. 2009); Mulcahy, Pauritsch, Salvador & Co. Ltd. v C.I.R., 80 F.3d 867 (7th Cir. 2012) ("When a thriving firm that has nontrivial capital reports no … [taxable] income, it is apparent that the firm is understating its tax liability".)

It is up to the taxpayer to establish that a presumption of reasonableness arises under the independent investor test, not for us to calculate it.

Auditors can ask for an allocation between return on capital versus labor and support for why the allowance is reasonable.

The Department may rebut the taxpayer's reported reasonable compensation showing the amount claimed exceeds a reasonable amount, that was the result of extraneous factors, such as:

- An unexpected discovery of oil under the company's land,
- Or that the company intended to pay the owner/employee a disguised dividend (rather than salary);
- Partner does not work for the partnership;
- Conflict of interest;

- Relation of partner's compensation to that of other partners in the partnership;
- Economic conditions.

If the partnership's trade or business incurs a loss (as reflected on Line 1, IL-1065), the partnership may have investment income that could support a subtraction for reasonable compensation.

THE PARTNERSHIP

Understand what trade or business your partnership is conducting. Is it strictly a personal services business or is capital a material income-producing factor?

THE PARTNER(S)

A. Analyze the partner(s) on the IL-1065, Schedule B

1. Partners that have the box in Section B, Column D checked are not eligible for the subtraction. Income distributed to these entities is subtracted from partnership income as Subject to Replacement Tax on the IL-1065. As such, the partnership is allowed a subtraction modification under IIA § 203(d)(2)(I). (Individuals, estates, or grantor trusts and other disregarded entities whose grantors or owners are individuals or estates are **not** subject to this tax.)

2. A Partner who is an individual (or grantor trust or estate in the case of income in respect of a decedent), may not be allowed the deduction if the partner is NOT providing a service that is generating income for the partnership. For example: a non-participating spouse who has a partnership interest but does not provide any services to the partnership. [IAC § 100.2850(c)]

3. A Partner who is an individual (or grantor trust or estate in the case of income in respect of a decedent), may be allowed the deduction if the partner IS providing a service that is generating income for the partnership. The partnership income needs to be analyzed, as well as, the services the partner provides to the partnership.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

B. Determining whether the partner is acting in his capacity as a partner or as an unrelated party (26 CFR §1.707-1)

Transactions in which the partner is acting as an unrelated party:

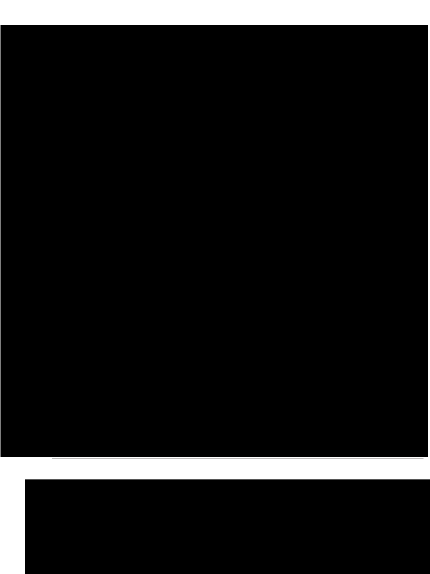
- Loans of money or property by the partnership to the partner or by the partner to the partnership
- Sale of property by the partner to the partnership
- The purchase of property by the partner from the partnership
- The rendering of services by the partnership to the partner or by the partner to the partnership
- Where a partner retains the ownership of property but allows the partnership to use such separately owned property for partnership purposes (i.e. to obtain credit or to secure firm creditors by guaranty, pledge, or other agreement)

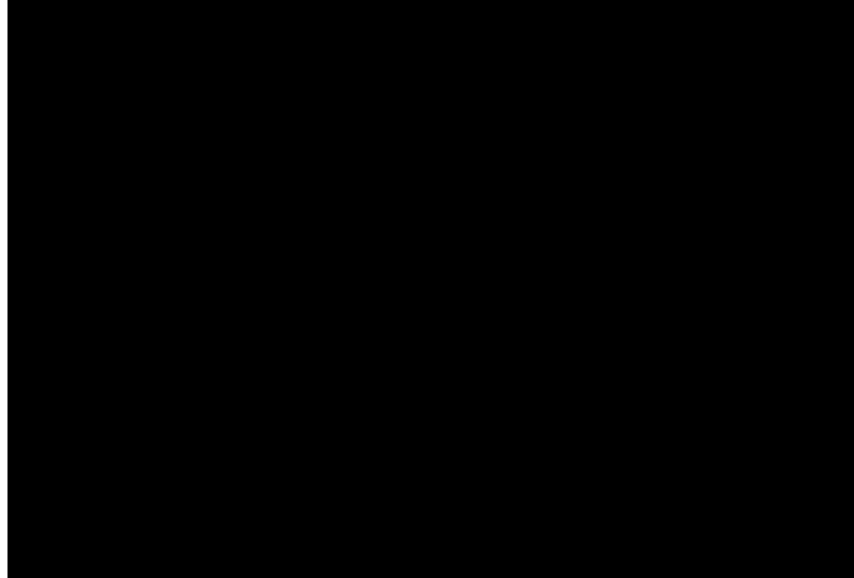
When a partner is acting in a capacity as other than a partner, the partnership is allowed a deduction in the computation of its taxable income, and therefore no PSI/RC deduction may be taken for that partner.

C. GenTax Research

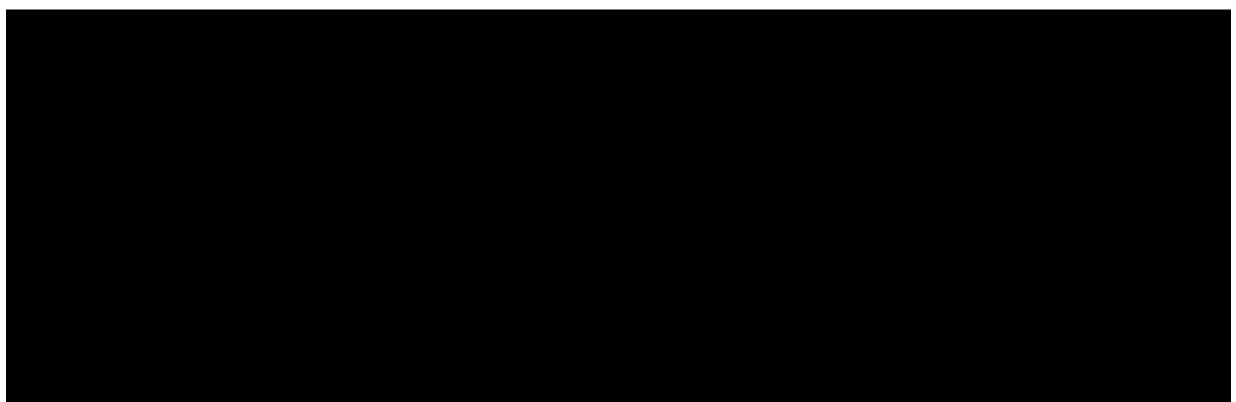
SSN in Multiple Pships/Scorps
This report will show what IL pass-through business an individual is a partner in and receives a K-1.

Under **Managers-Report-Report List**
Type "SSN" in the search line, ENTER
Select "SSN in Multiple Pships/Scorps"



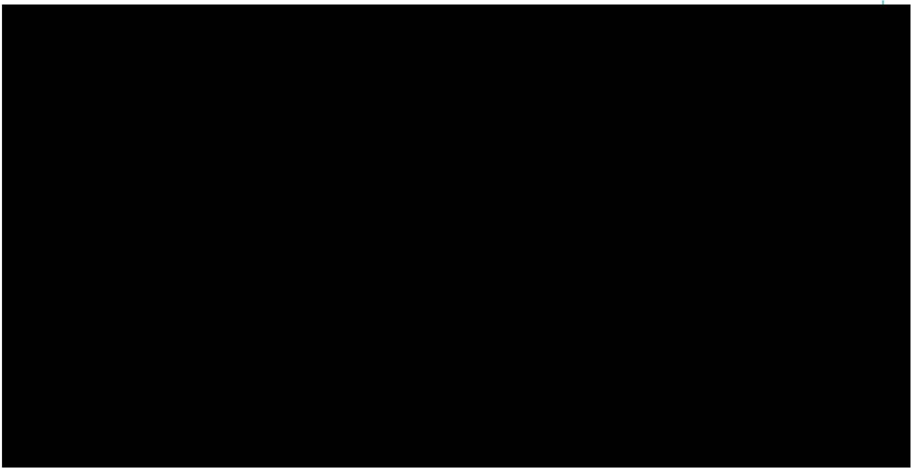


Type Partner “SSN” in box, ENTER



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

A list of FEINs will appear (if any) that show what other businesses the partner is associated with and their filing periods.



PARTNERSHIP INCOME

Auditor needs to determine what kind of income the partnership has reported. The partnership may report earned income, passive income, or both. Only "earned income" may be used in determining the personal services income deduction. If the partnership sells property, then capital is likely material, and only that portion of the income attributable to services will be considered "earned income."

To determine the type of income, review the taxpayer's Form 1065. If additional documentation is needed for review, it is noted.

- Document required – Form 1065, pages 1-5 with the federal K-1s issued; Partnership agreement

Form 1065, Line 3-Gross Profit: The partnership is either providing a service or selling a tangible item. It is likely that the partner(s) is/are providing some type of service to the partnership.

Form 1065, Line 4-Ordinary Income from Other partnerships/estates/trusts: The partnership is receiving this income from another entity. The auditor needs to explore whether the partner(s) provides a service in generating that income. Only the portion of the income attributable to services will be considered "earned income" and includable in the deduction for PSI.

- Documents required – K-1(s) issued to taxpayer by every entity included in this amount; Partnership/Management Agreement between Partnership receiving the income and the partnership flowing the income to the partnership being audited.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Form 1065, Line 5-Net farm profit/loss: The partnership most likely owns a farm. The auditor will need to determine if the partner(s) is the person actually farming or if the farm is under the management of another.

- Document required – Form 1040, Schedule F

Form 1065, Line 6-Net gain/loss for Form 4797 (Sale of Business Property): A determination needs to be made if the property was used in the generation of income. The auditor needs to determine if the gain/loss will be included in the deduction calculation. Includable only in the calculation for reasonable compensation.

- Document required – Form 4797

Form 1065, Line 7-Other income: The auditor needs to obtain the statement explaining the figure on this line. The auditor needs to explore whether the partner(s) provide service in generating that income.

- Document required – Statement that should have been attached to Form 1065

Form 1065, Schedule B, Line 2 & 3b: Note how these questions are answered.

Form 1065, Schedule K, Line 1-Ordinary business income (loss) – If amount is zero or a loss the partnership does not have personal services income. Refer to discussion of Personal Service Income and Reasonable Compensation above for further clarification.

Form 1065, Schedule K, Lines 2, 3a-Rental income/loss: The partnership typically owns commercial or residential rental property. The auditor needs to determine if the partner(s) provide service in generating that income.

- Documents required – Form 8825 for each rental property owned by the partnership; Partnership/Management Agreement

Form 1065, Schedule K, Line 4-Guaranteed payments: If there is an amount here, there should be an addition on the IL-1065. The deduction may be limited to this payment amount depending on the Partnership/Management Agreement

- Documents required – Partnership/Management Agreement

Form 1065, Schedule K, Line 5-Interest Income: This is typically passive income. Partner(s) do not perform any service to earn this type of income. It is usually earned on investments or other such types of assets.

- Document required- If "Statement attached" listed, obtain it

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Form 1065, Schedule K, Lines 6a, 7-Dividends, Royalties: This is typically passive income. Partner(s) do not perform any service to earn this type of income. It is usually earned on investments or other such types of assets.

- Document required-If "Statement attached" listed, obtain it

Form 1065, Schedule K, Lines 8, 9a, 10-Capital gain/loss: Amounts reported on these lines are not "earned income" and therefore cannot be included in the subtraction for PSI but can be used in the RC subtraction.

Form 1065, Analysis of Income: Review this table to see how the taxpayer reports which of its partner(s) are passive versus active in the partnership and general versus limited partner(s).

Analysis of Net Income (Loss)

1	Net income (loss). Combine Schedule K, lines 1 through 11. From the result, subtract the sum of Schedule K, lines 12 through 13d, and 16l					1	70,890.
2	Analysis by partner type:	(i) Corporate	(ii) Individual (active)	(iii) Individual (passive)	(iv) Partnership	(v) Exempt organization	(vi) Nominee/Other
a	General partners						
b	Limited partners			4,785.			66,105.

Just because partners are considered limited or inactive does not mean they do not have a separate employee relationship with the partnership that would allow them personal service income.

- Document required – Partnership Agreement; Any other contract or agreement

Once the auditor has determined the type(s) of income, a PSI and RC analysis needs to be completed, to determine which is larger.

ADDITIONAL GUIDANCE

A. A distribution by the partnership subject to 26 USC 731 (gain or loss on distribution) is treated as a return of capital and/or gain from the sale or exchange of the partnership interest of the distributee partner, and therefore, in no event may a distribution be included in the amounts computed under subsections (b) and (c). (IAC § 100.2850(a)(2)(B))

B. No amount may be deducted by the partnership for the transfer of a partnership interest in connection with the performance of services. (IAC § 100.2850(a)(3)(B)

C. Self-Employment Income (Schedule K Line 14a) is not reflected in the calculation of PSI or RC. Self-employment income is not included in any of the rules or regulations for calculating personal service income or a reasonable allowance.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

D. If all the partnership income is portfolio income (interest, dividends, royalties, etc.) this is NOT earned income and therefore cannot be included in the personal services calculation but can be included in the calculation for reasonable compensation.

E. Auditor's should familiarize themselves with the court cases cited in the new regulation (IAC § 100.2850) to learn about how to apply the PSI/RC subtraction.

- Estate of Tilton, 8 BTA 914 (1927)
- Exacto Spring Corp. v. Commissioner, 196 F.3d 833 (7th Cir. 1999)
- Menard, Inc., v. C.I.R., 560 F.3d 620, 623 (7th Cir. 2009)
- Brewster v. C.I.R., 607 F.2d 1369 (D.C.Dir. 1979)

PRIOR YEARS SERVICES

Per Legal, compensation for prior years may be taken in current years when it can be shown that a PSI/RC allowance was not taken because the partnership was in a loss state in the previous year and was unable to do so for the partner(s) providing the service(s).

REASONABLE CAUSE

Note: This subtraction modification does not flow through to the partners on Schedule K-1-P and is not subject to a subtraction modification even for those partners that are partnerships, nor is it included in the computation of income on a composite return (IL-1023-C) under 86 IAC § 100.5130(a)(2)(A).

(v) Share of Income Distributable to Partner Subject to Replacement Tax

(IITA § 203(d)(2)(I))

This modification on the IL-1065 is labeled as "Share of income distributable to a partner subject to replacement tax". Since the pass-through entity is subject to replacement tax on its share of flow-through income from the partnership, there would be a double taxation if the partnership also paid replacement tax on the same base income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

This modification originally appeared as:

> An amount equal to all amounts of income distributable to an entity subject to the Personal Property Tax Replacement Income Tax imposed by subsections (c) and (d) of Section 201 of this Act.

Public Act 85-731, effective for taxable years ending on or after December 31, 1987, amended this Section of the IITA to add the provision "...including amounts distributable to organizations exempt from federal income tax by reason of Section 501(a) of the Internal Revenue Code."

IRC § 501(a) is the statute that exempts organizations listed in IRC § 401(a) and §501(c) from tax. IRC § 401(a) deals with qualified pension plans. IRC § 501(c)(3) exempts churches, charitable organizations and educational organizations. Income distributed to these types of partners should be allowed as a subtraction on the IL-1065, Part 5, Line 27 (for tax years 2006 and later.)

For purposes of this subtraction modification, an investment partnership that meets the requirements under IRC § 761 and elects out of the partnership provisions is NOT an entity subject to replacement tax because no federal or state return is required.

The effect of the modification is to ensure that if a partner in a partnership is subject to Replacement Tax on its distributive share of the partnership's income, this distributive share is not also included in the partnership's base income, thereby creating a double taxation on the same income. Conversely, if the partner has a loss from the partnership, the amount of the loss used to offset the Replacement Tax liability of the partner, is added back to the partnership's unmodified base income. The effect of PA 85-731 was to clarify that the partnership may also take this subtraction modification for amounts distributed to partners who are exempt from federal income tax. The amounts distributed to these types of partners were always eligible for the subtraction modification. REF: Sunshine Letter IT87-0043.

The amount reported comes from Schedule B.

For tax years ending on and after December 31, 2014, use Column E total. Each partner's share is calculated using the Column E Worksheet included with the Schedule B Instructions.

For tax year ending on or after December 31, 2007 and before December 31, 2014, use Column D total. Each partner's share is calculated using the Column D Worksheet included with the Schedule B Instructions.

If the partnership has income as reported on the Schedule B, the income amount is reported as a subtraction. If the partnership has a loss instead of income, then an addition modification will be reported for “The amount of loss distributable to a partner subject to replacement tax”.

The addition modification for “the amount of loss distributable to a partner subject to replacement tax” and the subtraction modification “income distributed to a partner subject to replacement tax” DOES NOT pass through to shareholders on Schedule K-1-P, nor are they included in the computation of income on a composite return (IL-1023-C) under 86 IAC § 100.5130(a)(2)(A).

For Tax Years Prior to 12/31/2007

In order to determine the amount of the modification, the following worksheet should be completed. For all partners subject to Replacement Tax (or exempt from federal taxation by reason of IRC § 501(a)), enter their share(s) of distributable income. Multiply each line reference in the worksheet by the percentage of total ownership in the partnership attributable to these partners.

1.	Enter the partner’s share(s) of their distributable income included in Line 13	________		
2.	Enter the partner’s share(s) of State, Municipal and Other interest income include in Line 15	________		
3.	Enter the partner’s share(s) of “other additions” Line 22	________		
4.	Add Lines 1, 2 and 3		________	
5.	Enter the partner’s share(s) of interest income from U.S. Treasury Obligations from Line 24	________		
6.	Enter the partner’s share(s) of “other subtractions” Line 33	________		
7.	Add Lines 5 and 6		________	
8.	Subtract Line 7 from 4			
	If result is positive, enter it as a subtraction modification			________
	If the result is negative, enter it as an addition modification			________

Form IL-2569, Personal Property Replacement Tax (Partner’s Annual Certification), must be filed with the IL-1065 to support the subtraction

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

modification. This is a one page form which lists the partnership and the name, address and FEIN of the partner paying the replacement tax.

If the taxpayer failed to give their partners a Schedule K-1-P and we have evidence that certain partners were subject to replacement tax but did not file an Illinois return, including foreign entities, we cannot amend form IL-2569 to exclude income distributed to those partners. Under IITA § 203(d)(2)(I) it states: "An amount equal to all amounts of income distributable to an entity subject to the [replacement tax] ..." Because of the way this subtraction modification is worded no proof is required that they filed an Illinois return. We would have to allow the subtraction modification and then audit the partners, including any foreign entity that should have filed. The auditor is responsible for bringing any nonfilers into compliance, even if the partner is out-of-state. The audit supervisor can request assistance from BIT Discovery or from other audit supervisors to close the audits on the partners.

If trusts and estates are listed on form IL-2569 the auditor should verify if the trust is subject to tax on the IL-1041 because grantor trusts do not file IL-1041s. Also, estates are not subject to replacement tax even though they file an IL-1041. Income distributed to an IRA account is considered income distributed to a trust because the IRA is subject to tax on any unrelated business taxable income.

Note: Information previously reported on the IL-2569 is included on Schedule B for tax years ending on or after December 31, 2007.

For Tax Years Prior to 1988

If this modification results in a negative amount, it is added back on the "other additions" modification line and explained. If, however, the modification results in a positive amount, it is added to the "amount equal to the share of income distributable to a partner subject to Illinois replacement tax" amount.

(vi) Expenses to Carry Tax-Exempt Interest Subtraction

(IITA § 203(d)(2)(J))

For a detailed discussion of this modification, refer to Chapter 25.

(vii) Enterprise / River Edge Redevelopment Zone Dividends

(IITA § 203(d)(2)(K))
(86 IAC §100.2480)

For a detailed discussion of this modification, refer to Chapter 25.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The Enterprise Zone Dividend Subtraction was eliminated for tax years ending on or after December 31, 2013.

The subtraction is reported in Step 5 of the IL-1065 and calculated on an IL Schedule 1299-A.

If the partnership is a partner in another partnership, shareholder in an S corporation or a beneficiary in a trust, the amount of the deduction the partnership may claim will be reflected on a K-1-P or K-1-T.

(viii) Job Training Project Contributions

(IITA § 203(d)(2)(L))

For a detailed discussion of this modification, refer to Chapter 25.

The subtraction modification is reported on Schedule M, Line 26 for tax year 2017 and Line 25 for tax years 2016-2011. (For tax years 2010 and prior the line numbers vary.)

(ix) Foreign Trade Zone (Sub-Zone)/High Impact Business Dividends

(IITA § 203(d)(2)(M))

For a detailed discussion of this modification, refer to Chapter 25.

The subtraction is reported in Step 5 of the IL-1065 and calculated on an IL Schedule 1299-A.

If the partnership is a partner in another partnership, shareholder in an S corporation or a beneficiary in a trust, the amount of the deduction the partnership may claim will be reflected on a K-1-P or K-1-T.

(x) Claim of Right Subtraction

(IITA § 203(d)(2)(N))

For a detailed discussion of this modification, refer to Chapter 25.

This subtraction is reported in Step 3 of Schedule M.

(xi) Federal Bonus Depreciation

(IITA § 203(d)(2)(O))

For a detailed discussion of this modification, refer to Chapter 25.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The amount of the subtraction is calculated on the IL-4562 and reported in Step 5 of the IL-1065.

(xii) Bonus Depreciation – Reversal of Subtraction on Disposition or End of Depreciable Life

(IITA § 203(d)(2)(P)

Refer to Chapter 25 for details regarding this subtraction modification.

The amount of the subtraction is calculated on the IL-4562 and reported in Step 5 of the IL-1065.

(xiii) Related Party 80/20 and Noncombination Rule

(IITA § 203(d)(2)(Q, R, S & T))

For a detailed discussion of this modification, refer to Chapter 25.

The amount of the subtraction is calculated on the Schedule 80/20 and reported in Step 5 of the IL-1065.

For tax years ending on or after December 31, 2017, the non-combination rule is eliminated.

(xiv) Subtraction Modification "Flow-Through"

If the partnership is a partner in another partnership, a shareholder in an S corporation or a beneficiary of a trust or estate, the partnership's distributive share of any subtractions from any of these entities is subtracted in the computation of base income. Each of the entities must provide the partnership information showing what subtraction modifications have "flowed through" to that partner, shareholder, etc. Be sure that these amounts have been included in the partnership's unmodified base income and that they are allowable subtractions to the partner.

If the entities distributing the income file Illinois income tax returns, this amount can be verified on Schedule B of the IL-1065 or IL-1120ST; or Schedule D of the IL-1041 as the partnership's share of subtraction modifications.

This subtraction modification is reported on the IL-1065, Step 5, Line 32.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(xv) Lloyd's Plan of Operation Income

(IITA § 502(f))

Subtract any income that was included in your adjusted gross income from a Lloyds plan of operation and reported on Form IL 1023-C (for tax years ending prior to December 31, 2014) or IL-1065 (for tax years ending on or after December 31, 2014).

Income tax on a Lloyd's Plan of Operation income is taxed separately from the taxpayer's other income and paid on the taxpayer's behalf by Lloyd's. Therefore, if Lloyd's income is included in the taxpayer's FTI, it must be subtracted out.

This subtraction modification is reported on Schedule M.

(xvi) Retirement Income

The partnership could receive federal 1099-R distributions for social security income and retirement income; however, this income is not subject to a subtraction modification on the IL-1065. Under IITA § 203(d)(2) the computation of base income for a partnership starts with the partnership's federal taxable income (as defined in IITA § 203(e)(2)(H)), which is then modified by the statutorily prescribed addition and subtraction items. Regarding the modification items, IITA § 203(h) states that unless expressly provided there shall be no modifications to federal taxable income when computing Illinois base income.

IITA § 203(d)(2) does not contain a subtraction modification for retirement income. Although IITA § 203(a)(2)(F) does allow individuals a subtraction modification for certain types of retirement income, no such modification applies to the IL-1065.

The flow-through income to the individual could be exempt. IITA § 203(a)(2)(F) provides the following subtraction modification:

> An amount equal to all amounts included in such total pursuant to the provisions of Sections 402(a), 402(c), 403(a), 403(b), 406(a), 407(a) and 408 of the Internal Revenue Code, or included in such total as distributions under the provisions of any retirement or disability plan for employees of any governmental agency or unit, or retirement payments to retired partners, which payments are excluded in computing net earnings from self-employment by Section 1402 of the Internal Revenue Code and regulations adopted pursuant thereto.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The subtraction modification allowed to individuals is limited to distributions from qualified retirement plans under federal law, government plans, and certain payments to retired partners. The information provided does not allow for a determination that the annuity income in this case qualifies for the subtraction modification under IITA § 203(a)(2)(F). See Publication 120 on Retirement Income for more information.

(4) Illinois Base Income

Illinois base income is computed in Step 6 of the IL-1065. Step 6 of the IL-1065 is the same as Step 4 of the IL-1120. Like the corporate return, this section is only completed if the partnership earned income from sources both within and without Illinois. Base income of partnerships, including limited partnerships, is apportioned and allocated among Illinois and other jurisdictions in the same manner as it is allocated or apportioned for any other nonresident. REF: IITA § 305(c).

Note: For taxable years ending on or after December 31, 2004 partnerships that meet the definition of an investment partnership under IITA § 1501(a)(11.5) and 86 IAC §100.9730 are not subject to tax under IITA § 305(c-5) and its income is distributable as nonbusiness income allocated to the partner's state of residence (if an individual) or state of commercial domicile for any other entity.

In order to compute the Illinois base income of a partnership, total base income must first be classified as either business or nonbusiness income. Nonbusiness income is eliminated in Step 6. Business income received from other partnerships, trusts and estates is then eliminated on Line 37 to arrive at apportionable business income.

Business income of a partnership is apportioned under IITA §304 and 86 IAC §§ 100.3500 and 100.3380(d).

For an in-depth discussion of auditing the apportionment formula, refer to Chapter 27.

Nonbusiness income (loss) allocable to Illinois is added back in Step 6, Line 44.

Business income received from other partnerships, trusts and estates, which is apportionable to Illinois, is added back in Step 6, Line 45 in order to arrive at base income or loss allocable to Illinois.

The following paragraphs discuss several of the above income items in detail.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(a) Nonbusiness Income

Nonbusiness income of a partnership or S corporation is determined in the same manner as that of a "C" corporation for Illinois income tax purposes.

For an in-depth discussion of business v. nonbusiness income, refer to Chapter 26.

Generally speaking, the ordinary income of a partnership or S corporation, by its very nature, will be business income to the partnership or S corporation. However, be sure to verify this. Any other income may or may not be business income. IN MAKING THIS DETERMINATION, IT DOES NOT MATTER HOW THE INCOME IS CHARACTERIZED ON THE FEDERAL FORM 1065 or 1120S RETURN. A business/nonbusiness determination is made based upon 86 IAC § 100.3010. Allocation of nonbusiness income is under IITA § 303 and 86 IAC § 100.3220.

If the partnership is an Illinois filer, then the determination of whether or not income is business or nonbusiness income is made by the partnership and not the partner. Business activities of the partner are irrelevant. Ref: 86 IAC § 100.3500(b)(1).

For taxable years beginning on or after January 1, 2003, an Illinois partnership that files an IL-1065 can elect to treat all income as business income under 86 IAC § 100.3015 by checking a box on the original return filed by the due date (including extensions). If a partnership, estate, trust or S corporation makes this election, any such election is binding on the partners, beneficiaries and shareholders under 86 IAC § 100.3015(c). If the partnership, S corporation, trust or estate does not make the election to treat all income as business income, then it must apply the rules in 86 IAC § 100.3010 to determine whether the income is business or nonbusiness.

Nonbusiness income is allocated by the partners as though it were paid directly to the partners in their separate capacities (86 IAC § 100.3500(c)). If the partnership has no nexus and does not file an IL-1065, then there is no election and the partner or shareholder must determine what income, if any, is nonbusiness under 86 IAC § 100.3010.

When determining nonbusiness income, do not include any income that was subtracted in Step 3 of the IL-1065. This income is no longer in base income and, therefore, would not be a part of the business/nonbusiness income classification.

A partnership may also have nonbusiness income from partnerships in which it was a partner, or from trusts or estates of which it was a beneficiary. In

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

order for this income to be classified as nonbusiness income, it must have been so classified by the entity which generated the income. If the partnership is claiming any nonbusiness income from partnerships, trusts, and/or estates, this amount should be verified by obtaining a copy of the Illinois income tax return of the pass-through entity which generated the income. Partnerships will show the flow-through amount on Schedule B of the IL-1065 and Schedule K-1-P, and trusts and estates show this amount on Schedule D and Schedule K-1-T. If a partnership receives nonbusiness income from another partnership, trust or estate, then that income is allocated by the receiving partnership as if each item of income had been paid, incurred, or accrued directly to that partnership in its separate capacity. REF: IITA § 305(b).

Example 1: Partnership A is currently under audit. In the course of the audit, it is determined that Partnership A is a partner in Partnership F and Partnership G. Both Partnership F and Partnership G file IL-1065 returns and have individual partners. Partnership F reports $100,000 in business income and Partnership G reports $50,000 in business income and $20,000 in nonbusiness income on their respective IL-1065's.

Partnership A has a 50% interest in each partnership. Partnership A will report partnership business income of $75,000 and will determine whether or not the $10,000 of nonbusiness income is taxable in Illinois based upon the nonbusiness income rules in 86 IAC § 100.3220, applied as if it had received that income directly rather than through Partnership G.

Example 2: ABC Partnership, which conducts business in Illinois and Wisconsin, has an Illinois apportionment factor of 40%. In 2007, ABC Partnership earned nonbusiness interest income from the investment of funds (in the amount of $25,000) which it allocated to Wisconsin on its IL-1065. Partnership X, which is commercially domiciled in Illinois, has a 50% interest in ABC partnership. Therefore, $12,500 in nonbusiness interest income from ABC Partnership will pass through to Partnership X.

This interest income will be treated as nonbusiness income allocable to Illinois because Partnership X is commercially domiciled in Illinois. Ref: 86 IAC §§ 100.3220(f) and 100.3300(b)(2). The income will be subtracted on Partnership X's IL-1065 as nonbusiness income on Step 6, Line 36 and added back as nonbusiness income allocable to Illinois on Step 6, Line 44 (based on 2013 line references).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

> Note: In both examples in which nonbusiness income was claimed and allowed, the taxpayer could have business expenses subject to recapture under 86 IAC § 100.2405(d).

In certain instances, Step 6 of the IL-1065 may not be completed. It is very common for a partnership to have zero base income. The partnership normally accomplishes this by subtracting all of its unmodified base income through either the subtraction modification for personal service income or for partners subject to replacement tax. In this situation, a partnership may or may not file an IL-1065. A partnership is not required to file an income tax return if it does not have sufficient business activity in Illinois to establish nexus in this State or if it has no income allocable to Illinois. However, the partnership may be required to withhold tax from income flowing through to nonresident partners and, for tax years ending on or after December 31, 2014, will be required to file an IL-1065 to report the withholding.

If the partnership from which the partner is receiving income does not file an IL-1065, or does not complete Step 6, it may be necessary to audit the partnership. This may have to be done in order to determine if any of the income should be considered nonbusiness income of the partnership and to establish the proper apportionment formula for the amount of income which is determined to be business income of the partnership.

As a practical matter, if the partnership (from which the partner receives income) is not commercially domiciled in Illinois, it is doubtful whether any income of the partnership would be taxable to the partner in Illinois, unless the partner and the partnership are unitary. If the partnership earned any income from tangible sources which is allocable to Illinois, they should be filing a return. (Be alert for any information which may indicate that the partnership SHOULD be filing Illinois returns.) Any intangible income earned by the partnership which is passed through to the partner would normally only be taxable to the partner if the partner was commercially domiciled in Illinois. With the above information in mind, take a look at all of the Schedule K-1's of the partnership which is being audited to see if there is any tax potential in Illinois. If so, this should be pursued. When allowing nonbusiness income be sure it is net of any deductions which are allocable to it and make sure that there are no business expenses subject to recapture under 86 IAC § 100.2405(d).

(b) Partnership Business Income

A partnership may be a partner in several partnerships. The business income (loss) from each of these partnerships should be eliminated on the IL-1065, Step 6, but only if the partnership is not unitary with the partners. If they are unitary, then the flow-through partnership income is included in base income

and there is no income or loss elimination. Business income or loss from each of the partnerships is then separately apportioned based on that partnership's Illinois apportionment factor. If the partnership had no activity in Illinois, the income would simply be eliminated as non-unitary partnership income or loss. However, if the partnership had any income which was earned in Illinois, the income the partner receives from that partnership must be separately apportioned based on that partnership's formula. The partner's share of the Illinois partnership business income is then added back on Step 6, Line 45 of the IL-1065.

Example: Partnership K is a partner in XYZ Partnership and ABC Partnership. Both XYZ Partnership and ABC Partnership have business activity within and without Illinois and, therefore, file IL-1065's. XYZ Partnership has an Illinois apportionment formula of 60% and ABC Partnership has an Illinois apportionment formula of 25%. Partnership K receives business income from XYZ Partnership in the amount of $150,000. Partnership K also receives a partnership business loss from ABC Partnership in the amount of ($10,000).

If Partnership K is not unitary with XYZ Partnership or ABC Partnership, then Partnership K will subtract $140,000 on Step 6, Line 37 of its IL-1065. Partnership K will then add back $87,500 as partnership business income allocable to Illinois (on Step 6, Line 45) which is computed as follows:

($150,000 x .6) - ($10,000 x .25) = $87,500

IITA § 305(a) and 86 IAC § 100.3500(b) require that business income of a partnership flow through to the nonresident partners as business income to those partners. This flow through is reported to the partner on Schedule K-1-P, Step 4, Column A, which is based on each partner's distributive share of the partnership's income for the taxable year. The partner's percentage can be found on Schedule B (for tax years 2006 and prior) of the distributing partnership's IL-1065. In order to determine the partner's share which is allocable to Illinois, obtain a copy of the IL-1065 for that partnership. In some cases, several partnerships may be conducting business in Illinois. If so, copies of the IL-1065's for all of the partnerships should be obtained, the total allocable to Illinois from each partnership should be added together and included on Step 6 for non-unitary partnership business income or loss apportionable to Illinois. If the flow-through income is from unitary partnerships, those unitary partnerships' income will be included in base income subject to apportionment, and the flow-through sales numerator and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

denominator will be included in with the partnership's own sales numerator and denominator. (86 IAC § 100.3380(d)(2)(A))

Partnership income received by a partnership can be included in any type of income (loss) on the Schedule K-1.

A partnership may be a beneficiary of an estate or trust (fiduciary). Business income (loss) from trusts and estates is allocated per IITA § 307(a). This income must be subtracted from base income in order to arrive at apportionable business income of the partnership. The amounts come from Schedule K-1-T, Step 4 supplied by the fiduciary and are carried to the partnership's IL-1065, Step 6. The fiduciary should have supplied the partnership with Schedule K-1-T(2) Beneficiary's Instructions.
IITA § 307(a) requires that the business income of an estate or trust flow through to a nonresident beneficiary as business income. This is computed by multiplying the beneficiary's distributive share of the fiduciary's income by the fiduciary's apportionment formula and is reported to the beneficiary on Schedule K-1-T, Step 4, Column B.

(c) Illinois Net Loss / Deduction

The Illinois net loss from a partnership or subchapter S corporation does not flow through to partners or shareholders and therefore is not reported to the partner or shareholder on Schedule K-1-P. Illinois net losses of a partnership can only be used by the partnership. Ref: 86 IAC § 100.2330(f)(4)(C).

The amount reported as an Illinois net loss deduction is calculated on the Schedule NLD.

For more detailed information regarding INOL Carryforward/Carryback provisions, refer to Chapter 35.

(d) Credits

(i) Form IL-477 Replacement Tax Investment Credit (RTIC)

Replacement Tax Investment Credits are calculated on Form IL-477 (IL-1120, IL-1065, IL-1120-ST, IL-1041, IL-990-T or IL-1023-C (for tax years 2010 and forward)).

(a) For Tax Years Ending on or After December 31, 2000

The RTIC will automatically flow through to partners and S corporation shareholders subject to replacement tax. The amount allocable to partners and shareholders not subject to replacement tax will remain with the partnership or S corporation. (Ref: 86 IAC § 100.2101(h)(2))

The new automatic pass through applies only to the RTIC earned during the taxable year and does not apply to carry forwards. (Ref: 86 IAC § 100.2101(h)(2)(B).

(b) For Tax Years Ending Before December 31, 2000

IITA § 201(e) allows partnerships an election to pass the RTIC that they are entitled to through to their partners. This change was considered effective on August 17, 1997 when the change became law. However, this position was challenged in Borden Chemicals & Plastics, L.P. v. Zehnder, 312 Ill. App. 3d 35 (2000). The court ruled in favor of the taxpayer and required the Department to apply the pass-through election retroactively. Therefore, because of this decision, the Department has decided to adopt the policy to allow all partnerships to elect to pass through RTIC to their partners for all years that the statutory period is open. If they make this election, all of the credit must be passed through to the partners even if they are not subject to replacement tax. The amount of RTIC that the partnership is entitled to include is the credit earned in the taxable year and any allowable RTIC carried forward.

The RTIC can only be carried forward five years from the year that it is earned. Therefore, the auditor must verify when the entity earned the RTIC and how many years it carried the credit forward before passing it through to the partners.

Recapture of the investment credit is required if the property ceases to qualify. The amount to be recaptured is calculated on Form IL-4255.

For more detailed information regarding the RTIC, refer to Chapter 36.

(ii) Schedule 1299-A

Subtraction modifications and credits for partnerships and S corporations are calculated on Schedule 1299-A Tax Subtractions and Credits (for IL-1065 and IL-1120-ST filers only).

Below is a list of subtraction modifications and credits (as of 2017) on Schedule 1299-A for partnerships and S corporations, along with the applicable regulation.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(a) Subtraction Modifications, Step 1

- Dividends from River Edge Redevelopment Zones (86 IAC § 100.2480)

- Dividends from High Impact Business within a Foreign Trade Zones (or sub-zones) (86 IAC §100.2490)

- Contribution to a zone organization (Form IL-1120-ST filers only) (IITA § 203(b)(2)(N)).

- Interest income from a loan secured by River Edge Redevelopment Zone, or High Impact business property (Form IL-1120-ST financial organizations only) (86 IAC § 100.2655)

(Enterprise Zone Subtractions were removed from the Schedule 1299-A beginning in tax year 2013.)

(b) Credits, Step 2

- Film Production Services Tax Credit (86 IAC § 100.2185)

- Enterprise Zone or River Edge Redevelopment Zone Investment Credit (River Edge Redevelopment Zone Investment Credit expired for tax years beginning on or after July 12, 2016) (86 IAC § 100.2110)

- Tax Credit for Affordable Housing Donations (86 IAC § 100.2190)

- Economic Development for a Growing Economy (EDGE) Credit (86 IAC § 100.2198)

- Research and Development Credit (originally expired for tax years ending after December 31, 2015) (86 IAC § 100.2160) P.A. 100-0022 retroactively restored the credit for tax years ending after December 31, 2015. A supplemental Schedule 1299-A (R&D) has been designed to allow the credit to be claimed for the 2016 tax year.

- Ex-Felons Jobs Credit (IITA § 216)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- Veterans Jobs Credit (expired for tax years ending after December 31, 2016) (IITA § 217)

- Student-Assistance Contribution Credit (IITA § 218)

- Angel Investment Credit (originally expired for tax years ending after December 31, 2016) (IITA § 220)(86 IAC § 100.2171) P.A. 100-0328 has retroactively restored this credit for tax years ending after December 31, 2016.

- New Markets Credit

- River Edge Historic Preservation Credit (IITA § 221)

- Live Theater Production Tax Credit (IITA § 222)

- Hospital Credit (IITA § 223)

- Historic Preservation Credit (expired for tax years ending after December 31, 2015) (IITA § 219)

All income credits on 1299-A are distributable by partnerships and S corporations and require Schedule K-1-P to support distributive share amounts. Pass-through amounts applicable to each partner/shareholder are reported in Step 5 (subtractions) and Step 7 (credits) on Schedule K-1-P.

If the partnership/S corporation is a partner in a partnership or a shareholder in an S corporation, any deductions or credits reported on Schedule K-1-P are to be claimed on Schedule 1299-A.

Refer to Chapter 36 for more details regarding credits.

g) Schedule B Partners' or Shareholders' Identification

The Schedule B is used to:

- Identify any person (***both resident and nonresident***) who was a partner or shareholder at any time during the tax year.
- Identify partners or shareholders subject to Illinois Personal Property Tax Replacement Income tax.
- Figure the share of distributable income or loss that is to be added or subtracted from partnership's/S corporation's base income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

For these reasons, it is important to verify that Schedule B is completed correctly.

For Tax Years Ending on or After December 31, 2014

The Illinois Schedule B was redesigned to report certain items of income and credits reported to partners or shareholders, and pass-through withholding payments made on behalf of ***nonresident*** partners or shareholders. Amounts that would have been reported on behalf of a partnership's or S corporation's members on Form IL-1023-C and Form IL-1000 must now be reported on the Illinois Schedule B since those forms were eliminated for tax years ending on and after December 31, 2014.

Schedule K-1-P, Schedule K-1-P(3) (or Schedule K-1-P(3)-FY), as applicable and all of Schedule B, Step 2 must be completed before completing Schedule B, Step 1.

Note: Schedule(s) K-1-P(3) and K-1-P(3)-FY are new forms for tax years ending on and after December 31, 2014 and are explained in the Pass-through Withholding Calculation section.

The completed Schedule B is used to support amounts reported on the following:

Schedule B	IL-1065	IL-1120-ST
Step 1, Line 8	Step 8, Line 59	Step 8, Line 58
Step 1, Line 3 (if a negative)	Step 4, Line 21	Step 4, Line 20
Step 1, Line 3 (if a positive)	Step 5, Line 27	Step 5, Line 24

For Tax Years Ending prior to December 31, 2014

Starting with tax years ending on December 31, 1998 Schedule B, Partners' or Shareholders' Identification, is included with Form IL-1065 and IL-1120-ST. Schedule B is the required schedule for listing the entity's partners' and shareholders' information, and must be provided to the Department if any income is passed to a partner or shareholder.

For tax year ending December 31, 2009 the amount shown on Schedule B, Step 2, Line 7 will be reported as follows:

Schedule B	IL-1065	IL-1120-St
Step 2, Line 7 (if a negative)	Step 4, Line 21	Step 4, Line 20
Step 2, Line 7 (if a positive)	Step 5, Line 27	Step 5, Line 24

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

For tax years ending on or after December 31, 2007 and on or before December 31, 2008 the amount shown on Schedule B, Step 2, Line 8 will be reported as follows:

Schedule B	IL-1065	IL-1120-ST
Step 2, Line 8 (if a negative)	Step 4, Line 21	Step 4, Line 20
Step 2, Line 8 (if a positive)	Step 5, Line 27	Step 5, Line 24

Prior to 1998 the Schedules B and C were included with the Form IL-1120-ST, before being replaced with Schedule B in 1998.

Effective January 1, 1993 through 1997 partnerships were not required to submit Schedules B and C along with their IL-1065 due to an amendment to Section 502(d) of the IITA; however, the partnership was to retain this information and to furnish it to the Department upon request.

Prior to 1993 the partnership attached to its IL-1065, Schedules B and C which listed each partner by name, SSN or FEIN, and each partners' share of pass-through addition and subtraction modifications, tax credits and recapture amounts.

h) Schedule K-1-P

Schedule K-1-P was created so that the partnership/S corporation could report to each individual or entity who was a partner/shareholder with its share of business and nonbusiness income, flow-through modifications, credits, recapture, and pass-through entity payments. Prior to 1998 the Department had no designated form for the partnership to send to the partner to indicate the pass-through amounts thereby requiring that the partnership create its own form or schedule to send to their partners.

Partners and shareholders that receive Schedules K-1-P are instructed to attach them to their Illinois returns. The partnerships and S corporations that issue the K-1-Ps are not to attach them to their own respective Form IL-1065 or IL-1120-ST; however, they are to retain copies of each issued K-1-P available for Department inspection upon request.

Schedule K-1-P(1) contains the instructions used by the partnership or S-corporation to complete the Schedule K-1-P. In addition, the taxpayer must send each partner or shareholder Schedule K-1-P(2) Partner's and Shareholder's Instructions. Refer to those instructions for more information.

The Schedule K-1-P was prescribed by the Department to provide notification to partners/shareholders of any Illinois income that is allocated to them from a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

partnership/S corporation. The schedule is for the convenience of the partner/shareholder. The Department has not taken the position that the schedule is necessary for full compliance. This means that the taxpayers are not required to utilize the K-1-P that is issued to them when they file their Illinois returns. If taxpayers receive what they believe to be an incorrect Schedule K-1-P, a corrected K-1-P should be obtained.

Not all of the addition and subtraction modifications flow through to the partner/shareholder. The Schedule K-1-P lists all of the flow-through modifications and credits.

If the taxpayer has reported any other pass-through addition modifications, refer to the instructions on the Schedule K-1-P(1) or Schedule M.

Although the partnership/S corporation is required to report the addition and subtraction modifications to its partners/shareholders, not all partners/shareholders can claim the deduction on their respective Illinois returns.

Schedule K-1-P, Step 3, Column B for Illinois nonbusiness income

Step 3 lists the following items of nonbusiness income:

- Interest, dividends, and gain (loss) on the sale of intangible personal property:

  Interest and dividend income is allocated to the state of residency if an individual, trust or estate, or to the state of commercial domicile if a corporation. Ref: 86 IAC § 100.3300(b)(2). Gain on the sale of intangibles is allocated to the state of commercial domicile if received by a corporation. Ref: 86 IAC § 100.3220(b)(3). For an individual, trust or estate Column B is zero if the partner/shareholder has an out-of-state address. If the partner/shareholder is a corporation with an Illinois address, then the instructions to the Schedule K-1-P say to copy the Column A amount into Column B. The amount in Column A should coincide with the partner's percentage share on the federal Schedule K-1.

- Rental Income, royalty income, gain or loss on the sale of tangible personal property or real property:

This income is generally allocated to the state where the property is located that generated the income. Ref: 86 IAC §§ 100.3220(c) & (d). If there is a gain on the sale of tangible personal property, then the income is allocated to the situs of the property, or to the commercial domicile if the taxpayer is not taxable in the state of situs. Ref: 86 IAC § 100.3320(b)(2). Therefore, the instructions to the Schedule K-1-P say that the Step 3, Column B amount representing Illinois

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

nonbusiness income should be the shareholder's share of the Schedule NB, Column B amount.

Schedule K-1-P, Step 4, Column B for Illinois business income

Step 4, Column A represents the member's share of the U.S. Schedule K-1, less any nonbusiness income reported in Step 3. The Column B amount representing Illinois business income is the Column A amounts multiplied by the Partnership's/Subchapter S corporation's Illinois apportionment percentage or, in the case of income flowed up from another partnership or a trust or estate, to the extent apportioned to Illinois by the entity that flowed the income through to the partnership.

i) Nonresident Partners

Partners, other than residents, are required to allocate to Illinois their distributive share of the business income of the partnership which is allocated or apportioned to Illinois by the partnership. Partners allocate to Illinois their distributive shares of the partnership's nonbusiness income as if such income had been paid, incurred or accrued directly to the partners in their separate capacities. That is, with respect to nonbusiness income, a partner follows IITA § 303 to determine whether an item of nonbusiness income should be allocated to Illinois. REF: IITA § 305(b) and 86 IAC § 100.3500(c).

IITA § 305(a) separately apportions distributive shares of partnership business income received by nonresidents based on the partnership's apportionment percentage in Illinois. However, if there is a unitary relationship between a corporate partner and the partnership, 86 IAC § 100.3380(d) will apply. This regulation provides that a partner's distributive share of partnership income is apportioned with the partner's other business income if there is a unitary relationship.

A nonresident partner's share of the partnership's taxable income apportionable and allocable to Illinois is computed on Schedule B and reported to the partner on Schedule K-1-P.

Under 86 IAC § 100.3500(b)(1) it is the partnership that makes the decision which income is business or nonbusiness income based on the partnership's activities. That is, the business income determination is based on the facts at the entity-level that earned the income, not at the subsequent flow-through levels (partners, shareholders, etc). Income that is nonbusiness is reported to the partner on Schedule K-1-P, Step 3, Column A. Column B is to report the partner's share of Illinois nonbusiness income. For partners that are individuals with an Illinois address on the last day of the taxable year, Column B is left blank because an Illinois resident reports all of his income to Illinois, but then attaches

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Schedule CR to his IL-1040 to claim credit for taxes paid to other states (86 IAC § 100.2197). Column B of Step 3 of the K-1-P is only for nonresident individuals and for all partners that are partnerships, corporations and S corporations.

For partners of investment partnerships, only Column A is completed, attaching the Schedule K-1-P(2), to allow the partner to make its own determination.

Note: Non-resident owners of partnerships, subchapter S corporations and trusts are now subject to withholding on their distributions (86 IAC § 100.7035). Refer to Pass-through Entity Withholding section.

j) Auditor's Report

The Auditor's Report for the IL-1065 is Form EDA-92. Schedule B information should be included as an audit schedule.

Any changes to the IL-1065 in audit will generally affect every nonresident partner's Illinois taxable income and may affect the resident partner's income. If so, the auditor will be responsible for making the changes to every partner's return, unless the partnership agrees to pay the tax by filing an IL-1000 or IL-1023-C, if none were originally filed, or an IL-1023-C-X or IL-1000-X amending previously filed forms (for tax years ending prior to December 31, 2014) or IL-1065 or IL-1065-X, as applicable (for tax years ending on and after December 31, 2014). Additionally, in the course of completing the IL-1065 audit, a compliance check must be done to determine if all partners are filing Illinois income tax returns. See Form IL-1000 (for tax years ending prior to December 31, 2014) or Form IL-1065 (for tax years ending on and after December 31, 2014) and 86 IAC § 100.7035 for withholding requirements.

If taxable income is increased per audit and/or it is determined there are nonresident partners who are nonfilers; these partners can be referred for audit. Refer to Chapter 20 Audit Procedure, Referrals.

k) Exemption Due to Foreign Treaty

A partner could claim that income from an Illinois partnership is exempt due to a foreign treaty. The starting point with any Illinois return is federal taxable income. If the treaty exempts the income from federal taxation, then it would automatically apply to Illinois since federal taxable income would be zero.

Even if the income is included in federal taxable income, it could be exempt from Illinois taxation by certain treaties such as the 1951 Consular Officers Convention which covers certain employees that work in consular offices. To the extent that

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

any employees in Illinois are covered by that treaty, they would claim a subtraction modification under IITA § 203(a)(2)(N).

To the extent that income is included in federal taxable income that the taxpayer claims is exempt due to a treaty, then we would have to examine that treaty. Below is a web site that the auditor can review that lists treaties with other countries:

https://www.irs.gov/businesses/international-businesses/united-states-income-tax-treaties-a-to-z

B. S Corporations

1. Federal Taxation

Under the Subchapter S Revision Act of 1982, the S corporation is treated as a conduit in which all S corporation items pass through to the shareholders while retaining any special tax characteristics. REF: IRC § 1363. The pass through to each shareholder is based on that shareholder's percentage of stock ownership on each day of the taxable year. The purpose of this Act was to give S corporation shareholders the same tax treatment as partners in a partnership.

S corporation shareholders must elect S corporation status for taxation. Currently, the additional requirements that must be met per IRC § 1361(b) are an S corporation:

- Must be a domestic corporation. That is, it must be a corporation that is either organized in the United States or organized under federal or state law.

- May not have more than 100 shareholders. A husband and wife and the estate of either one or both, are treated as one shareholder, regardless of how they own the stock. The limitation on the number of shareholders has changed over time. In 1996 the limitation was increased from 35 to 75 and in 2004 it was increased again from 75 to the current 100.

- May only have one class of stock. IRC § 1361(b)(1)(D) requires that a small business corporation have only one class of stock. This generally means that each share of stock carries identical voting rights, dividend rights, and liquidation preferences. IRC § 1361(c)(4) provides, however, that if the only difference in the shares of common stock is voting rights, that difference will not prevent the corporation from being treated as having only one class of stock.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- Cannot have a nonresident alien as a shareholder.

- Can only have individuals, estates or certain trusts as shareholders.

Consent to be treated as an S corporation is binding and may not be withdrawn after the corporation makes a valid election. An election is effective for the entire taxable year of the corporation and for all succeeding years unless it is terminated. The election to be treated as an S corporation is made on federal Form 2553.

Subchapter S status may be terminated automatically or by revocation. Revocation is achieved by timely consent of all shareholders. Generally, once S corporation status is terminated, a new election cannot be made for five years.

Certain domestic corporations are ineligible to elect S corporation status:

- Financial institutions, which are banks as defined in IRC § 585(a)(2) or § 593.

- Insurance companies taxed under Subchapter L.

- Corporations electing application of IRC § 936 (companies electing the possession tax credit.)

- DISC'S or former DISC'S.

- Members of an affiliated group.

REF: IRC § 1361(b)(2).

a) Post – 1982 Federal Law

Federal Public Law 97-354 significantly changed the taxation of S corporations under the IRC for tax years beginning after 1982. As a result, an S corporation functions primarily as a conduit for transferring income and loss items directly to the shareholders who report such items on their own income tax returns. S corporation income received by shareholders is no longer treated as dividend income but is treated similarly to the way partnership income is treated. A federal election to "opt out" of the federal changes was allowed for casualty insurance companies and certain corporations with oil and gas production.

S corporation income is classified as separately stated and nonseparately stated income (loss). Nonseparately stated income (loss), which is also called ordinary

income (loss), is essentially gross income less deductions, excluding the separately stated items. This is computed on page one of the 1120-S. Ordinary income of S corporations is taxable to the shareholders.

"Separately stated items" are items of income (including tax-exempt income), loss, deduction, or credit, the separate treatment of which could affect any shareholder's liability. REF: IRC § 1366(a)(1). Examples include short-term or long-term capital gains, gains or losses under IRC § 1231, charitable contributions, investment interest expense, interest on all-savers certificates, dividends qualifying for exclusion and tax-exempt income.

b) Permitted (Required) Year

The Tax Reform Act of 1986 did not change the rule under IRC § 1378 which stated that an S corporation's taxable year must be a "permitted year".

A permitted year

- is either a calendar year, or
- any other accounting year for which the corporation shows a business purpose that is satisfactory to the IRS.

Any deferral of income to S corporation shareholders is not a business purpose that permits an S corporation to use a taxable year other than a calendar year. Under the pre-86 law, a corporation that made its election to be an S corporation before October 20, 1982 was allowed to retain a taxable year that was not a permitted year if certain conditions were met. Under the Tax Reform Act of 1986, the taxable year of every S corporation must be a permitted year.

Another exception to the permitted (required) year-end is available under IRC § 444. An S corporation may elect, under this section, to have a different year-end, if certain conditions are met. Generally, IRC § 444 applies to the first taxable year beginning after December 31, 1986.

c) Short Year Returns

If a corporation changed its taxable year to comply with the Tax Reform Act of 1986 taxable year rules, such a change would result in a short taxable year. When the short year and another taxable year of the S corporation both end within one taxable year of a shareholder, the shareholder's S corporation income from both taxable years will be included in that taxable year.

S corporations that changed their taxable years to comply with the Tax Reform Act of 1986, issued separate K-1's to the shareholders for both the twelve month

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

and the short year return. The S corporation should have marked the "short taxable year" box on the K-1 to distinguish clearly between the two K-1's. Federally, shareholders could elect to pro-rate the short-year income over four years or report all of the short year income in 1987. If taxpayers used the four-year prorating method, the taxpayers included on their federal return, their distributive share of income from the twelve-month return and 1/4 of the income shown on the short-year K-1. REF: 26 CFR § 18.1366-5(b).

For Illinois purposes, we are bound by the taxpayer's federal treatment of the short-year income as reflected in the taxpayer's AGI. REF: Sunshine Letter IT88-101. Additionally, under IITA § 403(a), State, Municipal and other interest income which is added back in the computation of Illinois base income may also be pro-rated over the four-year period, if this method has been elected. However, keep in mind that the four-year proration of the short-year period income takes place solely at the shareholder level.

IRC §1363(d) provides that the LIFO recapture amount is to be added to the income of a corporation electing S corporation status for its last taxable year as a C corporation. The increase in tax from this recapture amount is to be PAID in four equal installments, one-fourth due on the due date of the last C corporation return and one-fourth due on the due dates of the corporation's return for the succeeding three taxable years.

Since nothing in the IITA, nor the Regulations, permits an extension of time for PAYING the tax due, the additional Illinois tax resulting from the inclusion in gross income of the LIFO recapture amount pursuant to IRC § 1363(d) cannot be paid in four equal installments for Illinois purposes. REF: Sunshine Letter IT88-0338 & IT91-270.

Terminations resulting from revocation or from a change in the S corporation's status can become effective on a specific date other than the beginning of a taxable year. IRC § 1362(e) provides that if an S corporation status terminates on any day other than the first day of a taxable year, the regular taxable year is divided into two short years. That part of the taxable year ending before the date of termination is treated as a short year subject to provisions for an S corporation. That part of the taxable year beginning with the date of termination is treated as a short year subject to provisions for a C corporation. REF: IRC § 1362(e).

26 CFR § 1.1372-4(b)(5)(iv)(a) provides that "gross receipts" are the total amounts received or accrued by a corporation under its method of accounting used to compute taxable income. IRC § 1362(d)(3)(C) also provides, for years beginning after 1982, that the net gains from the sale of capital assets (other than stock or securities) are included in determining gross receipts.

d) Federal Form 1120-S

Federal Form 1120-S is filed by a domestic corporation that has elected to be treated as a Small Business Corporation (S corporation) for federal income tax purposes. The election is made by filing federal Form 2553 with the IRS. The return is due on the 15th day of the third month following the close of the taxable year.

Income and expenses derived only from a trade or business activity are considered in determining the ordinary income (loss) of the S corporation. These items are reported on page one of federal Form 1120-S. The supporting schedule for Cost of Goods Sold is reflected on federal Form 1125-A for tax years 2011 and forward. (Cost of Goods Sold was reported on Schedule A (federal Form 1120-S) for tax years 2010 and prior). Various informational data about the S corporation is required to be answered on the federal return. As with partnerships, ordinary income (loss) for the S corporation is then carried to Schedule K (Shareholders' Shares of Income, Credits, Deductions, Etc.). Note that income from other rental activities and portfolio income are entered directly on Schedule K.

Note also, that, if a C corporation has assets whose fair market value exceeds their tax basis at the time it elects S corporation status, the S corporation may be taxed on this “built-in gain” when the assets are sold. Amounts on the Schedule K (including operating income) are reported net of any related built-in gains tax incurred by the S corporation, so the operating income on the Schedule K may be less than the amount reported on page 1 of the Form 1120-S.

Federal Form 8825 was developed to report income and expenses from rental real estate activities of a partnership or S corporation. It replaced the former lines 2a and 2b of Schedule K (Form 1120-S). The net income (loss) from the rental real estate activities is reflected on Schedule K.

Schedule K of the federal Form 1120-S is a summary schedule of all the shareholders' shares of the corporation's income, credits, deductions, etc. Schedule K-1 (Form 1120S) is prepared for each shareholder and shows each specific shareholder's separate share of the income, deductions, credits, etc. included in the S corporation figures on Schedule K.

The S corporation's balance sheet is reflected on Schedule L. Schedule M-1 is the Reconciliation of Income per Books with Income per Return. Tax-exempt interest on line 5a of this schedule is verification for state, municipal and other interest that is required as an addition modification on the IL-1120-ST. The Analysis of Accumulated Adjustments Account, Other Adjustments Account and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

Shareholders' Undistributed Taxable Income Previously Taxed is shown on Schedule M-2.

2. Illinois Taxation

Every S corporation (as defined in IRC § 1361(a)) which has Illinois net income or loss, or is qualified to do business in Illinois and is required to file federal Form 1120-S, is required to file an IL-1120-ST with the Department. A corporation is qualified to do business in Illinois if it is incorporated in Illinois or if it has a certificate of authority to do business in Illinois issued by the Illinois Secretary of State. REF: Sunshine Letters IT88-241 and IT88-264. An IL-1120-ST is required to be filed with the Department on or before the 15th day of the third month following the close of the taxable year.

S corporations do not have to make estimated Income Tax payments. Their resident shareholders, however, are required to include S corporation income in their estimated tax computations. As S corporations are only subject to Replacement Tax, they did not incur any tax liability in Illinois prior to July 1, 1979. Replacement Tax is assessed on S corporations at a rate of 1.5%.

Public Act 83-1352 changed the Illinois taxation of S corporation income for years ending on or after September 8, 1984 to be consistent with the federal changes made by Public Law 97-354. The effect of this change was to treat income in much the same manner as partnership income. Effective September 8, 1984, Subchapter S distributions are generally treated as apportionable (if business) or allocable (if nonbusiness) and taxable in the hands of the shareholders in accordance with IITA § 308.

Nonresident shareholders who formerly did not incur a liability under the IITA because dividends received by nonresident individuals were not allocated to Illinois, are now taxed on their share of S corporation income to the extent it is apportioned or allocated to Illinois. However, the IITA includes an "opt out" provision based on the federal "opt out" provision. REF: Sunshine Letters IT85-1049 and IT85-0616.

During the period after 1982, but before September 8, 1984, Illinois law did not reflect the federal changes; therefore, the Illinois tax liability of nonresident S corporation shareholders begins with income from S corporation tax years ending on or after September 8, 1984.

Unless a corporation has in effect a federal election to "opt out" of the provisions of the Subchapter S Revision Act of 1982 and has instead applied the prior federal Subchapter S rules as in effect on July 1, 1982, the base income of a Subchapter S corporation is apportioned pursuant to IITA § 301 through § 308. Illinois resident shareholders will have all of their S corporation income allocated

to Illinois. The respective shares of nonresident shareholders, in business and nonbusiness income of the Subchapter S corporation, is apportioned and taken into account pro rata pursuant to IITA § 308(a) and (b).

a) Illinois Definition of a Subchapter S Corporation

86 IAC § 100.9750(c) provides the following definition of a Subchapter S corporation:

> The term "subchapter S corporation" means a corporation for which there is in effect an election under section 1362 of the Internal Revenue Code, or for which there is a federal election to opt out of the provisions of the Subchapter S Revision Act of 1982 and have applied instead the prior federal subchapter S rules as in effect on July 1, 1982. (IITA Section 1501(a)(28))
>
> 1) Any corporation that has elected subchapter S corporation status for federal income tax purposes is automatically a subchapter S corporation for purposes of the IITA until its status as a subchapter S corporation is terminated for federal income tax purposes. No separate election is required.
>
> 2) Under 26 USC § 1361(b)(3), the separate existence of a "qualified subchapter S subsidiary" is disregarded and the assets, liabilities and other items of the qualified subchapter S subsidiary are attributed to the parent subchapter S corporation. Accordingly, for all purposes of the IITA, a subchapter S corporation and its qualified subchapter S subsidiaries shall be treated as a single subchapter S corporation.

b) Unitary Groups

An S corporation can be a member of a unitary group with C corporations, but they cannot be an eligible member of the combined return. (Ref: 86 IAC § 100.5201(i)). Although each Illinois nexus C corporation is a member of the combined group, an S corporation must file a separate unitary return since the IL-1120-ST has a different tax rate from C corps. A unitary group can be composed solely of S corps; however, they cannot file a combined return. Each unitary IL-1120-ST must be filed on a separate, unitary basis. The only exception would be if the Subchapter S corporations were considered QSSS's (Qualified Subchapter S Subsidiaries) for federal purposes.

The instructions on how to include a subchapter S corporation in the unitary group are in the Schedule UB Instructions. Refer to the UB Instructions for each year for specific line references.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Steps 2 and 3 of each separately filed Form IL-1120-ST must be completed showing only the Subchapter S corporation's separate-company items. These amounts are carried to the Schedule UB.

The amounts on each member's Form IL-1120-ST addition modifications reported in Step 4 and the subtraction modifications in Step 5, not including the income or loss distributable to a shareholder subject to replacement tax, are carried to Schedule UB, Step 3, and will be included in the last column for combined totals. The Schedule UB contains the instructions for carrying the other lines.

Unitary everywhere sales, on Form IL-1120-ST, Step 6, are the unitary sales everywhere figure from Schedule UB, Step 4. Illinois sales on the IL-1120-ST include only the subchapter S corporation's Illinois sales. The IL-1120-ST, Step 6 lines for Illinois nonbusiness income/loss and non-unitary partnership income/loss include only the amounts allocated to the S corporation on the Schedule K-1-P minus the portion of those amounts allocable to shareholders subject to replacement tax.

c) Qualified Subchapter S Subsidiaries (QSSS)

For federal purposes a corporation can elect to become a Qualified Subchapter S Subsidiary (QSSS). This is a federal tax status under the IRC created by the enactment of code § 1361(b)(3)(B) in August 1996.

IRC § 1362 permits a "small business corporation" to elect taxation as a Subchapter S corporation. This term is defined in IRC § 1361(b) which provides, in part:

> (3) TREATMENT OF CERTAIN WHOLLY OWNED SUBSIDIARIES. —(A) IN GENERAL. –For purposes of this title—
>
> i. a corporation which is a qualified subchapter S subsidiary shall not be treated as a separate corporation, and
>
> ii. all assets, liabilities, items of income, deduction, and credit of a qualified subchapter S subsidiary shall be treated as assets, liabilities, and such items of the S corporation.

IITA § 1501(a)(28) provides:

The term "Subchapter S corporation" means a corporation for which there is in effect an election under Section 1362 of the Internal Revenue Code…

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Because this definition is expressly adopted by the IITA, a QSSS is not a separate corporation for Illinois income tax purposes. Instead, the QSSS is part of its parent Subchapter S, and its assets, liabilities, and items of income, deduction, and credit must be included with parent's figures in determining the Illinois income tax liabilities of the parent and its shareholders. 86 IAC § 100.9750(c).

d) Computation of Taxable Income

86 IAC § 100.2405(c)(7)(A) states:

> (A) Election in effect. For subchapter S corporations for which there is in effect an election for the taxable year under Internal Revenue Code section 1362, "taxable income" means *taxable income determined in accordance with Internal Revenue Code section 1363(b), except that taxable income shall also take into account those items that are required to be separately stated under Internal Revenue Code section 1363(b)(1).* (IITA § 203(e)(2)(G)(i))

Under the above rules the computation of taxable income on the IL-1120-ST begins with ordinary income or loss from federal Form 1120S, Schedule K, Line 1. This amount is transferred to Step 2, Line 1 of the IL-1120-ST for tax years 2006 and after (Line 1, Part 1A tax forms through 2005). Ordinary business income is then adjusted to include all other income of the S corporation and eliminate allowable expenses to arrive at unmodified base income.

86 IAC § 100.2405(c)(7)(B) lists the separately stated items under IRC § 1363(b)(1), as listed in 26 CFR §1.1366-1(a)(2):

- Gains & losses from the sales or exchanges of capital assets,
- Gains & losses from the sale or exchange of property used in a trade or business,
- Charitable contributions,
- Foreign taxes under IRC § 901,
- "Separate items involved in the determination of certain federal credits under IRC, part IV of subchapter A (section 21 35 seq.)…"
- Certain miscellaneous items listed in 86 IAC § 100.2405(c)(7)(B)(vi),
- Portfolio income or loss and related expenses as defined in 26 CFR § 1.469-0 through 11) (2007) under IRC § 469,
- Tax exempt income including state and municipal interest

These items of income (loss) and deductions are separately stated on Schedule K. Each line on the IL-1120-ST indicates which item of deduction from Schedule K is to be deducted from ordinary income. The line item for "all other

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

items of income or loss that were not included in the computation of income or loss on Page 1 of federal Form 1120S" is for items from Schedule K which were not reported on page 1 of federal Form 1120S. The adjustments are made in Steps 2 and 3 because the S corporation is subject to Replacement Tax on the entire income of the corporate entity. It is important to verify in audit that the taxpayer has picked up ordinary base income from federal Form 1120-S and made the proper adjustments from Schedule K.

IRC § 965 Transition Tax

(Refer to section on Partnerships for a description of this tax)
Illinois Modification

For 2017, the IRC § 965 income is reported to the IRS on a statement separate from the federal income tax return. Due to the nature of the separate statement, this income may not be included in the federal taxable income. However, it must be included when determining Illinois Base Income. If the income was not included in the federal taxable income, an Illinois taxpayer must make the appropriate modifications.

S corporations are required to make the following modification for tax year 2017:

	IRC 965 Transition Tax Statement	Form IL-1120-ST
IRC § 965 (a)	Line 1	Step 2, Line 6
IRC § 965 (c)	Line 3	Step 3, Line 11

Attach the Statement to your return.

Any IRC Section 965 income or deduction passed through to shareholders must be identified by attaching a statement to Schedule K-1-P.

For 2018 tax years and after, the foreign earnings are included in the federal taxable income.

Note: Subchapter S corporations and partnerships may not claim the Domestic Activities Production Deduction on their IL-1120ST or IL-1065 for tax years beginning January 1, 2005, but their shareholders or partners may claim the deduction as part of their flow-through from Schedule K-1-P. See FY Bulletin 2006-07 for more information.

Penalties and the 50% meals and entertainment deduction should not be included as other expenses on IL-1120-ST, Step 3 because these expenses are not deductible under IRC § 1363(b).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Refer to Exhibit F for an example of a 2017 IL-1120-ST line references.

(1) Modifications

Addition and subtraction modifications pertaining to 1120 (also known as "C") corporations, under IITA § 203(b) apply equally to S corporations.

Since S corporations file different federal and state returns than C corporations, the following paragraphs provide additional explanations for modifications relating specifically to S corporations.

(a) Additions

For a detailed discussion of modifications and the cite references relating to S corporations and C corporations, refer to Chapter 24.

Refer to the section on Partnerships for information regarding the Schedule M addition modification for Lloyd's Plan of Operation Losses.

(i) The amount of loss distributable to a shareholder subject to replacement tax

Refer to the corresponding subtraction modification under Partnerships.

(b) Subtractions

For a detailed discussion of modifications and the cite references relating to S corporation and C corporations, refer to Chapter 25.

Refer to the section on Partnerships for information regarding the subtraction modification for Lloyd's Plan of Operation Income.

(i) Foreign Dividend Gross-Up/Foreign Source Dividend Subtraction

(IITA § 203(b)(2)(G))
(IITA § 203(b)(2)(O))

S corporations may claim the deductions for "foreign dividend gross-up", foreign dividends and "Subpart F income" (for tax years ending on or after December 31, 1988). Since Schedule J references certain line items on the federal Form 1120, Schedule C and there is no counterpart to Schedule C for a federal Form 1120-S filer, the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

instructions to the IL-1120-ST simply say that supporting attachments must clearly identify each item taken as a subtraction.

Any deduction allowable is claimed on Schedule M, Step 3 for: "Dividends received, including IRC § 78 Foreign Dividend Gross-up and subpart F income (Form IL-1120-ST filers only).

25 Dividends received, including IRC Section 78 Foreign Dividend Gross-up and subpart F income. **(Form IL-1120-ST filers only)** 25 ________________.00

(ii) Expense Deductions Disallowed Federally

(IITA § 203(b)(2)(I))

A subtraction modification is allowed for any amortizable bond premium disallowed as a federal deduction by IRC § 171(a)(2) and any expenses incurred in producing federally tax-exempt income disallowed as a federal deduction by IRC § 265(a)(1) or any interest expense disallowed as a federal deduction by IRC § 265(a)(2). These are all expenses on the S corporation's books which are not allowed on its return. These expenses will be included in Line 17 d of Schedule K which is "other items and amounts ". In order to verify this subtraction modification, a breakdown of this line should be requested. Also see 86 IAC § 100.2455(b) & (c).

(iii) River Edge Redevelopment Zone Dividends
High Impact Business Dividends
River Edge Redevelopment Zone Interest
High Impact Business Interest

(IITA § 203(b)(2)(K) &
IITA § 203(b)(2)(L)
IITA § 203(b)(2)(M)
IITA § 203(b)(2)(M-1)

The Enterprise Zone/High Impact dividend and interest subtractions are reported on Schedule 1299-A for S corporations rather than 1299-B; however, the criteria are the same.

(iv) Contribution Subtraction

(IITA § 203(b)(2)(N))

The subtraction for contributions made to designated zone organizations are reported on Schedule 1299-A for S corporations rather than 1299-B; however, the criteria are the same.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(v) Income Distributable to a Shareholder Subject to Replacement Tax

(IITA § 203(b)(2)(S))

For taxable years ending on or after December 31, 1997, Subchapter S corporations are allowed a subtraction modification for all amounts of income allocable to a shareholder subject to the replacement tax imposed by subsections (c) and (d) of IITA § 201, including amounts allocable to organizations exempt from federal income tax by reason of IRC § 501(a).

IRC § 501(a) exempts organizations listed in IRC § 401(a) and § 501(c) from tax. IRC § 401(a) deals with qualified pension plans. IRC § 501(c)(3) exempts churches, charitable organizations, and educational organizations. Income distributed to these types of partners should be allowed as a subtraction. In particular, income distributable to an ESOP is subtractable under this provision.

Refer to corresponding subtraction modification under Partnerships.

(2) Illinois Base Income

Illinois base income is computed in Step 6 of the IL-1120-ST. Step 6 of the IL-1120-ST is the same as Step 4 of the IL-1120. Like the corporate return, this section is only completed if the S corporation earned income from sources both within and without Illinois. Base income of a Subchapter S corporation is allocated or apportioned among Illinois and other jurisdictions in the same manner as it is allocated or apportioned for any other nonresident. REF: IITA § 308(c).

Nonbusiness Income

Nonbusiness income of an S corporation is determined in the same manner as that of a “C” corporation for Illinois income tax purposes.

A business/nonbusiness determination is made based upon 86 IAC § 100.3010. Income which is determined to be nonbusiness is allocated per IITA § 303 and 86 IAC § 100.3220. Interest and dividend income received by nonresident S corporations is allocated to this State if the S corporation had its commercial domicile in this State at the time the item was paid, incurred or accrued. REF: IITA § 301(c)(2)(B).

An S corporation may also have nonbusiness income from partnerships in which it was a partner or from trusts or estates of which it was a beneficiary. In

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

order for this income to be classified as nonbusiness income, it must have been so classified by the entity which generated the income. If the corporation is claiming any nonbusiness income from partnerships, trusts, and/or estates, this amount should be verified by obtaining a copy of their Illinois income tax return. Partnerships will show the flow-through amount on Schedule K-1-P and trusts and estates show this amount on Schedule K-1-T.

After all nonbusiness income is determined, it should be totaled and shown on Step 6 of the IL-1120-ST.

If any nonbusiness income is allowed, it is important to verify that the income is net of any applicable nonbusiness expenses. In addition, the auditor will have to check recapture of business expenses under 86 IAC § 100.2405(d).

For a detailed discussion of business v. nonbusiness income, refer to Chapter 26.

Non-unitary partnership business income (loss) in Step 6, is allocated per IITA § 305(a) and 86 IAC § 100.3500. Non-unitary partnership business income (loss) received by the S corporation as a partner in a partnership is subtracted from base income on Step 6, in order to arrive at apportionable business income. If the activities existing between a partnership (of which an S corporation is a partner) and an S corporation constitute a unitary business relationship, then the S corporation's distributive shares of partnership income (loss) and factors must be included in S corporation's business income and factors. REF: IIT 86 IAC § 100.3380(d).

An S corporation may be a partner in several partnerships. Every partnership is required to provide the S corporation with a Schedule K-1-P showing their distributive share of business and non-business income. All non-unitary income (loss) from each of these partnerships is to be included in Step 6. If the partnership had no activity in Illinois, this is the only adjustment that will be made; however, if a non-unitary partnership has income (loss) which was earned in Illinois, then that partnership's income must be separately apportioned. Income from each non-unitary partnership is separately apportioned based on that partnership's activities within and without Illinois.

IITA § 305(a) and 86 IAC § 100.3500(b) requires that business income of a partnership flow through to the nonresident partners as business income to those partners. This flows through to the partners on a pro rata basis, based on that partner's distributive share of the partnership's income for the taxable year. The partners' percentages can be found on Schedule B of the IL-1065. The partner’s share of partnership’s business and nonbusiness income should be on Schedule K-1-P if the partnership is an Illinois filer. In some cases, there may be several partnerships which are conducting business in Illinois. Copies

of all of the Schedules K-1-P should be reviewed. The amount allocable to Illinois from each non-unitary partnership should be added together and included in Step 6 (non-unitary partnership business income or loss apportionable to Illinois) of the IL-1120-ST.

An S corporation may be a beneficiary of an estate or trust (fiduciary). Business income (loss) from trusts and estates is allocated per IITA § 307(a). This income must be subtracted from base income in order to arrive at apportionable business income of the corporation. This adjustment is made because the apportionment factors property, payroll, and sales which created the business income of the fiduciary were not the same as those which were used to create the income of the corporation.

Every estate or trust (fiduciary) in which the corporation is a beneficiary is required to provide the S corporation with a Schedule K-1-T showing its distributive share of income. All business income (loss) which is received from estates or trusts should be included in Step 6 of the IL-1120-ST. If the fiduciary had no activity in Illinois, this is the only adjustment that will be made. However, if the fiduciary had income (loss) which was earned in Illinois, then the fiduciary must issue each beneficiary a Schedule K-1-T indicating the amount of Illinois business income and nonbusiness income.

IITA § 307(a) requires that the business income of an estate or trust flow through to a nonresident beneficiary as business income to the beneficiary. This is computed by multiplying the beneficiary's distributive share of the fiduciary's income by the fiduciary's apportionment formula.

Business income of an S corporation is apportioned under IITA § 304. The only difference in auditing these factors and those of a C corporation, is the physical location of the items on the federal return.

For a detailed discussion of the apportionment formula, refer to Chapter 27 Apportionment.

(3) Illinois Net Loss / Deduction

An Illinois net loss incurred by a Subchapter S corporation can be carried to a taxable year in which it is a C-corporation, and vice versa. Ref: 86 IAC § 100.2330(f)(4)(B). However, any Illinois net loss incurred by a partnership or S corporation can only be carried and used against that taxpayer’s taxable income. Partnership or S corporation Illinois net losses cannot be applied against the partner or shareholder’s taxable income. Ref: 86 IAC § 100.2330(f)(4)(C).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

For a detailed discussion of INOL Carryforward/Carryback provisions, refer to Chapter 35.

(4) Credits

Refer to corresponding section under Partnerships.

(5) Schedule B Partners' or Shareholders' Identification

Refer to corresponding section under Partnerships

(6) Schedule K-1-P

Refer to corresponding section under Partnerships

(7) Schedule(s) K-1-P(3) Pass-through Withholding Calculation for Nonresident Members

Refer to corresponding section under Pass-through Entity Withholding

f) Nonresident Shareholders

S corporation shareholders, other than residents as defined in IITA § 1501(a)(20), are required to allocate to Illinois their pro-rata shares of so much of the business income of the S corporation which is allocated or apportioned to Illinois in the hands of the S corporation. S corporation shareholders allocate to Illinois their pro-rata shares of the S corporation's nonbusiness income as if such income had been paid, incurred or accrued directly to the shareholders in their separate capacities. That is, with respect to nonbusiness income, a shareholder would use IITA § 303 and 86 IAC § 100.3220 to determine whether an item of nonbusiness income should be allocated to Illinois (IITA § 308).

Note: All corporations (including S corporations) and partnerships are non-residents under the statute because they can never meet the definition of a resident in IITA § 1501(a)(20).

g) Auditor's Report

The Auditor's Report for the IL-1120-ST is Form EDA-93. Schedule B information should be included as an audit schedule.

Any changes to the IL-1120-ST in audit will generally affect every nonresident shareholder's Illinois taxable income and may affect the resident shareholder's

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

income. If so, the auditor will be responsible for making the changes to every shareholder's return, unless the S corporation agrees to pay the tax by filing an IL-1000 or IL-1023-C if none were originally filed or an IL-1023-C-X or IL-1000-X amending previously filed forms (for tax years ending prior to December 31, 2014) or IL-1120-ST or IL-1120-ST-X, as applicable (for tax years ending on and after December 31, 2014). Additionally, in the course of completing the IL-1120-ST audit, a compliance check must be done to determine if all shareholders are filing Illinois income tax returns.

If taxable income is increased per audit and/or it is determined there are nonresident shareholders who are nonfilers, these shareholders can be referred for audit. They should NOT be referred if there is no tax potential. Refer to Chapter 20 Audit Procedures, Referrals.

If the proposed changes result in a No Liability audit or there is a no liability year within the audit period, the only way to process any line change(s) is to complete an IL-1120-ST-X, attach supporting documentation and have the taxpayer sign it. This procedure must be followed because the taxpayer must be given the opportunity to agree or disagree with PROPOSED changes resulting from an audit. A Notice of Deficiency is issued only when there is an increase (or decrease) in the tax liability.

C. Trusts, Estates and Decedents

Four parties are involved in establishing a trust or estate: fiduciary, beneficiary, trustor (grantor), and/or decedent.

- **FIDUCIARY** - a person who occupies a position of special confidence toward others, such as a trustee, executor and administrator. For Income Tax purposes, a fiduciary is a person who holds in trust an estate to which another has the beneficial title or interest, or receives and controls income of another, as in the case of receivers. REF: CFR § 301.7701-6.

- **BENEFICIARY** - one who is designated to receive benefits; an heir, legatee, devisee.

- **TRUSTOR (GRANTOR)** - the creator of the trust. The creator is usually designated as the grantor of the trust.

- **DECEDENT** - the deceased person whose estate is at issue.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

TRUSTS
A trust is a legal arrangement created by a will or an inter vivos declaration under which trustees take title to property for the purpose of protecting or conserving it for the beneficiaries under the ordinary rules applied in chancery and probate courts. Beneficiaries usually do nothing more than accept the trustee benefits. REF: CFR § 301.7701-4(a).

A trust is created when money, securities, or property (corpus) is committed or entrusted (by a grantor) to one (trustee, trust officer, etc.) to be used or cared for in the interest of another (beneficiary(ies)) in accordance with instructions (trust instrument) given when the trust was established.

The following is a list of various terms relating to trusts:

- **SIMPLE TRUST** - generally one which makes no distribution other than current income and the terms of which require all of its income to be distributed in the year it is received (whether or not distributed) and do not provide for charitable or similar contributions. REF: CFR § 1.651(a).

- **COMPLEX TRUST** - one which permits accumulation of income or charitable deductions or which distributes principal. In other words, it is a trust that does not qualify as a simple trust.

- **FAMILY ESTATE TRUST** - also known as a family, pure, equity, equity pure, prime or constitutional trust. This is a trust to which an individual transfers his/her personal assets and right to income in exchange for the benefit of the assets and compensation being taxed as a grantor trust. These trusts are deemed a "nullity" for income tax purposes. Their income is taxable to the persons who created the trusts.

- **IRREVOCABLE TRUST** - one that may not be revoked after its creation.

- **TESTAMENTARY TRUST** - a trust created by a will. It takes effect upon the death of the grantor.

- **INTER VIVOS TRUST** - a trust which becomes operative during the grantor's lifetime.

  An **INTER VIVOS SIMPLE TRUST** is operative during the grantor's lifetime and the trust instrument provides that all income of the trust including capital gains be distributed currently, and the trust is not permitted to make charitable contributions.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

In an inter vivos trust, the basis of the property received from the grantor generally is the same as it would be in the hands of the grantor and the holding period also includes the grantor's holding period. The basis of property received by an estate or a testamentary trust is its fair market value at the date of death of the grantor (or the alternate valuation date for estate tax purposes). The holding period begins with the date of death.

- **REVOCABLE TRUST** is defined as when “the grantor of a trust reserves the power to take back title to the trust funds for himself… “The grantor is taxable on the trust income if he can exercise that power. REF: IRC § 673(a).

Trust property is referred to as the corpus or principal. Income from the principal such as interest, cash dividends, or rent is distributed to beneficiaries.

A trust is generally considered to have terminated when the property held in trust has been distributed, except for a reasonable amount which is set aside in good faith for the payment of unascertained or contingent liabilities and expenses. The happening of the event by which the duration of the trust is measured does not automatically terminate the trust. For example, if a trust is to terminate upon the death of the beneficiary and the corpus is to be distributed to the remainderman, the trust continues for a reasonable period to allow the trustee to settle the affairs of the trust. However, settlement of the trust cannot be unduly postponed and if distribution of the trust corpus is unreasonably delayed, the trust is considered terminated for federal income tax purposes after the expiration of a reasonable period for the trustee to complete the administration of the trust. REF: CFR § 1.641(b)-3(b).

If the trust is considered terminated for federal income tax purposes because the administration has been unduly prolonged, the gross income, deduction and credits of the trust are, subsequent to termination, considered the gross income, deductions and credits of the person(s) succeeding to the property of the trust. REF: CFR § 1.641(b)-3(d).

ESTATES

An estate is created by a person's death and consists of the assets and liabilities of the decedent. The assets and liabilities are entrusted to one (administrator, executor, etc.) who uses and cares for the property for the interest of another (beneficiary(ies), heir(s), legatee(s)) in accordance with provisions of a last will and testament or in accordance with state law.

- **EXECUTOR (EXECUTRIX)** - named in a decedent's will to administer the estate and distribute properties as the decedent has directed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

- **ADMINISTRATOR (ADMINISTRATRIX)** - usually appointed by the court if no will exists, if no executor was named in the will, or the named executor cannot or will not serve.

- **PERSONAL REPRESENTATIVE** - of an estate can be an executor, administrator, or anyone who is in charge of the decedent's property.

- **FIDUCIARY** - persons who have positions of trust on behalf of others. A fiduciary is a person who occupies a position of special confidence towards another, who holds in trust property in which another person has the beneficial title or interest, or who receives and controls income of another. Trustees, executors and certain receivers are considered fiduciaries. An executor or administrator is a fiduciary. However, an "agent" is not a fiduciary for federal income tax purposes, even though a "fiduciary relationship" may be said to exist for state law purposes.

In general, an executor and an administrator perform the same duties and have the same responsibilities.

The estate's income must be reported on an annual basis; either on a calendar or fiscal year. The executor or administrator chooses the estate's accounting period when they file the first income tax return. An estate's first tax year may be any period that ends on the last day of a month and that does not exceed 12 months.

1. Federal Taxation - Trusts/Estates/Decedents

Estates and trusts are considered to be fiduciaries under federal tax law and are generally treated as separate and independent taxpayers.

An estate or trust is considered to be a "conduit" of the income which it distributes, or is required to distribute, to its beneficiaries. Trust or estate income is therefore taxed either:

- To the fiduciary (the estate or trust), if retained; or
- To the beneficiary, if distributed.

The "character" of the income which is passed on to the beneficiaries is preserved so that it has the same tax attributes in the beneficiary's hands as when received by the fiduciary. Each beneficiary is considered to receive a pro rata share of each class of trust income (dividends, taxable interest, tax-exempt interest, rents, capital gains, etc.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- **DISTRIBUTABLE NET INCOME (DNI)** - the amount that sets the limit on the deduction of a domestic estate or trust for distributions to beneficiaries. It may also limit the amount of the distribution which is taxable to the beneficiary. The distributable net income of a domestic estate or trust generally consists of the same items of gross income and deductions that make up the taxable income of the estate or trust. See IRC § 643(a) for further information.

- **DISTRIBUTED INCOME** - that amount which is distributed to the beneficiary(ies) in a given taxable year. It includes amounts paid out of income or corpus. "Corpus" means a payment made which results in the reduction of the principal. The deduction (modification) claimed by the trust or estate cannot exceed the DNI.

- **UNDISTRIBUTED INCOME** is the amount of income retained by the trust with certain limitations.

Trusts and estates are taxable "persons" under the IRC. They must file income tax returns and a variety of information returns in the same general manner as any other taxpayer. For example, if a trust or estate conducts a business, it must file the same information returns that are required of all businesses which make certain types of business payments or enter into certain transactions.

Returns for a trust are filed by the trustee; returns of estates are filed by the executor or administrator. These representatives are collectively referred to as "fiduciaries."

Federal Treatment

The returns required by fiduciaries on behalf of their trusts or estates are discussed in the following paragraphs.

Trusts and estates must obtain a federal employer identification number (FEIN) which is used on all returns they are required to file. The fiduciary (trustee, executor, or administrator) does not use his own personal account number on fiduciary returns. On income tax returns and related documents, trusts and estates show their own employer number and the identifying number of each beneficiary.

In the case of a revocable trust whose income is charged to the grantor (creator of the trust), both the trust's number and the grantor's number should be given. If there is no trust under local law, the grantor's number is enough.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

a) Federal Taxation - Trusts

A trustee must file a federal Form 1041 if the trust is not tax-exempt and if:

- The trust has any taxable income for the year; or
- The trust has gross income of $600 or more; or
- Any beneficiary is a nonresident alien.

A trustee of several trusts must file separate returns for each trust meeting the above requirements, even though all the trusts have the same grantor and beneficiary. REF: CFR § 1.6012-3(a)(4).

Trust income taxable to the grantor (where he is considered to be the owner) is reported on a separate statement attached to federal Form 1041. REF: CFR § 1.671-4(a)

Where an executor transfers part of the estate's assets to a trustee and retains other assets in the estate, each must file a separate Form 1041 reporting the income received by each.

A trustee of an otherwise exempt trust must file a federal Form 990T for each taxable year that the trust has gross income of $1,000 or more included in computing "unrelated business taxable income." REF: CFR § 1.6012-3(a)(5).

COMMON TRUST FUNDS

A bank often maintains a common trust fund to invest funds held by it as trustee, executor, etc. The bank must make a return of income and deductions each year with respect to the common trust fund regardless of the amount of income. Federal Form 1065 (a partnership return) may be used for this purpose, but it should be marked "Common Trust Fund" at the top. The return must include the names, addresses and shares of the participants. REF: CFR § 1.6032-1.

b) Federal Taxation - Estates

In addition to the duty of filing the decedent's final return, an executor or administrator must file returns for the estate from the date of decedent's death until the estate is liquidated and the assets distributed. An estate's income tax return is filed on federal Form 1041. A return is required if gross income for the estate's taxable year is $600 or more, or if any beneficiary is a nonresident alien.

A nonresident alien (NRA) estate required to file a US income tax return for income from US sources must file using a federal Form 1040NR.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If there are executors or other fiduciaries in several states, the executor who probates the entire will (in the state where the decedent was domiciled) files the federal Form 1041 reporting all the income. The out-of-state or "ancillary" executor also files a federal Form 1041, but it merely refers to the main federal Form 1041 and shows the gross income received by the ancillary fiduciary and the deductions attributable to such income. REF: CFR § 1.6012-3(a)(3).

c) Federal Taxation - Decedents

A final income tax return must be filed for a deceased person (decedent) who would be required to file if alive for the part of the year up to the date of his death. Income received after his death is reported by the recipient.

A decedent's final return is filed by the person entrusted with his property. Ordinarily, this would be the executor or administrator of his estate, and if such a fiduciary is appointed, he will be responsible for decedent's final return.

Usually the surviving spouse will file a decedent's return if there is no executor or administrator. A surviving spouse may also file a joint return for the decedent's final year and the joint return rate may be used for the two following years if dependent children are claimed.

A decedent's final return is due at the same time his return would have been due had he lived.

As to the type of return, filing extensions, payment of the tax, etc., the rules are the same as for individuals.

> Example: D dies on April 1, 1987. If he filed using the calendar year, his final return covering January 1 – April 1, 1987 is due April 15, 1988. If he was on a fiscal year ending June 30, 1987, his final return is due October 15, 1987.

d) Federal Form 1041

Federal Form 1041 is filed by an estate or trust. It is a tax PAYING return and not merely a tax INFORMATION return (as is the partnership federal Form 1065). Nevertheless, amounts of income paid, credited or distributable to the beneficiaries are allowed as deductions before the computation of the tax on federal Form 1041. The beneficiaries pay the tax on such amounts on their individual federal Form 1040s. The following chart facilitates an understanding of federal Form 1041.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

GROSS INCOME	Dividends Interest Income from Partnerships and other Trusts and Estates** Rents and Royalties Sale or Exchange of Property Trade or Business Net Profit

** All income or losses from partnerships and other estates, or trusts is entered on line 3 except:
a. interest (which are entered on line 1)
b. dividends (which is entered on line 2)
(effective for tax years 1990 and forward)
c. capital gains or losses (which are entered on Schedule D)
d. ordinary gains or losses (which are entered on Form 4797)

If an estate or trust has tax-exempt income, the amounts deducted from gross income are reduced by the allocable portion attributable to tax-exempt income.

Schedule A of federal Form 1041 is used to determine the charitable contribution deduction for an estate or trust. Estates and complex trusts are allowed an unlimited charitable deduction for amounts that are PAID to recognized charities

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

out of gross income under the terms of the governing instrument during the tax years. REF: IRC § 642(c).

Schedule B is the computation of the income distribution deduction. DNI limits the deduction allowable to estates and trusts to amounts paid, credited, or required to be distributed to beneficiaries. It is used to determine how much of an amount paid, credited, or required to be distributed to a beneficiary will be includable in his or her gross income and, therefore, deductible from the taxable income of the estate or trust.

In general, a fiduciary must file a return on federal Form 1041 on behalf of the trust or estate for which he or she acts when:

- The gross income of the estate or trust for the taxable year is $600.00 or more before making deductions allowed or amounts paid or distributed to the beneficiary or beneficiaries,

- A trust has gross income of $600.00 or more regardless of the amount of taxable income or has any taxable income after all deductions including distribution to beneficiaries for the taxable year, or

- Any beneficiary of the estate or trust is a nonresident alien.

Gains and losses from a sale or exchange of property are computed and allocated between the fiduciary of the estate or trust and the beneficiaries on separate federal Form 1041, Schedule D's.

A beneficiary's share of income, deductions, and credits is shown on a separate Schedule K-1 for each beneficiary. Beneficiaries must include in their gross income, the smaller of (1) the amounts paid, credited or required to be distributed to them, or (2) their proportionate share of distributable net income reduced in either case by their share of distributable tax-exempt income minus the allocable expense not allowable as a deduction on federal Form 1041. Further, the character of the income reported on each separate Schedule K-1, by the fiduciary, shall be the same as the items that enter into the computation of the distributable net income.

A federal Form 1041, Schedule K-1 (or an acceptable substitute) is filed for each beneficiary.

If the total of the amounts paid or credited, which are required to be distributed, are more than the amount of the distributable net income shown in Schedule C, then the amounts that go into the computation of the distributable net income are

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

reported on each Schedule K-1 in proportion to each beneficiary's share of income.

If the total payments, credits and required distributions are less than the distributable net income, however, only a proportionate part of each item entering into the computation of distributable net income is reported on Schedule K-1, according to the ratio of each particular item of income to the distributable net income.

The term "income" as used for estates and trusts, when not preceded by the words "taxable", "distributable net", "undistributed net" or "gross" means the income of the estate or trust as determined under its governing instrument and the applicable local law. In other words, "income" usually means the amounts for which the fiduciary would be required to account for in rendering an accounting to the court having jurisdiction over the estate or trust. Items of gross income constituting extraordinary dividends or taxable stock dividends, which the fiduciary, acting in good faith, allocates to the corpus are not considered income. REF: IRC § 643(b).

The (Federal) Tax Reform Act of 1986 made some changes in the law regarding trusts and estates. The following is a brief synopsis:

- The "grantor trust" rules were modified. The new law expands the grantor trust rule to include trusts where the assets will revert to the grantor or the grantor's spouse (under certain conditions). This will not apply in a situation where the beneficiary is a lineal descendant of the grantor and the reversion occurs upon the death of the beneficiary before the beneficiary reaches age 21. REF: IRC § 673(b).

The following are federal changes that affect 1986-87 fiscal year and 1987 year filers:

- The 60% capital gains deduction for estates and trusts was repealed for tax years beginning after December 31, 1986.

- For tax years beginning after December 31, 1986, Section 1403 of the IRC required fiscal year trusts, other than wholly tax-exempt trusts and charitable trusts, to adopt a calendar tax year. This resulted in a short year return being filed in 1987. A beneficiary who had to pick up the short-period income as a result of this change was allowed a four-year spread of the income beginning with his/her first taxable year after 1986. Taxpayers using the four-year pro-ration method include on their federal Form 1040 their distributive share of

income from the fiscal year return K-1 and 1/4 of the income shown on the short-year Schedule K-1.

Illinois is bound by the taxpayer's federal treatment of the short-year income as reflected in the taxpayer's AGI. Taxpayers receiving tax exempt federal interest and electing the four-year pro-ration will be allowed to pro-rate their state and local interest from the short-year period over the next four years for Illinois purposes. REF: Sunshine Letter IT 88-0092.

A four-year pro-ration of income received by a beneficiary as a consequence of a trust's change in taxable year as required by Section 1403 of the Tax Reform Act of 1986 is allowed in Illinois if it is done federally because the Illinois computation begins with income based on a 4-year pro-ration. Illinois follows the federal method. Ref: Sunshine Letter IT88-0044.

- The federal Form 1041 changed in 1987 in that the total amount of tax-exempt interest received must be reported in "other information".

- For tax years beginning after December 31, 1986, IRC § 469 provides for limitations on losses and credits from a passive activity. Section 469 generally limits deductions and credits derived from passive activities to the amount of income derived from all passive activities. A passive activity is any trade or business activity of the estate or trust in which the fiduciary does not materially participate. A passive activity also includes any rental activity where payments are primarily for the use of tangible property. Passive activities do not include working interests in oil and gas property (as defined in IRC § 469(c)).

e) Passive Activity Loss and Credit Limitations

Passive activity rules apply to:

- Individuals,
- Estates,
- Trusts (other than grantor trusts),
- Personal service corporations, and
- Closely held corporations.

Even though the rules do not apply to grantor trusts, partnerships and S corporations directly, they do apply to the owners of these entities.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

As part of a federal attack on tax shelters, the Tax Reform Act of 1986 added a new provision to the IRC which restricts sheltering earned income and portfolio income with losses or credits arising from "passive activities." There are three categories of income and loss:

- Passive Activity Income or Loss --IRC §469(c) identifies two types of passive activities:

  - Trade or business activities in which the partner did not "materially participate" during the tax year. Material participation is involvement in operations of the activity on a regular, continuous, and substantial basis. All limited partnership interests are treated as not materially participating.

  - Rental activities regardless of the level of participation.

    An activity is classified as a rental activity if the tangible property is used (or held for use) by customers; and the gross income arising from the activity represents amounts paid principally for the use of the tangible property. There are six exceptions to rental activity being treated as passive. If any of them are met, the rental of the property is not considered to be a rental activity, and the income is treated as ordinary income of the partnership. REF: Section 1.469-1T(e)(3)(B)(ii) of Temporary Federal Income Tax Regulations.

    Rental real estate activity is a rental activity that involves the retailing or leasing of real estate. However, where significant services are provided in connection with the rental of real estate (such as the renting of hotel rooms), the activity is treated as a trade or business and not a rental real estate activity.

- Portfolio Income or Loss —IRC § 469(e)(1) provides that portfolio income is not derived in the ordinary course of a trade or business, and therefore, must be stated separately on Schedule K-1.

- Active Income or Loss --Income originating from all activities in which the partner materially participated and which are not included above.

A passive activity is generally one that involves the conduct of a trade or business or any investment activity in which the taxpayer does not materially participate. Passive activity losses can only be used to offset passive activity income. The new law generally applies without regard to when the passive activity was acquired, but a five year phase-in is provided for interests held as of October 26, 1986 (the date of enactment).

The passive loss limitation generally allows losses and credits from passive activities to be used only against income or tax from passive activities. The limitation is effective for tax years beginning after 1986. Interests in passive activities acquired by a taxpayer before October 23, 1986 are called "pre-enactment interests" and are eligible for a gradual phase-in of the passive activity loss limitations. During this phase-in period, a certain percentage of the taxpayer's pre-enactment losses are allowed as an offset to non-passive income.

The percentage of the passive activity loss that is allowed to offset non-passive income for each year of the phase-in period is as follows:

Year	Percentage Deductible
1987	65%
1988	40%
1989	20%
1990	10%
1991	0%

REF: IRC § 469(m)

The determination of whether or not a partner/shareholder materially participated in an activity is made by each partner/shareholder. As a result, while the partnership's/S-corporation’s overall trade or business income (loss) is reported on page one of the federal Form 1065/IL-1120-S, the specific income and deductions from each separate trade or business activity must be reported on attachments to the federal Form 1065/IL-1120-S. If an activity is a passive activity for a particular partner/shareholder, that partner/shareholder is subject to the passive activity limitation for federal purposes.

An estate or trust is treated as materially participating in an activity if an executor or fiduciary, in the capacity as such, is involved in operations of the activity on a regular, continuous and substantial basis. In the case of a grantor trust, however, material participation is determined at the grantor level.

The passive activity loss (also referred to as PAL) limitation does not apply to the partnership or S corporation, but rather to each partner's or shareholder’s share of any loss or credit attributable to a passive activity. Corporations that are not closely held are not subject to any PAL limitation. The PAL limitations also do

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

not apply to partners or shareholders holding a working interest in an oil or gas well, where the partner/shareholder holds the interest through an entity that does not limit the partner's liability.

Portfolio income is passive income and may not generally be offset by passive activity income, but portfolio losses may offset passive activity income and active income, because portfolio investments do not afford the opportunities for "tax sheltering" that caused Congress to enact the passive activity loss limitation rules.

Passive activity losses that are not deductible for a particular tax year because there is insufficient passive activity income to offset them (i.e., suspended losses) are carried forward indefinitely and are allowed as deductions against passive activity income in subsequent years. Unused suspended losses are allowed in full upon a fully taxable disposition of the entire interest in the activity (IRC § 469(g)); however, such losses must first be applied against the taxpayer's net income or gain from other passive activities.

f) At-Risk Limitations

"At-risk" rules have been in existence since 1976; however, they have been refined several times since then. "At-risk" rules were designed to prevent investors from sheltering trade, business or professional income by generating losses from investments in activities that were financed largely through non-recourse loans for which they were not personally liable. "At-risk" rules limit losses which can be deducted to the amount the partner has at risk and could actually lose from the activity.

"At-risk" rules apply only to individual (noncorporate) taxpayers, including partners in partnerships and shareholders in S Corporations. The rules are extended to certain closely-held C corporations, in which five or fewer shareholders own more than 50% of the stock. REF: IRC § 465(a)(1).

"At-risk" rules have been largely overshadowed by the more stringent "passive activity loss" rules, but still play an important part for many partners and Subchapter S corporation shareholders. Taxpayers who materially participate in a non-rental business activity are "active investors" for purposes of the passive activity loss rules. These taxpayers are not affected by the passive activity loss limitation rules but may well have insufficient amounts "at-risk" in the business to support a current loss deduction. The amount of partnership loss (including capital loss) that may be allowed to a partner is limited to the amount of the adjusted basis (before reduction by the current year's loss) of his interest in the partnership at the end of the partnership taxable year in which the loss occurred. REF: 26 CFR §1.704-1(d).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

At-risk rules must be applied before the passive activity rules.

Partnerships

IRC § 704(d) provides that a partner's distributive share of partnership losses is allowed as a current deduction only to the extent of the partner's adjusted basis in his partnership interest as of the close of the partnership's tax year in which the loss occurred. If the total amount of the loss allocable to the partner for a year exceeds the partner's remaining adjusted tax basis, the excess loss will be allowed as a deduction to the partner at the end of the partnership year in which the excess is repaid to the partnership.

S Corporations

S corporation shareholders are generally subject to the same at-risk limitations as partners.

Under IRC § 1366(a), gains and losses from an S corporation's sale or exchange of assets pass directly through to the shareholders and retain their corporate characteristics. The pro rata share of gains and losses is carried to the respective shareholder's return and combined with any other gains and losses on the shareholder's individual return. Thus, if corporate losses exceed gains, a shareholder can use them to offset other income, subject to the at risk limitations. For corporations electing to be S corporations before January 1, 1987, the total capital gains may not always be passed through to the shareholders.

Estates

In the case of taxable years of an estate ending less than two years after the date of death of the decedent, up to $25,000 of deductions and credit equivalents attributable to all rental real estate activities in which the decedent actively participated is allowed. Any unused losses and/or credits are deemed "suspended" passive activity losses for the year, and are carried forward indefinitely.

Generally, the amount the estate or trust has "at-risk" limits the amount of loss which can be deducted for any tax year. When the losses are deductible under the "at-risk" rules, the passive activity rules then apply.

2. Illinois Taxation - Trusts and Estates

Illinois requires the fiduciary of an estate or trust to file Form IL-1041, if:

- the estate or trust has Illinois net income or loss, without regard to any deductions to beneficiaries, or
- if the estate or trust is a resident of the State of Illinois, and is required to, or does file a Federal income tax return, or
- is a nonresident of Illinois but received income from Illinois sources which was not reported:
    - on Form IL-1000 (for tax years ending prior to December 31, 2014)
    - as pass-through withholding on Form IL-1120-ST, Form IL-1065 or Form IL-1041(for tax years ending on and after December 31, 2014)

An estate or trust does not have to file estimated tax returns.

The term "RESIDENT", for the purpose of fiduciary returns, has been defined in the IITA as follows:

- The estate of a decedent who at his or her death was domiciled in Illinois. REF: IITA § 1501(a)(20)(B).

- A trust created by the will of a decedent who at his death was domiciled in Illinois. REF: IITA § 1501(a)(20)(C).

- An irrevocable trust, the grantor of which was domiciled in Illinois at the time the trust became irrevocable. REF: IITA § 1501(a)(20)(D). A trust is considered irrevocable to the extent that the grantor is not treated as the owner thereof under IRC § 671-678.

Due to varying state laws, a trust could be a resident of Illinois and a resident of some other state at the same time.

Illinois does not determine the residency of a trust by the residency of the trustee. A resident trust must file an IL-1041 if it files a federal Form 1041 even though the trust currently has no nexus and earns no income in Illinois.

Note: Under the decision in Linn v. Department of Revenue, 2 N.E. 3d 1203 (2013), an inter-vivos trust whose trustee and beneficiaries were outside Illinois and which conducted all its activities outside Illinois did not have sufficient nexus with Illinois to be subject to tax, even though the grantor was an Illinois resident, making the trust an Illinois resident. Since that decision was rendered, the Department has conceded this issue in other cases. If a trust asserts it is not

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

subject to tax under this decision, and it is not clear whether or not the Linn case applies, the matter should be referred to the supervisor.

a) Grantor Trusts

Under IITA § 205(e), "grantor trusts" are exempt from Illinois income taxation and, therefore, are not required to file IL-1041's. Because the grantor is treated as receiving the income of the trust directly, the federal income and any additions and subtractions are not pass-through items. Grantor trusts are not required to file returns, withhold on pass-through income, or issue Schedules K-1-T. If a Schedule K-1-P or K-1-T is issued to a grantor trust for 2012 or subsequent years, the schedule has a box in Step 2 for the grantor trust to identify itself as a grantor trust and to identify the grantor, so that the grantor can use the schedule as if it had been issued directly to the grantor. For earlier years, the grantor is required to show that he or she is the grantor of the grantor trust that received the schedule by some other means.

Although a revocable grantor trust is not required to file an IL-1041, it would become an irrevocable trust upon the death of the grantor. If the grantor was domiciled in Illinois at the time of death, it becomes a resident Illinois trust that is required to file form IL-1041. IITA § 1501(a)(20).

b) Charitable Remainder Trusts

For federal purposes, a charitable remainder trust is exempt from federal income tax unless it has unrelated business taxable income within the meaning of IRC § 512. If it files a federal Form 1041, it is required to file an IL-1041 regardless of whether or not it is liable for Illinois income tax. However, unless a charitable remainder trust has income taxable at the federal level due to unrelated business income, it will have no base income to compute Illinois income tax liability.

If a trust is only required to file federal information Forms 1041-A and 5227 because it does not have any unrelated business income, federal Form IL-1041 is not required to be filed. Information forms are not included within the definition of federal tax returns as that term is used in IITA § 502(a)(2).

c) Audit Procedures

Line 1 of the IL-1041 should be verified with the taxable income on the federal Form 1041. Beneficiaries are not subject to all of the modifications to which the estate or trust is subject. The modifications in column A are for beneficiaries and those in column B are for fiduciaries (for tax years 2007 and forward).

The BENEFICIARY'S SHARE of each of the items is the amount thereof which was properly paid, credited or required to be distributed to the beneficiary for the taxable year. The items of income and deduction and the additions and subtractions that are deemed to have been paid, credited or distributed must be taken into account by the beneficiaries in proportion to their respective shares of the distributable net income of the trust or estate for the taxable year.

The FIDUCIARY'S SHARE of an item of income (and any deductions attributable thereto) is that amount which is required to be taken into account by the fiduciary (trust or estate) in computing fiduciary taxable income for Federal tax purposes for the taxable year and which is not paid, credited or required to be distributed to the beneficiaries of the trust or estate for such year. The fiduciary's share of the items of addition and subtraction required under the Illinois Income Tax Act is that part of each of such items which relates to and is attributable to the fiduciary's share of the items of income and deduction.

d) Modifications

Federal taxable income is then modified per IITA § 203(c)(2) to arrive at base income. The following paragraphs describe the modifications and their effective and termination dates, where applicable.

(1) Additions

Refer to Exhibit K and Exhibit L for an example of a 2017 IL-1041 and Schedule M addition line and cite reference.

(a) Federally Tax-Exempt Interest Addition

(IITA § 203(c)(2)(A))

For a detailed discussion of this modification, refer to Chapter 24.

To verify this addition modification, refer to the beneficiaries' shares of the “tax-exempt interest” shown on all Schedule K-1s issued by the estate or trust. (On the 2013 Schedule, this information is found in Box 14 under Code A.) The total tax-exempt interest from all Schedule K-1s should equal the amount shown on the IL-1041, Column A, Beneficiaries. To verify the Column B, Fiduciary amount, refer to federal Form 1041. For tax years beginning after 1986, any taxpayer required to file a federal Form 1041 must report as an item of information, the amount of the tax-exempt interest received or accrued during the tax year. Subtract the beneficiaries' share from the total listed on the federal Form 1041 to obtain the fiduciary’s share of tax-exempt interest. The income shown here is net of allocable expenses. It may or may not be net of amortization of bond premium. When auditing a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

nonfiler for prior years, the detailed records of the trust must be examined to determine tax-exempt interest amount.

(b) Exemption Addition
(IITA § 203(c)(2)(B))

Requires an addition modification in the amount of: "in the case of (i) an estate, $600; (ii) a trust which, under its governing instrument is required to distribute all of its income currently, $300; and (iii) any other trust, $100, but in each such case, only to the extent such amount was deducted in the computation of taxable income."

The amount of the addition is the exemption deduction shown on Page 1 of the federal Form 1041.

(c) Illinois Income Tax Deducted Addition
(IITA § 203(c)(2)(C))

Provides an addback for "An amount equal to the amount of tax imposed by this Act to the extent deducted from gross income in the computation of taxable income for the taxable year."

Although state and federal income tax is not imposed on income distributed or deemed distributed to beneficiaries, a trust can allocate the state tax expense to its beneficiaries, so that this addition flows through to them rather than remaining with the trust. It can be verified from a breakdown of the tax expense line on Page 1 of federal Form 1041.

For a detailed discussion of this addition, refer to Chapter 24.

(d) Federal Net Operating Loss Addition
(IITA §203(c)(2)(D))

Provides an addition modification for "The amount of any net operating loss deduction taken in arriving at taxable income, other than a net operating loss carried forward from a taxable year ending prior to December 31, 1986."

This modification was added to the IITA by PA 84-1042 and is effective for tax years ending on or after December 31, 1986.

An in-depth discussion of this modification can be found in Chapter 35.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(e) Excess Addition Modification

(IITA §203(c)(2)(E))

Provides an addition modification:

For taxable years in which a net operating loss carryback or carryforward from a taxable year ending prior to December 31, 1986 is an element of taxable income under paragraph (1) of subsection (e) or subparagraph (E) of paragraph (2) of subsection (e), the amount by which addition modifications other than those provided by this subparagraph (E) exceeded subtraction modifications in such taxable year, with the following limitations applied in the order that they are listed:

(i) the addition modification relating to the net operating loss carried back or forward to the taxable year from any taxable year ending prior to December 31, 1986 shall be reduced by the amount of addition modification under this subparagraph (E) which related to that net operating loss and which was taken into account in calculating the base income of an earlier taxable year, and

(ii) the addition modification relating to the net operating loss carried back or forward to the taxable year from any taxable year ending prior to December 31, 1986 shall not exceed the amount of such carryback or carryforward;

For taxable years in which there is a net operating loss carryback or carryforward from more than one other taxable year ending prior to December 31, 1986, the addition modification provided in this subparagraph (E) shall be the sum of the amounts computed independently under the preceding provisions of this subparagraph (E) for each such taxable year.

This section was added to the IITA by PA 83-591 effective December 1, 1983. PA 84-1042 (as reflected above) amended this section to delete all references to "such earlier or later taxable year(s)" and restricted the modification to net operating loss carrybacks or carryforwards from taxable years ending prior to December 31, 1986.

This addition modification is reported on Schedule M as “Other Additions”.

For an in-depth discussion refer to Chapter 35 on Net Operating Losses.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

(f) Other States' Income Tax Addition

(IITA § 203(c)(2)(F)

Provides for the following addition modification:

> For taxable years ending on or after January 1, 1989, an amount equal to the tax deducted pursuant to Section 164 of the Internal Revenue Code if the trust or estate is claiming the same tax for purposes of the Illinois foreign tax credit under Section 601 of this Act. This addition modification was added by PA 85-1200, effective August 24, 1988.

The effect of this modification is to add back income tax expense deducted from taxable income if that same tax is taken as a credit against the Illinois Income tax liability. For instance, if a resident trust pays income tax to another state on income which is also taxed by Illinois, the tax claimed as a credit on Schedule CR will be added back in arriving at base income. [Note: The statute expressly provides that the credit is allowed only against regular income tax, not replacement tax. However, under Maryland v. Wynne, 135 S. Ct. 1787 (2015), failure to allow a credit against replacement tax violates the Commerce Clause. For 2015 and future years, the Schedule CR will allow the credit against replacement tax, but only after all of the taxpayer's regular income tax has been eliminated by the credit.]

This addition modification is reported on Schedule M.

(g) Capital Gains Addition

(IITA § 203(c)(2)(G))

Refer to corresponding addition modification under Partnerships.

(h) Remediation Costs Addition

(IITA § 203(c)(2)(G-5))

For a detailed discussion of this modification refer to Chapter 24.

The credit under IITA 201(l) (which expired on 1/1/2002) was calculated on Schedule 1299-D and reported in Part IV on Form IL-1041. The addition modification was reported in Part I on the "Other Additions" line of Form IL-1041.

(i) Federal Bonus Depreciation

(IITA § 203(c)(2)(G-10))

For a detailed discussion of this modification, refer to Chapter 24.

(j) Bonus Depreciation – Reversal of Subtraction on Disposition or End of Depreciable Life

(IITA § 203(c)(2)(G11))

For a detailed discussion of this modification, refer to Chapter 24.

(k) Related Party Expenses

(IITA §§ 203(c)(2)(G-12) and (G-13))

For a detailed discussion of this modification, refer to Chapter 24.

(l) Captive Insurance Companies

(IITA § 203(c)(2)(G14))

For a detailed discussion of this modification, refer to Chapter 24.

(m) Section 218 College Prepaid Tuition Credit Addition

(IITA § 203(c)(2)(G-15))

For a detailed discussion of this modification, refer to Chapter 24.

The credit is calculated on Schedule 1299-D and reported in Step 6 on the Form IL-1041. The addition modification is reported on Schedule M and included in Step 2 on the Other additions line on the Form IL-1041.

(n) Domestic Production Activities Deduction

(IITA § 203(c)(2)(G-16)

Effective for tax years ending on or after December 31, 2017, requires an addition for the federal deduction amount allowed under IRC Section 199 as included on Line 15a of federal Form 1041.

The amount of the addition is reported on Schedule M.

(26 U.S. Code § 199 – repealed. Pub. L. 115-97, title I, § 13305 (a), Dec. 22, 2017, 131 Stat. 2126) for tax years beginning after December 31, 2017)

(o) Distributive Share of Additions

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Includes the trust or estate's distributive share of additions from any other trust or estate of which this trust or estate is a beneficiary; and its distributive share of additions from any partnership or subchapter S corporation in which this trust or estate is a partner or shareholder. In each instance, the trust or estate should have received a Schedule K-1-P or K-1-T from each entity identifying its distributive share of additions. If the entity which distributes the income files an Illinois return, the trust or estate's share of additions can be verified per the applicable schedule attached to that return.

(p) IRC § 965 Transition Tax

(Refer to section on Partnerships for a description of this modification)

For 2017, the IRC § 965 income is reported to the IRS on a statement separate from the federal income tax return. Due to the nature of the separate statement, this income may not be included in the federal taxable income. However, it must be included when determining Illinois Base Income. If the income was not included in the federal taxable income, an Illinois taxpayer must make the appropriate modifications.

Trusts and Estates who retain income are required to make the following modification for tax year 2017:

	IRC 965 Transition Tax Statement	Form IL-1041 Schedule M
IRC § 965 (a)	Line 1	Line 10
IRC § 965 (c)	Line 3	Line 10

Attached the Statement to your return.

For 2018 tax years and after, the foreign earnings are included in the federal taxable income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(2) Subtractions

(a) Retirement Payments (Pension Plans) Subtraction
(IITA § 203(c)(2)(H))

This subtraction modification, added by PA 77-669 and effective for all taxable years beginning after December 31, 1970, provided a subtraction modification for:

> an amount equal to all amounts included in such total pursuant to the provisions of Sections 402(a), 402(c), 402(d), 403(a), 403(b), 405(d), 406(a) and 407(a) of the Internal Revenue Code, but only to the extent such amount is determined, under regulations prescribed by the Department, to be attributable to benefits accrued (whether or not vested) during plan years beginning before August 1, 1969 by or on behalf of the employee with respect to whom such amounts are received.

PA 77-2062 effective for taxable years beginning after December 31, 1971 changed this section to read: "an amount equal to all amounts included in such total pursuant to the provisions of Sections 402(a), 402(c), 402(d), 403(a), 403(b), 405(d), 406(a) and 407(a) of the Internal Revenue Code or included in such total as distributions under the provisions of any retirement or disability plan for employees of any governmental agency or unit."

PA 76-1426, effective for taxable years ending after December 31, 1976, added Sections 408 and 409 of the IRC to this modification.

PA 83-1498, effective December 27, 1984 changed this section to read: "an amount equal to all amounts included in such total pursuant to the provisions of Sections 402(a), 402(c), 402(d), 403(a), 403(b), 405(d), 406(a), 407(a), 408 and 409 of the Internal Revenue Code or included in such total as distributions under the provisions of any retirement or disability plan for employees of any governmental agency or unit, or retirement payments to retired partners, which payments are excluded in computing net earnings from self-employment by Section 1402 and regulations adopted pursuant thereto."

PA 85-731, effective for taxable years ending on or after December 31, 1987, amended the section by removing the references to IRC §§ 402(d), 405(d) and 409.

If the taxpayer is claiming this subtraction modification, be sure the income has been included in taxable income on federal Form 1041. This subtraction

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

is normally verified during the processing of the return due to the requirement that certain documents to support IL-1041, Line 14 (for tax years 2010 and forward) must be filed with the return.

(b) Valuation Limitation Amount

(IITA § 203(c)(2)(I))

Provides a subtraction modification for the valuation limitation amount effective for taxable years beginning after December 31, 1970. It excludes appreciation attributable to the period prior to August 1, 1969. It is computed on Form IL-1041, Schedule F. Schedule F, Lines 7-9, show the distribution of the pre-August 1, 1969 appreciation amounts in total. Lines 10-18 compute the fiduciary's share which is carried to the IL-1041.

If the IL-1041 is an estate or testamentary trust, there should be no acquisition dates prior to the date of death, and the basis is re-determined as of the date of death. The pre-August 1, 1969 appreciation amounts are determined separately for each beneficiary in Schedule E, but Schedule E must reconcile in total to the Schedule F.

(c) Illinois Income Tax Refund Subtraction

(IITA § 203(c)(2)(J))

Provides for a subtraction for any refund of Illinois income tax for a prior year to the extent it was included in federal taxable income. Effective August 4, 1971.

This subtraction is reported on Schedule M.

When examining this subtraction modification, it is important to verify the amount of the refund which is actually included in the computation of federal taxable income.

(d) Exemptions by Virtue of Statute or Constitution

(IITA § 203(c)(2)(K))

Provides a subtraction modification for "an amount equal to all amounts included in taxable income as modified by subparagraphs (A), (B), (C), (D), (E), (F) and (G) which are exempt from taxation by this State either by reason of its Constitution, treaties, or statutes of the United States".

For a detailed discussion of this modification, refer to Chapter 25.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Amounts included in this modification will be reported on IL-1041, Step 3, Line 15 and also Schedule M, Step 3, Lines 12, 19 a-q, 28 and 29 (for tax years 2012 and later).

(e) Expense Deductions Disallowed Federally

(IITA § 203(c)(2)(L))

Provides a subtraction modification for expenses related to the investment in federally tax-exempt instruments such as state or municipal bonds.

This subtraction modification is reported on Schedule M.

For a detailed discussion of this modification, refer to Chapter 25.

(f) Enterprise / River Edge Redevelopment Zone Dividends

(IITA § 203(c)(2)(M))

For a detailed discussion of this modification, refer to Chapter 25.

The Enterprise Zone Dividend Subtraction is no longer available for any dividends received on or after August 7, 2012.

This subtraction modification is reported in Step 3 on the IL-1041 and calculated on Schedule 1299-B.

If the fiduciary is a partner in a partnership, a shareholder in an S corporation, or a beneficiary in a trust include its distributive share as reported on K-1-P or K-1-T.

(g) Job Training Project Contributions

(IITA § 203(c)(2)(N))

For a detailed discussion of this modification, refer to Chapter 25.

This subtraction modification is reported in Step 3 on the IL-1041 (for tax years 2007 and after).

(h) Foreign Trade Zone (Sub-Zone)/High Impact Business Dividends

(IITA § 203(c)(2)(O))

For a detailed discussion of this modification, refer to Chapter 25.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Dividends subtracted under Section 203(c)(2)(M) may not be subtracted under this provision.

When auditing a taxpayer who is claiming this subtraction, be sure to verify that dividends, net of the related special deductions claimed on the federal return, are subtracted, not gross dividend income. Only the amount of dividends included in taxable income may be subtracted. Dividends may only be claimed once (either under the Enterprise Zone modification or the Foreign Trade Zone/Sub-zone modification) even though they may qualify for both.

The subtraction is reported in Step 3 of the IL-1041 and calculated on Schedule 1299-B.

If the fiduciary is a partner in a partnership, a shareholder in an S corporation, or a beneficiary in a trust include its distributive share as reported on K-1-P or K-1-T.

(i) Claim of Right

(IITA § 203(c)(2)(P))

For a detailed discussion of this modification, refer to Chapter 25.

This subtraction modification is reported on the Schedule M, in Step 3 (Line 14 of the 2013 form).

(j) Compensation Paid to Victim of Nazi Persecution

(IITA § 203(c)(2)(Q))

Effective December 23, 1999, PA 91-676 created a subtraction allowing for the amount of compensation paid to a victim of Nazi persecution to be deducted from their federal adjusted gross income.

The subtraction is applicable to taxpayers who are victims or a descendent of a victim of racial or religious persecution by Nazi Germany or any of its World War II allies, if they received compensation for persecution or for resulting losses, and that compensation is included in federal taxable income.

This subtraction is reported in Step 3 of Schedule M (Line 26 of the 2013 form).

The auditor can refer to Information Bulletin FY 2000-15 for more details regarding this subtraction modification.

(k) Federal Bonus Depreciation

(IITA § 203(c)(2)(R))

For a detailed discussion of this modification, refer to Chapter 25.

The subtraction is calculated on Form IL-4562 and reported on the IL-1041, in Step 3 (Line 20 of the 2013 form).

(l) Bonus Depreciation – Reversal of Subtraction on Disposition or End of Depreciable Life

(IITA § 203(c)(2)(S))

For a detailed discussion of this modification, refer to Chapter 25.

The subtraction is calculated on Form IL-4562 and reported on the IL-1041, in Step 3 (Line 20 of the 2013 form).

(m) Related Party 80/20 and Non-Combination Rule

(IITA §§ 203(c)(2)(T, U, V & Y))

For a detailed discussion of this modification, refer to Chapter 25.

IITA §203(c)(2)(T) allows a subtraction for:

Any interest income (net of expenses) to the extent the payor had to add back the payment under IITA § 203(c)(2)(G-12),

Any income from intangible property (net of expenses) to the extent the payor had to add back the payment under IITA § 203(c)(2)(G-13).

IITA § 203(c)(2)(U), and (V) allow a person who is required to add back interest or intangible expenses paid to a related party under IITA § 203(c)(2)(G-12) or (G-13), respectively, to subtract any interest or intangible interest received from the same related party, up to the amount of the addition. The purpose of these provisions is to require taxpayers to add back only net interest or intangible expense payments if there are payments being made both ways.

IITA § 203(c)(2)(Y) (for tax years ending on or after December 31, 2011) allows a taxpayer who was disallowed a deduction for premiums paid to subtract any loss it would have been allowed to deduct federally if not for reimbursements received on that insurance policy. If the taxpayer elects to take this subtraction, the insurer must add back the reimbursements paid.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The subtraction is calculated on Schedule 80/20, and reported on IL-1041, in Step 3 (Line 21 of the 2013 form).

For tax years ending on or after December 31, 2017, the non-combination rule is eliminated.

(n) Recovery of Items by a Decedent
(IITA § 203(c)(2)(W))

Effective August 23, 2011, this subtraction modification allows estates to subtract federally taxed recoveries of itemized incomes claimed by the decedent.

This subtraction modification is reported on Schedule M, Step 3 (Line 30 of the 2013 form).

(o) Refund of Taxes Paid to Other States
(IITA § 203(c)(2)(X))

Allows a subtraction for federally taxed refunds of other state's taxes when the trust or estate had added back the federal deduction for the tax when claiming a credit for the taxes.

The modification is reported on Schedule M, Step 3.

(p) Distributive Share of Subtractions

Includes the trust or estate's distributive share of subtractions from any other trust or estate of which this trust or estate is a beneficiary; and its distributive share of subtractions from any partnership or subchapter S corporation in which this trust or estate is a partner or shareholder. In each instance, the trust or estate should have received a Schedule K-1-P or K-1-T from each entity identifying its distributive share of subtractions. If the entity which distributes the income files an Illinois return, the trust or estate's share of subtractions can be verified per the applicable schedule attached to that return.

e) Modification Limitation
(IITA § 203(c)(3))

Provides the following modification limitation effective for tax years ending on or after December 31, 1986:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

> The amount of any modification otherwise required under this subsection shall, under regulations prescribed by the Department, be adjusted by any amounts included therein which were properly paid, credited, or required to be distributed, or permanently set aside for charitable purposes pursuant to IRC § 642(c) during the taxable year.

The effect of this change was to prevent the taxation of income from the addback of capital gains from charitable remainder trusts which permanently set aside such income for charitable purposes.

f) IL-1041 – Schedule NR

(Form for tax year 2016)

If an estate or trust is a NONRESIDENT, then Schedule NR, Form IL-1041 is completed if the estate or trust has any business income derived within Illinois.

Step 3, Column A of Schedule NR reflects the amounts shown on federal Form 1041. Line 5 of federal Form 1041 will be reclassified according to income reported on Schedule NR Line 5 (Net rent and royalty income), Line 6 (Income from partnerships and subchapter S corps), Line 7 (Income from trust and estates) and Line 8 (Real Estate Mortgage Investment Conduits (REMIC)). The total of Lines 5 through 8 on Schedule NR should equal the amount on federal Form 1041 Line 5.

Step 3, Column B is the fiduciary's share of the income and expenses in Column A which are not distributed to the beneficiaries.

Step 3, Column C is the "fiduciary's share" of income allocable to Illinois from Column B. Be sure to verify that each item of income and expense has been properly allocated.

If the fiduciary’s share of any business income was received from both inside and outside Illinois, Step 6 must be completed to figure the apportionment factor, to complete Schedule NR.

Step 4 is completed to figure Illinois additions and subtractions from amounts reported on Form IL-1041, Column B.

Step 5 reflects base income or net loss allocable to Illinois.

If a trust or estate files either federal Schedule 1040 C or F (farming operations), it has business income to be apportioned under IITA § 304. The factor in Step 6 is computed in the same manner as if the estate or trust was a corporation doing business within and without Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

The sales factor is verified from Schedule C or F as well.

For a detailed discussion of the apportionment factors, refer to Chapter 27 Apportionment.

If all business income is derived solely inside Illinois or solely outside Illinois, Step 6 does not have to be completed.

The exemption available to the nonresident trust or estate is computed in Step 5 of Schedule NR. This amount is then carried to Step 4, Line 31 of the IL-1041.

g) IL-1041 – Step 4

Step 4 and Step 5 of the IL-1041 is the final computation of net income (loss) of the trust or estate and the computation of the trust's replacement tax liability. Resident trusts and estates go straight to Step 4 after completing Steps 2 and 3. IITA § 203(c)(2)(E) provides that effective for tax years ending on or after December 31, 1986, the Illinois Income Tax Act is amended to provide for an Illinois net operating loss which may be carried over or carried back in the same manner as a federal net operating loss.

h) IL-1041--Schedule CR

If a resident trust operates in another state and pays taxes to that state, it may claim a tax credit against its Illinois income tax liability by filing Schedule CR. If a taxpayer files Schedule CR, the amount of taxes claimed on this form is verified by requesting a copy of the other state's income tax return to confirm that the taxes were actually paid.

Resident estates and trusts are entitled to a foreign tax credit for taxes on, or measured by, income paid to another state as defined in the IITA § 601(b)(3) and § 1501(a)(22). Generally, a fiduciary's taxable income is net of income taxes paid in any one of the United States because such taxes are usually claimed as a deduction on the fiduciary's Federal income tax return. However, there may be cases where a fiduciary pays income tax to a foreign country and foregoes the Federal deduction for such taxes in order to claim a credit against their Federal income tax liability. A credit against Illinois Income Tax may then be claimed for such foreign taxes for years ending prior to September 1, 1989.

A fiduciary entitled to claim a foreign tax credit should complete Schedule CR. The schedule should be attached to the IL-1041 for reference. Also, evidence of payment of the foreign tax should be included. If the trust or estate has made distributions to the beneficiary(ies), the amount of such foreign tax credit is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

allocable to both the fiduciary and the beneficiaries on the basis of income distributed.

If a foreign tax credit is claimed for taxes paid to another state (not a foreign country), the credit is not allowable if any of the tax paid to the other taxing jurisdiction and claimed on the IL-1041 Schedule CR was deducted from federal taxable income on federal Form 1041 and was NOT added back on Schedule M, Line 5. REF: IITA § 601(b)(3) and instructions to Schedule CR (IL-1041).

i) IL-1041--Schedule D Beneficiary Information

Schedule D, Beneficiary Information, is included with Form IL-1041. Schedule D is the required form for identifying any person who was a beneficiary during the tax year.

Schedule D has been redesigned for tax years ending on or after December 31, 2014, to report certain items of income reported to your beneficiaries, and pass-through withholding payments made on behalf of your ***nonresident*** beneficiaries.

Amounts that would have been reported on behalf of a trust or estate's beneficiaries on Form IL-1000 must be reported on Schedule D since that form was eliminated for tax years ending on and after December 31, 2014.

Schedule K-1-T, Schedule(s) K-1-T(3) (or Schedule K-1-T(3)-FY), as applicable and all of Schedule D, Step 2 must be completed before completing Schedule D, Step 1.

> Note: Schedule(s) K-1-T(3) and K-1-T(3)-FY are new forms for tax years ending on and after December 31, 2014 and are explained in the Pass-through Withholding Calculation section.

The completed Schedule D will be used to support the amount reported on the IL-1041, Step 7, Line 50 Pass-through withholding payments you reported on behalf of your members.

To verify the beneficiaries' percentages, a copy of the will must be obtained. For a trust, a copy of the `trust instrument' must be obtained. (A trust instrument is the formal document which created the trust and contains the powers of the trustees and the rights of the beneficiaries.)

Effective with tax years ending on or after December 31, 1998, the Schedule D was revised, replacing the Schedules D & E.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Effective with taxable years ending on or after 12/31/90, the flow-through computation on Schedule D was corrected. For years ending prior to that date, the computation was incorrect.

j) Subtractions and Credits

Below is a list of subtraction modifications and income tax credits (as of 2016) for which trusts and estates are entitled, along with the applicable statute and regulation.

(1) Schedule 1299-B Subtractions

- Dividends from River Edge Redevelopment Zones (IITA §203(c)(2)(M), 86 IAC § 100.2480)

- Dividends from High Impact Business within a Foreign Trade Zones (or sub-zones) (IITA § 203(c)(2)(0), 86 IAC § 100.2490)

Pass-through amounts applicable to each beneficiary are reported in Step 5 on Schedule K-1-T.

(2) Schedule 1299-D Income Tax Credits

- TECH-PREP Youth Vocational Programs Credit (IITA § 209)*

- Dependent Care Assistance Program Credit (IITA § 201, 86 IAC §100.2195)*

- Film Production Services Tax Credit (IITA § 213, 86 IAC § 100.2185)

- Enterprise Zone or River Edge Redevelopment Zone Investment Credit (IITA § 201(f); 86 IAC § 100.2110)*
  (The River Edge Redevelopment Zone Investment credit has expired for tax years beginning on or after July 12, 2016).

- High Impact Business Investment Credit (IITA § 201(h); 86 IAC § 100.2130)*

- Tax Credit for Affordable Housing Donations (IITA § 214; 86 IAC § 100.2190)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- Economic Development for a Growing Economy (EDGE) Credit (IITA § 211; 86 IAC § 100.2198)

- Research and Development Credit (originally expired for tax years ending after December 31, 2015) (IITA § 201(k); 86 IAC § 100.2160) P/A 100-0022 retroactively restored the credit for tax years ending after December 31, 2015. A supplemental Schedule 1299-D (R&D) has been designed to allow the credit to be claimed for the 2016 tax year, if applicable.

- River Edge Redevelopment Zone Remediation Credit (IITA § 201(n))

- Ex-Felons Jobs Credit (IITA § 216)

- Veterans Jobs Credit (IITA § 217 & § 217.1)

- Student-Assistance Contribution Credit (IITA § 218; 86 IAC § 100.2193)

- Angel Investment Credit (IITA § 220, 86 IAC § 100.2171)

- New Markets Credit

- River Edge Historic Preservation Credit (IITA § 221)

- Live Theater Production Tax Credit (IITA § 222)

- Hospital Credit (IITA § 223)

- Historic Preservation Credit (IITA § 219)
  (Expired for tax years ending after December 31, 2015)

  All Income credits are distributable by partnerships and S corporations and require Schedule K-1-P to support distributive share amounts (except for those noted *). Credits do not flow through a trust or estate to the beneficiaries, even if all income of trust or estate flows through.

  Refer to Chapter 36 for more details regarding credits.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If the fiduciary is a partner in a partnership or a shareholder in an S corporation, any deductions or credits reported on K-1-P are to be claimed on Schedule 1299-B or Schedule 1299-D.

k) IL-1041--Schedule E

This schedule is the beneficiaries' information relating to August 1, 1969 appreciation amounts. Columns 1, 2 and 3 apply to all beneficiaries. Column 4 applies only to nonresident beneficiaries. Corporate beneficiaries are not entitled to claim this subtraction.

Effective for tax years ending on and after December 31, 1998 the IL-1041, Schedule E was replaced with Schedule K-1-T.

l) Auditor's Report

The Auditor's report for the IL-1041 is Form EDA-26. Schedule D information should be included as an audit schedule.

Any change to the IL-1041 in audit that would affect the tax of a resident or nonresident beneficiary automatically requires an audit of the beneficiary. This would be subject to comment in the narrative report of all the related returns examined. The auditor will be responsible for making changes to every beneficiary's return, unless the fiduciary agrees to pay the tax by filing an IL-1000, if none were originally filed or an IL-1000-X amending previously filed forms (for tax years ending prior to December 31, 2014) or IL-1041 or IL-1041-X, as applicable (for tax years ending on or after December 31, 2014).

D. Pass-through Entity Withholding

All pass-through entities (PTEs), i.e. partnerships, S corporations and trusts, with Illinois sourced income, are ***required*** to make tax payments on behalf of their **nonresident** partners, shareholders and beneficiaries for tax years ending on or after December 31, 2008. This is referred to as "Pass-through Entity Withholding". This pass-through payment requirement was established by Public Act 95-233 and Public Act 95-707.

1. Pass-through Withholding Calculation

For Tax Years ending on or after December 31, 2014

Public Act 98-0478 amended IITA § 502 eliminating the option for filing composite returns for partnerships, S corporations, and trusts for tax years ending on or after December 31, 2014. The Public Act also amended IITA § 709.5 to require

withholding for the share of the items of nonbusiness income of the partnership, Subchapter S corporation or trust that are always allocated to Illinois under Section 303 regardless of the commercial domicile or any other attribute of the beneficiary (e.g., rental income from property located in Illinois) and the net of any credits under Article 2 of the IITA that flow through the entity to the owner.

86 IAC §100.5100(c) Petition for Residents to be included in the filing of a composite return, does not apply to the new Pass-through Withholding Calculation requirements since the K-1-P(3), K-1-P(3)-FY and K-1-T(3), K-1-T(3)-FY are not composite returns.

Amounts to be paid on behalf of the nonresident partners, shareholders and beneficiaries are reported on Form IL-1065 Partnership Replacement Tax Return, Form IL-1120-ST Small Business Corporation Replacement Tax Return or Form IL-1041 Fiduciary Income and Replacement Tax Return. In addition, the amounts reported on these forms will be paid with those returns, or with Form IL-505-B Automatic Extension Payment. Voluntary payments are to be made using Form IL-516-I or Form IL-516-B, Pass-through Prepayment Vouchers.

Lloyd’s plan of operation filers will now file on Form IL-1065 following instructions in 86 IAC § 100.5130. All underwriters (resident and nonresident) who are members of an insurance business organized under a Lloyd’s plan of operation may be included on Form IL-1065. No credit is allowed to any underwriter for its share of tax paid on Form IL-1065.

a) Schedule(s) K-1-P(3) Pass-through Withholding Calculation for Nonresident Members

Effective for tax years ending on or after December 31, 2014, Schedule K-1-P(3) was developed to calculate the required tax a partnership or S corporation must report and pay on behalf of its Illinois **nonresident** partners or shareholders that receive business or nonbusiness income and have not provided you with Form IL-1000-E Certificate of Exemption for Pass-through Withholding Payments.

(2014 and 2016 Schedules K-1-P(3)-FY have been developed to assist fiscal filers in calculating the correct pass-through withholding tax for their nonresident members.)

- If your tax year ends ***on*** December 31, 2014, the 2014 Schedule K-1-P(3) must be used
- If your tax year ends ***after*** December 31, 2014, the 2014 Schedule K-1-P(3)-FY must be used.
- If your tax year ends ***on or before*** June 30, 2017, the 2016 Schedule K-1-P(3) must be used.

- If your tax year ends ***on or after*** July 1, 2017, the 2016 Schedule K-1-P(3)-FY must be used.

These forms replace Form IL-1023-C and Form IL-1000, which were eliminated and cannot be used for tax years ending on or after December 31, 2014.

A separate Schedule K-1-P(3) or K-1-P(3)-FY must be completed for each nonresident member who has not submitted a Form IL-1000-E.

Partnerships and S corporations issuing Schedule(s) K-1-P(3) or K-1-P(3)-FY are not to attach the schedules to their Form IL-1065 or Form IL-1120-ST. However, they must keep a copy of each schedule available for inspection by the Department, if requested. The K-1-P(3) or K-1-P(3)-FY is not sent to the partners or shareholders. Amounts calculated on these forms are reported to the partners or shareholders on the K-1-P the partnership or S corporation prepares.

Amounts calculated on the Schedule(s) K-1-P(3) or K-1-P(3)-FY are reported as follows:

From K-1-P(3) or K-1-P(3)-FY	To Schedule B (IL-1065 or IL-1120-ST)	To Members K-1-P
Step 3, Line 12	Step 2, Column G	
Step 3, Lines 13 and 16	Step 2, Column H	
Step 3, Lines 14 and 17	Step 2, Column I	
Step 3, Line 19	Step 2, Column J	Step 7, Line 54

IITA § 502(f-5) PAYMENT OF OWNER LIABILITIES BY PASS-THROUGHS

Per IITA 502(f-5) the Department is allowed to make rules to let the partnership or S-corporation report changes in liability or claim refunds on behalf of its partners or shareholders.

The S-corporation or partnership MUST agree to the entity changes and pay the tax on behalf of the entity and the partners/shareholders in order for IITA § 502(f-5) to apply.

For tax years ending on and after December 31, 2014, if the taxpayer (partnership or S-corporation) is agreeing to the audit changes, changes will be made to the Schedule B for ALL partners (non-resident and resident alike).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Changes to the Schedule B will reflect:

- Column E - changes to the income/loss distributable to each partner/shareholder
- Column F – change this column to blank for any partner/shareholder that wasn't included in withholding originally
- Column G – report corrected share of Illinois income subject to pass-through withholding from K-1-P(3)
- Column H – report corrected pass-through withholding before credits from K-1-P(3)
- Column I – report corrected distributable share of credits from K-1-P(3)
- Column J – report correct amount of pass-through withholding payment amount reported on K-1-P. Changes to the pass-through payment attributable to the non-resident partners and resident partners will now show a pass-through payment attributable to the audit income change amount

The changes to the pass-through payment will flow to the IL-1065/IL-1120-ST pass-through payment line and the Column B change should show a change in pass-through payments

b) Schedule(s) K-1-T(3) Pass-through Withholding Calculation for Nonresident Members

Effective for tax years ending on or after December 31, 2014, Schedule K-1-T(3) was developed to calculate the required tax a trust or estate must report and pay on behalf of its Illinois **nonresident** beneficiaries that receive business or nonbusiness income and have not provided you with Form IL-1000-E Certificate of Exemption for Pass-through Withholding Payments.

(2014 and 2016 Schedule K-1-T(3)-FY have been developed to assist fiscal filers in calculating the correct pass-through withholding tax for their nonresident members.)

- If your tax year ends ***on*** December 31, 2014, the 2014 Schedule K-1-T(3) must be used
- If your tax year ends ***after*** December 31, 2014, only the 2014 Schedule K-1-T(3)-FY (for Fiscal Filers) must be used.
- If your tax year ends ***on or before*** June 30, 2017, the 2016 Schedule K-1-T(3) must be used.
- If your tax year ends ***on or after*** July 1, 2017, only the 2016 Schedule K-1-T(3)-FY (for Certain Fiscal Filers) must be used.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

These forms replace Form IL-1000, which was eliminated and cannot be used for tax years ending on or after December 31, 2014.

A separate Schedule K-1-T(3) or K-1-T(3)-FY must be completed for each nonresident member who has not submitted a Form IL-1000-E.

Estates and trusts issuing Schedule(s) K-1-T(3) or K-1-T(3)-FY are not to attach the schedules to their Form IL-1041. However, they must keep a copy of each schedule available for inspection by the Department, if requested. The K-1-T(3) or K-1-T(3)-FY is not sent to the beneficiaries. Amounts calculated on these forms are reported to the beneficiaries on the K-1-T the estate or trust prepares.

Amounts calculated on the Schedule(s) K-1-T(3) or K-1-T(3)-FY are reported as follows:

From K-1-T(3) or K-1-T(3)-FY	To Schedule D (IL-1041)	To Members K-1-T
Step 3, Line 12	Step 2, Column F	
Step 3, Line 13	Step 2, Column G	Step 7, Line 54

2. Pass-through Entity (PTE) Payments and Composite Income & Replacement Tax Returns

For Tax Years ending prior to December 31, 2014

Form IL-1000, Pass-through Entity Payment Income Tax Return, or Form IL-1023-C, Composite Income and Replacement Tax Return was filed by the PTE to report and pay withholding tax on behalf of its nonresident (and in some cases, resident) members. The PTE may elect to file either the IL-1000, the IL-1023-C or, in some cases, both. This will be contingent on the composition of their owners/members.

The ownership of the PTE can be comprised of resident and nonresident partners, shareholders or beneficiaries. The filing requirements for the PTE are different depending on the residency status of those owners:

Resident owner (shareholder/partner/beneficiary) filing:
The PTE provides the owners with a Schedule K-1-P or K-1-T for use in preparation of their Illinois return. PTEs cannot file an IL-1000 return or make a pass-through payment on behalf of Illinois residents.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

The PTE may petition the Department, and the Department may grant approval, to include a member who is an Illinois resident in the filing of a Composite Return under the following circumstance:

Clear demonstration that no other method of filing would achieve the same degree of compliance and administrative ease for the Department and the taxpayers. (86 IAC § 100.5100(c)). This requirement does not apply to a Lloyd's plan of operation.

Nonresident owner (shareholder/partner/beneficiary) filing:
The PTE provides the owners with a Schedule K-1-P or K-1-T. The schedule should reflect the amount of PTE payment made on their behalf. The nonresident owners who file an Illinois tax return to report the income are allowed to take the PTE credit to offset their tax liability.

Exemption for the IL-1000 filer:

Form IL-1000-E, Certificate of Exemption for Pass-through Entity Payments, would be completed by the owners that elect to make their own tax payments and assume the tax responsibility for themselves under the IITA. Once the certificate is received by the PTE, the entity is relieved of that portion of the PTE payment. The 1000-E must be submitted to the PTE prior to the due date of the IL-1000. The PTE should retain the certificates, and not send them to the Department unless specifically requested. Once accepted by the PTE, this Certificate of Exemption remains active unless the Department revokes the certificate or the non-resident owner requests the exemption be revoked. NOTE: The IL-1000-E is NOT available for use by nonresident "individual" owners.

Estates: Form IL-1000 is not required to be filed by estates. However, estates can file an IL-1000, if they so choose, on behalf of their beneficiaries.

Pertaining to the filing of Form IL-1023-C, all members not included on Form IL-1023-C are required to meet their Illinois filing obligations independently. Ref: 86 IAC Section 100.5120. If sufficient tax is paid on behalf of an owner on one or more Forms IL-1000 to cover that owner's Illinois tax liability, no return is required. Ref: IITA Section 502(a).

No estimated payments are required under 86 IAC § 100.5140; so no ES Late Payment penalty can be assessed for failure to make estimated payments. However, the taxpayer may make estimated payments using Form IL-1023-CES. In addition, if the taxpayer cannot file its IL-1023-C on or before the 15th day of the 4th month following the close of the agent's tax year, then Form IL-505-B must be filed along with payment.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

a) Net Operating Losses – Composite Returns

The regulations developed by the Department do not provide for a carryover or carryback of net operating losses on composite returns. The premise of the composite return is that it allows the tax that would have been reported by a number of separate entities to be reported on one return. It is not a return of the partnership, Subchapter S corporation or Lloyd's but rather is in respect of the individuals. Since there is no provision in the IITA for individuals to carry Illinois losses against Illinois income (rather than an adjusted gross loss at the federal level against adjusted gross income) there is no corresponding composite return provision. REF: SUNSHINE LETTER IT 88-0018.

b) Authorized Agents

In the case of composite returns, the partnership, Subchapter S corporation or the Lloyd's plan of operation is considered the authorized agent of the partners, shareholders, etc. included in the returns. As such, the authorized agent is responsible for the filing and amending of the returns, requests for extensions of the time to file, payment of the liabilities, responding to notices from the Department, filing of petitions (as explained below) and participation in any audits of the returns.

The composite returns must be signed by one of the following individuals:

1. In the case of a partnership, a general partner.

2. In the case of an S corporation, a corporate officer.

3. In the case of a Lloyd's plan of operation, an attorney-in-fact.

   An attorney-in-fact is an agent authorized by another to act in the principal’s place, either for some particular purpose or for the transaction of business in general. For auditing purposes this authority would be conveyed through the execution of an IL-2848, Power-of-Attorney.

c) Flow-Through Payments

86 IAC § 100.5100(e) states:

> Nonresident individuals, trusts and estates with Illinois source income other than from a partnership, subchapter S corporation, or Lloyd's plan of operation may, but need not, be included in a composite return. If such nonresidents are included in a composite return for a taxable year ending on or after December 31, 2008

(December 31, 1999, in the case of a composite return filed by a Lloyd's plan of operation), they may claim a credit against their Illinois income tax liability for their share of the tax paid on their behalf on the composite return. If nonresidents are included in a composite return for an earlier taxable year, they will not be permitted to claim credits on their individual returns for their shares of the composite tax payments unless the authorized agent files a petition with the Department of Revenue requesting permission for the nonresidents to claim the credit and the petition is granted.

The permission is obtained in the same manner for the inclusion of Illinois residents in a composite return.

The purpose of the petition is to allow the member to claim a credit for taxes paid on the composite return on the member's own return. Accordingly, NO PETITION IS REQUIRED IF:

1. ALL OF THE MEMBERS OF THE COMPOSITE RETURN ARE NONRESIDENTS OF ILLINOIS WITH NO OTHER ILLINOIS SOURCE INCOME; OR

2. THE MEMBERS WITH OTHER ILLINOIS SOURCE INCOME DO NOT WISH TO CLAIM THEIR PORTION OF THE COMPOSITE TAX PAYMENTS ON THEIR INDIVIDUAL RETURNS.

Any member of the group that is an Illinois resident or is a nonresident with Illinois income from other sources, so that his or her liability is not covered by a composite return or pass-through withholding, must file individual returns (IL-1040s, IL-1041s) in accordance with 86 IAC § 100.5160. The return should report ALL ILLINOIS INCOME including the person's share of the income that is reported on the composite tax return. A credit may then be claimed for the person's share of the composite tax payments and used to offset the individual Illinois tax liability. The credit is computed by multiplying the composite tax payments made by a fraction, the numerator of which is the individual's proportionate share of the composite tax liability and the denominator of which is the total composite tax liability.

A composite return DOES NOT HAVE to include all members who are eligible to be included. Persons who are not included are responsible for filing their own Illinois returns and paying their individual tax liabilities. Also, with the exception of the petitions discussed above, the authorized agent of the composite return does not have to notify the Department of the decision to cease filing the composite return or of any change in the membership of the return for the subsequent years.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Example: The Acme partnership consists of a general partner and 50 limited partners. The general partner is a regular corporation, and the limited partners consist of 26 nonresident individuals, 20 resident individuals, a S corporation, a partnership, a nonresident estate, and a nonresident trust. The 26 nonresident individuals, the nonresident estate, and the nonresident trust may be included on Form IL-1023-C. The 20 resident individuals **may** be included if Acme submits a petition and the Department grants approval. None of the other partners may be included.

d) Business Income Versus Nonbusiness Income

Form IL-1000 (for tax years ending before December 31, 2014) is used to report and pay the required tax on behalf of nonresident owners that receive business income from the PTE. Confusion exists regarding nonbusiness income that the nonresident owners may receive.

- If the nonresident owners have only business income, the PTE is required to file the IL-1000 to report and pay the tax liability on the owner's behalf.
- If the nonresident owners have only nonbusiness income, the PTE is not required to submit/pay the IL-1000 on the owner's behalf.
- If the nonresident owners have both business and nonbusiness income, the "recommended" solution is for the owners (if not an individual) to complete the IL-1000-E and submit it to the PTE, and then report (file) and pay their own liability for both types of income. However, unless an IL-1000-E is received, the liability for the withholding on the business income portion remains with the PTE.

e) Confidentiality Issues

IITA § 917(a) prohibits disclosure of data received by the Department unless it is for official purposes including the collection of any state tax. Disclosing the results of a pass-through entity's audit, Action Decision, or other pertinent information related to the owner(s) of a pass-through entity is permissible under the law as long as the disclosure is pertinent to the owner's tax consequence. The "official purposes" exception would apply even if there is no audit on the pass-through entity, if the information is required for the owner(s) to establish their tax liability.

Example: During an audit of a partnership, adjustments were made that resulted in an increase to the flow-through income to the partners. If the partnership agrees with the audit results and elects to pay the partners' tax deficiencies [under IITA § 502(f-5)] it would not be necessary for the Department to notify the partners. The appropriate PTE return (IL-1000-X or IL-1023-C-X (for tax years ending before December 31, 2014) IL-1065-X (for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

tax years ending on and after December 31, 2014)) would be filed and paid for the partner's deficiencies. In this case, the partnership would obtain the rights to ICB.

However, if the partnership does not pay the deficiencies, the Department would notify the partners, which is allowed under IITA § 917(a), as to the audit results that caused these flow through deficiencies. Since the partners would then be responsible for these deficiencies, they would obtain the rights to ICB, not the partnership.

Note: For purposes of imposing the late payment penalty under UPIA Section 3-3(b-20)(2) at the 15% or 20% rates that apply after the initiation of an audit, the issuance of the Notice of Audit Initiation for a partnership, S corporation, or trust constitutes the initiation of an audit on the owners/beneficiaries as to the changes that flow through from the PTE return to the owners'/beneficiaries' returns.

f) Form IL-872, Consent to Extend the Time to Assess or Refund Income Tax

The IL-872 allows for a statute extension for issuance of a notice of deficiency (NOD) to the PTE for any applicable tax liabilities.

IITA § 905 applies to all taxes arising under the Illinois Income Tax Act, which would include IIT, BIT, WIT and pass-through entity withholding. An extension of the statute of limitations (under Section 905) should apply to all tax types.

When performing an IL-1000 audit, it is important to monitor the statute extension date on the IL-872 signed by the taxpayer, since there is no statutory extension to file Form IL-1000. The auditor must ensure that the statute on the IL-1000 does not expire before obtaining an IL-872.

Example: An IL-1120-ST audit is being performed for TY 12/10. The natural statute date for this audit is 10/15/2014. For the TY 12/10 IL-1000, the natural statute date is 3/15/2014. If changes will be made to the S corporation that will affect the IL-1000, then an IL-872 must be obtained that extends the statute past the IL-1000's natural statute. This will ensure any changes made to the IL-1120-ST can also be applied to the IL-1000, if applicable.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

g) Differences Between the IL-1000 and IL-1023-C

	IL-1000	**IL-1023-C**
Proper use of form – Who can be included on the form	Used for nonresident partners, shareholders, and beneficiaries who are not included on Form IL-1023-C or nonresident owners who did not provide an IL-1000-E	Generally used for nonresident individual, trust, or estate members with no other Illinois income other than the income reported on the IL-1023-C
Who cannot be included on the form	✓ Illinois residents ✓ Owners included on an IL-1023-C ✓ Owners that provided an IL-1000-E ✓ Exempt organizations	✓ Illinois residents (except those approved by petition) ✓ Partnerships ✓ S corps ✓ C corps
Due Dates	By original due date of the entity return - for S Corp - 15th day of 3rd month for Partnerships/Fiduciaries - 15th day of 4th month	Due on/before 15th day of 4th month following close of the tax year
Extensions	None	Automatic 6 month extension to file
Credits – pass-through (not the payment credit)	Credits cannot be claimed	Credits can be claimed as reported on the IL-477 and Schedule 1299-A (for taxable years ending on or after December 31, 2009. 86 IAC §100.5150)
Overpayments on return	PTE cannot claim refund	PTE can claim refund
Reportable transactions (ATAT)	Does not fulfill the reporting obligation of the owners	Fulfills the reporting obligation of the members (owners)

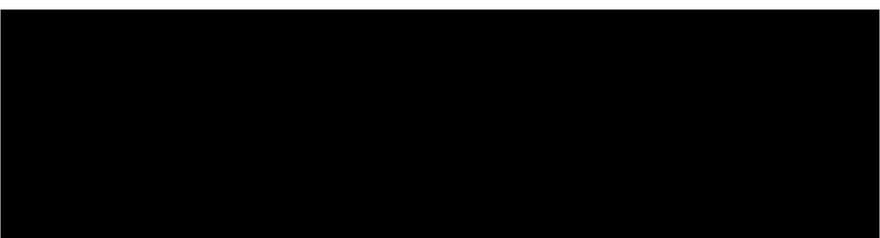
Note: There are differences in the due dates for the IL-1000 and IL-1023-C. Penalty and interest will be calculated based on the appropriate due date.

h) Nonresident Owner Requirements

All Illinois nonresidents have an Illinois tax obligation if they receive Illinois-sourced income.

If the PTE payment made on the nonresident owner's behalf covers their Illinois income tax obligation, the nonresident is not required to file an Illinois tax return. The nonresident owner who does file an Illinois tax return must report the income and is allowed to take credit for the PTE payment made on behalf of that owner.

The Schedule K-1-P issued to the nonresident partners, shareholders or beneficiaries should reflect the PTE payment made on their behalf. The nonresidents are ***required*** to attach the Schedule K-1-P or Schedule K-1-T to their return (**if they file**) in order to be given the applicable PTE credit against their liability. This credit will show as a "K1 credit" or a "credit for PTE" on the nonresidents' account in GenTax as shown below.



REQUIREMENTS FOR THE NONRESIDENT OWNER WHO IS ALSO A PASS-THROUGH ENTITY (TIERED ENTITY)

PTEs that are owners of a PTE with Illinois business income must file Form IL-1023-C or file Form IL-1000 (for tax years ending before December 30, 2014) or IL-1065, IL-1120-ST or IL-1041 (for tax years ending on or after December 30,2014), and make a PTE payment for their nonresident owners on the Illinois business income passed through to them, as well as on any Illinois business income they earn directly. For tax year ending on or after December 30, 2014 a PTE payment will also be required from nonresident owners on the share of nonbusiness income of the partnership, S-corporation or trust that is allocable to Illinois. Ref: 86 IAC Section 100.7035(a). In addition to receiving Schedule(s) K-1-P or K-1-T, the tiered entity must also issue Schedule(s) K-1-P or K-1-T to its owners.

Tiered entities that elect not to file Form IL-1000-E, Certificate of Exemption for Pass-through Entity Payments, will have a PTE payment made on their behalf. This payment can be used by the tiered entity as a credit on the Form IL-1000 or Form IL-1023-C (for tax years ending prior to December 31, 2014) or Forms IL-1065, IL-1120-ST or IL-1041 (for tax year ending on and after December 31,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

2014) that the entity files for its owners or as a credit on the annual tax return that is filed by the tiered entity.

When auditing a tiered entity, the auditor is responsible for each tier. The auditor must verify that the PTE has properly withheld and paid the tax liability for the owners at each level.

Example 1: (Partnership A and B are not unitary)
For tax year **2008**, Partnership A (a pass-through entity) has business income of $1,000 and an Illinois apportionment factor of 40 percent, for a total Illinois-sourced income of $400. It has two equal partners:

- Individual A, an Indiana resident

- Partnership B, a partnership (pass-through entity) doing business only in Indiana. Partnership B has not submitted an IL-1000-E. It has two equal partners, both individual residents of Ohio.

Partnership A must file an IL-1000 and make a total pass-through entity payment of $9.00:
$200 times 3 percent = $6 distributable to Individual A
$200 times 1.5 percent = $3 distributable to Partnership B

Partnership B must file an IL-1000 and make $6 in pass-through entity payments on the $200 of Illinois business income that passed through to it from Partnership A:
$100 times 3 percent = $3 distributable to Individual Ohio resident A, and
$100 times 3 percent = $3 distributable to Individual Ohio resident B

Partnership B must also file an IL-1065 and pay replacement tax on the $200.

NOTE: It may claim a credit for the $3 of pass-through entity payments made on its behalf on its Form IL-1000 or Form IL-1065.

If Partnership B submits an IL-1000-E to Partnership A, Partnership A will not be required to make a pass-through entity payment on the $200 distributable to Partnership B. However, Partnership B will still be required to pay replacement tax and make pass-through entity payments on the $200 that has been passed-through from Partnership A.

Example 2: (Partnership A and B are unitary)
For tax year **2008**, Partnership A (a pass-through entity) has business income of $1,000, on sales of $10,000, including Illinois sales of $4,000. Accordingly, it has an Illinois apportionment factor of 40 percent, for a total Illinois-sourced income of $400. It has two equal partners:

- Individual A, an Indiana resident

- Partnership B, a partnership (pass-through entity) doing business only in Indiana. It has business income of $500 on sales of $10,000, none of which are Illinois sales. Partnership B has not submitted an IL-1000-E. It has two equal partners, both individual residents of Ohio.

Partnership A and B are unitary in this example.

Partnership A must file an IL-1000 and make a total pass-through entity payment of $9.00, the same as Example 1.
$200 times 3 percent = $6 distributable to Individual A
$200 times 1.5 percent = $3 distributable to Partnership B

Partnership B must file an IL-1000 and make pass-through entity payments on its Illinois business income, computed as follows:
Business Income = $500 from its own activities plus its $500 share (50% of 1,000) of the business income of Partnership A, or $1,000;

Illinois sales of $2,000 (50% of $4,000) passed through from Partnership A; and $10,000 in everywhere sales from its own activities plus its $5,000 share (50% of $10,000) of the everywhere sales of Partnership A, for a total of $15,000. Partnership B's apportionment factor is therefore 13.3333%, and its Illinois business income is $133.

$67 times 3 percent = $2 distributable to individual Ohio resident A, and
$67 times 3 percent = $2 distributable to individual Ohio resident B

Partnership B must also file an IL-1065 and pay replacement tax on the $133.

NOTE: It may claim a credit for the $3 of pass-through entity payments made on its behalf on its Form IL-1000 or Form IL-1065.

If Partnership B submits an IL-1000-E to Partnership A, Partnership A will not be required to make a pass-through entity payment on the $200 distributable to Partnership B. However, Partnership B will still be required to pay replacement tax and make pass-through entity payments on the $133 in business income that it apportions to Illinois.

i) Filing an Amended Return

An amended return (Form IL-1000-X, Amended Pass-through Entity Payment Income Tax Return or Form IL-1023-C-X, Amended Composite Income and Replacement tax Return (for tax years ending prior to December 31, 2014) or IL-

1065-X, IL-1120-ST-X or IL-1041-X (for tax years ending on or after December 31, 2014)) should be used by PTEs if they have previously filed a processable original return. Since refunds of tax to the PTE are not permitted on the IL-1000 return, Form IL-1000-X can only be used to report and pay an underpayment of tax due. However, Form IL-1023-C-X, IL-1065-X, IL-1120-ST-X and IL-1041-X can be used to file a claim for tax.

- In the event the amount paid by the PTE is less than the tax obligation for its nonresident owners/members, the PTE is relieved of its obligation to pay the difference if the owners/members have paid their liability. Therefore, no amended return would be required. Ref: IITA § 713 and 86 IAC § 100.7035(f)(1).

- If the PTE overpaid the tax on Form IL-1000, it cannot file an amended return to claim a refund. The owner(s) for whom it overpaid will be responsible for filing an annual Illinois tax return and claiming any overpayment that was made by the PTE. However, if the taxpayer has evidence that they made duplicate payments for the tax or have remitted the payment in error, they may be entitled to a refund. (See Issue 1 under Issues Encountered with the Form IL-1000).

j) Penalties and Interest

Late-Filing Penalty

For Form IL-1000, if a processable return is not filed by the original due date of the entity's tax return, this penalty is assessable. For Form IL-1023-C, if a processable return is not filed by the extended due date of the entity's return, this penalty is assessable.

Late-Payment Penalty

If the total tax liability is not paid by the original due date of the return, this penalty is assessable.

Bad Check Penalty

If the remittance submitted by the taxpayer is not honored by the financial institution, this penalty is assessable.

Interest

Interest is calculated on tax from the day after the original due date of the return through the date the tax is paid.

Note: Per 86 IAC Section 100.7035(f)(1), the PTE is relieved of its obligation to pay any amount due with respect to an owner, if the owner has paid its liability under the IITA on the income from which withholding was required. However, the PTE is not relieved of any penalty or interest otherwise applicable with respect to its failure to timely pay the withholding.

k) Audit Procedures

Since 86 IAC Section 100.7035(a) requires all pass-through entities to withhold from nonresident owners [except for those exempted under 100.7035(g)], every effort should be made in an audit situation to collect the required payments from the PTE as opposed to the owners. Pursuing the payment at the entity level, when feasible, represents the most expedient solution of collection.
When auditing a PTE, the auditor is responsible for ensuring that the PTE has fulfilled the reporting/payment obligation for the nonresident owners (partners, shareholders, and beneficiaries) as outlined in Section 709.5 of the IITA.

The Auditor's Report for composite return audits is the EDA-127 IL-1023-C Auditor's Report. Any adjustments to a previously filed IL-1023-C are to be reported on the EDA-127 and IL-870 (for non-APT audits).

When auditing partnerships with nonfiling, nonresident partners, Subchapter S corporations with nonfiling, nonresident shareholders or a Lloyd's plan of operation involving nonfiling, nonresident individuals, it is not necessary to prepare an Auditor's Report for each individual involved IF the individuals (through the partnership, Subchapter S corporation or Lloyd's plan) agree to the liability and/or pay the tax due. In these cases, the auditor may accept a composite return.

However, a composite return may not be accepted in cases where the liability is unagreed. In these situations, all nonfiling, nonresidents are liable for their individual tax liability, including penalties, and a Notice of Deficiency must be sent to each.

To assist the PTE in fulfilling its reporting/payment obligation ***during audit***, IITA § 502(f) allows Illinois residents to be included in the filing of a composite return without Department approval.

IITA § 502(f) states:

> …For taxable years ending prior to December 31, 2014, the Department may by regulation also permit such composite returns to include the income tax owed by **Illinois residents** attributable to their income from partnerships, Subchapter S corporations, insurance businesses organized under a Lloyds

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

plan of operation or limited liability companies that are treated as partnership under Section 1501(a)(16) of this act, in which case such Illinois residents will be permitted to claim credits on their individual returns for their shares of the composite tax payments….(emphasis added)

IITA § 502(f-5) states:

For taxable years ending on or after December 31, 2008, the Department may adopt rules to provide that, when a partnership or Subchapter S corporation has made an error in determining the amount of any item of income, deduction, addition, subtraction, or credit required to be reported on its return that affects the liability imposed under this Act on a partner or shareholder, the partnership or Subchapter S corporation may report the changes in liabilities of its partners or shareholders and claim a refund of the resulting overpayments, or pay the resulting underpayments, on behalf of its partners and shareholders.

Note: A separate audit track is required for the IL-1000 or IL-1023-C audit.

(1) Submitting an SC-137 Audit Referral/Request for IL-1023-C returns

For Audit Planning to make the proper determination as to what type of audit will be set up (IL-1023-C or IL-1000), the following information must be submitted with the request in the "Reason for Referral" section of the SC-137:

- Was the audit of the business income tax return agreed to?
- If so, will the business be submitting a payment for the resulting changes to the composite return?
- How many members will be included on the IL-1023-C?
- Are the members residents, nonresidents or both?
- Will the resulting changes to the composite return affect only credits?

(2) Verify Filing History:

Determine if Form IL-1000 or IL-1023-C was filed and payment made on behalf of the nonresident owners or members by researching GenTax.

(3) Verify Payment History:

"Assuming the payment is sufficient" is not procedurally correct when verifying filing and payment of the PTE returns.

Column F on Schedule B (IL-1065 and IL-1120-ST) and Schedule D (IL-1041) (for tax years ending before December 31, 2014) and Column J on Schedule B (IL-1065 and IL-1120-ST) and Column G on Schedule D (IL-1041) (for tax

years ending on and after December 31, 2014) ***should*** be the amount of the PTE payment made on behalf of the nonresident owner. This amount ***should*** correspond to the figure reported to the owner on the Schedule K-1-P or Schedule K-1-T. HOWEVER, THIS INFORMATION HAS PROVEN TO BE VERY INCONSISTENT AND INACCURATE. Therefore, it is essential that the auditor determine the amount of tax liability for each nonresident owner and compare that to the amount reported and paid on the PTE return (IL-1000 or IL-1023-C (for tax years ending before December 31, 2014) IL-1065, IL-1120-ST or IL-1041 (for tax years ending on and after December 31, 2014)).

There have been instances where the taxpayer has made a prepayment using the incorrect voucher. If the taxpayer indicates that a payment has been made and it is not showing on the correct account (i.e. Pass-Through or Composite) research of the taxpayer's other accounts may be necessary.

(4) Review the Schedules K-1-P or K-1-T Issued by the PTE:

A) Copies of the Schedules K-1-P and K-1-T issued to the nonresident owners should be obtained. The figures for the IL-1000 should match the totals shown on these Schedules K-1-P or K-1-T. The PTE is required to keep a copy of these schedules and must supply them when requested. Although not required, some PTE filers will attach the K-1-Ps/K-1-Ts to their business/fiduciary return. As a last resort, the business/fiduciary return can be ordered from files.

B) The Schedules K-1-P and K-1-T should be reviewed for accuracy prior to using them to calculate any PTE requirement. In some cases, PTEs have misclassified business income as reported on their business return as nonbusiness income on the K-1-Ps and K-1-Ts.

C) Due to the fact that there is no extension for filing on the IL-1000, some PTEs may "estimate" the liability for their nonresident owners since the exact amount of flow-through income may not be known at the time the IL-1000 is due. This may cause differences between the amount of PTE withholding due and the amount of PTE withholding reported to the nonresident owners/members. If the PTE has underestimated its withholding obligation, it should file a Form IL-1000-X, reporting and paying the additional withholding due.

(5) Verification of Amounts Reported by PTE to Its Nonresident Owners:

It is required that taxpayers complete the applicable Schedule B or Schedule D and include it with their annual filing. The PTEs must provide separate owner

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

information on these schedules that will allow the Department to verify PTE payment amounts. The amounts reported on these schedules ***should*** agree with the amounts reported on each nonresident owner's Schedule K-1-P or K-1-T. However, more often than not, this is not the case. The information reported on the Schedule B or Schedule D must be compared to the Schedules K-1-P or K-1-T prior to determination of tax liability.

Beginning with the 2008 tax year, information from the Schedule B (IL-1065 or IL-1120-ST) has been captured in GenTax. Beginning with the 2012 tax year, Schedule D (IL-1041) and Schedule BC (IL-1023-C) are captured in GenTax. This information can be useful in determining the PTE liability and in verifying PTE compliance.

See **Exhibit O** for Schedule B screen shot information.

See **Exhibit P** for the Form IL-1000 Reconciliation flow charts using the Schedule B or Schedule D filed by the taxpayer.

(6) Calculating the Pass-Through Entity Liability

a) Form IL-1000:

Note: The instructions for calculation of line 1 of the IL-1000 changed after the 2008 tax year. The correct way to calculate the total business income apportioned to Illinois can be found on the Form IL-1000 with a revision date of 12/09. However, under the Taxpayers' Bill of Rights, no additional tax and no penalty or interest can be imposed on a PTE that underpaid its obligation solely because it followed the instructions on the version of the Form IL-1000 that was current when it filed its return.

The required PTE payment for nonresident owners on the IL-1000 equals the sum of their share of the PTE's business income apportioned to Illinois, times the Illinois tax rate applicable to that owner.

The owner's share of business income apportioned to Illinois is figured as follows:

Partnerships and S Corporations:
From the Schedule K-1-P issued to the nonresident owner subject to withholding, add the amounts from Column B partner's or shareholder's share of business income (loss) plus any business items in Column B of those partner's or shareholder's share of Illinois additions and subtractions. See Step 2 of **Exhibit Q**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Trusts:
From the Schedule K-1-T issued to the nonresident owner subject to withholding, add the amounts from Column B beneficiary's share of business income (loss) plus any business items in Column B of those beneficiaries' shares of Illinois additions and subtractions.

b) Form IL-1023-C:

The required PTE payment for those members included on the IL-1023-C is calculated based on figures from the entity's BIT/fiduciary return. (See the instructions for Form IL-1023-C and 86 IAC § 100.5130 for proper calculation)

The regulations on the computation of taxable income on the IL-1023-C are:

- 86 IAC § 100.5130(a)(2)(A) – Income from a partnership
- 86 IAC § 100.5130(a)(2)(B) – Income from an S Corporation.

The tax liability, estimated payment applicability, and any penalty or interest computations will be made on a composite basis. The following rules apply to composite returns:

Partnerships

For nonresident partners, the composite return income is computed beginning with the partnership's base income without regard to the addition modifications for:

- The portion of guaranteed payments to partners NOT included in the composite return.
- The amount of loss distributable to a partner subject to replacement tax.
- and without regard to the subtraction modifications for:
- Personal service income or reasonable allowance for compensation of partners.
- Share of income distributable to a partner subject to replacement tax.
- Schedule M subtractions for any amount of the federal domestic production activity or oil and gas depletion deductions that is not

allowed on Form IL-1065 but may pass through to eligible partners. (See FY Bulletin 2006-07).

The partnership's adjusted base income is then apportioned and/or allocated to Illinois as prescribed by the IITA and, finally, multiplied by the percentage of the total distributive shares of partnership income belonging to the nonresident partners included in the composite return.

Subchapter S Corporations

For nonresident shareholders, the composite return income is computed beginning with the Subchapter S corporation's base income without regard to the addition modifications for:

- the amount of loss distributable to a shareholder subject to replacement tax

And without regard to the subtraction modifications for:

- Share of income distributable to a shareholder subject to replacement tax
- River Edge Redevelopment Zone Interest
- High Impact Business Interest
- Contribution subtraction from Schedule 1299-A. Contributions made to a designated zone organization to be used for an enterprise zone or river edge redevelopment zone project approved by the Department of Commerce and Economic Opportunity (DCEO).
- Schedule M subtractions for any amount of the federal domestic production activity or oil and gas depletion deductions that is not allowed on Form IL-1120-ST, but may pass through to eligible shareholders. (See FY Bulletin 2006-07). However, exclude any subtractions allowed for foreign dividend gross-up, Subpart F income, or foreign dividends received.

The S corporation's adjusted base income is then apportioned and/or allocated to Illinois in accordance with the IITA and, finally, is multiplied by the percentage of the total S corporation's income belonging to the nonresident shareholders included in the composite return.

The tax liability is computed based on the amount of composite income that is allocable or apportionable to Illinois and is not reduced by the Standard

Exemption prescribed in IITA § 204(a).

Note: If the nonresidents have not taken a PTE credit, thereby paying all of the tax on their own, it is not necessary to obtain an IL-1000 or IL-1023-C return from the entity, at least on behalf of those taxpayers. There may still be a requirement for the IL-1000 for other nonresidents. Ref: 86 IAC § 100.7035(f)(1).

Regardless of the assumption of the liability by the authorized agent, the members of the composite return are still liable for any unpaid balance due attributable to them in their separate capacities.

1) UNDERPAYMENT OF REQUIRED WITHHOLDING:

   a) If the PTE return is underpaid; either by virtue of incorrect filing originally or due to audit changes made to their PTE return, the auditor must secure an amended return *of the same type*. (If taxpayer filed IL-1000 originally, auditor must secure an IL-1000-X for changes. If taxpayer filed IL-1023-C originally, auditor must secure an IL-1023-C-X for changes).
   b) The PTE is relieved of its obligation to pay any amount due with respect to an owner, if the owner has paid its liability under the IITA on the income from which withholding was required. In this situation, no amended return would be required. Ref: IITA § 713 and 86 IAC § 100.7035(f)(1)

(7) IL-1023-C Processing Documentation

The following procedures provide guidance to auditors on the proper documentation to be submitted for an audit of the Form IL-1023-C when there are changes to base income and/or income tax credits/replacement tax investment credits.

IAC § 100.5180 Composite Returns: Overpayments and Underpayments provide guidance for reporting changes on composite returns.

IAC § 100.5180(b) states:

> For taxable years ending on or after December 31, 2008, a partnership or subchapter S corporation may report the changes in liabilities of its partners or shareholders and pay the resulting underpayments, on behalf of its partners and shareholders, whether or not a composite return was filed for the taxable year or any specific partner or shareholder was included on that composite return. A partnership or subchapter S corporation may claim a refund or credit of any amount it paid on behalf of its partners or shareholders under Section 100.5100,

> subsection (a) or this subsection, but may not claim a refund or credit of any amount paid to the Department by a partner or shareholder.

This statute allows for the inclusion of resident employees on the Forms IL-1023-C or IL-1023-C-X for audit purposes.

For tax years ending **prior to December 31, 2009**, Form IL-1023-C did not allow for the reporting of income tax credits or the recapture of investment credits.

Effective for tax years ending **on or after December 31, 2009**, the partners' and shareholders' share of income tax credits from their Schedule(s) K-1-P may be claimed on Form IL-1023-C.

Effective for tax years ending **on or after December 31, 2010 and before December 31, 2014**, the partners' and shareholders' share of investment credit recapture from their Schedule(s) K-1-P or K-1-T must be included on Form IL-1023-C.

The EDA-127, IL-1023-C Auditor's Report, in CIT Programs, CIT Standalone, is in the process of being updated to reflect these changes. Once completed there will be four EDA-127s:

- For tax years ending prior to December 31, 2009 (no reporting of income tax credits or investment credit recapture). Lines "Audit change to income tax credits" were added to capture audit changes to income tax credits and replacement tax credits;
- For tax years ending on or after December 31, 2009 and prior to December 31, 2010 (reporting of income tax credits only). Lines "Income tax credits (Schedule 1299-A required) and Investment Credits (Form IL-477 required) were added to capture income tax credits and investment credits;
- For tax year ending on December 31, 2010, 3% income tax rate (reporting of income tax credits and investment credit recapture). Lines "Recapture of investment credits (Schedule 4255 required) were added to recapture income tax and replacement tax investment credits; and
- For tax years ending on and after December 31, 2011 and prior to December 31, 2014, 5% income tax rate (reporting of income tax credits and investment credit recapture). Lines "Recapture of investment credits (Schedule 4255 required) were added to recapture income tax and replacement tax investment credits.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

IL-1023-C Filer

IAC § 100.5180(a) states:

When an authorized agent has made an error in determining the amount of any item of income, deduction, addition, subtraction or credit reported on a composite return, the authorized agent ***shall file an amended return*** to correct the error and claim a refund or credit, or pay the liability, for any person included on the composite return. (emphasis added)

Use the following chart to assist in determining the proper documentation necessary for each particular audit scenario.

Audit Scenario							Procedure
	Base Income		RTIC		IT Credit		Prepare the following documents
	+	-	+	-	+	-	(+ is increase, - is decrease)
1	✓						EDA-127 or IL-1023-C-X
2		✓					Signed IL-1023-C-X
3	✓		✓				Claim: IL-1023-C-X Bal. Due: EDA-127 or IL-1023-C-X
4	✓			✓			EDA-127 or IL-1023-C-X
5		✓	✓				Signed IL-1023-C-X
6		✓		✓			Claim: IL-1023-C-X Bal. Due: EDA-127 or IL-1023-C-X
7	✓					✓	EDA-127 and IL-1023-C-X
8		✓				✓	Claim: IL-1023-C-X Bal. Due EDA-127 or IL-1023-C-X
9	✓				✓		Claim: IL-1023-C-X Bal. Due: EDA-127 or IL-1023-C-X
10		✓			✓		Signed IL-1023-C-X
11						✓	EDA-127 or IL-1023-C-X
12					✓		Signed IL-1023-C-X

This manual is not a statement of Department policy. IL-1023-C Non-filer

IAC § 100.5180(b) states, in part:

For taxable years ending on or after December 31, 2008, a partnership or subchapter S corporation may report the changes in liabilities of its partners or shareholders and pay the resulting ***underpayments***, on behalf of its partners and shareholders, ***whether or not a composite return was filed for the taxable year*** or any specific partner or shareholder was included on that composite return. (emphasis added)

Changes resulting in an ***overpayment*** are claimed on the applicable member return (i.e. IL-1040-X or IL-1041-X).

Payments submitted to the department for any other type of tax or overpayments of tax from any other type of tax return **cannot** be transferred to Form IL-1023-CES or Form IL-1023-C to satisfy your composite tax payment requirements. [emphasis added]

As a result of the above restriction, overpayments and underpayments reported on the same IL-870 (for non-APT audits) can only be offset if the original amounts were reported on the same tax form.

Use the following chart to assist in determining the proper documentation necessary for each particular audit scenario.

Audit Scenario							Procedure
	Base Income		**RTIC**		**IT Credit**		**Prepare the following documents**
	+	**-**	**+**	**-**	**+**	**-**	**(+ is increase, - is decrease)**

12					✓		Signed IL-1040-X or IL-1041-X or applicable member return

I) Issues Encountered with the Form IL-1000

The following situations provide insight on the issues that have been encountered with the processing of the original Form IL-1000 and how they are being handled at this time.

Issue 1 – Overpayment on the Form IL-1000

The Form IL-1000 has an overpayment. If the IL-1000 is overpaid, a refund will be issued ONLY on accounts in which the taxpayer can prove that an incorrect payment was remitted. Examples of an incorrect payment would include the following:

- Payments intended for another State Agency,

- IRS payments,
- Duplicate Return Correction Notice (RCN) payment,
- Duplicate bill payment,
- Duplicate Statement of Account payment, or
- an ***obvious*** duplicate return payment.

Example: Although an IL-1000 payment was remitted, the PTE failed to file the IL-1000 return. A letter was sent to the PTE informing the entity that Form IL-1000 was required to be filed. When the PTE filed the IL-1000, it sent a second payment along with the return. Both payment amounts were identical and matched the tax due amount on the IL-1000 return. Obviously, the second payment received was a duplicate payment. In such case, a refund of the second payment amount is warranted.

No refund will be issued for any overpayment due to self-assessed penalty and interest. GenTax is **not** set up to automatically deactivate any overpayment on the pass-through account. Therefore, it is ***essential*** that the auditor clearly indicate on the processing documents and in the "Letter of Comments" the nature of the overpayment and what should be done with the overpayment.

Issue 2 – Audit debatch is not programmed for the IL-1000

Normally, returns that inadvertently go through the Department's front-end processing will "debatch" and come up to Audits if there is an "audit in progress" indicator on the account. However, that is not occurring for the IL-1000 returns.

If a taxpayer indicates returns have sent in response to the audit, and they have not been received by the auditor, the auditor should review the taxpayer's account in GenTax to see if the returns and/or payments have been processed. If so, the auditor is still required to review the returns and/or payments for accuracy. Any adjustments to the returns should be reflected on a working paper and documented in the auditor's "Letter of Comments".

m) Potential Audit Issues

Since pass-through entities can file both the Form IL-1000 and the Form IL-1023-C, confusion over the proper filing of these forms (and payment/voucher) has created issues for both the taxpayer and the Department. This section will address these issues and the correct resolution for dealing with that particular issue, using an "Issue/Resolution" format.

In audits that involve either the IL-1000 or IL-1023-C, **verification of the PTE requirement must be done.** Assuming the payment is sufficient to satisfy the

liability is not procedurally correct as addressed in the PTE and Composite Income and Replacement Tax Return, Audit Procedures section.

1) Issue: The PTE filed both forms, an IL-1000 and an IL-1023-C, but over-reported the income on the IL-1000 and overpaid that tax liability. The PTE assumed that any overpayment on the IL-1000 could be applied to the IL-1023-C, which presented the correct tax liability. The owners/members were properly reported on each form, with no owners/members appearing on both forms per information provided from the PTE.

   Although on the surface, it may appear that the IL-1000 and IL-1023-C are interchangeable, certain explicit language regarding each restricts the Department from flowing payments between the two. Included in the instructions to Form IL-1023-C is a note as follows:

   > Payments submitted to the department for any other type of tax or overpayments of tax from any other type of tax return **cannot** be transferred to Form IL-1023-CES or Form IL-1023-C to satisfy your composite tax payment requirements. [emphasis added]

   Resolution: Separate payments should have originally been made with each form. However, to remedy this issue:

   - Verification of the PTE requirement must be done to ensure that the proper amount of payment was submitted.
   - The PTE should file an IL-1023-C-X to zero out the original IL-1023-C.
   - The owners (partners, shareholders, and beneficiaries) would be issued revised Schedule K-1-P/K-1-Ts to reflect the amount paid on the IL-1000.
   - Since the overpayment on the IL-1000 cannot be claimed by the PTE, the owners would file original or amended returns (as applicable) to make claims for refunds on the overpaid amounts. Claims must be timely and within statute.

   See **Exhibit Q** for an example of this issue.

2) Issue: The PTE overpaid the IL-1000, and then filed the IL-1000-X in an attempt to claim the overpayment.

   Resolution: If tax is overpaid on Form IL-1000, the PTE cannot file an amended return to claim any overpayment. Form IL-1000-X is for increased deficiencies only.

Included in the General Information section on the Form IL-1000-X Instructions is a ‘special note’ as follows:

Refunds cannot be claimed for any payments you [the PTE] made that were reported (or should have been reported) to your partners, shareholders, or beneficiaries as amounts paid on their behalf. The partners, shareholders, or beneficiaries must claim these amounts on their own tax returns and are entitled to a refund or credit for any overpayment.

- The owners (partners, shareholders, and beneficiaries) may require revised Schedule K-1-P/K-1-Ts be issued to reflect the amount paid on the IL-1000.
- The owners would file original or amended returns (as applicable) to make claims for refunds on the overpaid amounts. Claims must be timely and within statute.

3) <u>Issue</u>: The PTE filed both forms, IL-1000 and IL-1023-C, and included some of the same owners/members on both forms. Payment of the liability was made with each return.

   <u>Resolution</u>: Members that are listed on Schedule BC of the IL-1023-C should not be included on the IL-1000. Per the IL-1023-C instructions:

   You [the PTE] are required to file Form IL-1000 and make payments only if you have nonresident partners or shareholders who are not included on your Form IL-1023-C. <u>Payments cannot be made on behalf of the same partner or shareholder for the same taxable year on both forms.</u>

   - The pass-through entity is required to file an IL-1023-C-X to remove the duplicate owners and request a refund of the duplicate payment (if within statute).

4) <u>Issue</u>: IL-1000 audits with payments pending but no return is on file.

   <u>Resolution</u>: The auditor should attempt to obtain an original, signed IL-1000 return so that the pending payment can be applied to the liability. The following should be followed:

   - Initiate audit, informing the taxpayer of the pending payment and requesting that taxpayer provide a signed return

- If no response, provide taxpayer with an Auditor's Report outlining the liability in a second mailing including a cover letter again referencing the pending payment which can only be applied to the account if a signed return is provided.
- If no response ***and the pending payment fully satisfies the liability***, no EDA-122 Notice of Proposed Deficiency will be issued because the taxpayer will not be granted Informal Conference Board (ICB) rights.
- If no response ***and the auditor determines the tax liability is greater than the pending payment****,* the EDA-122 will be issued. The EDA-122 attachment should include a notation of the pending payment.
- If no response, issue IL-870 (non-APT audits) or Auditor's Report (APT audits), with notation in comment section that the taxpayer has a pending payment that will be applied upon receipt of signed IL-870 or Auditor's Report.
- If no response, close audit.
- NOD will be issued.

5) Issue: IL-1000 audits with pending payments where the PTE has improperly paid on behalf of *resident* partners/shareholders/beneficiaries (owners).

   Resolution: The auditor must obtain an original IL-1000 so that the payment can be applied.

   - Initiate audit, informing the taxpayer (PTE) of the pending payment and requesting that taxpayer provide a signed return. For future filing periods, the **PTE should be informed that it does not have a PTE withholding filing requirement since owners are residents.**
   - PTE should be advised that the resident owners are required to file amended returns (or original returns if applicable) claiming the PTE amount which was made erroneously on their behalf. THOSE RETURNS SHOULD BE SENT DIRECTLY TO THE AUDITOR. ***IF the auditor receives the amended (original) returns from the resident owners, they will prepare an SC-137 for each owner requesting an audit to process the returns. These SC-137s should not be prepared until the returns have been received.***
   - The IL-1000 audit and any related audits for the resident owners should be kept together and labeled as "related audits".

6) Issue: IL-1000 audits with pending payments – where the IL-1000 account is overpaid - and **payments were late** (assuming a signed return is provided by the taxpayer).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Resolution: The auditor must obtain an original IL-1000 so that the payment can be applied.

- If payments were not made timely, penalty and interest should be calculated. The PTE is responsible for timely payments. Therefore, the entity is also liable for penalty and interest on any payments which are not timely.
- If the tax liability on the signed return is less than the pending payments, the overpayment **will not** be refunded. Since the nonresident owners would have taken the full PTE amount reported on their Schedule K-1-P, and assuming that is the amount of pending payment, the overpayment on the account cannot be used to offset the PTE's applicable penalty and interest. If that were to happen, the tax liability collected would be reduced.

  Example: The nonresident owner received a Schedule K-1-P reflecting a PTE credit of $16,000. The owners took the full $16,000 PTE credit when filing their return. Assuming the tax liability was $16,000, the full liability has been collected (as paid by the PTE). The PTE pending payment is $16,000; and was late. However, when the IL-1000 is completed, the tax liability is only $10,000. On paper, the PTE is "overpaid" by $6,000. However, the full $16,000 was taken by the nonresident owners. To allow the overpayment to be applied to penalty and interest would reduce the amount of tax collected.

- The PTE will be billed for any applicable penalty and interest upon processing of audit.
- Penalty & Interest Section of Auditor's Comments should include reference to the overpayment so that Audit Perfection will know NOT to use the overpayment to offset penalty and interest.

7) Issue: The PTE (S corp) failed to file and pay the IL-1000, but the owner (shareholder) filed and paid an IL-1040 timely reporting the income from the S corp. Question as to who would be responsible for the penalty and interest on the unpaid IL-1000 liability.

   Resolution: Regarding underpayments, 86 IAC § 100.7035(f)(1) provides that even when the owners have paid their own liability, the pass-through entity is not relieved of any P & I applicable to failure to timely pay the withholding. The PTE would be liable for the penalty and interest determined for late payment.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

8) Issue: The PTE should have submitted an IL-1000-P with its pre-payment for the IL-1000, but accidently sent the IL-1023-C-V with its payment instead. Form IL-1000 was then filed timely without a payment attached since the pre-payment was made.

   Resolution: Since the Department has received MANY payments made with the incorrect voucher, the policy is to allow the payments to be transferred to the correct return. In this case, the payment should be transferred to the IL-1000 return.

9) Issue: The PTE (partnership) has nine partners (S-corp, four individuals and four trusts). The S-corp and all trusts reported they were subject to replacement tax and therefore their income was subtracted from the IL-1065. A compliance check was done and it was determined that between two and four of the nine partners, depending on the year, had not filed their entity type's tax return to capture the pass-through liability from the partnership. An IL-1000 audit was initiated to capture the share of pass-through income for these partners.

   The partnership sent in signed and paid IL-1000s for all audit years. The auditor made changes to each year, the largest of which was the addition of income from a trust which did not file IL-1041s for any years and was not included on the original IL-1000s. The partnership did not agree, stating that the trust's income is not required on the IL-1000 because the trust distributes 100% of the income to an individual who filed an IL-1040.

   The federal Form 1041s filed by the trust indicate that it is a simple trust with all income being distributed on Line 18 (income distribution deduction) of the federal form.

   Resolution: Simple trusts are not exempt from Illinois income and replacement taxes. Therefore, it was appropriate for the partnership to subtract the trust income on the IL-1065 as subject to replacement tax.

   However, because the trust was allowed the income distribution deduction, which resulted in zero federal taxable income, the calculation of Illinois base income begins with zero federal taxable income, resulting in the trust having zero Illinois tax liability.

   The trust beneficiaries, who are considered partners of the partnership, as nonresidents, are eligible to join in the filing of a composite return. The income of the individual partners would be included in the appropriate line of the IL-1000.

V. EXHIBITS

A. Exhibit A - 2017 Form IL-1065 Separately Stated Items
(IITA § 203(e)(2)(H))

Attach your payment and Form IL-1065-V here.

Step 2: Figure your ordinary income or loss US 1065 Sch K (Whole dollars only)

1	Ordinary income or loss, or equivalent from federal Schedule K.	1	Line 1 .00
2	Net income or loss from all rental real estate activities.	2	Line 2 .00
3	Net income or loss from other rental activities.	3	Line 3c .00

9	Expense deduction under IRC Section 179.	9	Line 12 .00
10	Interest on investment indebtedness.	10	Line 13b .00
11	All other items of expense that were not deducted in the computation of ordinary income or loss on Page 1 of U.S. Form 1065 or 1065-B. See instructions. Identify:	11	.00
12	Add Lines 8 through 11.	12	.00
13	Subtract Line 12 from Line 7. This amount is your total unmodified base income or loss.	13	.00

B. Exhibit B - 2017 Form IL-1065 Addition Modifications

Step 4: Figure your income or loss

14	Enter your unmodified base income or loss from Line 13.	**14**	203(e)(2)(H) .00
15	State, municipal, and other interest income excluded from Line 14.	**15**	203(d)(2)(A) .00
16	Illinois replacement tax deducted in arriving at Line 14.	**16**	203(d)(2)(B) .00
17	Illinois Special Depreciation addition. **Attach** Form IL-4562.	**17**	203(d)(2)(D-5)&(D-6)
18	Related-party expenses addition. **Attach** Schedule 80/20.		203(d)(2)(D-7),(D-8),(D-9)
19	Distributive share of additions. **Attach** Schedule(s) K-1-P or K-1-T.	**19**	.00
20	Guaranteed payments to partners from U.S. Form 1065 or 1065-B.	**20**	203(d)(2)(C) .00
21	The amount of loss distributable to a partner subject to replacement tax. **Attach** Schedule B.	**21**	203(d)(2)(I) .00
22	Other additions. **Attach** Illinois Schedule M (for businesses).	**22**	See Sch M .00
23	Add Lines 14 through 22. This amount is your income or loss.	**23**	.00

C. Exhibit C - 2017 Schedule M Additions (IL-1065)

Step 2: Figure your additions

Enter the amount of

1	Capital gain taxed under IRC Section 852(b)(3).	1	.00
2	Notes, bonds, debentures, or obligations issued by the Governments of American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands.	2	203(d)(2)(A) .00
3	Lloyd's plan of operation loss if reported on your behalf on Form IL-1065 and included in your federal taxable income.	3	502(f) .00
4	Business expense recapture.	4	203(e)(3) .00
5	Any other state's income tax deducted from federal taxable income. **(Form IL-1041 filers only)**	5	.00
6	Capital loss to be carried forward. **(Form IL-1041 filers only)**	6	.00
7	Student-Assistance Contribution Credit taken on Schedule 1299-A or 1299-D.	7	218(a) .00
8	Dividends paid by a captive REIT.	8	.00
9	Income attributable to domestic production activities under IRC Section 199.	9	203(d)(2)(D-11) .00
10	Other additions - Identify each item. ______	10	203(d)(2)(D) .00
11	**Total additions.** Add Lines 1 through 10. Enter the amount here and on your Form IL-1120, Line 8, Form IL-1120-ST, Line 21, Form IL-1065, Line 22 or Form IL-1041, Line 10. ➡	11	.00

E. Exhibit E - 2017 Schedule M Subtractions (IL-1065)

Step 3: Figure your subtractions

Enter the amount of

12	Exempt interest dividends paid by regulated investment companies (IRC Section 852(b)(5)).			**12**	.00
13	Notes, bonds, debentures, or obligations issued by the Governments of American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands to the extent the amounts were required to be added back on Line 2.			**13**	203(d)(2)(G) .00
14	Lloyd's plan of operation income if reported on your behalf on Form IL-1065.			**14**	502(f) .00
15	Income for which you claimed a credit under IRC Section 1341.			**15**	203(d)(2)(N) .00
16	Expenses of federally tax-exempt income and federal credits. See instructions. Specify any amount relating to the following:				
	a Interest expenses relating to municipal income (IRC Section 291)	**a**	.00		
	b Interest and other expenses related to federally tax-exempt interest (IRC Section 265)	**b**	.00		
	c Bond premium amortization on federally tax-exempt bonds (IRC Section 171)	**c**	.00		
	d Expenses related to certain federal credits (IRC Section 280C)	**d**	.00		
	e Change in insurance company reserves (IRC Section 807 or 832)	**e**	.00		
	f Reduction in depreciation related to railroad maintenance credits (IRC Section 45G)	**f**	.00		
	g Gross income resulting from alternative energy credits (IRC Section 87)	**g**	.00		
17	Add Lines 16a through 16g.			**17**	203(d)(2)(J) .00
18	Add Lines 12 through 15 and Line 17. Enter the amount here and on Line 19.			**18**	.00

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Step 3: Continued

19 Enter the amount from Line 18. **19** ______ .00

20 Interest on the following obligations of Illinois state and local government, only if included in Illinois income (see instructions). **Attach** a copy of the statement that identifies the payer and the amount of interest for each obligation.

- **a** Illinois Housing Development Authority bonds and notes (except housing-related commercial facilities bonds and notes) **a** ______ .00
- **b** Illinois Development Finance Authority bonds, notes, and other obligations (venture fund and infrastructure bonds only) **b** ______ .00
- **c** Illinois Sports Facilities Authority bonds **c** ______ .00
- **d** Illinois Development Finance Authority bonds (only those issued under the Illinois Development Finance Authority Act, Sections 7.80 through 7.87) **d** ______ .00
- **e** Illinois Development Finance Authority bonds or Illinois Finance Authority bonds issued under the Asbestos Abatement Finance Act **e** ______ .00
- **f** Bonds issued by the Illinois Finance Authority under the Illinois Finance Authority Act **f** ______ .00
- **g** Southwestern Illinois Development Authority bonds **g** ______ .00
- **h** Illinois Power Agency bonds issued by the Illinois Finance Authority under Other Powers Article in the Illinois Finance Authority Act **h** ______ .00
- **i** Central Illinois Economic Development Authority bonds issued under the Central Illinois Economic Development Authority Act **i** ______ .00
- **j** Eastern Illinois Economic Development Authority bonds issued under the Eastern Illinois Economic Development Authority Act **j** ______ .00
- **k** Southeastern Illinois Economic Development Authority bonds issued under the Southeastern Illinois Economic Development Authority Act **k** ______ .00
- **l** Southern Illinois Economic Development Authority bonds issued under the Southern Illinois Economic Development Authority Act **l** ______ .00
- **m** Illinois Urban Development Authority bonds issued under the Illinois Urban Development Authority Act **m** ______ .00
- **n** Downstate Illinois Sports Facilities Authority bonds issued under the Downstate Illinois Sports Facilities Authority Act **n** ______ .00
- **o** Western Illinois Economic Development Authority bonds issued under the Western Illinois Economic Development Authority Bonds Act **o** ______ .00
- **p** Upper Illinois River Valley Development Authority bonds issued under the Upper Illinois River Valley Development Authority Act **p** ______ .00
- **q** Will-Kankakee Regional Development Authority bonds issued under the Will-Kankakee Regional Development Authority Law **q** ______ .00
- **r** Tri-County River Valley Development Authority bonds issued under the Tri-County River Valley Development Authority Law **r** ______ .00
- **s** Quad Cities Regional Economic Development Authority bonds and notes (if declared to be exempt from taxation by the Authority) **s** ______ .00
- **t** Quad Cities Interstate Metropolitan Authority bonds **t** ______ .00
- **u** Rural Bond Bank Act bonds and notes **u** ______ .00
- **v** Bonds issued under the Export Development Act of 1983 **v** ______ .00
- **w** College savings bonds issued under the General Obligation Bond Act in accordance with the Baccalaureate Savings Act **w** ______ .00

21 Add Lines 20a through 20w. **21** 203(d)(2)(G) .00

22 Add Lines 19 and 21. **22** ______ .00

Step 3: Continued

23	Enter the amount from Line 22.	**23**	.00
24	Federally taxed Illinois state refund from prior years.	**24**	203(d)(2)(F) .00
25	Dividends received, including IRC Section 78 Foreign Dividend Gross-up and subpart F income. **(Form IL-1120-ST filers only)**	**25**	.00
26	Contributions made to a job training project. See instructions. **(Form IL-1120-ST and Form IL-1065 filers only)**	**26**	203(d)(2)(L) .00
27	Reparations or other amounts received as a victim of persecution by Nazi Germany. **(Form IL-1041 filers only)**	**27**	.00
28	Income eligible for a deduction by an attorney-in-fact under IRC Section 835.	**28**	.00
29	Income from Illinois pre-need funeral, burial, and cemetery trusts.	**29**	203(d)(2)(G) .00
30	Income earned by nuclear decommissioning trusts established under the Public Utilities Act.	**30**	203(d)(2)(G) .00
31	Recovery of items previously deducted on Form U.S. 1040 Schedule A, filed by the decedent (including refunds of any state and local income taxes, other than Illinois). **(Form IL-1041, Estate filers only)**	**31**	.00
32	Refunds of state income taxes added back in a prior year on Schedule M, Line 5. **(Form IL-1041 filers only)**	**32**	.00
33	RESERVED	**33**	.00
34	Unused patronage or nonpatronage loss amounts from Schedule INL. **(Form IL-1120 filers only)** See instructions. Identify the year you first made the Schedule INL, Step 2, Line 1a election. ______	**34**	.00
35	Eligible subtractions from Publication 101 that are not subtracted anywhere else. See instructions. Identify each item. ______	**35**	203(d)(2)(G) .00
36	**Total subtractions.** Add Lines 23 through 35. Enter the amount here and on Form IL-1120, Line 21, Form IL-1120-ST, Line 33, Form IL-1065, Line 33, or Form IL-1041, Line 24. →	**36**	.00

F. Exhibit F - 2017 Form IL-1120-ST Separately Stated Items

(IITA § 203(e)(2)(G))

Attach your payment and Form IL-1120-ST-V here.

Step 2: Figure your ordinary income or loss US 1120S Sch K (Whole dollars only)

1	Ordinary income or loss, or equivalent from federal Schedule K.	1	Line 1 .00
2	Net income or loss from all rental real estate activities.	2	Line 2 .00
3	Net income or loss from other rental activities.	3	Line 3c .00
4	Portfolio income or loss.	4	Line 4,5a,6,7,8a .00
5	Net IRC Section 1231 gain or loss.	5	.00
6	All other items of income or loss that were not included in the computation of income or loss on Page 1 of U.S. Form 1120-S. See instructions. Identify:	6	.00
7	Add Lines 1 through 6. This is your ordinary income or loss.	7	.00

Step 3: Figure your unmodified base income or loss

8	Charitable contributions.	8	Line 12a .00
9	Expense deduction under IRC Section 179.	9	Line 11 .00
10	Interest on investment indebtedness.	10	Line 12b .00
11	All other items of expense that were not deducted in the computation of ordinary income or loss on Page 1 of U.S. Form 1120-S. See instructions. Identify:	11	.00
12	Add Lines 8 through 11.	12	.00
13	Subtract Line 12 from Line 7. This amount is your total unmodified base income or loss.	13	.00

G. Exhibit G - 2017 Form IL-1120-ST Addition Modifications

Step 4: Figure your income or loss

Line	Description	Line	Amount
14	Enter the amount from Line 13. **Unitary filers**, enter the amount from Schedule UB, Step 2, Col E, Line 30.	14	203(e)(G) .00
15	State, municipal, and other interest income excluded from Line 14.	15	203(b)(2)(A) .00
16	Illinois replacement tax and surcharge deducted in arriving at Line 14.	16	203(b)(2)(B) .00
17	Illinois Special Depreciation addition. **Attach** Form IL-4562.	17	203(b)(2)(E-10)&(E-11)
18	Related-party expenses addition. **Attach** Schedule 80/20.	18	203(b)(2)(E-12)(E-13)&(E-14)
19	Distributive share of additions. **Attach** Schedule(s) K-1-P or K-1-T.	19	.00
20	The amount of loss distributable to a shareholder subject to replacement tax. **Attach** Schedule B.	20	203(b)(2)(S) .00
21	Other additions. **Attach** Illinois Schedule M (for businesses).	21	See Sch M .00
22	Add Lines 14 through 21. This amount is your income or loss.	22	.00

This manual is not a statement of Department policy. 33	RESERVED	33	.00
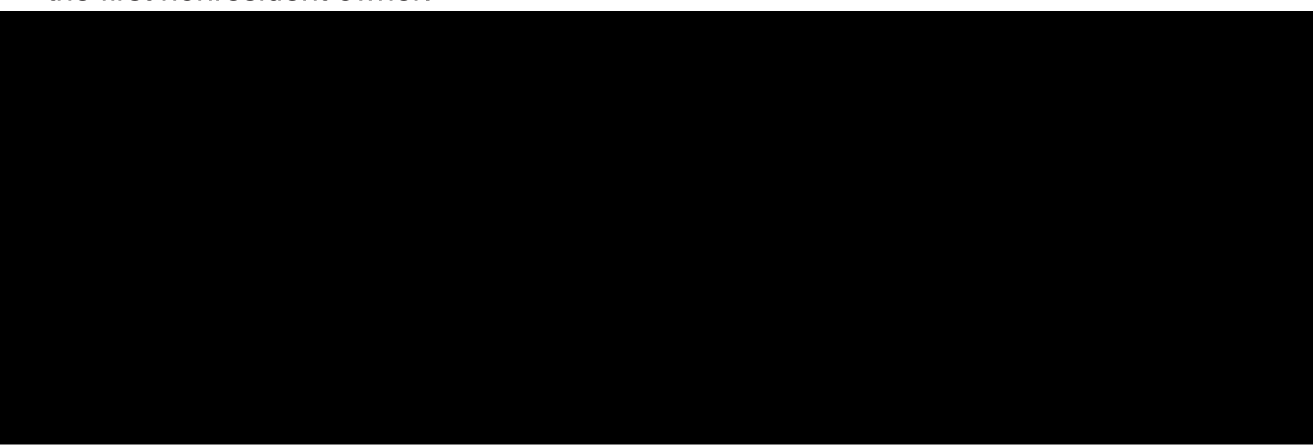
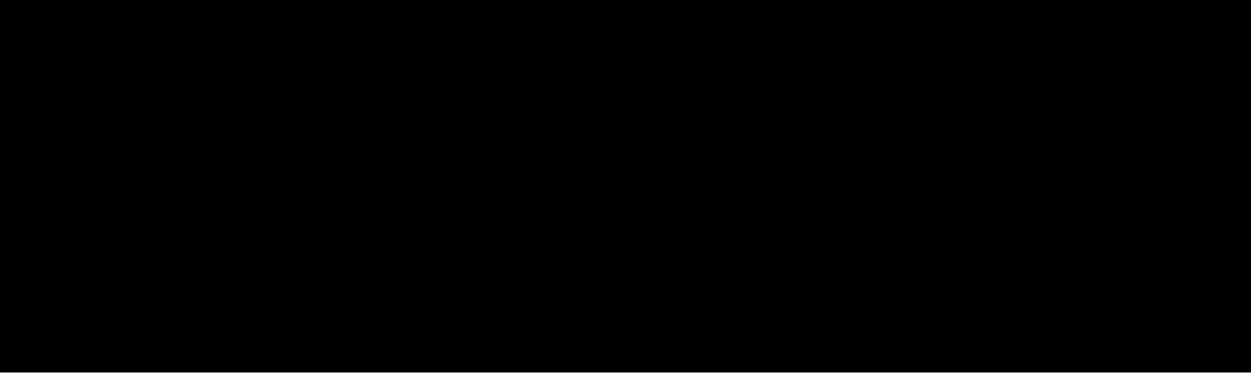
34	Unused patronage or nonpatronage loss amounts from Schedule INL. **(Form IL-1120 filers only)** See instructions. Identify the year you first made the Schedule INL, Step 2, Line 1a election. ______	34	.00
35	Eligible subtractions from Publication 101 that are not subtracted anywhere else. See instructions. Identify each item. ______	35	203(c)(2)(K) .00
36	**Total subtractions.** Add Lines 23 through 35. Enter the amount here and on Form IL-1120, Line 21, Form IL-1120-ST, Line 33, Form IL-1065, Line 33, or Form IL-1041, Line 24. →	36	.00

O. Exhibit O - Examples – Schedule B Screen Shot Information

Example 1:
The screen shot of the Schedule B reflects a PTE payment of $120,548 made for the first nonresident owner.

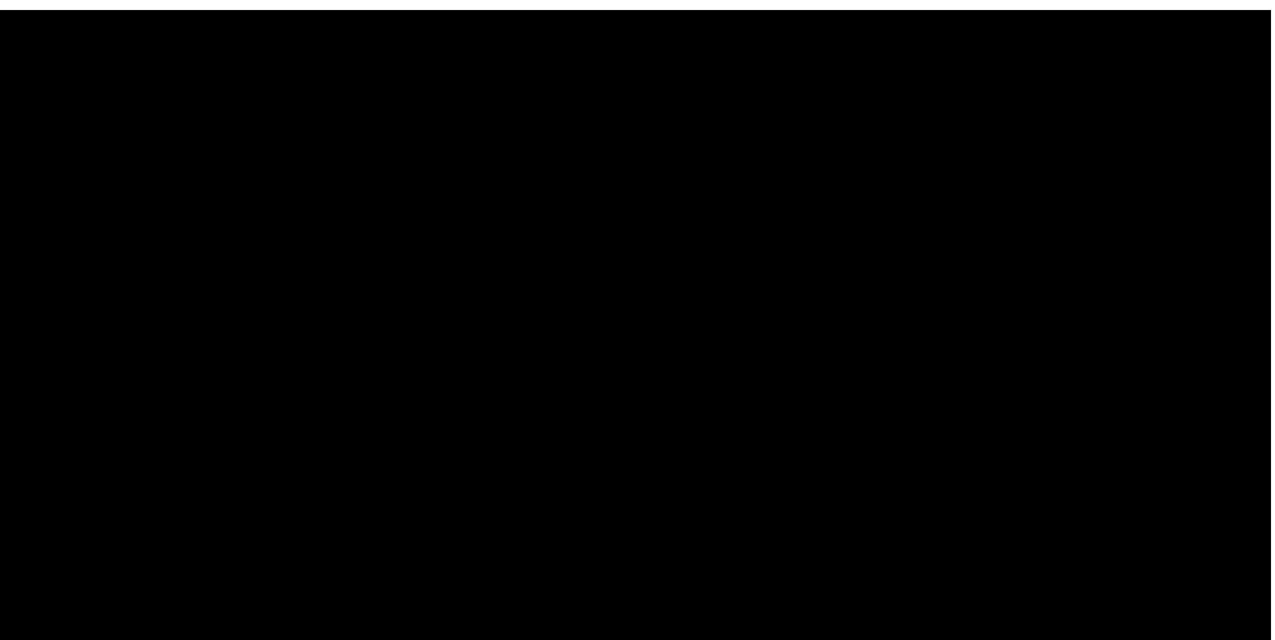


The nonresident owner's transaction for the 2009 tax year indicates they took a PTE credit of $120,548 as reported to them on the Schedule K-1-P which they were issued.



This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Example 2:
The screen shot of the Schedule B shows the first owner as receiving no PTE payment, due to being an IL resident. The second owner (nonresident) reflects a PTE payment of $126,416.

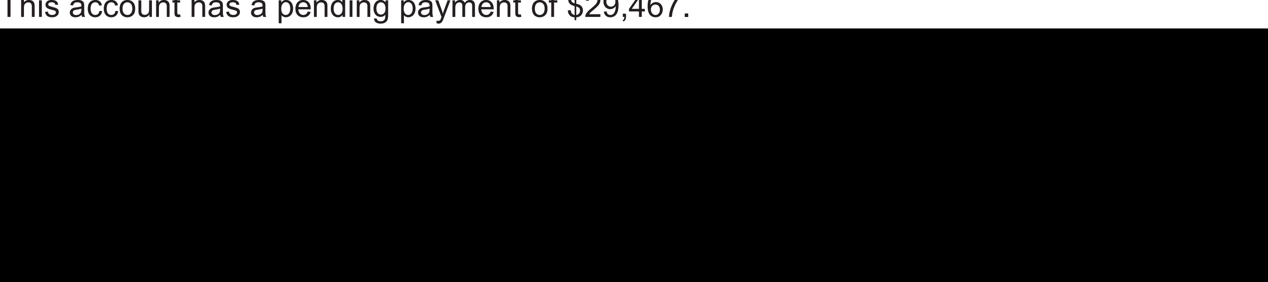


The nonresident owner's transaction for the 2011 tax year indicates they took a PTE credit of $184,628.

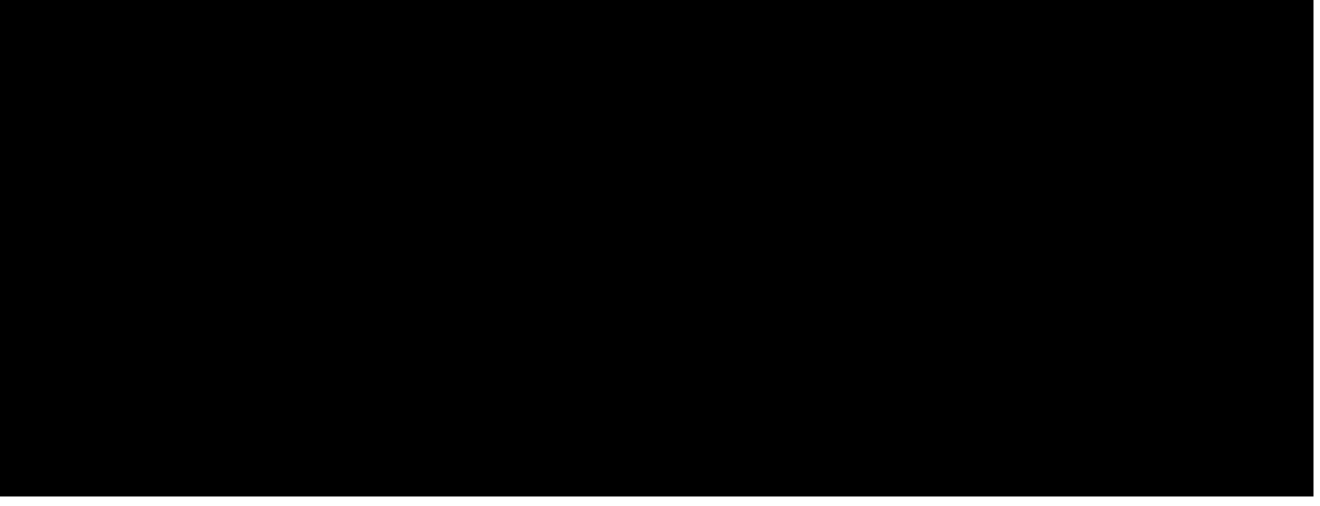
**This is a perfect example of a situation where the IL-1040 return for the owner should be ordered to review the PTE credits. Since the nonresident is required to attach the Schedules K-1-P, the documentation for the PTE credit is available. In this particular case, three spin-off audits were generated since the additional PTE credit taken was from other entities who had not filed the required IL-1000 returns. The nonresident will always be given credit for the PTE payment (assuming they attached the required Schedules K-1-P), since the obligation for payment lies with the pass-through entity, not the nonresident.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

<u>Example 3:</u>
This account has a pending payment of $29,467.



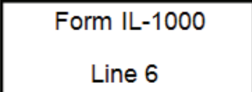
The Schedule B shows they reported PTE credits of approximately $126,660. The entity return should be ordered to see if they have attached the Schedules K-1-P they issued. This will help verify how much the PTE should have paid and/or credit that may have been taken. It is important to verify the liability on audits where we have pending payments. Do not just assume that the pending payment is the entire liability.



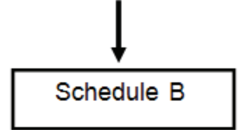
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

P. Exhibit P - Form IL-1000 Reconciliation

Form IL-1000 Reconciliation Using Schedule B

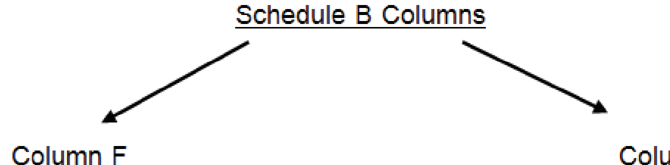


Line 6 is the total pass-through entity payment required to be remitted to the Department.



(This schedule is required for Form IL-1065 and Form IL-1120-ST)

Schedule B Columns



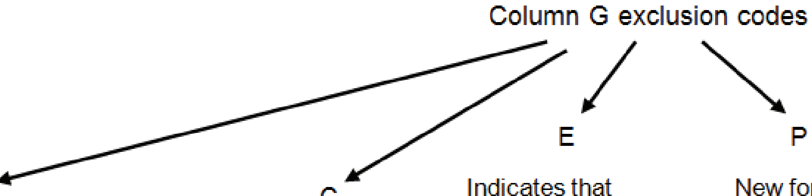
Column F

This column is where the pass-through entity lists the pass-through payment amount made for each of the partners/shareholders. The total of Column F should equal the amount reported on Line 6 of Form IL-1000.

Column G

This column is where the pass-through entity identifies those partners/shareholders excluded from pass-through entity payments.

Column G exclusion codes



R

Indicates that the partner or shareholder is an Illinois resident. No pass-through entity (PTE) withholding is **permitted.** A return should be on file for these Illinois residents.

C

Indicates that the partner/shareholder is included on a composite return. These owners should be included on an IL-1023-C Schedule BC.

E

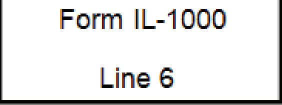
Indicates that Form IL-1000-E was provided to the PTE by the partner or shareholder. A return should be on file since these owners have elected to pay their own liability.

P

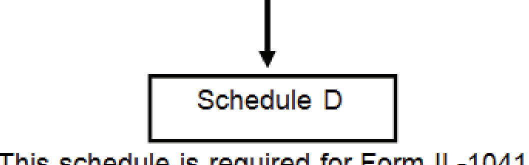
New for tax year 2013. Indicates the partnership is a publicly traded partnership which has no obligation to withhold.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Form IL-1000 Reconciliation Using Schedule D

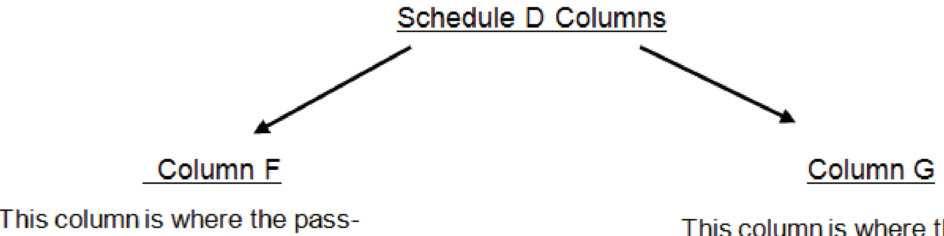


Line 6 is the total pass-through entity payment required to be remitted to the Department.



(This schedule is required for Form IL-1041)

Schedule D Columns



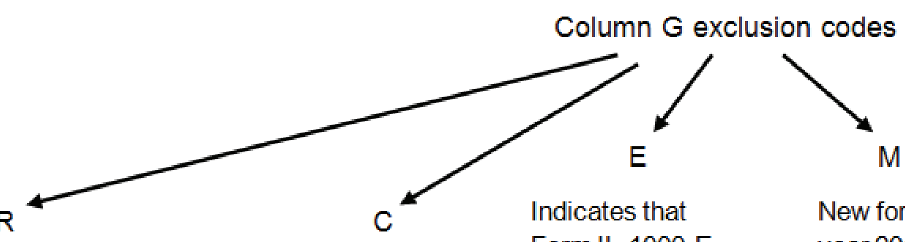
Column F

This column is where the pass-through entity lists the pass-through payment amount made for each of the beneficiaries. The total of Column F should equal the amount reported on Line 6 of Form IL-1000.

Column G

This column is where the pass-through entity identifies those beneficiaries excluded from pass-through entity payments.

Column G exclusion codes



R

Indicates that the beneficiary is an Illinois resident. No pass-through entity (PTE) withholding is **permitted.** A return should be on file for these Illinois residents.

C

Indicates that the beneficiary is included on a composite return. These members should be included on an IL-1023-C Schedule BC.

E

Indicates that Form IL-1000-E was provided to the PTE by the beneficiary. A return should be on file since these members have elected to pay their own liability.

M

New for tax year 2013. Indicates an estate which has no obligation to withhold.

Note: For tax years 2009 and prior, the Schedule D for the IL-1041 does not have Column G on it. Column G was added to Schedule D starting with the 2010 tax forms.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Q. Exhibit Q - Example – IL-1000 and IL-1023-C Filed – Overpayment on the IL-1000

The PTE filed Form IL-1000 and paid $921,270 for the 2009 tax year on behalf of their shareholders. They also filed Form IL-1023-C for the 2009 tax year, on behalf of their shareholders, but made no payment for the stated liability. Liability reported on the IL-1023-C was $480,842. The PTE assumed that the Department could transfer any overpayment from the IL-1000 and apply it to the IL-1023-C liability.

Verification of the PTE requirement is necessary to ensure that the proper amount of payment was submitted as follows:

Taxpayer's Schedule B should be exported from GenTax. Note: The figures for "income" on the export do not take into account the taxpayer's apportionment. Therefore, a schedule must be prepared to determine the Illinois portion of the income reflected on the Schedule B. The schedule goes on to figure the tax liability for each shareholder (in this case, all shareholders were nonresidents).

4	shareholder ID	1	2	3	4	5	6	7	8			
5	income per Sch B	$ 19,111,131	$ 1,197,183	$ 15,962,397	$ 3,192,480	$ 3,192,478	$ 3,192,479	$ 3,192,478	$ 4,034,328		$ 53,074,954

22		1.5% tax on $7,050,461 R/T subtraction			$ 105,757							
23		3% tax on 6 trusts			$ 211,514							
24					$ 480,842							
25												
26												
27	IL income	$ 12,502,814										
28	R/T sub (after appor)	$ 7,050,461										
29	remaining income	$ 5,452,353	equals figures on BIT return									
30	R/T tax due	$ 81,785	pd with BIT return									

Each shareholder was reviewed to determine if they had filed. If not, all tax liability was due from the PTE (IL-1000). If they had, as was the case of the 3rd shareholder, the PTE credit taken of $171,311 must be verified as to where it was generated from. In this case, $169,211 was from the S corp and the remaining $2,100 from another entity. Therefore, the $169,211 PTE credit taken would also be due on the IL-1000.

This S corporation correctly took a "5d" subtraction (income distributed to shareholder subject to replacement tax) of $29,929,495 on their IL-1120-ST. That figure was verified on the schedule that was prepared. The $29,929,495

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

subtraction times the apportionment of .235569 calculates to IL income subtracted of $7,050,461. R/T of 1.5% on that is $105,757.

Since the figures for the IL-1000 come directly from the Schedules K-1-P which were issued, those schedules are required to determine / verify the liability. Per the instructions (starting in 2009), Line 1 of the IL-1000 should be a summation of the figures in Col. B of the Schedules K-1-P issued to the nonresident shareholders. In this example, $12,502,824, Line 2 "individuals" income of $5,452,359 and tax of $163,571. Line 4 "trusts" income of $7,050,465 and tax of $317,271 for a total tax liability on the IL-1000 of $480,842.

23									$ 480,842	should have been tax due on IL-1000
24	$ 135,060	$ 12,691	$ 169,211	$ 33,842	$ 33,842	$ 33,842	$ 33,842	$ 28,511		

Note: The taxpayer is not required to attach the Schedules K-1-P to their return. If the auditor is at the taxpayer location, the Schedules K-1-P should be easily obtainable. The return can be requested from files, if the Schedules K-1-P are not provided by the taxpayer.

The PTE over-reported the income on the IL-1000 ($921,270) and overpaid the tax liability, but they also filed an IL-1023-C reflecting a tax liability of $480,842 which is the correct tax liability. However, in order for the overpayment to be claimed, revised Schedules K-1-P would be issued to the shareholders reflecting the amount paid on the IL-1000. The shareholders would file original or amended returns (as applicable) to make claims for refunds on the overpaid amounts. Claims must be timely and within statute. Any overpayment on the IL-1000 cannot be claimed by the PTE.

The PTE would file an IL-1023-C-X to zero out the original IL-1023-C.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

VI. ARCHIVES

A. Section 444 Returns

For the first taxable year beginning after December 31, 1986

Partnerships/S corporations were allowed an automatic extension of time to file their federal returns under 26 CFR §1.444-3T(c)(1)(i). Whether or not a Section 444 election was made, the due date for filing its income tax return for the first taxable year beginning after December 31, 1986, was the later of:

- The 15th day of the fourth month following the close of the taxable year for partnerships or the 15th day of the third month following the close of the taxable year for S corporations, or
- August 15, 1988.

The words, "SECTION 444 RETURN" should have been, in order to allow the returns to have been processed in the most efficient manner, typed or legibly printed at the top of the federal return, which was filed under these provisions.

Further, based on CFR §1.444-3T(c)(1)(ii), if August 15, 1988 was within 6 months of the 15th day of the fourth month for partnerships (15th day of the third month for S corporations) following the close of the taxable year, the partnership/S corporation may have requested an additional extension of time of 6 months from the original due date of the return by filing Form 7004 by the later of the two dates specified above.

> Example 1: A, a partnership that historically used a January 31 taxable year, makes a Section 444 election to retain such year for its taxable year beginning February 1, 1987. Absent the Section 444 return provisions, A's federal Form 1065 for the taxable year ending January 31, 1988, is due on or before May 15, 1988. However, if A types or legibly prints "SECTION 444 RETURN" at the top of the federal Form 1065 for the year, the due date of the return is automatically extended to August 15, 1988.

> Example 2: The facts are the same as in Example 1, except that A desires to extend the due date of its return for the year ending January 31, 1988, to a date beyond August 15, 1988. Pursuant to the Section 444 return provisions, A may extend such return to November 15, 1988 (i.e. the date that is up to 6 months after May 15, 1988, the normal due date of the return). However, in order to obtain this additional extension, A must file the federal Form 7004 on or before August 15, 1988.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

Example 3: B, a partnership that historically used a June 30 taxable year, considered making a Section 444 election to retain such taxable year, but eventually decided to change to a December 31 taxable year (B's required taxable year). Absent the Section 444 return provisions, B's federal Form 1065 for the taxable year beginning July 1, 1987 and ending December 31, 1987, is due on or before April 15, 1988. However, if B types or legibly prints "SECTION 444 RETURN" at the top of the federal Form 1065 for the year, the above provisions automatically extend the due date of such return to August 15, 1988.

B. Enterprise Zone Dividends

Section 203(d)(2)(K) currently provides a subtraction modification for "An amount equal to those dividends included in such total which were paid by a corporation which conducts business operations in an Enterprise Zone or zones created under the Illinois Enterprise Zone Act, enacted by the 82nd General Assembly, and which does not conduct such operations other than in an Enterprise Zone or Zones." This subtraction modification was incorporated into the IITA by PA 82-1019, effective December 7, 1982.

PA 83-1114, effective June 8, 1984, amended this subtraction modification for corporations and trusts and estates, but not for partnerships. This Public Act changed the wording to state, "An amount equal to those dividends included in such total which were paid by a corporation which conducts business operations in an Enterprise Zone or Zones created under the Illinois Enterprise Zone Act, and conducts substantially all of its operations in an Enterprise Zone or Zones."

Form 1299-A, which is used to support this subtraction modification for partnerships, was changed as a result of this Public Act to reflect the new language, even though Section 203(d)(2)(K) of the Act was not amended. The change to the 1984 schedule indicates the intent was to include partnerships as well. REF: TAM dated July 26, 1990 from Legal to Research and Communications and TAM dated August 30, 1990 from ITLD-S to TSS.

In order to be eligible for this modification, the corporation from which the dividends are received must:

- Conduct business operations in a federally designated Foreign Trade Zone (or Sub-zone, effective January 1, 1987) located in Illinois and be designated by the Illinois Department of Commerce and Community Affairs as a "High Impact Business", or
- Conduct "substantially all" of its business operations in an Illinois Enterprise Zone or zones.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

In order to determine if a corporation conducts "substantially all" of its operations in an Enterprise Zone, the corporation's property, payroll and sales (including throwback sales) within the Enterprise Zone are compared to the corporation's total property, payroll, and sales everywhere. For tax years ending before January 1, 1987, if the sum of these three factors, divided by three, is 95% or greater, the corporation is considered to have conducted substantially all of its business in an Enterprise Zone. For tax years ending on or after January 1, 1987, the sales factor should be double-weighted and the sum should be divided by four. One-factor filers would use a one-factor test. REF: Sunshine Letter IT87-0068 and TAM dated September 4, 1991 from Legal Services to TSS.

C. Pre-1983 Federal Law

Federal Public Law 97-354, applicable to tax years beginning after December 31, 1982, made important changes to the taxation of S corporations. Under the prior law, an S corporation (which was also referred to as a tax-option corporation) was a corporation which elected not to pay any corporate tax on its income. Instead, it opted to have its shareholders pay taxes on the income.

Federal taxable income of the S corporation was computed at the corporate level in much the same way as it was computed for any other corporation. The shareholders were then taxed directly on this income, whether or not the corporation distributed it to them. Shareholders were also entitled to deduct, on their individual returns, their share of any net operating loss sustained by the corporation, subject to certain limitations. The only exception to this rule was that the tax-option corporation's net capital gain was passed through to its shareholders and treated as a long-term capital gain on their individual returns. The S corporation's accumulated earnings and profits were reduced at the close of the taxable year to the extent that the corporation's undistributed taxable income for the year was required to be included in its shareholder's gross income. This prevented double taxation of the income of an S corporation that was not currently distributed.

D. Contributions to Comm.-Based Organizations Subtraction

PA 84-997, effective January 1, 1986, added a subtraction modification for contributions made to a community-based organization. PA 84-1308 (effective August 25, 1986) amended the modification to include contributions made to "assist local government programs for gang control."
PA 84-1400 deleted this subtraction effective September 18, 1986. Therefore, this modification was in existence only for tax years ending on or after January 1, 1986 and prior to September 19, 1986.

E. Federal Form 1041-S

Federal Form 1041-S is obsolete for taxable years beginning in 1989. Fiduciaries of simple trusts are required to file federal Form 1041 for taxable years beginning in 1989.

Federal Form 1041-S (effective with taxable years ending December 31, 1986) is a Federal return for nontaxable simple trusts. A fiduciary may use the federal Form 1041-S to report the income and deductions of a simple trust. Trusts that do not meet the filing requirements listed below, and are otherwise required to file an income tax return, must use a federal Form 1041.

The federal Form 1041-S can only be used by a domestic "simple trust" that has:

- No tax liability,
- No amounts reportable on Schedule D (Capital gains and losses),
- No charitable contribution deduction,
- No rental income, loss, or credit,
- No other passive activity income, losses or credits, and
- A trust instrument that requires all of the current income of the trust to be distributed to the beneficiary(ies) during the tax year.

If a simple trust receives income from passive activities (e.g. rental income), federal Form 1041-S cannot be used.

F. Accumulation and Capital Gain Distributions Credit

IITA § 601(b)(4) provides that:

> If the net income of a taxpayer includes amounts included in his base income by reason of IRC § 667 (relating to accumulation and capital gain distributions by a trust, respectively), the tax imposed on such taxpayer by this Act shall be credited with his pro rata portion of the taxes imposed by this Act on such trust for preceding taxable years which would not have been payable for such preceding years if the trust had in fact made distributions to its beneficiaries at the times and in the amounts specified in IRC §666 and §669. The credit provided by this paragraph shall not reduce the tax otherwise due from the taxpayer to an amount less than that which would be due if the amounts included by reason of IRC §667 were excluded from base income."

Effective for tax years beginning after December 31, 1975, this credit is no longer available to individuals. For years prior to 1987, the IL-2210 had a line for "Tax

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

credit for accumulation distribution claimed on IL-1040." Therefore, individual taxpayers may attempt to claim this credit. It should be disallowed per audit.

G. History of IRC Sec. 1348

IRC Sec. 1348(b)(1) is the measure of the PSI alternative in the 35 ILCS 5/203(d)(2)(H) subtraction modification.

The history of IRC Sec. 1348 is discussed in *Kampel v. Cir* (CA-7) 634 F.2d 708 (1980). It states that the Revenue Act of 1978 amended IRC Sec. 1348 to remove the IRC Sec. 911(b) 30% limitation on the computation of PSI, which limited a Partner's IRC Sec 911(b) "reasonable compensation" to 30% of Partnership Profits. Subsequently, Congress repealed IRC Sec. 1348 (effective August 31, 1981, P.L. 97-34). In response to Congress' repeal of IRC Sec. 1348, the Illinois Legislature amended 35 ILCS 5/203(d)(2)(H) by adding the following words "as in effect December 31, 1981" behind the words "Sec. 1348(b)(1) of the Internal Revenue Code," thereby sustaining the PSI alternative for the 35 ILCS 5/203(d)(2)(H) subtraction modification.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. III. GENERAL INFORMATION

A. Holding Company

A holding company is generally formed to hold the stock of one or more corporations. A holding company may also own liabilities of its subsidiaries. Holding companies frequently leverage their ownership of subsidiaries by issuing bonds, and may provide support services for their subsidiaries, such as tax and accounting services, employee benefit packages and centralized purchasing of insurance and legal services. Holding companies can appear in any tier of a corporate structure and can perform a large variety of functions or virtually no functions at all. A holding company that is itself a subsidiary of another company is called an “intermediate” holding company.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Companies that conduct substantial business activities may own stock in subsidiaries, but are not generally referred to as holding companies and do not present the holding company issues discussed in this chapter. Accordingly, for purposes of this chapter, "holding company" does not refer to a company with substantial business activities unrelated to its ownership of subsidiaries.

B. Unitary Determinations

Holding companies are subject to the same unitary determination tests as any other type of company. However, the criteria commonly used to establish a unitary relationship may not apply to a holding company since the criteria itself may not exist. For instance, a large amount of intercompany sales between two companies is generally considered a strong indicator of the existence of a unitary relationship. If a holding company does not purchase or sell inventory, the criteria itself does not exist. Therefore, a lack of intercompany sales will not be a factor in the unitary determination.

Holding companies having no (or relatively few) operations must still be functionally integrated through the exercise of strong centralized management with their controlled subsidiaries and/or affiliates in order to be considered unitary with those affiliates. The activities of the holding company must exceed what is commonly regarded as normal stewardship function (i.e. the management must contribute to the integration of the companies and not just fulfill normal investment oversight responsibilities). This problem is mitigated to some extent by the fact that a holding company, with so little activity that it is difficult to determine if its activities are unitary with its subsidiaries' activities, will also have little or no income or expense, so that the consequences of including or excluding it from a unitary group may not be material.

C. Repealed at 43 Ill. Reg. 10124, effective August 27, 2019 - IAC Section 100.TABLE B

This noncombination example for holding companies has been repealed due to its inconsistency with the elimination of the noncombination rule by PA 100-0022 effective 7/6/2017. See the Historical Extract section for more information.

IV. APE SPECIFIC LAW APPLICATIONS

A. Court Cases on Unitary Relationship

The following cases are examples that support Illinois' position for including holding companies in a unitary group. A synopsis can be found in Chapter 49 Court Cases.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1. Appeal of PBS Building Systems, Inc., and PKH Building Systems, Inc., California State Board of Equalization, 94-SBE-008, November 17, 1994

2. Consol, Inc. v. Bower, Cook County Cir. Ct., Dkt. No. 01 L 51196, 4/7/2003

B. Apportionment Method

A holding company with no business operations would not generally qualify to use the one-factor insurance company, financial organization or transportation company formulas, and so would use the single sales factor apportionment formula under IITA §304(h)(3) (for tax years on and after December 31, 2000). An exception to this general rule applies to bank holding companies which are included in the financial organization definition contained in IITA §1501(a)(8).

A holding company that qualifies as a bank holding company under the Bank Holding Company Act of 1956 is, by statutory definition, a financial organization and any subsidiary it owns is also a financial organization, regardless of the actual business operations of the holding company or subsidiary. One exception to this rule is that subsidiaries that must be disposed of within certain required time limits under the Bank Holding Company Act of 1956 may be included in the same unitary group with the bank holding company only if they qualify as a financial organization under some other provision of IITA §1501(a)(8). Hereafter, companies that do not qualify as financial organizations under the Bank Holding Company Act of 1956 will be referred to as nonbanking.

1. Tax Years ending on or after December 31, 2017

For tax years ending on or after December 31, 2017 PA 100-0022 eliminated the non-combination rule. The definition of “United States” was also changed to include members operating in any area over which the U.S. has asserted jurisdiction or claimed exclusive rights with respect to the exploration for or exploitation of natural resources (e.g. the Outer Continental Shelf).

The method of prorating the income of a holding company included in multiple unitary business groups, described in subparagraph C of IITA § 1501(a)(27), has not changed, but has become obsolete with the repeal of the non-combination rule. Holding companies should just use the single sales factor apportionment on the Schedule UB.

More information on different apportioning companies and combination can be found in the instructions for the Schedule UB and Subgroup Schedule UB.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

2. Tax Years ending on or after December 31, 1987 and prior to December 31, 2017

Since the definition of "unitary group" in IITA §1501(a)(27) was enacted by PA 82-1029, it has provided that companies required to apportion their business income under different subsections of IITA §304 could not be combined. In 1987, PA 85-731 created an exception to this noncombination rule for holding companies that owned a group of insurance companies or a group of transportation companies. PA 97-0507, effective August 23, 2011, amended the exception for certain holding companies to apply to financial organizations and multiple holding companies, and to allow splitting of holding companies among groups. This legislation was designed to codify existing practice. The definition of when to split a holding company was also expanded (IITA §1501(a)(27)(C)).

PA 97-0636 effective December 16, 2011 updated the section to include federally regulated exchanges.

IITA 1501(a)(27)(B) now states:

> … In no event, shall any unitary business group include members which are ordinarily required to apportion business income under different subsections of Section 304 except that for tax years ending on or after December 31, 1987 this prohibition shall not apply to a holding company that would otherwise be a member of a unitary business group with taxpayers that apportion business income under any of subsections (b), (c), (c-1), or (d) of Section 304. If a unitary business group would, but for the preceding sentence, include members that are ordinarily required to apportion business income under different subsections of Section 304, then for each subsection of Section 304 for which there are two or more members, there shall be a separate unitary business group composed of such members. For purposes of the preceding two sentences, a member is "ordinarily required to apportion business income" under a particular subsection of Section 304 if it would be required to use the apportionment method prescribed by such subsection except for the fact that it derives business income solely from Illinois. As used in this paragraph, the phrase "United States" means only the 50 states and the District of Columbia, but does not include any territory or possession of the United States or any area over which the United States has asserted jurisdiction or claimed exclusive rights with respect to the exploration for or exploitation of natural resources.

P.A. 097-0507 created subparagraph (C) for holding companies in IITA § 1501(a)(27) which defines "holding company" as a corporation (other than a corporation that is a financial organization under paragraph 1501(a)(8) of the IITA because it is a bank holding company or is owned by a bank holding company)…that, during the current tax year and the two immediately preceding tax years, derives substantially all of its gross

income from dividends, interest, royalties, fees or other charges from controlled taxpayers for providing services to the unitary group.
These corporations incur no substantial expenses other than expenses (including interest and other costs of borrowing) incurred in connection with the acquisition and holding of interests in subsidiaries and in the provision of services to subsidiaries or in the leasing or licensing of property to subsidiaries.

Subparagraph (C) also describes the method of prorating the income of a holding company included in multiple unitary business groups.

a) Allocation Between Unitary Groups

A holding company may be unitary with two or more unitary groups of subsidiaries that are either not unitary with each other or are prohibited by the noncombination rule from being one unitary group. In these instances, it is necessary to allocate the base income (loss) and apportionment factors of the holding company to each of the groups.

According to IITA §1501(a)(27)(C)(ii) and (iii) the income and factors of a holding company, which is a member of more than one unitary business group, shall be included in each unitary business group of which it is a member by pro rating its base income in a proportion equal to that which the gross receipts of the unitary business group bears to the combined gross receipts of all unitary business groups. The business income of the holding company will be apportioned under the subsection of 304 used by the other members of its unitary business group.

The method most supported for allocating the holding company's income and factors between unitary groups is comparative gross receipts, but any other "reasonable" method may be used if it is consistently applied and provides a reasonable measure of business activity and income.

The comparative gross receipts method prorates a holding company's income (loss) and factors among the unitary groups based on a ratio of each group's gross receipts as compared to the gross receipts of all the unitary groups. A potential problem with this method is that sometimes revenues of different businesses are not comparable (i.e. product sales of a manufacturing company and insurance premiums from an insurance company).

Example 1: Holding Company HC files a consolidated federal 1120 return with companies I, which is engaged in the manufacturing business, and J, which is engaged in the retail business. HC is unitary with companies I and J. Companies I and J are NOT unitary with each other. The auditor determines that the income and factors of HC should be split between companies I and J according to IITA §1501(a)(27)(C)(ii). Company I has gross receipts from its manufacturing business of $700 million and Company J has gross receipts of $300 million from its retailing

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

business. In this case, 70% ($700,000,000/$1,000,000,000) of the base income and factors of HC would be included in the unitary group with I and 30% ($300,000,000/$1,000,000,000) of the income and factors of HC would be included in the unitary group with J.

Example 2: Same as above except HC is a pure holding company-it has no payroll or property, its only income is dividends from I and J, and its only expenses are interest, taxes and fees. HC has no real business, so it would be inappropriate to tax it separately from I and J. However, its leveraged ownership of I and J is not enough to make I and J unitary. The expenses of HC should be split between companies I and J per the guidance of IITA §1501(a)(27)(C)(ii). Company I has gross receipts from its manufacturing business of $700 million and Company J has gross receipts of $300 million from its retailing business. In this case, 70% ($700,000,000/$1,000,000,000) of the expenses of HC would be included in the unitary group with I and 30% ($300,000,000/$1,000,000,000) of the expenses of HC would be included in the unitary group with J.

Example 3: Holding Company HC files a consolidated federal 1120 return with companies K, L, and M, which are engaged in the manufacturing business, and companies O, P, and Q, which are engaged in the retail business. HC is unitary with all of the above companies. Companies K, L, and M are unitary with each other and O, P, and Q are unitary with each other. However, the manufacturing and retailing groups are NOT unitary with each other. The auditor determines that the income and factors of HC should be split between the manufacturing and retailing groups. HC's income consisted exclusively of a $100 million capital gain from the sale of Company N which was engaged in the retailing business and was unitary with companies K, L, and M before it was sold. In this case, all of HC's income and factors should be included in the retailing group with companies K, L, and M.

Example 4: For the year ending December 31, 2011, Holding Company HC files a consolidated federal 1120 return with companies G and H. Company HC is a Bank Holding Company and companies G and H are properly ownable under the Bank Holding Company Act of 1956. Companies HC, G, and H are required to file a combined unitary return using the financial organization apportionment formula in IITA §304(c) even if company G or H would not be a financial organization under IITA §1501(a)(8) except for the fact that it was owned by a Bank Holding Company.

3. Tax Years ending on or after December 31, 1982 and prior to December 31, 1987

A three-factor holding company that was unitary with a transportation, insurance or nonbanking financial organization unitary group could not be included in the one factor transportation, insurance or nonbanking financial unitary group due to the statutory

prohibition against combining companies with differing apportionment formulas in one unitary group, which is referred to as the noncombination rule.

The noncombination rule provides that any person who would be a member of a unitary business group but uses another apportionment method must file a separate unitary return with any other unitary members that use its apportionment method. If there are no other members using that method, the member must file a separate non-unitary return.

C. Exercising Election to Not Split Holding Company

The holding company may petition the Director, pursuant to IITA § 304(f), to include all income and factors of the holding company only with members of a unitary business group apportioning their business income under one subsection ((a), (b), (c) or (d)) of IITA § 304, if including the income and factors of the holding company in more than one unitary business group does not fairly reflect the degree of integration, dependence of, and contributions between the holding company and one or more of the unitary business groups.

D. 80/20 Corporations Owned by a Holding Company

In some cases, auditors will have to determine the proper method of allocating the income and factors of a holding company that is unitary with domestic subsidiaries engaged in several unitary groups and is also unitary with subsidiaries that have been excluded from any unitary group because they qualify as 80/20 corporations. Since a unitary relationship exists between the holding company and the 80/20 companies, the question that has been asked is whether any portion of the income (loss) and factors of the holding company should be allocated to the 80/20 companies.

1. Policy on and after July 24, 1997

The holding company allocation policy when 80/20 companies are involved was changed on July 24, 1997. When a holding company owns unitary subsidiaries engaged in several unitary groups and unitary subsidiaries that qualify as 80/20 corporations which are excluded from any unitary group because of the 80/20 rule, the correct approach is to not allocate any of the income (loss) and factors of the holding company to the “80/20 group”. In other words, the entire income (loss) and factors of the holding company should be allocated to the domestic unitary groups.

2. Policy Prior to July 24, 1997

Prior to July 24, 1997, Legal Services advised the Audit Bureau on the proper method of allocating the income (loss) and factors of a holding company when the holding company owned subsidiaries engaged in several unitary groups and subsidiaries that

This manual is not a statement of Department policy. were excluded from any unitary group by the 80/20 rule. Legal recommended that in situations where the holding company was unitary with the 80/20 companies, the 80/20 companies be put into a separate “80/20 group” and a portion of the income (loss) and factors of the holding company should be allocated to the “80/20 group”.

V. HISTORICAL EXTRACTS

A. IAC Section 100.TABLE B

IAC Section 100.TABLE B contained an example of a combined apportionment method for unitary groups, which are comprised of members using single-factor and three-factor apportionment formulas.

TABLE B was inconsistent with the new holding company legislation, which provides that business income of a holding company included in a one-factor unitary group shall be apportioned using that one-factor formula and should not be consulted.

The Department enacted legislation (PA 100-0022) that repealed the noncombination rule, and therefore repealed Section 100.TABLE B.

This manual is not a statement of Department policy. I. PURPOSE

This chapter contains a discussion of the different types of financial entities and the apportionment factor for financial organizations, as well as subtraction modifications unique to financial organizations. Also included is the sales finance company definition contained in Public Act (PA) 91-535. The primary and effective regulations for financial organizations are the following: IAC §§ 100.9710, 100.3400, 100.3405, 100.2655, 100.2657. and 100.2455.

For financial organizations filing returns for tax years ending on or before December 31, 1996, who may be eligible to utilize the proposed regulations stated in IITA §1501(a)(8)(E), please contact Income Tax Technical Support for further guidance.

PA 95-233 and 95-707 amended the financial apportionment factor found in IITA § 304(c), creating and updating IITA § 304(c)(3). For taxable years ending on or after December 31, 2008, gross receipts are sourced using IITA § 304(c)(3). For taxable years ending before December 31, 2008, gross receipts are sourced using IITA § 304(c)(1).

The most recent changes to IITA § 1501(a)(8), the financial organization definition, are contained in PA 91-535. These changes are declaratory of existing law and are, therefore, retroactive. This public act does not, however, contain any refund or notice limitation language. Except as discussed below, if a person qualifies as a sales finance company under the PA 91-535 definition, it is a sales finance company for ALL tax years.

Effective July 6, 2017, PA 100-22 modified the unitary business group (UBG) definition in IITA § 1501(a)(27)(B). It repealed the noncombination rule and expanded the definition of “United States” to include the outer continental shelf (OCS) for taxable years ending on or after December 31, 2017. Financial organizations that apportion under IITA § 304(c) will combine with companies that apportion under other subsections of IITA § 304. This is a major adjustment to how auditors determine the UBG and combined apportionment, and eliminates the related-party expense modifications for noncombination companies for the applicable tax periods. For more information, see Audit Manual Chapters 23 for UBGs, 24 & 25 for modifications, and 27 for apportionment. Also see the “APPORTIONMENT FORMULA- TYE ON OR AFTER 12/31/08” and “Related-Party Transactions for Noncombination Companies for Taxable Years Ending on or after December 31, 2017” sections in this chapter.

III. GENERAL INFORMATION

A. QUALIFICATIONS TO BE FINANCIAL ORGANIZATION

The statutory definition for a financial organization is found under IITA § 1501(a)(8)(A), and IAC § 100.9710 provides a thorough explanation and basis of determining whether an entity should be treated as a financial organization. A brief summary of the criteria found in that regulation follows.

An exhaustive list of entities that are deemed financial organizations are the following:

- bank
- bank holding company
- trust company
- savings bank
- industrial bank
- land bank
- safe deposit company
- private banker
- savings and loan association
- building and loan association
- credit union
- currency exchange
- cooperative bank
- small loan company
- sales finance company
- investment company
- any person owned by a bank or bank holding company

If an entity is a bank, bank holding company, or owned by a bank or bank holding company as defined in IAC § 100.9710(e) through (g), it qualifies as a financial organization regardless of its business activities. Any of the other entities in the exhaustive list must be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

predominantly engaged in the business activities of a financial organization in order to qualify as a financial organization. This means that more than 80% (50% in the case of a sales finance company) of averaged gross income from the current and two previous taxable periods must come from the characteristic business activities defined for each separate entity in IAC § 100.9710(d). That analysis is referred to in our regulations as the "gross income test". The gross income test only considers the years the entity is in business, so if the entity has only been in business for one or two years, the gross income would only be averaged over one or two years. Some points to consider with the gross income test are the following:

- Income from transactions occurring outside of the ordinary course of business is not included in the gross income test.
- Income not included in apportionable business income is not included in the gross income test.
- Only the net gain (but not loss) from the sale or disposition of any asset is included.
- A "finance lease" is treated as a loan or extension of credit, where the lessor is the creditor and the lessee is treated as the owner and entitled to deduct depreciation expense under IRC § 167.
- If an entity is involved in more than one of the businesses listed in IAC § 100.9710(d) (e.g., small loan company and currency exchange), gross income from financial services includes gross income derived from all services characteristic of any specifically defined type of financial organization for which it qualifies.
    - Example: If a taxpayer receives 45% of its gross income from transactions characteristic of a small loan company and 40% of its gross income from transactions characteristic of a currency exchange, it meets the 80% gross income test and qualifies as a financial organization.

The auditor should consult IAC § 100.9710(a) through (c) for more detail.

1. Calculating Gross Receipts Test: Example

Company A, a credit union, is under audit for TYE 12/31/15 and 12/31/16. Company A originally apportioned its income under IITA § 304(c)(3) as a financial organization. The auditor seeks to verify this by performing the gross receipts test found under IAC § 100.9710(b). The process can be summarized by the following steps:

1. Determine the gross business receipts included in apportionable business income for the audit year and its previous two years
2. Calculate the average gross business receipts for the three-year period
3. Determine the gross business receipts associated with the characteristic services for the financial organization type(s) for the audit year and the previous two years
4. Calculate the average financial gross business receipts for the three-year period

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

5. Divide the average gross financial business receipts by the average gross business receipts
6. If the percentage is greater than 80%, the taxpayer qualifies as a financial organization under IAC § 100.9710(b) for that year

These steps should be conducted for each audit period. A taxpayer could qualify as a financial organization in one audit period, but not another, within the same audit cycle. Remember to consider the specific rules of what income to include under IAC § 100.9710(b)(1) – (5).

The auditor follows these steps for Company A and computes the calculation, supporting that Company A should be treated as a financial organization for the audit cycle. The following table summarizes the auditor's gross receipts test:

Company A, Financial Organization Gross Receipts Test

TYE 12/15 Test	TYE 12/15	TYE 12/14	TYE 12/13	Average
Fin. Receipts	55,000,000	51,500,000	42,950,000	49,816,667
Gross Receipts	60,000,000	59,250,000	56,290,000	58,513,333
			Percent	85.14%

TYE 12/16 Test	TYE 12/16	TYE 12/15	TYE 12/14	Average
Fin. Receipts	52,000,852	55,000,000	51,500,000	52,833,617
Gross Receipts	68,500,000	60,000,000	59,250,000	62,583,333
			Percent	84.42%

The auditor's calculations show that the average gross financial business receipts were greater than 80% for both audit periods, confirming that Company A was correct in apportioning its income as a financial organization.

B. NEXUS

Financial organizations, like any other type of taxpayer, must have Illinois nexus in order to be subject to taxation. A legal explanation of nexus can be found in IT 08-0031-GIL:

> The United States Constitution limits a state's power to subject to income tax foreign corporations and other nonresidents. The Due Process Clause requires that there exist some minimum connection between a state and the person, property, or transaction the state seeks to tax. (Quill Corp. v. N. Dakota, 504 U.S. 298 (1992)) The Commerce Clause requires that a state's tax be applied only to activities with a substantial nexus to the taxing state. (Id.) In the case of foreign corporations, Illinois may assert nexus to tax unless the corporation falls under the protection conferred by Public Law 86-272. (15 U.S.C. § 381) Public Law 86-272 precludes a state from subjecting a nondomiciliary corporation to a net income tax where such corporation's only activities within the state for the taxable year consist of solicitation activities for sales of tangible personal property.

Thus, regardless of state statutes, which govern a state's apportionment of income, that income cannot be taxed unless the entity to be taxed has nexus with the state according to U. S. Constitutional jurisprudence. While the Due Process Clause is generally regarded as an easier threshold to meet, the Commerce Clause is regarded as a higher threshold that requires "substantial nexus". In other words, it is entirely possible for a company to have an Illinois apportionment factor due to Illinois tax laws, but not have the requisite "substantial nexus" with the company to establish nexus and subject the company to Illinois income tax.

The distinction between an apportionment factor and nexus is stated in our regulations under IAC § 100.9720(a):

> IITA Section 201(a) imposes the Illinois Income Tax, a tax measured by net income, on *individuals, corporations, trusts and estates for the privilege of earning or receiving income in or as a resident of this State*. IITA Section 201(c) imposes a second tax measured by net income, the Personal Property Tax Replacement Income Tax, on *corporations, partnerships and trusts for the privilege of earning or receiving income in or as a resident of this State*. In general, a resident of this State will always be subject to these taxes. Activity conducted in interstate commerce may establish sufficient nexus with Illinois to permit imposition of these taxes on a non-resident taxpayer, as well, when the non-resident earns or receives income in this State within the meaning of the IITA. Complete Auto Transit, Inc. v. Brady, 430 U.S. 274, 97 S. Ct. 1076 (1977); Quill v. North Dakota, 504 U.S. 298, 112 S. Ct. 1904 (1992). However, the fact that Article 3 of the IITA requires a non-resident taxpayer to allocate or apportion income to this State does not create a presumption that the taxpayer has nexus. [Emphasis added]

If a financial organization is a member of a UBG, an Illinois nexus determination must be made before including any of its Illinois sales in the combined UBG apportionment factor numerator. The bright-line test of property and payroll from *Quill* (1992) strictly only applied to sales and use tax (*Borden Chemicals and Plastics, L. P.* (2000)) and was overturned in *South Dakota v. Wayfair, Inc.*, U.S. S.Ct., Dkt. No. 17-494, 06/21/2018.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

It is possible to develop a nexus position for a nonresident financial organization that does not have property or payroll in Illinois. We believe the West Virginia Supreme Court case of *Tax Commissioner of the State Of West Virginia v. MBNA America Bank, N.A.*, 640 SE2d 226 (2006) is an instructive case involving a nonresident financial organization. Some principal facts from the opinion are shown below:

> Appellant MBNA America Bank is a foreign corporation which has its principal place of business and commercial domicile in Wilmington, Delaware. During the two years in question, 1998 and 1999, MBNA had no real or tangible personal property and no employees located in West Virginia. The principal business of MBNA at the relevant times in this case was issuing and servicing VISA and MasterCard credit cards. This business included the extension of unsecured credit to customers who use these credit cards. MBNA promoted its business in West Virginia via mail and telephone solicitation.
>
> As noted above, the two tax years at issue are 1998 and 1999. In 1998, MBNA's gross receipts attributable to West Virginia customers amounted to $8,419,431.00, and in 1999, its gross receipts amounted to $10,163,788.00. For tax year 1998, MBNA paid a West Virginia Business Franchise Tax **1** of $32,010.00 and a West Virginia Corporation Net Income tax **2** of $168,034.00. For tax year 1999, MBNA paid a Business Franchise Tax in the amount of $42,339.00 and a Corporation Net Income Tax in the amount of $220,897.00.

MBNA argued that it had no physical presence in West Virginia and that its business activity would not create the necessary substantial nexus to overcome the Commerce Clause. The court disagreed. An excerpt of its reasoning is shown below:

> Accordingly, we now hold that the United States Supreme Court's determination in Quill Corp. v. North Dakota, **504 U.S. 298** , **112 S.Ct. 1904** , **119 L.Ed.2d 91 (1992)** , that an entity's physical presence in a state is required to meet the "substantial nexus" prong of Complete Auto Transit, Inc. v. Brady, **430 U.S. 274** , **97 S.Ct. 1076** , **51 L.Ed.2d 326 (1977)** , applies only to state sales and use taxes and not to state business franchise and corporation net income taxes.
>
> Rather than a physical presence standard, this Court believes that a significant economic presence test is a better indicator of whether substantial nexus exists for Commerce Clause purposes. At least one legal commentator has suggested such a test and to some degree defined its parameters. *See* Edson, 49 Tax Lawyer at 943. According to this commentator, a substantial economic presence standard "incorporates due process 'purposeful direction' towards a state while examining the degree to which a company has exploited a local market." *Id.* Further, "[a] substantial economic presence analysis involves an examination of both the quality and quantity of the company's economic presence." *Id.,* 49 Tax Law. at 944. Finally, under this test, "[p]urposeful direction towards a state is analyzed as it is for Due Process Clause

> purposes," and the Commerce Clause analysis requires the additional examination of "the frequency, quantity and systematic nature of a taxpayer's economic contacts with a state." *Id.,* 49 Tax Law. at 945. We find this rationale persuasive and will apply it in determining the constitutionality of the taxes at issue.

The record showed that MBNA had continuously and systematically engaged in direct mail and telephone solicitation and promotion in West Virginia. This led to significant gross receipts from West Virginia customers of roughly $8.4 million in 1998 and $10.1 million in 1999 . Thus, the court had “no trouble concluding that MBNA's systematic and continuous business activity in this State produced significant gross receipts attributable to its West Virginia customers which indicate a significant economic presence sufficient to meet the substantial nexus prong of *Complete Auto.*” An appeal by the taxpayer to U. S. Supreme Court was denied.

Audit developed a nexus questionnaire in order to assist auditors in determining whether a financial organization has sufficient activity in Illinois to assert nexus: EDA-132-NF Nexus Questionnaire for Financial Companies. This form is available on the Intranet under “Work Areas”, “Audit”, “Forms”, “Income Tax”, or at the following link:

https://rev.portal.illinois.gov/Core/Forms/Documents/EDA-132-NF.pdf

For more information about nexus, see Audit Manual Chapter 22.

C. FINANCIAL ORGANIZATIONS- DEFINITIONS AND DISCUSSION BY TYPE OF ENTITY

Each of the following types of entities are detailed in IAC § 100.9710(d)(1) through (11), (e), (f), and (g), which should be referred to for the determination of a financial organization. The following section will list each entity, summarize each one’s characteristic services, and its regulation cite. Since this is meant to be an exhaustive list of financial organizations, the auditor cannot classify a company as a financial organization if it is not treatable as one of the listed types of companies.

1. Bank

The characteristic services of a bank as stated by Illinois and federal regulations are the following:

- accepting deposits
- making loans
- discounting evidences of debt

- buying and selling exchange

An entity formed under another state's laws must engage in each of the above activities to be considered a bank. For example, if the entity did not accept deposits, it could not be considered a bank.

For purposes of applying the 80% gross income test, the following are examples of gross income from characteristic services of a bank:

- application and origination fees, points, interest, late payment fees, and other charges received in connection with loans or with commitments to make loans or provide other credits
- service charges and early withdrawal or other penalties received in connection with deposit accounts
- fees and gains realized from buying and selling exchange, including foreign currency
- loan servicing fees and charges received in connection with syndicated loans or loans sold to third parties
- discounts and gains realized on the purchase or resale of loans

Examples of items that ARE NOT considered income from characteristic services of a bank include rental income from real estate, gains from the sale of property obtained in foreclosure or settlement of loans, and income earned from securities (interest, dividends, and gains). This is in line with the rule that only income earned in the ordinary course of an entity's business should be included in the 80% gross income test.

See IAC § 100.9710(d)(1) for more information.

An entity may be considered a bank, even if it does not conduct the characteristic activities of a bank and meet the 80% gross income test, if the entity is one of the following:

- regulated by the Office of the Comptroller of the Currency (OCC)
- regulated by the Federal Reserve Board (FRB)
- regulated by the Federal Deposit Insurance Corporation (FDIC)
- a federally or state-chartered bank operating as a credit card bank.

The auditor can verify through each regulator's website whether a specific taxpayer is regulated by the agency. The OCC's website provides lists of its regulated banks showing a charter number (issued by the OCC), a certificate number (issued by the FDIC), and an RSSD number (a unique identifier issued by the FRB). Likewise, the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

auditor can obtain similar information from the FDIC and FRB's websites to verify regulation information about a specific taxpayer.

See IAC § 100.9710(e) for more details.

2. Trust Company

The characteristic services of a trust company as stated by Illinois regulations are the following:

- performing services as fiduciary on behalf of beneficiaries
- rendering services to the trust

For purposes of applying the 80% gross income test, only trustee fees or other compensation for services rendered as trustee to the trust should be considered as income from characteristic services.

Amounts received for services provided other than as a trustee ARE NOT to be treated as income from characteristic services of a trust company. An example of this would be fees received as advisor or manager of a mutual fund in which trust fund assets are invested.

See IAC § 100.9710(d)(2) for more information.

3. Savings Bank

A distinguishing characteristic of a savings bank is that, per Illinois regulations, it must maintain 60% of its total assets in qualifying "domestic savings and loan association" assets described in IRC § 7701(a)(19). The characteristic services of a savings bank as stated by Illinois and federal regulations are the following:

- acquiring the savings of the public
- investing in loans

Like a regular bank, if a savings bank is not taking deposits, it would not qualify as a financial organization for purposes of the IITA.

For purposes of applying the 80% gross income test, examples of income from characteristic services are the following:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- application and origination fees, points, interest, late payment fees, and other charges received in connection with loans or with commitments to make loans or provide other credits
- service charges and early withdrawal or other penalties received in connection with deposit accounts
- loan servicing fees and charges received in connection with syndicated loans or loans sold to third parties
- discounts and gains realized on the purchase or resale of loans

Like banks, examples of items that ARE NOT considered income from characteristic services of a savings bank include rental income from real estate, gains from the sale of property obtained in foreclosure or settlement of loans, and income earned from securities (interest, dividends, and gains).

See IAC § 100.9710(d)(3) for more information.

4. Land Bank

Land banks were created under federal law to make loans on farm security at low interest rates. Under current law, these surviving entities ARE EXEMPT from Illinois taxation. The characteristic service is the following:

- making loans to farmers

For purposes of applying the 80% gross income test, examples of income from its characteristic service is the following:

- application and origination fees, points, interest, late payment fees, and other charges received in connection with farm loans

See IAC § 100.9710(d)(4) for more information.

5. Safe Deposit Company

A safe deposit company is licensed under Illinois statutes, which do NOT apply to banks, savings and loans, credit unions, warehouses, or grain storage companies.

The characteristic service of a safe deposit company is the following:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- providing facilities for the safekeeping of personal property in safes or vaults

For purposes of applying the 80% gross income test, the example of income from its characteristic service is the following:

- rental income or similar charges for safe deposit boxes

See IAC § 100.9710(d)(5) for more information.

6. Savings and Loan Association

Savings and loan associations can be organized under either federal or Illinois statutes. These entities, like savings banks, are required to invest 60% of their assets in "domestic savings and loan association" assets described in IRC § 7701(a)(19). Regardless of other law, for purposes of the IITA, the determination of a savings and loan association will be by its following characteristic services:

- acquiring the savings of the public
- investing in loans

Like a regular bank, if a savings and loan association is not taking deposits, it would not qualify as a financial organization for purposes of the IITA.

For purposes of applying the 80% gross income test, examples of income from characteristic services are the following:

- application and origination fees, points, interest, late payment fees, and other charges received in connection with loans or with commitments to make loans or provide other credits
- service charges and early withdrawal or other penalties received in connection with deposit accounts
- loan servicing fees and charges received in connection with syndicated loans or loans sold to third parties
- discounts and gains realized on the purchase or resale of loans

Like banks, examples of items that ARE NOT considered income from characteristic services of a savings and loan association include rental income from real estate, gains from the sale of property obtained in foreclosure or settlement of loans, and income earned from securities (interest, dividends, and gains).

See IAC § 100.9710(d)(6) for more information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Back in the 1990s, the Legal Services Bureau advised the Audit Bureau that all audit activity should be terminated immediately and the audits cancelled on any cases involving savings and loan associations:

- For all years during which the savings and loan is in receivership under the control of the Resolution Trust Corporation (RTC) for the entire taxable year, or

- For any tax year which ends while the savings and loan is in receivership under the control of the RTC.

Due to federal statutes, Illinois is prohibited from assessing and/or collecting any tax from savings and loans in receivership under the control of the RTC in the two situations listed above.

Audits should continue on any cases in which an ENTIRE TAXABLE YEAR occurs prior to the entity going into receivership under the control of the RTC. The audit period should be limited, however, to this pre-receivership taxable year(s).

Assuming that the savings and loan association is no longer in receivership under the RTC, an audit should be pursuable.

7. Credit Union

Credit unions federally chartered under 12 USC 1754, incorporated under the Illinois Credit Union Act, or permitted to do business in Illinois, are most likely exempt from Illinois taxation. For federal and Illinois purposes, credit unions are meant to promote thrift and provide a source of credit for its members. The credit unions are required to invest their funds in loans to their members, bank accounts, government securities, and other credit unions. For purposes of the IITA, the determination of a credit union will be by its following characteristic services:

- taking interest-paying deposits from members
- making loans to members

For purposes of applying the 80% gross income test, examples of income from characteristic services are the following:

- application and origination fees, points, interest, late payment fees, and other charges received in connection with loans or with commitments to make loans or provide other credits

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- service charges and early withdrawal or other penalties received in connection with deposit accounts

Like banks, examples of items that ARE NOT considered income from characteristic services of a credit union include rental income from real estate, gains from the sale of property obtained in foreclosure or settlement of loans, and income from securities (interest, dividends, and gains).

See IAC § 100.9710(d)(7) for more information.

8. Currency Exchange

A currency exchange is licensed by the Director of Financial Institutions under the Currency Exchange Act (205 ILCS 405/4). Its primary functions are to cash checks, drafts, money orders or other money for consideration, and to issue/sell its own money orders. So, for purposes of the IITA, the following are the characteristic services of a currency exchange:

- cashing checks and other evidences of money for the general public
- issuing money orders

For purposes of applying the 80% gross income test, examples of income from characteristic services are the following:

- fees/charges for cashing checks
- fees/charges for issuing money orders

Interest or other income earned from the investment of funds received from cashing checks or issuing money orders IS NOT gross income from characteristic services.

See IAC § 100.9710(d)(8) for more information.

9. Small Loan Company

A small loan company is licensed by the Director of Financial Institutions under the Consumer Installment Loan Act (205 ILCS 670/1) to make loans in a principal amount not exceeding $40,000. While our regulation lists the loan threshold at $25,000, 205 ILCS 670/1 has since been amended and increased the principal loan maximum to $40,000. Further, the loan term is not to exceed 181 months. Our regulation lists the term limit as 121 months, but 205 ILCS 670/17 has since been amended and states the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

maximum term to be 181 months. For purposes of the IITA, the following is the characteristic service of a small loan company:

- Making loans not exceeding an aggregate principal amount of $40,000 to any obligor and for terms not exceeding 181 months

For purposes of applying the 80% gross income test, examples of income from characteristic services are the following:

- loan application and origination fees
- interest
- late payment charges
- other similar amounts realized in connection with loans

Note, any type of income received from a loan that exceeds the $40,000 principal and 181 month term IS NOT considered gross income from characteristic services. Neither is any income from loans made to business associations, corporations, or sole proprietors, for the purpose of carrying on or acquiring such businesses.

See IAC § 100.9710(d)(9) for more information.

10. Sales Finance Company

The criteria for classifying a company as a sales finance company is more detailed and involved than the other financial organizations. The following will provide explanations of the two ways a company can statutorily qualify as a sales finance company, including some examples. Then, reference will be made of the characteristic services and the 50% gross income test. An important difference between a sales finance company and other financial organizations is that only greater than 50% of its income has to come from characteristic services, not 80%.

a) Sales Finance Company Definition- IITA § 1501(a)(8)(C)(i)

IITA § 1501(a)(8)(C)(i) describes four types of companies that will be treated as sales finance companies. The four types of companies are commonly referred to as “credit”, “funding”, “loaning”, and “finance leasing” companies.

In order to qualify as a sales finance company under IITA § 1501(a)(8)(C)(i), a person (i.e. an individual, trust, estate, partnership, association, firm, company, corporation, limited liability, or fiduciary) must be PRIMARILY ENGAGED (greater

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

than 50% of gross income averaged over three years) in one or more of the following businesses:

1. PURCHASING customer receivables (defined below). The person may purchase the customer receivables from the original seller in the transaction or from a person who purchased the customer receivable (directly or indirectly) from the original seller. The person may purchase the customer receivables from either a related or unrelated party. This type of an entity is referred to as a "credit" company.

   For example, the parent company (P) sells its accounts receivables at a discount to its subsidiary (S). The only business activity for S is the purchase of accounts receivable from P. S (a "credit" company) qualifies as a sales finance company.

2. Making loans SECURED BY customer receivables. The person may make the loan to the original seller in the transaction or to a person who purchased the customer receivable (directly or indirectly) from the original seller. This type of an entity is referred to as a "funding" company.

   For example, the parent company (P), a retailer, sells its accounts receivable from credit card operations at a discount to its subsidiary (Sub #1). The only business activity for Sub #1 is the purchase of accounts receivable from P. Sub #2's only business activity is to loan money to Sub #1 to purchase the accounts receivable. All of the loans made by Sub #2 are secured by the customer receivables that Sub #1 purchased from P. Sub #1 (a "credit" company) and Sub #2 (a "funding" company) qualify as sales finance companies.

3. Making loans for the express purpose of FUNDING PURCHASES OF TANGIBLE PERSONAL PROPERTY OR SERVICES by the borrower. This type of an entity is referred to as a "loaning" company.

   For example, the parent company (P), a large manufacturing company borrows money from its subsidiary (S). The only business activity for S is to make loans to P for the express purpose of purchasing tangible personal property or services. S (a "loaning" company) qualifies as a sales finance company.

   <u>Example #1</u>

   Subsidiary (S) has entered into a loan agreement with its parent (P). The loan agreement provides that S will loan money to P for capital expenditures and operating capital. The proceeds from the loan can be used to pay taxes, advertising, interest expense on third party loans, purchases of intangible

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

property or real property, and other purposes beyond the purchase of tangible personal property or services. These expenditures do **not** involve the purchase of tangible personal property or services by the borrower. Consequently, loans made by S to P pursuant to the loan agreement cannot be said to be for the **"express purpose of funding purchases of tangible personal property or services".** S's only income is the interest income it receives from its loan to P. S does not qualify as a financial organization because its loan to P is not for the express purpose of funding purchases of tangible personal property or services.

4. FINANCE LEASING. A lease is a finance lease if the lessee is treated as the owner of the asset and allowed a depreciation deduction under the IRC. This type of entity is referred to as a "finance leasing" company.

   In contrast, a company engaged in the business of true leasing does NOT qualify as a sales finance company. A lease is considered a true lease if the lessor is treated as the owner of the asset and allowed a depreciation deduction under the IRC.

   For example, the parent company (P) sells some machinery to its subsidiary (S). The only business activity for S is to lease the equipment to third parties. All of S's leases are treated as finance leases under the IRC. S (a "finance leasing" company) qualifies as a sales finance company.

The PRIMARY TEST (greater than 50% gross income test) established by IITA § 1501(a)(8)(C)(i) will be used when a taxpayer is engaged in one or more qualifying businesses ("credit", "funding", "loaning" and "finance leasing") as well as other non-qualifying businesses.

IITA § 1501(a)(8) allows a person that is a "credit", "funding", "loaning", or "finance leasing" company to combine all of those activities to determine if the person qualifies as a sales finance company under IITA § 1501(a)(8)(C)(i). The statute does NOT however, allow a person to combine these activities with the activities of a company defined in IITA § 1501(a)(8)(C)(ii) to qualify as a sales finance company, as discussed below.

For purposes of IITA § 1501(a)(8)(C)(i), the term "customer receivable" means one of the following four items:

- a retail installment contract or retail charge agreement under the Sales Finance Agency Act, the Retail Installment Sales Act, or the Motor Vehicle Retail Installment Sales Act

- an installment, charge, or similar contract or agreement from the sale of tangible personal property or services involving a deferred payment price payable in one or more installments

- the outstanding balance of a contract or agreement described in either of the previous bulleted items

- a loan, or its outstanding balance, made by a lender for the express purpose to fund purchases of tangible personal property or services by the borrower

The customer receivable does not have to require interest to be paid on the deferred payments. Further, the sales finance company can purchase the customer receivable or secure a loan with it from the original seller/lender or the purchaser of the receivable from the original seller/lender.

b) Sales Finance Company Definition – IITA § 1501(a)(8)(C)(ii)

IITA § 1501(a)(8)(C)(ii) describes a fifth type of company that qualifies as a sales finance company.

In order to qualify as a sales finance company under IITA § 1501(a)(8)(C)(ii), a corporation must meet ALL of the following requirements:

1. The corporation must be a member of an affiliated group.

The term "affiliated group" means the federal consolidated group, plus any corporation that would be a member of the federal consolidated group if not for IRC § 1504(b). IRC § 1504(b) excludes the following types of companies from a federal consolidated return:

- Exempt corporations under IRC § 501;
- Insurance companies subject to tax under IRC § 801;
- Foreign corporations;
- Corporations that have made an election under IRC § 936;
- Regulated investment companies and real estate investment trusts subject to tax under subchapter M of chapter 1 of the IRC; and
- Domestic International Sales Corporations (DISC).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Therefore, if any of the above entities meet the other requirements to be included in the federal consolidated return (i.e. stock ownership), IRC § 1504(b) will be ignored and they will be considered to be a member of the affiliated group for purposes of the sales finance company definition.

2. The corporation must receive more than 50% of its gross income as interest income from qualifying loans.

Loans must meet the following requirements to be considered “qualifying loans”:

A. The loan must be made to a member of the corporation’s affiliated group that:

- originates customer receivables, or
- to whom customer receivables originated by another member of the affiliated group have been transferred.

B. The outstanding balance of all loans made by the corporation to members of its affiliated group CANNOT exceed the average outstanding balances during the taxable year of customer receivables (as defined above for IITA § 1501(a)(8)(C)(i)) originated by all members of the affiliated group. This is commonly referred to as the “limitation amount”.

If the average outstanding balances of all loans made by the person to members of its affiliated group EXCEED the limitation amount described above, a portion of the interest income will be considered to be received from non-qualifying loans. The interest income from qualifying loans will be determined by multiplying the total interest income received on all loans to members of its affiliated group by a fraction, the numerator of which is the limitation amount and the denominator of which is the average outstanding balances of all loans made to members of the affiliated group.

Example #2
The parent corporation (P) has a subsidiary (S) that is attempting to qualify as a sales finance company under IITA § 1501(a)(8)(C)(ii). S received $400,000 of interest income from loans to members of the affiliated group. The average outstanding balances during the taxable year of customer receivables originated by all members of the affiliated group (the limitation amount) were $4,000,000. The average outstanding balances of all loans made to members of the affiliated group were $5,000,000. The interest income from qualifying loans is $320,000 ($400,000) X ($4,000,000/$5,000,000)).

3. The corporation must meet both of the following public funding requirements:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

A. The corporation's total shareholder's equity (including paid-in capital on common and preferred stock and retained earnings), plus the total of all of its loans, advances, and other obligations payable or owed to member(s) of its affiliated group is less than or equal to 20% of the corporation's total assets at any time during the year.

Example #3

The parent corporation (P) has a subsidiary (S) that is attempting to qualify as a sales finance company under IITA § 1501(a)(8)(C)(ii). The total stockholder's equity, loans from other members of the affiliated group, and total assets for S are $50 million, $250 million, and $2.0 billion respectively. The total of S's stockholder's equity and loans from other members of the affiliated group is only 15.0% of its total assets (($50 million + $250 million)/$2.0 billion). Since the stockholder's equity plus the loans from other members of the affiliated group divided by the total assets for S is less than 20%, it meets the public funding requirement of IITA § 1501(a)(8)(C)(ii)(c).

C. More than 50% of all of the interest-bearing obligations of the entire affiliated group payable to persons (i.e. an individual, trust, estate, partnership, association, firm, company, corporation, limited liability company, or fiduciary) outside of the affiliated group must be obligations of the corporation.

Example #4

The parent corporation (P) is a large retailing corporation. Sub #1 is attempting to qualify as a sales finance company under IITA § 1501(a)(8)(C)(ii). P's affiliated group has total interest bearing obligations to unrelated third parties of $1 billion. Further analysis of the interest bearing obligations of the affiliated group shows that P, Sub #1, Sub #2, and Sub #3 have interest bearing obligations of $275 million, $600 million, $75 million, and $50 million respectively. Sub #1 has 60% ($600 million/$1 billion) of the interest bearing obligations of the affiliated group. Since Sub #1 has more than 50% of the interest bearing obligations of the affiliated group, it meets the public funding requirement of IITA § 1501(a)(8)(C)(ii)(d). These calculations are summarized in the table below.

	P	Sub 1	Sub 2	Sub 3
Interest Bearing Securities	275,000,000	600,000,000	75,000,000	50,000,000
Total Interest Bearing Securities	1,000,000,000	1,000,000,000	1,000,000,000	1,000,000,000
Percentage	27.5	60	7.5	5

IITA § 1501(a)(8)(C)(ii) MAY allow captive companies that loan money to other members of its affiliated group BASED on customer receivable balances, but not actually SECURED BY the customer receivables, to qualify as sales finance companies. However, it would appear that the public funding requirements contained in IITA § 1501(a)(8)(C)(ii)(c) and (d) will be very difficult for most captive companies to meet.

See IAC § 100.9710(d)(10) for more information.

11. Investment Company

The business of an investment company comes within the meaning of 15 USC § 80a-3. An investment company is predominantly engaged in investing, reinvesting, and trading in securities. For purposes of the IITA, the following are the characteristics of an investment company:

- Raising capital from investors
- Purchasing capital securities of other entities

For purposes of applying the 80% gross income test, examples of income from characteristic services are the following:

- Interest
- Dividends
- Gains from sales of securities

See IAC § 100.9710(d)(11) for more information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

12. Bank Holding Company

An entity that qualifies as a “bank holding company” is considered a financial organization for Illinois apportionment purposes. Qualifying as a bank holding company is different than most of the other companies considered financial organizations, in that there is no 80%/50% gross income test. A “bank holding company” is an entity that, directly or indirectly, controls or has the power to vote 25% or more of any class of voting securities of any bank or any other bank holding company, and is registered with the Federal Reserve System under the Bank Holding Company Act of 1956 (12 USC § 1844(a)).

In other words, any company that has the 25% voting ownership of a bank or bank holding company and is registered with the Federal Reserve will be treated as a financial organization for apportionment purposes, and all of its subsidiaries will be treated as financial organizations under IAC § 100.9710(g), discussed in the next section.

On January 6, 1992, Sunshine Letter IT 92-02 was issued which stated that an institution (in this case a Credit Card bank) which is owned by a bank or bank holding company but which is not considered a "bank" under the Bank Holding Company Act of 1956 would not be considered a financial organization under IITA § 1508(a)(8). On June 29, 1992, Sunshine Letter IT 92-137 was issued which reversed that position.

See IAC § 100.9710(f) for more information.

13. Person Owned by Bank or Bank Holding Company

Another exception to the 80%/50% gross income test is for any entity owned by a bank or bank holding company. The definition of a financial organization which is contained in the IITA includes any person owned by a bank or bank holding company which the bank holding company is allowed to hold, directly or indirectly, under the provisions of the Bank Holding Company Act of 1956. An exception is made where the bank holding company must dispose of its interests in the person within certain required time limits set by the Bank Holding Company Act of 1956. Therefore, any entity which is PROPERLY held by a bank or bank holding company is a financial institution. The entity being held does not, in itself, have to qualify as a "bank" under the Bank Holding Company Act of 1956.

For example, an insurance company that is owned by a bank is considered a financial organization for apportionment purposes. The fact that the insurance company would be treated as an insurance company under IITA § 304(b) if it were not owned by the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

bank is irrelevant. For the period owned by the bank (or bank holding company), it is to be treated as a financial organization.

A “person” that a bank or bank holding company can own is a partnership. In that case, the partnership is treated as a financial organization for apportionment purposes, and if unitary, subject to the unitary partnership apportionment rules under IAC § 100.3380(d). For example, if a bank or bank holding company is a partner in a partnership that provides financial services that would normally apportion under IITA § 304(a), that partnership is deemed a financial organization for purposes of apportionment.

See IAC § 100.9710(g) for more information.

D. APPORTIONMENT FORMULA- TYE ON OR AFTER 12/31/08

All financial organizations are required to apportion their income under IITA § 304(c).

PA 95-233 and 95-707 added and modified paragraph (3), which provided a new apportionment formula for TYE on or after 12/31/08. Apportionment for financial organizations can be categorized as “TYE pre-12/31/08” and “TYE on/after 12/31/08”. Taxable years ending before 12/31/08 are governed under IITA § 304(c)(1), and guidance is provided in IAC § 100.3400. Many of those provisions rely upon cost-of-performance for allocating receipts. Taxable years ending on/after 12/31/08 are governed under IITA § 304(c)(3), which shifted emphasis to a marketplace approach for allocating receipts, and guidance is provided in IAC § 100.3405.

PA 100-22 in 2017 modified the unitary business group (UBG) definition in IITA § 1501(a)(27)(B). It repealed the noncombination rule and expanded the definition of “United States” to include the outer continental shelf (OCS) for taxable years ending on or after December 31, 2017. For applicable years going forward, auditors will include financial organizations in the same UBG as companies that apportion under IITA § 304(a), (b), etc. Basically, each apportionment subgroup (e.g. financial organizations) will determine their total sales under IITA § 304(a), and then determine their traditional factor (e.g. IITA § 304(c)) and multiply that percentage by the member’s total sales to calculate Illinois sales. A new schedule and instructions have been created to help calculate the factor in this situation: Subgroup Schedule (UB). Refer to this schedule and instructions under “Forms” on the Department’s website for more information. Click on the following link to take you to the current processing year’s corporate forms:

https://www2.illinois.gov/rev/forms/incometax/Pages/currentyear/business-corporate.aspx

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

IITA § 304(c)(3) states in part:

> For taxable years ending on or after December 31, 2008, the business income of a financial organization shall be apportioned to this State by multiplying such income by a fraction, the numerator of which is its gross receipts from sources in this State or otherwise attributable to this State's marketplace and the denominator of which is its gross receipts everywhere during the taxable year.

The following will provide a discussion of apportioning the different types of income listed under IITA § 304(c)(3) for TYE on/after 12/31/08, starting with the factor denominator and then numerator.

1. Application of IITA § 304(c)(3) - Denominator

The denominator of the apportionment formula SHOULD include ALL items of business income which are included in base income. The denominator of the apportionment formula should NOT include any item of income that was EXCLUDED from base income or that was SUBTRACTED in the computation of base income. Consequently, the following items should not be included in the apportionment formula:

- Dividends federally deducted through dividends received deduction under IRC § 243
- U.S. Government interest allowed as a subtraction modification by IITA § 203(b)(2)((J)
- Interest on loans made by the taxpayer to a borrower that are secured by property which is eligible for the Enterprise Zone Investment Credit (prior to 8/7/12) /River Edge Redevelopment Zone as allowed under IITA § 203(b)(2)(M)
- Interest on loans made by the taxpayer to a borrower that are secured by property which is eligible for the High Impact Business Investment Credit under IITA § 203(b)(2)(M-1)
- Dividends that qualify for the foreign source dividend subtraction under IITA § 203(b)(2)(O)
- Any items properly classified as nonbusiness income

In determining the amount of business income included in the numerator or the denominator of the apportionment formula, amounts of business income received during the tax year SHALL NOT be reduced by any expenses allocable to the business.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In determining the amount of a gain or loss to be included in the apportionment factor, you should take into account the basis in the property sold or otherwise disposed of. In other words, you should only include the net gain or loss in the apportionment factor. In no event shall a loss included in business income reduce the numerator or denominator of the apportionment factor below zero.

Further, when dealing with gains from investment and trading activities, only net gains (NOT net losses) are to be included in the receipts factor and determined for each transaction. This is different than pre-TYE 12/31/08 treatment, which allowed losses to reduce gains to zero. To illustrate, let's say stock A was traded for a net gain of $50,000, and stock B was traded for a net loss of $(100,000), both sourced to Illinois. In TYE 12/07, stock B would have been taken into account and offset the net gain of stock A to zero, so that $0 would have been in the factor. However, in TYE 12/08, the net loss of stock B is disregarded. Only the $50,000 net gain would be reported in the Illinois numerator and denominator.

2. Application of IITA § 304(c)(3) - Numerator

In calculating the numerator of the apportionment formula, each item of business income included in base income must be sourced based on the provisions of IITA § 304(c)(3). Income items included in the numerator are not to be reduced by related expenses. The auditor should identify each item of business income included in base income which is described in IITA § 304(c)(3)(i) through (viii). Those items should then be sourced to Illinois based on the rules, which are discussed below, applicable to IITA § 304(c)(3)(i) through (viii). All other items of business income included in base income will be sourced to Illinois under IAC § 100.3405(c)(9). Finally, the adjusted income of an International Banking Facility as described in IITA § 304(c)(2), if any, will be excluded from the Illinois numerator.

Some other items, such as "interest", are defined in IAC § 100.3400, and are applicable to apportionment for TYE on/after 12/31/08. See the section *Apportionment Formula – TYE BEFORE 12/31/08* for those definitions.

a) Definitions

"Fixed place of business" has the same meaning as in IRC § 864 and related Treasury regulations (IITA § 1501(a)(9.5)). This is further clarified regarding the Treasury regulations found under 26 CFR § 1.864-7(b) and (d), and these points can be summarized as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Generally, it will be a fixed facility through which the taxpayer engages in its trade or business. (See 26 CFR § 1.864-7(b)(1).)
- Merely using another person's place of business sporadically or infrequently does not qualify that place as the taxpayer's fixed place of business. (See 26 CFR § 1.864-7(b)(2).)
- An agent's fixed place of business is not a fixed place of business of the taxpayer unless the agent has the authority to negotiate and conclude contracts on behalf of the taxpayer, regularly exercises the authority, and is not an independent agent. (See 26 CFR § 1.864-7(d)(1)(i).)
- An independent agent's fixed place of business cannot be treated as the taxpayer's fixed place of business. (See 26 CFR § 1.864-7(d)(2).)
- For these purposes, an "independent agent" means a general commission agent, broker, or other agent of independent status acting in the ordinary course of his/her business. (See 26 CFR § 1.864-7(d)(3).)

See IAC § 100.3405(b)(1).

"Gross receipts" is defined in IITA § 304(c)(3) as "gross income, including net taxable gain on disposition of assets, including securities and money market instruments, when derived from transactions and activities in the regular course of the financial organization's trade or business." IAC § 100.3405(b)(2).

Unless a financial organization (taxpayer) has actual knowledge to the contrary, the "state of residence" and "commercial domicile" of a person (customer) are deemed to be the state in the person's billing address. IAC § 100.3405(b)(3).

Lastly, "substantive contacts" regarding an investment asset or trading activity means the research, approval, and administration activities involved with the investment or trading, conducted by the taxpayer's employees in its fixed place of business. IAC § 100.3405(b)(4).

See IAC § 100.3405(b) for more details.

b) <u>Lease and Rental Receipts</u>

Receipts from lease/rental of real or tangible personal property are sourced to Illinois if the property is located in Illinois during the rental period. If the property is characteristically moving property (e.g. vehicles, rolling stock, aircraft, vessels, mobile equipment), the receipts allocable to Illinois will be based upon the use in Illinois. A ratio should be calculated comparing the use/time in Illinois divided by the use/time everywhere.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #5

Taxpayer rented office space from a building it owns in the Chicago Loop. Since the real property is located in Illinois, the rental income is sourced to Illinois.

Example #6

Taxpayer received total lease income of $25,000,000 from leasing construction equipment, which is used 55% of the time in Illinois, and 45% in other neighboring states. That would result in $13,750,000 (.55 x $25,000,000) being sourced to Illinois.

See IAC § 100.3405(c)(1).

c) Receipts from Loans Secured by Real or Tangible Personal Property (TPP)

“Receipts” from these loans include interest income, commissions, fees, gains on disposition, and other related income.

Income received from loans secured by real property/TPP is sourced to Illinois if the security (real property/TPP) is located in Illinois. For TPP, the property is in this state if the debtor is an Illinois resident or has its commercial domicile in Illinois when the loan is made.

When a loan is secured by property located in and outside of Illinois, the receipts are allocated to Illinois based upon the ratio of property located in Illinois to property everywhere, as of the time the loan was made.

Example #7

Taxpayer made a commercial loan to an excavation corporation secured by the equipment purchased from the proceeds. The excavation corporation has its commercial domicile in Illinois. Thus, the security is deemed to be in Illinois and the interest income, fees, and other receipts from the commercial loan are sourced to Illinois.

See IAC § 100.3405(c)(2).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

d) Receipts from Consumer Loans NOT Secured by Real or Tangible Personal Property

"Receipts" from these loans include interest income, commissions, fees, gains on disposition, and other related income.

These receipts are sourced to Illinois if the debtor is an Illinois resident.

Example #8

Taxpayer is a small bank domiciled in Illinois, with branches in Illinois, Missouri, Kentucky, and Indiana. A Missouri resident is approved for a personal loan in an Illinois branch. The income associated with the personal loan would not be sourced to Illinois, since the debtor is not an Illinois resident.

See IAC § 100.3405(c)(3).

e) Receipts from Commercial Loans/Installment Obligations NOT Secured by Real or Tangible Personal Property

"Receipts" from these loans include interest income, commissions, fees, gains on disposition, and other related income.

These receipts are sourced to Illinois if the proceeds from the loan are to be applied in Illinois. If it cannot be determined where the proceeds are applied, then the receipts can be sourced to Illinois if the borrower's office from where the loan was negotiated is located in Illinois. If the location of this office cannot be determined, receipts should be EXCLUDED from both the numerator and denominator of the factor. This is the first throw-out provision for financial organizations apportioning under IITA § 304(c)(3). The second throw-out provision applies to performance of services.

Example #9

Taxpayer is a Midwest commercial bank, operating in Illinois and multiple states. Borrower is a partnership that conducts a multistate business, with its commercial domicile in Illinois and other offices throughout the Midwest. Borrower obtains a commercial loan from taxpayer, negotiated in Illinois, that is secured by funds in one of its business demand accounts. The proceeds are used to provide additional working capital, and used to aid in paying vendors in different regions. It is not possible to identify where the proceeds are specifically applied. Since the loan was

negotiated from an office in Illinois, taxpayer should source all income associated with the commercial loan to Illinois.

See IAC § 100.3405(c)(4).

f) Receipts from Credit Card Receivables

"Receipts" from the credit card receivables include interest income, fees, gains on disposition, service charges, merchant discount income, and other related income.

These receipts are sourced to Illinois if the card charges are regularly billed to a customer in Illinois.

Example #10

Taxpayer is a multistate bank and credit card company with Illinois nexus. Receipts from credit card receivables of $600,000,000 are earned from customers who are billed at Illinois addresses. The $600,000,000 should be sourced to Illinois.

See IAC § 100.3405(c)(5).

g) Receipts from the Performance of Services

"Receipts from the performance of services" include income from fiduciary, advisory, and brokerage services. The actual statutory language in IITA § 304(c)(3)(vi) says the following:

> (vi) Receipts from the performance of services, including, but not limited to, fiduciary, advisory, and brokerage services, are in this State if the services are received in this State within the meaning of subparagraph (a)(3)(C-5)(iv) of this Section.

Any service a financial organization performs can be sourced under this provision. While it explicitly lists "fiduciary, advisory, and brokerage services", it expressly does not limit the services to those three items. For example, a bank may receive fees for cashing checks. Check cashing fees would be a "performance of services" and sourced under IITA § 304(c)(3)(vi). Once, a bank under audit had provided its customers expedited tax return refunds subcontracted through a tax preparer for a fee, but argued that the fees could not be sourced under this provision because the fees did not fit under one of the illustrative examples of "fiduciary, advisory, or brokerage services." (and instead should be sourced like money orders). Audit took the position that the statute expressly does not limit "performance of services" to those three items. Certain fees for providing assisted tax preparation and expedited refunds were determined to be receipts for performing a service.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Receipts for performing services are sourced to Illinois if the services are "received in Illinois" as defined in IITA § 304(a)(3)(c-5)(iv). This means that financial services are sourced to Illinois in the same manner as the sale of services are for companies that apportion under IITA § 304(a).

Under IITA § 304(a)(3)(c-5)(iv), gross receipts from sales of services are generally assigned to the numerator and denominator of the Illinois sales factor if the services are received in Illinois. However, in the case of services provided to a corporation, partnership, or trust, gross receipts from services received in Illinois are not included in the numerator of the Illinois sales factor unless the corporation, partnership, or trust maintains a fixed place of business in Illinois. In addition, gross receipts from services received outside of Illinois may be deemed received in Illinois, and thus included in the numerator of the Illinois sales factor, if the recipient corporation, partnership, or trust does not maintain a fixed place of business in the state in which the services are actually received and either (i) the customer ordered the services in the regular course of business from its Illinois office, or (ii) if the ordering office cannot be determined, the services are billed to the customer's Illinois office. Finally, where a taxpayer is not taxable in the state in which the services are actually or deemed received, the associated gross receipts must be EXCLUDED from both the numerator and denominator of the Illinois sales factor. This is the second scenario in which financial organizations have a throw-out provision under IITA § 304(c)(3), by applying the throw-out rule for sales of services.

If services are performed for an individual and the subject matter of the service may not be identified as an item of tangible personal property, real property, or the individual's person, then the service is deemed to be received in the individual's state of residence. In such circumstances, if the services are provided to an Illinois resident, then the gross receipts would be assigned to Illinois. Unless the taxpayer has actual knowledge that the residence of an individual is different from the billing address of the individual at the time of the sale, the individual is deemed to be a resident of the state in which the billing address is located.

Example #11

Taxpayer is a Midwest regional bank that also provides financial advisory services to its customers. Customer is a small corporation headquartered in Illinois that received advisory services in the St. Louis, Missouri, branch of the bank. Customer does not have a fixed place of business in Missouri, and the charges for these services are billed in Illinois. The taxpayer should source the fees from advisory services to Illinois.

See IAC § 100.3405(c)(6).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

h) Receipts from Issuing Travelers Checks/Money Orders

"Receipts" from issuing these negotiable instruments would generally be the fees charged to customers for purchase.
The receipts are sourced to Illinois if the checks or money orders are issued from a location in Illinois.

Example #12

Taxpayer owns a multistate currency exchange business. All fees earned from money orders issued from Illinois stores should be sourced to Illinois.

See IAC § 100.3405(c)(7).

i) Receipts from Investment Assets/Activities and Trading Assets/Activities

The sourcing of receipts from investment and trading assets/activities is more detailed than the previous types of receipts. IITA § 304(c)(3)(viii) governs how these receipts are to be sourced, and IAC § 100.3405(c)(8) essentially restates the statute. The auditor should refer to these provisions. The following will just highlight a few points.

"Receipts" from investment and trading assets/activities include interest, net gains (not less than zero), and other related income. This means a net loss is disregarded for investment and trading and does not reduce net gains to zero. These assets/activities include investment securities, trading account assets, federal funds, securities purchased and sold under agreements to resell or repurchase, options, futures contracts, forward contracts, notional principal contracts such as swaps, equities, and foreign currency transactions.

The receipts can be divided into three groups:

- investment activities and assets
- interest from federal funds sold and purchased, securities purchased under resale agreements, and securities sold under repurchase agreements
- trading assets and activities

NOTE: In the tradition of the old financial organization apportionment statute (IITA § 304(c)(1)), the language in the new statute (IITA § 304(c)(3)) requires the computation of a fraction that is totally unnecessary. The old provision said that the business income apportioned to the state equaled the total items of business income from Illinois sources divided by total business income from all sources, which meant

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

that all the auditor really had to do was add up the Illinois sourced business income. The same thing is true here. All the auditor really needs to do is add up the gross income from assets assigned to Illinois. See Example 13 for further clarification.

Each group of these receipts is separately examined and assigned to Illinois by multiplying the total of each by a fraction, the numerator being receipts assignable to a fixed place of business in Illinois, and the denominator being the gross income from all such receipts (from each group).

An investment is assigned to the fixed place of business with which it has a "preponderance of substantive contacts". "Substantive contacts" are the research, approval, and administration activities involved with the investment or trading, conducted by the taxpayer's employees in its fixed place of business. Illinois *presumes* that the investment and trading is properly assigned if the following three things occur:

- *the taxpayer has assigned, in the regular course of its business, such asset or activity on its records to a fixed place of business consistent with federal or state regulatory requirements;* (IITA § 304(c)(3)(viii)(2)(D)(1))
- *such assignment on its records is based upon substantive contacts of the asset or activity to such fixed place of business;* and (IITA § 304(c)(3)(viii)(2)(D)(2))
- *the taxpayer uses such records reflecting assignment of such assets or activities for the filing of all state and local tax returns for which an assignment of such assets or activities to a fixed place of business is required.* (IITA § 304(c)(3)(viii)(2)(D)(3))

The Department can rebut with a preponderance of evidence the presumption of proper assignment by showing that the preponderance of substantive contacts did not occur at the fixed place of business where assigned by the taxpayer. If the presumption of proper assignment does not apply or has been rebutted, the asset or activity should be sourced to the state of commercial domicile. The commercial domicile is presumed to be the U. S. state or Washington D. C. where the greatest number of employees are regularly connected with the management of the investment or trading income or out of which they are working, regardless of where they perform their services, as of the last day of the taxable year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #13

Taxpayer is a large multistate investment bank that, among other activities, conducts investment and trading activities and respective assets. It has offices in major cities throughout the world, including Chicago, with its headquarters in New York City. Gross receipts from its trading assets and activities total $1 billion. None of those receipts have substantive contacts with Illinois. Gross receipts from its investment assets and activities total $550 million. Of that, $150 million in dividends and $200 million in interest have a preponderance of substantive contacts with the Chicago office.

This means that $350 million ($150 dividends and $200 interest) from the investment assets and activities should be sourced to Illinois and included in the numerator. None of the income from trading assets or activities would be sourced to Illinois, and $1.55 billion ($1 billion + $550 million) would be included in the denominator.

Note: No computation of fractions was necessary. Receipts that have a preponderance of substantive contacts with a fixed place of business in Illinois should be sourced to Illinois and included in the numerator, while the total gross receipts from all such activities would be included in the denominator.

j) All Other Receipts

All other receipts that are includable in apportionment factor denominator and do not fall under sections (b) through (i) above should be sourced to Illinois if they are considered "sales in this State" under the provisions of IITA § 304(a)(3) and IAC §§ 100.3370 and 100.3380. The "greater than 50% of gross receipts" requirement for income from certain intangibles under IITA § 304(a)(3)(B-2) is to be disregarded.

Example #14

Taxpayer is a multistate financial organization that operates as a large retail and commercial bank. Taxpayer offers many products and services to its retail customers, including different kinds of checking and money-market demand accounts. Certain fees, such as monthly service fees, returned item fees, overdraft fees, account research fees, and stop payment fees are common charges to account customers. Income from these fees would be sourced to Illinois according to IITA § 304(a)(3), specifically IITA § 304(a)(3)(c-5)(iv) for TYE on or after 12/31/08.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

E. APPORTIONMENT FORMULA - TYE BEFORE 12/31/08

For TYE prior to 12/31/08, financial organizations apportion business income and source receipts to Illinois by following IITA § 304(c)(1) and IAC § 100.3400. IITA § 304(c)(1) states, in part:

> In general. For taxable years ending before December 31, 2008, business income of a financial organization shall be apportioned to this State by multiplying such income by a fraction, the numerator of which is its business income from sources within this State, and the denominator of which is its business income from all sources.

The following will provide a discussion of apportionment and sourcing the different types of income listed under IITA § 304(c)(1) for TYE prior to 12/31/08, starting with the factor denominator and then numerator.

1. Application of IITA § 304(c) - Denominator

The denominator of the apportionment formula SHOULD include ALL items of business income which are included in base income. The denominator of the apportionment formula should NOT include any item of income that was EXCLUDED from base income or that was SUBTRACTED in the computation of base income. Consequently, the following items should not be included in the apportionment formula:

- Dividends federally deducted through dividends received deduction under IRC § 243

- U.S. Government interest allowed as a subtraction modification by IITA § 203(b)(2)((J)

- Interest on loans made by the taxpayer to a borrower that are secured by property which is eligible for the Enterprise Zone Investment Credit (prior to 8/7/12) /River Edge Redevelopment Zone as allowed under IITA § 203(b)(2)(M)

- Interest on loans made by the taxpayer to a borrower that are secured by property which is eligible for the High Impact Business Investment Credit under IITA § 203(b)(2)(M-1)

- Dividends that qualify for the foreign source dividend subtraction under IITA § 203(b)(2)(O)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Any items properly classified as nonbusiness income

In determining the amount of business income included in the numerator or the denominator of the apportionment formula, amounts of business income received during the tax year shall not be reduced by any expenses allocable to the business.

In determining the amount of a gain or loss to be included in the apportionment factor, you should take into account the basis in the property sold or otherwise disposed of. In other words, you should only include the net gain or loss in the apportionment factor. In no event shall a loss included in business income reduce the numerator of the apportionment factor below zero.

2. Application of IITA § 304(c) - Numerator

In calculating the numerator of the apportionment formula, each item of business income included in base income must be sourced based on the provisions of IITA §304(c)(1). Income items included in the numerator are not to be reduced by related expenses. The auditor should identify each item of business income included in base income which is described in IITA § 304(c)(1)(A) through (D). Those items should then be sourced to Illinois based on the rules, which are discussed below, applicable to IITA § 304(c)(1)(A) through (D). All other items of business income included in base income will be sourced to Illinois under IITA § 304(c)(1)(E). Finally, the adjusted income of an International Banking Facility as described in IITA § 304(c)(2), if any, will be excluded from the Illinois numerator.

a) Definitions

Until the adoption of IAC § 100.3400 on June 20, 2002, IITA § 304(c)(1) contained several terms that are NOT defined in the IITA or any relevant authority. The terms discussed below have been defined in IAC § 100.3400.

For federal income tax purposes, the United States Supreme Court has defined "interest" to mean "compensation for the use or forbearance of money." (*Deputy v. du Pont*, 308 U.S. 488, 498 (1940)). Pursuant to IITA § 102, this definition of the term "interest" for purposes of the IRC also applies to the term "interest" as used in the IITA. (REF: Sunshine Letter 98-0007-PLR).

- Interest includes the amortization of any discount at which an obligation is purchased and is net of the amortization of any premium at which an obligation is purchased.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Interest includes any amount received upon the sale, exchange or other disposition of an obligation to the extent that such amount represents the accrual of interest on the unpaid balance of the obligation since the most recent payment made on that obligation.

- Interest does not include late payment penalties that are in addition to interest expressly charged on any past-due balance or that are computed without regard to the amount of the past-due balance or the length of time a payment is late.

"Gross profits from trading in stocks, bonds, or other securities" of a financial organization means the net gain or net loss realized on the sale, exchange or other disposition of a security other than a security representing an interest in or obligation of that financial organization (i.e. the financial organization's common stock or a debt obligation of the financial organization itself). In addition, "gross profits from trading in stocks, bonds, or other securities" also includes any net gain or loss realized on the sale, exchange or other disposition of a financial organization's interest in a loan or other indebtedness of a customer of the financial organization payable to the financial organization. "Gross profits from trading in stocks, bonds or other securities" does NOT include any amount that is properly characterized as a fee or commission earned by the financial organization or any dividends or interest earned by the financial organization.

"Dividend" means any item defined as a dividend under 26 USC § 316 (IRC § 316) and includes any other item of income characterized or treated as a dividend under the Internal Revenue Code.

"Margin account" means any extension of credit made by a financial organization for the purchase or carrying of securities by the borrower, within the meaning of 15 USC § 78g.

"Stocks, bonds or other securities" means any share of stock in any corporation, certificate of stock, or interest in any corporation, note, bond, debenture, or other evidence of indebtedness, or any evidence of an interest in or right to subscribe to or purchase any of the foregoing within the meaning of 26 USC § 1236(c).

"Fees, commissions or other compensation for financial services" means all items of income, other than interest, dividends and gross profit from trading in stocks, bonds or other securities, paid to a financial organization by its customers for the provision of those services characteristic of financial organizations, as defined in IAC § 100.9710. This includes the following:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- late payment fees or penalties to the extent not properly classified as interest

- penalties for early withdrawal of deposits or early repayment of debt

- loan origination fees, charges for credit investigations, filing fees, etc. to the extent they are not properly characterized as interest

The term "customer" will include a person for whom a financial organization provides financial services directly or through an agent or other fiduciary of the financial organization. Some examples of this definition are shown below:

- A bank participates in a syndicated loan. The borrower is a customer of the bank if the bank is a named party to the original transaction for whom the lead bank is acting as an agent. If a bank purchases a participation in an existing loan, the borrower is not a customer of the bank because the bank is not providing a financial service to the borrower.

- When a financial organization finances the accounts receivable of a business, the obligor on the account is a customer of the financial organization only if the financial organization purchases the receivable, thus creating a direct relationship between itself and the obligor.

  - If a financial organization makes a loan to a company secured by the company's customer receivables, the company is the customer of that financial organization but the company's customers are not customers of the financial organization because the loan is a financial service provided to the company rather than to the company's customers.

  - If a financial organization purchases a customer account receivable from a company, the company's customer thereby becomes a customer of the financial organization.

The term “Illinois customer” has the following meaning:

- A customer who is an Illinois resident individual, trust, or estate; or

- A customer other than an individual, trust or estate whose commercial domicile is in Illinois.

Unless a financial organization has actual knowledge that the residence or commercial domicile of a customer during a taxable year is in a state other than the state in which the customer’s billing address is located, the customer shall be deemed to be an

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Illinois customer if the billing address of the customer, as shown in the records of the financial organization relating to the interest income being sourced, is located in Illinois and shall be deemed not to be an Illinois customer if that billing address is located outside Illinois.

See IAC § 100.3400(b) for more details.

b) Fees, Commissions or Other Compensation for Financial Services

The Illinois numerator of a financial organization includes fees, commissions, or other compensation treated as business income and included in base income from financial services rendered within Illinois

In order for fees, commissions or other compensation received by a financial organization to be included in the Illinois numerator of the apportionment formula, the financial services MUST have been rendered in Illinois. Financial services are rendered in Illinois if:

- The income-producing activity is performed in Illinois; or
- The income-producing activity is performed both within and without Illinois and a greater proportion of the income-producing activity is performed within Illinois than without Illinois, based on performance costs.

If the performance costs of two or more income-producing activities cannot readily be allocated among those activities, the gross income resulting from those activities shall be combined and sourced to Illinois using the combined performance costs for all those activities.

Example #15

A bank received $250,000 in gross receipts from late payment fees, penalties for early withdrawal of deposits, and loan origination fees. All of the financial services relating to these gross receipts were performed in Illinois.

The gross receipts of $250,000 from these items should be included in both the numerator and denominator of the apportionment formula.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

c) Gross Profits from Trading

The Illinois numerator of a financial organization includes gross profits from trading stocks, bonds or other securities treated as business income and included in base income which are managed within Illinois.

Gross profits from trading in stocks, bonds, or other securities means the net gain (loss) realized on the sale, exchange, or other disposition of a security. It would also include any gain (loss) realized on the sale, exchange, or other disposition of a financial organization's interest in a loan or other indebtedness of a customer of the financial organization payable to the financial organization. Losses are only included, however, to the extent that they offset gains from trading.

Gross profits from trading in stocks, bonds, or other securities do not include dividends and interest which are sourced under different subsections of IITA § 304(c)(1). It also does not include a security representing an interest in or obligation of the financial obligation such as a gain (loss) realized from purchasing a bond previously issued by the financial organization.

The trading of stocks, bonds, or other securities is managed within Illinois if:

- The income-producing activity is performed in Illinois; or
- The income-producing activity is performed both within and without Illinois and a greater proportion of the income-producing activity is performed within Illinois than without Illinois, based on performance costs.

If the performance costs of two or more income-producing activities cannot readily be allocated among those activities, the gross income resulting from those activities shall be combined and sourced to Illinois using the combined performance costs for all those activities.

The costs associated with the acquisition, ownership, and disposition of a security would include a portion of the salaries and related expense of the employee(s) who make the decisions to acquire or dispose of the securities, recordkeeping and other clerical costs, the costs of supervision of employees involved in these functions, and any other indirect costs properly allocable to these functions.

Example #16

A financial organization had gross receipts of $100,000 from the sale of common stock. The taxpayer's basis in the common stock was $75,000 so it reported a capital

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

gain of $25,000 on its federal Form 1120 return. All of the costs associated with the acquisition, ownership, and disposition of the common stock were in Illinois.

The gross profit of $25,000 should be included in both the numerator and denominator of the apportionment formula.

d) Dividends and Interest

IAC § 100.3400(c)(3) contains the rules for sourcing all dividends included in business income of a financial organization and all interest (other than interest on margin accounts) received by a financial organization.

The Illinois denominator of a financial organization will include all dividends included in business income of a financial organization and all interest income (other than interest on margin accounts) received by a financial organization.

The Illinois numerator of a financial organization will include dividends, and interest from Illinois customers, which are received in this state, treated as business income, and included in base income. Interest will never be sourced to Illinois unless it is received from an Illinois customer.

Interest from an Illinois customer or dividends are "received in this state" if the payment comes within the control of the financial organization or of an agent or other fiduciary of the financial organization at a location within Illinois. One is said to act in a "fiduciary capacity", when the business which he transacts, or the money or property which he handles, is not his own or for his own benefit, but for the benefit of another person, as to whom he stands in a relation implying and necessitating great confidence and trust on the one part and a high degree of good faith on the other part.

If payment of an item of interest income that has been accrued and included in base income for a tax year is not received prior to the date the return for that tax year is filed, the financial organization shall treat the payment as received at the location to which the borrower is directed to send the payment or, if no single location is specified, at the location at which the financial organization reasonably expects to receive the interest.

A payment will be considered "received in this State" if the payment is sent to a lockbox located in Illinois or the electronic funds transfer from the customer is directed to a bank located in Illinois. (REF: Sunshine Letter 98-0007- PLR).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For example, a financial organization headquartered in Illinois instructs its customers to mail all payments to a lock box located in St. Louis. Since the checks came within the control of the financial organization's agent when they were received at the lock box in St. Louis, they are considered to be received outside of Illinois. Whether the lock box is serviced by the financial organization’s own employees or by a company acting as agent for the financial organization is irrelevant, because receipt by either an employee or an agent of the financial organization will give it control. The checks would be considered as received outside of Illinois even if they were subsequently deposited at a bank located in Illinois.

An electronic funds transfer is received by a financial organization at the location of the bank carrying the account of the financial organization into which the funds are deposited. The following examples will illustrate where an electronic funds transfer will be considered to be received for purposes of IITA § 304(c)(1)(C):

- A bank with branches in Illinois and Missouri maintains a Federal Reserve Bank account at the Federal Reserve Bank of St. Louis. Any electronic funds transfer deposited into the bank's Federal Reserve Bank account at the Federal Reserve Bank of St. Louis will be received OUTSIDE of Illinois.

- A financial organization maintains an account at the Illinois branch of a bank with branches in both Illinois and Missouri. The financial organization's bank maintains a Federal Reserve Bank account at the Federal Reserve Bank of St. Louis. If the bank receives a payment on behalf of the financial organization and subsequently credits the payment to the financial organization's account in Illinois, the payment will be considered to be received IN Illinois. The payment is not within the control of the financial organization until such time as it is deposited into the financial organization's account. The deposit of funds into the account of the bank at the Federal Reserve Bank does not place the funds within the control of the financial organization because the bank, merely by participating in the electronic transfer, is not acting as collection agent for the financial organization.

Investment interest received by a financial organization will be included in the denominator of the apportionment formula but will never be included in the numerator of the apportionment formula because it is not received from an Illinois customer.

Example #17

An Illinois bank has an investment committee that makes all of its investment decisions. After the committee reaches an investment decision, the securities are purchased and/or sold at the bank's brokerage firm located in New York. The

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

dividends earned on the investments are credited to the bank's brokerage account in New York.

The dividends are received OUTSIDE of Illinois and to the extent they are treated as business income and included in base income will ONLY be included in the denominator of the apportionment formula.

Example #18

A unitary group of banks solicits, originates, and closes mortgage loans, commercial loans and installment loans inside and outside of Illinois. The loans are made to Illinois and non-Illinois customers. In 1992, the banks set up a centralized loan processing center in St. Louis, Missouri. All aspects of servicing the loans such as cash collections, management of escrow accounts, monitoring past due accounts, loan documentation, and posting to books and records are performed in St. Louis. The banks' remittance instructions to the loan customers indicate that payments are to be mailed to the centralized processing facility in St. Louis; however, a few payments are received and accepted at one of the banks' Illinois facilities and then forwarded to the centralized processing facility in St. Louis. All of the checks are deposited at a bank facility located in Missouri and credited to the respective affiliate's bank account held at the Missouri bank.

All of the interest which is received at the centralized processing facility in St. Louis, treated as business income, and included in base income will be included ONLY in the denominator of the apportionment factor because it is RECEIVED outside of Illinois. All of the interest received at one of the bank's Illinois facilities from Illinois customers, treated as business income, and included in base income WILL BE included in the Illinois numerator of the apportionment formula.

Example #19

A financial organization received dividends of $100,000 on some common stock. The financial organization reported the dividends of $100,000 and claimed a dividend exclusion of $70,000 on its federal Form 1120. The dividends were received in Illinois.

The $30,000 of gross receipts included in Illinois base income will be included in the denominator of the apportionment formula.

Example #20

A financial organization received $50,000 of interest on loans that were made to a taxpayer who has successfully claimed the Investment Credit for qualified property

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

placed in service in an Enterprise Zone (IITA § 201(f)). The loans were secured by property relative to which the IITA § 201(f) Investment Credit was claimed. On its Form IL-1120, the taxpayer claimed a subtraction modification under IITA § 203(b)(2)(M) for $50,000.

Since none of the interest is included in Illinois base income, none of the interest income will be included in either the numerator or denominator of the apportionment factor.

Example #21

A financial organization reported $200,000 of municipal interest on Line 7 of federal Schedule M-1. Further analysis showed that this consisted of $210,000 of gross receipts from municipal interest and $10,000 of amortized premium. On its Form IL-1120, the taxpayer reported an addition modification of $210,000 for municipal interest and an "other" subtraction modification of $10,000 for amortized premium. The municipal interest was received in Illinois.

The financial organization should include $200,000 in the denominator. The $200,000 of municipal interest would be investment interest and would never be included in the Illinois numerator.

The *Continental* case (*Continental Illinois National Bank and Trust Co. of Chicago v. Lenckos*, 102 Ill. 2d 210 (1984)), supports the Department's position that only $200,000 should be included in the denominator of the apportionment factor. In reaching its decision, the *Continental* Court cited another case which stated that, "In presenting its 1942 tax proposals, however, the Treasury adopted the view that each receipt of interest is not entirely income but is partially a restoration of capital."

Based on this reasoning, although Illinois treats the amortization as a deduction and the federal tax return treats it as a deduction, it is actually an adjustment to the total amount of income received to reflect only interest in the tax base. Therefore, the gross amount of interest received should be reduced by the amount of the amortized premium and only the net amount included in the apportionment factor.

Example #22

A financial organization has gross receipts from U.S. Government interest of $520,000. The taxpayer had amortized premium of $20,000 and reported a subtraction modification for U.S. Government interest of $500,000 on its Form IL-1120. The U.S. Government interest was received in Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Since U.S. Government interest is not included in Illinois base income, the taxpayer should not include any receipts from U.S. Government interest in the apportionment formula (REF: *Continental Illinois National Bank and Trust Co. of Chicago v. Lenckos*, 102 Ill. 2d 210 (1984)).

Example #23

A bank is commercially domiciled in Peoria, Illinois. The bank has no locations outside of Peoria, Illinois. Its investment portfolio is managed by an investment committee consisting of officers and directors of the bank. The bank has received interest of $10,000,000 from its investment portfolio. All of the interest was received in Illinois and is included in Illinois base income. The bank would include $10,000,000 in the denominator of the apportionment formula and $0 in the numerator of the apportionment formula.

Example #24

A financial organization with its corporate headquarters in San Francisco, California, received interest income from obligations issued by the Federal National Mortgage Association of $305,000. The taxpayer had amortized premium of $5,000 relating to these obligations. The interest income from these obligations was received at a branch office in Illinois.

Based on the *Continental* decision, the gross amount of the interest received should be reduced by the amount of the amortized premium and only the net amount included in the apportionment formula. Therefore, the taxpayer should include $300,000 in the denominator and $0 in the numerator of the apportionment formula.

Example #25

A financial organization located in Springfield, Illinois, loans money to a corporation commercially domiciled in Missouri to build a plant in Springfield, Illinois. The financial organization receives $100,000 of interest at its location in Springfield, Illinois from the corporation. The financial organization should include $100,000 in the denominator of the apportionment formula and $0 in the numerator of the apportionment formula. Since its commercial domicile is located in Missouri, the corporation is NOT an Illinois customer.

Example #26

A credit card bank purchases its cardholders' balances from a retailer pursuant to an agreement under which the retailer services the accounts. Payments are received by

the credit card bank at the location where the retailer receives the payments on its behalf, not at the location to which the retailer forwards the payments.

Example #27

A bank makes a loan to an Illinois customer secured by the customer's accounts receivable. Pursuant to the loan agreement, the bank's customer directs its customers to send their payments to the bank, which deposits the payments in an account at its Chicago branch in the name of the customer, from which the bank may withdraw loan payments to itself. The funds in the customer's account are not within the control of the bank. Payments withdrawn by the bank from the account at the Chicago branch pursuant to the agreement are received in Illinois regardless of where the payments from the customers are received by the bank. However, if the customer pays the bank by check drawn on the account at the Chicago branch, payment is received by the bank in the state in which it receives the check.

Example #28

A financial organization acts as a primary dealer in U.S. Government securities and as an underwriter and dealer in U.S. Government agency securities. Due to the nature of the taxpayer's business (i.e. the taxpayer enters into a large number of arbitrage transactions to neutralize the effect of interest rate fluctuations), the taxpayer's transactions generate large amounts of interest income and corresponding interest expense. An examination of the taxpayer's books and records showed the following information:

- The taxpayer received interest income of $5,000,000 and had corresponding interest expense of $4,975,000 from U.S. Government securities.

- The taxpayer received interest income of $4,000,000 and had corresponding interest expense of $3,985,000 from U.S. Government Agency securities that do not qualify for a subtraction modification on the taxpayer's Form IL- 1120.

- The taxpayer had gross receipts from the sale of both U.S. Government and U.S. Government Agency securities to third party customers totaling $700,000,000. The taxpayer's adjusted basis in these securities was $697,000,000 so it reported a capital gain of $3,000,000 on its federal Form 1120.

- All of the costs associated with the acquisition, ownership, and disposition of these securities is in Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The interest from these securities was received in Illinois.

Since none of the gross receipts from the interest on U.S. Government securities are included in Illinois base income, none of these receipts should be included in the apportionment formula. The taxpayer should include the $4,000,000 of interest income from U.S. Government Agencies and the $3,000,000 capital gain in the denominator of the apportionment factor. The taxpayer should include only the $3,000,000 capital gain in the numerator of the apportionment factor.

e) Interest on Margin Accounts

The Illinois numerator of a financial organization will include interest charged to customers at places of business maintained within this state for carrying debit balances of margin accounts, without deduction of any costs incurred in carrying such accounts. The interest must be treated as business income and included in base income to be included in the apportionment factor.

Interest earned on a margin account by a financial organization is sourced to Illinois if the financial organization's place of business through which the borrower ordinarily conducts business with the financial organization is located in Illinois.

Example #29

A financial organization earns interest of $10,000 for carrying a debit balance on a margin account. The margin account was maintained at a place of business in Illinois.

The financial organization should include $10,000 in both the numerator and denominator of the apportionment formula. The entire $10,000 will be included in the factor without any deduction for costs incurred in carrying such accounts.

f) Any Other Gross Income from Operations

The Illinois numerator of a financial organization includes any other gross income treated as business income and included in base income resulting from the operation as a financial organization within this state. This subsection will apply to all items of business income included in base income that are NOT sourced under IITA § 304(c)(1)(A) through 304(c)(1)(D). In order for any other gross income received by a financial organization to be included in the Illinois numerator of the apportionment formula, the costs of performance of the operations producing such income MUST be incurred in Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Gross income that results from the operation of a taxpayer as a financial organization "within this State" is allocable to Illinois if:

- The income-producing activity is performed in Illinois; or
- The income-producing activity is performed both within and without Illinois and a greater proportion of the income-producing activity is performed within Illinois than without Illinois, based on performance costs.

If the performance costs of two or more income-producing activities cannot readily be allocated among those activities, the gross income resulting from those activities shall be combined and sourced to Illinois using the combined performance costs for all those activities.

Example #30

A bank owns a subsidiary that writes credit life insurance. The subsidiary is properly owned under the Bank Holding Company Act of 1956 and qualifies as a financial organization under IITA § 1501(a)(8). The subsidiary received $1,000,000 of gross receipts from writing credit life insurance. The costs of performance of the operations producing this income were within Illinois.

The bank should include $1,000,000 in both the numerator and denominator of the apportionment formula.

Example #31

The taxpayer has a net gain of $5,000 on the sale of office equipment previously used in its business at its branch office in St. Louis, Missouri. The taxpayer's corporate headquarters is in Illinois. The gross receipts from the sale of the office equipment were $100,000.

The taxpayer should include $100,000 in the denominator of the apportionment factor.

F. SUBTRACTION MODIFICATIONS UNIQUE TO FINANCIAL ORGANIZATIONS

Generally, the same addition and subtraction modifications that apply to other companies apply to financial organizations. See Audit Manual Chapters 24 and 25 for further information on base income modifications. There are three subtraction modifications that

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

are unique to financial organizations, which will be discussed in this section. They are the following:

- Subtraction Modification for Enterprise Zone and River Edge Redevelopment Zone Interest
- Subtraction Modification for High Impact Business Interest
- Subtraction Modification for Federally Disallowed Deductions

A few comments are also included about the repeal of the noncombination rule for taxable years on or after December 31, 2017, and its impact on financial organizations and the related-party transaction modifications.

1. Enterprise Zone and River Edge Redevelopment Zone Interest

In general, IITA § 203(b)(2)(M) allows taxpayers who are financial organizations to subtract the interest income received from loans that are secured by property that qualifies for the enterprise zone investment or river edge redevelopment zone investment credits under IITA § 201(f). The interest income must have been included in its federal taxable income. Public Act 97-905 amended IITA § 203(b)(2)(M) by eliminating references to enterprise zones effective August 7, 2012. The subtraction will continue to apply to interest from qualified investments in river edge redevelopment zones.

It is necessary to determine whether the property securing the loan is "eligible property", the portion of the loan that is secured by eligible property, and the basis of the eligible property.

For information on how to calculate the subtraction modification and examples, refer to IAC § 100.2655.

Example #32

Taxpayer A is a commercial bank that loaned $1,000,000 to Borrower B. The loan is secured by eligible property under IITA § 201(f) with a basis of $1,300,000 when put into service. Taxpayer A received $80,000 in interest income during TYE 12/10 regarding the loan to Borrower B. Taxpayer A would be allowed a subtraction modification for the full $80,000 under IITA § 203(b)(2)(M).

2. High Impact Business Interest

In general, IITA § 203(b)(2)(M-1) allows taxpayers who are financial organizations to subtract the interest income received from loans that are secured by property that

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

qualifies for the High Impact Business Investment Credit under IITA § 201(h). The taxpayer cannot claim this subtraction modification if it is also eligible to subtract the interest under IITA § 203(b)(2)(M). The interest income must have been included in its federal taxable income. It is necessary to determine whether the property securing the loan is "eligible property", the portion of the loan that is secured by eligible property, and the basis of the eligible property.

For information on how to calculate the subtraction modification and examples, refer to IAC § 100.2657.

Example #33

Taxpayer A is a commercial bank that loaned $1,000,000 to Borrower B. The loan is secured by eligible property under IITA § 201(h) with a basis of $800,000 when put into service, and $500,000 of ineligible property. Taxpayer A received $80,000 in interest income during TYE 12/13 regarding the loan to Borrower B. Taxpayer A would be allowed a subtraction modification of $64,000 under IITA § 203(b)(2)(M-1). That amount is based upon calculating the portion of the loan secured by eligible property, and then multiplying that ratio times the interest income related to the loan secured by the eligible property. The ratio would be $800,000/$1,000,000, or simply .8. That ratio times the interest income from the related loan equals the subtraction modification of $64,000 (.8 x $80,000).

3. Expense Deductions Disallowed Federally

Taxpayers are allowed to take a subtraction modification for certain expenses that are disallowed as deductions federally. This is authorized in IITA § 203(b)(2)(I), and our regulations provide further detail in IAC § 100.2455.

Two of these subtractions are related specifically to financial organizations. The IRC disallows interest expense deductions that are related to carrying tax-exempt obligations, and created special rules for "financial institutions". These rules fall under IRC §§ 291(a)(3), (e)(1)(B), and 265(b); "financial institutions" are persons whose business involves accepting deposits from the public and are subject to state or federal regulations as a financial institution. Essentially, such companies would be banks and treated as financial organizations for Illinois purposes.

The following excerpt from an IRS TAM # 200434029 (TAM-154001-03) issued on March 26, 2004, provides a good explanation of the IRC provisions:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Section 291(a)(3) reduces by 20 percent the amount allowable as a deduction with respect to any “financial institution preference item.” Pursuant to § 291(e)(1)(B), a financial institution preference item is the portion of a financial institution’s interest expense that is allocable to tax-exempt obligations acquired after December 31, 1982, and before August 8, 1986. This portion is the amount that bears the same ratio to the taxpayer’s interest expense as the taxpayer’s average adjusted bases of these tax-exempt obligations bears to the taxpayer’s average adjusted bases of all its assets. Section 291(e)(1)(B) applies to any financial institution that is a bank as defined in § 585(a)(2).

Section 265(b)(1) disallows entirely the portion of a financial institution’s interest expense that is allocable to tax-exempt interest. Pursuant to § 265(b)(2), this portion is the amount that bears the same ratio to the taxpayer’s interest expense as the taxpayer’s average adjusted bases of tax-exempt obligations acquired after August 7, 1986, bears to the taxpayer’s average adjusted bases of all its assets. Section 265(b)(5) defines the term “financial institution” to mean any person that (a) accepts deposits from the public in the ordinary course of that person’s trade or business and is subject to federal or state supervision as a financial institution, or (b) is a corporation described in § 585(a)(2).

Section 265(b)(3) provides a special rule for “qualified tax-exempt obligations,” as defined in § 265(b)(3)(B). Any qualified tax-exempt obligation that is acquired after August 7, 1986, is treated for purposes of §§ 265(b)(2) and 291(e)(1)(B) as if it were acquired on August 7, 1986. Thus, qualified tax-exempt obligations result in the disallowance of interest expense deductions under § 291(a)(3) and (e)(1)(B), rather than § 265(b).

Legislative purpose of § 291(a)(3) and (e)(1)(B) and § 265(b)

Congress enacted § 291(a)(3) and (e)(1)(B) in 1982 and § 265(b) in 1986. Before the enactment of these sections, a financial institution’s investment in tax-exempt obligations generally did not result in any disallowance of interest expense deductions. Although § 265(a)(2) (formerly § 265(2)) disallows deductions for interest on indebtedness incurred to purchase or carry tax-exempt obligations, this section requires evidence of a direct connection between the borrowing and the tax-exempt investment. In effect, this requirement virtually exempts financial institutions from disallowance of interest deductions under § 265(a)(2).

To correct this problem, Congress first enacted § 291(a)(3) and (e)(1)(B), which restricts the interest expense deductions of financial institutions without requiring evidence of connection between borrowing and tax-exempt investment. Unlike

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

> § 265(a)(2), § 291(a)(3) and (e)(1)(B) applies to all of a financial institution's otherwise deductible interest expense and provides for a pro rata disallowance of interest expense deductions on the basis of the institution's holdings in tax-exempt obligations. Section 265(b) strengthens the disallowance rule of § 291(a)(3) and (e)(1)(B) by increasing from 20 percent to 100 percent the disallowance of interest expense deductions allocable to tax-exempt obligations acquired after August 7, 1986. The purpose and structure of § 265(b) are essentially the same as those of § 291(a)(3) and (e)(1)(B), and § 265(b) applies to any financial institution to which § 291(a)(3) and (e)(1)(B) applies.

A bank whose federal income tax deduction for interest expense has been limited under either provision is allowed to subtract the disallowed interest expense on the Illinois return, as stated in IAC §100.2455(c) & (e). The taxpayer should be expected to provide adequate documentation of the federally disallowed items to support the amount of the Illinois subtraction modification.

4. Related-Party Transactions for Noncombination Companies for Taxable Years Ending on or after December 31, 2017

Due to changes from PA 100-22, effective July 6, 2017, the noncombination rule found in IITA § 1501(a)(27)(B) does not apply for taxable years ending on or after 12/31/17. This means the related-party transaction modifications no longer apply to noncombination companies for taxable years ending on or after 12/31/17. For corporations, these modifications are found under IITA § 203(b)(2)(E-12), (E-13), and E-14) and the reversal subtraction modifications under IITA § 203(b)(2)(V), (W), (X), and (Y).

Starting with tax years ending on or after December 31, 2008 PA 95-233 and PA 95-707 expanded the use of Schedule 80/20 to require addition modifications for interest expenses, intangible expenses and insurance premium expenses paid to a person who would have been a member of a unitary business group but for the noncombination rule in IITA § 1501(a)(27). In addition, the public acts eliminated the previous requirement that the affiliate be an 80/20 company.

The noncombination related-party modifications can apply to companies with captive financial organizations for taxable years ending on or after 12/31/08 and before 12/31/17. The Illinois Schedule 80/20 was amended starting in 2008 along with IAC § 100.2430. For TYE on or after 12/31/17, the modifications are no longer necessary, because companies that apportion under different subsections of IITA § 304 can be part of the same UBG. Any related-party transactions are subject to federal consolidation and intercompany elimination rules. In other words, Illinois no longer needs to correct

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

for tax distortions that occur when unitary companies are part of separate UBGs. The 2017 Illinois Schedule 80/20 reflects these changes, as only 80/20 companies are allowed the modifications and noncombination companies are not included on the form.

To illustrate these changes, let us consider a related-party transaction regarding a captive sales finance company in TYE 12/31/14 versus TYE 12/31/17:

Example #34

In TYE 12/31/14, a unitary group composed of manufacturers (“M”) pays $10 million in interest to one of its unitary subsidiaries located in Wisconsin (“SFC”) that qualifies as a sales finance company under IITA § 1501(a)(8)(C)(i) and apportions its income under IITA § 304(c). SFC is excluded from M’s Illinois UBG under the noncombination rule. M pays SFC interest for loans to purchase tangible business property, which reduces M’s federal taxable income. M is subject to an addition modification under IITA § 203(b)(2)(E-12) and will report the $10 million in interest payments on its Schedule 80/20. If SFC is an Illinois filer, it will be allowed to report a subtraction modification of $10 million under IITA § 203(b)(2)(V).

Example #35

Same facts as previous Example #34, except M pays SFC $10 million in interest payments during TYE 12/31/17. Since the noncombination rule no longer applies, M and SFC will be part of the same UBG and the noncombination modifications for the $10 million of interest no longer apply. The $10 million intercompany interest transactions will be eliminated for federal and Illinois purposes, having a zero tax effect for federal taxable income and Illinois base income. For more information on the related-party transaction modifications, see Audit Manual Chapters 24 and 25.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. PURPOSE

Illinois statutes require an insurance company to apportion its business income by using the special apportionment formula described in IITA § 304(b).

An audit of an insurance company requires some specialized auditing skills. The federal income tax returns filed by insurance companies are among the most complex federal income tax returns filed. The information provided in this Chapter should assist the auditor in auditing an insurance company and reduce the time required to acquire the specialized knowledge needed to audit an insurance company.

This Chapter contains the following:

- a definition of an insurance company;
- a description of the two basic types of ownership for an insurance company;
- a description of the types of federal returns that are filed by insurance companies;
- a description of the various categories of insurance companies, such as casualty, life, reinsurance, mutual, surplus line company, captive insurance company, health maintenance organizations, and risk retention groups;
- discussions of the Life and Health Insurance Guarantee Association income tax offsets,
- deductions claimed under IRC § 847, IRC § 1503(c) limitations;
- nonbusiness income for insurance companies, holding companies of insurance companies;
- the Annual Statements filed by insurance companies; and
- two insurance company questionnaires.

II. REFERENCE SOURCES

The following is a general list of sources regarding insurance companies. Other and more specific references are made throughout the Chapter. This list is by no means exhaustive:

- IITA § 304(b)
- IAC § 100.3420
- IRC § 801 through 848
- 2008 Official NAIC Annual Statement Blank – Life
- 2008 Official NAIC Annual Statement Blank – Property and Casualty
- IRS Audit Technique Guide, Excise Tax- Foreign Insurance
- Schedule UB/INS

III. GENERAL INFORMATION

Insurance companies are in the business of making legal and enforceable contracts between one party (the insurer or underwriter) and another (the insured). In exchange for receiving a premium from the insured, the insurer agrees to pay a predetermined amount of money to the insured if and when the insured suffers a loss described in the insurance contract (the insurance policy).

The examination of an insurance company differs from other types of taxpayers. Taxable income is not controlled entirely by gross receipts and expenditures. The taxable income of an insurance company depends upon the total of investment and underwriting income. A life insurance company's taxable income may include distributions from the policyholders' surplus account. The computations of these amounts are somewhat complex.

Unlike examinations of manufacturing and commercial type corporations, almost all of the verification and reconciliation of income and expense items of insurance companies can be made with the use of the Annual Statement. These financial statements are verified and audited by the insurance commission examiners of the states in which the insurance company does business. The Annual Statement is a standard form adopted by the National Association of Insurance Commissioners (NAIC) and should be used by the auditor in the same manner as the general ledger and subsidiary books of account of other industries.

A. DEFINITION OF AN INSURANCE COMPANY

Although the IITA does not define the term "insurance company," IITA § 102 states that unless otherwise provided any term used in the Act shall have the same meaning as when used in a comparable context in the Internal Revenue Code (IRC). Therefore, the term "insurance company" for Illinois income tax purposes means any taxpayer properly treated as an insurance company for federal income tax purposes under Subchapter L, IRC §§ 801 through 848. This definition was copied into IAC § 100.3420(b).

In most cases, it will be obvious whether or not a company should be treated as an insurance company. The issue whether a taxpayer is an insurance company typically arises when dealing with captive insurance companies, health maintenance organizations, and other questionable companies that may or may not meet the IRS definition discussed below.

IRC §§ 831(c) and 816(a) define "insurance company" to mean "any company more than half the business of which during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies." (26 U.S.C. § 816(a)) The definition provides only thresholds that must be surpassed in regard to the

amount of insurance business that must be conducted in order for a company to be taxed as an insurance company. It does not define "insurance contract". To be an insurance company for federal income tax purposes, a taxpayer must issue *insurance contracts*, and the issuing of insurance contracts must comprise *more than half* of the taxpayer's business.

Any corporation that is PROPERLY treated as an insurance company for federal purposes MUST also be treated as an insurance company under the IITA and be required to apportion its income under IITA § 304(b).

B. TYPES OF OWNERSHIP FOR INSURANCE COMPANIES

There are two major types of ownership for insurance companies: stock and mutual companies.

Stock companies are owned by the common stockholders of the company. Through stock purchases, the stockholders provide capital to the company and the company earns a profit on that capital on behalf of the stockholders. The profits of a stock company are either paid out to the stockholders in the form of dividends or reinvested as retained earnings.

Mutual companies do not have any stockholders and are owned by their policyholders. The profits of a mutual company are distributed to the policyholders as policy dividends at the end of the year. There are several types of mutual companies. An assessment mutual is an insurance company in which policyholders may be assessed for losses beyond the ability of the company to cover. A legal reserve mutual is seen especially in the life insurance field. This type maintains a reserve against possible claims, so it is able to sell policies under which policyholders may not be assessed for losses. A factory mutual specializes in providing property insurance on high-grade industrial properties. Since it restricts the type of risks it will accept, it is usually able to charge lower rates than those charged by companies accepting average risks.

C. FEDERAL CLASSIFICATION OF INSURANCE COMPANIES

1. For Tax Years Ending After December 31, 1986

For tax years ending after December 31, 1986, insurance companies can be classified into two separate categories:

- Life insurance companies; and
- Non-life insurance companies.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The 1986 changes had no effect on the return requirements to be filed by life insurance companies. Both stock and mutual life insurance companies are still required to file form federal Form 1120-L. In addition, IRC § 1504(c)(2) still allows certain life insurance companies to file a consolidated life/non-life return with the IRS.

All non-life insurance companies are now required to file form federal Form 1120-PC (US Property and Casualty Insurance Company Income Tax Return).

2. For Tax Years Ending On Or Before December 31, 1986

For years ending on or before December 31, 1986, the IRC classified insurance companies into three separate categories:

- Life insurance companies;
- Mutual insurance companies, other than life, marine, or certain fire insurance companies; and
- Other insurance companies, including mutual marine and certain mutual fire insurance companies.

Both stock and mutual life insurance companies were required to file form federal Form 1120-L. IRC § 1504(c)(2) provided an election whereby certain life insurance companies could be treated as includible corporations, and thus members, of a group composed of other includible non-life corporations. This section of the IRC allowed certain life insurance companies to file a consolidated life/non-life return with the IRS. This provision is effective for taxable years for which the due date (without extensions) for filing returns is after March 14, 1983.

Mutual insurance companies other than life, marine, or certain mutual fire or flood insurance companies were required to file form federal Form 1120M.

All other insurance companies were required to file federal Form 1120. Included in this category were mutual marine companies and certain mutual fire insurance companies. These companies were allowed to file a consolidated Form 1120 return with other includible corporations that were not insurance companies.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

D. OTHER STATES' TAXATION OF INSURANCE COMPANIES

There are many states that do not require insurance companies to file income tax returns. Generally, these states only require insurance companies to file a Privilege or Premiums Tax return.

E. ILLINOIS TAXATION OF INSURANCE COMPANIES

1. Nexus

Every insurance company that has nexus with Illinois is required to file an Illinois Income Tax return. Every foreign or alien insurance company conducting business in Illinois, except fraternal benefit societies, is also required to file an Illinois Privilege Tax and Retaliatory Statement with the Illinois Department of Insurance.

To tax a foreign insurance company (i.e., incorporated and domiciled outside of Illinois), the same U.S. Constitutional thresholds must be met as for any other foreign company. The Due Process clause requires that some minimum connection exist between the state and person, property, or transaction to be taxed. The higher threshold to be met falls under the Commerce Clause, which requires that the state's tax only be applied to an activity with "substantial nexus" to the taxing state. (*Quill Corp.* (1992))

If a foreign insurance company is insuring risk in Illinois, then a presumption of nexus is created. Previous guidance may have directed that insuring risk and the potential to investigate, settle, defend, and pay on claims alone create nexus. However, the mere "potential" does not pass the Due Process threshold, as was determined in the U.S. Supreme Court case of *State Board of Insurance v. Todd Shipyards Corporation,* 370 U.S. 451 (1962).

In that case, Texas tried to impose tax on insurance premiums paid to a foreign insurance company that carried on no activities other than having insured risk in Texas, as noted in the opinion:

> The insurance transactions involved in the present litigation take place entirely outside Texas. The insurance, which is principally insurance against loss or liability arising from damage to property, is negotiated and paid for outside Texas. The policies are issued outside Texas. All losses arising under the policies are adjusted and paid outside Texas. The insurers are not licensed to do business in Texas, have no office or place of business in Texas, do not solicit business in Texas, have no agents in Texas, and do not investigate risks or claims in Texas.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor should presume nexus with insured risk in Illinois, but if the taxpayer challenges this assertion, the auditor will need to investigate the activities of the foreign insurance company to determine whether the company has Illinois nexus or not. The activities that were lacking in *Todd Shipyards* (1962) can provide some general activities to consider, that if present, develop a case of Illinois nexus:

- Does the insurer investigate risks or claims in Illinois?
- Does the insurer have agents in Illinois?
- Does the insurer have an office or place of business in Illinois?
- Does the insurer solicit business in Illinois?
- Are losses paid or adjusted in Illinois?
- Are policies issued in Illinois?
- Is the insurance negotiated or paid in Illinois?
- Is the insurer licensed to do business in Illinois?
- Do any other insurance transactions take place in Illinois?

The more of these activities or items that are occurring in Illinois, the stronger the nexus position becomes. If none of the above items are present in Illinois, and the only Illinois activity is the insured risk in Illinois, then nexus would not be defendable. The above items were the principal insurance activities outlined in *Todd Shipyards* (1962) but are not an exhaustive list.

In 2015, a nexus questionnaire specific to insurance companies was developed and posted for auditors to use, the EDA-132-NI. It is currently available on the intranet under Work Areas > Audit > Forms > Income Tax. Below is the current link:

https://rev.portal.illinois.gov/Core/Forms/Documents/EDA-132-NI.pdf

The first part of the questionnaire deals with nexus questions for insurance companies, while the second part tailors the nexus questions to captive insurance companies. Since the auditor may only need to use some of the questions on the questionnaire, the auditor can copy those questions and incorporate them in an EDA-70 or other communication.

For more questions relating to both nexus and captive insurance companies, see the two unadopted questionnaires developed by auditors before the EDA-132-NI,later in this Chapter under the Exhibits section at QUESTIONNAIRE 1 and QUESTIONNAIRE 2.. These may give you some additional relevant questions or documents to consider outside the scope of the EDA-132-NI.

For more general nexus discussion, see Chapter 22.

2. Illinois Privilege Tax

The Illinois Department of Insurance administers the Illinois Privilege Tax or Premium Tax as it is sometimes called. There is an interrelationship between the Illinois Income Tax Act and the Illinois Privilege Tax Act. When applicable, the Illinois Privilege Tax Act allows an insurance company to reduce on a dollar for dollar basis the amount of privilege tax due by the amount of Illinois Income and Replacement Tax paid during the year. In other words, an insurance company can receive a tax credit on their Illinois Privilege Tax return for the amount of Illinois Income and Replacement Tax paid during the year.

Insurance company representatives will often tell corporate income tax auditors that they will receive a credit for any Illinois Income Tax liability established against their Illinois Privilege Tax. This is irrelevant to the determination of the company's Illinois Income Tax liability.

Corporate income tax audits on insurance companies assigned to the field should be completed even if it appears to the auditor that the company will be entitled to a credit against their Illinois Privilege Tax for any additional income tax liability.

F. NONCOMBINATION RULE UPDATE

Effective July 6, 2017, PA 100-22 modified the unitary business group (UBG) definition in IITA § 1501(a)(27)(B). It repealed the noncombination rule and expanded the definition of "United States" to include the outer continental shelf (OCS) for taxable years ending on or after December 31, 2017. Insurance companies that apportion under IITA § 304(b) will combine with companies that apportion under other subsections of IITA § 304. This is a major adjustment to how auditors determine the UBG and combined apportionment, and eliminates the related-party expense modifications for noncombination companies for the applicable tax periods. For more information, see Audit Manual Chapters 23 for UBGs, 24 & 25 for modifications, and 27 for apportionment. Also see "Addition Modification for Related Party Insurance Reimbursement Subtraction Modification" and "Subtraction Modification for Related Party Insurance Premiums" sections in this chapter.

This means the related-party transaction modifications no longer apply to noncombination companies for taxable years ending on or after 12/31/17. For corporations, these modifications are found under IITA § 203(b)(2)(E-12), (E-13), and E-14) and the reversal subtraction modifications under IITA § 203(b)(2)(V), (W), (X), and (Y).

Starting with tax years ending on or after December 31, 2008 PA 95-233 and PA 95-707 expanded the use of Schedule 80/20 to require addition modifications for interest

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

expenses, intangible expenses and insurance premium expenses paid to a person who would have been a member of a unitary business group but for the noncombination rule in IITA § 1501(a)(27). In addition, the public acts eliminated the previous requirement that the affiliate be an 80/20 company.

The noncombination related-party modifications can apply to companies with captive insurance company for taxable years ending on or after 12/31/08 and before 12/31/17. The Illinois Schedule 80/20 was amended starting in 2008 along with IAC § 100.2430. For TYE on or after 12/31/17, the modifications are no longer necessary, because companies that apportion under different subsections of IITA § 304 can be part of the same UBG. Any related-party transactions are subject to federal consolidation and intercompany elimination rules. In other words, Illinois no longer needs to correct for tax distortions that occur when unitary companies are part of separate UBGs. The 2017 Illinois Schedule 80/20 reflects these changes, as only 80/20 companies are allowed the modifications and noncombination companies are not included on the form.

To illustrate these changes, let us consider a related-party transaction regarding a captive insurance company in TYE 12/31/14 versus TYE 12/31/17:

Example A

In TYE 12/31/14, a unitary group composed of manufacturers (“M”) pays $10 million in insurance premiums to its captive insurance company located in Wisconsin (“CI”) that qualifies as an insurance company under IAC § 100.3420(b) and apportions its income under IITA § 304(b). CI is excluded from M’s Illinois UBG under the noncombination rule. M pays CI insurance premiums for different lines of business insurance, which reduces M’s federal taxable income. M is subject to an addition modification under IITA § 203(b)(2)(E-14) and will report the $10 million in insurance expense on its Schedule 80/20. If CI is an Illinois filer, it will be allowed to report a subtraction modification of $10 million under IITA § 203(b)(2)(V).

Example B

Same facts as previous Example A, except M pays CI $10 million in insurance premium payments during TYE 12/31/17. Since the noncombination rule no longer applies, M and CI will be part of the same UBG and the noncombination modifications for the $10 million of insurance premium expense no longer apply. The $10 million intercompany insurance transactions will be eliminated for federal and Illinois purposes, having a zero tax effect for federal taxable income and Illinois base income. For more information on the related-party transaction modifications, see Audit Manual Chapters 24 and 25.

IV. APE SPECIFIC LAW APPLICATION

A. FEDERAL TAXABLE INCOME

1. Casualty Companies (Fire, Marine, And Auto)

For years ending after December 31, 1986, all casualty companies (stock and mutual) are required to file a federal Form 1120-PC return. Most casualty companies will calculate their federal insurance company taxable income (ICTI) using Schedule A of Form 1120-PC. The federal taxable income calculated on Schedule A is reported on line one of page one of the Form 1120-PC. This should be the figure reported on Line 1 of the IL-1120.

If a casualty company is a small company as defined by IRC § 831(b)(2), its taxable income may be computed in a different manner than used on Schedule A. They may make an election to be taxed on taxable investment income, and they will complete Schedule B of Form 1120-PC, instead of Schedule A. The federal taxable income calculated on Schedule B is reported on line two, page one of the Form 1120-PC. This should be the figure on Line 1 of the IL-1120. Once a company elects to be taxed on taxable investment income, it must continue to be taxed in the same manner (as long as it qualifies) unless the Secretary of the Treasury consents to the revocation of the election. REF: IRC § 831(b)(2).

One additional factor may have to be considered in the computation of Illinois ICTI (and life insurance company taxable income (LICTI)) for some companies that have filed federal consolidated returns for tax years ended after December 31, 1987. Under the IRC, insurance companies (property, casualty and life) are allowed a unique federal deduction for reserves accrued for covered losses which have been incurred by its policyholders, but which had not yet been paid. Some background is necessary to understand the impact on Illinois.

Prior to the Tax Reform Act of 1986, there was a problem with the way the companies were taking the deduction. They were accruing the total amount of estimated losses, even in cases where it was certain that the losses would not be paid until several years after the time of the deduction. Consequently, the IRS made revisions to IRC § 832(b)(5) to require them to deduct only the present value of unpaid losses per IRC § 846. Since the rules for phasing in this change were inequitable, the IRS added IRC § 847 to remedy the situation. (See the Glossary at INSURANCE COMPANY GLOSSARY for a more detailed explanation.) In essence, this new section permitted an insurance company that is required to discount the amount of unpaid losses, in computing its losses incurred deduction, to take an additional special deduction to

account for that discounting. This deduction is allowable to the extent that the company establishes and maintains a special loss discount account, and makes special estimated tax payments with respect to the tax benefits the insurance company receives. The deduction is taken in the process of computing ICTI (and LICTI) for the federal return. For property and casualty companies, refer to the “Additional Deduction” line of Schedule A of the Form 1120-PC. The corresponding “Special Estimated Tax Payment” is found on Page 1 of the Form 1120-PC.

Generally, this deduction will not have to be examined by the Illinois auditor except in some cases where a federal consolidated return is filed. In preparing their federal consolidated return, an insurance company may choose to show the IRC § 847 deduction as either one consolidating adjustment or as a deduction on the separate company income statement for each of the insurance companies entitled to the deduction. Some confusion has resulted in past Illinois audits when a consolidated group chooses to take the deduction as one consolidating adjustment for federal purposes, and not all the members of the group file together in Illinois.

Regardless of which way the company elects to take the deduction, they ARE ENTITLED to take the applicable amount of the deduction for each individual Illinois filer in the computation of separate company taxable income. IITA § 203(e)(2)(E) supports this procedure:

In the case of a corporation which is a member of an affiliated group of corporations filing a consolidated income tax return for the taxable year for federal income tax purposes, taxable income is determined as if such corporation had filed a separate return for federal income tax purposes for the taxable year and each preceding taxable year for which it was a member of an affiliated group.

For more detailed information on the federal method of computing ICTI for non-life insurance companies, refer to IRC §§ 831 and 832.

For the years ending on or before December 31, 1986, casualty companies other than some mutual insurance companies filed regular federal Forms 1120. They were not subject to the special federal provisions provided for life and mutual insurance companies. Casualty companies were allowed to file consolidated federal 1120 returns with other corporations that were not in the insurance business. Consequently, federal taxable income for casualty companies for years on or before December 31, 1986 is obtained from page one of the federal Form 1120 return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

2. Life Insurance Companies

The federal computation of Life Insurance Company Taxable Income (LICTI) has undergone some substantial changes over the years. Despite the changes at the federal level, one pivotal date applies to Illinois – September 1, 1989, when Public Act 86-678 was passed. In general, IITA § 203(e)(2)(A) contains Illinois's rule for determining LICTI.

a) Tax Years Ending on or after September 1, 1989 to Current

IITA § 203(e)(2)(A) was amended with the passing of **Public Act 86-678 on September 1, 1989**. The IITA was corrected to read:

> Taxable income properly reportable for federal income tax purposes shall mean:…in the case of a life insurance company subject to the tax imposed by Section 801 of the Internal Revenue Code, life insurance company taxable income, plus the amount of distribution from pre-1984 policyholder surplus accounts as calculated under Section 815(a) of the Internal Revenue Code.

Consequently, for tax years ending on or after September 1, 1989, LICTI for Illinois purposes is NOT the total taxable income figure on the federal Form 1120-L. Instead, it equals LICTI for federal purposes increased by distributions to shareholders from pre-84 policyholders' surplus account. These figures are found on Page 1 of the Form 1120-L.

This is reflected in IAC § 100.2405(c)(1) which states that "taxable income properly reportable by the following taxpayers for federal income tax purposes shall mean":

> For life insurance companies taxable under Internal Revenue Code section 801, life insurance company taxable income, plus the amount of distribution from pre-1984 policyholder surplus accounts as calculated under Internal Revenue Code section 815a.

The above is also in the instructions to the Form IL-1120.

b) Tax Years Ending Before September 1, 1989

For years prior to September 1, 1989, Line 1 of the IL-1120 should be equal to the LICTI figure reported on Page 1 of the company's federal Form 1120-L. For Illinois purposes, this was determined by Public Act 76-261 which became effective August 1, 1969. It stated that taxable income properly reportable for federal income tax

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

purposes shall mean "in the case of a life insurance company subject to the tax imposed by IRC § 802, Life Insurance Company Taxable Income."

During the period prior to September 1, 1989, the IRS made substantial changes in the method and forms used for computing LICTI. An understanding of this history is necessary. However, the federal changes do not result in procedural changes for the Illinois auditors. Illinois continued to utilize LICTI as computed federally, generally without re-computation. Following are highlights of the federal treatment in chronological order:

For tax years ended on or before December 31, 1983, the federal schedules used to calculate LICTI are Schedule C (Investment Income) and Schedule E (Operating Income). These schedules exclude the policyholder's share of total income in arriving at the company's share of total income, which is used in calculating LICTI. Since the Illinois addition modification for federally tax-exempt interest parallels the computation of LICTI, a detailed discussion of the federal computation is included below.

Taxable investment income (Schedule C) consists of the life insurance company's share of all items of investment yield (IRC § 804). Investment yield was defined as gross investment income less investment expenses and other deductions, such as tax-exempt interest and the dividends received deduction.

Gain from operations (Schedule E) consists of the life insurance company's share of items of investment yield and gross premiums and any net decrease in reserves per IRC § 809. The policyholder's share of investment yield items was specifically excluded from the gain from operations.

Utilizing these schedules, LICTI is computed for this period. It should be noted that the company's percentage would vary between Schedules C and E. Careful scrutiny of the federal Form 1120-L will give the auditor an understanding of the composition of the figures comprising LICTI. It is the lesser of the company's share of the income from investments (Schedule C), or the company's share of the income from the total operations (Schedule E), increased by one half of the difference of the gain from operations over the gain from investments (if any exists).

If taxable investment income exceeds gain from operations, taxable investment income is ignored and only the gain from operations is used in the computation of LICTI. (If Schedule C > Schedule E, use Schedule E only.) If taxable investment income is less than the gain from operations, LICTI will include the taxable investment income plus one half of the excess of the gain from operations over the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

investment income. (If Schedule C < Schedule E, use Schedule C plus ½ (Schedule E minus Schedule C.))

Example #1

Determine LICTI for Life Insurance Company B. Following is the company share information:

Investment income (Schedule C)	$10 million
Gain from operations (Schedule E)	$ 5 million

Calculation: (If Sch C > Sch E, use E).
$10 million > $5 million, use $5 million
Solution: LICTI = $5 million

Example #2

Determine LICTI for Life Insurance Company C. Following is the company share information:

Investment income (Schedule C)	$20 million
Gains from operations (Schedule E)	$30 million.

Calculation: (If Sch C < Sch E, use C plus ½ (Sch E – Sch C))
$20 million < $30 million, use $20 million + ½ ($30 million - $20 million)
= $20 million + ½ ($10 million)
= $20 million + $5 million
Solution: LICTI = $25 million

For tax years ending after December 31, 1983, the Deficit Reduction Act of 1984 substantially changed the method of computing LICTI federally. New IRC § 801 now imposed tax on life insurance companies. Illinois adjusted the IITA to refer to IRC § 801 instead of IRC § 802 with Public Act 85-293. Income for Illinois purposes still remained LICTI as computed federally.

In addition to adding IRC § 801, the Deficit Reduction Act established IRC § 815 to impose a special tax on distributions to shareholders from pre-1984 policyholders surplus accounts. These distributions were subject to tax federally as if they were a part of LICTI, but they were not specifically included in LICTI. Since Illinois did not have a specific provision to add the distributions to LICTI, the distributions could not be included in base income of the Illinois return until the necessary law change was passed on September 1, 1989.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For tax years ended after December 31, 1987, another change occurred with the implementation of IRC §§ 846 and 847 dealing with the discounting of unpaid losses. This change created a situation where an Illinois auditor might have to do some adjustments to LICTI. When a federal consolidated return is filed claiming the IRC § 847 deduction for discounted unpaid losses, but not all the federal members are Illinois filers, some recalculation might be necessary for LICTI. See the discussion in the previous section for property and casualty companies at Casualty Companies (Fire, Marine, And Auto).. The IRC § 847 deduction for life insurance companies is found on the "Additional Deduction" line of Page 1 of federal Form 1120-L. The corresponding required estimated payment is found in the payment section on the line "Special Estimated Tax Payments."

B. MODIFICATIONS

Insurance companies are subject to the same IITA § 203(b) addition and subtraction modifications as any other corporation. For a general discussion of the various addition and subtraction modifications, refer to Chapters 24 and 25 of the Audit Manual.

There are, however, a few special rules associated with certain addition and subtraction modifications that are specific to insurance companies as follows.

1. Addition Modification For Federally Tax Exempt Interest

IITA § 203(b)(2)(A) requires an addition modification for an amount equal to all amounts paid or accrued to the taxpayer as interest during the taxable year to the extent excluded from gross income in the computation of taxable income.

a) Property and Casualty Companies

(1) For Tax Years Ending On Or After August 13, 1999 To Current

Public Act 91-541 (SB 1118) was signed on August 13, 1999. It amended IITA § 203(b)(2)(I) and related sections to provide that non-life insurance companies are not required to include in income any interest reported under IRC § 832(b)(5)(B) used to reduce the taxpayer's "loss incurred" deduction on their federal income tax return. Thus, for all tax periods ended on or after August 13, 1999, the addition modification for federally tax exempt interest will **still be 100%** of tax exempt interest. However, a **subtraction modification** will be allowed for the **15%** of tax-exempt interest that was utilized federally to reduce the deduction for losses incurred.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Department's policy for tax years ending on or after August 13, 1999 can be summarized as follows:

- For federally tax-exempt interest received or accrued on investments purchased prior to August 8, 1986, the proper addition modification will be 100% of the tax-exempt interest. IRC § 832(b)(5)(B)(i) does not require that the interest on these investments be included in the 15% adjustment to the deduction for losses incurred.

- For federally tax-exempt interest received or accrued on investments purchased on or after August 8, 1986, the proper addition modification will be 100% of the tax-exempt interest; however, a corresponding Illinois subtraction modification will be allowed. This Illinois subtraction is equal to the deductions disallowed under IRC § 832(b)(5(B)(i), which include, in part, 15% of federally tax-exempt interest that was added back federally for tax years ending on or after August 8, 1986.

(2) For Tax Years Ending Prior To August 13, 1999

For tax years ending prior to August 13, 1999, the Department took the position that 100% of the tax-exempt interest SHOULD still be added back to the Illinois return. However, during this period some non-life insurance companies argued that they should only be required to add back 85% of their federally tax-exempt interest as an addition modification for Illinois.

This issue started with tax years ending after December 31, 1986, due to the proration concepts added to the insurance provisions of the IRC by the Tax Reform Act of 1986. In the computation of ICTI, the IRS required that the deduction for “losses incurred” during the taxable year on insurance contracts be reduced by an amount equal to 15% of the federally tax-exempt interest received or accrued after August 7, 1986. (See IRC § 832(b)(5).) Schedule F of the federal 1120-PC computes this deduction. This in turn is deducted from gross income on Schedule A. In essence, this procedure increases ICTI by an amount equal to 15% of tax exempt interest received or accrued after August 7, 1986. Thus, the argument was made to add back only 85% of the tax-exempt interest to the Illinois return.

By examining the IITA § 203(b)(2)(A), and the intent of Congress in enacting the IRC § 832(b)(5)(B)(i) the argument for adding only 85% of tax-exempt interest was refuted.

The reasoning by the Department up until August 13, 1999 was as follows:

The IITA § 203(b)(2)(A) provides for an addition modification to Illinois taxable income for federally tax-exempt interest excluded from gross income in computing taxable income. IRC § 103(a) initially excluded all of the tax-exempt interest from gross income. Thus, 100% should be added back. The fact that 15% of tax exempt interest was subsequently used to reduce the deduction for losses incurred in computing ICTI was considered immaterial for Illinois income tax purposes. When Congress enacted this procedure, the intent of this reduction in the "losses incurred" deduction was merely to deny the taxpayer a double deduction where deductible additions to reserves were funded with federally tax-exempt interest. The intent was NOT to include a portion of federally tax-exempt interest in ICTI. A final argument was made by comparing the disallowance of a deduction related to tax-exempt income to the similar disallowance in IRC §§ 171(a)(2), 265(a)(2), and 291(a)(3). IITA § 203(b)(2)(I) expressly allowed Illinois corporations to reverse these latter disallowances. However, a reversal of deductions disallowed under IRC § 832(b)(5)(B)(i) was NOT expressly allowed. Therefore, 100% of tax-exempt interest should be added back on the Illinois return.

The above policy was changed on February 23, 2000.

(3) February 23, 2000 Policy

The Department's prior policy was in effect until February 23, 2000. Due to the passing of Public Act 91-541 and the Circuit Court decisions in *Sentry Insurance v. Zehnder* and *St. Paul Fire and Marine Insurance Co. v. Zehnder*, the Department decided to change its policy.

(4) For Tax Years Ending Prior To August 13, 1999

The Department's current policy for the addition modification for municipal interest for property and casualty companies for tax years ending prior to August 13, 1999 follows:

- For federally tax-exempt interest received or accrued on investments purchased prior to August 8, 1986, the proper addition modification will be 100% of the tax-exempt interest. Internal Revenue Code (IRC) § 832(b)(5)(B)(i) does not require that the interest on these investments be included in the 15% adjustment to the deduction for losses incurred.

- For federally tax-exempt interest received or accrued on investments purchased on or after August 8, 1986, the proper addition modification will be 85% of the tax-exempt interest. The Circuit Court in the above-

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

mentioned cases concluded that gross income of the non-life companies already included 15% of the federally tax-exempt interest income. IRC § 832(b)(5)(B)(i) required them to add back the 15% on Schedule F in the computation of their deduction for losses incurred.

b) Life Insurance Companies

The addition modification for federally tax-exempt interest under IITA § 203(b)(2)(A) was a source of much confusion over the years for life insurance companies. The main question was whether the company's share or the gross amount (company's and policyholders' shares) should be added back for Illinois purposes. For different periods of time, different audit procedures were in effect.

(1) Tax Years Ending On Or After December 31, 1994 to Current

Public Act 88-648 amended the IITA § 203(b)(3) special rule to state that, "For purposes of paragraph (2)(A), "gross income" in the case of a life insurance company, for tax years ending on and after December 31, 1994 and prior to December 31, 2011, shall mean the gross investment income for the taxable year." The term "gross investment income" includes the company's share and the policyholder's share of the income. Thus, for tax years ending on or after December 31, 1994, life insurance companies are required to add back both the company and policyholders' shares of tax-exempt interest as an addition modification on the Illinois return.

Public Act 97-0507 amended IITA § 203(b)(3) for purposes of defining "gross income" regarding the IITA § 203(b)(2)(A) addition modification. "Gross income" for tax years ending on or after December 31, 2011, means all amounts included in life insurance gross income under IRC § 803(a)(3).

The Annual Statement Schedule D is the main control document for the detail of the investment interest claimed on the federal Form 1120-L. Amounts claimed for tax-exempt interest on 1120-L Schedule F should be verified to the Annual Statement. The Illinois addition modification for this period is the total of both the company and policyholders' shares of tax-exempt interest.

(2) Tax Years Ending On Or Before December 31, 1994

For tax years ending prior to December 31, 1994, IITA § 203(b)(3) stated that, for purposes of the addition modification for federally-exempt interest, "gross income" in the case of a life insurance company shall mean the company's share of the gross investment income for the taxable year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Consequently, in the computation of Illinois base income, life insurance companies were required to add back ONLY the company's share of their federal tax-exempt interest prior to December 31, 1994. They were NOT required to add back the policyholder's share for this period, since the LICTI computation includes only the company share of tax-exempt interest. This is also supported by a 1996 Illinois administrative hearing decision.

The auditor should first verify the amount of tax-exempt interest claimed on the federal 1120-L to the Annual Statement Schedule D. This schedule is the main control document for the detail of the investments held by the insurance company.

Even though the company's share of federal tax-exempt interest is the only portion added back for the entire period through December 31, 1994, the federal schedules utilized in the computation were different prior to December 31, 1984. For years prior to December 31, 1984, a life insurance company's share of the addition modifications is calculated in a manner that exactly parallels the IRC formula used to compute a life insurance company's federal taxable income. If the life insurance company's gain from investments (Schedule C) is greater than the gain from operations (Schedule E), then the addition modification will be the company's share of tax-exempt interest in Schedule E. If the company's gain from investments (Schedule C) is less than the gain from operations (Schedule E), a different computation is made. The addition modification will be the Schedule C company share of tax-exempt interest increased by an amount equal to one half of the difference between the Schedule E company share of the modification and the Schedule C company share of the modification. The following examples show how the addition modification was computed prior to December 31, 1984.

<u>Example #3</u>

Part I: Determine LICTI for Life Insurance Company B. Following is the company share information:

Investment income (Schedule C)	$10 million
Gain from operations (Schedule E)	$ 5 million

Calculation: (If Sch C > Sch E, use E).
$10 million > $5 million, use $5 million
Solution: LICTI = $5 million

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Part II: Determine the addition modification for federally tax-exempt interest, using Part I and the following information:

Federally tax exempt interest in Schedule E investment yield $2 million
Company's share of investment yield Schedule E 60%

Calculation: (If Sch C > Sch E in Part I, use Sch E's company share for Part II)
$10 million > $5 million for Part I
Use Sch E company share for Part II
(60% x $2 million)
Solution: Addition modification for Federally tax exempt interest = $1.2 million

<u>Example #4</u>

Part I: Determine LICTI for Life Insurance Company C. Following is the company share information:
Investment income (Schedule C) $20 million
Gains from operations (Schedule E) $30 million.

Calculation: (If Sch C < Sch E, use C plus ½ (Sch E – Sch C))
$20 million < $30 million, use $20 million + ½ ($30 million - $20 million)
= $20 million + ½ ($10 million)
= $20 million + $5 million
Solution: LICTI = $25 million

Part II: Determine the addition modification for Federally tax exempt interest, using Part I and the following information:
Federally tax exempt interest in Sch C investment yield $2 million
Company Share Sch C investment yield 60%
Federally tax exempt interest in Sch E investment yield $2 million
Company share Sch E investment yield 70%

Calculation: (Sch C < Sch E in Part I, so use Sch C's Co. share of modification + ½(Sch E's Co. share – Sch C's Co. share)
$20 million < $30 million in Part I
Use Sch C Co share + ½(Sch E's Co share – Sch C's Co Share)
= ($2 million x 60%) + ½(($2 million x 70%) – ($2 million x 60%))
= $1,200,000 + ½($1,400,000 - $1,200,000)
= $1,200,000 + ½($200,000)
= $1,200,000 + $100,000
Solution: Addition modification for federally tax exempt interest = $1,300,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

With the Tax Reform Act of 1984 came significant changes to the schedules attached to the federal Form 1120-L. Consequently, auditors must utilize different federal tax schedules for different time periods as a part of verifying the addition modification for the company's share of federally tax-exempt interest. The method described above was no longer utilized on or after December 31, 1984. The calculation is much simpler. For years ended on or after December 31, 1984 but prior to December 31, 1992, the auditor can verify this modification by multiplying the tax-exempt interest amount on Schedule C of the federal 1120-L by the company's share percentage found on Schedule K, Part II. For tax years ending after December 31, 1992, there were additional substantial changes to the federal 1120-L Schedules. Thus, for tax years ending after December 31, 1992, the addition modification for tax-exempt interest can be verified by multiplying the tax-exempt interest shown on Schedule F of the federal 1120-L by the company's share percentage also found on Schedule F.

2. Addition Modification for Related Party Insurance Reimbursement Subtraction Modification

P.A. 97-0507, effective 8/23/11, created a new addition modification for insurance companies. The new provision is found under the subtraction modification IITA § 203(b)(2)(Y), shown below:

> (Y) For taxable years ending on or after December 31, 2011, in the case of a taxpayer who was required to add back any insurance premiums under Section 203(b)(2)(E-14), such taxpayer may elect to subtract that part of a reimbursement received from the insurance company equal to the amount of the expense or loss (including expenses incurred by the insurance company) that would have been taken into account as a deduction for federal income tax purposes if the expense or loss had been uninsured. If a taxpayer makes the election provided for by this subparagraph (Y), the insurer to which the premiums were paid must add back to income the amount subtracted by the taxpayer pursuant to this subparagraph (Y). This subparagraph (Y) is exempt from the provisions of Section 250; and [emphasis added]

If an insured affiliate takes the subtraction for reimbursed losses paid by the noncombination insurance company, then the insurance company must add back to its income what the insured affiliate subtracted. The insurance company reports this addition modification on the Schedule 80/20 (2015, Step 2, Line 12). Doing so follows the principle behind the 80/20 & noncombination modifications to nullify the tax effects of intercompany insurance contracts. Remember, this language does not create nexus for the insurance company. A foreign captive affiliate will only actually report this

modification if it has nexus or is part of an Illinois UBG filing a combined return. The insured's eligibility for the IITA § 203(b)(2)(Y) reimbursement subtraction does not depend upon whether the insurance company has an Illinois filing requirement or actually adds back the reimbursement subtraction. However, when auditing an insurance company, the auditor should verify if any insured affiliate subtracted any insurance reimbursements under IITA § 203(b)(2)(Y) and if so, that the insurance company has added back the appropriate amounts.

Example 1: Captive Insurance Company CI, domiciled in Missouri, reimburses its noncombination Transportation Company T for losses to its trucking fleet from storm damage. T claims a $10 million dollar IITA § 203(b)(2)(Y) reimbursement subtraction. CI is an Illinois filer, but did not report a $10 million addition modification for the subtraction that T claimed. The auditor should make an audit adjustment so that CI reports the $10 million dollar addition modification required under IITA § 203(b)(2)(Y).

*Note: If CI did not have Illinois nexus, then it would not have to report the $10 million addition modification. T would still be eligible for the IITA § 203(b)(2)(Y) subtraction modification.

IITA § 203(b)(2)(Y) dealing with insurance reimbursement paid, is one of the two reversal noncombination insurance company modifications. The other is a subtraction modification under IITA § 203(b)(2)(V) for insurance premiums received. The purpose of the noncombination insurance company modifications is to eliminate the tax effects of transactions from insurance contracts between noncombination companies. See the 80-20 Example in "Subtraction Modification for Related Party Insurance Premiums" for an illustration of a captive insurance company reporting both of the noncombination reversal modifications on the Schedule 80/20.

3. Subtraction Modification For US Government And Certain Municipal Interest

Insurance companies are entitled to the same type of subtraction modifications as other corporations. For a complete discussion of these, see Audit Manual Chapter 25.

Non-life insurance companies take subtraction modifications like other corporations, so there are no special rules for their subtraction modifications. (See section below on dividends received through a mutual fund at Foreign Dividend Flow-Through From A Mutual Fund.) Life insurance companies, however, had controversy over the amount of US government and certain municipal interest that they are entitled to subtract on the Form IL-1120. IITA § 203(b)(2)(J) allows the subtraction modification, and Publication 101 and IAC § 100.2470 detail the qualifying items. The controversy was over whether

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

the entire gross amount should be deducted, or just the company's share. The life insurance company subtraction modification for US Government and certain municipal interest will be handled in the following manner.

a) Tax Years Ending After December 31, 1983

The gross amount, both the policyholders' and company's shares of tax-exempt interest should be allowed as a subtraction modification. The Deficit Reduction Act of 1984 changed the definition of LICTI, including both the policyholders' and company's shares of US government interest in the computation. Be aware, however, that the US government interest subtraction modification requires the gross amount to be reduced by the bond premium amortization amount for years ended on or after January 1, 1992.

b) Tax Years Ending on or Before December 31, 1983

The subtraction modification should be limited to the company's share amount. Prior to 1983, the federal definition of LICTI excluded the policyholders' share of both investment income and gain from operations. Since IITA § 203(b)(2)(J) permits a subtraction modification for only those amounts included in the total of LICTI plus addition modifications, no subtraction can be allowed for the policyholders' share.

4. Foreign Dividend Flow-Through From A Mutual Fund

The issue is whether a dividend received by a taxpayer (i.e. Life Insurance Co.) from a mutual fund such as Acorn International that invests exclusively in foreign corporations can be claimed by the taxpayer as a subtraction modification for foreign dividends. Taxpayers have taken the position that it is an allowable subtraction modification because in the *Andras v. Department of Revenue* case a taxpayer that received a dividend from a mutual fund that invested U.S. Government securities was allowed a subtraction modification.

In *Andras* the Court allowed the subtraction modification to flow through to the taxpayer because there is a federal statute that provides that states cannot impose a direct or indirect tax on U.S. Government interest. If the taxpayers were not allowed a flow-through of the U.S. Government interest, it would amount to an indirect tax. The theory applied by the Court in this case would not apply to any other type of income.

A similar issue occurs with interest on obligations of state and local governments that are specifically exempted by the IITA. IAC § 100.2470(f) states that, "Income from these bonds is not exempt if the bonds are owned indirectly through owning shares in a mutual fund."

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Although, it is not stated in the regulations, the same would be true for foreign dividends. See Chief Counsel Advisory 200152046, 2001 WL 1660012 (Dividends from a mutual fund treated as a dividend from a U.S. corporation)

5. Subtraction Modification For An Attorney-In-Fact

Public Act 91-205 added a subtraction modification to IITA § 203(b)(2)(R) to allow an attorney-in-fact to claim an amount equal to the expenses disallowed on the reciprocal insurer's federal return when the reciprocal insurer made an IRC § 835 election. AMU IT 99-19 stated that this subtraction was effective for tax years ended on or after 7/20/99. However, after reviewing the legislative background, the General Counsel's office determined that the subtraction modification is effective retroactively. Public Act 94-789 retroactively reenacted the subtraction, which had sunset. This subtraction modification was exempted from IITA § 250 sunset.

a) Attorney-In-Fact/Reciprocal Insurer Relationship

To understand how this subtraction modification works, we must first have an understanding of the attorney-in-fact and its relationship with the reciprocal insurer or inter-insurer. A reciprocal or inter-insurer is a mutual organization composed of a group of persons, firms or corporations who agree to share each other's losses or risks. These parties are known as "subscribers." Each subscriber executes an identical agreement to empower an attorney-in-fact to represent them as a unit and manage their inter-insurance activities and policies. The attorney-in-fact is a separate company that operates on behalf of the policyholders, but it assumes no liability as an underwriter. Therefore, the attorney-in-fact is not considered an insurance company for Illinois or federal tax purposes. The reciprocal insurer pays the attorney-in-fact for its services, usually as a percentage of the premium income. This creates expenses that are recognized on the books of the reciprocal insurer, and income that is recognized on the books of the attorney-in-fact.

b) Federal Treatment

Under the IRC § 835, a reciprocal insurer is taxed as a mutual insurance company. The attorney-in-fact is not included on a consolidated return with the reciprocal insurer. However, there is a special provision in IRC § 835 which allows the reciprocal insurer to elect to effectively combine its tax liability with that of the attorney-in-fact. Once the election is made it is in effect for all succeeding years and cannot be revoked without federal consent.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the election is not made federally, the reciprocal insurer includes the full amount of expenses paid to the attorney-in-fact in the calculation of its federal taxable income. The attorney-in-fact reports the full amount of income from the reciprocal insurer on its federal return, and reduces that income by any business expenses to arrive at its federal taxable income.

If the election is made federally, there is no effect upon the calculation of the attorney-in-fact's federal taxable income. Income is still reduced by business expenses. Instead, the impact is seen on the reciprocal insurer's return. If the attorney-in-fact has federal taxable income, the reciprocal insurer does not expense the full amount of their payment to the attorney-in-fact. Instead, they are allowed to claim a smaller amount of expenses equal to the amount of actual business expenses the attorney-in-fact incurred for activity related to the insurer's business. In addition, the insurer also is allowed to claim a credit under IRC § 835(d) equal to the taxes paid by the attorney-in-fact on the income derived from the insurer. If the attorney-in-fact incurs a loss, the reciprocal insurer can deduct expenses equal to the amount of its payments to the attorney-in-fact.

c) Illinois Treatment

The subtraction modification allowed under IITA § 203(b)(2)(R) is only taken if the IRC § 835 election is made federally. For Illinois, the modification is taken on the attorney-in-fact's return rather than the reciprocal insurer's return. If the IRC § 835 election is made, a subtraction can be claimed by the attorney-in-fact in an amount equal to the expenses disallowed on the reciprocal insurer's federal return. The amount of disallowed expenses can be found on the reciprocal insurer's Schedule M-1 under "Expenses on books not on the return." The attorney-in-fact calculates their apportionment factor according to IITA § 304(a) rather than § 304(b). They cannot be included on the Illinois unitary return with the reciprocal insurers.

Example #5

Company A is a reciprocal insurer. Company B is the attorney-in-fact for Company A. Company A makes a IRC § 835 election.

A pays B $1,000,000 for services during the calendar year 1998. This $1,000,000 is B's only income. B incurs expenses of $400,000 in 1998, all of which are related to A's income. B pays $200,000 in federal taxes on the taxable income that results from this business activity.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

B’s federal return:

Income	$1,000,000
Expenses	400,000
Taxable income	600,000
Federal Taxes	200,000

Because of the IRC § 835 election, A would claim as expenses on its federal return $400,000 of the $1,000,000 payment made to B. The other $600,000 would be disallowed and would be reported on A’s M-1 Schedule. A would compute its taxable income and federal taxes and then claim an IRC § 835(d) credit based on B’s taxes of $200,000.

Since the Illinois subtraction modification created by Public Act 91-205 is retroactive, it would be applicable to the in-statute 1998 tax year. Attorney-in-fact B would be entitled to the Public Act 91-205 subtraction modification rather than reciprocal insurer A. A’s Illinois return will be unaffected. B would report federal taxable income of $600,000 on its Illinois return. Then, B would subtract the $600,000 of A’s expenses that were disallowed on A’s federal return because of the Section 835 election.

<u>Example #6</u>

Company C is a reciprocal insurer. Company D is the attorney-in-fact for Company C. Company C makes an IRC § 835 election.

C pays D $1,000,000 for services during calendar year 1998. This $1,000,000 is D’s only income. D incurs expenses of $1,500,000 in 1998, all of which are related to C’s income. D incurs a federal net operating loss from this business activity.

D’s federal return:

Income	$1,000,000
Expenses	1,500,000
Taxable Loss	<500,000>

Under the Section 835 election, since D has a loss, C can only claim expenses on its federal return equal to the amount of its payments to D. So, C is limited to expenses of $1,000,000. Since D pays no federal taxes related to this income, C has no Section 835(d) credit and no disallowed expenses on Schedule M-1.

For Illinois, since the Public Act 91-205 modification is retroactive, it could be applicable to this year. However, since attorney-in-fact D incurred a federal net

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

operating loss of $500,000, reciprocal insurer C would not have any disallowed expenses from the Section 835 election on C's federal return. The Illinois subtraction modification is only for the disallowed expenses. Thus, D cannot claim the Public Act 91-205 modification. D would report a loss of $500,000. C would report its federal taxable income.

6. Other Subtractions

For tax years ended on or after August 13, 1999, with the passing of Public Act 91-541 (SB 1118), non-life insurance companies are entitled to take an Illinois subtraction modification of 15% of federally-exempt interest that was used to reduce the federal deduction for losses incurred in computing ICTI. REF: IRC § 832(b)(5)(B)(i) and IITA § 203(b)(2)(I)(ii). This will be allowed under "other subtraction modifications." See discussion under modifications section at Addition Modification For Federally Tax Exempt Interest for a detailed explanation of how this subtraction originated. (IAC § 100.2455(f)).

Note: The subtraction modification is reported on 2015 Schedule M, Step 3, Line 15e as "Reduction in insurance company reserves (IRC § 835(b)(5)(B)(i))". It is called that because the 15% disallowance shows up as a reduction in the taxpayer's ending reserve.

In 2011, Public Act 97-0507 amended the interest subtraction for insurance companies to take into account the adjustments to reserves required when exempt interest is received, which applies to tax years ending on or after December 31, 2008. The additional language added to IITA § 203(b)(2)(I) allows the taxpayer to subtract:

> … the policyholders' share of tax-exempt interest of a life insurance company under Section 807(a)(2)(B) of the Internal Revenue Code (in the case of a life insurance company with gross income from a decrease in reserves for the tax year) or Section 807(b)(1)(B) of the Internal Revenue Code (in the case of a life insurance company allowed a deduction for an increase in reserves for the tax year)…

The Schedule M for years 2016 and after was updated and provides a specific line for this subtraction modification. The 2016 Schedule M allows it on line 15(e) "Change in insurance company reserves (IRC Section 807 or 832)". For years 2015 and before, the Schedule M does not provide a specific line for this subtraction modification related to IRC § 807. If the taxpayer received this type of exempt interest with reserve adjustments, the subtraction should be reported on the "Other eligible subtractions…" line on the Schedule M (Line 33, 2015 Schedule M).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

7. Subtraction Modification For Related Party Insurance Premiums

Because of the expansion of the Schedule 80/20 modifications to noncombination companies for taxable years ending on and after 12/31/08 and before 12/31/17, insurance companies are allowed a subtraction modification for insurance premiums received to the extent the affiliate reported them as an addition modification. For corporations, this subtraction modification is found under IITA § 203(b)(2)(V). Schedule 80/20 was amended starting in 2008 along with IAC § 100.2430 to reflect this subtraction modification. However, Public Act 100-22 eliminated the noncombination rule for taxable years ending on or after 12/31/17. This means the noncombination company insurance modifications only apply for taxable years ending on or after 12/31/08 and before 12/31/17. On or after TYE 12/31/17, insurance companies will join the same UBG with companies that apportion under different subsections of IITA § 304. The 2017 Schedule 80/20 reflects the removal of noncombination companies and insurance premiums modifications from the form. Fiscal year filers with years ending in 2017 must use the 2016 Schedule 80/20 for insurance company modifications.

Since the insurance company must qualify as a noncombination company, it would generally be a greater-than-50% owned captive unitary with the affiliated group (but for its different apportionment requirement). In other words, the insurance company meets all the unitary requirements to be included in the UBG, other than using an apportionment method different than the UBG.

IAC § 100.2430(b)(9) defines insurance premiums as the following:

> …the total amount paid or accrued during the taxable year, net of refunds or abatements, for coverage against any risk under a policy issued by an entity that is required to apportion its business income under the provisions of IITA Section 304(b) or that would be required to do so if it were subject to Illinois income taxation.

The following describes how the insurance premium modification works between the insured affiliate and the captive insurance company on a Schedule 80/20 for the applicable periods. If the Schedule 80/20 applies, then the insurance premium expenses paid to the captive insurance company are included on the affiliate's Schedule 80/20, Step 2, Line 9 starting in 2008 (lines may differ depending on the form year). This amount is reduced to the extent of any dividends received from the captive insurance company that flow through to Illinois base income. The net amount from Schedule 80/20 is carried to the UBG's Form IL-1120, Step 2 for addition modifications.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

> Note: Interest expenses or intangible expenses (such as royalties) paid to the captive insurance company would also be part of the addition modification.

If the captive insurance company files a Form IL-1120, then it will complete its own Schedule 80/20 and complete Step 1 and Lines 17 through 26 of Step 3, and carry the result to its Form IL-1120, Step 3 for subtraction modifications (lines may differ depending on the form year).

> Note: A captive insurance company that apportions its income under IITA § 304(b), including one located in a tax haven country like Bermuda, may be subject to Illinois income tax and have an Illinois insurance premium numerator under IAC § 100.3420(c) if it receives any kind of premiums based on risk in Illinois. There is a presumption of nexus if the taxpayer insures Illinois risk, but if rebutted by the taxpayer, then the auditor will have to develop a nexus position.

The premiums the captive subtracts cannot be included in its apportionment factor. This results from the principle that only receipts included in Illinois base income can be part of the apportionment factor. IAC § 100.3420(c)(1) provides the following:

> The apportionment factor shall take into account only those receipts that are included in either "gross premiums written" under section 832(b)(4)(A) of the Internal Revenue Code or "gross amount of premiums" under section 803(a)(1)(A) of the Internal Revenue Code. Only receipts that are included in federal taxable income of the taxpayer, and that are not subtracted in the computation of base income under a provision of Section 203 of the IITA, may be included in the apportionment factor. (See Continental Illinois National Bank and Trust Company of Chicago v. Lenckos, 102 Ill.2d 210 (1984).)

If a captive insurance only insured its unitary noncombination affiliates, it could potentially have to subtract all its premiums and have a zero-apportionment factor. For more information on the addition/subtraction modifications, see Audit Manual Chapters 24 & 25. For more information on apportionment, see section at APPORTIONMENT FORMULA in this Chapter and Chapter 27. For more information on captives, see section at Captive Insurance Companies in this Chapter.

If the UBG apportions its income under IITA § 304(a), then in order for Schedule 80/20 to apply, the captive insurance company must qualify as an insurance company under the provisions of the Internal Revenue Code (IRC) so that it is excluded from the UBG because it apportions its income under IITA § 304(b). If upon audit we determine that the captive insurance company does not meet the definition of an insurance company

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

under the IRC so that the captive should apportion its income under IITA § 304(a), then we will include the captive insurance company in the UBG, making Schedule 80/20 inapplicable to those premiums.

If all of the members of the UBG including a captive insurance company are owned by a bank holding company under IITA § 1501(a)(8)(A), then all of the subsidiaries qualify for apportionment under IITA § 304(c), including the captive insurance company. Since the same apportionment method applies to all companies, the captive insurance company will be included in the unitary group and apportion its income under the rules in IAC §§ 100.3400 and 100.3405, making Schedule 80/20 inapplicable to those premiums.

See Audit Manual Chapters 24 and 25 for more information on the 80/20 modifications.

8. Example A: Captive Insurance Company, Noncombination Reversal Modifications

A unitary business group of transportation companies ("UBG") owns a captive insurance company ("Captive"). UBG apportions its business income under IITA § 304(d). Captive qualifies as an insurance company for federal, and therefore, Illinois purposes. Captive provides a variety of business lines of insurance for UBG and federally files a federal Form 1120-PC and is included in UBG's federal consolidated group.

For TYE 12/15, UBG paid insurance premiums of $25,000,000 to Captive for its annual insurance coverage. In 2015, UBG had damage to one of its truck and cargo, resulting in a $2,000,000 insurance claim that Captive reimbursed. That $2,000,000 otherwise would have been deductible on UBG's federal return as a loss under IRC § 165. Therefore, UBG correctly reported two modifications on its Illinois Schedule 80/20: a $25,000,000 insurance premiums addback (IITA § 203(b)(2)(E-12) and a $2,000,000 insurance reimbursement subtraction (IITA § 203(b)(2)(Y).

This entitles Captive to report the reversal modifications. Captive should report an addback modification required for UBG's $2,000,000 insurance reimbursement (IITA § 203(b)(2)(Y)). Captive should also report a subtraction modification for the $25,000,000 in insurance premiums it received that were added back by UBG (IITA § 203(b)(2)(V)). This set of modifications reported by UBG and Captive eliminates the tax effects of the related-party insurance contract between the two companies.

The following screenshots show what Captive would report on its 2015 Schedule 80/20, p. 1 and p. 3:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Illinois Department of Revenue
2015 Schedule 80/20

Captive — Enter your name as shown on your Illinois tax return.

22-2222222 — Enter your federal employer identification number (FEIN).

Read this information first - If you attach multiple copies of Schedule 80/20 to your return, complete this page once and attach it as the last page of Schedule 80/20. Failure to do so may result in a delay in the processing of your return.

Step 4: Figure your total subtraction modification

Line	Description	Line	Amount
19	Enter the amount from Line 18.	19	0.00
20	Subtraction for losses insured by an affiliated insurance company. See instructions.	20	
21	Enter the name and FEIN of the affiliated insurance company from Line 20. Name ______ FEIN ___-______		

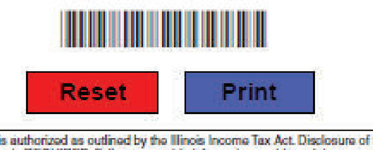
Note: **If you are not an affiliated company,** skip Lines 22 through 31 and complete Line 32.

If you are an affiliated company, complete Lines 22 through 31 and Line 32.

Line	Description	Line	Amount
22	Enter the name and FEIN of the U.S. company that paid you interest or intangible expenses. Name UBG FEIN 11-1111111		
23	Enter the amount of interest received from the U.S. company.	23	
24	Enter the amount of interest paid to you from the U.S. company's Schedule 80/20, Line 5.	24	
25	Enter the lesser of Line 23 or Line 24.	25	
26	Enter the intangible income received from the U.S. company.	26	
27	Enter the amount of intangible expenses paid to you from the U.S. company's Schedule 80/20, Line 8.	27	
28	Enter the lesser of Line 26 or Line 27.	28	
29	Enter the amount of insurance premiums received from the U.S. company.	29	25,000,000.00
30	Enter the amount of insurance premiums paid to you from the U.S. company's Schedule 80/20, Line 11.	30	25,000,000.00
31	Enter the lesser of Line 29 or Line 30.	31	25,000,000.00

All taxpayers complete Line 32.

32 Total subtraction modifications. Add Lines 19, 20, 25, 28, and 31. Enter the amount here and see instructions. **32** 25,000,000.00



Schedule 80/20 (R-12/15)

This form is authorized as outlined by the Illinois Income Tax Act. Disclosure of this information is REQUIRED. Failure to provide information could result in a penalty.

Page 3 of 3

C. NONBUSINESS INCOME ITEMS

Prior to 1995, the IL-1120 instructions, Part III- General Instructions, item 2A stated, "All income of an insurance company, including interest, dividends, rentals, and capital gains and losses, is business income under the IITA." The above statement has been deleted from the IL-1120 instructions since neither the IITA nor the IAC contains any language supporting this position. Insurance companies are subject to the same business and nonbusiness income rules as any other entity. REF: IAC § 100.3010.

See Audit Manual Chapter 26 for more information on nonbusiness income.

D. APPORTIONMENT FORMULA

All insurance companies are required to apportion their income under IITA § 304(b). IITA § 304(b)(1) states in part:

> ... [B]usiness income of an insurance company for a taxable year shall be apportioned to this State by multiplying such income by a fraction, the numerator of which is the direct premiums written for insurance upon property or risk in this State, and the denominator of which is the direct premiums written for insurance upon property or risk everywhere. For purposes of this subsection, the term "direct premiums written" means the total amount of direct premiums written, assessments and annuity considerations as reported for the taxable year on the annual statement filed by the company with the Illinois Director of Insurance in the form approved by the National Convention of Insurance Commissioners or such other form as may be prescribed in lieu thereof.

IAC § 100.3420(c) summarizes the items included in the factor:

- The apportionment factor can only include receipts that are included in either “gross premiums written” under IRC § 832(b)(4)(A) or “gross amounts of premiums” under IRC § 803(a)(1)(A) .

- Only those receipts (premiums) that are included in base income subject to apportionment are includible in the apportionment formula.

- Only direct premiums written for insurance, assessments against mutual policyholders and consideration for annuity contracts that include elements of insurance are included in the apportionment formula. Other receipts are excluded from the apportionment factor, even if included in net income.

The following receipts are not included in the premiums apportionment factor:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

- Interest, dividends, and other income from investments
- Gains and losses from adjustments to reserves
- Deposit-type funds
- Premiums on which state income taxes are prohibited by federal law

In cases where there is no Annual Statement or Schedule T, IAC § 100.3420(d) states:

> ...If an insurance company does not file an annual statement with the Director of Insurance or if any direct premiums written by an insurance company are not allocated to a specific state on its annual statement, that insurance company shall include in the numerator of its apportionment factor the direct premiums written for insurance on property or risk in this State, determined in accordance with the determination of gross taxable premium written under Section 409(1) of the Illinois Insurance Code [215 ILCS 5/409(1)]…

The above will apply to a captive insurance company since most of them do not file with the Director of Insurance. As long as the captive insures risk in Illinois and has nexus, it should have an Illinois premiums factor. Any insurance premiums received from an affiliate that are subtracted from base income under IAC § 100.2430(d)(5) are required to be excluded from the apportionment factor, also. For example, if a parent paid its captive insurance company $1,000,000 in insurance premiums that were subject to the IAC § 100.2430(c)(3) addition modification, the captive insurance would be allowed to subtract the $1,000,000 premiums from its base income. Since the $1,000,000 premiums were subtracted from base income, the captive insurance company would also have to exclude those premiums from its apportionment factor.

1. Property And Casualty Companies

The apportionment formula for a property and casualty insurance company will be Illinois direct premiums written divided by total direct premiums written. The information necessary to calculate the apportionment factor can be found on Schedule T -- Exhibit of Premiums Written of the Annual Statement filed with the Illinois Director of Insurance.

The amounts shown in Column 2 (Direct Premiums Written) are the only figures needed to calculate the apportionment formula. The total direct premiums everywhere are reported on Line 58 of Column 2. The Illinois direct premiums will be shown on Line 14 of Column 2. None of the items in Columns 3 through 8 should be included in the apportionment formula. The figures reported in Column 9 for Direct Premiums Written for Federal Purchasing Groups are included in the amounts reported in Column 2.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Therefore, the auditor should only use the figures reported in Column 2 in calculating the apportionment factor.

The column and line references used above are for Schedule T in the 2008 Annual Statement for property and casualty companies. The format and line numbers for this schedule may be different in other years. As explained below, the format and line numbers on Schedule T in the Annual Statements for life insurance companies are different.

2. Life Insurance Companies

The apportionment formula for a life insurance company will be Illinois direct premiums written divided by total direct premiums written. The information necessary to calculate the apportionment factor can be found on Schedule T – Premiums and Annuity Considerations of the Annual Statement filed with the Illinois Director of Insurance.

The direct premiums written shown on Schedule T include life insurance premiums (Column 2), annuity considerations (Column 3), and accident and health insurance premiums (Column 4). The total direct premiums written for each of these items is reported on Line 59 (Columns 2 through 4). In addition, the direct premiums written should also include company contributions for employee benefits plans (Line 90- Columns 2 through 4), dividends applied to purchase paid-up additions (Line 91- Columns 2 through 4), dividends applied to shorten endowment or premium paying period (Line 92- Columns 2 through 4), premium or annuity considerations waived under disability or other contract provisions (Line 93- Columns 2 through 4), and aggregate other amounts not allocable by State (Line 94 Columns 2 through 4). In summary, the total direct premiums written should include all of the items included in the total direct business (Line 95 Columns 2 through 4).

There are two other items on the Schedule T which have caused some confusion in calculating the apportionment factor for insurance companies. These items are “reinsurance assumed” and “Deposit-Type Contracts” (see next section at Deposit-Type Funds). These two items are reported on the Schedule T for life insurance companies, but NOT for property and casualty companies. In calculating the total direct premiums everywhere for a regular insurance company, the auditor should NOT include any amounts reported for reinsurance assumed (Line 96). In addition, NO adjustment is required to the total direct premiums written (Line 95) for reinsurance ceded (Line 98). Reinsurance companies, defined by IITA § 304(b)(2), are handled differently than a regular insurance company. Refer to the section on reinsurance companies at Illinois Taxation of Reinsurance Companies.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

After calculating the amount of total direct premiums written, the amount of Illinois direct premiums written should be determined. The auditor needs to exercise care in calculating the Illinois portion because not all of the items included in the total premiums everywhere are broken down by state on Schedule T. The auditor should first pick up the Illinois premiums reported on Line 14 (Columns 2 through 4). This will account for all of the Illinois direct premiums written reported on the subtotal for direct premiums shown on Line 59 (Columns 2 through 4). The auditor will then have to request a state by state breakdown of the company contributions for employee benefit plans (reported on Line 90- Columns 2 through 4), dividends applied to purchase paid-up additions (reported on Line 91- Columns 2 through 4), dividends applied to shorten endowment or premium paying period (reported on Line 92- Columns 2 through 4), premium or annuity considerations waived under disability or other contract provisions (reported on Line 93- Columns 2 through 4), and aggregate other amounts not allocable by state (reported on Line 94 Columns 2 through 4).

In almost all instances, the taxpayer should be able to provide a state-by-state breakdown of the above items. In the rare event that the taxpayer is unable to provide a state-by-state breakdown of any of the above items, the item for which the taxpayer cannot provide a state-by-state breakdown should be excluded from the apportionment factor. There are no throwback provisions in the IITA for the insurance apportionment factor.

The column and line references used in this section are for Schedule T in the 2008 Annual Statement for life insurance companies. The format and line numbers for this schedule may be different in other years.

3. Deposit-Type Funds

The National Association of Insurance Commissioners (NAIC) explains deposit-type funds in their Statement of Statutory Accounting Principles No.50, Classification and Definitions of Insurance Contracts in Force:

> Deposit-type contracts do not incorporate insurance risk. Contracts issued by insurers that do not incorporate risk from the death or disability of policyholders (mortality or morbidity risk) are more comparable to financial or investment instruments issued by other financial institutions than to insurance contracts.

It then goes on to say:

> [D]eposit-type contracts shall include all contracts without any life or disability contingencies, including, but not limited to, certain types of the following policy categories:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Supplemental contracts
- Lottery payouts
- Structured settlements
- Guaranteed interest contracts
- Income settlement options
- Dividend and coupon accumulations
- Annuities certain
- Premium and other deposit funds

The most common example of items included in this column is amounts received by an insurance company to purchase a deferred annuity.

For 1990 and subsequent years, deposit-type funds can be found of Schedule T, Column 6 and Line 1(a) of the summary of operations. In 1990, the format of Schedule T was changed to add Column 6 that was originally described as "annuity and other fund deposits" and was subsequently described as "deposit-type funds". By 2008, deposit-type funds were reported under “Deposit-Type Contracts” in Column 7 of the Schedule T for life insurance companies.

a) History of Reporting Deposit-Type Funds

Historically the Department’s view was that deposit-type funds should be excluded from the factor. However, in an Administrative Hearing decision on ABC Co., IT# 04-1 (the cleansed name) dated December 5, 2003, the ALJ ruled that deposit-type funds should be included in the numerator and denominator of the taxpayer’s apportionment formula.

After that hearing the Department issued IAC § 100.3420 that addressed deposit-type funds and other issues. It is the Department position that deposit-type funds should not be included in the apportionment factor. It states in IAC § 100.3420(c)(3):

> (3) Examples of receipts that are excluded from the apportionment factor include:
>
> > (C) Deposit-type funds. This is due to the fact that deposit-type funds involve no insurance risk and are therefore reported separately from premiums, assessments and annuity consideration on the annual report.

The regulation applies retroactively to all years that are within statute.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

b) The Department's Policy

The Department's policy is as follows on DTF (Deposit-Type Funds).

- All DTF will be excluded from the numerator and denominator of the insurance factor for all years.

- If the auditor included DTF in an unagreed audit that is before the Informal Conference Board (ICB), the auditor should contact the ICB conferee concerning that issue. If there are other unagreed issues before ICB, they will have to be resolved by ICB prior to issuing the Action Decision.

- In cases where the auditor included DTF in the insurance factor and the taxpayer signed the IL-870 with payment, the auditor will need to revise the IL-870 and create the claim for refund, if excluding the DTF creates a refund. The incorrect IL-870 will be marked SUPERSEDED.

- If the auditor included the DTF in the insurance factor, and the taxpayer signed the IL-870 creating an overpayment, the IL-870 must be revised and the auditor will have to issue an EDA-122 if the change creates a liability. The taxpayer will have the right to go to ICB. However, if the statute of limitations will expire prior to the expiration of the 60-day period for seeking ICB Review and the taxpayer will not extend the statute of limitations, then the taxpayer cannot go to ICB. In this situation, an EDA-122 should not be issued. The auditor will need to issue a new EDA-143 Audit Results with the new figures.

  Note: If there is less than six months remaining on the statute, you should discuss the proper procedure with your supervisor since the audit must still be submitted to Audit Review with at least four months remaining on the statute.

- If the auditor included DTF in the insurance factor and the case has been submitted to Technical Review, and GenTax shows that the audit has not been processed, the auditor will need to email Tad Tucker to have the case returned for revision. If there is a statute problem and an IL-872 waiver cannot be obtained, it will be up to Technical Review to have either a Reviewer or someone from Discovery reverse the DTF factor.

- If DTF were included in the factor and the audit has been processed, the auditor should contact the taxpayer and advise them to file claims for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

credit, if excluding the DTF from the factor will create a refund. If the audit resulted in a refund and excluding DTF will reduce the refund, then the auditor should submit an SC-137 Request For Audit and attempt to reaudit those periods and recover the refund under the erroneous refund provisions. If the normal statute period has expired, the Department has 2 years from the date of the erroneous refund to issue a Notice of Deficiency under IITA § 905(g) and IAC § 100.9320(g). The auditor should request a new track number.

Note: An IL-872 cannot be used to extend the two-year erroneous refund statute in IITA § 905(g). If there is a short-period remaining on this statute, the auditor will have to submit an SC-137 Referral for Audit and recommend that Office Programs or Discovery do a quick reaudit.

Example #7

An insurance company timely files its 2005 and 2006 Forms IL-1120 by the extended due date and excludes DTF from its insurance premiums factor. On December 15, 2007, the taxpayer files a Form IL-1120-X for 2005 to include DTF in the factor and receives a refund of $10,000. The taxpayer files no amended return for 2006. The auditor will exclude the DTF from the insurance factor for 2005 and recover the refund. If the IL-1120-X has not been processed, the auditor will issue an EDA-125 Notice of Proposed Claim Denial.

Example #8

The taxpayer excluded DTF for 2003 and 2004, but the auditor included the DTF. The taxpayer agreed to the changes and received a refund for both years. There are now amended returns for 2003 and 2004 that increases federal taxable income. The normal statute on 2003 is expired, but the erroneous refund provisions are within statute. The auditor should reverse the audit adjustment for both years and attempt to recover the refund.

Example #9

The taxpayer included the DTF for 2003 and 2004 and the auditor made no audit adjustment to the DTF. The audit was processed. Now there is an RAR for both years that increases federal taxable income. The normal statute on 2003 is expired. Excluding DTF from the factor creates a liability. The auditor cannot exclude the DTF from the insurance factor for 2003 because that statute is expired. Where the statute is expired, we can only assess the tax due on the RAR using the existing

factor in GenTax. However, if excluding DTF for 2003 decreases the RAR tax due, we can change the factor to reduce the amount of tax due from the RAR. In either case the factor can be changed for 2004 if it is within statute.

Example #10

The taxpayer included DTF for 2003 and 2004 and the auditor made no audit adjustment to the DTF. The audit was processed. Now there is an RAR for both years that decreases federal taxable income. As a result of the RAR, the taxpayer has filed Forms IL-1120-X for 2003 requesting a refund of $10,000 and $15,000 for 2004. The statutes for both 2003 and 2004 have expired. The auditor can exclude the DTF from the numerator and denominator and reduce the refunds in each year to zero (since no notice will be issued, there is no statute – see *Lewis v. Reynolds*). The claims can only be reduced to zero – no deficiency can be proposed.

4. Schedule T Examples

The primary source document for insurance company apportionment information is the taxpayer's Schedule T from their Annual Statement. Schedule S (Life) or Schedule F (nonlife) can be used if reinsurance premium information is needed. Other schedules, like Schedule P, may also show reinsurance information. The following two screenshots show the 2018 version of the Schedule T. Example 1 shows the 2018 Schedule T for property and casualty companies. Example 2 shows the 2018 Schedule T for a life insurance company. Some comments are shown below each example noting the critical lines for apportionment purposes.

*Note: The information highlighted was not done by Technical Support to emphasize anything. That simply was highlighted by the NAIC in the draft PDFs available online. Remember, the Schedule T line names and numbers in these examples may differ, depending on the tax year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(b) **Explanation of basis of allocation of premiums by states, etc.**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Determining the apportionment factor for a property and casualty insurance company under IITA § 304(b)(1) should usually be straightforward. Generally, this will only require pulling two lines off the Schedule T, Column 2 "Direct Premiums Written". On the form above, the Illinois direct premiums written are in Column 2, Row 14 ("Illinois"). That would be the Illinois numerator. The direct premiums written everywhere are found under Column 2, Row 59 ("Totals"). That would be the Illinois denominator.

Determining the taxpayer's apportionment factor requires the auditor to obtain the Annual Statement for each insurance company under audit. If the property and casualty insurance company qualifies as a reinsurance company and apportions under IITA § 304(b)(2), the auditor will need to obtain the Schedule F and related schedules for reinsurance premiums. See section "G. ILLINOIS TAXATION OF REINSURANCE COMPANY" for more information on reinsurance companies.

(a) Active Status Counts:

L – Licensed or Chartered - Licensed insurance carrier or domiciled RRG ______ R – Registered - Non-domiciled RRGs ______
E – Eligible - Reporting entities eligible or approved to write surplus lines in the state ______ Q – Qualified - Qualified or accredited reinsurer ______
N – None of the above - Not allowed to write business in the state ______

(b) Explanation of basis of allocation by states, premiums by state, etc.

Determining the apportionment factor for a health insurance company under IITA § 304(b)(1) is similar to a property and casualty insurance company. The principal

difference is that the health insurance has a few additional columns for lines of insurance to consider. This Schedule T is showing six different columns where the insurer can allocate premiums:

- 2. Accident & Health Premiums
- 3. Medicare Title XVIII
- 4. Medicaid Title XIX
- 5. Federal Employees Health Benefits Plan Premiums
- 6. Life & Annuity Premiums & Other Considerations
- 7. Property/Casualty Premiums

Any amounts in these columns allocated to Illinois (row #14) are included in the Illinois numerator. The totals of the columns 2-7 are in column 8. Essentially, the amount reported to Illinois in Column 8 should be the Illinois numerator, unless the company has not included any factor premiums in the Schedule T. Remember, Column 9 Deposit-Type Contracts, should not be included in the apportionment factor (IAC § 100.3420(c)(3)(C)).

In the past, premiums under *3. Medicare Title XVIII* have caused confusion about being included in the factor. Because of the language in IAC § 100.3420(d), certain insurance receipts normally excluded from taxation by the Illinois Insurance Code are included in our apportionment factor. This is the basis to include receipts from *Medicare Title XVIII, Medicaid Title XIX,* and *Federal Employees Health Benefits Plan Premiums* in the apportionment factor.

The other difference from the property & casualty is Row 60 *Reporting entity contributions for Employee Benefit Plans*. If there is an amount on this line, the auditor will need to request a state-by-state breakdown schedule of this line, in order to verify amounts allocable to Illinois. If the taxpayer does not provide that support, this line should be excluded from the factor.

The denominator will be Column 8, Line 61 *Total (Direct Business)* if there is an included amount on Line 60. If there is no amount on Line 60 or it is excluded, then Column 8 Line 59 *Subtotal* would be the denominator.

Determining the taxpayer's apportionment factor requires the auditor to obtain the Annual Statement for each insurance company under audit. If the health insurance company qualifies as a reinsurance company and apportions under IITA § 304(b)(2), the auditor will need to obtain the Schedule F and other related schedules for reinsurance premiums. See section "G. ILLINOIS TAXATION OF REINSURANCE COMPANY" for more information on reinsurance companies.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(c) Column 4 should balance with Exhibit 1, Lines 6.4, 10.4 and 16.4, Cols. 8, 9 and 10, or with Schedule H, Part 1, Column 1, Line 1 indicate which: ______

Rev. 10/17/18

Determining the apportionment factor for a life insurance company under IITA § 304(b)(1) is similar to a health insurance company. The principal difference is that the life insurance has fewer columns of insurance lines. It does not have columns for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Medicare, Medicaid, Federal Employees, and Property/Casualty. The following columns are where the auditor would pick up the Illinois premiums and everywhere:

- 2. Life Insurance Premiums
- 3. Annuity Considerations
- 4. Accident and Health Insurance Premiums, Including Policy, Membership, and Other Fees

Any amounts in these columns allocated to Illinois (row #14) are included in the Illinois numerator. Remember, Column 7 *Deposit-Type Contracts*, should not be included in the apportionment factor (IAC § 100.3420(c)(3)(C)).

The life insurance Schedule T has Row 90 *Reporting entity contributions for Employee Benefit Plans*, similar to health insurance companies. However, a life insurance Schedule T has four other aggregate lines the auditor has to consider. These five lines are as follows:

- 90. Reporting entity contributions for employee benefits plans
- 91. Dividends or refunds applied to purchase paid-up additions and annuities
- 92. Dividends or refunds applied to shorten endowment or premium paying period
- 93. Premium or annuity considerations waived under disability or other contract provisions
- 94. Aggregate other amounts not allocable by State

If there is an amount on these lines, the auditor will need to request a state-by-state breakdown schedule for the lines, in order to verify amounts allocable to Illinois. If the taxpayer does not provide that support, amounts on these lines should be excluded from the factor.

The denominator will be the total of Columns 2, 3, 4 on Line 95 *Totals (Direct Business)*. Remember to back out any amounts on Lines 90-94 if not supported by a state allocation schedule.

Determining the taxpayer's apportionment factor requires obtaining the Annual Statement for each insurance company under audit from the taxpayer. If the life insurance company qualifies as a reinsurance company and apportions under IITA § 304(b)(2), the auditor will need to review the Schedule S for reinsurance premiums. Line 96 *Plus reinsurance assumed* indicates the amount of premiums received from reinsurance and can be used in the Reinsurance test. See section "G. ILLINOIS TAXATION OF REINSURANCE COMPANY" for more information on reinsurance companies.

E. IITA § 201(D-1) RATE REDUCTION FOR FOREIGN INSURERS

PA 91-643 (1999) added IITA § 201(d-1) to reduce taxes on insurance companies domiciled in states that do not impose income tax on insurance companies or tax them at a lower rate than does Illinois. This section reduces the regular and replacement tax rates to the point where the total net tax (net of all credits) owed by a foreign insurer is equal to the income tax it would pay to its home state on the amount of business conducted in Illinois. In 1999 the Department developed Schedule INS and UB/INS for taxpayers to use in computing this reduction.

Every state in the union has a retaliatory tax on insurance companies. Under a retaliatory tax, a foreign* insurance company adds up all the taxes it owes to the state for the year, and then computes all the taxes it would owe to its state of domicile if it were domiciled in the taxing state and was conducting the same amount of business in its home state that it is conducting in the taxing state. If the sum of these pro forma taxes is higher than the sum of the actual taxes, the excess is the amount of retaliatory tax owed.

> *Note: A foreign insurer is one formed under any law other than Illinois law. Because most (if not all) states require an insurance company formed under their law to be domiciled within the state as well, most commonly it refers to a foreign insurer domiciled in another state.

Because Illinois is one of the few states that impose its income tax on insurance companies, Illinois-domiciled companies are almost automatically subject to retaliatory tax equal to their pro forma Illinois income tax on their business done in every state outside Illinois. IITA § 201(d-1) minimizes those retaliatory taxes by reducing foreign companies' income tax to the amount they would pay to their home state on the same income. If a state imposes no income tax, the Illinois income tax on insurance companies domiciled in that state is reduced to zero.

This reduction is limited so that it never reduces a company's total Illinois taxes to an amount less than 1.75% of its taxable Illinois premiums. This amount is slightly below the most common insurance company privilege tax imposed by states, which is 2% of premiums. Reducing a company's total Illinois taxes below the 2% amount will not cause any further reduction in retaliatory tax owed by an Illinois company in one of those states; all it does is reduce Illinois revenues. So setting a 1.75% floor gives Illinois companies a little leeway in states with lower privilege taxes, while still limiting our revenue losses.

> Note: Originally the floor was 1.25%, but this was increased to 1.75% by PA 93-029 effective for tax years ending on or after December 31, 2003.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For TYE 12/31/17 and after, insurance companies will be able to be combined with other companies that apportion under different subsections of IITA § 304. This is the elimination of the “noncombination rule” (see F. NONCOMBINATION RULE UPDATE section). However, foreign insurers will still be able to use the Sch. UB/INS as before to determine if any rate reduction applies to the foreign insurers that are members of a unitary business group (UBG) that would lower the UBG’s Illinois tax liability.

Example #11:

If an Indiana insurance company incurs a total liability for all kinds of Illinois taxes (other than the retaliatory tax) equal to $1,000, and an Illinois company doing the exact same business in Indiana would incur a liability of $1,200, the Illinois retaliatory tax statute imposes a $200 liability on the Indiana company payable on IL446-0126-P Privilege and Retaliatory Tax Return for Property and Casualty Insurers filed with the Illinois Department of Insurance. See regulation Title 50, Part 2515. The Schedule INS does not allow the Indiana company to reduce its Illinois income tax and replacement tax.

1. Legislative History and Foreign State’s Treatment of Illinois Insurers

Section 201(d-1) was added to the IITA by PA 91-643 (SB 338). The legislative history indicates that the purpose of IITA § 201(d-1) was to prevent Illinois from imposing a higher income tax on a foreign insurance company than the foreign insurance company’s state imposes on Illinois insurance companies. This is to prevent application of the foreign state’s retaliatory tax against Illinois companies. During floor debate regarding SB 338, Senator Peterson described the purpose of the bill as follows:

> [The bill] provides that if a foreign insurer’s based in the State that imposes an income tax on Illinois insurers doing business in the State, then the Illinois income tax and personal property replacement tax income tax rates shall be reduced to the dollar amount of these Illinois taxes equal that tax in the foreign insurer’s state on the same income. (State of Illinois, 91st G.A., Senate Transcript p. 129, 54th Legislative Day, May 27, 1999)

In the House, Representative Moore described the purpose of SB 338:

> As you know, Illinois insurance companies currently pay taxes to states all across the nation in the form of retaliatory taxes. And these taxes are imposed to retaliate for any amount that the Illinois charges to insurance companies domiciled outside of Illinois. The reason for the change is that the home states of the foreign-based insurance companies are now charging Illinois companies retaliatory taxes. (State of Illinois, 91st G.A., House Transcript p. 71, 58th Legislative Day, May 25, 1999)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

IITA § 201(d-1) was later amended by PA 91-0860 (SB 1326). Among other changes, SB 1326 exempted IITA Sec. 201(d-1) from sunset. During floor debate, Representative Moore again described the purpose of IITA § 201(d-1):

> Senate Bill 1326 amends the Income Tax Act concerning the rate reduction allowed for foreign insurers. Insurers, foreign and domestic, pay both a premium tax and a corporate tax – income tax in Illinois. The majority of states only impose a premium tax. Thus, Illinois insurers are subject to retaliation based on the Illinois income tax in those states. Paying these higher taxes means Illinois insurers are at a competitive disadvantage in other states. As a solution, you may remember that we passed Senate Bill 338 last year to solve this problem. The bill would make a permanent – would make permanent the provisions and – this bill would make it permanent.

The legislative debate makes clear that the purpose of IITA § 201(d-1) is to prevent application of retaliatory taxes against Illinois insurance companies. To accomplish that purpose, the Section reduces the Illinois taxes that a foreign insurance company pays in Illinois to the same amount that an Illinois company would pay in the foreign state. Therefore, the application of IITA § 201(d-1) must consider how the foreign state taxes Illinois insurance companies, and not how the foreign state taxes its own insurance companies. The language in IITA § 201(d-1) which adjusts the Illinois rate to zero where no income tax is imposed by the foreign insurer's state of domicile means that the Illinois rate is reduced to zero where the foreign insurer's state of domicile does not impose an income tax on Illinois insurance companies.

For example, Indiana Code § 27-1-20-12 imposes a retaliatory tax where the laws of another state impose taxes on Indiana insurance companies greater than are required under the laws of Indiana. Indiana Code § 6-2.1-8 exempts foreign insurance companies from the Indiana Adjusted Gross Income Tax. Therefore, since Illinois insurance companies do not pay income tax in Indiana, to prevent application of Indiana's retaliatory tax, Indiana insurance companies must be similarly treated for purposes of the Illinois income tax. Accordingly, an Indiana-domiciled foreign insurer should check the box and write zero on Step 2, Line 25 of its 2015 Schedule UB/INS. Of course, the rate reduction remains limited by the provisions of IITA § 201(d-1)(1), which limits the tax reduction to 1.75% of net premiums taxable under Section 409 of the Illinois Insurance Code. This limit is calculated in Step 2 of Schedule INS and Step 3 of Schedule UB/INS.

2. "Privilege Tax" Clarification on Schedules INS and UB/INS

In calculating the IITA § 201(d-1) rate reduction, a taxpayer may try to argue what "privilege tax" amount to use on the Schedules UB/INS or INS from the taxpayer's

Illinois Privilege Tax Return. The specific line on the Schedules UB/INS and INS is called "The privilege tax imposed under Section 409 of the Illinois Insurance Code" and found under Step 3, Line 28a on the 2015 Schedule UB/INS and under Step 2, Line 7a on the 2015 Schedule INS. The Illinois Privilege Tax return shows a "Privilege Tax Before Credits" and a "Net Privilege Tax". The "Net Privilege Tax" is the privilege tax reduced by fire department taxes, new markets tax credit, and the intergradation offset (the excess of paid Illinois income tax over 1.5% of the net taxable premiums). A taxpayer may try to report the higher "Privilege Tax Before Credits" on the Schedules UB/INS or INS. That is incorrect. The taxpayer should only report the "Net Privilege Tax" on the Schedule INS line for "The privilege tax imposed under Section 409 of the Illinois Insurance Code".

There are several reasons for this. First, Illinois statutes reflected on the Schedules UB/INS and INS line require "The privilege tax imposed under Section 409 of the Illinois Insurance Code". Subsection 409(2) of the Illinois Insurance Code states that the privilege tax is reduced by the following:

> The annual privilege tax payment due from a company under subsection (4) of this Section may be reduced by: (a) the excess amount, if any, by which the aggregate income taxes paid by the company, on a cash basis, for the preceding calendar year under Sections 601 and 803 of the Illinois Income Tax Act exceed 1.5% of the company's net taxable premium written for that prior calendar year, as determined under subsection (1) of this Section; and (b) the amount of any fire department taxes paid by the company during the preceding calendar year under Section 11-10-1 of the Illinois Municipal Code.

These reductions are not called "credits" in the Illinois Insurance Act, but are simply reductions to annual privilege tax paid by insurers. Thus, Section 409 of the Illinois Insurance Act says that the "annual privilege tax payable" is ".5% of the net taxable premium written" reduced by the items shown above.

Second, Schedules UB/INS and INS state that the amounts for privilege tax, fire insurance company taxes, and fire department taxes reported must have been "deducted when you computed this year's federal taxable income". The taxpayer would only deduct the privilege tax paid or payable, which would be the privilege tax reduced by any fire department taxes paid. Doing otherwise would improperly inflate federal deductions.

Third, the fact that Illinois statute and Schedules UB/INS and INS provide a separate line for fire department taxes paid implies that the reported privilege tax should be reduced by fire department taxes paid. Otherwise, the Department would intentionally

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

be allowing the fire department taxes paid to count twice toward lowering its reduction floor. The world of taxation rarely double-counts any deduction.

The following examples illustrate the purpose of the reduction floor and properly reporting the privilege tax for purposes of the Schedules UB/INS and INS.

Example 12: The following shows the steps from the Schedule UB/INS to calculate the income tax reduction limit. The first column incorrectly reports the foreign insurer's ("FI's") privilege tax on line 28a. The second column is corrected:

		Line	Wrong	Right
25	Figure the pro forma tax imposed by the foreign insurer member's state or country of domicile, using the income shown on Lines 22 and 23. If the state or country of domicile does not impose an income tax on insurance companies, check the box and enter zero on this line. →	25	☒ 0.00	☒ 0.00

Step 3: Figure your foreign insurer member's income tax reduction limit

		Line	Wrong	Right
26	Enter the foreign insurer member's net premiums taxable under Section 409 of the Illinois Insurance Code and included in your Form IL-1120, Step 4, Line 29.	26	5,714,286.00	5,714,286.00
27	Multiply Line 26 by 1.75% (.0175). This is the total tax reduction limit.	27	100,000.00	100,000.00
28	Enter the following amounts deducted when you computed this year's federal taxable income for the foreign insurer members:			
a	The privilege tax imposed under Section 409 of the Illinois Insurance Code. **Do not include retaliatory tax**.	28a	30,000.00	21,000.00
b	The fire insurance company tax imposed under Section 12 of the Fire Investigation Act.	28b	.00	.00
c	Any fire department tax imposed under Section 11-10-1 of the Illinois Municipal Code.	28c	9,000.00	9,000.00
29	Add Lines 28a through 28c.	29	39,000.00	30,000.00
30	Subtract Line 29 from Line 27 (cannot be less than zero). This is the 1.75 percent income tax reduction limit.	30	61,000.00	70,000.00

Step 4: Figure your foreign insurer member's tax

		Line	Wrong	Right
31	Enter the foreign insurer member's pro forma tax from Line 25.	31	0.00	0.00
32	Enter the foreign insurer member's 1.75 percent income tax reduction limit from Line 30.	32	61,000.00	70,000.00
33	Enter the greater of Line 31 or Line 32.	33	61,000.00	70,000.00

FI's Line 27 is $100,000 (net premiums taxable times 1.75%). Next, FI's annual privilege tax (paid) is $21,000 and fire department tax is $9,000. FI might try to report $30,000 on 28a (first column), and $9,000 on 28c, for a line 30 of $61,000 ($100,000 - $30,000 - $9,000). By doing so, FI is essentially counting the fire department tax ($9,000) twice.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor should insist that FI report the annual privilege tax, which is $30,000 reduced by the $9,000, on Line 28a. Following the correct approach (second column), FI would have a higher income tax reduction limit on Line 30 of $70,000 ($100,000 - $21,000 - $9,000). Naturally, taxpayers would like to report the gross privilege tax from their Illinois Privilege Tax Return on Line 28a because it leads to a lower income tax reduction limit and potentially a lower tax.

Example 13: Using the information from Example 12, Foreign Insurer ("FI") would have a pro forma tax on its Illinois income in its home state of $0, but the correct floor (reduction limit) from Example 1 is $70,000. Thus, FI's Illinois total income tax will be reduced to $70,000 (but not $0).

Let's say the pro forma tax had been $85,000, and the floor is still $70,000. FI will then have its Illinois income tax reduced to $85,000 (not the floor of $70,000). We allow the reduction to be to the greater of FI's pro forma tax or the floor.

3. Reinsurance Company Test and Exclusion from IITA § 201(d-1)

Reinsurance companies are not allowed to claim the income tax reduction under IITA § 201(d-1). The statute excludes

> any insurer whose premiums from reinsurance assumed are 50% or more of its total insurance premiums as determined under paragraph (2) of subsection (b) of Section 304, except that for purposes of this determination premiums from reinsurance do not include premiums from inter-affiliate reinsurance arrangements…

So, the determination of a reinsurance company is the same method as for purposes of apportionment under IITA § 304(b)(2), with one difference: reinsurance premiums from affiliates do not count in the 50% test. This is a favorable provision for reinsurers, because some companies that are considered reinsurers for apportionment purposes may not be deemed a reinsurer for IITA § 201(d-1) after removing interaffiliate reinsurance premiums.

For the 50% test under IITA § 304(b)(2), reinsurers include intercompany reinsurance, and then eliminate the intercompany reinsurance premiums for determining the actual apportionment factor. However, the reinsurance test for purposes of the IITA § 201(d-1) rate reduction does not include intercompany reinsurance premiums. The §201(d-1) test still uses the 50% threshold and is performed on a separate company basis like the § 304(b)(2) test. The following examples illustrate this point.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example 14: Company RE is an insurance company and member of an Illinois UBG. RE receives $50 million in intercompany reinsurance premiums, $20 million in third-party reinsurance premiums, and $25 million in direct insurance premiums. For purposes of apportionment under IITA § 304(b)(2), RE qualifies as a reinsurance company, because 73.7% ((50+20)/95) of its premiums (intercompany and third-party) comes from reinsurance. However, we disregard the intercompany reinsurance premiums for the IITA § 201(d-1) test. RE would not qualify as a reinsurance company for purposes of the rate reduction, since its eligible reinsurance premiums are only 44.4% (20/45) of total premiums. In this example, RE would apportion as a reinsurance company, but also be eligible for the rate reduction under IITA § 201(d-1).

Example 15: Company RE is an insurance company and member of an Illinois UBG. RE receives $20 million in intercompany reinsurance premiums, $60 million in third-party reinsurance premiums, and $60 million in direct insurance premiums. For purposes of apportionment under IITA § 304(b)(2), RE qualifies as a reinsurance company, because 57.1% ((20+60)/140) of its premiums (intercompany and third-party) comes from reinsurance. However, we disregard the intercompany reinsurance premiums for the IITA § 201(d-1) test. RE would still qualify as a reinsurance company for purposes of the rate reduction, because its eligible reinsurance premiums are 50% (60/120) of total premiums. In this example, RE would apportion as a reinsurance company, and also be an ineligible reinsurance company for the rate reduction under IITA § 201(d-1).

As these two examples illustrate, if a company qualifies as a reinsurance company for IITA § 201(d-1), it will also be a reinsurance company for apportionment purposes. That is because if its third-party reinsurance premiums exceed its direct insurance premiums, then any additional intercompany reinsurance will only increase its reinsurance percentage for the 50% apportionment test under IITA § 304(b)(2). However, if it has intercompany reinsurance business, but its third-party reinsurance is less than its direct premiums, it might qualify as a reinsurance company for apportionment purposes but not under IITA § 201(d-1), making it eligible for the rate reduction.

Again, this provision is favorable for reinsurers who mostly reinsure affiliates, because they can still get the benefit of the IITA § 201(d-1) rate reduction. Other reinsurers with primarily third-party reinsurers will not get the benefit of the rate reduction.

4. Surplus Lines and IITA § 201(d-1)

The language in IITA § 201(d-1) states that the foreign insurer's tax will not be reduced below an amount equal to 1.75% "of the net taxable premiums written for the taxable year, as described by subsection (1) of Section 409 of the Illinois Insurance Code". Surplus line premiums are not subject to premiums tax under Section 409 of the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Insurance Code. This means that surplus line premiums are included in the apportionment factor under IITA § 304(b), but the surplus line premiums do not count for the IITA § 201(d-1) rate reduction floor. Since a surplus line company has no premiums taxable under Section 409, the 1.75% reduction floor will be zero. See related section at SURPLUS LINE COMPANIES in this Chapter for more information.

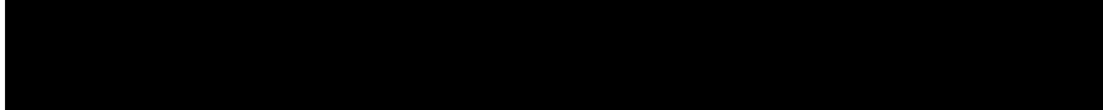
5. Schedule UB/INS and GenTax

In cases when the taxpayer is a foreign insurer, the auditor will need to verify that the correct tax amounts are used for Column A of the EDA-25. These taxpayers will file Schedule INS or Schedule UB/INS to adjust the tax that is due to Illinois. For tax years ending on or after December 31, 1999, foreign insurers whose state or country of domicile imposes a retaliatory tax on insurers domiciled in Illinois, are allowed a reduction in the tax rate to the point that the total Illinois tax imposed equals the tax the state or country of domicile would impose on the amount of Illinois net income.

Foreign insurer accounts in GenTax that have converted from Mainframe/Legacy will have the following "Stop Refund" indicator that can be viewed in the Audit Manager shown as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Additionally, the auditor will be able to see the Review of Foreign Insurer Tax box checked on the return display. This indicates that the taxpayer is a foreign insurer.



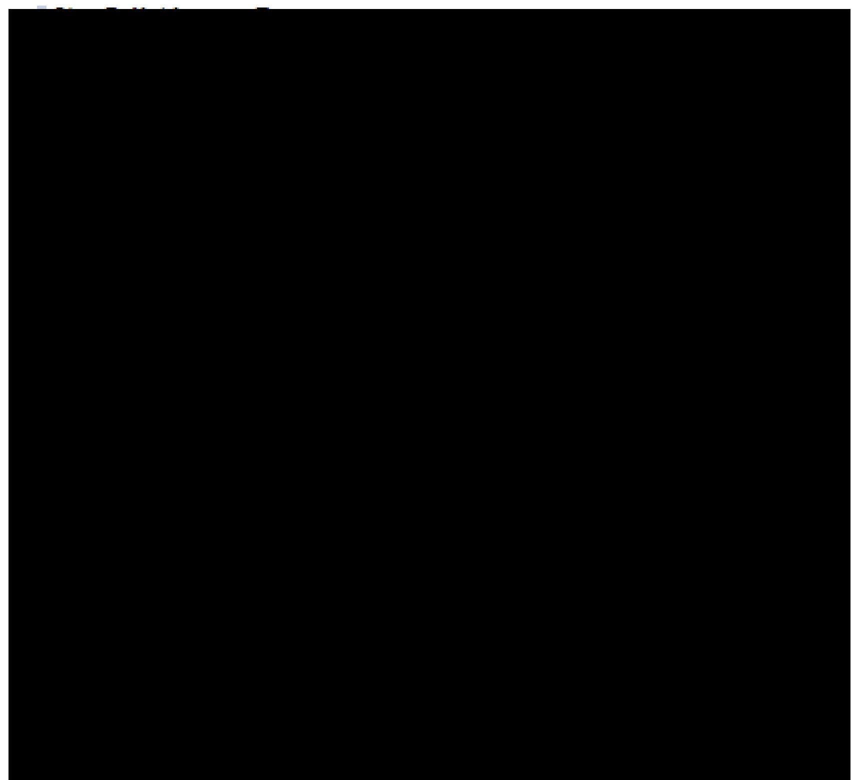
When this box is checked the tax shown on the return (Steps 6 and 7) may differ from the tax shown in the total tax figures (Step 8). The totals in GenTax may also be blank when this box is checked due to a conversion issue. See examples of both as follows:

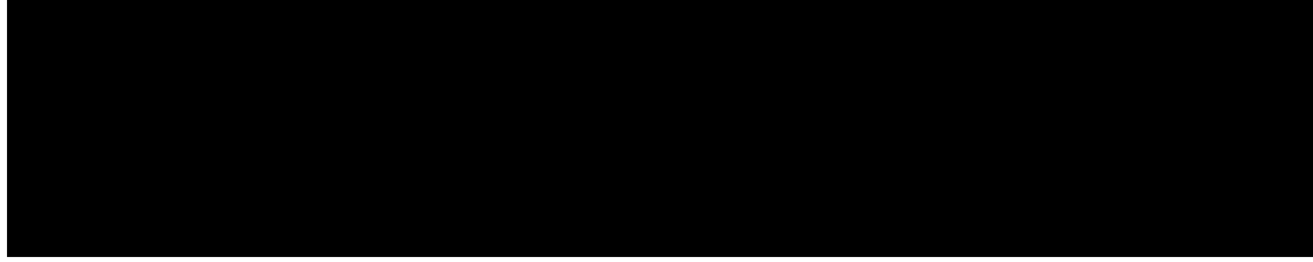
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #16

In GenTax the total tax in Steps 6 and 7 differ from the total tax in Step 8.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.





To verify the total tax amount, refer to the following Transactions Panel in GenTax for this tax year:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This panel shows that the converted tax amount on the original return was $477,989.

This can also be verified by looking at the following return detail in Legacy PDF Display:

The total tax is $477,989 and it can be seen that the net replacement tax was adjusted to reflect the foreign insurer tax difference.

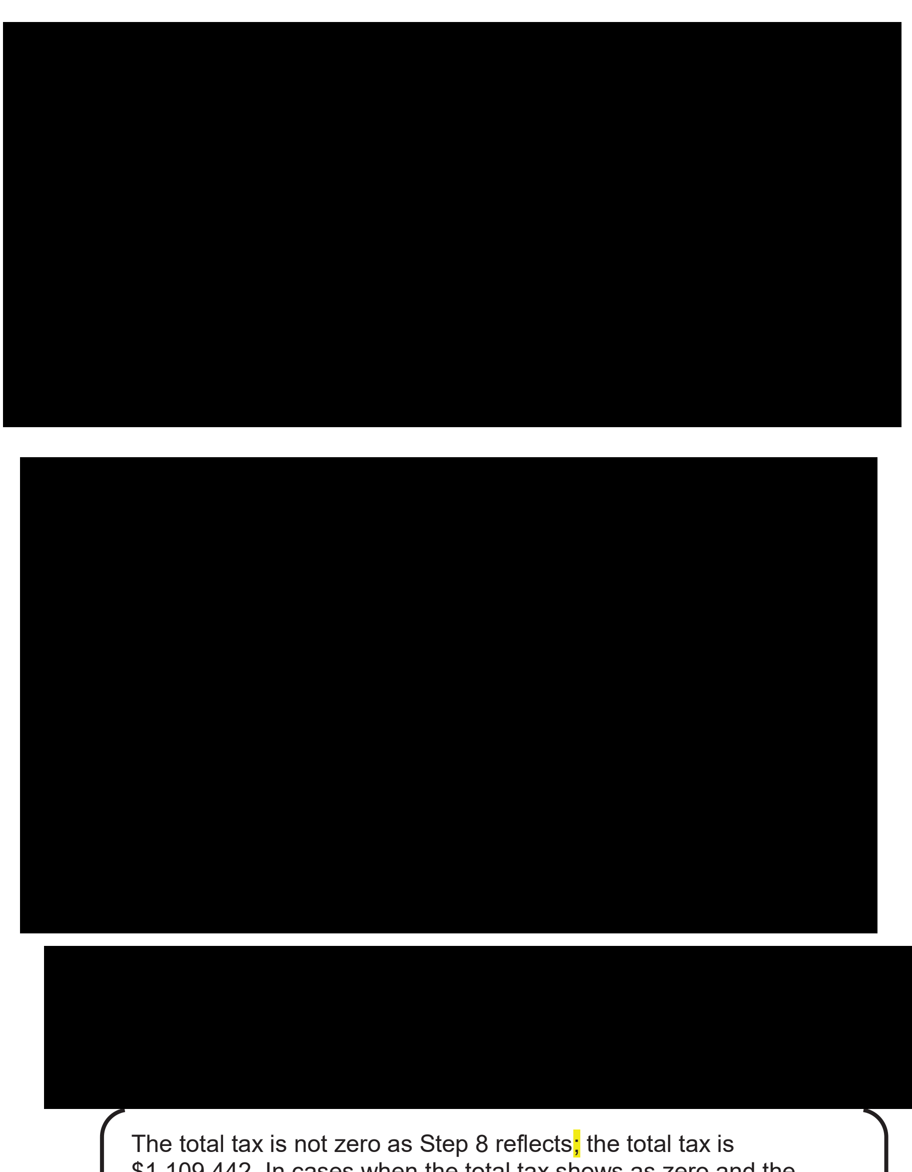
When completing an EDA-25 for a foreign insurer, the auditor needs to reflect the adjustment for the foreign insurer in Column A of the EDA-25. Due to the fact that there is no specific line on the EDA-25 for a foreign insurer tax adjustment, the adjustment needs to be entered on the “RT Tax Cr C/F” line in Part III of the EDA-25. To label this line the auditor will need to manually put an asterisk (*) next to the adjustment and then write “*Adj for Sch INS” at the bottom of the EDA-25. Additionally, the auditor needs to note this in the Auditor’s Comments prepared for the audit.

For the example above, the Column A adjustment amount would be $20,062.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Example #17

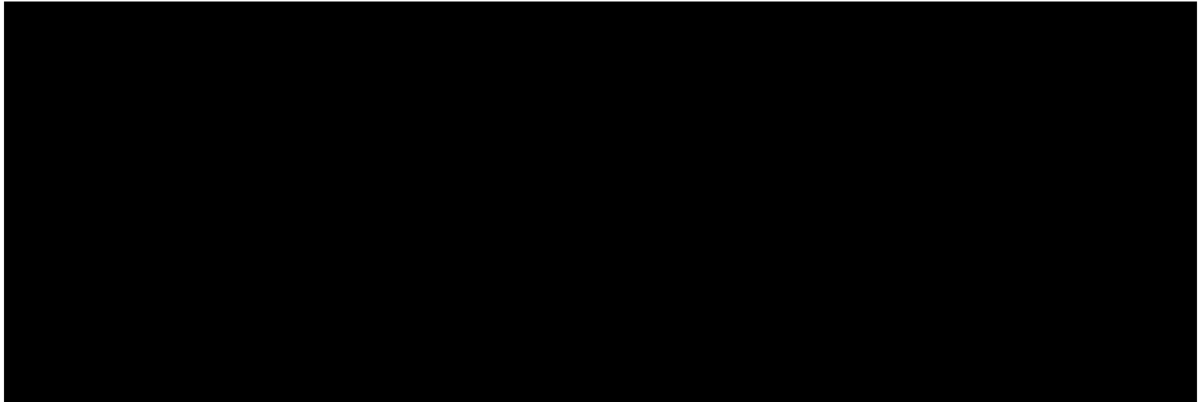
In GenTax. Steps 6 and 7 do not agree with the figures in Step 8 as the figures in Step 8 show zero tax. **Note, the screenshots for this example are from an older GenTax version and could not be updated, but the return and transaction screens are very similar to the current version of GenTax.



The total tax is not zero as Step 8 reflects; the total tax is $1,109,442. In cases when the total tax shows as zero and the "Review of Foreign Insurer Tax" box is checked, the auditor will need to verify the total tax amount.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

To verify the total tax amount refer to the following Transactions Panel for this tax year:



This panel shows that the converted tax amount on the original return was $1,109,442.

This can also be verified by looking at the return detail in Legacy PDF Display:

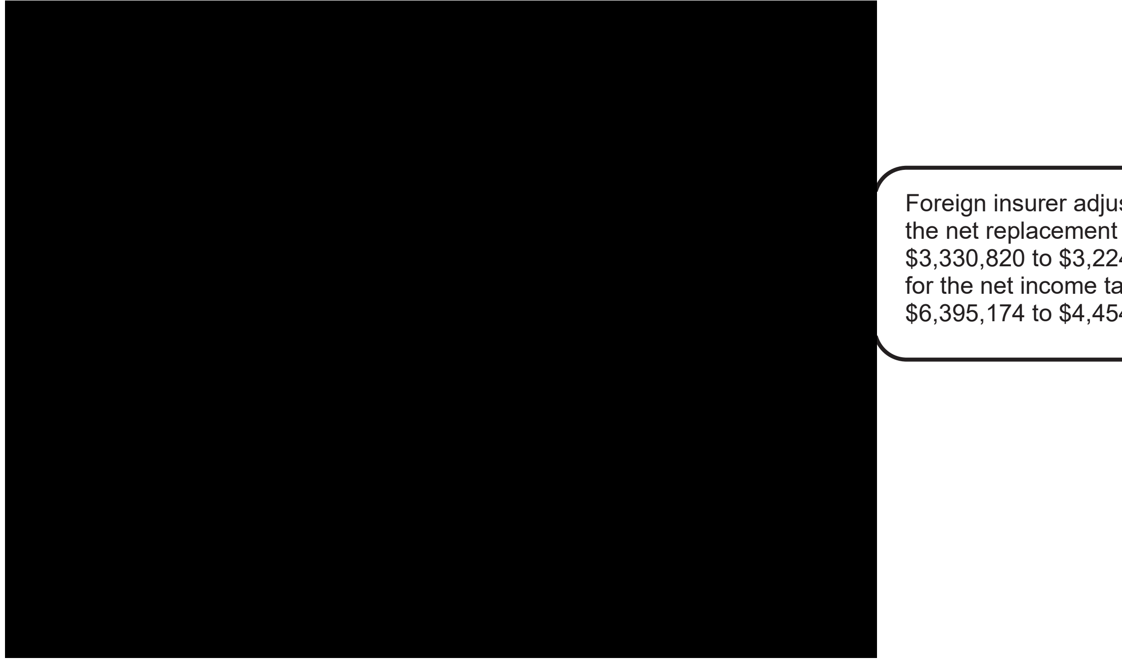
The total tax is $1,109,442 and it can be seen that both the net replacement tax and the net income tax were adjusted to reflect the foreign insurer tax difference.

When completing an EDA-25 for a foreign insurer, the auditor needs to reflect the adjustment for the foreign insurer in Column A of the EDA-25. Due to the fact that there is no specific line on the EDA-25 for a foreign insurer tax adjustment, the adjustment needs to be entered on the "RT Tax Cr C/F" line in Part III of the EDA-25. To label this line the auditor will need to manually put an asterisk (*) next to the adjustment and then write "*Adj for Sch INS" at the bottom of the EDA-25. Additionally, the auditor needs to note this in the Auditor's Comments.

For the example above, the Column A adjustment amount would be $1,174,784 ($782,269 + $1,501,957 - $1,109,442).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Foreign insurer accounts in GenTax that originally posted in GenTax:



Foreign insurer adjustment for the net replacement tax is $3,330,820 to $3,224,605 and for the net income tax is $6,395,174 to $4,454,370.

The total tax is $7,678,975 and it can be seen that both the net replacement tax and the net income tax figures were adjusted to reflect the foreign insurer tax difference.

When completing an EDA-25 for a foreign insurer, the auditor needs to reflect the adjustment for the foreign insurer in Column A of the EDA-25. Due to the fact that there is no specific line on the EDA-25 for a foreign insurer tax adjustment, the adjustment needs to be entered on the "RT Tax Cr C/F" line in Part III of the EDA-25. To label this line the auditor will need to manually put an asterisk (*) next to the adjustment and then write "*Adj for Sch INS" at the bottom of the EDA-25. Additionally, the auditor needs to note this in the Auditor's Comments.

For the example above, the Column A adjustment amount would be $2,047,019 ($3,330,820 + $6,395,174 - $7,678,975).

Schedule INS Examples

The following two examples were used in the Captive Insurance WebEx from June 2018 and illustrate two scenarios with a foreign insurer and the Schedule INS. For simplicity, the Schedule INS is used to illustrate how the rate reduction works instead of the Schedule UB-INS. The principle rate reduction works the same for both forms, but the Schedule UB-INS has more complexity by including multiple members and adding three additional steps: determining the foreign insurer's tentative tax, the domestic insurers'

net income, and the UBG's unitary tax. So, a single foreign insurance company might file a Schedule INS, but a Schedule UB-INS would be used by a UBG composed of insurance companies, at least one or more of whom are domiciled outside of Illinois.

In the following examples, the taxpayer Foreign Captive Insurer (FCI) is a foreign insurance company domiciled in New York filing in TYE 12/15. The Schedule INS is used to determine the rate reduction of IITA § 201(d-1). Their Illinois income tax can be reduced to the pro forma tax they'd pay in their state of domicile on the Illinois income. However, that cannot go lower than the "rate reduction limit", shown by the following computation: (1.75% x net premiums taxable) – (Illinois privilege tax + fire insurance company tax + fire department tax). This calculation is clear on the form. So, the Illinois income tax cannot go below the greater of the pro forma tax and the "rate reduction limit".

In the rare cases where the Illinois tax is lower than the pro forma tax or rate reduction limit, then there is no reduction. That makes sense, because the rate reduction is established to provide relief to foreign insurers from higher Illinois income tax. If their Illinois tax is already lower than what they would pay in their home state, there is no need for tax relief.

Example A: Foreign Captive Insurer ("FCI") does not qualify for a rate reduction. FCI's tentative Illinois tax of $53,785. However, any reductions cannot make it go lower than the greater of the pro forma tax ($13,880) and the rate reduction limit ($242,173), so FCI does not qualify for a rate reduction.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Illinois Department of Revenue

Schedule INS

Tax for Foreign Insurers

Year ending 12 2015 Month Year

Attach to your Form IL-1120. **This schedule is for tax years ending on or after December 31, 2015.** IL Attachment No. 7

Enter your name as shown on your Form IL-1120: Foreign Captive Insurer ("No Reduction")

Enter your federal employer identification number (FEIN): 12-3456789

Step 1: Figure the tax imposed by your state or country of domicile

Note: You must complete Steps 1 through 7 of your Form IL-1120 before completing this schedule.

1	Enter your state or country of domicile.	1	New York
2	Enter the base income from your Form IL-1120, Line 23.	2	6,122,168.00
3	Enter the net income from your Form IL-1120, Line 39.	3	693,997.00
4	Compute the pro forma tax imposed by your state or country of domicile using the income shown on Lines 2 and 3. If your state or country of domicile does not impose an income tax on insurance companies, check the box and enter zero on this line. → ☐	4	13,880.00 ←Pro forma tax

Note: The pro forma tax for Line 4 is the total of all tax measured by net income, less credits, imposed by your state or country of domicile, on an insurance company with base income (before apportionment) equal to Line 2 and net income (after apportionment) equal to Line 3. If you did not check the box on Line 4, attach completed copies of all forms necessary to support the computation of this amount.

Step 2: Figure your income tax reduction limit

5	Enter the net premiums taxable under Section 409 of the Illinois Insurance Code and included in your Form IL-1120, Step 4, Line 29.	5	19,973,847.00
6	Multiply Line 5 by 1.75 percent (.0175). This is your total tax reduction limit.	6	349,542.00
7	Enter the following amounts deducted when you computed this year's federal taxable income:		
7a	a The privilege tax imposed under Section 409 of the Illinois Insurance Code. **Do not include retaliatory tax.**	7a	99,869.00
7b	b The fire insurance company tax imposed under Section 12 of the Fire Investigation Act.	7b	5,000.00
7c	c Any fire department tax imposed under Section 11-10-1 of the Illinois Municipal Code.	7c	2,500.00
8	Add Lines 7a through 7c.	8	107,369.00
9	Subtract Line 8 from Line 6. (If the amount is negative, enter "0.") This is your 1.75 percent income tax reduction limit. Enter here and on Line 14.	9	242,173.00 ←1.75% Reduction limit

Step 3: Figure your tax

10	Enter the replacement tax from your Form IL-1120, Line 44.	10	17,350.00
11	Enter the income tax from your Form IL-1120, Line 49.	11	36,435.00
12	Add Lines 10 and 11. This is your tentative tax.	12	53,785.00 ←Orig. I/T
13	Enter the amount of pro forma tax from Line 4.	13	13,880.00
14	Enter the 1.75 percent income tax reduction limit from Line 9.	14	242,173.00
15	Enter the greater of Line 13 or Line 14.	15	242,173.00 ←Greater of pro forma or 1.75% limit: FLOOR

STOP If Line 15 is greater than Line 12, you are not entitled to a tax reduction. Do not use this schedule.

16	Enter the lesser of Line 10 or Line 15.	16	17,350.00
16a	Subtract Line 16 from Line 10. This is your replacement tax reduction. Enter this amount on Form IL-1120, Step 8, Line 50a.	16a	0.00
17	If Line 15 is greater than Line 16, subtract Line 16 from Line 15. Otherwise, enter zero. This is your maximum net income tax after applying credits.	17	224,823.00
18	Enter the lesser of Line 11 or Line 17.	18	36,435.00
18a	Subtract Line 18 from Line 11. This is your income tax reduction. Enter this amount on Form IL-1120, Step 8, Line 51a.	18a	0.00

Schedule INS (IL-1120) (R-12/15)

This form is authorized as outlined by the Illinois Income Tax Act. Disclosure of this information is REQUIRED. Failure to provide information could result in a penalty.

34

<u>Example 2:</u> Here, Foreign Captive Insurer ("FCI") does qualify for a rate reduction. FCI's tentative Illinois tax of $53,785. It cannot go lower than the greater of the pro forma tax ($13,880) and the rate reduction limit ($34,750). That means FCI's tentative tax will be reduced to $34,750. The rate reduction first applies to income tax, and then replacement tax if income tax is reduced to $0. In this example, FCI's income tax is reduced by $19,035, so that FCI's reduced income tax ($17,400) plus replacement tax ($17,350) equals $34,750. This is shown mechanically on the form below:

Use your mouse or Tab key to move through the fields. Use your mouse or space bar to enable check boxes.

Illinois Department of Revenue
Schedule INS
Attach to your Form IL-1120. **This schedule is for tax years ending on or after December 31, 2015.**

Tax for Foreign Insurers

Year ending 12 2015 (Month Year)
IL Attachment No. 7

Enter your name as shown on your Form IL-1120: Foreign Captive Insurer ("Reduction")
Enter your federal employer identification number (FEIN): 12-3456789

Step 1: Figure the tax imposed by your state or country of domicile

Note: You must complete Steps 1 through 7 of your Form IL-1120 before completing this schedule.

Line	Description	Line	Amount
1	Enter your state or country of domicile.	1	New York
2	Enter the base income from your Form IL-1120, Line 23.	2	6,122,168.00
3	Enter the net income from your Form IL-1120, Line 39.	3	693,997.00
4	Compute the pro forma tax imposed by your state or country of domicile using the income shown on Lines 2 and 3. If your state or country of domicile does not impose an income tax on insurance companies, check the box and enter zero on this line.	4	13,880.00 ←Pro forma tax

Note: The pro forma tax for Line 4 is the total of all tax measured by net income, less credits, imposed by your state or country of domicile, on an insurance company with base income (before apportionment) equal to Line 2 and net income (after apportionment) equal to Line 3. If you did not check the box on Line 4, attach completed copies of all forms necessary to support the computation of this amount.

Step 2: Figure your income tax reduction limit

Line	Description	Line	Amount
5	Enter the net premiums taxable under Section 409 of the Illinois Insurance Code and included in your Form IL-1120, Step 4, Line 29.	5	3,000,000.00
6	Multiply Line 5 by 1.75 percent (.0175). This is your total tax reduction limit.	6	52,500.00
7	Enter the following amounts deducted when you computed this year's federal taxable income:		
a	The privilege tax imposed under Section 409 of the Illinois Insurance Code. **Do not include retaliatory tax.**	7a	15,000.00
b	The fire insurance company tax imposed under Section 12 of the Fire Investigation Act.	7b	2,000.00
c	Any fire department tax imposed under Section 11-10-1 of the Illinois Municipal Code.	7c	750.00
8	Add Lines 7a through 7c.	8	17,750.00
9	Subtract Line 8 from Line 6. (If the amount is negative, enter "0.") This is your 1.75 percent income tax reduction limit. Enter here and on Line 14.	9	34,750.00 ←1.75% Reduction limit

Step 3: Figure your tax

Line	Description	Line	Amount
10	Enter the replacement tax from your Form IL-1120, Line 44.	10	17,350.00
11	Enter the income tax from your Form IL-1120, Line 49.	11	36,435.00
12	Add Lines 10 and 11. This is your tentative tax.	12	53,785.00 ←Orig. I/T
13	Enter the amount of pro forma tax from Line 4.	13	13,880.00
14	Enter the 1.75 percent income tax reduction limit from Line 9.	14	34,750.00
15	Enter the greater of Line 13 or Line 14.	15	34,750.00 ←Greater of pro forma or 1.75% limit: FLOOR
	If Line 15 is greater than Line 12, you are not entitled to a tax reduction. Do not use this schedule.		
16	Enter the lesser of Line 10 or Line 15.	16	17,350.00
16a	Subtract Line 16 from Line 10. This is your replacement tax reduction. Enter this amount on Form IL-1120, Step 8, Line 50a.	16a	0.00
17	If Line 15 is greater than Line 16, subtract Line 16 from Line 15. Otherwise, enter zero. This is your maximum net income tax after applying credits.	17	17,400.00
18	Enter the lesser of Line 11 or Line 17.	18	17,400.00
18a	Subtract Line 18 from Line 11. This is your income tax reduction. Enter this amount on Form IL-1120, Step 8, Line 51a.	18a	19,035.00

Schedule INS (IL-1120) (R-12/15) FOOTER

F. FEDERAL LIMITATIONS ON LOSSES OF CERTAIN CONSOLIDATED GROUPS

IRC § 1504(c)(2) provides an election whereby certain life insurance companies can be treated as includible corporations, and thus members, of a group composed of other includible non-life corporations. This section of the IRC allows certain life insurance companies to file a consolidated life/non-life return with the IRS. This provision is effective for taxable years for which the due date (without extensions) for filing returns is after March 14, 1983.

In the case of a consolidated group of corporations which has made an election under IRC § 1504(c)(2), IRC § 1503(c) imposes limitations on the group's ability to use losses incurred by the non-life insurance companies to offset income earned by the life insurance company members.

To oversimplify the limitations contained in IRC § 1503(c), the non-life members' losses may offset the lesser of (i) 35% of the life insurance company members' income or (ii) 35% of the non-life members' loss. Moreover, no loss of a non-life member may be used to offset income of a life insurance company until the two have been affiliated for more than five years. These rules apply to both current losses and carryover losses, and require very complicated implementation rules under 26 CFR § 1.1502-47.

1. Application To Illinois

IITA § 203(e)(2)(E) requires a corporation that joins in the filing of a consolidated federal income tax return to compute its Illinois taxable income by starting with federal taxable income computed as if it had always filed separate company federal returns. If the corporation is a member of a unitary business group, IITA § 304(e) and IAC § 100.3320(e) then require it and its affiliates to use the combined apportionment method to determine the group's Illinois taxable income.

From 1985 through 1992, a unitary business group could elect "to be treated as one taxpayer" under IITA § 502(e). For years ending on or after December 31, 1993, IITA § 502(e) provides that, "members of the same unitary business group shall be treated as one taxpayer for purposes of any original return…and determination of the group's tax liability under this Act." (Emphasis added.) (See also IITA § 1501(a)(27) for definition of unitary group.)

Pursuant to IITA § 502(e), the Department promulgated regulations that adopt the federal consolidated return regulations for guidance in determining the "one taxpayer"

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

taxable income of a unitary business group. However, several consolidated return regulation provisions, including the federal limitation on losses of life and non-life groups, are not consistent with treating the members of a unitary business group as if they were one taxpayer. Accordingly, IAC § 100.5270(a) provides that the members of a unitary business group must compute their combined base income "as if they constituted a federal consolidated group and by applying the federal regulations for determining consolidated taxable income, except that the separate return limitation year provisions and the limitations on consolidation of life and non-life companies in Treasury Reg. Section 1.1502-47 shall not apply."

Accordingly, neither the IITA nor the regulations incorporate the IRC § 1503(c) limitations, and those limitations SHOULD BE ignored in the computation of combined Illinois taxable income of a unitary business group.

G. ILLINOIS TAXATION OF REINSURANCE COMPANIES

Reinsurance is the process whereby a company may share its risk with other companies by paying a portion of the premiums it receives. For example, when Company A assumes insurance from Company B, this is called reinsurance.

If the principal source of premiums written by an insurance company consists of premiums for reinsurance accepted, the insurance company is considered to be a reinsurance company and is required to apportion its income under IITA § 304(b)(2).

1. Test For Reinsurance Companies

In order to qualify as a reinsurance company, the principal source of premiums (over 50%) written by an insurance company must be for reinsurance accepted. For a unitary group, this test is conducted on a company by company basis. REF: Minutes from Legal/TSS meeting of September 25, 1997. Intercompany transactions will not be eliminated for the purposes of conducting this test (consistent with the 80/20 test in IAC § 100.9700(c)). They will be eliminated, however, in the computation of the apportionment factor. (See discussion at Total Premiums Everywhere below.)

If unitary, regular insurance companies which are required to apportion their income under IITA § 304(b)(1) and reinsurance companies required to apportion their income under IITA § 304(b)(2) MUST be included in the same unitary group.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #18

Insurance Company B has total direct premiums written of $10 million and has reinsurance assumed of $15 million. B is not owned by any other corporation nor does it have any subsidiaries. In this case, B would be treated as a reinsurance company and required to apportion its income under IITA § 304(b)(2) because more than 50% of its total premiums are from reinsurance assumed.

Example #19

For the year ending December 31, 1990, insurance companies C and D filed separate unitary returns. C has total direct premiums of $10 million and has reinsurance assumed from unrelated third parties of $15 million. D has total direct premiums of $20 million and reinsurance assumed of $1 million from unrelated third parties. In this case, C would be treated as a reinsurance company and required to calculate its denominator under IITA § 304(b)(2) because more than 50% of its total premiums are from reinsurance assumed. D would be treated as a regular insurance company and required to calculate its denominator under IITA § 304(b)(1). The numerator of the apportionment formula would be determined using IITA § 304(b)(2) for C and IITA § 304(b)(1) for D.

Example #20

For the year ending December 31, 1992, insurance companies E and F made an election to file a combined return. E had total direct premiums of $10 million and reinsurance assumed of $15 million ($3 million from unrelated third parties and $12 million from F). F had total direct premiums of $20 million and reinsurance assumed from unrelated third parties of $5 million. In this case, E would be treated as a reinsurance company and required to calculate its denominator under IITA § 304(b)(2) because more than 50% of its total premiums are from reinsurance assumed. F would be treated as a regular insurance company and required to calculate its denominator under IITA § 304(b)(1). The numerator of the apportionment formula would be determined using IITA § 304(b)(2) for E and IITA § 304(b)(1) for F.

Example #21

For the year ending December 31, 1995, insurance companies G and H filed a combined return. G had total direct premiums of $10 million and had reinsurance assumed of $50 million from unrelated third parties. H had total direct premiums of $20 million and reinsurance assumed of $10 million from unrelated third parties. In this case, G would be treated as a reinsurance company and required to calculate its denominator under IITA § 304(b)(2) because more than 50% of its total premiums are from

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

reinsurance assumed. H would be treated as a regular insurance company and required to calculate its denominator under IITA § 304(b)(1). The numerator of the apportionment formula would be determined using IITA § 304(b)(2) for G and IITA §304(b)(1) for H.

2. Factor Numerator For A Reinsurance Company

For taxable years ending on or after December 31, 2008, if more than 50% of a company's premiums written are for reinsurance accepted, then the numerator of the factor is:

- Direct premiums written for insurance upon property or risk in Illinois, plus
- Premiums written for reinsurance accepted for property or risk in Illinois

The denominator of the factor is the sum of the direct premiums written for insurance on property or risk everywhere plus premiums written for reinsurance accepted for property or risk everywhere. REF: IITA § 304(b)(2).

Premiums written for reinsurance accepted with respect to property or risk in Illinois, whether or not otherwise determinable, may, at the election of the company,

(1) Be determined on the basis of the proportion of premiums written for reinsurance accepted from companies commercially domiciled in Illinois bears to premiums written for reinsurance accepted from all sources, or, alternatively,

(2) in the proportion which the sum of the direct premiums written for insurance upon property or risk in this State by each ceding company from which reinsurance is accepted bears to the sum of the total direct premiums written by each such ceding company for the taxable year. (IITA § 304(b)(2) and IAC § 100.3420(e)(2))

The taxpayer could change this election at any time under IAC § 100.3420(e)(3). However, under PA 97-0507 the election made for the first taxable year ending on or after December 31, 2011 is binding for all subsequent taxable years, unless altered by written permission from the Department.

Note: PA 95-233 had terminated reinsurance companies' right to elect one of the three methods to source reinsurance premiums for tax years ending on or after December 31, 2008. PA 97-0507 reinstated for all taxable years the option to elect one of the three sourcing methods. Therefore, under certain circumstances the taxpayer could become overpaid if it originally applied the method required by

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

PA 95-233 and subsequently choose another reapportionment method on an amended return or during audit.

a) Total Premiums Everywhere

The information necessary to calculate the denominator of the apportionment factor for a reinsurance company can be found in the Annual Statement filed with the Illinois Director of Insurance. The denominator of the apportionment factor will consist of:

- The total direct premiums everywhere plus;
- The total reinsurance assumed.

In situations where a reinsurance company assumes insurance from another member of the unitary group, the transaction(s) should be treated as an intercompany elimination for purposes of calculating the denominator of the apportionment factor under IITA § 304(b). Since the gross profit from intercompany transactions is eliminated from federal taxable income and Illinois base income, intercompany premiums would not be included in the apportionment factor under IAC § 100.3420(c)(1).

If the reinsurance company files an Annual Statement for property and casualty companies, the total direct premiums everywhere should be calculated in the same manner as for property and casualty companies. The total reinsurance assumed is the total of the reinsurance assumed from affiliates and from non-affiliates reported in Columns 2 and 3, respectively, of Underwriting and Investment Exhibit (Part 1b Premiums Written) of the Annual Statement.

If the reinsurance company files an Annual Statement for life insurance companies, the total direct premiums everywhere should be calculated in the same manner as for life insurance companies. The total reinsurance assumed is reported on Line 96 (Columns 2 through 4) of Schedule T of the Annual Statement.

The column, line, and schedule references used above are for the 2008 Annual Statement. The format and line numbers for this premium information may be different in other years.

The following examples explain how the denominator of the apportionment formula should be computed. The numerator of the formula will be discussed in the next section.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #22

Insurance companies C and D filed separate unitary returns. C has total direct premiums of $10 million and has reinsurance assumed from unrelated third parties of $15 million. D has total direct premiums of $20 million and reinsurance assumed of $1 million from unrelated third parties. C is a reinsurance company and required to calculate its denominator under IITA § 304(b)(2) because more than 50% of its total direct premiums are from reinsurance assumed. D is a regular insurance company and required to calculate its denominator under IITA § 304(b)(1). The denominator for the insurance factor for the unitary group would be $45 million (C- $25 million plus D- $20 million). (Note: Combined returns are required for tax years ending on or after December 31, 1993).

Example #23

For the year ending December 31, 1992, insurance companies E and F made an election to file a combined unitary return. E had total direct premiums of $10 million and reinsurance assumed of $15 million ($3 million from unrelated third parties and $12 million from insurance company F). F had total direct premiums of $20 million and reinsurance assumed from unrelated third parties of $5 million. E is a reinsurance company and required to calculate its denominator under IITA § 304(b)(2) because more than 50% of its total direct premiums are from reinsurance assumed. F is a regular insurance company and required to calculate its denominator under IITA § 304(b)(1). The denominator for the insurance factor for the unitary group would be $33 million (E- $13 million plus F- $20 million). (Note: Combined returns are required for tax years ending on or after December 31, 1993).

Example #24

For the year ending December 31, 2010, insurance companies G and H filed a combined unitary return. G has total direct premiums of $10 million and had reinsurance assumed of $50 million from unrelated third parties. H has total direct premiums of $20 million and reinsurance assumed of $10 million from unrelated third parties. G is a reinsurance company and required to calculate its denominator under IITA § 304(b)(2) because more than 50% of its total direct premiums are from reinsurance assumed. H is a regular insurance company and required to calculate its denominator under IITA § 304(b)(1). The denominator for the insurance factor for the unitary group would be $80 million (G- $60 million plus H- $20 million).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

b) <u>Illinois Premiums</u>

IITA § 304(b)(2) allows three different methods for calculating the amount of reinsurance assumed that is included in the Illinois premiums for a reinsurance company. They will be referred to as methods A, B, and C.

The taxpayer can elect to use any of the three methods. For tax years ending on or after December 31, 2011, the election will be binding unless the taxpayer is granted written permission from the Department. This means that the election is not irrevocable for any tax year. For tax years ending before December 31, 2011, the taxpayer may choose method A on their original return and elect to use method B on an amended return or during an audit. This would also be possible for subsequent tax years, although the taxpayer will have to secure written permission from the Department first. Each separate reinsurance company makes the election in a unitary group regardless of whether separate unitary, elective combined or mandatory combined returns are filed.

The three methods which may be used to determine the amount of reinsurance premiums assumed in Illinois are the following:

Method A

Premiums written for reinsurance accepted in respect of property or risk in this State, and premiums written for reinsurance accepted in respect of property or risk everywhere;

Method B

Premiums written for reinsurance accepted from companies commercially domiciled in this State, and premiums written for reinsurance accepted from companies everywhere; and

Method C

Direct premiums written for insurance upon property or risk in this State by each ceding company from which reinsurance is accepted, and direct premiums written for insurance upon property or risk everywhere by each ceding company from which reinsurance is accepted.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In all three methods:

1. The first step in calculating the apportionment formula for a reinsurance company is to determine the total direct premiums written everywhere and the total reinsurance assumed.

2. If the company is required to file as a member of a unitary group, any reinsurance assumed from another group member should be identified and eliminated.

3. Illinois direct premiums should be verified using Schedule T.

4. The method the company used to calculate its Illinois reinsurance assumed should be determined and the amount verified from its books and records. The amount of Illinois reinsurance assumed cannot be verified from Schedule T and Annual Report.

The direct premiums and the reinsurance assumed should be combined to arrive at one percentage rather than computing an average of the percentage for direct premiums and reinsurance assumed.

Example #25

For the year ending December 31, 1990, insurance companies B, C, and D filed separate unitary returns. Companies B and C qualify as reinsurance companies and are required to apportion their income under IITA § 304(b)(2). Company B can choose method A and company C can choose method B to determine their reinsurance premiums assumed in Illinois.

Example #26

For the year ending December 31, 2010, insurance companies E, F, and G file a combined return. Companies F and G qualify as reinsurance companies and are required to apportion their income under IITA § 304(b)(2). Company F can choose method B and company G can choose method C to determine their reinsurance premiums assumed in Illinois.

Example #27

For the year ending December 31, 2011, insurance companies H, I, and J filed a combined return. Companies I and J qualify as reinsurance companies and are required to apportion their income under IITA § 304(b)(2). Company I can choose

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

method A and Company J can choose method C to determine their reinsurance premiums assumed in Illinois. The methods chosen will be binding for each company to use in subsequent returns, until written permission is granted from the Department to use another reinsurance apportionment method.

Example #28

Reinsurance Company B files a separate return and elects to compute its Illinois premiums assumed in Illinois under method A. The review of Schedule T shows that B had total direct premiums everywhere of $30 million and Illinois direct premiums of $15 million. B had total reinsurance assumed of $70 million. B elects method A to apportion its reinsurance assumed. B provided detailed information showing that of the $70 million of reinsurance assumed that $10 million of the total was for property or risk in Illinois. In calculating the apportionment factor for B, the total premiums everywhere would be $100 million ($70 million plus $30 million) and the total Illinois premiums would be $25 million ($15 million plus $10 million).

Example #29

For the year ending December 31, 2012, insurance companies B, C, and D filed a combined return. C and D are reinsurance companies. B has direct premiums everywhere of $50 million, Illinois direct premiums of $5 million, and reinsurance assumed from unrelated third parties of $5 million. C has no direct premiums and reinsurance assumed of $70 million ($30 million from B and D and $40 million from an unrelated third party which is commercially domiciled in California). C elects method B to apportion its reinsurance assumed. D has $10 million in total direct premiums, $2 million in Illinois direct premiums, and $50 million in reinsurance assumed from an unrelated third party which is commercially domiciled in Illinois. D provided detailed information showing that of the $50 million of reinsurance assumed that $8 million of the total was for property or risk in Illinois. D elects method A to apportion its reinsurance assumed. In calculating the apportionment factor for the unitary group, the total premiums everywhere would be $150 million (B- $50 million in direct premiums, C- $40 million in reinsurance assumed ($70 million less the intercompany elimination of $30 million), D- $60 million ($10 million in direct premiums plus $50 million in reinsurance assumed)). The total Illinois premiums would be $15 million (B- $5 million in Illinois direct premiums, C- $0 in Illinois reinsurance assumed, D- $2 million Illinois direct premiums and $8 million in Illinois reinsurance assumed. The reinsurance apportionment methods chosen by C and D are binding in subsequent years until written permission is granted by the Department to elect another method.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #30

Reinsurance Company A files a separate return and elects to compute its Illinois premiums assumed in Illinois under method C. The review of Schedule T shows that A had total direct premiums everywhere of $30 million and Illinois direct premiums of $15 million. A had total reinsurance assumed of $30 million from company ABC (an unrelated company) and $40 million from company XYZ (an unrelated company). A elects method C to apportion its reinsurance assumed. A provided copies of the Schedule T for companies ABC and XYZ showing that the ratio of direct premiums on property or risk located in Illinois to total direct premiums is 10% for ABC and 25% for XYZ. In calculating the apportionment factor for A, the total premiums everywhere would be $100 million ($70 million in reinsurance assumed plus $30 million in direct premiums) and the total Illinois premiums would be $28 million ($15 million in Illinois direct premiums plus $3 million in reinsurance assumed from ABC plus $10 million in reinsurance assumed from XYZ).

H. MUTUAL COMPANIES

As originally enacted in 1969, the purpose of IITA § 203(e)(2)(B) was to define taxable income for mutual insurance companies. In 1969, IITA § 203(e)(2)(B) stated:

> Certain mutual insurance companies. In the case of a mutual insurance company subject to the tax imposed by Section 821(a) or (c) of the Internal Revenue Code, mutual insurance company taxable income or taxable investment income, as the case may be.

Section 203(b)(1) defined base income as “an amount equal to the taxpayer’s taxable income for the taxable year as modified by section 203(b)(2).

Prior to the Tax Reform Act of 1986, mutual insurance companies were subject to tax under IRC § 821, and all other non-life insurance companies were subject to tax under IRC § 831. In 1986, IRC § 821 was repealed and all non-life insurance companies became subject to IRC § 831.

In 1987, Pubic Act 85-731, amended IITA § 203(e)(2)(B) to state that, “Certain other insurance companies. In the case of mutual insurance companies subject to the tax imposed by IRC § 831, insurance company taxable income.” The reference to mutual companies in the amended version of IITA § 203(e)(2)(B) is a drafting error in the statute. This section was intended to define the taxable income for all insurance companies subject to IRC § 831.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Like other insurance companies, mutual companies are required to file an Annual Statement with the Illinois Department of Insurance. For information concerning the modifications and apportionment formula for mutual companies, refer to the prior sections of this Chapter dealing with life insurance and property and casualty companies at Casualty Companies (Fire, Marine, And Auto) and Life Insurance Companies.

1. Years Ending On Or After December 31, 1986 To Current

For the years ending on or after December 31, 1986, all mutual insurance companies except for mutual life insurance companies are required to file a federal Form 1120-PC return. Most mutual insurance companies will calculate their federal taxable income using Schedule A of Form 1120-PC. The federal taxable income calculated on Schedule A is reported on line one of page one of Form 1120-PC.

If a mutual company is a small company as defined by IRC § 831(b)(2) and makes the election under IRC § 831(b)(2)(A)(ii) to be taxed on taxable investment income, it will complete Schedule B of federal Form 1120-PC. This provision allows mutual and stock companies with net written premiums or direct written premiums (whichever is greater) in excess of $350,000 but less than $1,200,000 to elect to be taxed only on taxable investment income. To determine the amount of direct or net written premiums of a member of a controlled group of corporations, the direct or net written premiums of all members of the controlled group are aggregated. The federal taxable income calculated on Schedule B is reported on line two of page one of the Form 1120-PC. Once a company elects to be taxed on taxable investment income, it must continue to be so taxed (as long as it qualifies) unless the Secretary of the Treasury consents to the revocation of the election.

2. Years Ending Prior To December 31, 1986

For the years ending on or before December 31, 1986, mutual companies except for life, marine, and certain fire insurance companies filed federal Form 1120M returns. In arriving at mutual insurance company taxable income, the federal Form 1120M combined taxable income (loss), underwriting income (loss), and the Protection Against Loss (PAL) account and subtracted from this total the unused loss deduction.

For years ending on or before December 31, 1986, mutual property and casualty insurance companies were permitted a deduction for contributions (which are bookkeeping entries) to PAL account. The amount of the deduction was equal to the sum of 1% of the underwriting losses for the year plus 25% of statutory underwriting income, plus certain windstorm and other losses. In general, contributions to the PAL

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

account were taken in income after a 5-year period. The PAL account thus effected a 5-year deferral of a portion of mutual company underwriting income.

The purpose of the PAL provision had been to provide mutual companies with a source of capital to enable them to compete with stock companies, in the event of a catastrophic loss. While stock companies could enter capital markets and issue new stock to raise money in the event of a catastrophic loss, a mutual company could not do so. The five-year partial income deferral provided a source of capital not available to stock companies. This provision has been repealed for years ending after December 31, 1986.

I. SURPLUS LINE COMPANIES

Surplus line insurance is defined as insurance on an Illinois risk procured from an unauthorized company (a surplus line insurance company) after the insurance producer representing the insured or the surplus line producer is unable, after diligent effort, to procure insurance from companies which are authorized to transact business in Illinois.

A surplus line insurance company is an insurance company which is allowed to insure Illinois property with surplus line insurance in certain circumstances but which is:

1. Not authorized by the Department of Insurance to do business directly in Illinois;

2. Not subject to regulation by the Department of Insurance;

3. Not subject to direct Privilege Tax on the premiums they receive; and

4. Is exempt from the requirement imposed on authorized companies to file Annual Statements with the Illinois Director of Insurance.

A "surplus line producer" is an insurance agent that is permitted to sell policies on behalf of surplus line companies when the agent cannot obtain a policy from a company authorized to do business in Illinois. Each surplus line producer must file semi-annual reports with the Director of Insurance and pay a tax equal to 3% of the premiums paid to surplus line companies through the producer. The producer must file copies of each surplus line contract with the Surplus Line Association of Illinois and make certain disclosures to an insured party about the surplus line company issuing a policy. (Section 445 of the Insurance Code).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1. Description Of Surplus Line Insurance Transaction

A typical surplus line insurance transaction can be described as follows:

- An Illinois insured's property or risk is unable to be insured by any admitted carrier (an insurance carrier authorized to do business in Illinois);
- A surplus line producer that is licensed and regulated by the Department of Insurance obtains written confirmation of denial of coverage by admitted insurers;
- A surplus line carrier writes the policy;
- The insured pays premiums to the surplus line producer;
- The producer deducts commissions and surplus line taxes from the premium payments and makes payments to the surplus line insurer;
- All surplus line insurance transactions are reported to the Department of Insurance through a semiannual filing by the surplus line producer; and
- The surplus line producers make monthly filings of the substance of each surplus line policy transaction to the Surplus Line Association of Illinois.

The Department's current policy is that surplus line premiums are included in the premiums numerator under IAC § 100.3420(d).

2. June 27, 1997 Policy

In 1996, Director Zehnder issued a Director's Decision (this cleansed decision is listed as case IT 96-11 on the Department's website) in a hearing dealing with a surplus line insurance company. The audit was completed in accordance with the 1990 policy.

On June 27, 1997, as a result of Director Zehnder's decision in the above hearing, the Department's policy on surplus line companies was revised as follows:

- If unitary, a surplus line company SHOULD be included in the same unitary group with other related insurance companies;
- The total premiums everywhere for the surplus line company SHOULD be included in the denominator of the apportionment factor; and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The Illinois premiums of the surplus line company SHOULD BE included in the numerator of the apportionment factor.

In implementing this new position, the Audit Bureau will ONLY issue a Notice of Deficiency against an open tax year that has NOT been previously audited by the Department. In the rare instance where this change in policy results in a claim for credit, the Audit Bureau will approve claims for credit for ALL open tax years regardless of whether or not those years have been previously audited by the Department. The auditor should be aware that in some circumstances a nonfiler may be entitled to abatement of tax under the six-year reasonable cause guidelines in UPIA § 3-10.

3. 1990 Policy

In 1990, the Legal Services Bureau developed the following policy for surplus line companies:

- If unitary, a surplus line company SHOULD be included in the same unitary group with other related insurance companies;
- The total premiums everywhere for the surplus line company SHOULD be included in the denominator of the apportionment factor; and
- The Illinois premiums of the surplus line company SHOULD NOT be included in the numerator of the apportionment factor.

Example #31

In March, 1997, the taxpayer signed an IL-870 and paid a deficiency of $100,000 for the tax years ending December 31, 1994 and December 31, 1995. The audit is currently in Technical Review and the reviewer notes that the Illinois premiums for the surplus line company were not included in the Illinois premiums for the combined return. Since the taxpayer signed the IL-870 prior to the effective date (June 27, 1997) of AMU 97-9, no adjustment will be made to the audit for the Illinois premiums for the surplus line company.

Example #32

In April 1997, a closing conference was held with the taxpayer for the years ending December 31, 1994 and December 31, 1995. The taxpayer disagreed with the proposed deficiency of $200,000. The audit is currently in Technical Review and the reviewer

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

notes that the Illinois premiums for the surplus line company were not included in the Illinois premiums for the combined return. Since a closing conference was held with the taxpayer prior to the effective date (June 27, 1997) of AMU 97-9, no adjustment will be made to the audit for the Illinois premiums for the surplus line company.

Example #33

In 1990, the Department was auditing a group of insurance companies that had filed combined returns for the years ending December 31, 1987 and December 31, 1988. The combined returns included the income and denominator for a surplus line company. Based on AMU 90-3, the auditor did not include the numerator of the surplus line company in the unitary group. In addition, the auditor had noted that for the years ending prior to December 31, 1987, all of the regular insurance companies had filed separate returns and that the surplus line company was a nonfiler. Based on AMU 90-3, the auditor advised the taxpayer that no liability was due for the years ending December 31, 1987 and December 31, 1988 and that the surplus line company had no tax liability for all years prior to December 31, 1987. On December 20, 1990, the taxpayer signed an IL-870 and paid a deficiency of $300,000.

For the years ending after December 31, 1988 and prior to December 31, 1993, the taxpayer filed combined returns. For these years, the taxpayer included the surplus line company in the unitary group, included the total premiums everywhere of the surplus line company in the denominator of the apportionment factor, and did not include the Illinois premiums of the surplus line company in the numerator of the combined returns. An audit covering the years ending December 31, 1993 and December 31, 1994 is currently in process.

Since the years were previously audited and/or the statute of limitations has now expired for the years, no notice of deficiency will be issued for ANY year ending prior to December 31, 1993. The Department's new position will be implemented in the audit that is currently in process for the years ending December 31, 1993 and December 31, 1994.

Example #34

An audit is currently in process on a group of insurance companies for the years ending December 31, 1993 and December 31, 1994. The auditor determines that the Illinois premiums for the surplus line company were not included in the Illinois premiums for the combined returns for the years ending December 31, 1993 and December 31, 1994. The Department's new position will be implemented for the years ending December 31, 1993 and December 31, 1994.

The auditor determined that this group of insurance companies has never been audited

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

by the Department.

For the year ending December 31, 1992, the surplus line company was included in the combined return filed by the taxpayer. The taxpayer included the total premiums everywhere for the surplus line company in the denominator of the apportionment factor but did not include the Illinois premiums of the surplus line company in the numerator of the apportionment factor. Since the statute of limitations has expired for the year ending December 31, 1992, no adjustment can be made to this year.

For the year ending December 31, 1991, all of the insurance companies except for the surplus line company filed separate unitary returns. The surplus line company was not included in the unitary group and did not file a return for this year. A Notice of Deficiency can be issued against the surplus line company for this year.

For all of the years ending prior to December 31, 1991, all of the insurance companies except for the surplus line company filed separate returns. The surplus line company did not file returns for any year prior to December 31, 1991. A Notice of Deficiency can be issued against the surplus line company for all years in which they had Illinois premiums.

The auditor should be aware that in some circumstances a nonfiler may be entitled to abatement of tax under the six year reasonable cause guidelines in UPIA § 3-10.

As stated above, surplus line companies are exempt from the requirement imposed on authorized companies to file Annual Statements with the Illinois Director of Insurance. However, the surplus line companies will file an Annual Statement with the Director of Insurance in the state of their commercial domicile. Schedule T from this Annual Statement can be used to obtain the apportionment data for the surplus line companies.

In summary, the Audit Bureau's current policy for surplus line companies is:

- If unitary, a surplus line company SHOULD be included in the same unitary group with other related insurance companies;

- The total premiums everywhere for the surplus line company SHOULD be included in the denominator of the apportionment factor; and

- The Illinois premiums of the surplus line company SHOULD be included in the numerator of the apportionment factor under IAC § 100.3420(d).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

4. Surplus Line Companies and the IITA § 201(d-1) Rate Reduction

IITA § 201(d-1) provides for a rate reduction in foreign insurers whose state of domicile imposes a retaliatory tax. The rate reduction is determined on Illinois Schedule INS or UB/INS (see section at IITA § 201(D-1) RATE REDUCTION FOR FOREIGN INSURERS for more information). The rate reduction is not to reduce the sum of the foreign insurer's income and replacement taxes (plus privilege tax under Section 409 of the Insurance Code and other applicable assessments) below an amount equal to 1.75% "of the net taxable premiums written for the taxable year, as described by subsection (1) of Section 409 of the Illinois Insurance Code."

This provision is very specific about what premiums are taken into account, and has no provision similar to that in the definition of "direct premiums written" in IITA § 304(b)(1). IITA § 304(b)(1) refers to premiums reported on the annual statement or "such other form as may be prescribed in lieu thereof." A surplus line company has no premiums taxable under Section 409. This means that IITA § 201(d-1) can reduce a surplus line's income tax to zero.

IITA § 201(d-1) and IITA § 304(b) differ in their wording. IITA § 304(b) provides that surplus line premiums are included in the apportionment factor while IITA § 201(d-1) excludes them from the computation of the 1.75% premiums "floor" for the rate reduction. The instructions for the Schedules INS and UB/INS are consistent with statutory language. When calculating the tax reduction limit, the forms require the multiplication of 1.75% times "the net premiums taxable under Section 409 of the Illinois Insurance Code and included in your Form IL-1120 [sales everywhere]". Since surplus line premiums are includable in the apportionment factor but not taxable under the Illinois Insurance Code, if a foreign surplus line company has no other premiums but surplus line premiums, its 1.75% income tax reduction limit will be zero.

J. CAPTIVE INSURANCE COMPANIES

A captive is an insurance company created and wholly owned by one or more non-insurance companies to insure the risks of its owner (or owners). Captives are essentially a form of self-insurance whereby the insurer is owned wholly by the insured. They are typically established to meet the risk-management needs of the owners or members. Captives are formed to cover a wide range of risks; practically every risk underwritten by a commercial insurer can be provided by a captive. The type of entity forming a captive varies from a major multinational corporation—the vast majority of Fortune 500 companies have captive subsidiaries—to a nonprofit organization. Once established the captive operates like any commercial insurance company and are subject to state regulatory requirements including reporting, capital and reserve requirements. [REF: NAIC]

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The captive insurance company was originally designed to underwrite risks of a parent and/or its other subsidiaries. This initial form was considered a “pure captive.” The captive insurance industry has since grown to include more exotic arrangements. For example, many groups of unrelated persons have joined to form captive insurance companies to share in certain similar risks, such as medical malpractice for doctors and associations of industry groups.

A captive insurance company can underwrite domestic risks, foreign risks, or both. The coverage may include worker's compensation, property, liability, malpractice, etc.

A number of states have passed statutes specifically designed for captive insurance companies. The remaining states have no special provisions for captive insurance companies and they would have to meet the requirements of the individual state's insurance company laws and regulations. As of November 2012, U.S. states with captive legislation include Alabama, Arizona, Arkansas, Colorado, Delaware, Florida, Georgia, Hawaii, Illinois, Kansas, Kentucky, Maine, Montana, Missouri, Nevada, New Jersey, New York, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia and West Virginia. Many of these states have enacted legislation just within the last few years. Due to favorable regulatory conditions, a large number of domestic captive insurance companies are formed in Vermont. As of 2011, with close to 500 captives, Vermont, which began licensing captives in 1981, is the largest onshore captive, followed by Utah with roughly 189 captives, Hawaii (167), South Carolina (160), Kentucky (127), Nevada (117) and Delaware (86). (REF: Captive Insurance Times Issue 001, and NAIC, 2011)

Many corporations have also formed foreign captive insurance companies. Many tax-haven countries have favorable regulatory conditions for captive insurance companies. If incorporated in a foreign country, the captive insurance company will operate from that country even though it may underwrite U.S. risks. Also, in certain situations, particularly when foreign risks are being insured, certain tax advantages can accrue to shareholders of a foreign corporation. Due to favorable regulatory conditions, a large number of foreign captive insurance companies are formed in Bermuda.

A captive insurance company can be a direct writer or a reinsurance company. As a direct writer, it will issue policies and receive the premiums directly. There are few direct-writing captive insurance companies because of all the various onerous state regulations. Instead, most captive insurance companies operate as reinsurers. As a reinsurer, the captive insurance company assumes business from an admitted direct writing company, called the fronting company. In such an arrangement, the captive insurance company may retain the risk assumed from the fronting company or it may retrocede part of the risk to another company.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The key purpose of insurance regulation is to protect policyholders first and foremost, as well as investors and other stakeholders. A captive is different from a commercial insurance company, because it just serves its parent company. Therefore, captives are regulated differently than traditional insurance companies that serve the public. Like traditional insurance companies, captives are regulated by the state in which its headquarters are located.

Each domiciliary regulator requires an annual audit by an independent CPA firm (or its equivalent) with industry-specific experience in the insurance industry. In addition, many domiciliary regulators require a formal actuarial review of the captive's policy on pricing and loss reserve methodology. [REF: NAIC]

1. General Types of Captives

There are a variety of captive types, depending on the owner's needs. While companies traditionally would set up "pure captives" to insure the parent and affiliates, companies over the years have set up more sophisticated captive arrangements to meet their business risk needs. The following list defines the most common structures:

- Single-Parent Captive – A company writing only the risks of its parent and/or affiliates. Single-parent structures are often referred to as wholly owned or "pure" captives.
- Group Captive –A captive established by a group of companies with similar businesses or exposures writing only the risks of its owners and/or affiliates.
- Association Captive – A captive owned by a trade, industry or service group (e.g., doctors) writing only the risk of its owners and/or affiliates. An association captive is similar to a group captive except that it is sponsored or owned by a group of entities within a particular organization with common insurance needs and similar exposures.
- Rent-a-Captive – A captive owned by an outside organization and open to participants for a fee. Members "rent" licenses and capital from the rent-a-captive owner. A rent-a-captive, or rental captive, is often used by entities that prefer not to form their own dedicated captive or for a program that is too small to justify incorporating its own captive.
- Risk Retention Group (RRG) – Approximately 250 RRGs in the U.S. are organized as captives. An RRG is an association or group captive formed for the principal purpose of assuming and spreading risk for commercial liability exposure. It is important to note that not all RRGs are licensed as captives. The formation of RRGs is authorized by a federal law—the Liability Risk Retention Act of 1986—that limits

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

many of the regulatory requirements that otherwise might be imposed on RRGs by non-domiciliary states.

[REF: NAIC]

2. Reasons For Captives

The question is often asked why a corporation would go through the start-up costs and the capitalization expense to establish a captive insurance company. The answer depends upon the strategy of the parent corporation, which may include any of the following:

- The parent may wish to reduce the amount of money paid for insurance premiums. By establishing a captive, the parent has control over the amount of premiums paid as the captive will establish its own premium rates.
- The parent retains the profits made on insuring within its corporate structure instead of paying the premiums and the underlying profits to an unrelated third party.
- The parent may want to reduce the amount of risk retained in the affiliated group. By establishing a captive insurance company and acquiring its insurance through the captive, the parent can control the number of outside third-party insureds and thereby control the amount of risk involved with its insurance needs.
- Companies can mitigate their exposure to a wide range of risks. Practically every risk underwritten by a commercial insurer can be provided by a captive. The majority of captives provide mainstream property/casualty insurance coverage such as general liability, product liability, workers' compensation, director and officer (D&O) liability, auto liability and professional liability (e.g., medical malpractice).
- Captives can be used to obtain specialized coverage for unusual or hard-to-insure risks (e.g., terrorism risk). Oil companies have used captives to gird against environmental claims related to infrequent but potentially high-cost events. Other types of nontraditional insurance coverage that a captive could underwrite include credit risk, pollution liability, equipment maintenance warranty and employee benefit risks, including medical benefits, personal accident and, in some cases, whole life insurance.
- Establishment of a foreign captive can be used to funnel income to a country with no income tax, or a lower income tax rate than the tax rate in the United States. This offers a substantial savings on income tax expense.
- A domestic captive can be established to reduce the percentage of foreign

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

insurance excise tax paid on premiums paid to foreign insurers or reinsurers.

REF: Foreign Insurance Excise Tax Audit Technique Guide (04/08), Internal Revenue Service and NAIC.

3. Qualifications Of A Captive Insurance Company

The issue encountered in audit is where the three-factor group (or other one-factor group) transfers substantial capital or intellectual property to an insurance company subsidiary (i.e. captive insurance company usually domiciled in Vermont) that only insures risk within the consolidated federal group. Although the captive is included in the consolidated federal Form 1120, since the captive insurance company apportions its income under IITA § 304(b), it cannot be included in a unitary group that apportions its income under another subsection of IITA § 304, following the noncombination rule as defined in IAC § 100.2430(b)(8). The unitary group then pays substantial insurance premiums, interest or royalties to the captive insurance company that reduces federal taxable income on the Illinois Schedule UB. Since few captives are in Illinois, they do not file an Illinois income tax return, thereby shielding the income from Illinois tax.

The following procedure has been developed when auditing a captive insurance company. The auditor needs to determine whether or not the captive insurance company meets the definition of an insurance company under rules used by the IRS. If so, then based on IITA § 102 the Department will abide by the federal determination because the term "insurance company" in the IITA follows the federal interpretation.

Note. If the captive insurance company is owned by a bank or bank holding company as defined under IITA § 1501(a)(8)(A), then the captive insurance company will be treated as a financial organization and apportion its income under IITA § 304(c) and not IITA § 304(b), regardless of the federal determination.

4. Federal Treatment Of Captive Insurance Companies

The Federal taxation of a captive insurance company varies based on whether it is a domestic or foreign company. Regardless of its commercial domicile, the captive insurance company MUST qualify as an insurance company in order for the parent and/or its affiliates to get a deduction for insurance premiums paid to the captive insurance company.

As previously stated under Definition Of An Insurance Company, IAC § 100.3420(b) defines an insurance company as a company properly taxed for federal purposes under subchapter L of the IRC §§ 801 through 848. Therefore, we have to look to the IRC and

Treasury regulation to determine if a company is an insurance company for Illinois purposes.

IRC §§ 831(c) and 816(a) define "insurance company" to mean "any company more than half the business of which during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies." (IRC § 816(a)) The definition provides only thresholds that must be surpassed in regard to the amount of insurance business that must be conducted in order for a company to be taxed as an insurance company. It does not define insurance contract. To be an insurance company for federal income tax purposes, a taxpayer must issue *insurance contracts*, and the issuing of insurance contracts must comprise *more than half* of the taxpayer's business. Courts and the IRS have stepped in to provide more detailed guidance. Both aspects of the definition are discussed below, beginning with its quantitative aspect.

Since *Helvering v. LeGierse* (1941), the federal courts and the IRS have taken up the issue of captive insurance companies and provided further explanation and guidance. Subsequent federal cases looking at captive insurance companies have considered three elements for determining if insurance exists regarding captives:

1. Insurance risk
2. Risk shifting and risk distribution
3. Insurance in the "commonly accepted sense"

See IRS PLR-133991-13 for a good, readable summary of the federal guidelines in determining insurance and captive insurance companies These three and some other elements that have come up over the years are discussed in the following sections.

Insurance risk: *Helvering v. LeGierse* (1941) mentions that an insurance contract must be actual insurance risk. In that case, the respondent received proceeds from as a beneficiary of a life insurance contract. The Court upheld that the life insurance contract and annuity contract executed by the decedent, when considered together, resembled investment risk, not insurance risk. The Court determined this even though the two contracts had the conventional elements of life and annuity contracts.

The insurance risk transferred must be risk of economic loss, not merely investment or business risk. This point and related sources are described in IRS PLR-133991-13:

The risk transferred must be a risk of economic loss. Allied Fidelity Corp. v. Commissioner, 572 F.2d 1190, 1193 (7th Cir. 1978). The risk must contemplate the fortuitous occurrence of a stated contingency, Commissioner v. Treganowan, 183 F.2d 288, 290-291 (2d Cir. 1950), and must not be merely an investment or business risk.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

LeGierse, 312 U.S. at 542; Rev. Rul. 2007-47, 2007-2 C.B. 127; Rev. Rul. 89-96, 1989-2 C.B. 114.

Risk Shifting and Risk Distribution: *Helvering v. LeGierse* (1941) observed that insurance contracts must have the elements of risk-shifting and risk-distribution, and the federal courts and IRS have used this criteria over the years. The insured shifts its risk of loss to an insurance company, while the insurance company distributes that risk of loss among its many insurance contracts. For more discussion on this key element, see the Risk-Shifting and Risk-Distribution section later in this chapter.

Commonly Accepted Sense: The third element is whether the insurance contracts are insurance in the "commonly accepted sense". Several court cases have considered nonexclusive factors for determining if insurance qualifies under the "commonly accepted sense":

1. Its treatment under state law
2. The insurer's capitalization and charging arm's-length premiums
3. Separate funds to pay claims
4. The language of operative agreements and methods to resolve claims

IRS PLR-133991-13 describes the federal reasoning behind "commonly accepted sense":

The "commonly accepted sense" of insurance derives from all of the facts surrounding each case, with emphasis on comparing the implementation of the arrangement with that of known insurance. Court opinions identify several nonexclusive factors bearing on this, such as the treatment of an arrangement under the applicable state law, AMERICO, Inc., 96 T.C. 18, 41 (1991); the adequacy of the insurer's capitalization and utilization of premiums priced at arm's length, The Harper Group v. Commissioner, 96 T.C. 45, 60 (1991), aff'd 979 F.2d 1341 (9th Cir. 1992); separately maintained funds to pay claims, Ocean Drilling & Exploration Co. v. United States, 24 Cl. Ct. 714, 728 (1991), aff'd per curiam, 988 F.2d 1135 (Fed. Cir. 1993); and the language of the operative agreements and the method of resolving claims, Kidde Indus. Inc. v. Commissioner, 40 Fed. Cl. 42, 51-52 (1997).

5. More Than 50% Test

The federal definition of an insurance company was added to the IRC by the Tax Reform Act of 1984. (P.L. 98-369, 98 Stat. 494 (1984)). It states that an insurance company is:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

> Any company more than half the business of which during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies. 26 U.S.C. § 816(a).

Therefore, in order to be an insurance company for federal income tax purposes, the issuing of insurance contracts must comprise more than half of the taxpayer's business.

The Committee Reports on P.L. 98-369 (Deficit Reduction Act of 1984) indicates that the *more than half* test is a facts and circumstances analysis:

> Whether more than half of the business activity is related to the issuing of insurance or annuity contracts will depend on the facts and circumstances and factors to be considered will include the relative distribution of the number of employees assigned to, the amount of space allocated to, and the net income derived from, the various business activities. It is the character of the business actually done in the taxable year which determines whether a company is taxable as an insurance company under the Code; see, e.g., *Service Life Insurance Co. v. United States,* 189 F. supp. 288, *aff'd on other grounds*, 293 F.2d 78 (8th Cir. 1961).

Note that investing premiums for the purpose of earning investment income is an integral part of the business of an insurance company. *See United States v. Atlas Insurance Co.*, 381 U.S. 233, 247 (1965); *Massachusetts Mutual Life Insurance Co. v. United States*, 5 Cls. Ct. 581, 590-591 (1984). However, excess amounts of investment income may indicate that a taxpayer's primary business is not insurance. In *Inter-American Life Insurance Co. v. Commissioner*, 56 T.C. 497 (1971), the Tax Court compared, among other factors, the amount of the taxpayer's premium income to its investment income in concluding that the taxpayer failed to qualify as an insurance company even though it was recognized as an insurance company under state law. The court found the amount of the taxpayer's premium income to be de minimis compared to its investment income. The court also found that the taxpayer did not maintain an active sales force, and that of the relatively few policies issued by the taxpayer, nearly all were issued to company insiders and their family members.

If the auditor feels that the taxpayer does not meet this test, then the auditor should forward a memo to Technical Support along with a worksheet showing why the 50% test has not been met, a description of the business activities of the captive insurance company, tax effect of the audit adjustment, etc. The auditor should also provide information on the relative amount of gross receipts from insurance contracts compared to total gross receipts, the proportion of the total contracts entered into by the company that qualify as insurance contracts, and the relative amount of investment income and

insurance related activities. If Technical Support agrees with the auditor, the issue will be forwarded to Legal Services and management for possible audit adjustment.

6. Risk Shifting And Risk Distribution

As indicated above, in order for a company to be an insurance company it must engage in the business of issuing "insurance" contracts. This has been the major issue at the federal level in the captive context. In other words, are the contracts between the members of an affiliated group and the group's insurance subsidiary truly "insurance" contracts.

The U.S. Supreme Court defined insurance in the 1941 case *Helvering v. Le Gierse*, 312 U.S. 531 (1941). The Court said that in order to be "insurance" an arrangement must consist of both "risk shifting" and "risk distribution." Risk shifting involves the shift of the financial risk of a potential loss from an insured to a financially capable insurer in exchange for payment of a premium that is less than the risk insured. With risk shifting the focus is on the insured, and whether through the arrangement with the insurer it has insulated itself from the risk of loss. Risk distribution, on the other hand, focuses on the insurer. Risk distribution is the mechanism through which the insurer spreads its risks over a sufficiently large pool of insured parties. The court observed that risk distribution exists when the following factors are present: (i) the insurer has a sufficient number of exposures for the statistical law of averages to function, (ii) the exposures present approximately the same chance of loss, and (iii) the exposures are each separate and distinct. For risk distribution, no one insured can account for more than 15% of the total risk of loss transferred or more than 15% of the total premiums paid to the captive.

7. Economic Family Doctrine

The Department can no longer apply the "economic family doctrine" that was discussed in IRS Revenue Ruling 2001-31. That position was based on the idea that where the ultimate burden of economic loss is retained within the same economic family (i.e. the affiliated group) that suffered the loss, there can be no insurance because risk of loss has been neither shifted nor distributed. However, no court ever adopted the economic family doctrine and the IRS announced in Revenue Ruling 2001-31 that it would no longer challenge captive insurance arrangements under that doctrine.

8. Balance Sheet Test

One of the tests that courts and the IRS use to evaluate whether or not an arrangement with a captive involves risk shifting by applying the so-called "balance sheet test." In practice, application of this test generally results only in contracts between the affiliated

group's parent and the captive insurance subsidiary **not** qualifying as "insurance" contracts. See *Humana Group v. Commissioner*, 979 F.2d 1341 (9th Cir. 1992). The rationale is that the parent cannot shift the financial risk of loss to the captive subsidiary because any claims paid by the captive cause a decline in the captive's net assets, which decline is reflected by a corresponding decline in the value of the captive's outstanding stock. Since the parent owns the captive's stock, it suffers that decline in value, and hence the economic detriment of claims paid by the captive. Because the contracts between the parent and captive are not insurance contracts, purported premiums paid by the parent to the captive are not deductible by the parent for federal purposes. The balance sheet test does not, however, result in contracts between the brother-sister subsidiaries and the captive from being considered insurance contracts. Because the brother-sister subsidiaries do not own stock in the captive, losses paid by the captive have no effect on the separate balance sheets of the brother-sister subsidiaries. Assuming then that the captive's contracts with the brother-sister subsidiaries are more than half of the captive's business, and that overall arrangement satisfies commonly accepted notions of insurance (discussed below), then the IRS considers the captive insurance company a true insurance company even though the contract with its parent may not be an insurance contract. In a unitary group, if the captive is a true insurance company by virtue of its contracts with brother-sister subsidiaries, then the captive is excluded from the group under the noncombination rule.

The IRS Audit Techniques Guide lists the following cases as support for its position:

- *Harper Group v. Commissioner*, 979 F.2d 1341 (9th Cir. 1992)
- *Humana, Inc. v. Commissioner*, 881 F.2d 247 (6th Cir. 1989)

The IRS agent would develop the issue based on these cases.

Commonly Accepted Notions of Insurance

In *Kidde Industries, Inc. v. United States*, 40 Fed. Cl. 42 (Fed. Cl. Ct. 1997), the court stated that, in addition to risk shifting and risk distribution, a captive arrangement must be consistent with commonly accepted notions of insurance. In general, this means that the parties must deal with each other in substantially the same way as unrelated parties would deal with each other. Factors relevant to this analysis include the following:

- Written insurance policies that specify covered risks and claims presentation executed prior to the beginning of coverage;
- Arm's-length premiums determined in a manner consistent with industry practice;
- Timely payment of required premiums;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The captive insurance company is adequately capitalized;
- The captive has a professional insurance staff;
- The captive has not made loans to the parent or other subsidiaries.

Captive Insurance Company with Third-Party Premiums

If the captive insurance subsidiary accepts a significant portion of its premium income from unrelated third parties, the IRS considers that risk has been shifted and distributed outside the affiliated group. True insurance exists for income tax purposes and the insurance expense for the premiums paid would be an allowable federal deduction. The IRS uses a 30% threshold figure to determine if the third-party premiums are significant. For more information the IRS audit techniques service guide refers to the following:

- *Sears Roebuck and Co. v. Commissioner*, 972 F. 2d 858 (7th Cir. 1992)
- *AMERCO v. Commissioner*, 979 F.2d 162 (9th Cir. 1992)
- *Ocean Drilling & Exploration Co. v. United States*, 988 F.2d 1135 (Fed. Cir. 1993)
- *Harper Group v. Commissioner*, 979 F.2d 1341 (9th Cir. 1992)

a) Business Purpose / Sham Transaction

In general, the Department will not treat any captive insurance company as a sham transaction. The IRS rules on sham transactions are too difficult to apply in a normal audit situation. However, courts have come to find the existence of either of two particular facts to cause a captive arrangement to automatically be considered a sham. These two facts, (i) undercapitalization of the captive, or (ii) any sort of indemnity, hold harmless, or capitalization agreement by the parent that serves to guarantee the captive's performance. For example, in *Malone & Hyde, Inc. v. Commissioner*, 62 F.3d 835 (6th Cir. 1997) the parent of an affiliated group obtained coverage from an unrelated third-party insurer to insure risks of itself and subsidiary corporations, which the third-party insurer then reinsured with the parent's wholly-owned captive. The captive was formed in Bermuda and met that country's capital requirements, but those requirements were more relaxed than those found in U.S. jurisdictions. In addition, the parent corporation had entered into hold-harmless agreements with the third-party insurer in which the parent guaranteed the captive's performance under the reinsurance agreement. The taxpayer argued that although undercapitalization and the hold-harmless agreements would result in the parent not having shifted risk to the captive, they would have no bearing on whether the subsidiary corporations shifted risk. Under the balance sheet test, the subsidiary corporations shift risk whether or not the parent must perform under the guarantee. The court nonetheless rejected the entire captive arrangement, including the policies

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

covering the affiliates, finding that undercapitalization plus the hold-harmless agreements demonstrated the arrangement to be a sham.

9. Illinois Treatment

In auditing a captive insurance company, the major issue faced by the auditor is whether the company should be treated as an insurance company and its income apportioned under IITA § 304(b) or as a regular three-factor company and its income apportioned under IITA § 304(a).

When auditing a captive insurance company, the auditor must determine whether or not the captive insurance company was accepted as an insurance company by the IRS. Those procedures are stated above.

If the IRS did not specifically audit the captive insurance company, the Department will conduct an independent analysis of the captive.

If the captive insurance company is NOT treated as an insurance company on the parent's federal income tax return, it should not be treated as an insurance company required to apportion its income under IITA § 304(b).

If the captive insurance company was treated as an insurance company under Subchapter L of the IRC, the parent's federal return should reflect that:

- ALL of the premiums paid by the parent and/or its subsidiaries to the captive insurance company should be claimed as a deduction on the parent's federal income tax return; and

- The captive insurance company should have claimed a deduction for reserves for unpaid losses, including a reserve for incurred but not reported claims (a reserve deduction).

Note: It may be difficult to tell if the captive insurance company has loss reserves because it will not be apparent from reviewing the federal return or financial statements. The auditor probably will have to review the workpapers that make up the federal return, probably for other income or other expenses.

If the captive was treated as an insurance company on the parent’s federal return, the next step is to determine if that was PROPER treatment. The proper treatment for a captive insurance company must be determined on the basis of the federal regulations

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

and Revenue Rulings. Two situations must be considered: if the IRS conducted an audit on the federal return, or if the IRS did not conduct an audit on the federal return.

If the IRS has conducted an audit of a federal consolidated group which includes a captive insurance company, even if the captive treatment is allowed, the auditor must determine if the issue was specifically addressed in the federal audit. If the IRS has examined the captive treatment, and has determined that the captive qualifies as an insurance company, it should be treated as an insurance company for Illinois.

However, if the IRS did a limited scope audit which did not address the issue, or if the IRS determined that the captive issue was immaterial for federal purposes, the Illinois auditor must examine this issue and determine the proper treatment in accordance with the IRS Regulations and Revenue Rulings. If the captive is properly treated as an insurance company, it should be treated the same for Illinois purposes.

If the insurance company treatment is proper, the captive should be treated as an insurance company under IITA § 304(b).

10. Premiums Numerator – Captive Insurance

If a captive insurance company insures risk in Illinois, then there is a presumption that there is Illinois nexus unless the taxpayer proves otherwise. There must be sufficient activities conducted by the captive insurance company to assert nexus. See the discussion earlier in this Chapter at “Nexus”.

A captive insurance company might not file reports with the Director of Insurance, so there may be no Schedule T showing direct premiums written in Illinois. In that case the auditor will have to rely on IAC § 100.3420(d) where it states in part:

> …If an insurance company does not file an annual statement with the Director of Insurance or if any direct premiums written by an insurance company are not allocated to a specific state on its annual statement, that insurance company shall include in the numerator of its apportionment factor the direct premiums written for insurance on property or risk in this State, determined in accordance with the determination of gross taxable premiums written under Section 409(1) of the Illinois Insurance Code [215 ILCS 5/409(1)]...

If the taxpayer will not provide the auditor with records to support an Illinois numerator under Section 409(a) of the Illinois Insurance Code, then the auditor will have to estimate an Illinois factor based on best available records. The auditor could get the Illinois payroll from IL-941s filed by the subsidiaries doing business with the captive, or

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

the auditor could get a listing of Illinois property or even schedule out Illinois sales from sales tax returns in order to estimate an Illinois premiums factor.

In determining whether a company is a true captive insurance company and if it has Illinois nexus, two useful questionnaires developed in the field are shown in the Exhibits Section under Questionnaires. Both contain questions that may help the auditor develop a nexus and/or captive insurance position. While both questionnaires contain a mixture of questions that address both nexus and insurance, the first tends more towards a captive insurance determination, while the second more towards nexus.

11. Identifying a Captive

There may be situations where it is not obvious that a federal consolidated group has a captive insurance company as a member. For example, the parent could be a noninsurance company 1120 filer and the captive an 1120-PC filer. The following items are some basic things to consider in order to identify the captive insurance company in the federal consolidated group:

- Look and see if any companies have “insurance” or “reinsurance” in their names on Form 851 or a list of the subsidiaries (like Form 7004 Application for Extension).
- See if box “1b Life/nonlife consolidated return” is marked on the face of the consolidated federal Form 1120. If so, there is a captive life and maybe nonlife company in the consolidated group.
- Review Form 851 – Affiliations Schedule, Part II, It will list the Principal Business Activity with a number. A captive should have one of the codes for carrying lines of insurance (not related insurance activities or broker). For example, it might say “Insurance carrier” for activity, and the code could be “524150 - Direct Insurance & Reinsurance (except Life, Health, & Medical) Carriers”. The codes are in the Form 1120 instructions.
- You should likely see an 1120-PC or 1120-L return included showing the separate insurance company or subgroup information.
- More importantly, the alleged captive should be reporting income from insurance premiums and reporting losses from paying insurance claims. The “premiums written” will be buried in Line 10 “Other income” of the parent’s consolidated Form 1120.
    - You should be able to find that in a statement showing the separate company breakdown for Line 10, which should report something like “premiums written” for the captive.
- The losses should be buried in the parent’s Line 26 “Other deductions”.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

    - You should be able to find that in a statement showing the separate company breakdown for Line 26, reporting something like "Losses paid during the year".
- You will need an Annual Statement from the alleged captive that they file at least in their state of domicile.
- Review the parent's Form 10-K annual report.
- Simply ask the taxpayer if you are not sure.
    - The EDA-132-NI for nexus also has questions regarding if the taxpayer has captives, so this could be used to help identify captives as well.

12. *Wendy's* (2013)

An important and controlling Illinois case regarding the determination of captive insurance companies is *Wendy's International, Inc. v. The Department of Revenue*, 375 IllDec 194 (Ill. App. 4th, 2013). The taxpayer ("Wendy's") is an international fast food restaurant chain, headquartered in Ohio. The Department audited Wendy's and issued two NODs for consecutive audit cycles, challenging and including a company in Wendy's UBG that Wendy's had not included and treated as a captive insurance company.

Wendy's set up Scioto Insurance Company ("Scioto") in Vermont in 2001 to insure its affiliated entities. Scioto acquired Oldemark LLC ("Oldemark") in order to be sufficiently capitalized. Oldemark held Wendy's trademarks, earned a substantial amount of royalties and filed as a disregarded entity. Thus, Scioto's royalty income from Oldemark far surpassed its insurance premiums income: in some years Scioto's royalty income was more than ten times greater than its insurance premiums income. The Department asserted that Scioto should not be treated as an insurance company, for some of the following reasons:

- There was no actual risk shifting or risk distribution
- The majority of Scioto's income was from intercompany royalties, not insurance premiums, so the majority of its business was not from insurance
- Scioto was not regulated in all states where it insured risk

The Department issued NODs for the 2001-2003 and 2004-2006 cycles. Wendy's protested, countering that they were a bona fide insurance company, qualified as an insurance company under the IRC, shifted and distributed risk, and was protected under the Illinois Constitution's uniformity clause (Illinois cannot discriminate against a non-Illinois insurance company). The trial court upheld the Department's NODs and Wendy's appealed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Illinois Appellate Court reversed and found in favor of Wendy's, determining that Scioto should be treated as an insurance company. One important take-away from the case was that the Court's explanation "more than half of the business" analysis is not a mere insurance premiums gross receipts test, as stated in this excerpt:

While Scioto's income from insurance premiums was dwarfed by its royalty and interest income, "it is not any percentage of income that determines whether a company is taxable as an insurance company but rather the character of the business actually done by the company." *Service Life Insurance Co. v. United States*, 189 F. Supp. 282, 285-86 (D. Neb. 1960).

The Court determined Oldemark was in business for licensing intangibles, and Scioto was in business for insuring Wendy's and affiliates. Scioto's ownership of Oldemark was necessary so it could be capitalized sufficiently under Vermont law. The Court also found the following that Scioto did demonstrate risk-shifting and risk-distribution, and that the IRS and Vermont treated Scioto as an insurance company. Therefore, Scioto qualified as an insurance company and Illinois should treat it as such.

Auditors must consider this case and its reasoning when making a similar captive insurance determination. The percentage of income received from insurance premiums is an important criteria and evidence to consider. However, *Wendy's* (2013) shows that percentage may not be determinative. We would expect an insurance company to have most of its income from insurance premiums, but there could be exceptions like Scioto. A full analysis of the facts is necessary to see if it meets the elements of an insurance company. See further discussion of the elements of an insurance company in Section "J. CAPTIVE INSURANCE COMPANIES".

K. HEALTH MAINTENANCE ORGANIZATIONS

Any Health Maintenance Organization (HMO) that is properly treated as an insurance company under the IRC should also be treated as an insurance company under the IITA and required to apportion its income under IITA § 304(b). If an HMO is NOT properly treated as an insurance company for federal income tax purposes, it SHOULD BE treated as a three-factor company and its income apportioned using IITA § 304(a).

The following types of HMOs should be treated as follows:

- A staff model HMO does not qualify as an insurance company for federal income tax purposes (see IRS Revenue Ruling 68-27 for more information).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- An individual practice association (IPA) does qualify as an insurance company for federal income tax purposes (see IRS Private Letter Ruling 9412002 for more information).
- A network-model HMO does qualify as an insurance company for federal income tax purposes (see IRS TAM 201117027 for more information).

L. RISK RETENTION GROUPS

A Risk Retention Group (RRG) is formed pursuant to the provisions of the Federal Liability Risk Retention Act of 1986. Under the IITA, a RRG is considered to be an insurance company, is required to file an IL-1120 return, and is required to use IITA § 304(b) to apportion its income. REF: IT 91-0035.

All RRGs, regardless of place of incorporation or domicile, which collect premiums from insureds in Illinois are required to pay a privilege (premium) tax to the Illinois Department of Insurance. REF: Illinois Insurance Code § 409.

M. POOLING OF RISKS

When risks are substantial or unusual, a company may not be able to obtain insurance through a regular insurance company. Pooling arrangements may be used to secure insurance in these situations. “Pooling” is defined as an organization of insurers or reinsurers through which particular types of risks are underwritten with premiums, losses, expenses, and profits shared in agreed ratios. This is also known as an “association” or “syndicate”. An example of pooling would be a group of six unrelated roofing companies within a geographical area coming together to form an insurance company. Domestic companies may form an offshore insurance company for tax avoidance purposes. Another likely possibility would be a group of Illinois nexus companies forming an insurance company incorporated and headquartered in a state like Vermont or Hawaii.

1. Reasons For Pooling Arrangements

There are two reasons why companies may form pooling arrangements:

1. The type of industry pooled does not lend itself to outside insurance, and/or
2. A refusal of insurance companies to accept certain risks.

Pooling arrangements are established along an industry line such as in construction, the legal profession, or petroleum. Each industry has its own specific risks. For example, petroleum companies are exposed to risks of damage from pollution, wild oil or gas well fires, and the transportation of fuel oil, to name a few. Because of the type and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

probability of risks, traditional insurance companies may not insure or require prohibitively expensive insurance premiums. Through the pooling arrangements, a group of companies can insure risks and/or lower premiums can be secured.

2. Pooling Characteristics

For the pooling arrangement to be treated as true insurance, the following characteristics generally must be present:

- The pooling arrangement is comprised of economically unrelated shareholders *and* their subsidiaries and/or affiliates.
- None of the shareholders own a controlling interest.
- The risk of loss for each shareholder must be shared with all shareholders.
- The insurance company provides insurance coverage only to the shareholders and their affiliates. No outside third-party coverage is provided.
- Premium rates are established according to customary industry rating formulas. The insurance company may take into account the unique risks of the insureds in establishing its rates.
- There must be a shifting of risk and distribution of the risk of loss.

Example #35

A pooling arrangement is established in Vermont to insure the risks of six unrelated bridge construction companies against the damages incurred should a bridge fail due to faulty construction. Each of the six owns an equal amount of the insurance company, and has provided an equal amount of capitalization.

Premiums for casualty insurance are determined according to regular insurance standards with adjustment for the type of bridges being constructed and other industry risks specific to each company. The insurance company does not accept risks outside of the six construction companies.

As long as the risk of loss is shifted and distributed, the IRS would respect the arrangement as true insurance, which would make it qualify as insurance for Illinois purposes.

3. Risk-Shift And Risk-Distribution

Like with captive insurance companies, there must be evidence of risk-shift and risk-distribution for a pooling arrangement to be considered insurance. If the pool members do not commingle the premium funds and share in the losses, there is no risk-shift and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

no risk-distribution. Essentially, each member would be self-insuring through their own capital accounts. This was presented in the federal case *Helvering v. LeGierse,* 312 U.S. 531 (1941) and Rev. Ruling 60-275. Members of a pool must be able to demonstrate the premiums are paid to and commingled in the pool's account, and that losses are paid out of the pool's account, which should be evidenced by the financial statements of the pool. If members are not paying into a commingled account and separately pay losses out of their own capital account, no true insurance is taking place.

Pooling arrangements for insurance are a form of captive insurance. Although there is more than one insured and the insureds are not related according to stock ownership, the pool will not accept risks outside the type of industry risks being insured. Thus, it is only the risks of the pooling insureds which are accepted. The number of pool members can vary from as few as two to an unlimited number depending upon the type of industry and the number of insureds interested.

As long as none of the shareholders owns a controlling interest in the entity and the premium funds are commingled, there is a pool. If one entity owns a controlling interest, there is no pool. Instead, there is a partnership or a parent-subsidiary relationship with outside ownership interests.

REF: Excise Tax-Foreign Insurance, IRS Audit Technique Guide.

N. HOLDING COMPANIES

1. IITA § 1501(a)(27)

For taxable years ending on or after December 31, 1987, holding companies (other than a bank holding company), can be included in the same unitary group with companies apportioning under different subsections of IITA § 304, that is, under (b) insurance companies, (c) financial organizations (c-1) federally regulated exchanges, and (d) transportation services. Further, a holding company for these periods can be split among more than one unitary business group.

This came about because of P.A 85-731 and P.A. 97-057. P.A. 85-731 permitted a transportation or insurance holding company to file as a member of the respective transportation or insurance UBG. P.A. 97-057 extended the non-combination exception of holding companies to apply to financial organizations and federally regulated exchanges. It also allowed holding companies to be split among different UBGs. Finally, it provides that the holding company's business income must be apportioned using the apportionment formula used by the group with which it is combined; e.g., if the holding company is combined with a group of insurance companies, the business

income of the group (including the holding company) is apportioned under IITA Section304(b)). IITA § 1501(a)(27)(C)(iii) provides the following:

> A holding company shall apportion its business income under the subsection of Section 304 used by the other members of its unitary business group. The apportionment factors of a holding company which would be a member of more than one unitary business group shall be included with the apportionment factors of each unitary business group of which it is a member on a pro rata basis using the same method used in clause (ii).

This provision has two parts. The first sentence explains how the holding company will apportion its income with the UBG it joins. The second sentence explains how to split the factors in case the holding company must be included in more than one UBG.

Certain taxpayers have tried to argue that the holding company only has to use the joined UBG apportionment method if there is only one UBG, and is evidenced by the reference of plural UBGs in the second sentence, but not in the first sentence, of IITA § 1501(a)(27)(C)(iii). These taxpayers are incorrect.

The language clearly says that a holding company must apportion using the method of the UBG it joins. This must be applied whether there is only one UBG, or a split among several UBGs. The second sentence must be stated in the plural because the factors will only be split if there are several UBGs. The first rule of statutory construction is that where the language of a statute is clear, a court must apply its plain meaning as written (*Connecticut National Bank v. Germain*, 503 U.S. 249, 254 (1992)). "Where the words of a statute are unambiguous, this first cannon is also the last: 'judicial inquiry is complete.' " (quoting *Rubin v. United States*, 449 U.S. 424 (1981)). Following the aforementioned cardinal rule, we look to the terms used in IITA § 1501(a)(27)(C)(iii), applying to these terms their plain and ordinary meaning. The express, ordinary language of this statute tells us what to do, and no additional speculation is required.

Now, admittedly this leads to the situation where the factors for the holding company that joins the insurance group will equal zero, and thus not impact the insurance UBG. This is because the holding company's factor will be based upon IITA § 304(b) and its insurance premiums. Assuming the holding company has no insurance premiums, all its other receipts are irrelevant and do not affect the insurance group to which its income will be allocated. In other words, the holding company's income that is included in the insurance UBG will be sourced to Illinois based upon the insurance UBG's apportionment factor without taking into account the holding company's receipts. This is the consequence of applying Illinois statutes, not opinions about the consequences.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For years ending prior to December 31, 1987, a holding company can only be included in a unitary group with other companies required to apportion their income under IITA § 304(a) (i.e. three-factor companies).

Example #36

For the year ending December 31, 1986, holding company HC is engaged in a unitary business with insurance companies A and B. HC would be required to file a separate return and apportion its income under IITA § 304(a). A and B would be required to file on a unitary basis and would be required to apportion their income under IITA § 304(b).

Example #37

For the year ending December 31, 1987, holding company HC is engaged in a unitary business with insurance companies A and B. HC, A, and B would be required to file on a unitary basis.

Example #38

For the year ending December 31, 1996, holding company HC is engaged in a unitary business with company A which is an insurance company, company B which is an insurance agency (the company sells insurance but does not write any insurance policies and does not qualify as an insurance company), and company C which performs some service activities for the insurance agency and the insurance company. In this case, neither B nor C can be combined with the insurance company because they are required to apportion their income under IITA § 304(a). The income (loss) and the factors for HC would be split between two unitary groups: (1) the insurance group which would consist of A and a portion of HC; and (2) the three-factor group which would consist of B, C, and a portion of HC.

Example #39

For taxable year ending December 31, 2013, Holding Company (HC) is engaged in a unitary business with a group of companies, some which are insurance companies (IC) and must apportion under IITA § 304(b), and some which provide financial services (FS) and must apportion under IITA § 304(a). HC will generally be required to be split between the two UBGs, IC and FS. The business income of HC that is included in the combined return with IC will be apportioned under IITA § 304(b) and the business income of HC included in the combined return with FS will be apportioned under IITA § 304(a).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #40

For taxable year ending December 31, 2010, Holding Company (HC) is engaged in a unitary business with a group of transportation companies (TC) and a captive insurance company (CI). HC did not split its income originally between TC and CI, nor did it request alternative apportionment following IAC § 100.3390. Under audit, the auditor should properly split pro rata, or under any reasonable method, HC's income and apportionment factors between TC and CI. The business income of HC that is included in the combined return with IC will be apportioned under IITA § 304(b) and the business income of HC included in the combined return with TC will be apportioned under IITA § 304(d).

See Audit Manual Chapter 29 on Holding Companies for more information.

O. GENERAL FEDERAL LINES OF INTEREST: 1120-PC, 1120-L

Lines of Interest, federal Form 1120-PC

The layout of a federal Form 1120-PC differs from a federal Form 1120. The following bullet points indicate a few lines of interest for the Illinois audit. These are taken from a blank 2017 Form 1120-PC, so the lines may differ depending on the filing year. This is not an exhaustive list.

- Box A, p.1: Indicates whether the 1120-PC is consolidated (Box 1) and if the group includes both life insurance and nonlife insurance companies (Box 2). Under certain conditions, a consolidated group could include life insurance companies, nonlife insurance companies, and 1120 filers (noninsurance companies). The type of parent controls the type of consolidated return filed. For example, in a mixed group of insurance and noninsurance companies, if the parent is a noninsurance company, the insurance companies will subconsolidate within the consolidated federal Form 1120. For more information, see the federal Form 1120/1120-PC/1120-L instructions and federal consolidated regulations for IRC § 1502 (for example, CFR § 1.1502-47(s) for life/nonlife consolidation rules.
- Line 1 Taxable income (Schedule A, line 37), p.1: An 1120-PC determines its taxable income on Schedule A, and then carries that over to Line 1, p.1. This amount is the starting point for the Illinois return.
- Schedule A: This is basically the income statement of the 1120-PC, similar to p. 1 of an 1120.
    - Schedule A, Line 1: Premiums earned, which can be compared to what is reported on Annual Statement.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

  - Schedule A, Line 3b: Tax-exempt interest (must subtract amortization of premium)
  - Schedule A, Line 37: Taxable income, carried to p. 1
- Schedule C: Here is the dividend information, similar to an 1120's Schedule C, used to complete Illinois Schedule J.
- Schedule E, Line 1: Shows net premiums written, which can be compared to what is reported on Annual Statement.
- Schedule F, Line 9: Another place to find tax-exempt interest.
- Schedule I, Line 10: Yet another place to find tax-exempt interest.

Lines of Interest, federal Form 1120-L

The layout of a federal Form 1120-L differs from both the federal Form 1120-PC and the federal Form 1120. The following bullet points indicate some lines of interest. These are taken from a blank 2017 Form 1120-L, so the lines may differ depending on the filing year. This is not an exhaustive list.

- Box A, p.1: Indicates whether the 1120-L is consolidated (Box 1) and if the group includes both life insurance and nonlife insurance companies (Box 2). Under certain conditions, a consolidated group could include life insurance companies, nonlife insurance companies, and 1120 filers (noninsurance companies). The type of parent controls the type of consolidated return filed. For example, in a mixed group of insurance and noninsurance companies, if the parent is a noninsurance company, the insurance companies will subconsolidate within the consolidated federal Form 1120. For more information, see the federal Form 1120/1120-PC/1120-L instructions and federal consolidated regulations for IRC § 1502 (for example, CFR § 1.1502-47(s) for life/nonlife consolidation rules.
- Line 1, p.1: An 1120-L determines its taxable income on p.1 of the return, unlike the 1120-PC. Line 1 reports gross premiums, which should be comparable to what is reported on the Annual Statement.
- Line 27, p.1: Taxable income. This amount is the starting point for the Illinois return.
- Schedule A: Here is the dividend information, similar to an 1120 and 1120-PC's Schedule C, used to complete Illinois Schedule J.
- Schedule F:
  - Here is information for the IITA Sec. 203(b)(2)(I) subtraction modification (Lines 1-8).
  - Tax-exempt interest is on Line 13.
- Schedule G: Gross and net premiums are listed on Lines 1 and 3. These should be comparable to what is reported on the Annual Statement.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

P. INSURANCE COMPANY GLOSSARY

The following glossary has been included to assist you in understanding the language of the insurance business. It is not all-inclusive, but can be a starting point in developing knowledge of the insurance industry.

Admitted Assets
In general, the admitted assets of an insurance company include the following types or classes of assets: cash, stocks, bonds, collateral loans, mortgage loans, loans to policyholders, interest, dividends and real estate income due and accrued, real estate owned, and premiums due. The state departments of insurance permit only admitted assets to be used in determining the total assets available against the companies' liabilities. However, for federal tax purposes, the term "assets" includes non-admitted assets.

Alien Company
A company incorporated or organized under the laws of any country other than the United States (215 ILCS 5/2(h)).

Annual Statement
Insurance companies are regulated by state insurance commissions and are required to file, annually, detailed financial statements (Annual Statements) with those regulatory bodies. These Annual Statements are verified and audited by Insurance Commission examiners. The National Association of Insurance Commissioners has prescribed a standardized financial report that is called the Annual Statement or Convention Form. The National Association of Insurance Commissioners has prescribed a separate Annual Statement for life insurance companies and property and casualty companies.

An Annual Statement contains the following information:

- Balance Sheet;
- Summary of Operations;
- Analysis of Operations;
- Analysis of increases in reserves;
- Exhibits supporting items on the balance sheet and the summary of operations;
- General Interrogatories;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Various supporting schedules detailing items on the balance sheet and the summary of operations;

- Schedule T showing state apportionment of the premiums.

Annuity
A contract sold by insurance companies that pays a monthly (or quarterly, semiannual, or annual) income benefit for the life of a person (the annuitant), for the lives of two or more persons, or for a specified period of time.

Assumption Reinsurance
Reinsurance of the entire business, part of the business, or block of policies under an arrangement whereby the purchasing company becomes solely liable to the policyholders on the contracts transferred.

Authorized Company
A company authorized by the State Department of Insurance to do business in its state.

Convention Form or Blank
The Annual Statement established by the National Association of Insurance Commissioners for reporting in detail the condition and activities of an insurance company.

Domestic Company
A company incorporated or organized under the laws of this state (215 ILCS 5/2(f)).

Deferred Premium
The portion of the annual premium unpaid at any year end. Installment premiums payable monthly, quarterly or semi-annually which have not fallen due are included.

Direct Premiums
All premiums (less return premiums) arising from policies issued to afford primary (issuing company) insurance for a given hazard.

Dividends to Policyholders
Refunds or rebates of premiums to policyholders as distinguished from dividend distributions to shareholders.

Earned Premium
When a premium is paid in advance for a certain time, the company is said to "earn" the premium as the time advances. For example, a policy written for three years and paid in advance would be one-third "earned" at the end of the first year of the policy term.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Finder's Fee
Fees paid to an individual for finding or establishing the contract that makes a financial transaction possible. Fees paid to correspondents of an insurance company for securing mortgage loans, etc. A large borrower may also pay a finder's fee to an individual that knows of an insurance company that is willing, able and does lend funds to the borrower.

Foreign Company
A company incorporated or organized under the laws of any state of the United States other than this state (215 ILCS 5/2(g)).

Fraternal Benefit Societies
Any incorporated society, order or supreme lodge without capital stock, including one exempted under the provisions of Section 315.5(a) of Chapter 73 of the Illinois Revised Statutes whether incorporated or not, organized solely for the benefit of its members and their beneficiaries and not for profit, operated on a lodge system with ritualistic form of work, having a representative form of government and providing benefits in accordance with Chapter 73 of the Illinois Revised Statutes is hereby declared to be a fraternal benefit society.

Gross Line
The amount of insurance the company has on risk including the amount it has reinsured.

Group Insurance
A plan where a number of persons are insured under a single policy.

Home Office
The principal place of business of the company: the head office.

Incurred
The insurance industry uses the terms "incurred losses" and "incurred expenses." A loss or expenditure is incurred when it happens although it may not be reported or paid until later.

Internal Revenue Code § 847
Under the IRC, an insurance company is allowed a deduction for reserves accrued for covered losses which have been incurred by its policyholders, but which had not yet been paid. These deductible reserves may include estimates for losses that have been incurred, but not reported by the policyholder, as of the end of the year, as well as amounts that are in dispute. Taxpayers other than insurance companies are not allowed to deduct such items.

Prior to the Tax Reform Act of 1986, an insurance company could accrue the total amount of its estimated losses, even in cases where it was certain that the losses would not be paid

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

until several years after the time of the deduction. In the Tax Reform Act of 1986, IRC § 832(b)(5) was amended to allow deduction only for the present value of unpaid losses, discounted for the time value of money pursuant to the new IRC § 846.

There was a substantial uproar about the so-called "fresh start" transition rules for implementing the new law. The transition rules, in many cases, converted a timing matter into a permanent deduction. However, some insurance companies could not take advantage of the transition rules because the IRS had already been asserting on audit that insurance companies should discount their losses, and some insurance companies had agreed to the audit adjustments. Other insurance companies were already discounting their losses voluntarily.

One of the results of the problems with the implementation of the transition rules was the enactment of IRC § 847 in the Technical and Miscellaneous Revenue Act of 1988. IRC § 847 permits an insurance company that is required to discount the amount of unpaid losses, in computing its losses incurred deduction to take an additional special deduction to account for that discounting. This deduction is allowable, to the extent that the company establishes and maintains a special loss discount account, and makes special estimated tax payments with respect to the tax benefits the insurance company receives.

The amount of the additional deduction is limited to the excess of the company's undiscounted unpaid losses over its related discounted unpaid losses for the tax year. The excess is deducted to the extent that the insurance company did not deduct this excess in an earlier tax year.

Generally, the special deduction is allowed only to the extent that the insurance company makes special estimated tax payments on or before the date that its taxes are due for the year of the deduction. The amount of the special estimated tax payments that are made in a tax year must equal the amount of the tax benefits attributable to the additional deduction for that year. The amount of the tax benefit is determined under IRS regulations. The tax savings are computed without regard to IRC § 1503(c) limitations.

Investment Income
This is the income earned by placing the cash from Premium Income in income-producing assets.

Ledger Assets
Book value of investments, bank deposits, and other tangible items, as well as certain intangible items such as balances, uncollected premiums or recoverable paid losses. Such assets are recorded on the company's general ledger.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Mutual Company
A company without stockholders or capital stock. All risks and all profits are the property of the policyholders.

Net Premiums
In casualty insurance, net premiums are gross premiums less reinsurance ceded. In life insurance, net premiums are the portion of the premiums calculated on the basis of a particular mortality table and interest rate; to enable the insurer to pay benefits as provided by the insurance contracts, no account being taken of expenses, contingencies, or profit.

Non-Admitted Asset
Asset of an insurance company which by statute the company is not permitted to include in its financial statements. Such assets include office furniture and equipment and accounts over 90 days past due.

Non-Ledger Assets
Assets resulting from investments through excess of market (or amortized) value over book values, and interest and other income due or accrued on such investments. Such assets are not recorded on the company's general ledger, but are available from supplementary ledger records or other sources.

Policy
Policy means an insurance policy or contract and includes certificates of fraternal benefit societies, assessment companies, mutual benefit associations, and burials societies (215 ILCS 5/2(n)).

Policyholder
Policyholder means a holder of an insurance policy or contract and includes holders of certificates of fraternal benefit societies, assessment companies, mutual benefit associations, burials societies (215 ILCS 5/2(o)).

Pooling of Risks
An organization of insurers or reinsurers through which particular types of risks are underwritten with premiums, losses, expenses, and profits shared in agreed ratios, generally by unrelated companies in a specific industry that is not economically insurable through traditional insurance companies.

Portfolio Reinsurance
In a transaction of reinsurance, it refers to all the risks of the reinsurance transaction. For example, if one company reinsures all of another's automobile business, the reinsuring company is said to assume the portfolio of automobile business and it is paid the total of the unearned premiums on all the risks reinsured (less some agreed commission).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Premium
The consideration or money the insurer receives for the assumption of the hazard or risk of liability.

Risk Retention Group
A corporation or other limited liability association that is organized and licensed to do business as an insurance company under the laws of any one state. It is formed by companies engaged in similar trades and is directly owned by the members, or indirectly owned by an organization that is wholly owned by the members, who are provided self-insurance by the group. Only members can be provided insurance from the risk retention group.

Reinsurance
The process whereby a company may share its risk with other companies by paying a portion of the premiums it receives. For example, Company A assumes insurance from Company B; this is called reinsurance.

Reinsurance Ceded
The process whereby an insurance company known as the ceding company reinsures its liability in whole or in part with a reinsuring company under a contract of reinsurance.

Repurchase Agreements
Under a repurchase agreement, a corporation with excess cash will purchase an obligation from a financial institution or a securities broker. At the time of the purchase, an agreement will be made that the investment is very short-term in nature (generally less than six months but possibly as short as one day). The purchaser agrees to sell the obligations back to the bank or dealer within the specified period of time and the seller agrees to repurchase the obligations. The obligation is usually purchased and resold at a price which is higher than the price the obligation would be traded at on the open market. The higher price represents the original purchase price plus interest for the repurchase agreement period at the current market rate. These can normally be found in Schedule D of the Annual Statement for older years or in the General Interrogatories and Supplemental Investments Risk Interrogatories schedules for more recent years.

Reserve
A sum set aside to insure the company's ability to meet its obligations under its policy contracts, and for various contingencies, such as loss from investment, catastrophic claims, commission liability, claim liability, expense liability and unearned premium liability.

Unauthorized Company
A company not licensed to do business in a state.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Unauthorized Insurance
Insurance in a company not licensed by the state from which the risk is located.

Unearned Premium
That portion of the premium on a policy or group of policies, which applies to the time that the policy still has to run. The company "earns" its premium as the policy term goes on. The rest is unearned.

Unearned Premium Reserve
Insurance premiums are paid in advance. A company, however, "earns" the premiums only as fast as time elapses. Yesterday's premium is earned. Tomorrow's premium is unearned. The unearned premium reserve is the sum of all unearned premiums of all policies not yet expired that the company has on its books.

Underwriting Profit
Money earned by an insurance company in its underwriting operation as distinguished from money earned in the investment of assets.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

V. EXHIBITS

A. ANNUAL STATEMENTS

Unlike the examinations of retailing and manufacturing corporations, some of the verification and reconciliation of income, modification, and apportionment information for an insurance company can be made by examining the Annual Statements. All insurance companies are regulated by state insurance commissions and are required to file detailed annual financial statements with these regulatory bodies. The financial statements are subsequently verified and audited in considerable detail by the insurance commission examiners of the states in which they do business. The "Annual Statement" or "Convention Form", as it is sometimes called, is a standard form adopted by the National Association of Insurance Commissioners and can be used by the auditors in much the same way as the general ledger and subsidiary books of account for other taxpayers.

The National Association of Insurance Commissioners (NAIC) website only allows the Annual Reports to be obtained for a fee. While the Annual Reports, including the Schedule T, may not significantly change year after year, we are not able to verify that nor does the NAIC inform us of any form changes. For years this Chapter used references to the 1995 Annual Report, and line references needed to be updated to reflect changes in the 2008 Annual Report. Each year may be slightly different, and years subsequent to 2008 may involve new schedules, line references, etc. The auditor will need to be prepared to encounter variations in the Annual Reports when using them.

1. Documentation

Unfortunately we are unable to include images of relevant Annual Reports in this Chapter. Nor would that perhaps be useful, since they may change over time. However, below is a brief summary of some of the exhibits and schedules included in the 2008 Annual Statements of insurance companies where relevant audit financial information may be found. The format, schedules and line numbers may vary in different years.

a) Nonlife Insurance Companies

Assets and Liabilities, Surplus and Other Funds (balance sheet)

Statement of Income

Underwriting and Investment Exhibit- Part 1B Premiums written

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This schedule shows the reinsurance assumed from affiliates and the reinsurance ceded to affiliates.

General Interrogatories
This section contains some general information about the operations of the company.

Schedule D (in general)
This set of schedules should be utilized to verify the addition and subtraction modifications dealing with interest on investments. A description of the various parts follows.

Schedule D- Part 1
This schedule shows all LONG-TERM bonds OWNED on December 31st of the current year.

Schedule D- Part 3
This schedule shows all LONG-TERM bonds and stocks ACQUIRED during the year.

Schedule D- Part 4
This schedule shows all LONG-TERM bonds and stocks SOLD, REDEEMED or otherwise DISPOSED OF during the current year.

Schedule D- Part 5
This schedule shows all LONG-TERM bonds and stocks ACQUIRED during the current years and fully DISPOSED of during the current year.

Schedule DA- Part 1
This schedule shows all SHORT-TERM investments OWNED December 31 of the current year.

Schedule F- Part 1
This schedule shows assumed reinsurance premiums.

Schedule Y- Part 1
This schedule shows the organizational chart for members of a holding company group.

Schedule Y- Part 2
This schedule shows a summary of the insurer's transactions with any affiliates.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Schedule T
Column #2 of Schedule T shows the direct premiums written for the current year.

The column and line references used above are for Schedule T in the 2008 Annual Statement for non-life insurance companies. The format and line numbers for this schedule may be different in other years.

b) Life Insurance Companies

Assets and Liabilities, Surplus and Other Funds (balance sheet)

Summary of Operations
In some years, Line 1A of this schedule contains information on deposit-type funds that should be included in the apportionment factor. In some years, this information was not reported on Schedule T. For 2008, the summary contains several lines related to deposit-type funds.

Exhibit of Net Investment Income

Exhibit 5 – Interrogatories This section contains some general information about the operations of the company.

Schedule D (in general)
This set of schedules should be utilized to verify the addition and subtraction modifications dealing with interest on investments. A description of the various parts follows.

Schedule D- Part 1
This schedule shows all LONG-TERM bonds OWNED on December 31st of the current year.

Schedule D- Part 3
This schedule shows all LONG-TERM bonds and stocks ACQUIRED during the year.

Schedule D- Part 4
This schedule shows all LONG-TERM bonds and stocks SOLD, REDEEMED or otherwise DISPOSED OF during the current year.

Schedule D- Part 5
This schedule shows all LONG-TERM bonds and stocks ACQUIRED during the current years and fully DISPOSED of during the current year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Schedule DA- Part 1
This schedule shows all SHORT-TERM investments OWNED December 31 of the current year.

Schedule S- Part 1
This schedule shows reinsurance assumed.

Schedule Y- Part 1
This schedule shows the organizational chart for members of a holding company group.

Schedule Y- Part 2
This schedule shows a summary of the insurer's transactions with any affiliates.

Schedule T
Schedule T shows the premiums and annuity considerations for the current year. Schedule T shows the direct premiums written for life insurance premiums (Column 2), annuity considerations (Column 3), and accident and health insurance premiums (Column 4). The total direct premiums written for each of these items is reported on Line 59 (Columns 2 through 4). In addition, Schedule T also shows the direct premiums written for company contributions for employee benefit plans (Line 90- Columns 2 through 4), dividends applied to purchase paid-up additions (Line 91- Columns 2 through 4), dividends applied to shorten endowment or premium paying period (Line 92- Columns 2 through 4), premium or annuity considerations waived under disability or other contract provisions (Line 93- Columns 2 through 4), and aggregate other amounts not allocable by state (Line 94 Columns 2 through 4).

The column and line references used above are for Schedule T in the 2008 Annual Statement for life insurance companies. The format and line numbers for this schedule may be different in other years.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

B. LIFE/HEALTH INSURANCE GUARANTY ASSOCIATION TAX OFFSETS

If an insurance company is a member of the Illinois Life and Health Insurance Guaranty Association, the insurance company may be entitled to a Life and Health Insurance Guaranty Association (LHIGA) tax offset on its IL-1120 return.

The Illinois Life and Health Guaranty Association assesses amounts against member insurers when another member-company files for bankruptcy and is unable to meet its obligations to its policyholders. If the total amount of these assessments is higher than the amount prescribed in the statute, members of the Association will be entitled to a tax offset. In some instances, an adjustment to the available offset is made if the Illinois Life and Health Guaranty Association refunds assessments to member insurers after liquidators are able to recover money from a bankrupt member.

1. Statutory Authority For The Tax Offset

The Illinois Income Tax Act does not have a provision that specifically authorizes the Life and Health Insurance Guaranty Association Tax Offset. However, the tax offset is authorized by the Illinois Insurance Code. The Illinois Compiled Statutes (215 ILCS 5/531.13) contain language that describes the offset. Prior to May 29, 1998, 215 ILCS 5/531.13 stated:

> In the event the aggregate Class A, B, and C assessments for all member insurers do not exceed $3,000,000 in any one calendar year, no member insurer shall receive a tax offset. However, in any one calendar year in which the total of such assessments exceeds $3,000,000, the amount in excess of $3,000,000 shall be subject to a tax offset to the extent of 20% of the amount of such assessment for each of the five calendar years following the year in which such assessment was paid and each member insurer may offset the proportionate amount of such excess paid by the insurer against its liabilities for the tax imposed by subsections (a) and (b) of Section 201 of the "Illinois Income Tax Act", for the tax imposed by Section 409 of the "Illinois Insurance Code", and for the fees imposed by Section 408.1 of the "Illinois Insurance Code.

Public Act 81-899, which was effective on January 1, 1980, initially authorized members of the Illinois Life and Health Guaranty Association to claim an offset against their income <u>and</u> replacement tax liabilities. Effective September 1, 1985, this was subsequently amended by Public Act 84-221 so that for Illinois income tax purposes members of the Illinois Life and Health Guaranty Association can only claim the offset against their <u>income</u> (not replacement) tax liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A legislative change was made to the Insurance Code effective January 1, 1998, to eliminate the inequity of premiums tax assessments between in-state and out-of-state insurance companies, making the applicable premiums tax rate 0.4% for accident insurance companies and 0.5% for all other insurance companies. This, in effect, has reduced the amount of overall premiums tax liability.

Effective May 29, 1998, Public Act 90-583 amended 215 ILCS 5/531.13 to state:

> In the event the aggregate Class A, B and C assessments for all member insurers do not exceed $3,000,000 in any one calendar year, no member insurer shall receive a tax offset. However, for any one calendar year before 1998 in which the total of such assessments exceeds $3,000,000, the amount in excess of $3,000,000, shall be subject to a tax offset to the extent of 20% of the amount of such assessment for each of the 5 calendar years following the year in which such assessment was paid and each member insurer may offset the proportionate amount of such excess paid by the insurer against its liabilities for the tax imposed by subsections (a) and (b) of Section 201 of the Illinois Income Tax Act. The provisions of this Section shall expire and be given no effect for any tax period commencing on and after January 1, 2003.

The LHIGA Tax Offset cannot be claimed for any tax period commencing on and after January 1, 2003.

2. Claiming The Tax Offset

The Illinois Department of Insurance provides premium data to the Illinois Life and Health Guaranty Association to enable it to calculate the amount of the assessments against its members. Based on this information, the Illinois Life and Health Guaranty Association provides each member a statement (Tax Offset Notice) indicating the potential amount available for a tax offset in the current tax year. In addition, the Tax Offset Notice also provides the member the amount available for a tax offset in prior years.

Prior to May 29, 1998, 215 ILCS 5/531.13 allowed an insurance company to claim the Life and Health Insurance Guaranty Association Tax Offset against EITHER its income tax liability, premium tax liability under Section 409 of the Illinois Insurance Code, or fees imposed by Section 408.1 (fees for valuation of life insurance policies) of the Illinois Insurance Code. The insurance company has the option to decide where the tax offset will be claimed. The offset is available only to the paying company. It may not be transferred or assigned to any other company. In addition, no offset may be taken for any assessments issued by the Life and Health Insurance Guaranty Association that have not been paid by the company.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the amount of the tax offset exceeded the tax or fees due for one of the above items and the insurance company decided to claim the tax offset against that item, the insurance company could claim the remaining portion of the tax offset against another tax or fee. In other words, a company's available tax offset could be used to reduce taxes and fees due to the Illinois Department of Insurance and/or the Illinois Department of Revenue. However, the combined value of all the tax offsets taken may not exceed the total available tax offset computed by the Illinois Life and Health Guaranty Association.

Unlike losses and credits, there are no provisions to carry any excess or unused LHIGA tax offsets. If the amount of the tax offset exceeds the amount of all of the above taxes and fees, the excess tax offset may NOT be carried back or forward. In addition, if a tax offset is available, but is not taken by the insurance company in the year it becomes available; it may not be carried back or forward. The only two situations when the excess amount can be utilized at a later date would be when there has been either an Illinois or a federal change to the tax year. If an insurance company's tax liability was increased as a result of an Illinois audit or an IL-1120-X, it would be able to utilize any excess amount of LHIGA Tax Offset that had not previously been utilized on the taxpayer's original return for that year. Further, if the total amount of LHIGA Tax Offset had not been utilized in the current year and a federal audit or federal amended return increased the insurance company's Illinois tax liability it would be able to utilize the excess amount of LHITA Tax Offset that had not previously been claimed.

For tax years ending after May 29, 1998, taxpayers can claim the LHIGA Tax Offset against the liabilities imposed by IITA § 201 (a) and (b) (215 ILCS 5/531.13) AND on their Privilege and Retaliatory Tax return (215 ILCS 5/444(3)).

For tax years ending after May 29, 1998, auditors will no longer be required to determine how much, if any, LHIGA Tax Offset a taxpayer has claimed on their Privilege and Retaliatory Tax returns. As discussed below under VERIFYING THE TAX OFFSET, auditor’s will only have to verify that the correct amount of LHIGA Tax Offset reported on the Tax Offset Notice by the Life and Health Insurance Guaranty Association has been claimed on the Illinois Income Tax return.

Example #41

For the year ending December 31, 1995, insurance company B owes Illinois Privilege (premiums) Tax of $500,000 (before any credits), Illinois Income Tax of $200,000 (this represents income tax only and is after any credits), and $100,000 for fees imposed by Section 408.1 of the Illinois Insurance Code. The Illinois Life and Health Insurance Guaranty Association provides information to B stating that B is entitled to a Life and

Health Guaranty offset of $75,000. B decides to claim the tax offset of $75,000 against its premiums tax liability. In this case, B will NOT be able to claim a tax offset against its income tax liability.

Example #42

For the year ending December 31, 1995, insurance company C owes Illinois Privilege (premiums) Tax of $300,000 (before any credits), Illinois income tax of $100,000 (this represents Income Tax only and is after any credits), and $25,000 for fees imposed by Section 408.1 of the Illinois Insurance Code. The Illinois Life and Health Insurance Guaranty Association provides information to C stating that C is entitled to a Life and Health Guaranty offset of $75,000. C decides to claim $25,000 of the tax offset against the fees imposed by Section 408.1 of the Illinois Insurance Code and the remainder of the tax offset against his income tax liability. In this case, C will only be able to claim a $50,000 tax offset against its income tax liability.

Example #43

For the year ending December 31, 1998, insurance company D reported an LHIGA Tax Offset of $100,000 on its Privilege and Retaliatory Tax Statement (Page 4- line 7b- column 1). The computation of Retaliatory taxes on page 4 shows that the insurance company had a total Illinois basis (line 9- column 1) of $500,000 and a total state of incorporation basis of $800,000 (line 10- column 2). This resulted in a Retaliatory tax due (line 11- column 2) of $300,000 (state of incorporation basis (line 10- column 2) minus the total Illinois basis (line 9- column 1)).

In addition, the taxpayer has claimed an LHIGA Tax Offset of $100,000 against its corporate income tax liability. The taxpayer is allowed to claim the LHIGA Tax Offset against BOTH the Illinois Income Tax AND its Privilege and Retaliatory Tax. No adjustment should be made to D's Illinois Income Tax return.

According to the IL-1120 instructions, an insurance company entitled to this tax offset should identify it by writing "LHIGA" in the margin to the left of line 4(a) of Part V of the IL-1120. In some situations, recoveries from liquidators can result in a subsequent refund to member companies of previously paid assessments. This can result in the member companies being required to "recapture" all or a portion of a previously claimed credit. Any amounts recaptured on an IL-1120 return should be shown on line 8(b) of part IV. Writing “LHIGA” in the margin should identify the amount.

It is important to note, however, that the statute considers this an offset against *liability* for the tax imposed, and not as a credit or an *offset* against the *tax*. The Illinois income tax must first be reduced by any available credits against the tax. After the application

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

of credits, if any liability remains, the appropriate offset may be utilized. In other words, the LHIGA offset is merely a mechanism for payment of the Illinois income tax.

3. Verifying The Tax Offset

The Life and Health Guaranty Association maintains records for the purpose of determining the amount assessed against each insurance company, the amount paid by each insurance company, and the date of payment of the assessment. If a Life and Health Insurance Guaranty Association Tax offset is claimed on the IL-1120 return, the auditor should:

- Verify the tax offset claimed was correct by reviewing the Tax Offset Notice provided to the member insurer by the Illinois Life and Health Insurance Guaranty Association;

- For tax years ending on or before May 29, 1998, verify the tax offset amount has not also been claimed against the insurance company's premiums tax, retaliatory tax, or the fees imposed by Section 408.1 of the Illinois Insurance Code; and

- Verify any amounts that need to be recaptured on the IL-1120.

The auditor can verify the second bulleted item above by requesting the returns filed with the Department of Insurance from the taxpayer.

The auditor can verify the third bulleted item above (recapture amount) by performing the following calculation:

- Subtract the sum of the LHIGA offsets taken against Illinois taxes in prior years (per prior IL-1120 returns) from the amount of offset available for prior years (shown on the Tax Offset Notice);

- Determine if the result is negative, positive or zero. Continue with the calculation only if the result is negative, representing an excess tax offset taken in prior years; and

- Compare the result from step #1 above to the offset available in the current year (per the Tax Offset Notice). A recapture is necessary on the current year return if the amount from step #1 is greater than the offset available in the current year. The amount to be recaptured is the difference between these two amounts.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

C. QUESTIONNAIRE 1

The following questionnaire primarily addresses determining if a company qualifies as a captive insurance company, and also includes questions aimed at establishing if Illinois nexus exists and gaining other business-related information. The questions are classified under nine categories.

Business Operations

1. Is CAPTIVE INSURANCE COMPANY's primary and predominant business activity, during the audit years, the issuance of insurance contracts within the meaning of IRC § 816(a)?

2. What are its sources of revenue in each audit year? What is the ratio of non-premium income to total income for each audit year?

3. Whom does CAPTIVE INSURANCE COMPANY insure? Does the CAPTIVE INSURANCE COMPANY insure only the parent company, or does it insure the other subsidiaries as well? Please provide a list of the insured and a list of who paid premiums to CAPTIVE INSURANCE COMPANY during the audit period.

4. How does CAPTIVE INSURANCE COMPANY shift risk?

5. How does CAPTIVE INSURANCE COMPANY distribute risk?

6. Were the insurance contracts issued by CAPTIVE INSURANCE COMPANY qualified as binding insurance contracts with terms and conditions commonly used in the insurance industry?

7. Are operations and assets of CAPTIVE INSURANCE COMPANY and parent separate?

Claims

1. Provide copies of all documents that discuss, relate to, or concern how claims for losses incurred and the claims process have been established between parent/subsidiaries and CAPTIVE INSURANCE COMPANY.

2. What process is followed to pay the insurance claims? Are they paid out of funds that are separate from the parent?

3. Is the validity of a claim established before the claim is paid?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

4. Please identify the funds used to pay insurance claims. What is the source of the monies in these funds?

5. Provide copies of all documents that discuss, relate to, or concern how the third-party administrator handles deductible reimbursement claims. If a third party was used, to whom did the third-party administrator submit its invoices for payment?

6. Does anyone from parent and its subsidiaries approve the payment of any claims? If yes, who?

Federal Tax Treatment

1. Provide a copy of federal Form 1120-PC and all attachments filed by CAPTIVE INSURANCE COMPANY for the audit years, if not already provided.

2. Was CAPTIVE INSURANCE COMPANY treated as an insurance company on the federal consolidated return?

3. Do the premiums reported on the federal return properly qualify as insurance premiums under IRS rules and regulations?

4. Did parent or other subsidiary take a deduction for premiums expense on its federal tax return?

5. Did CAPTIVE INSURANCE COMPANY report those premiums as income on its federal tax return?

6. Were the premiums charged by CAPTIVE INSURANCE COMPANY and premiums expensed for charges from CAPTIVE INSURANCE COMPANY to parent and its subsidiaries eliminated from consolidated federal taxable income in each audit year?

7. Was CAPTIVE INSURANCE COMPANY's loss reserve deducted on the federal return filed for each audit year?

8. During the IRS examination of the audit year(s) federal returns, was the issue of CAPTIVE INSURANCE COMPANY's status as an insurance company addressed in the audit? If yes, please provide copies of all documents that discuss, relate to, or concern the results of the federal examination in regard to its status as an insurance company for federal purposes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Formation

1. Please provide copies of all documents that discuss, relate to, or concern the formation of CAPTIVE INSURANCE COMPANY including all engagement letters, proposals, feasibility plans, etc.

2. Did the use of CAPTIVE INSURANCE COMPANY coverage replace any insurance coverage that existed at the time coverage was implemented? If yes, please provide copies of all documents that discuss, relate to, or concern the cancellation of insurance coverage.

3. Was there an outside influence that led to the formation of CAPTIVE INSURANCE COMPANY? Were any existing policies not renewed or subject to a premiums increase? If yes, please describe the circumstances and provide copies of all documents that discuss, relate to or concern the non-renewal/increase in premium of insurance coverage.

Operation

1. Please provide a list of the risks assumed, with associated dollar limits, by entity for each CAPTIVE INSURANCE COMPANY insurance contract in force during the audit period.

State Regulation

1. Is CAPTIVE INSURANCE COMPANY regulated as an insurance company in each state in which it does business? Is it licensed in each state where it is said to insure risk?

2. Provide a copy of STATE Captive Insurance Company Application for Admission or other applicable state form and attachments.

3. Did the STATE Department of Insurance approve or establish the premium rate for insurance between the parent/subsidiaries and CAPTIVE INSURANCE COMPANY? Provide copies of all documents that discuss, relate to or concern the approval or establishment of the premium rate for insurance by the state authority between the parent/affiliates and CAPTIVE INSURANCE COMPANY.

4. If CAPTIVE INSURANCE COMPANY is licensed in a single state yet insures risks in other states why did it not obtain licensing in these other states?

5. Provide copies of all documents that discuss, relate to, or concern how CAPTIVE INSURANCE COMPANY is subject to regulation by state insurance regulators.

6. Did CAPTIVE INSURANCE COMPANY pay the appropriate premium tax?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

7. Did CAPTIVE INSURANCE COMPANY pay an assessment to the appropriate state guarantee funds?

8. Did CAPTIVE INSURANCE COMPANY treat amounts received as premium income on its NAIC Annual Statement filed with the state insurance regulator?

9. Please provide a copy of the NAIC Annual Statement filed with the state insurance regulator for each audit year.

10. Did the STATE Department of Insurance require a payment to a state insurance company guarantee fund? If yes, were such payments made for the audit period?

11. Did the STATE Department of Insurance require a payment of a tax based on premiums in the audit period? If yes, were such payments made by CAPTIVE INSURANCE COMPANY?

12. For the audit period, did CAPTIVE INSURANCE COMPANY fully meet all of the requirements of the STATE Department of Insurance to be an insurance company in good standing?

13. Was CAPTIVE INSURANCE COMPANY subject to any disciplinary action by the STATE Department of Insurance during the audit period? If yes, please describe the circumstances and the actions taken by the STATE Department of Insurance.

Capitalization

1. Please explain how CAPTIVE INSURANCE COMPANY was capitalized and why this method of capitalization was chosen. Provide copies of all documents that discuss, relate to, or concern as to how and why this method of capitalization was chosen for CAPTIVE INSURANCE COMPANY.

2. How were the capital requirements of CAPTIVE INSURANCE COMPANY determined and how were these capital requirements met?

3. Provide copies of all documents that discuss, relate to, or concern how CAPTIVE INSURANCE COMPANY engages in investment activities.

4. Provide copies of all documents that discuss, relate to, or concern the source of funds used by CAPTIVE INSURANCE COMPANY in its investments.

5. Was the capitalization method and amount approved by the insurance regulators?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Please provide documentation.

6. Please provide copies of all documents that discuss, relate to, or concern how these assets were found to be proper and sufficient for the risks insured by CAPTIVE INSURANCE COMPANY.

Premiums

1. How were the values of the premiums charged determined? Please provide copies of all documents that discuss, relate to, or concern as to how the premiums amounts were determined.

2. How did the premiums charged get paid by the insureds? Please provide documentation that shows that the premiums charged were paid and how the premiums were paid.

3. Were premiums charged reviewed and/or changes at any time after initial premium was determined and the contracts were initially established? If yes, provide copies of all documents that discuss, relate to, or concern the premiums review and/or change.

4. Provide a list of the type of risk insured and the premiums related to each risk paid to CAPTIVE INSURANCE COMPANY by parent and affiliates for the audit years.

5. Provide a list of the type of risk insured and the premiums related to each risk paid to unrelated commercial insurance carriers for the audit years.

6. Provide copies of all documents that discuss, relate to, or concern whether the insured's have paid an arm's-length premium for the insurance protection provided under the various policies of insurance issued by CAPTIVE INSURANCE COMPANY.

7. Please provide a copy of the actuarial studies used to determine the premiums charged in each audit year.

Guarantees

1. Is the income of CAPTIVE INSURANCE COMPANY guaranteed by the parent or any other member of the group? If yes, please describe the circumstances.

2. Were any indemnification, hold harmless, or other types of guarantees entered into with CAPTIVE INSURANCE COMPANY by the parent or its subsidiaries? If yes, please describe the agreements and provide all documents related to these agreements.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

D. QUESTIONNAIRE 2

The following questionnaire primarily addresses establishing if Illinois nexus exists, and also includes questions aimed at determining if a company qualifies as a captive insurance company and other business-related information.

1) For the Tax Years at Issue, identify the name(s) and the business addresses of the entity(ies) that received insurance from CAPTIVE INSURANCE COMPANY:
   a.) The physical location where the entity(ies) were located;
   b.) The type of insurance that was purchased;
   c.) Names and addresses of the persons involved in the purchase of the insurance;
   d.) The name of the financial institution(s) and account number(s) where insurance premiums were paid from and the name of the financial institution(s) and account number(s) into which insurance premiums were paid.

2.) During the Tax Years at Issue, did any of parent's/affiliates of parent's employees, officers, directors, managers, agents perform work and/or services on claims for CAPTIVE INSURANCE COMPANY? Services include, but are not limited to taking/creating claims, investigating claims, handling claims, litigating/prosecuting claims and administering claims. If so:
   a.) Please list their name, job title, job description, location;
   b.) Please describe the work or service performed;
   c.) Please describe how the particular individual was compensated;
   d.) Please list the documents generated that tracked and account for the time and expense expended on the work or services performed.

3.) During the Tax Years at Issue, did any third party perform work and/or services on claims for CAPTIVE INSURANCE COMPANY? Services include, but are not limited to taking/creating claims, investigating claims, handling claims, litigating/prosecuting claims and administering claims. If so:
   a.) Please list their name(s) and business addresses;
   b.) Please describe the work or service performed, where it was performed, and by whom;
   c.) Please describe how the particular third party was compensated.

4.) During the Tax Years at Issue, did any third party perform any work and/or services other than the actual handling of claims for CAPTIVE INSURANCE COMPANY? If so:
   a.) Please list their name(s) and business addresses;
   b.) Please describe the work or service performed, where it was performed, and by whom;
   c.) Please describe how the particular third party was compensated.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

5.) With regard to the CAPTIVE INSURANCE COMPANY:
- a.) Please list their name, job title and job description of persons who deal or have any connection with the insurance agreements;
- b.) Please describe the work or service performed in a.) above;
- c.) Indicate the location(s) where the work or service is performed;
- d.) Please describe how the particular individual was compensated in a.) above;
- e.) Please list the documents generated that tracked and account for the time and expense expended on the work or services performed in a.) above.

6.) For the Tax Years at Issue, identify any of the following services that parent provided to CAPTIVE INSURANCE COMPANY:
- a.) Insurance;
- b.) Advertising services;
- c.) Accounting services;
- d.) Bookkeeping services;
- e.) Services related to insurance claims;
- f.) Research/development;
- g.) Strategic planning;
- h.) Purchasing, please include in your common suppliers of goods or equipment;
- i.) Office or warehouse space;
- j.) Guarantee of leases, bonds, loans, financing;
- k.) Financing, including short-term borrowing, long-term borrowing, and loan guarantees;
- l.) Personnel;
- m.) Procurement, negotiation, coordination, oversight of all contracts and agreements with independent contractors;
- n.) Any other services provided by parent/affiliate of parent to CAPTIVE INSURANCE COMPANY

7.) For each of the Tax Years at Issue, please list every U.S. state, city, county, municipality or locality wherein CAPTIVE INSURANCE COMPANY filed a tax return. Please list any and all state and local tax returns.

8.) For the Tax Years at Issue, please describe in detail any intercompany loans involving CAPTIVE INSURANCE COMPANY. Please include in your response:
- a.) The name of the individual, the name of his/her employer, job title, and job descriptions for those involved in the creation and maintenance of transactions;
- b.) Describe how that individual was paid, e.g. straight salary, salary/commission, or commission only;
- c.) If an independent contractor, the name of the individual/entity, address of business;
- d.) The dollar amount outstanding for each Year at Issue and the interest paid for each Tax Year at Issue

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

9.) For the Tax Years at Issue, describe in detail how the insured pay their premiums to CAPTIVE INSURANCE COMPANY. In your response describe the frequency at which premiums were paid and state whether cash was transferred or payment represented a book entry.

10.) For the Tax Years at Issue, please list the name of the financial institution(s) and account number(s) of the custodial account where CAPTIVE INSURANCE COMPANY. held substantially all of its cash and cash equivalents in the U.S..

11.) Identify all claims paid by CAPTIVE INSURANCE COMPANY. during the Tax Years at Issue.

12.) During the Tax Years at Issue, list all of the employees and property of CAPTIVE INSURANCE COMPANY.

13.) For the Tax Years at Issue, please list all of the policy number(s), type(s), and insurance companies that CAPTIVE INSURANCE COMPANY's policies followed in its policies with parent/affiliates of parent.

14.) Identify the names, titles, business addresses of all individuals involved directly or indirectly in the preparation of the CAPTIVE INSURANCE COMPANY's Illinois tax returns and amended returns for Tax Years at Issue. Please give a brief description of each person's involvement.

15.) Did CAPTIVE INSURANCE COMPANY. maintain any bank accounts? If so, please list the name of the financial institution and the bank account number(s).

16.) State all total annual "direct premiums" CAPTIVE INSURANCE COMPANY received on insurance policies written for insurance on policies or risk everywhere, as explained in IITA § 304(b)(1).

17.) State whether CAPTIVE INSURANCE COMPANY is engaged in "reinsuring" as defined by IITA § 304(b)(2). If so:
   - a.) State the premiums written for reinsurance accepted in respect of property or risk in Illinois.
   - b.) State the premiums written for reinsurance accepted in respect of property or risk everywhere.

18.) Please produce all documents relating to Answers 1.) through 17.) above.

19.) Please produce all insurance contracts and policies issued by or on behalf of CAPTIVE INSURANCE COMPANY during the Tax Years at Issue, including policies related to worker's compensation, general liability, auto liability, auto physical damage, property, crime liability, general liability, business interruption and excess liability.

20.) Please produce all documents evidencing any loans by/from CAPTIVE INSURANCE COMPANY to/from parent/affiliates of parent in effect for the Tax Year at Issue.

21.) Please produce all documents evidencing any premium receivable by/to CAPTIVE INSURANCE COMPANY and from Parent/affiliates of Parent in effect for the for the Tax Period at Issue.

22.) Please submit all documentation showing insurance claims made by parent/affiliates of parent for the Tax Year at Issue.

23.) Please submit all copies of invoices for premiums charged by CAPTIVE INSURANCE COMPANY for the Tax Year at Issue.

24.) Please produce all documents related to and including contracts, agreements. purchase orders by CAPTIVE INSURANCE COMPANY and/or parent/affiliates of parent with any third party for the administration of claims for the Tax Year at Issue.

25.) Please produce any and all management services agreements in effect during the Tax Years at Issue between parent/affiliates of parent and CAPTIVE INSURANCE COMPANY (even if the agreement was entered into prior to the Tax Years at Issue), including any service or management agreement(s).

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

I. PURPOSE

This chapter discusses IITA § 304(d) which contains a special apportionment formula for "[b]usiness income derived from furnishing transportation services."

For Illinois purposes transporting may occur by air, land, water, or through a pipeline.

II. REFERENCE

Illinois Income Tax Act (IITA)

- IITA § 304(d)

Illinois Regulations (IAC)

- IAC § 100.3450 Apportionment of Business Income of Transportation Companies
- IAC § 100.9715 Transportation Companies

III. TRANSPORTATION COMPANIES AND NEXUS

Similar to all service companies, nexus for a transportation company is not limited by PL 86-272. Nexus is created if the transportation company has activities in Illinois and those activities result in a portion of the company's business income being apportionable to Illinois.

The Department's position is that it is immaterial whether or not deliveries are made into Illinois. If the taxpayer transports freight or passengers through Illinois, nexus is created and the taxpayer is considered as providing transportation services in Illinois. Witte Brothers Exchange, Inc. v. DOR, 997 N.E.2d 903 (1st Dist. 2013).

IV. APPORTIONMENT

A. <u>For taxable years ending on or after December 31, 2008:</u>

Business income derived from *<u>providing transportation services</u>* other than airline services shall be apportioned to this State by using a fraction

Numerator:

- All receipts from any movement or shipment of people, goods, mail, oil, gas, or any other substance (other than by airline) that both originates and terminates in this State, plus

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

- Any portion of the person's gross receipts from movements or shipments of people, goods, mail, oil, gas, or any other substance (other than by airline) that originates in one state or jurisdiction and terminates in another state or jurisdiction, that is determined by the ratio that the miles traveled in this State bears to total interstate miles everywhere.

Denominator:

- All revenue derived from the movement or shipment of people, goods, mail, oil, gas, or any other substance (other than by airline) Ref: IITA § 304(d)(3)

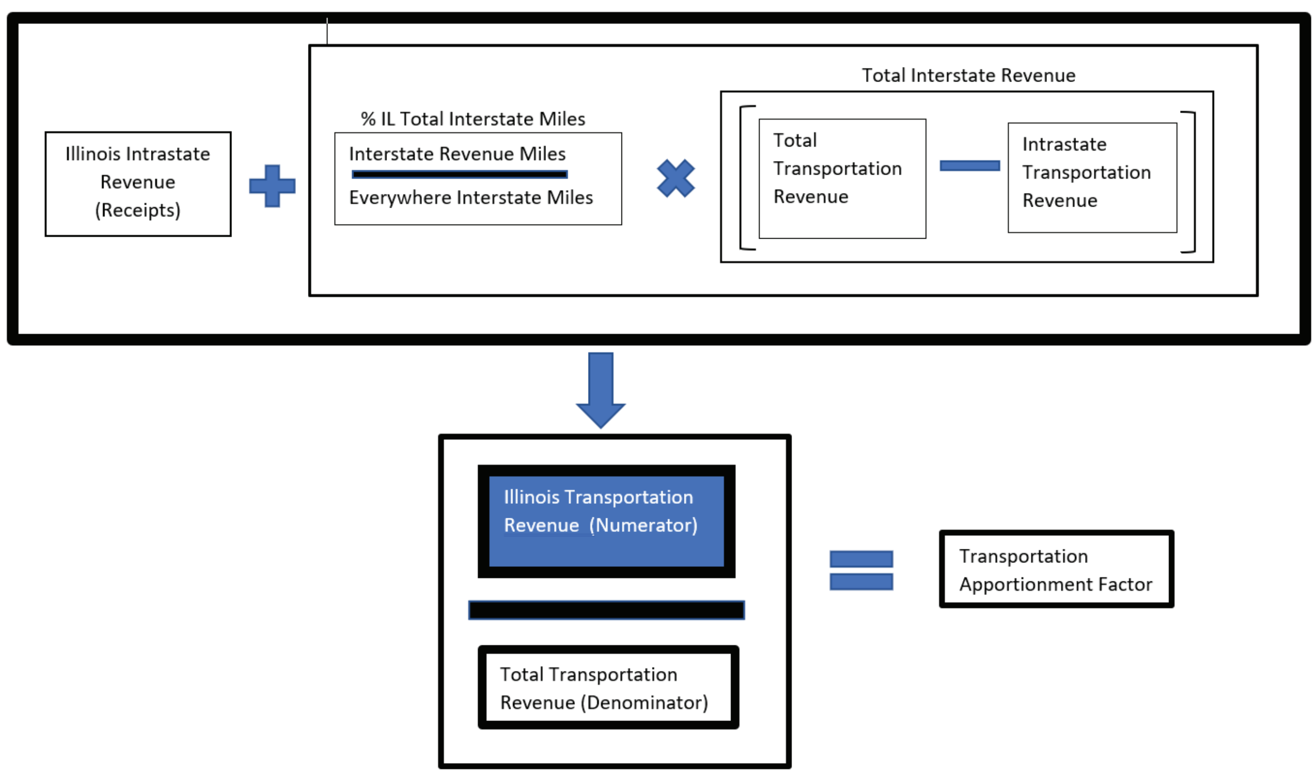
Business income derived from *furnishing airline transportation services* shall be apportioned to this State by multiplying that income by a fraction,

Numerator:

- Revenue miles (see below) of the person in this State, and the

Denominator:

- Revenue miles of the person everywhere.



REF: IITA § 304(d)(4)

1. Revenue mile

- the transportation of one net ton of freight the distance of one mile for consideration;
- the transportation of one passenger the distance of one mile for consideration;
- the transportation by pipeline of one barrel of oil the distance of one mile for consideration;
- the transportation by pipeline of one thousand cubic feet of gas the distance of one mile for consideration; or
- the transportation by pipeline of any specified quantity of a substance other than oil or gas the distance of one mile for consideration. (IITA Section 304(d)(1) and (4))
- "in this State" - transportation occurs within the geographic boundaries of the State of Illinois.
    - In the case of interstate transportation by land, the revenue miles or miles traveled in this State are the miles determined under IAC § 100.3450 subparagraph (b)(1)(A) between the point or points where the route used in determining those miles intersect the Illinois border and the point, if any, in Illinois where the route begins or ends.
    - In the absence of evidence to the contrary, the number of miles of transportation within this State by a vessel operating on water that is not wholly within or without this State shall be 50% of the total number of transportation miles on that water.
    - In the case of interstate transportation by airline, the revenue miles in this State are the miles determined under IAC § 100.3450 subparagraph (b)(1)(D) between the point where the route used in determining those miles intersects the Illinois border and the airport in Illinois where the flight begins or terminates. Revenue miles in a flight that neither begins nor terminates in Illinois (“flyover miles”) may not be included in the numerator. Northwest Airlines, Inc. v. Department of Revenue, 295 Ill. App. 3d 889, 692 N.E.2d 1264 (1998), *appeal denied*, 179 Ill. 2d 589, 705 N.E. 2d 440.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.”

2. Transporting People and Freight

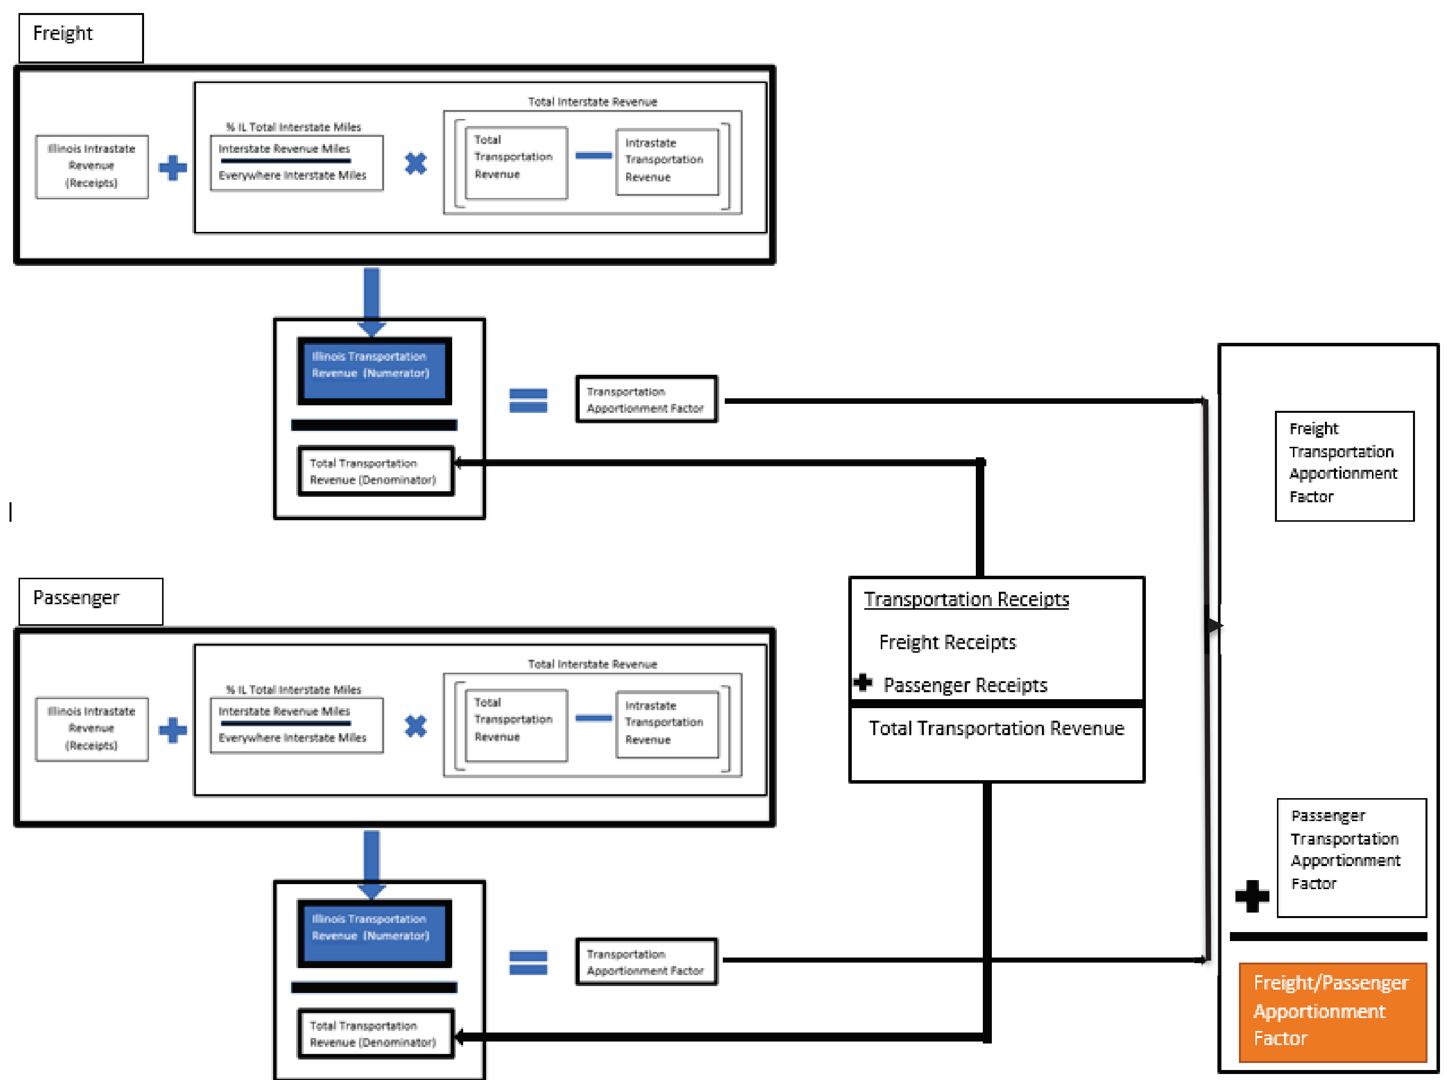
When a transportation company is in the business of transporting people and freight IITA § 304(d)(1)(A), (B) and (2) provide for a slight variation in the above formula. The revenue mile fraction from each area of the business is weighed based on the relative gross receipts and then averaged to arrive at the apportionment formula.

<u>The calculations used to accomplish this follow:</u>

1. Revenue passenger miles in Illinois/Revenue passenger mile everywhere
2. Revenue freight miles in Illinois/Revenue freight miles everywhere
3. Passenger receipts + Freight receipts = Gross receipts
4. Passenger receipts/Gross receipts
5. Freight receipts/Gross receipts
6. (1 * 4) + (2 * 5) = Apportionment Formula

The method of determining and verifying the correct amount of revenue miles that should be included in the apportionment formula varies with each type of transportation company.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."



3. Transport by Land

a) Trucking

Companies in the motor freight industry tend to use revenue highway miles instead of revenue miles in their apportionment formula computations. Unless the taxpayer maintains specific records of miles or routes actually traveled by a vehicle in a particular trip, the miles transported or traveled is the standard distance in miles between the points of pickup and delivery. The formulas for these companies should be adjusted to include revenue miles if at all possible since using revenue highway miles may result in empty miles being included in the formula. If it is impossible to convert the

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

highway miles to revenue miles, every effort should be made to identify and eliminate empty miles from the factors. Empty miles are also known as "deadhead" or "bobtail" miles. Distances may be rounded to the nearest mile.

Note: If you need total miles driven and total miles driven in each state; Sales Tax Technical Support can obtain the information for you.

b) Trains

Railroads can also be involved in transporting passengers and/or freight and can, therefore, be using the variation of the apportionment formula for dual capacity carriers. In the case of the railroads, their weighted portion of the fraction of freight revenue versus passenger revenue.

c) Trip Lease Load

A letter ruling issued by the Department on April 14, 1980 gives the following example of a trip lease load and explains its effect on the apportionment formulas of the lessor and the lessee:

> A lessee ("A") is contacted in its Indianapolis office by a customer who wishes to have a load of freight brought from Des Moines, Iowa to Indianapolis. A contact’s its lessor ("B"), another Indiana based motor carrier, in Des Moines, where B has just delivered a load of freight and is waiting with an empty truck. B accepts the lease offer, picks up A's customer's load in Des Moines and brings it to Indianapolis. The customer pays A for the transportation services rendered; A pays B (presumably a lesser amount) for the transportation services rendered by B to A. The miles driven by the lessor due to the trip lease load are included in the total revenue miles of both the lessor and the lessee. The miles driven in Illinois are included in the Illinois numerator of both the lessor and the lessee.

Therefore, it is not necessary to detail the miles driven from each of the following types of transactions separately:

- The taxpayer deals directly with the customer and does the actual hauling.
- The taxpayer is the lessor of the trip lease load and does the hauling but does not deal directly with the customer.
- The taxpayer is the lessee of the trip lease load and deals directly with the customer but does not do the actual hauling.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.”

Examples

Example 1

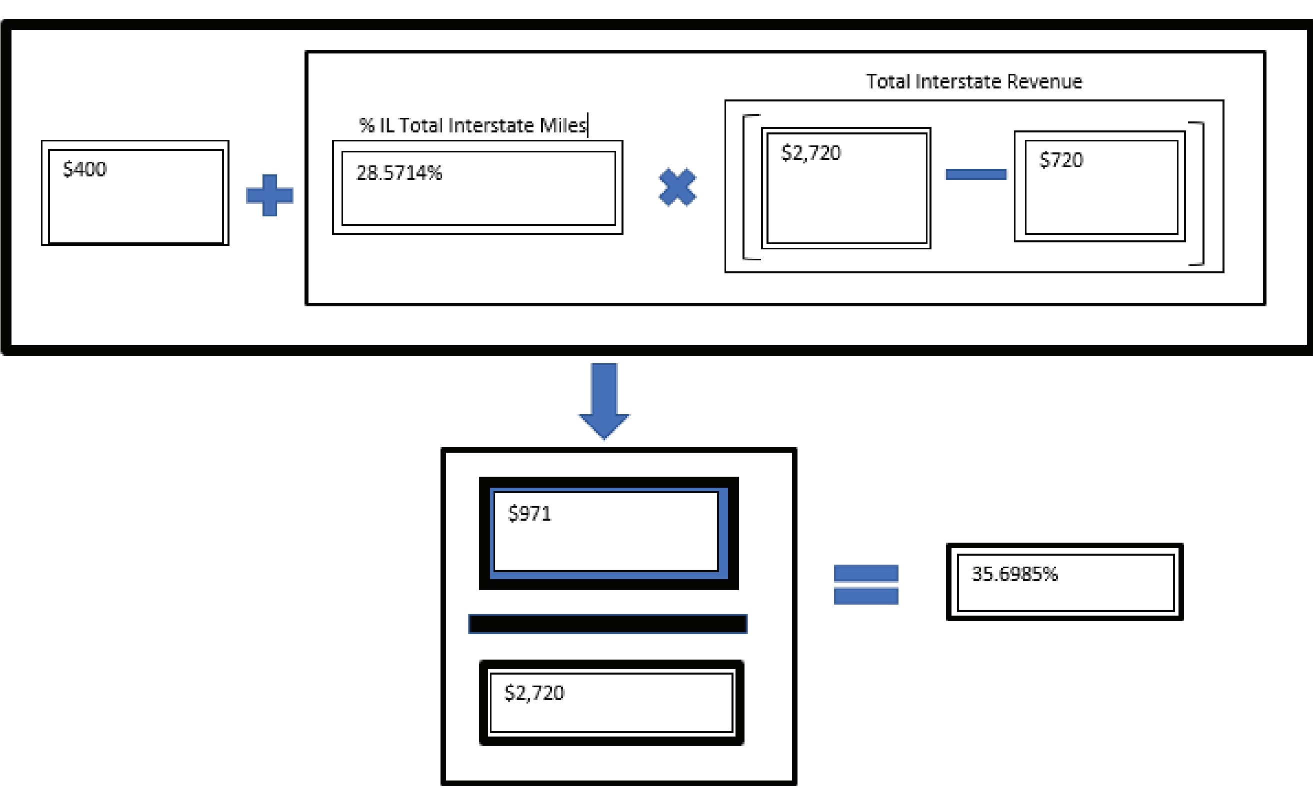
During its taxable year ending December 31, 2008, Transportation Company made the following trips transporting goods on behalf of its customers:

	Miles Traveled			
Trip:	Outside-Illinois	Within Illinois	Total	Gross Receipts
Iowa to Minnesota	600	0	600	$700
Iowa to Wisconsin	400	0	400	300
Iowa to Illinois	50	140	190	400
Iowa to Indiana	50	300	350	600
Iowa Intrastate	220	0	220	320
Illinois Intrastate	0	200	200	400
Totals	1,320	640	1,960	$2,720
Less IA Intrastate	(220)	0	(220)	($320)
Less IL Intrastate	0	(200)	(200)	($400)
Interstate Totals	1,100	440	1,540	$2,000

Based on the above, Transportation Company's apportionment factor is 35.6985%, computed as follows:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

	ILLINOIS NUMERATOR Miles Traveled			
Trip:	Outside-Illinois	Within Illinois	Total	Gross Receipts
Totals	1,320	640	1,960	$2,720
Less Iowa Intrastate	(220)	0	(220)	(320)
Less Illinois Intrastate	0	(200)	(200)	(400)
Interstate	1,100	440	1,540	$2,000
Illinois Intrastate Receipts				$400
Illinois Interstate Miles		440		
Everywhere Interstate Miles		1,540		
Fraction IL/Everywhere Miles		28.5714%		
Interstate Receipts		$2,000		
Illinois Share of Interstate Receipts				571
Numerator				$971
DENOMINATOR				
Total Receipts				$2,720
FACTOR				
Numerator/ Denominator				35.6985%



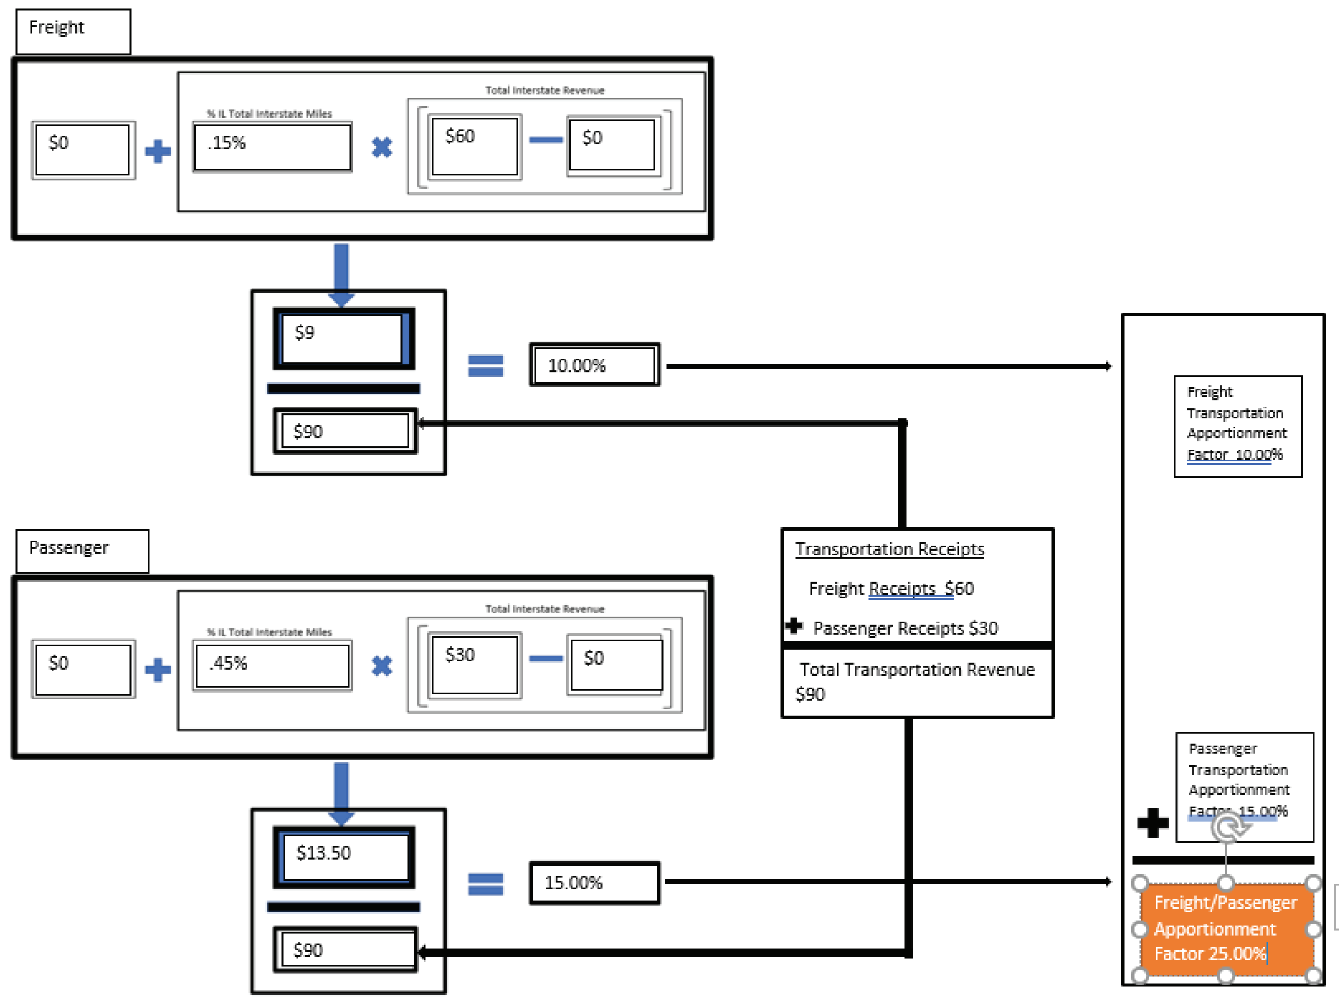
The numerator is the $400 in gross receipts from the trip that both originated and terminated in Illinois, plus the $571 Illinois portion of gross receipts from interstate trips. The $571 Illinois portion of gross receipts from interstate trips is computed by multiplying the $2,000 in total gross receipts from those trips by a fraction equal to the 440 miles traveled in Illinois in those trips divided by the 1,540 in total miles traveled during those trips. The 35.6985% factor is the $971 numerator divided by the $2,720 in gross receipts for all trips.

Example 2:

Taxpayer transports freight and passengers by railroad with total income of $100. Taxpayer derived $60 in operating income from transporting freight, $30 in operating income from transporting passengers and $10 in income from non-transportation activities. Taxpayer's apportionment fraction for its freight transportation business is 15% and its apportionment fraction for passenger transportation is 45%. Taxpayer's apportionment factor is 25%, computed as follows: 15% times ($60/$90) plus 45% times ($30/$90). See below for how apportionment factor was calculated.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

	Col A	Col B	Col C	Col D	Col E
			Apportion-		
		Operating	ment		IL Factor
	Income	Income	Fraction	Weighting	C times D
Transporting freight	$60	$60	15.00%	(60/90)	10.00%
Transporting passenger	$30	$30	45.00%	(30/90)	15.00%
Non-transportation receipts	$10	$0	0.00%	0	0.00%
Sub Totals	$100	$90	~~	~~	25.00%

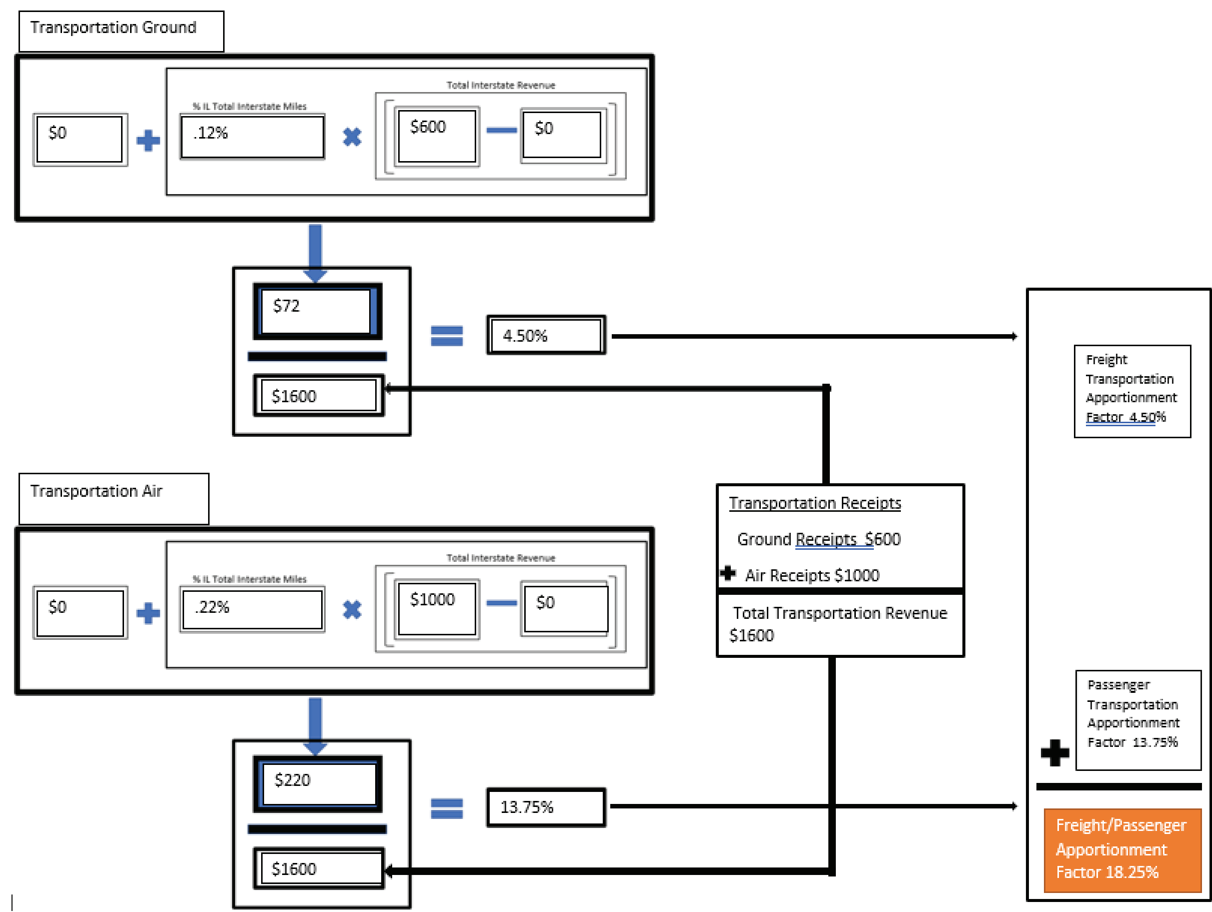


Example 3:

Taxpayer transports freight by air and ground service for its taxable year ending June 30, 2009. Taxpayer uses trucks to provide its ground transportation services. Taxpayer has total gross receipts of $1,600. Taxpayer derived $600 from transporting freight by truck and $1,000 from transporting freight by air. Using the gross receipts methodology set forth in IAC § 100.3450 subsections (a)(2)(A) and (c), Taxpayer's apportionment factor for its ground transportation services is 12%. Using the revenue miles methodology in IAC § 100.3450 subsection (a)(2)(B), Taxpayer's apportionment factor for its air transportation service is 22%. Taxpayer's apportionment factor is 18.25, computed as follows: 12% times ($600/$1600) plus 22% times ($1000/1600). See below for how apportionment factor was calculated.

	Col A	Col B	Col C	Col D	Col E
	Gross	Transportation	Apportion-ment		IL Factor
	Receipts	Receipts	Fraction	Weighting	C times D
Transporting ground	$600	$600	12.00%	(600/1600)	4.50%
Transporting air	$1000	$1000	22.00%	(1000/1600)	13.75%
Non-transportation receipts	$100	$0	0.00%	0	0.00%
Sub Totals	$1700	$1600	~~	~~	18.25%

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."



4. Transport by Water

Barging companies are liable for Illinois Income Tax when the barge travels in or through Illinois. Most barge companies are regulated interstate companies. The companies usually have maps, which reflect "route miles" traveled. These maps can provide a control from which to verify the state mileage information obtained from the company. Unless the taxpayer maintains specific records of miles or routes actually traveled by a vessel in a particular trip, the miles transported or traveled is the standard distance in miles between the points of pickup and delivery. Most barging companies operate on the Illinois or Mississippi Rivers, although a few do travel some of Illinois' smaller rivers. Distances may be rounded to the nearest mile.

a) Rivers Totally within Illinois

All miles on the Illinois River and any other river located within the boundaries of Illinois should be allocated to Illinois.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

(1) MISSISSIPPI RIVER

All NORTHBOUND miles traveled on the Upper Mississippi River from a point near Cairo, Illinois to a point near East Dubuque, Illinois (580.7 miles) are considered Illinois miles. REF: People ex. Rel Wangelin v City of St. Louis, 10 NE 2d 369, 367 Ill. 57 (1937). The western boundary of Illinois is considered to be in the middle of the Mississippi River. REF: The Enabling Act of April 18, 1818 created the state of Illinois and its boundaries. Northbound traffic moves along the east side of the river. Southbound traffic moves along the west side of the river. Therefore, all southbound miles are non-Illinois miles.

(2) OHIO RIVER

In the US Supreme Court decision, *Illinois v Kentucky, 500 U.S. 380 (1991)*, the Court found that the boundary line between the states of Illinois and Kentucky is the low-water mark of the northerly shore of the Ohio River AS IT EXISTED IN 1792. Prior to this decision, it was generally believed that the Illinois boundary was the low-water mark as it exists at any given time. The case was remanded to the states to determine the exact location of the "1792 line". In March of 1993 the Attorneys General of Illinois and Kentucky reached an official agreement, establishing the boundary between the two states. Under that agreement,

- The boundary will be set at the minimum of 100 feet from the Illinois shore of the Ohio River. At some points, the Illinois border will extend farther into the river.

- The low-water mark of the Ohio River will be determined by the "digitized" map created by the US Geological Survey. The boundary will be adjusted in Illinois's favor if the low-water mark is less than 100 feet from the Illinois shore.

- Kentucky will retain possession of several parcels of land that were islands in Kentucky territory at one time, but which have since become attached to the Illinois shore due to the changing shape of the river. Whether or not this case will have a significant impact on the taxation of transportation companies under the IITA is questionable.
  - At one point the decision states, "Vessels traveling the river usually follow a sailing line charted by the United States Army Corps of Engineers which, for most of the stretch in question, is either close to the center of the river or near the Kentucky shore. Illinois does not dispute that the sailing line, like most of the river, is within the boundary and jurisdiction of Kentucky."

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

(3) LAKE MICHIGAN

The portion of Lake Michigan which falls within the borders of Illinois is determined based on the Enabling Act, which was passed by the US Congress on April 18, 1818. The Enabling Act provided for the creation of Illinois and its boundaries. Based on the provisions of that Act, to determine the portion of Lake Michigan which is in Illinois, one should:

- Draw a line straight east from the extreme northwest corner of Indiana to the center of Lake Michigan, then
- Draw a line north along the middle of Lake Michigan to north latitude forty-two degrees thirty minutes, then
- Draw a line west to the Illinois/Wisconsin border.

Case synopses of People ex. Rel Wangelin v City of St. Louis and Illinois v Kentucky can be found in Chapter 37.

5. Transport by Pipeline

Pipeline companies are in the business of providing transportation services. Distances may be rounded to the nearest mile.

There are generally two types of pipeline companies:

- **Natural gas** pipelines are considered utilities and are heavily regulated.
  - Whether a natural gas pipeline ships gas for third parties or buys gas at the well head and sells it later, it is allowed the same profit.
  - Typically, a natural gas pipeline will own the gas it transports.
    - In order to maintain pressure a pipeline must always be full. Therefore, a certain amount of gas, called linepack, is kept in the system.
    - In order to assure themselves that they have enough gas to maintain pressure, the gas companies usually take title to the gas at the shipping point.

- **Oil pipelines** are not considered utilities and are free to establish competitive rate structures (however, many US pipelines are subject to an antitrust decree from the 1920's limiting them to a percentage markup on their capital costs).
  - Oil and liquid hydrocarbon pipeline companies usually do not take title to the product being transported.
    - Regardless of whether the companies take title or not, they fundamentally remain pipelines.
    - The nature of their business activity remains unchanged; the transportation of oil or gas.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

The purpose of any apportionment formula is to apportion business income based on the amount of business income attributable to the state based on the level of business activity in the state as compared to the business activity everywhere.

- Since pipeline companies are capital intensive businesses with few employees, little property other than the pipeline itself and sales which are usually isolated at a few locations at the end of the pipeline, it was determined that the most accurate way to determine the amount of business activities in Illinois was through the use of the revenue mile formula.

- Some pipeline companies are also involved with the sale of the product being transported at retail when it reaches a delivery point.
    - If this activity is a significant part of the pipeline company's overall business activity, it is possible that this retailing portion of the company's activity should be apportioned by using the 3-factor formula of IITA § 304(a).

Note: Under the 80-20 test in IITA 1501(a)(27), the Outer Continental Shelf is in the United States. For taxable years ending on or after December 31, 2017, the phrase "United States", as used in this paragraph, means only the 50 states, the District of Columbia, and any area over which the United States has asserted jurisdiction or claimed exclusive rights with respect to the exploration for or exploitation of natural resources, but does not include any territory or possession of the United States. The pipeline between the shore and the OCS is in the US for apportionment purposes.

6. Transport by Air

Airlines may be transporting freight and/or passengers. The miles transported in a flight are the air distance in miles on the most common route between the airports. Distances may be rounded to the nearest mile or tens of miles.

a) Fly-over Miles

Flyover (or bridge) miles are those miles flown over a state in which the flight does not originate or terminate. The flight's only contact with the state is when it actually "flies over" in the air space above the state. These miles are not used in calculating the apportionment factor. Examples

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

(a) An airline flies from New York to Los Angeles. It travels 200 miles within New York and 200 miles within California. Total miles traveled are 3,000. Fly-over miles are 2,600.
Apportionment IL 0
EV 3,000

(b) An airline flies from Chicago to Los Angeles. It travels 100 miles within Illinois and 200 miles within California. Total miles traveled are 2,000. Fly-over miles are1,700.
Apportionment IL 100
EV 2,000

(c) An airline flies from Los Angeles to Hong Kong. It travels 2 miles within California and 1 mile within Hong Kong. Total miles traveled are 10,003. Fly-over miles are 10,000.
Apportionment IL -0-
EV 10,003

Potential Court Cases/support used by taxpayer

In support of their position, airlines might refer to an amendment to the Federal Aviation Act of 1958, which was included in the Omnibus Budget Reconciliation Act of1990 PL.101-508. That amendment states:

> (f) Flight Takeoff or Landing Requirement of State Taxation No State [as such term is defined under subsection (d)(2)(E)] or political subdivision thereof shall levy or collect any tax on or with respect to any flight of a commercial aircraft or any activity or service on board such aircraft unless such aircraft takes off or lands in such State or political subdivision as part of such flight.

In *Northwest Airlines, Inc. and Republic Airlines, Inc. v. The Department of Revenue of Illinois*, No. 1-96-4267(1998), the Illinois Court of Appeals determined that “flyover miles” cannot be included in the numerator of the apportionment formula. The court said that there was “a total absence of any nexus” between such miles and the state. The Department had argued that the Illinois statute clearly implied that such miles were included in the transportation apportionment factor. The court replied that, since their inclusion would violate the commerce and due process clauses of the United States Constitution and make the statute unconstitutional, it assumed that the legislature did not intend any such implication.

The court discussed *GTE v. Allphin*, 68 Ill 2d 326(1977) an Illinois Supreme Court case involving shipments that were “drop shipped” out of state but were the products of contracts bargained for by Illinois producers. That case said that the state taxation regime was designed to ensure that 100% of a taxpayer’s income

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.”

from interstate commerce should be reachable by one state or another and that there should be no “nowhere sales.” The *Northwest* court acknowledged the principle but said that some connection with Illinois is still required. Flyover miles create no such connection.

B. **For taxable years ending prior to December 31, 2008**:

Business income of a transportation company shall be apportioned by multiplying that income by a fraction.

Numerator:
- Revenue miles of the person in this State

Denominator:
- Revenue miles of the person everywhere. (IITA Section 304(d)(1) and (2))

V. UNITARY BUSINESS GROUPS

A unitary determination is required for a commonly owned group of transportation companies. Refer to Chapter 23 for information on making a unitary determination. If it is determined that a group of different types of transportation companies are unitary, although their apportionment formulas are different, they can be unitary.

For taxable years ending on or after December 31, 2017, the noncombination rule is eliminated. A unitary business group may now include members that are required to use different apportionment formulas under IITA § 1501(a)(2)(A). The combined apportionment for taxpayers is governed by IAC § 100.3600.

Example: A shipping company, pipeline oil company and a trucking company can all be in the same unitary group. When computing the apportionment formula, the auditor will have to use the weighted average method described in IITA § 304(d)(1)(A), (B) and (2).

Transportation companies who conduct 80% or more of their business activities outside of the United States are excluded from being in a unitary business group.
- The 80/20 test is utilized to determine this percentage. It is the ratio of revenue miles in the United States as compared to revenue miles worldwide. REF: IITA § 1501(a)(27).

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.”

VI. DEFINITIONS OF INDUSTRY TERMS

There are numerous terms that are commonly used by people involved in the transportation industry. Some examples follow:

BACK HAULING - A truck has delivered goods into Illinois and then picks up a load for someone else for the return trip home.

BAREBOAT CHARTER - An instrument used for vesting possession and control of a chartered vessel to the charterer. The owner of the vessel retains general ownership and right of reversion.

BOBTAIL - A tractor pulling nothing; Bobtail miles are considered empty miles for purposes of the apportionment formula.

BRIDGE MILES - See pass-over miles.

BROKER MILES - Miles run by another company on contract to the taxpayer.

CHARTER PARTY- Agreement between a ship owner and carrier, merchant, etc...for commercial lease of a ship or space on the ship for a period of time.

CONTRACT MILES - See broker miles.

DEADHEAD - Tractor pulling an empty trailer or barge not carrying a load. Deadhead miles are considered empty miles for purposes of the apportionment formula.

DEMISE - A transfer by lease for a fixed period of time.

DIRECT MILES - Miles hauled by the taxpayer.

FERC - Federal Energy Regulation Commission

FLEETING - Owned or leased sites on river banks where barges are tied off while waiting to be moved.

FLY-OVER MILES - See pass-over miles.

MANIFEST - The driver's legal authority for a given job includes information on routes, type and amount of freight, and pickup and delivery points.

PASS-BY MILES - Miles traveled by a barge that is passing by Illinois without stopping.

PASS-THROUGH MILES - Miles traveled through Illinois in which a truck, bus, etc. does not stop in the State.

PASS-OVER MILES - Miles traveled over Illinois by an airplane without stopping.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.”

REVENUE HIGHWAY MILE - Moving a vehicle 1 highway mile without taking the weight of the freight into account.

REVENUE PASSENGER MILE - 1 passenger times 1 mile for a fee.

TOWBOAT - The power unit used in the barging industry.

TRACTOR – The power unit used in the trucking industry.

TRIP LEASE - Hiring another hauler to perform a specific contract (sublet).

TRIP SHEET - The driver's log of a particular haul. This is the source of the mileage information.

TUGBOAT - See towboat

WILDCAT - A haul that is outside of a company's ICC authority, either with regard to type of freight or location of shipment. These miles are often shown as unallocated miles and are only included in the everywhere factor by the taxpayer

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

I. PURPOSE

This chapter provides guidance for when the auditor may encounter an Interest Charge Domestic International Sales Corporation (IC- DISC) or Foreign Sales Corporation (FSC). Both IC-DISCs and FSCs were created to offer tax relief to companies earning foreign sales income from the exportation of US sourced goods. Further guidance for FSCs, Domestic International Sales Corporations (DISC), and the Extraterritorial Income exclusion (ETI) is provided in the Historical Extracts and Exhibits section.

Note: To aid referencing, hyperlinks are used within the body of the chapter to link to referenced exhibits and text.

- IRC § 921 – 927
- IRC § 992

III. BACKGROUND

Both Domestic International Sales Corporations (DISCs) and the Foreign Sales Corporations (FSCs) were created to provide domestic corporate entities the ability to export their products and receive favorable tax treatment on sales abroad.

DISCs were established by Congress in the Revenue Act of 1971 under IRC § 992. A DISC was not subject to federal income tax except under certain circumstances. The

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

profits were not taxable to the DISC but were taxed when distributed or deemed distributed to the DISC's shareholders. Therefore, the DISC itself was generally not subject to Illinois income and replacement tax but the distributions were taxable.

The Tax Reform Act of 1984 created the Foreign Sales Corporation (FSC) by adding Sections 921 through 927 to the IRC. If a company had been a DISC on December 31, 1984, it had to liquidate and re-elect to become an FSC. Accumulated DISC income and assets were transferred tax free to shareholders who could claim the income in equal installments over a ten year period.

Therefore, for years ending after December 31, 1984, a corporation seeking a tax exemption for export income had to elect to be treated as a FSC. Small businesses could elect to be treated as a small FSC or an Interest-charge DISC (IC- DISC). However, the majority of the foreign sales entities created were regular FSCs.

IV. CURRENT TREATMENT: IC- DISC AND FSC

A foreign corporation must observe the same filing requirements as U.S. domestic corporations. For Illinois purposes all taxable income reported under IRC §§ 881 – 885 must be reported, and only domestic factor information is calculated in the “Everywhere” portion of the sales factor.

A. IC-DISC

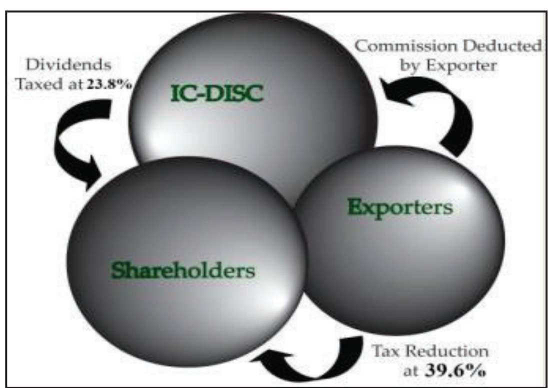
The United States’ foreign trading partners challenged the legitimacy of the original DISC, FSC, and ETI exclusions. However the IC-DISC was added to the tax code in 1984, was not challenged, and is still ongoing. The IC-DISC became more lucrative to taxpayers as the ETI regimen was repealed and the election to become an FSC was discontinued. In 2003 tax rates were reduced for qualifying dividends under the Jobs and Growth Tax Relief Reconciliation Act and this reduction was extended in 2012 through the American Taxpayer Relief Act. As a result of these actions the tax benefits of an IC-DISC became more beneficial and there has been a gradual increase in the number of IC-DISCs.

To become an IC-DISC the exporting company or its shareholders create a domestic corporation and elect for this corporation to be treated as an IC-DISC by filing IRS Form 4876-A.

- shareholders of the corporation elect IC-DISC status

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

- exporting company pays the IC-DISC a commission based on export sales profits
- exporting company deducts the commission owed to the IC-DISC from its ordinary income
- IC-DISC pays no federal tax on the commission received from the exporting company (IC-DISCS are a special class of tax-exempt entity)
- shareholders who are individuals or trusts pay federal tax at a maximum 23.8 percent rate.



1. IC-DISC Treatment

An IC-DISC under IRC § 992 is not subject to the taxes imposed by IRC subtitle A (unless there is a transfer to avoid income tax under IRC § 1491). If an IC-DISC is not subject to tax and filing under IRC provisions it is also not required to file an Illinois return. The distributions from an IC-DISC fall under the IRC rules pertaining to dividends, dividend exclusions, and dividend-received deductions

An IC-DISC that, for federal purposes, has federal taxable income apportionable or allocable to Illinois is subject to Illinois tax rules applicable to all corporations. They would be taxed by Illinois to the extent that nonexempt foreign trade income, investment income, and carrying charges (taxable for federal purposes) are apportionable or allocable to Illinois. Corporate shareholders who derive income from Illinois should include actual and deemed distributions from an IC-DISC in their business income.

2. IC-DISC That is a Unitary Group Member

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If a corporation has elected to be a DISC under IRC § 992 as discussed above and is a member of a unitary business group, neither the portion of DISC income on which federal taxes are deferred for the year or the sales factor of the DISC will be included in the group's calculation of Illinois income tax liability. Corporate shareholders of a DISC should include only the actual and deemed distributions of the DISC which are taxable for federal purposes in the combined UBG apportionment.

DISCs with federal taxable income apportionable or allocable to Illinois are subject to Illinois tax rules. This FSC income is subject to tax by Illinois to the extent that income is subject to tax for federal purposes (nonexempt foreign trade income, investment income, and carrying charges) and apportionable or allocable to Illinois.

Corporate shareholders of a DISC should include in business income their actual and deemed distributions from the DISC, to the extent the distributions are federally taxed. To the extent that the DISC's activities are an integral part of the unitary business, the actual and deemed distributions should be included in the combined unitary business income. If a DISC meets the criteria for inclusion in the unitary business group, it must be listed under Step 1, Section A, of Illinois Schedule UB. However, computations for the DISC should not be required for Steps 2, 3, and 4 of Illinois Schedule UB. In conformity with the applicable provisions of the IRC, the other members of the unitary business group that are shareholders of the DISC should include such amounts in their respective federal taxable incomes (or equivalents) as are required to be included for federal income tax purposes.

Distributions from IC-DISCs are treated in accordance with the federal rules pertaining to dividends, dividend exclusions, and dividend-received deductions for Illinois purposes.

An IC-DISC is taxed by Illinois to the extent its nonexempt foreign trade income, investment income, and carrying charges (taxable for federal purposes) are allocable to Illinois.

B. EXISTING RULES FOR FSCs

No corporation may elect to be an FSC or a small FSC after September 30, 2000. FSCs which were in existence continuously on or before September 30, 2000 may continue to use the FSC rules for any transaction in the ordinary course of business before January 1, 2002; if such a transaction occurs after December 31, 2001 the transaction must be pursuant to a binding contract exception.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If a binding contract was in effect on September 30, 2000 and has remained in effect the FSC rules still apply. A binding contract must be:

- between the FSC (or a person related to the FSC) and a person other than the related person, and
- a binding contract includes a purchase, renewal, or replacement option that is enforceable against a lessor or seller.

An FSC that was in existence on September 30, 2000, and at all times thereafter may elect to be treated as a domestic corporation if substantially all of its gross receipts are foreign trading gross receipts.

Ref: Instructions for Form 1120-FSC

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

V. HISTORICAL EXTRACTS AND EXHIBITS

The DISC and ETI provisions and FSC transitional binding contract exclusions found in the IRC were repealed, along with the election to become an FSC. However, the auditor may encounter a need to reference FSC or ETI information. In those situations the following section is available for reference.

A. REPEAL OF FSC AND ETI

In 1998 the European Union (EU) contended that FSCs were prohibited export subsidies. FSCs could exempt a significant portion of their export income from U.S. tax. U.S. corporate shareholders also were allowed a 100% dividends-received deduction for dividends distributed from an FSC out of earnings attributable to certain foreign trade income. In Oct. 1999, the World Trade Organization (WTO) decided that the FSC provisions were prohibited export subsidies under the WTO Agreement on Subsidies and Countervailing Measures and the Agreement on Agriculture. Under a procedural agreement reached between the European Union and the United States, enactment of this legislation avoided an immediate confrontation with the EU by ensuring that the WTO must review the new law before any decision authorizing retaliation may be made.

The FSC Repeal and Extraterritorial Income Exclusion (ETI) Act of 2000 enacted the following:

- repealed the FSC provisions (IRC § 921 through 927) effective for transactions occurring after Sept. 30, 2000,
- established transition rules for FSCs,
- barred corporations from electing to be an FSC after Sept. 30, 2000,
- dormant FSCs (having no foreign trade income for five consecutive tax years beginning after Dec. 31, 2001) would cease to be treated as an FSC for any tax year beginning after that period; and
- provided that gross income does not include extraterritorial income (ETI) that is “qualifying” foreign trade income.

The transition rules established by the repeal did not apply to transactions that occurred in the ordinary course of business:

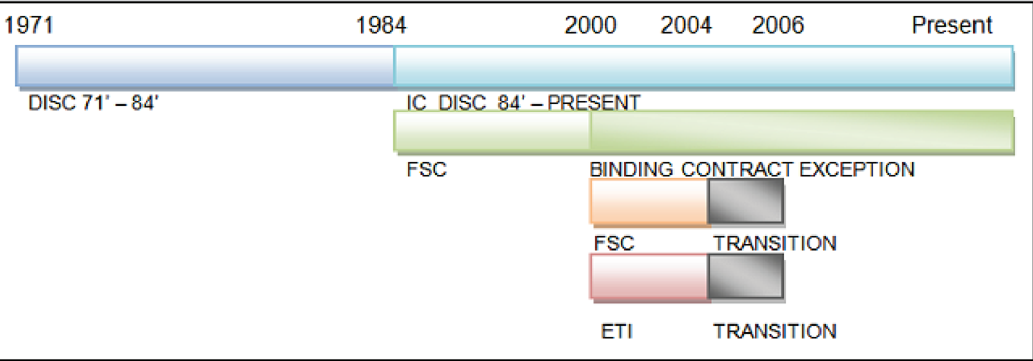
- prior to January 1, 2002, or
- after December 31, 2001 if a binding contract were in effect on September 30, 2000.

However, in 2002 the WTO held that the ETI regime was also a prohibited export subsidy. In 2004 the ETI provisions were repealed by Congress under the American Jobs Creation Act of 2004. This act ceased the ETI provisions but under a transition

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

rule the qualifying foreign trade income would be phased out to 80% in 2005 and 60% in 2006.

In 2006 the WTO held that these ETI transition provisions, as well as the binding contract provisions (for binding contracts made after September 30, 2001) used in grandfathering FSC contracts, were prohibited export subsidies. The European Union was poised to begin implementing trade sanctions over these transition rules. As a result of EU's stance, the Tax Increase Prevention Act repealed both the FSC binding contract transition rule and the ETI binding contract transition rule.



B. <u>EXTRATERRITORIAL INCOME EXCLUSION (ETI)</u>

The ETI regime evolved as the FSC regime was repealed. The ETI was in effect for transactions entered into after September 30, 2000 and was an exclusion from gross income attributable to foreign trading gross receipts. Exclusion of qualifying foreign trade income would result in a reduction by the greater of:

- 1.2 percent of the foreign trading gross receipts derived from the transaction,
- 15 percent of the foreign trade income derived by the taxpayer from the transaction, or
- 30 percent of the foreign sale and leasing income.

1. <u>Foreign Trading Gross Receipts (FTGR)</u>

FTGR are gross receipts derived from certain activities in connection with qualifying foreign trade property involving economic activities outside the US. The gross receipts must be from:

- the sale or exchange of qualifying foreign trade property

- the lease or rental of qualifying foreign trade property by a lessee outside of the US
- for services which are related to the above
- for engineering or architectural services for construction projects outside the US, or
- for the performance of managerial services for unrelated persons outside the US.

2. Qualifying Foreign Trade Property

Qualifying foreign trade property generally is property manufactured, produced, grown or extracted which is held for sale, use, consumption, lease or rental outside the US. The origin of the property can be within or without the US, however the foreign costs of production must be less than 50 percent of the fair market value.

3. Repeal of ETI

Prior to 2005, taxpayers were allowed to retain 100 percent of their ETI benefits. The percentage allowed for transactions entered into in 2005 decreased to 80 percent and 60 percent for 2006 transactions as a result of the repeal of the ETI exclusion.

The ETI binding contract transition rule was allowed for binding contracts which had been in effect on October 21, 2004, for transactions occurring in the ordinary course of business between the taxpayer and an unrelated person which were in effect on September 17, 2003 and at all times thereafter. However, the binding contract rule itself was ruled to be a trade violation and terminated May 18, 2006.

C. FSC SETTLEMENT OFFER

The Department had given inconsistent public statements regarding whether or not foreign apportionment factors of a foreign sales corporation should be included or excluded for the tax years ending between December 31, 1989 and prior to January 1, 1998. The Schedule UB instructions for the years 1990 through 1997 stated that foreign sales corporations must only use apportionment factors from the United States, excluding their foreign sales amounts. This position was in line with a letter

ruling, IT 91-0199, which was revoked. IAC § 100.3380(e) became effective on May 25, 2001 and was in conflict with that letter ruling.

IAC § 100.3380(e) provides that foreign taxpayers whose foreign income is excluded from federal taxable income must use only apportionment factors related to domestic business income to apportion business income. If the taxpayer is part of a unitary group it could be included under IITA §1501(a)(27) if its domestic factors were 20% or more under the 80-20 test.

In consideration of the confusion caused by inconsistent public statements the Department put forward a settlement offer for the FSC issue for tax years beginning 1/1/90 through tax years beginning prior to 1/1/1998. For these years, the Department was willing to concede 70% of the FSC income and factors associated with the issue. For tax years beginning on or after 1/1/1998, FSCs were included in the unitary business group if they met the statutory tests.

1. Settlement Offer Revocation

FY Bulletin 2006-8 dated March 1, 2006 revoked the settlement offer for FSCs. The revocation bulletin may be reviewed on the IDOR web page and includes the following:

> Effective immediately, the department is revoking the settlement offer. The department is under no obligation to determine the Illinois Income Tax liability of any taxpayer for any tax year in accordance with that offer, unless the liability was computed in accordance with the offer prior to March 1, 2006.

D. PRE-REPEAL RULES FOR FSC

1. Foreign Trading Gross Receipts (FTGR)

An FSC is not taxed on its exempt foreign trade income. IRC § 923 defines exempt foreign trade income as "the gross income of a FSC from foreign trading gross receipts." The FSC generates FTGR in order to receive favorable tax treatment. The FSC will be considered to earn FTGR only if the foreign management and the foreign economic process requirements are met for each eligible transaction. The FSC must have FTGR to use the Administrative Pricing rules to calculate its profit that in turn will determine the amount of tax exempt foreign trade income.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

1. An FSC is treated as having Foreign Trading Gross Receipts (FTGR) only if it has met certain foreign management and foreign economic process requirements (see below).

2. Gross receipts comprising FTGR include gross receipts: REF: IRC § 924

   a. From the sale, exchange or other dispositions of export property;
   b. From the lease or rental of export property for use by the lessee outside the U.S.;
   c. For services related and subsidiary to above items; or
   d. For the performance of managerial services for an unrelated FSC, or DISC to advance the production of FTGR.

3. FTGR does not include receipts from a transaction if:

   a. The export property or services are for the ultimate use in the U.S.;
   b. Such transaction is accomplished by a subsidy granted by the U.S.;
   c. Such receipts are from another FSC that is a member of the same controlled group as the subject FSC; or
   d. The income is characterized as investment income or carrying charges.

REF: IRC §§ 924(f), 927(c), (d)

Carrying charges normally result in a situation where the U.S. supplier sells to a foreign customer and the customer doesn't pay charges within a specified time (normally 60 days). The supplier will charge the customer for deferring payment time.

If an FSC has the types of income described above, it will not be disqualified as an FSC. The income that does not qualify as FTGR will not receive favorable tax treatment (i.e. no part of this income will be exempt from U.S. taxation and therefore, Illinois taxation). This nonexempt income is calculated on Schedule F of the 1120FSC and carried onto Part II of Schedule B to be included in "Taxable Income" of the FSC.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

a) Export Property

Export property is defined as:

a. Property manufactured, produced, grown, or extracted in the U.S. by a person other than an FSC; or

b. Property held primarily for sale, lease or rental in the ordinary course of a trade or business by an FSC to an FSC or any other person for direct use, consumption or disposition outside the U.S.

The ultimate destination must be outside the U.S. If the sale is made to a U.S. customer, the sale must be tracked to verify its ultimate destination is outside the U.S. If the sale is made to a foreign customer, the IRS will not usually go behind this information to verify that product did not return to the U.S.

It is also important to note that, federally, this requirement will be considered met for leased property, if that property is located outside the United States more than 50% of the time. Transportation property (i.e. airplanes) is considered primarily "located outside the U.S." based on either more than 50% of miles traveled in use of the property are outside the U.S. or the property is located outside the U.S. more than 50% of the time. (REF: IRC Temporary Regulation §1.927(a)-1T(d)(4)(vi).)

Property must have less than 50% of its fair market value attributable to articles that were imported into the U.S. In other words, the property cannot have more than 50% of its parts manufactured in foreign countries.

Export property does not include:

a. Property leased or rented by an FSC for use by any member of a controlled group of corporations of which such FSC is a member,
b. Patents, inventions, models, designs, goodwill, trademarks, trade names, franchises, etc.,
c. Oil and gas,

d. Prohibited property (declared such by the President of the United States), and
e. Property in short supply (declared such by the President of the United States).
REF: IRC § 927

b) Foreign Management Rules

An FSC (other than a small FSC) is treated as having FTGR for the tax year only if the management of the FSC during the tax year takes place outside the United States. These management requirements are as follows:

1) All meetings of the Board of Directors and meetings of the shareholders of the FSC must take place outside the U.S. The 1120-FSC instructions state all such meetings must also comply with the local laws of the foreign country or U.S. possession in which the FSC is created or organized. Therefore, local laws determine whether a meeting must be held, when and where, if at all, who must be present, quorum requirements, use of proxies, etc.

The wording of this requirement can be very misleading. The requirement is that "all" meetings must take place outside the U.S but it does not state that there must be a meeting during the year. Therefore, if local law does not require a meeting, the FSC is not in violation of the rules if it does not hold a meeting.

2) Cash, dividends, legal and accounting fees, salaries of officers, and salaries or fees of directors disbursed during the year must be disbursed out of the principal bank accounts of the FSC maintained outside the U.S. However, if no disbursements are made, this requirement has been met.

3) The principal bank account is maintained outside the U.S. at all times during the tax year. The FSC will have the bank account in the foreign country but it may only debit commission income to and credit commission expense from the account.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

c) Foreign Economic Process Rules

In addition to the foreign management requirements, certain economic processes must take place outside the US in order for an FSC (other than a small FSC) to have FTGR from any transactions. 26 CFR §1.924(d)-1 sets forth the rules for determining whether a sufficient amount of the economic processes of a transaction take place outside the United States. Generally, a transaction will qualify if the FSC satisfies two requirements:

1. Participation outside the US in the sales portion of the transaction, and
2. Satisfaction of either the 50% test or the 85% foreign direct cost test.

d) Participation Outside of US in Sales Portion of Transaction

This requirement detailed in IRC § 924(d)(1)(A) addresses the necessity of foreign involvement in a sales transaction for it to qualify as a FTGR. If the FSC participates outside the U.S. in any of the following sales activities relating to a transaction, the gross receipts from that transaction qualify as FTGR:

1. Solicitation (other than advertising);
2. Negotiation; and
3. Making a contract.

e) Solicitation

Solicitation is (other than advertising) any communication (including but not limited to telephone, telegraph, mail or in person) by the FSC to a specific, targeted customer or potential customer. The solicitation must promote to the customer the product or service that is the subject of the transaction; and it must take place during the 12-month period preceding the execution of a contract relating to the transaction.

f) Negotiation

Negotiation is any communication by the FSC to a customer or potential customer dealing with the terms of the transaction, including

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

but not limited to price, credit terms, quantity, or time or the manner of delivery. Negotiation does not include the mere receipt of communication from a customer (such as an order) that includes terms of a sale.

g) Making of a Contract

This refers to performance by the FSC of any elements necessary to complete a sale, such as making or accepting an offer. Acceptance of an unsolicited bid or order is considered the making of a contract even if no solicitation or negotiation occurred with respect to the transaction. The written confirmation by the FSC to the customer of an oral or written agreement that confirms variable contract terms such as price, credit terms, quantity, or time or manner of delivery, or specifies (directly or by reference) additional contract terms, will be considered the making of a contract. A written confirmation is any confirmation in writing, including a telegram, telex or other similar written communication.

Generally, the sales activities described above are applied on a transaction-by-transaction basis. However, the FSC may make an annual election, on Schedule P of the 1120-FSC, to apply any of the sales activities on the basis of a group. The FSC can elect to group the activities, for example, by product line, customer or contract. The grouping rules allow qualification of the entire group even if only a percentage of the transactions within the group actually meet the test. REF: 26 CFR § 1.924(d)-1(c)(5)

The following is an example of how the FSC can meet the above requirements: REF: 26 CFR § 1.924(d)-1(c)(6)

Example

An FSC earns commissions on the sale of export property by its domestic related supplier to U.S. wholesalers for final sale to foreign customers. The related supplier receives an order from one of its U.S. wholesalers. The related supplier telephones the U.S. wholesaler to inform it of the new price and the probability of another price increase soon. The U.S. wholesaler orally agrees to the new price and the related supplier instructs the FSC to telex the wholesaler from its foreign office a confirmation

that the product will be sold at the current new price. The written confirmation by the FSC of an oral agreement on a variable contract term constitutes the making of a contract and the requirement has been met with respect to the transaction relating to the product

The activities comprising these economic processes may be performed by the FSC or by any other person (related or unrelated) acting under contract as an agent for the FSC.

The requirements of any test contained in the economic process rules are minimal and, therefore, not hard to meet. The FSC can be an agent relationship.

Example

A domestic corporation creates an FSC under the rules and regulations of the IRC. The two corporations then execute an agreement/contract outlining the contractual relationship between the two. Next, because an FSC also has the ability to sub-contract, another agreement is then negotiated (normally) with the domestic parent. In effect, the domestic parent becomes the subagent of the FSC and does most of the work while the FSC does relatively nothing other than meet the minimal requirements necessary to maintain FSC status. The domestic parent is allowed to take a deduction for FSC commission expenses on its return and to exclude from taxable income any dividends or deemed dividends from the FSC thereby reducing its federal taxable income.

h) Satisfaction of 50% or 85% Test

To qualify as FTGR, foreign direct costs incurred by the FSC attributable to the transaction must satisfy either the 50% or 85% test.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

(1) <u>50% Test</u>

The foreign direct costs incurred by the FSC attributable to the transaction must equal or exceed 50% of the total direct costs incurred by the FSC attributable to the transaction. Direct costs are those costs incident to and necessary for the performance of any of the following activities (see IRC§ 924(e)):

1. Advertising and sales promotion (IRC § 924(e)(1));

Direct costs of advertising include transmitting or distributing the advertising, but do not include the cost of preparations of the advertisement. Advertising to U.S. customers does not count.

The direct cost of sales promotions includes rental of space at trade shows, payments to organizers or other persons hired, rental of display equipment and decorations, costs of maintaining a showroom, cost of travel, lodging and food for direct sales people.

2. Processing of customer orders and arranging for delivery (IRC § 924(e)(2));

Processing of customer orders means notification by the FSC to the related supplier of the order and of the requirements for delivery.

“Arranging for delivery”’ means taking the necessary steps to have the export property delivered to the customer. Direct costs include salary of clerical personnel and cost of communication but not the actual shipping costs.

3. Transportation from the time of acquisition by the FSC to the delivery to the customer (IRC § 924(e)(3));

Transportation means moving or shipping the export property during the period when the FSC owns the property, or during the period after the commission relationship begins. Direct costs of transportation include shipping expenses, fees paid to

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

freight forwarders, cost of freight insurance, and documentation fees.

4. Determination and transmittal of a final invoice or statement of account and receipt of payment (IRC § 924(e)(4)); and

This category refers to the assembly of either the invoice or statement and forwarding that document to the customer. The direct costs involved are office supplies, office equipment, clerical salaries, mail or other delivery service. To incur foreign costs, at least the final assembly of information and the mailing of the documents should be done from abroad.

5. Assumption of credit risk (IRC § 924(e)(5)).

Assumption of risk means bearing the risk of nonpayment for merchandise. The direct costs include debts that are uncollectable, cost of insurance that covers default and bankruptcy, cost of investigating credit, etc.

(2) 85% Test

Under this test, the foreign direct costs incurred by the FSC attributable to a transaction must equal or exceed 85% of the total direct costs incurred by FSC in relationship to 2 of the 5 categories listed above.

Direct costs are those costs that are incident to and necessary for the performance of any activity described in IRC § 924(e). Direct costs include the cost of materials consumed in the performance of the activity, and the cost of labor that can be identified or associated directly with the activity (but only to the extent of wages, salaries, fees for professional services and other amounts paid for personal services actually rendered, such as bonuses or compensation paid for services on the basis of a percentage of the profits.) Direct costs also include the allowable depreciation deduction for equipment or facilities (or the rental cost of its use) that can be specifically identified or

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

associated with the activity, as well as the contract price of an activity performed on behalf of the FSC by a contractor.

The FSC shows its total foreign direct costs and total deductions on Schedule G of the 1120-FSC. It must also indicate on the FSC return the test (50% or 85%) used to meet the foreign direct costs requirement. If the 85% test was used, the FSC must also indicate the two activities in which the 85% foreign direct costs were incurred.

2. Transfer Price Rules

Once the FSC has determined its foreign trading gross receipts, the FSC must use the Transfer Pricing Rules to calculate the amount of federal taxable income that can be sheltered by the FSC.

For a "Buy-Sell FSC", the transfer pricing rules provide a floor or minimum price at which the FSC can be deemed to purchase property from its parent. For a "Commission FSC", the rules provide the ceiling or maximum commission that the FSC can be deemed to charge for its services.

The "related supplier" (normally the parent of the FSC) uses Schedule P of the 1120-FSC return to calculate the transfer price to charge the FSC or the commission to pay to the FSC under the administrative pricing rules.

These calculations may be made on a transaction-by-transaction basis, group of transactions basis or aggregate of transactions basis. If the taxpayer chooses the transaction-by-transaction method, a Schedule P must be done for each transaction. A Schedule P must also be done for each group of transactions or each aggregate of transactions.

There are two methods allowed to compute the FSC profit - the 23% of combined taxable income (CTI) method or the 1.83% of foreign trading gross receipts method. The taxpayer is allowed to determine which method is most advantageous. Once the commission is computed on Schedule P, the amount is then transferred to Schedule B.

Also included on Schedule P is the related supplier's (i.e. the parent's) "expenses allocable to foreign trading gross receipts." The parent must retain

support for the amounts shown on Schedule P (since the IRS audits the parent's books but not necessarily the FSC's). This may be a good place to start when trying to understand what the parent/related supplier actually does for the FSC. However, these expenses could only represent CPA expenses of keeping the FSC books and records. If so, you will need to ask the taxpayer specific questions concerning how and what type of work is done for the FSC by the parent/related supplier.

3. Summary of Federal Taxation

When an FSC earns Foreign Trading Gross Receipts, 16/23 or 69.565% is EXEMPT from federal and Illinois tax, and 7/23 or 30.5% of federal taxable income is taxed at regular rates.

4. Illinois Law and Rulings in Relation to FSCs

Illinois law contains no special provisions for DISCs or FSCs. They are covered under the same statutes as any other corporation. However, there are two sections of the IITA which provide general guidance, as well as the guidance provided in the instructions for the IL-1120 and Schedule UB.

IITA § 102 provides that the IITA will follow the United States Internal Revenue Code unless expressly provided otherwise in the IITA. The Act will have the same meaning as the comparable context of the IRC's provisions of statutes which are in effect for the taxable year.

IITA § 1501(a)(4) defines a corporation to include associations, joint-stock companies, insurance companies and cooperatives. This section of the IITA also provides that any entity meeting the definition of a corporation, including a limited liability company, will be treated as a corporation if it is so classified for federal income tax purposes.

A foreign corporation must observe the same filing requirements as U.S. domestic corporations. If taxable income is being reported for federal purposes under IRC Sections 881 through 885 and the taxpayer has Illinois nexus it should file form IL-1120. Only the domestic factor information regarding sales information in the "everywhere" denominator should be used when apportioning business income to Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

However, an FSC under IRC § 992, is not subject to the taxes imposed by IRC Subtitle A (except for taxes imposed due on a transfer under IRC § 1491). If the DISC or FSC is not required to file federally and is not subject to taxes, it is also not required to file Form IL-1120.

In the scenario where a DISC or FSC is also a member of a unitary business group, only the actual and deemed distributions taxable to the DISC's or FSC's shareholders should be accounted for in determining Illinois income tax liability.

5. Illinois Audit Issues

The following sections contain procedures for including FSCs in an Illinois unitary group. Also, some of the major issues encountered by the auditor are addressed.

In order for the FSC to generate foreign trading gross receipts, it must have a foreign presence. The FSC must satisfy certain federal requirements to prove that it has a foreign presence. The federal rules were deliberately designed so that a minimum amount of foreign activity by the FSC will be treated as if all of the activity was performed in the foreign country thus allowing the FSC to satisfy the foreign presence requirements. These rules are almost artificially applied to assist the FSC in claiming a foreign presence. The following examples illustrate:

a) Foreign Sales Test

If the FSC or its agent communicates, in any way, with the targeted customer during 1-year immediately preceding finalization of a specific transaction, then that sale has taken place outside of the US even if the majority of the transaction took place in the US. REF: IRC § 924(d)(1)(A)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

b) Direct Cost Test

- If the advertising material is mailed from the foreign location then all of the cost of producing the mailing, even if incurred in the US, is treated as cost incurred by FSC outside the US; and

- When the FSC pays the cost of shipping, whether included in the sales price or separately stated, the FSC is deemed to have engaged in the transportation activity. The location of the transportation activity is the area over which the property is transported. The portion of the direct cost is the portion of mileage outside US.

In other words, if the related supplier delivers the goods to the FSC at the US port, then the portion of the transportation cost from that port to the foreign country is all direct foreign costs.

- The cost of packaging, crating and other pre-transportation cost usually incurred by the related parent is not included in the "Direct Cost Test."

When auditing an FSC, there are three questions that arise in connection with the FSC as with any corporation.

1. Is the FSC unitary with the parent?
2. Should the FSC be included in the unitary group or excluded because of the 80/20 rule?
3. What is the amount of income/loss, modifications and factors to be included in the unitary return?
   REF: IRC § 924(d)(1)(B);

6. Unitary Determination

FSCs are subject to unitary treatment if they meet the requirements. They should be in the group if they are related through common ownership with other taxpayers whose business activities are integrated with, dependent upon and contribute to each other. The FSC cannot be included in a unitary business group if 80% or more of its business activities are conducted outside the United States. (See Schedule UB - Combined Apportionment for Unitary Business Group and the IL-1120 instructions.)

The current IL-1120 and Schedule UB instructions reflect the correct position as confirmed in Shaklee Corp. v. Illinois Department of Revenue (1998) – 298 Ill App 3d 1165, 738 NE2d 236.

As a result of the Shaklee decision, the 80/20 test is a rule of exclusion rather than inclusion. If a three-factor FSC has no property or payroll, it would fail to meet the 80/20 test for exclusion. In other words, the FSC must have 80% or more of its property and payroll outside the U.S. to be excluded from the unitary group. Otherwise, the FSC could be included in the group if the other unitary criteria are met.

The criteria for determining whether an FSC's operations are unitary are no different from any other corporation. Therefore, the auditor should follow the normal procedures in gathering the unitary information. However, some of the information regarding ownership, intercompany transactions, etc., can quickly be gathered by reviewing the Form 1120-FSC return.

In the majority of cases, it will be fairly simple and easy to establish a unitary relationship of the FSC with the parent company. A majority of the taxpayers will not resist the unitary determination. The points to remember are:

1. An FSC will normally be a wholly-owned subsidiary of the parent.

2. The FSC only exists as a conduit for the parent’s foreign sales. It is totally dependent upon the business activities of the parent with intercompany sales, commission, management charges and integration with the parent.

3. The directors and the officers of the FSC, except for the non-resident director, will also be the directors and/or officers of the parent.

However, inclusion of the FSC in the unitary group will be a controversial issue. The taxpayer will argue that the FSC may be unitary but cannot be included in the unitary group because its operations are overseas. Since the FSC maintains an office overseas and has a non-resident director as required by the IRC, all payroll and rent expense are in the country of incorporation. The taxpayer will cite the 80/20 rule and IITA § 1501(a)(27), which prohibits the Department from including the 80/20 companies in the unitary group.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

Refer to Chapter 23 - Unitary Determination for more information.

7. Audit Procedures

The auditor will have to determine and document the following steps:

1. Determine whether or not the FSC is unitary with the parent;
2. Perform the 80/20 test on the FSC. Determine the property and payroll amounts and allocate those amounts to the foreign and US operations of the FSC; and
3. Identify the amount of FSC income to be included in unitary income.

To make these determinations, the auditor will need to ask the taxpayer a number of questions and review certain records and agreements. The last exhibit of this section is comprised of sample questions to aid the auditor on how to proceed.

In many cases, the FSC does not have property or payroll. All activities relating to an FSC, whether a "commission" or "buy sell", are performed by the parent company and/or a related subsidiary which in most cases is in the US. The Auditor should review and pay close attention to the "Commission" and "Related Supplier FSC Sub-agency agreements." These agreements will document the parent’s (and/or related subsidiary) and FSC’s relationship. These agreements will also detail the functions performed as an agent for the FSC by the parent or related subsidiary.

Another method to obtain information about the parent's activities in conjunction with the FSC is to follow a foreign sale through the entire process from the receipt of the order through the actual shipment of the product from the parent's warehouse. This procedure will clearly identify the parent's equipment being used and personnel involved in the activities undertaken on behalf of the FSC.

8. 80/20 Test

The Auditor must perform the 80/20 test to determine if the FSC has 80% or more of its total business activity outside the United States. The 80/20 test is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

the same test used to exclude from the unitary group members with 80% or more of their business activity performed outside the United States. Refer to the Audit Manual chapter 23 for 80/20 test information and procedures. REF: IAC § 100.9700(c)(1) and (2)(B) and IITA § 1501(a)(27).

9. Property Factor

In determining the property factor for the 80/20 test, the numerator will consist of property owned or rented in the United States and the denominator will be property owned or rented everywhere (worldwide).

In computing the property fraction, only property which is used, available for use or capable of being used should be included. Property used in the production of nonbusiness income, construction in progress or property that is permanently withdrawn from use should not be included. REF: IAC § 100.3350(a) and (b).

In applying the 80/20 test to the FSC, it must first be determined if the FSC actually owns or rents any property in the foreign country or the United States. This can be determined by reviewing the balance sheet of the FSC return. Small items may be expensed and not be listed on the balance sheet. Therefore, a review of the M-1 schedule or other deductions should be conducted to detect the items that should be included with property, which have been expensed. Occasionally, rent is included in other items such as management fees.

If the taxpayer claims rent expense, the Auditor should verify that the FSC is the actual lessee of the property. This can be accomplished by requesting and reviewing the lease. If the agent of the FSC actually rented the property, then that rent cannot be included in the property factor.

If facilities such as office or storage space, computers, desks, etc. of another company, foreign or domestic, are being used at little or no cost, we can attribute a fair market rental rate to this property. This amount can be included in the denominator of the property factor and in the numerator if the property is located in the United States.

The Department has the statutory authority to attribute property owned by others and used by the taxpayer at no charge or rented for a nominal rate to the taxpayer under IAC 100.3380(a)(2). A fair market value rental rate can be calculated for any property used in relation to the FSC's operations such as

preparation of FSC invoices and statements, storage and safekeeping of FSC's records, tax return preparation, etc.

Example

The auditor determines that the parent's or related subsidiary's employees are performing the record keeping functions and preparing all of the tax returns for the FSC. According to the instructions for the 1120-FSC, the time required to prepare the return and perform the related record keeping functions is 146 hours. A fair market value rental rate of the equipment used in that function could be determined based on the time required to perform those duties for the FSC. The rental rate of that property such as desks, computers, calculators, etc. can be attributed to the property factor of the FSC.

Many other functions performed by the parent for the FSC should be examined such as shipping arrangements, sales activities, invoice preparation, billing activities, etc. to discover other items of property being used on behalf of the FSC. The responses to the questionnaire will provide leads to other areas for further examination.

For further information, please refer to the Property Factor section of Audit Manual Chapter 27.

10. Payroll Factor

The payroll factor for the 80/20 test will include all compensation paid by the FSC during the taxable year. The numbers to include in the payroll factor can be obtained from the salaries and wages deduction line on Schedule G of the FSC return. Also, any amounts listed on the cost of labor line of Schedule A must be investigated to determine if the cost was incurred by the FSC, the parent company or the agent for the FSC. If the FSC has deducted or expensed any salaries and wages, the auditor must verify that the individuals earning those "salaries and wages" are truly employees of the FSC as defined in IAC § 100.3100(b). If the taxpayer asserts that a foreign director or agent is an employee, it must be determined if they meet the definition of an employee. In order to be an employee, the individual performing services must have a legal relationship with the entity for which the services are being performed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

If the auditor determines that there are employees of the parent performing functions on behalf of the FSC in the United States, IITA § 404 authorizes the Department to reallocate items of income or apportionment reflected on one company's records that in fact belong to another company. This section can be used to allocate to the FSC payroll of employees of the parent or other subsidiaries who perform functions on behalf of the FSC. However, the employees providing these services may be from a foreign subsidiary. Therefore, if the auditor is going to reallocate payroll under IITA § 404, all payroll of employees performing functions for the FSC will have to be reallocated even if it supports the taxpayer's contention that the FSC is an 80/20 company.

Example
The US parent sets up a "commission" FSC to increase foreign exports and receives favorable tax treatment on those sales. The parent has two salesmen on their payroll whose sole responsibility is to sell the parent's product overseas. The FSC receives a commission on the sales made by these salesmen. The auditor should reallocate the payroll of these salesmen to the payroll factor of the FSC using a Section 404 adjustment.

For further information, please refer to the Payroll Factor section of Audit Manual Chapter 27.

11. Income and Factors

Once the determination has been made that the FSC should be included in the unitary group, the remaining portion of the audit will be completed following the same procedures as any other unitary audit. Detailed procedures for verifying the income and factors are contained in Chapter 27.

12. FSC Income

The FSC will have income from foreign trade of which 65% is exempt for federal and Illinois purposes. Also, there will be nonexempt foreign trade income that includes 50% of the receipts from the sale, exchange or other disposition of military property or services, international boycott income, illegal bribes and other payments, etc. The FSC can have taxable non-foreign income such as interest, dividends, carrying charges, royalties, etc. All of

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

these items are included on Schedule B, Line 20 of the 1120-FSC return, which is the taxable income or loss of the FSC.

The FSC income to be included in the unitary return will be obtained from that line with the net operating loss deduction on line 19a added back.

A net operating loss of a FSC will be carried in the manner as any other corporation following IITA § 207 for years ending on or after 12/31/1986. For years prior to 12/31/1986, IRC § 172 applied.

13. FSC Factors

The factor computations for the FSC will follow the same procedures as for any other member of a unitary group. All factors, domestic and worldwide, should be included in the apportionment formula. This is a change in the Department's position. However, in most cases, the FSC will not have nexus with Illinois unless the parent or related subsidiary has nexus in Illinois. Also in most cases, the commission FSC's factors will be eliminated as intercompany transactions. If this is the case, then the only purpose of the factors is to make the 80/20 determination.

A ''Buy-Sell" FSC will have to be examined more in depth. The same guidelines for attributing property and allocating payroll to the FSC as described in the Section on the 80/20 test should be used for the property and payroll factor determination. The only exception is that we are establishing Illinois and everywhere factors. Also, property and payroll factor rules as detailed in Chapter 27 are to be followed. In calculating the sales factor of a "Buy/Sell" FSC, 100% of all sales will be included in the factor. However, the sales from the parent and related subsidiary to the FSC must be eliminated from the denominator. If the "Buy/Sell" FSC has nexus in Illinois, then rules regarding throwbacks will need to be followed also.

14. Small FSC

IRC § 922(b) defines a small FSC as a corporation that has elected to be a small FSC and kept the election in effect for the tax year.

- It cannot be a member of a controlled group that includes an FSC as a member unless that FSC is also a small FSC.
- A small FSC is exempt from the foreign management and foreign economic process requirements described in the above sections.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights

- Any (FTGR) receipts of a small FSC that exceed $5 million are not considered in determining its exempt foreign trade income
  - The $5 million limit may be further reduced if the small FSC has a short tax year, or the small FSC is a member of a controlled group which contains other small FSCs.

.15. Investigating A Foreign Sales Corporation

The following are areas to research during an audit of an FSC's operations. Auditors may adapt these areas into a question format for their particular audit. To avoid the possibility of follow-up questions, the taxpayer should be instructed to avoid “yes/no” answers, be as specific as they can be, and provide information and/or documents regarding the Foreign Sales Corporation:

1. "Commission Agreement"

2. "Related Supplier-FSC Sub-agency Agreement”

3. Names of Directors and officers.

4. List specific duties performed by these individuals in regard to FSC's operations, or foreign sales of the parent company through the FSC.

5. Indicate the location of the offices from which these duties are performed.

6. Names of individuals who perform the following functions in connection with the sales related to FSC's business. Please also indicate, in each case, the place from where these services are rendered:

   a. Solicitation of prospective customers.
   b. Finalizing and signing the sales contract.
   c. Credit check and approval.
   d. Preparation of sales invoice.
   e. Preparation of shipping documents.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

f. Preparing, packing, carting & shipping products to customers.

g. Preparation of customers' statements.

h. Maintenance of receivables.

i. Preparation of Form 1120-FSC, and accumulation of necessary data for its preparation ("Schedule P" and "Schedule G").

7. Please estimate the time individual(s) spend performing the above functions. Also estimate the footage or time that any assets (e.g., office space, warehouse space, computer equipment, warehouse & transportation equipment) are utilized in performing the above functions. Please understand that these estimates will be used to attribute property values to the above functions.

8. Name of the individual who is responsible for overseeing and monitoring foreign sales.

9. Please identify the FSC related expenses on the parent company's federal Form-1120 which are charged back to the FSC.

10. Details of expenses shown on Schedule P and Schedule G of Form 1120-FSC.

11. Please provide copies of bank statements for ALL accounts maintained by the FSC, either in the US or overseas.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights

I. PURPOSE

When conducting an audit on a taxpayer with losses, it is important to determine what types of losses are utilized on the return to ensure the appropriate rules are followed.

III. GENERAL INFORMATION

A net operating loss (NOL) occurs when expenses exceed income. Illinois has progressed from having no law governing treatment of net operating losses, to allowing federal losses (FNOL's), to passing legislation that creates Illinois net losses (INL's). Included for discussion

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

will be the election to forgo Illinois Net Loss (INL) carrybacks, carrying losses in unagreed audits, IITA §§ 905(n) and 911(h), how and when losses are to be applied, and discharge of indebtedness.

The three broad categories of losses are:

- Illinois Net Losses (INL)
- Federal Capital Losses
- Federal Net Operating Losses (FNOL)

An audit may contain all three types of losses. Illinois Net Loss is recognized for tax years ended on or after 12/31/1986. These losses result after applying Illinois modifications and apportionment percentage to federal taxable income/(loss). Capital losses have their own carryover and allocation issues that potentially arise in all years. Federal Net Operating Loss, will be addressed in the historical extracts section at the end of this chapter.

The following section addresses the general and special rules for carryback and carry forward periods, the election to forego the carry back period, and special limitations period for filing claims for INL's. Later sections will address the actual computation of losses.

IV. ILLINOIS NET LOSSES

An INL is the amount of loss incurred after applying the Illinois addition and subtraction modifications and then the allocation and apportionment provisions of the IITA. REF: 86 IAC § 100.2300(b)(1). The INL is reflected either as a base loss for 100% Illinois filers or as base loss allocable to Illinois. Illinois net losses are discussed in IITA § 207 and have been part of the Act since 1986. Losses are allowed to be carried to other years to offset income with few exceptions. Prior to 2003, losses could be carried back to certain years preceding the loss year. Any remaining loss was then carried forward to years subsequent to the loss year. The following chart outlines the changes to carry periods over the years.

Y/E Beginning Date	Ending Date	Carry Back	Carry Forward	Based on
12/31/1986	08/05/1997	3 Years	15 Years	IRC § 172
08/06/1997	12/30/1999	2 Years	20 Years	IRC § 172
12/31/1999	12/30/2003	2 Years	20 Years	IITA § 207(a)(2)
12/31/2003	And after	~No~	12 Years	IITA § 207(a)(3)

Note that, in determining the taxable years to which an Illinois net loss deduction (INLD) may be carried, taxable years ending on or after January 1, 2011, and prior to December 31, 2012, when no Illinois net loss deductions were allowed are not counted, whether or not the taxpayer had income in that year. Also, taxable years ending after December 31, 2012 and prior to December 31, 2014, are not counted if the taxpayer would have been allowed

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

an Illinois net loss deduction in excess of $100,000 if not for the cap on deductions in those years.

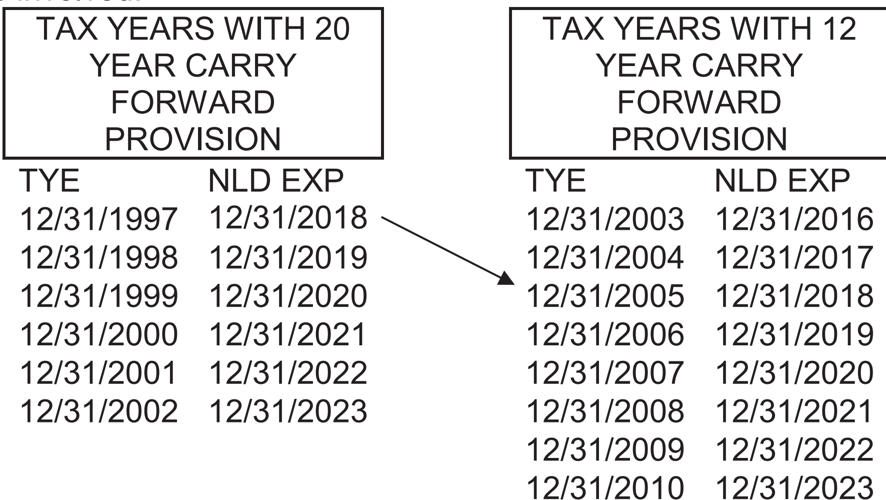
A. Loss Application

Losses are to be applied according to IITA § 207(a-5)(B) by expiration date, not based on first-in first-out.

IITA § 207(a-5)(B) applies to each loss year, not a group of loss years. Since the Act does not specifically state that the taxpayer must use the loss year(s) in order they were incurred, it is allowable to use the losses that expire earliest first. The Act says the "loss shall be carried to the earliest taxable year to which such loss may be carried." So even though there is loss available from 2002, if loss is available from 2003, the 2003 loss may be used first. The instructions to the 2006 and forward Schedule NLD and 2005 and forward Schedule UB/NLD state, "use the loss that expires first".

This can potentially affect tax years ending 12/31/2003 through 12/31/2010 because from 2003 forward, losses can only be carried 12 years, whereas, losses from tax years 1997-2002 expire either after or at the same time as the 2003-2010 losses. Refer to charts below for calendar year filers' overlap periods.

Tax years involved:



TAX YEARS WITH 20 YEAR CARRY FORWARD PROVISION

TYE	NLD EXP
12/31/1997	12/31/2018
12/31/1998	12/31/2019
12/31/1999	12/31/2020
12/31/2000	12/31/2021
12/31/2001	12/31/2022
12/31/2002	12/31/2023

TAX YEARS WITH 12 YEAR CARRY FORWARD PROVISION

TYE	NLD EXP
12/31/2003	12/31/2016
12/31/2004	12/31/2017
12/31/2005	12/31/2018
12/31/2006	12/31/2019
12/31/2007	12/31/2020
12/31/2008	12/31/2021
12/31/2009	12/31/2022
12/31/2010	12/31/2023

Note: The expiration dates are extended by one year based on TYE 12/2011 not being counted as a carry year. For taxpayers reporting losses greater than $100,000 in calendar years 2012 and 2013, the expiration dates may be further extended by those years not counting for carry forward provisions as explained above.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

As illustrated if a taxpayer has a loss to carry from 1997 and another loss from 2003, the 2003 loss may be applied first as it would expire prior to the 1997 loss. GenTax does not automatically process losses according to this procedure; careful documentation is required for the NLD schedule to be adjusted accordingly.

B. Election To Forgo Carryback Period

A taxpayer may elect to forgo the carryback period for INLs incurred in tax years ended on or after December 31, 1986 and before December 31, 2003. For tax years ending December 31, 2003 and after, the carryback provision is eliminated from the IITA. The election to forgo the carryback period for Illinois losses is independent from the federal election. It must be made by the due date of the loss year return, including extensions of time, or, if the original return reports positive income, on the first amended return on which a loss is reported. Once the election is made, it is irrevocable for that tax year.

1. September 27, 1996 Through December 30, 2003

Carrybacks were mandatory unless an election was timely made to forgo a carryback. For loss years ending on or after September 27, 1996 and through December 30, 2003, the Department promulgated 86 IAC § 100.2330(c) to explain the election procedure. The election is made on the original loss year return by checking a box indicating the taxpayer wishes to forgo the carryback period. The election must be filed no later than the extended due date of the original return. If the box is not checked on the original return by the extended due date, the election to forgo the carryback period cannot be made at a later date. Without a timely election, under 86 IAC § 100.2330(a) & (d) the loss must be carried back before any remaining amounts can go forward.

The only exception to this rule would be for a federal or state audit change eliminating Illinois income, and creating an INL for the year. For a federal audit change, the taxpayer is entitled to make an election to relinquish the carry back period for the newly created INL on an amended return. The election in this case must be filed within 120 days from the federal finalization date. For an Illinois audit change creating a loss, the taxpayer may make the election for the newly created loss at the close of the audit. (Ref: 86 IAC § 100.2330(c)(3)) If the auditor is creating an INL, then the auditor should get a signed commitment from the taxpayer before completion of the audit that they are only going to carry the loss forward.

NOTE: There was a box on the IL-1120-X for tax years through 2004 where the taxpayer could make the election to forgo the carryback. Starting with the 2005 calendar year, the IL-1120-X is different for each year and a note at the top of the form tells the taxpayer to use the appropriate form for the year. If an amended return is filed for a tax year that creates a net loss which may be carried back, it

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

must be an IL-1120-X from 2004 or prior, when the forms were not year-specific and had the box to elect to carry forward only.

If the taxpayer fails to check the box, and a subsequent federal change or audit causes it to have income in a carryback year, it must carry the loss back to offset that income.

86 IAC § 100.2330(a) also states that special federal rules concerning the years to which a loss may be carried apply to certain types of corporations (such as regulated transportation companies). These special rules will also be followed for INLs incurred in tax years ending prior to 12/31/99, because, for losses incurred in those years, IITA § 207 provided that INLs could be carried over for the same period as allowed by IRC § 172.

2. Prior to 1996

Prior to the 1996 tax forms there was no box on the IL-1120 to make the election to forgo the carryback. There were no instructions concerning the election prior to 1994. For these years implicit elections were allowed in one of two ways:

a. A statement attached to the loss year return stating the taxpayer’s intention to forgo the carryback period; or,
b. The taxpayer could file the subsequent year's income tax return and reflect an Illinois NLD on the return before filing an amended return carrying the loss back.

However, in *Elgin Sweeping v IDOR,* (2007), the Cook County Circuit Court agreed in part with a 2006 administrative ruling that determined, “…neither federal nor state law recognize the concept of an ‘implicit election’ to forgo a carryback.” Therefore, if no statement is attached to the original return specifically indicating the election to forego carryback, losses are required to be carried back first and then forward.

If the increase in income in the carryback year is due to a federal change that became final on or after August 13, 1999, the limitations period for any year to which a loss was carried is reopened to the extent that the carryover to that year is changed by increasing the amount of loss used in the federal change year. For other changes, if the statute of limitations for any of the carryforward years is closed, the duty of consistency or equitable recoupment doctrines should allow the Department to offset any refund (or increase any deficiency) by the increase in tax for the closed year that would result from proper computation of the carryover.

C. Special Limitation Period For Illinois Net Loss

IITA §911(g) was added by PA 84-1042 and specifies a special period of limitation for filing claims for refund resulting from the carryback of Illinois net losses incurred December 31, 1986 or after. For these loss carrybacks, the limitation is 3 years after the time prescribed by law for filing the return (including extensions) FOR THE YEAR IN WHICH THE LOSS OCCURS. In addition, if Form IL-872 is signed extending the statute of limitation on the loss year, then this date plus six months is also the limitation date for the taxpayer to file a claim for refund resulting from the loss carryback.

IITA §911(g) also states that the limitations set on the amount of refund allowable under IITA §911(d) will not apply in these instances. This means that the amount of the refund allowable under IITA §911(g) will not be limited to the amount of tax paid in the 3-year (plus period for extension of time to file return) or 1-year period immediately preceding the filing of the return.

IITA §911(g) applies to Illinois losses incurred December 31, 1986 and after only - it DOES NOT APPLY TO FEDERAL LOSSES INCURRED PRIOR TO DECEMBER 31, 1986.

Another special period to be aware of is in regard to reported federal RAR changes. IITA § 905, Limitations on Notices of Deficiency, was amended by Public Act 91-541 for notices of deficiency relating to reported federal changes, and the carry years for INLs and Article 2 credits which are impacted by the RAR change. Prior to the change, a Notice of Deficiency may be issued at any time within 2 years from the date the taxpayer notifies the Department of the RAR change on an IL-1120-X. However, nothing was mentioned about the flow-through impact of the RAR on the carry years, so this provision created a new statute of limitations only for the loss year itself. Starting on or after August 13, 1999, if the RAR change is reported, PA 91-541 allows the two-year statute to be applicable to both the RAR year and any year to which the loss or Article 2 credits are carried. This is true even if the RAR impact on the carry year is not reported on an IL-1120-X for the carry year. Also, if no federal change return is filed to report a change that reduces an Illinois loss incurred in a year or that increases the amount of INL carryover that is used in the year, there is no limitations period for issuing a Notice of Deficiency for any year to which the loss was carried to reflect the federal changes to the amount available to deduct in that year. However, the amount of any proposed assessment in the Notice shall be limited to the amount of deficiency resulting from the re-computation based on the RAR change. If the regular statute of limitations has expired, an auditor may obtain a waiver within the two-year period to extend the statute of limitations for RAR purposes only. A timely waiver must be obtained on both the RAR years and all the applicable carry years.

If the RAR change year is unreported, the Department may issue a Notice of Deficiency at any time for the RAR year and the INL and Article 2 Credit carry year(s).

In some circumstances, a taxpayer may not have been an Illinois filer in the year in which a post-12/30/1986 federal NOL was incurred. If the taxpayer was not an Illinois filer, there would be an apportionment factor of zero. No Illinois net loss could have been incurred. Therefore, in this case, no net operating loss carryforward will be allowed in subsequent years in which taxpayer becomes an Illinois filer. If the taxpayer actually incurred an INL in a year for which no return was filed, it may file the return at any time in order to allow a carryover of that loss to an otherwise open year, except to the extent the limitations on refunds in IITA § 911(h) apply.

D. Illinois Net Loss Deduction

When an INL is carried to another year and offset against the income for that year it is called an Illinois Net Loss Deduction (INLD). The INLD will offset base income for 100% Illinois filers or base income allocable to Illinois for apportioning filers. The following example reflects an INLD.

EXAMPLE:

IL-1120	**12/31/2015**
Base Income Allocable to Illinois	1,000
Illinois NLD	(500)
Net Income after NLD	500
Standard Exemption	500
Net Income	-0-

This example reflects the carryforward of an INL. The 500 INLD offsets taxpayer's base income allocable to Illinois which is an amount PRIOR to the application of any standard exemption.

E. Illinois NLD - IT and RT Amounts

86 IAC § 100.2050(b) states that the INLD for income tax and replacement tax purposes will be identical amounts.

For years ending prior to December 31, 1986, the net income for income tax purposes will govern the amount of Illinois net loss carryback, so there may still be net income from replacement tax in these years. For these years, under IITA § 203(b)(2)(B), replacement tax deducted in arriving at federal taxable income was added back in the computation of replacement tax base income. For income tax base income purposes, although the actual modifications enforced by the Department changed in this period, the general result (except perhaps in 1979) was that none of the replacement tax deducted in arriving at federal

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

taxable income was included in the base. As a result, income and replacement tax base income and net incomes were never identical amounts. For years ending on or after December 31, 1986 the replacement tax subtraction modification to the income tax base was changed to a weighted credit against the income tax. Therefore, as of December 31, 1986, the base income for income and replacement tax purposes is the same. See Chapters 24 and 25 for an in depth discussion of the various modifications and computations involved with replacement tax.

EXAMPLE:

12/31/1986 :	**Co. A**
IL Net Loss	(2,000)

12/31/1983

IT Calculation:		RT Calculation:		
Line 1	2,000	Base Inc Allocable to IL		1,000
Base Income	2,000	RT Deducted from FTI	500	
Apportionment %	.50	Apportionment %	.50	
Base Inc Allocable to IL	1,000	RT Addback		250
IL Net Income	1,000	RT Base Allocable to IL		1,250
IL NLD	(1,000)	IL NLD		(1,000)
Net Income after NLD	-0-	Net Income after NLD		250
		Exemption		100
		RT Net Income		150

Only (1,000) of the INL may be carried back to 1983 for income tax and replacement tax purposes.

Form IL-1120X-PY must be used to amend tax years ending prior to December 31, 1986 for any federal or Illinois change. REF: Informational Bulletin FY88-1.

F. Real Estate Mortgage Investments Conduit (REMIC)

1. Background

On August 23, 2011, PA 97-507 added IITA § 207(e), effective retroactively, to allow REMIC owners to adjust their Illinois income due to disallowed deductions or losses, that would otherwise be allowable, except for IRC limitations, which prohibit taxable income of the REMIC holder from being less than the excess inclusion amount derived from the REMIC. REF: IL-1120 Instructions

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Under IRC § 860E(a)(1), the income of the residual interest owner of a REMIC cannot go below the "excess inclusion" amount, which is equal to its income from the REMIC minus a fair return imputed on its investment in the REMIC. Under IRC § 860E(a)(3), the excess of this floor amount over what the owner's income would be without the floor is treated as a net operating loss that can be carried over to other years. Accordingly, the floor does not create federal taxable income; it only shifts deductions between years.

Before IITA § 207(e) was enacted, this quirk in the IRC caused an Illinois income tax problem for non-individual taxpayers. Because federal NOLs are disallowed for non-individuals, the deduction-shifting mechanism does not flow through to Illinois. The computation of base income begins by using federal taxable income, which does not take into account all otherwise allowable deductions if IRC § 860E(a)(1) comes into play. And, since federal net operating loss deductions are not allowed for Illinois and the computation of INL starts with the same federal taxable income used in computing base income, the deductions disallowed under IRC § 860E(a)(1) never enter into the computation of net income in later years through a carryforward, the way they do under the federal scheme.

Thus, the IITA was amended to allow the excess inclusion amount to be subtracted in computing the INL for a year when IRC § 860E(a)(1) applies. Under that provision, if the taxpayer already has a net loss for the year in which IRC § 860E(a)(1) disallows them the benefit of some deductions (because they have excess subtractions, for example), the net loss is increased by the apportioned amount of the disallowed deductions. If net income is zero or positive, an INL that equals the apportioned amount of the disallowed deductions is calculated.

2. INL Calculation

Holders of residual interest in a REMIC will compute their income using the 2011 (or after) Illinois Schedule INL. Prior to 2011, no official form was available to perform the income adjustment, but the calculations are correct regardless of tax year, the only difference is the line references would not be relatable to earlier tax years. Auditors will need to adapt based on the written descriptions for the respective lines.

IITA § 207(e) states that in the case of a REMIC holder, the 207(a) loss is equal to the following:

(1) the amount computed in (a) or if that amount is positive, zero

MINUS

(2) the amount computed in (a), minus the amount that would be computed without regard to IRC § 860E

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Under the Illinois provisions discussed above, IRC § 860E(a)(1) and(2) apply in determining a taxpayer's Illinois net income or loss. IRC § 860E(a)(3) does not apply because Illinois does not couple onto IRC § 172 net operating loss rules.

Under IRC § 860E(a)(1), the residual interest holder in a REMIC's taxable income may not be less than the excess inclusion. Under IITA § 203(e) and 86 IAC § 100.5270, this amount is taken into account in determining the taxpayer's Illinois base income by applying the modifications listed within IITA § 203

Example:

Base income with REMIC (calculated with modifications) is	20,000,000
Base income no REMIC (calculated with modifications) is	(112,000,000)

Statutorily the loss calculation is: 0-[20,000,000-(112,000,000)] = (132,000,000)

a) Unitary Filers

If a corporation is part of a federal consolidated group, IITA § 203(e)(2)(E) says it is supposed to compute its federal taxable income as if it was not and never had been consolidated. However, in order to implement unitary apportionment, 86 IAC § 100.5270(a) says that a unitary business group must compute its combined federal taxable income following the consolidated return rules, with some exceptions.

Under IRC § 860E(a)(2), the taxable income of a holder of a residual interest in a REMIC cannot be less than the excess inclusion amount income from the REMIC. If the holder is a member of a federal consolidated group, the group's taxable income cannot be less than the excess inclusion amount.

So if a taxpayer is not unitary with anyone, it has to recompute its federal taxable income as if it was not and never had been consolidated federally, and apply IRC § 860E(a)(2) in doing so. If it is unitary with some entities, but not all of the entities with which it joined in a federal consolidated return, the unitary group has to compute its federal taxable income in the same manner as a federal consolidated group, but exclude the nonunitary members of its federal consolidated group, and apply IRC § 860E(a)(2) in doing so.

So, either way, the incomes or losses of noncombination rule companies are not taken into account by the residual interest holder in computing its federal taxable income and applying IRC § 860E(a)(2) for Illinois income tax purposes. If the separate or unitary federal taxable income is greater than the excess inclusion amount after excluding losses from noncombination rule members of the federal consolidated group from the computation, IRC § 860E(a)(2) does not come into play.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Audit Procedure

In order to properly record any audit changes, the auditor should do the following:

1) Complete Schedule INL to properly calculate the allowable REMIC loss to be used for future years.
2) Add the allowable loss as a separate entry on the audit Schedule ILNLD showing the year the loss was earned and the amount placed in the tax year column in which the loss is able to begin being used.
3) Carry the audit Schedule ILNLD amounts used to the Auditor's Report on the proper line for each respective year.

   Example: Tax year ending 12/31/2015 is audited. A REMIC loss of (50,000) is calculated on Schedule INL. The allowable loss is entered on the audit Schedule ILNLD labeled as "REMIC Loss Earned 12/31/2015", the amount of (50,000) is listed under TYE 12/31/2016. It will be a negative number, either increasing an existing loss for 2016 or decreasing income for 2016. Any excess will be carried forward just like a regular INL.
   On the auditor's report for 2015, the ILNLD line will reflect any allowable normal loss utilized. For tax year 2016, the ILNLD will reflect any allowable loss utilized that was increased by the $50,000.

G. Illinois Net Losses And Combined Illinois Returns

Additional rules apply to those taxpayers that file combined unitary returns (as allowed by IITA § 502(e)) for tax years ending December 31, 1986 and after. These rules do not generally affect the amount of the INL but rather they may affect how quickly the loss is absorbed. Under 86 IAC § 100.2340(c), if a combined return is filed, any INLDs are combined and subtracted from combined Illinois net income - there is no limitation based on individual filers. A pre-12/31/86 net operating loss carried to a post-12/30/86 combined Illinois return will be allowed to offset the total base income of common members (as limited by 86 IAC § 100.2230(b)).

1. Determination of Combined INL and NLD

Under 86 IAC § 100.2340(a), if a combined return is filed, the Illinois net loss and net loss deduction is determined as if the group were one taxpayer.

EXAMPLE:

12/31/2014

IL-1120	Co. A	Co. B	Combined
Base Income			1,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Nonbusiness Loss			(600)
Business Income			1,600
Apportionment	.10	.20	.30
Apportioned Income	160	320	480
NB Loss Allocable to IL	(600)		(600)
IL Net Income/(Loss)	(440)	320	(120)

If Companies A and B each file a separate Illinois return, Company A's return would reflect an INL of (440) and Company B's return would reflect Illinois income of 320. If a combined Illinois return is filed then the combined return would reflect INL of (120).

2. Separate INL Carried to Combined Return Year

IITA § 405(b-5) and 86 IAC § 100.2350(a) state that there is no limitation even if a company files a separate apportionment return in the year in which the INL is sustained and then carries this INL to a year in which it is a member of a unitary group filing a combined Illinois return.

If losses are being transferred into a new unitary business group, auditors must verify that all of the loss members are included in the new group to allow all available NLDs to be transferred. It is also important to verify how the loss members were acquired as it is possible that the article of purchase does not allow for prior losses to be used by the new designated agent.

EXAMPLE:

12/31/2014:

Separate IL-1120	**Co. A**	**Co. B**	**Co. C**	**UBG**
IL Net Loss	(170)			
Combined IL-1120				
IL Net Income		100	200	300
12/31/2015 Combined:	**Co. A**	**Co. B**	**Co. C**	**UBG**
Base Income				1,000
Business Income				1,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Apportionment	.10	.15	.25	.50
Apportioned Income	100	150	250	500
IL Net Loss Deduction				(170)
IL Net Income				330

Even though Company A filed a separate return in the loss year and Companies B and C filed a combined return, when the loss of Company A is carried to a year in which A,B & C file a combined Illinois return, the Illinois loss is carried forward and offset against the Illinois net income of the combined group. Under 86 IAC § 100.2350(a), it does not matter if Company A had a federal net operating loss in 2015 or that Company A would only have had $100 of Illinois net income if each company had filed a separate Illinois return. As long as the loss company is filing as part of the combined return, there is no restriction based on loss member income.

3. Member's Share of Combined INL

The calculation explained in this section will be relevant for those years in which the Illinois filing member(s) leave(s) a combined group and will be filing a separate return or as part of a different Illinois combined return. When loss companies are included in a new unitary group, the taxpayer should determine the percentage of available NLD to be transferred to the new group. Auditors need to verify that the percentage is correct and if not, adjust accordingly. Only loss members with Illinois apportionment are eligible to receive a percentage of ILNLD to be carried forward.

86 IAC § 100.2350(c)(3) details the calculations to be used to determine the portion of a combined INL attributable to a member. If the combined loss results entirely from a unitary business loss (in other words, there are no nonbusiness or partnership items allocable to Illinois), then each loss member's portion of the combined loss can be calculated by multiplying the combined business loss by each loss member's "separate apportionment percentage". The separate apportionment percentage is merely the member's Illinois numerator over the everywhere denominator of the unitary group or, for 3-factor companies prior to 2001, the member’s Illinois property, payroll and sales over the respective property, payroll and sales everywhere of the unitary group.

EXAMPLE:

12/31/2015

IL-1120	**Co. A**	**Co. B**	**UBG**
Unitary Business Loss			(1,000)
Apportionment	.10	.20	.30

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Apportioned Loss	(100)	(200)	(300)
IL Net Loss	(100)	(200)	(300)

If, however, the combined loss results from any other adjustments (for example, nonbusiness income/loss allocable to Illinois or business income from a nonunitary pass-through entity), the attribution to the member is determined by multiplying the combined INL by the following fraction: the numerator equals the amount that would have been the separate INL of the member and the denominator is the sum of the separate INLs of all members of the group with separate INLs.

EXAMPLE:

12/31/2015 Combined:	**Co. A**	**Co. B**	**Co. C**	**UBG**
Base Income				500
Nonbusiness Loss				(1,000)
Business Income				1,500
Apportionment	.10	.20	.10	.40
Apportioned Income	150	300	150	600
NB Loss Allocated to IL	(550)	(450)		(1,000)
IL Net Loss	(400)	(150)	150	(400)

Company A's attribution: 400/550 X (400) = (291)
Company B's attribution: 150/550 X (400) = (109)
Company C's attribution: 0/550 X (400) = -0-

The INL resulted from the allocation of the nonbusiness loss to Illinois. If a combined return is filed by Companies A, B and C in the year to which the loss is carried, no attribution of the loss is necessary. The (400) INL would be allowed to offset the Illinois combined income in the carry year. However, if all three companies file separate returns in the carry year or if one of the companies leaves the unitary group, the attribution to each member will need to be determined. The next three sections further explain this calculation.

4. Combined INL Carried to Separate Return Year

Under 86 IAC § 100.2350(c)(1), if a combined INL can be carried to a separate return year of a corporation, then the portion of the combined INL attributable to such corporation will be carried to such separate return years.

EXAMPLE:

IL-1120 Combined				
12/31/2002 :	**Co. A**	**Co. B**	**Co. C**	**UBG**
Unitary Business Income				(10,000)
Apportionment	.10	.20	.40	.70
IL Net Loss	(1,000)	(2,000)	(4,000)	(7,000)
12/31/2000 Combined				
IL Net Income	4,000	3,000		7,000
12/31/2000 Separate			1,000	

Companies A, B and C file a combined Illinois return for 2002 and sustain a combined INL of (7,000). In 2000, Companies A and B filed a combined Illinois return, but Company C filed a separate Illinois return. If the designated agent decides the 2002 INL will be carried back, Companies A and B will be allowed to carryback (3,000) of the combined loss prorated to them and offset the 7,000 in Illinois net income. Company C will have (4,000) in INL allocated to it to offset its 1,000 income in 2000. Even though the 2000 combined return for Companies A and B has Illinois net income remaining after the loss carryback, this income can NOT be offset by any part of Company C's prorated INL. Company C's remaining INL must be carried to another year. If in 2001, Companies A, B and C filed a combined Illinois return reflecting at least 3,000 of Illinois net income, the remaining 2002 net loss can be used to offset this income. (Also see 86 IAC § 100.2350(c)(4)(C))

However, for a carryback to a tax year ended on or after 12/31/85 but before 12/31/86, the entire combined INL incurred (or any portion of it) may be deducted by any member or members in the carryback year up to the amount of the total income or incomes in the carryback years. This position is consistent with Illinois' treatment of the carryforward into unitary filing years of net operating losses incurred in a year in which 100% Illinois filers were precluded from filing as a unitary business group.

EXAMPLE:

IL-1120 Combined				
12/31/1986 :	**Co. A**	**Co. B**	**Co. C**	**UBG**
Unitary Business Income				(150,000)
Apportionment	.333333	.333333	.333333	1.00
IL Net Loss	(50,000)	(50,000)	(50,000)	(150,000)
12/31/1983-Separate Filer	250,000	(50,000)	(50,000)	

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Only Company A's portion of the combined loss (50,000) may be carried back to 1983.

IL-1120 Combined 12/31/1988 :	**Co. A**	**Co. B**	**Co. C**	**UBG**
Unitary Business Income				(150,000)
Apportionment	.333333	.333333	.333333	1.00
IL Net Loss	(50,000)	(50,000)	(50,000)	(150,000)
12/31/1985-Separate Filer	250,000	(50,000)	(50,000)	150,000

The entire combined INL of (150,000) would be available for carryback to offset Company A's Illinois net income for 1985.

5. Change in Combined Return Filers

When an INL is incurred, the only relevant members of the unitary group are the Illinois filers (as opposed to the pre-12/31/86 rules where all members of the unitary group were considered). When a combined Illinois return is filed, all Illinois filers with Illinois apportionment factor numerators for that year are viewed as having incurred an INL (unless its share of the apportioned business loss is offset by nonbusiness income or business income from a nonunitary pass-through entity). When one (or more) of these Illinois filers is subsequently sold, its proportionate share of the INL (and that of the remaining Illinois filers) must be calculated by the auditor under 86 IAC § 100.2350(c)(3) . Documentation of this calculation must be included in the audit file. The auditor is also responsible for verifying that the company leaving the unitary group has carried the correct amount of loss into its subsequent returns. If the loss was correctly carried into the new unitary group, a comment should be made in the Auditor’s Comments. If the loss was not correctly carried into the new unitary group, secure a separate track to correct the loss.

The position of the Department in these situations is that the taxpayers must work out any discrepancy in their individual desires for absorption of the loss. As long as the loss is carried according to the rules outlined in the regulations, a claim will be allowed.

EXAMPLE:

12/31/2000 :	**Co. A**	**Co. B**	**Co. C**	**Co. D**	**Co. E**	**UBG**
IL Net Income	100	100	300			500
12/31/2002						
Group I IL NL	(100)	(200)		(400)		(700)
Group II IL NL			(300)		(100)	(400)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Companies A and B may carryback their proportionate shares ((100) and (200) respectively) of the combined loss to 2000. Company C would also be allowed to carryback its proportionate share of the combined loss to 2000. However, the TOTAL carryback deduction allowed to 2000 for both groups would be (500). The designated agents of each of the groups in 2002 will have to agree on how the 2002 losses will be carried. The Department would merely make sure that the regulations are being followed (i.e. carryback to the third year, carryback limited to the amount of income, etc.) Either group in 2002 may elect to forego the carryback period - the election is separate for each group. In other words, Group I may carryback the applicable 2002 INL while Group II elects to carryforward its 2002 INL.

6. Member Not in Existence in Carry Year

Under 86 IAC § 100.2350(c)(2), if a member was not in existence in a prior separate return year, and:

- If the member became part of the unitary group immediately after its organization, then its portion of the loss can be included with the combined carryback to the year it was not in existence. This treatment is the same as that allowed for federal net operating losses under federal Regulation 1.1502-79(a)(2).

  OR

- If the member did not become part of the unitary group immediately after its organization, then its portion of the loss can only be carried back and offset against its separate income.

EXAMPLE:

12/31/2002 :	**Co. A**	**Co. B**	**UBG**
IL Net Loss	(100)	(200)	(300)
12/31/1999			
IL Net Income	200		(Co. B. not yet formed)
IL NLD	(200)		
12/31/2000			
IL Net Income	100	100	200
IL NLD		(100)	

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Companies A and B incur a combined INL of (300) in 2002. The designated agent decides to carryback the loss. In 1999, Company A filed a separate return. Company B was formed in 2000 and became a part of the unitary group immediately after its organization; therefore, the INL carryback to Company A's return for 1999 is (200), representing a portion of each member's INL from 2002.

If Company B had filed a separate return in 2000 (the year in which it was organized) and subsequently filed as part of a unitary group with Company A in 2001, the loss carryback to 1999 would be limited to Company A's portion of the loss (100).

86 IAC § 100.2350(c)(2) would also cover the situation in which a corporation spins off a division and the new corporation becomes part of the unitary group immediately after its organization.

EXAMPLE:

Corporations A and B filed separate unitary returns for the 1999 tax year and combined unitary returns for the 2000 and 2001 tax years. On January 1, 2002, Corporation B spun off part of its operations to a wholly-owned subsidiary, Corporation S, in a nontaxable reorganization. Corporations A, B and S file a combined unitary return for the 2002 tax year - Corporation S incurs an INL for 2002. The 2002 INL attributable to Corporation S may be carried back to offset the separate income of Corporation A and/or B in 1999 and, if there is an excess loss remaining, to 2000 and 2001. The designated agent for the combined group of ABS will decide how the loss will be carried back.

7. Part Year Members

86 IAC § 100.2350(c)(4)(D) gives an example of how to handle a situation in which members are part of the UBG for a partial year.

H. Schedule NLD

Schedule NLD (or UB/NLD for unitary filers) is used to calculate the amount of Illinois net loss available, deductible and remaining for use in subsequent years. If a taxpayer does not attach a completed Schedule NLD to the IL-1120, or attaches a taxpayer produced schedule that is not authorized by the Department, the INLD claimed will be reduced to zero and considered a math error subject to the math error statute of limitations, collection procedures, etc. REF: Instructions to Schedule NLD. See Chapter 20 for an in-depth discussion of math errors.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

This schedule is fairly self-explanatory. Complete copies of the original loss year returns, amended returns or prior audit reports reflecting the loss amounts claimed may be required to verify this schedule.

All audits that have either net loss periods or net loss deductions being brought into them MUST have NLD schedules prepared to verify the correct loss application and the amount of NLD available to be carried forward. A screen shot of the NLD schedule from GenTax is not acceptable as an NLD schedule to support the audit results. The most up to date version of the NLD schedule is available in APT. Refer to the APT Reference Guide on the intranet for detailed instructions on accessing “The Bundle” in APT where the management approved INLD schedule can be found. This is the only INLD schedule that should be used and included in an audit file.

V. AUDIT PROCEDURE FOR LOSSES

If an Illinois net loss or federal net operating loss is carried back to prior years, the loss should be audited and the loss carryback verified in the current audit. If the loss is carried forward and the carryforward year is part of the current audit period, then again the loss should be audited and the carryover verified. A loss schedule must be prepared to show the losses and the years to which they are carried.

If the carryforward year is not part of the current audit period because the loss has not yet been carried forward, and the audit only includes INL years, an audit should be completed on the loss year if there is any question regarding the unitary filing or group composition of that year. An audit should also be completed on the loss year when the carryforward years are part of the audit but any adjustment to the loss will not sufficiently reduce the carryforward to create a liability in those years.

A. Limitations on Adjusting IL Net Losses

1. IITA § 905(N) AND 911(H)

Public Act 92-0846 enacted on August 23, 2002, added IITA §§ 905(n) and 911(h). These sections impose additional special limitation periods for adjusting INLs. As originally enacted these new sections were applicable to all returns and audits for which a Notice of Deficiency was issued on or after August 23, 2002, and to all claims filed on or after August 23, 2002.

PA 94-0836 effective June 6, 2006, limited IITA § 905(n) to loss years ending prior to December 31, 2002. This makes the change retroactive and allows the taxpayer or the Department to correct a loss for tax years ending on or after December 31, 2002,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

even if that loss year is expired and no Loss Reduction (LR) letter was provided to the taxpayer.

2. Loss Years Ending On or After December 31, 2002

For audits that include INL carryovers from tax years ending on or after December 31, 2002, the INLs can be adjusted without regard to IITA § 905(n). Therefore for these loss years, including years that are closed to statute, INLs may be adjusted for the following reasons:

- Federal taxable income changes
- Nonbusiness income and modification changes
- Apportionment changes
- Unitary group member changes (if the loss year is within statute)

Taxpayers can increase or decrease their loss year return at any time, but if the carryback or carryforward year is expired, then in order for the statute to reopen on the carry year for refund, the increased INL has to be from an RAR that was reported under IITA § 506(b) on an IL-1120-X within 2 years and 120 days of the RAR finalization date. If the carry year is expired, the INL must still be carried to reduce income and may offset a liability, including an audit liability in the carry year, but no refund will be allowed.

Audit has encountered instances where a federal RAR adjustment for one year lumps together FNOL adjustments from multiple years. Because the federal adjustment is not applied to each year individually, problems may occur when attempting to make Illinois adjustments due to statutes not opening for the years outside the RAR. However, there should still be available documentation from the RAR to justify the adjustments.

EXAMPLE: For 2014 the taxpayer timely files an IL-1120 showing an INL of (10,000) and carries that loss to the 2015 IL-1120 to offset Illinois net income of $20,000. At the time the audit is started the 2014 return is out of statute but the 2015 return is in statute. The auditor examines both years and determines that the taxpayer actually should have reported an INL of (15,000) for 2014 and Illinois net income of $30,000 for 2015. Nothing in the statute prevents the auditor from preparing an IL-1120-X for 2015 and increasing the amount of the INL, and then carrying that loss to another year. Even if the taxpayer does not agree to the audit, the increased (5,000) in INL for 2015 will still be carried forward and used as an offset against the 2015 income in computing the NOD.

EXAMPLE: For 2007 the taxpayer claimed an INL carryover from 2001 of (100,000) and an INL carryover from 2002 of (200,000). The returns for the loss years were timely filed but are now out of statute. The auditor notes that there are questionable

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

items of nonbusiness income claimed for both 2001 and 2002. For 2002 the auditor can adjust any items on the return, except change the unitary group, to reduce the INL carried forward. Under IITA § 905(n), a notice of deficiency cannot be issued for 2007 as a result of the adjustment to the 2001 loss unless the Department issued the taxpayer a LR letter while the 2001 return was in statute.

EXAMPLE: In June of 2017 an audit is started on ABC Corp for calendar years ending 2013 and 2014. The taxpayer was not previously audited. GenTax shows that for 2014 the taxpayer carried over an INL in the amount of (8,000). After reviewing the taxpayers filing history, the auditor discovers that 2011, 2012 and 2013 are non-filed although GenTax shows that $3,000 in estimated payments had been made for both 2012 and 2013. There is no extension for any of these years, so the general 3-year limitations period for refund claims had expired for 2011 and 2012 before the audit commenced and the limitations period for 2013 will expire on October 15, 2017, unless an extension agreement is executed. The auditor determines the following amounts for 2011 through 2014.

ABC Corp	Non-filed	Non-filed	Non-filed	Per GenTax
Description	2011	2012	2013	2014
Federal taxable income	(200,000)	120,000	60,000	300,000
Net modifications	20,000	(30,000)	10,000	(20,000)
Base Income	(180,000)	90,000	70,000	280,000
IL Factor	40.0%	40.0%	40.0%	40.0%
Net Income	(72,000)	36,000	28,000	112,000
INL carryover to 2006	36,000	(36,000)		
INL carryover to 2007	28,000		(28,000)	
INL carryover to 2008	8,000			(8,000)
Subject to tax	0	0	0	104,000
7.3% tax	0	0	0	7,592
Estimated payments	0	3,000	3,000	5,000
Other payments	0	0	0	2,592
Total Payments	0	3,000	3,000	7,592
Pending Refund	0	(3,000)	(3,000)	0

- The auditor will prepare an original IL-1120 for 2011, 2012 and 2013 showing the above figures.
- The 2011 INL must be carried to 2012, 2013 and 2014 and will offset any balance due in the carry years
- No refund of the estimated payments will be permitted for 2012 or 2013,
  -

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The auditor will indicate on the IL-1120 for 2012 and 2013 that the overpayment of $3,000 for each year is not refundable due to IITA § 911(h).
- For 2014 the taxpayer gets only (8,000) of the 2011 INL because the remaining amount must be carried to 2012 and 2013
- No refund is allowed for any year due to the loss year return not being filed within 3 years of the extended due date. (IITA § 911(h))

Note: If there is a future underpayment from an RAR in 2012 and 2013, the $3,000 in estimated payments for that year may be used to offset any additional liability for that year.

3. Loss Years Ending Prior To December 31, 2002

IITA § 905(n) provides that on and after August 23, 2002, no notice of deficiency can be issued as the result of a decrease in the INL incurred by a taxpayer in any taxable year ending prior to December 31, 2002 unless the Department notified the taxpayer of the proposed decrease within the statute of limitations period for the loss year (LR Letter Procedures).

IITA § 905(n) limits the time period for the Department to reduce the amount of INL available to carry. Therefore, upon receipt of an audit assignment, the auditor should immediately determine whether the statute of limitations is open for loss years prior to December 31, 2002 in which the taxpayer has reported an INL. If a loss year ending prior to December 31, 2002 is still within statute, the auditor must secure a waiver on the loss year return before the statute of limitations expires, or issue to the taxpayer the EDA-143-LR letter from GenTax.

IITA § 911(h) provides that on or after August 23, 2002, no claim for refund will be allowed to the extent the refund is the result of an amount of INL incurred in any taxable year ending prior to December 31, 2002 that was not reported to the Department within three years of the extended due date of the loss year return on either the original return filed by the taxpayer or on an amended return. Or, if the refund is the result of an amount of INL incurred in ANY taxable year for which no return was filed within 3 years of the extended due date of the return for the loss year. If the original return is filed more than three years after the extended due date, the INL would still be carried and can offset a balance due in the carry year or to offset an audit or federal change increase in net income. The taxpayer can even pay no estimated tax in a year if the carryforward deduction will eliminate its income for the year. IITA § 911(h) only prohibits using the carryforward to generate a refund in the carry year.

Extra precautions are warranted with audits that have either a loss year as part of the audit period, or have any loss carried into the audit period from tax years ending prior

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

to December 31, 2002. For example, the current audit assignment has a tax impact as a result of decreases to INLs carried over from two different prior audit cycles. The auditor must verify that proper LR notification was given on each loss year ending prior to December 31, 2002, that was changed during each of the prior audit periods. If a proper LR notification on the loss years was:

- Given in the prior audits, a NOD may be issued based on the corrected losses.
- Not given in the prior audits, we are prohibited from issuing a NOD based on the changes from the corrected loss amounts being carried into the current audit. The as-filed loss figures must be used.

a) Loss Year in Statute

If the statute is open for the prior to December 31, 2002 loss year, the auditor must obtain a waiver to extend the statute for those years that will expire within six months. Waivers are necessary for loss years ending prior to December 31, 2002, as well as income years. Waivers on original returns and Federal RAR statutes will allow for changes to the loss year(s) beyond the 3-year period in IITA § 905(n). Refer to Chapter 21 – Extensions – Form IL-872 for further details.

If the auditor obtains a waiver or there is an LR letter on file, adjustments to the losses can be made based upon the audit findings.

- If the taxpayer agrees with the audit, the auditor must obtain a signed IL-1120-X for the loss year reflecting increases or decreases to the loss.
- If the taxpayer disagrees with the audit findings after the auditor has obtained a waiver and completed the audit, the auditor must give the taxpayer the EDA-143-LR letter along with workpapers reflecting the corrected decreased loss amounts.
  - If the audit findings increase an INL, a signed amended return must be obtained.
  - If the taxpayer will not sign an IL-1120-X, the INL increase will not be processed.

b) Loss Year Past Statute

If a loss year ending prior to December 31, 2002, is past statute, the auditor must verify that an audit was completed and proper notification for a decrease to the loss year(s) was given to the taxpayer during the statutory period. Check AIS or GenTax for prior audit history. If there was no prior audit activity, the loss for tax years ending prior to December 31, 2002, cannot be adjusted and the auditor must use the as-filed figures.

If changes were previously made to the losses (LR audits) that the taxpayer did not agree with, the auditor will determine if the changes were made to decrease the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

loss year(s) in accordance with IITA § 905(n). The auditor must determine if the prior audit changes to the losses were made:

- Within 3 years of the extended due date,
- Within the waiver period,
- Due to a timely filed RAR change, or
- Within one year of an amended return.

In the event that the taxpayer disagrees with the audit on the carry year, then there should be documentation in the audit file that the taxpayer was timely notified of the loss reduction.

Proper Notification by any of the following would be acceptable notification of changes to the loss years if made within the required time period:

Unagreed Situations:

- The issuance of an LR letter to the taxpayer (signed or unsigned);
- An unsigned auditor-prepared IL-1120-X;
- EDA-25 auditor's reports reflecting the loss year reduction;
- Any written correspondence to the taxpayer explaining the loss reduction;
- Any written documentation in the EDC-5 that verifies that workpapers were given to the taxpayer on a particular date within the required period;
- Auditor-prepared spreadsheet with loss year reductions,

Agreed Situations:

- The completion of an agreed audit, and
- A timely filed IL-1120-X;

If LR notification was timely issued, notification would be considered given for the loss years listed in the LR letter. If multiple audit cycles have been completed, LR notification must have been issued for each tax loss year in each audit cycle.

LR notification covers the entire unitary group and any members that have been added/deleted from the group in the course of the audit. Verbal notification within the statutory period is not considered adequate notification under IITA § 905(n).

If proper notification was not timely given to the taxpayer, IITA § 905(n) prohibits the Department from issuing a Notice of Deficiency based on a reduction in the Illinois net loss from the amount reported by the taxpayer. That does not entitle the taxpayer to claim a refund based on the carryforward of an erroneous amount of loss. For example, assume the taxpayer reported a $1 million INL in 2000, which it carried to 2001 when it had $3 million in net income before INLD, resulting in net income of $2 million. If the Department fails to issue a timely notification before determining that the taxpayer actually had no loss, the Department cannot issue a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Notice of Deficiency for 2001. However, if the taxpayer has a federal change that reduces its 2001 net income before INLD to $2.5 million, the Department can disallow the refund claim because the taxpayer's correct net income is $2.5 million and it has actually underpaid its tax. If the federal change reduces the taxpayer's 2001 net income before INLD to $0, the Department must allow the refund because the taxpayer is overpaid, but it can deny any refund the taxpayer might claim by carrying forward the 2000 INL "freed up" by the 2001 federal change.

Following is a "Loss Year" flow chart reflecting how IITA § 905(n) will be handled for situations where the Notice of Deficiency has been or will be issued on or after August 23, 2002.

NOTE: THE FLOWCHART BELOW ONLY APPLIES TO LOSSES THAT ARE CARRIED FROM TAX YEARS ENDING PRIOR TO DECEMBER 31, 2002

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. c) Non-Filed Loss Year Returns and Amended Returns Increasing Losses

IITA § 911(h) requires that taxpayers report net losses to the Department within three years of the extended due date for the loss year return. If no original loss return is timely filed or if an amended return increasing a reported loss is not timely filed, the taxpayer cannot claim a refund in a carry year based on applying the unreported loss.

Even though the loss year is past statute, an original return must still be secured to establish the past-statute filing on the system. The INL will be properly carried forward or back, but no refund of tax payments will be allowed in any carry year. The correct amount of loss can be used to reduce or eliminate deficiencies resulting from federal changes or audit changes.

EXAMPLE: NON-FILED LOSS YEAR PAST STATUTE

	~~	**As Filed**	~~~~~~~~	**As Filed**	~~~~~~~~
	2001	2002	2003	2004	2005
	Not Filed	Filed	Filed	Filed	Filed
IL net income/loss	(1,000,000)	(2,000,000)	500,000	1,300,000	800,000
2002 to 2003		500,000	(500,000)		
2002 to 2004		1,300,000		(1,300,000)	
2002 to 2005		200,000			(200,000)
Balances	(1,000,000)	0	0	0	600,000
Original tax paid at 7.3%					43,800
	~~	**Per Audit**	~~~~~~~~	**Per Audit**	~~~~~~~~
	2001	2002	2003	2004	2005
	IL-1120	Filed	Filed	Filed	Filed
IL net income/loss	(1,000,000)	(2,000,000)	500,000	1,300,000	800,000
2001 to 2003	500,000		(500,000)		
2001 to 2004	500,000			(500,000)	
2002 to 2004		800,000		(800,000)	
2002 to 2005		800,000			(800,000)
Balances	0	(400,000)	0	0	0
Tax Overpayment					(43,800)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

For 2001 the taxpayer failed to file their original IL-1120, and the year is now more than three years past the extended due date. On the original returns as filed the taxpayer carried forward their 2002 INL which is all used in 2005 resulting in tax paid in 2005 of $43,800.

The auditor prepares an original 2001 IL-1120, which the taxpayer signs but it is past statute. The auditor will carry the 2001 loss to 2004, but the increased 2002 loss carryover to 2005 results in an overpayment in 2005. Although the 2005 refund is actually due to losses carried over from 2002, it is still the result of the increased loss being carried over from 2001 which is not subject to refund.

The auditor will include the $43,800 overpayment on the 2005 IL-1120-X, but will note in the comments section that the amount is out of statute for refund. An IL-1120-X is used because the EDA-25 and IL-870 are generally only used for an NOD or refund. Since there is no refund, the IL-1120-X for 2005 does not need to be signed by the taxpayer.

If the auditor is adjusting a specific year for an out-of-statute adjustment, that year must also be included in the audit period. If the taxpayer fails to sign the IL-1120 for 2001, the auditor should still carry the 2001 loss.

EXAMPLE – NONFILER FOR LOSS YEAR:

The auditor is assigned an audit on 11/01/2017 for the tax years 12/2014 – 12/2015 with the following information on the original returns:

Tax Years	12/31/2013	12/31/2014	12/31/2015
Statute Date	Non-filer	10/15/2018	10/15/2019
Original Returns:			
Income/Loss	0	250,000	60,000
INL c/f 12/13 to 14	0	(30,000)	
Net Income(loss)	0	220,000	60,000
As Audited:			
Income/Loss	(30,000)	250,000	60,000
INL c/f	30,000	(30,000)	
Balance	0	220,000	60,000

- The taxpayer did not file the 12/2013 return which had a loss of (30,000);
- The 12/2013 INL was claimed on the original 12/2014 return;
- Per IITA § 911(h), the auditor must secure the 12/2013 return prior to three years from the extended due date (10/15/2017), in order for the taxpayer to be able to claim a refund on the 12/31/2014 return;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The INL for 12/2013 will still be carried to 12/2014, but no refund will be allowed for any estimated payments made in 12/2014. The 2013 loss is still carried if the taxpayer will not sign the 2013, IL-1120.

<u>EXAMPLE</u> – PRIOR AUDIT CHANGED LOSS YEAR
NO TAX EFFECT
LR NOTIFICATION ISSUED

- In an audit on the tax years 12/2000 – 12/2002, an INLD was claimed in 12/2000 for a loss carried forward from 12/1998 (statute expired on 10/15/2002);
- The 12/1998 return was previously audited and resulted in a decrease to the loss of $50,000. There was no tax effect for this change in the prior audit;
- The taxpayer did not agree with the prior audit changes, and did not sign an IL-1120-X to reduce the loss.
- The taxpayer was given LR notification within statute on 9/30/2002.
- The taxpayer refused to sign the LR letter, but the prior audit(s) had documentation that proper LR notification was given and commented on the EDC-5;
- The current auditor will be able to utilize the prior audit loss figures because the LR notification was given within the period required by IITA § 905(n).

<u>EXAMPLE</u> – PRIOR AUDIT CHANGED LOSS YEAR
TAX EFFECT
NOTICE OF DEFICIENCY ISSUED

- A current audit was assigned on the tax years 12/2000 – 12/2002;
- A prior audit was conducted on 12/1996-12/1999
- Tax year 12/1996 was an income year, and tax years 12/1997, 12/1998 and 12/1999 were loss years. The auditor had a waiver on the 12/1996 income year until 10/15/2002, but did not include any of the loss years on the waiver;
- On the taxpayer's 12/2000 original return, an INLD was taken from the remaining loss available to be carried forward from 12/1997;
- On their original 1998 return taxpayer made the election to forego any carryback.

Original Returns:					
	12/31/1996	12/31/1997	12/31/1998	12/31/1999	12/31/2000
Statute Date	10/15/2002	10/15/2001	10/15/2002	10/15/2003	10/15/2004
Inc(Loss)	20,000	(75,000)	(5,000)	(10,000)	30,000
97 c/b 96	(20,000)	20,000			
97 c/f 00		30,000			(30,000)
Remaining Inc(Loss)	0	(25,000)	(5,000)	(10,000)	0

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

As Audited:					
	20,000	(15,000)	(5,000)	(10,000)	30,000
97 c/b 96	(15,000)	15,000			
98 c/f 00			5,000		(5,000)
99 c/f 00				10,000	(10,000)
Remaining Inc(Loss)	5,000	0	0	0	15,000

- The prior audit on the 12/1997 return resulted in a decrease to the loss from ($75,000) to ($15,000).
- A tax effect occurred in the prior audit when the loss carry back to 12/1996 was reduced from $20,000 to $15,000.
- The taxpayer did not agree with the changes, did not sign an IL-1120-X to reduce the 12/1997 loss and did not sign an IL-870 for the carryback reduction to 12/1996.
- The 12/1996-12/1999 audit was closed as unagreed and the taxpayer was given LR notification by the prior auditor on 7/1/2002 (past statute);
- A Notice of Deficiency was issued on 8/5/2002 for the 12/1996 tax year (the year of tax impact from the prior audit loss change).
- Since the Notice of Deficiency on the 12/1996 return was issued prior to the August 23, 2002 effective date for IITA § 905(n), the auditor is not bound by the requirements of IITA § 905(n).
- The auditor will still be able to utilize the prior audit corrected loss numbers. IITA § 905(n) does not apply. The 12/2000 return should be corrected to only show the carry forward from 12/1998 and 12/1999.

EXAMPLE – RAR INCREASE TO A LOSS:

- For 12/31/1999, the taxpayer had income and it was the first year of operations
- The taxpayer has a loss on the 12/2000 original return;
- Both original returns were filed by the extended due date;
- The 12/2000 INL was carried back to the 12/1999 return;
- On 12/15/2004, the IRS completes an RAR on 12/2000 increasing their loss by (50,000);
- IITA § 905(n) and 911(h) both apply since the years are prior to December 31, 2002. The RAR holds open the IITA § 911(h) requirement to adjust the loss year, allowing the taxpayer to file an amended return for the loss year.

Tax Years	12/31/1999	12/31/2000
Statute Date	10/15/2003	10/15/2004
Original Return		
Income/Loss	300,000	(100,000)
12/00 INL c/b to 12/99	(100,000)	100,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

	200,000	0
RAR change 12/15/2004		(50,000)

- IITA § 911(h) does not prohibit the RAR change to 12/2000 since the original return reporting the loss was filed within the required 3 years from the extended due date.

  If the normal statute on the carryback year is expired, IITA § 911(g) allows the taxpayer to carry back the additional $50,000 to the 12/1999 return for a refund as long as the amended return is filed within the time period allowed under IITA § 506(b), which is 2 years and 120 days from the federal finalization date.

EXAMPLE – RAR DECREASE TO A LOSS:

- Taxpayer has a loss on the 12/1999 original return and income on 12/2000;
- The 12/1999 INL was carried forward to the 12/2000 original return;
- On 12/15/2004, the IRS completes an RAR on 12/1999 resulting in a decrease to the loss from (100,000) to (80,000)
- The taxpayer did not report the RAR;
- The taxpayer timely sends the auditor an IL-1120-X for the loss year, which the auditor will verify in audit;
- IITA § 506(b) holds open the statute to adjust the loss year.

Tax Years	12/31/1999	12/31/2000
Statute Date	10/15/2003	10/15/2004
Original Return		
Income/Loss	(100,000)	500,000
12/99 INL c/f to 12/00	100,000	(100,000)
	0	
RAR change	20,000	
Corrected Income/Loss	(80,000)	500,000
12/99 INL c/f to 12/00	80,000	(80,000)

The 12/31/1999 (100,000) carry forward to 12/31/2000 will be reduced to (80,000) since the statute is open under IITA § 905(d) for the unreported federal change. IITA § 905(n) does not prohibit the change.

EXAMPLE – MISAPPLIED LOSS CARRYFORWARD:

- A taxpayer has carried losses into the 12/2000 tax-year from two different tax periods: 12/1998 and 12/1999.
- The auditor has a waiver on the 12/2000 return to hold open the statute;
- The auditor agrees with the losses as filed for both years;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The taxpayer has misapplied the loss for 12/1998 by not checking the box to forego the carryback period.

Tax Years	12/31/1996	12/31/1997	12/31/1998	12/31/1999	12/31/2000
Original IL Inc	100,000	50,000	(150,000)	(50,000)	400,000
98 INL c/f 00			150,000		(150,000)
99 INL c/f 00				50,000	(50,000)
Inc/(loss) Remaining	0	0	0	0	200,000

- The 12/1998 loss should have gone back to offset income on the taxpayer's 12/1996 and 12/1997 returns as follows:

Tax Years	12/31/1996	12/31/1997	12/31/1998	12/31/1999	12/31/2000
Original IL Inc	100,000	50,000	(150,000)	(50,000)	400,000
98 INL c/b 96	(100,000)		100,000		
98 INL c/b 97		(50,000)	50,000		
99 INL c/f 00				50,000	(50,000)
Inc/(loss) Remaining	0	0	0	0	350,000

In this example, no changes were made to the loss years. Therefore, IITA § 905(n) and 911(h) do not apply. Since the 12/2000 return is still in statute by waiver, the auditor may correct the 12/2000 return to remove the 12/1998 loss and allow only the carry forward from 12/1999. The statute will not be opened to allow the taxpayer a refund for carrying the loss back to 12/1996. However, EDA-25's should be prepared to show the application of the 12/1998 loss to 12/1996 and 12/1997. The taxpayer is not entitled to a refund for 12/1996 and 12/1997 because they are out of statute.

EXAMPLE – ERRONEOUS REFUND FOR MISAPPLIED LOSS CARRYBACK:

- The audit period is for calendar years 1998, 1999 and 2000.
- The first two years of the audit have income.
- The taxpayer has filed IL-1120-X's for 1998 and 1999 on 10/15/2002 for the loss carryback.
- Both refunds were issued on 3/15/2003.

Tax Years	12/31/1998	12/31/1999	12/31/2000
Statute Date	10/15/2002	10/15/2003	10/15/2004
Original federal Income/Loss	100,000	100,000	(150,000)
Apportionment factor	0.50	0.50	0.50

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Illinois net income/loss	50,000	50,000	(75,000)
C/B claim filed 10/15/2002	(50,000)	(25,000)	75,000
Net income after INLD	-	25,000	-
Amount Refunded	50,000	25,000	

The auditor has determined that the loss was incorrectly carried back because the CPA was unaware that there was a federal Form 1120-X previously filed for 1998 that increased taxable income by $50,000 (assume the X was not the result of an RAR). As a result, the auditor has determined that the loss should have been carried back as follows:

Tax Years	12/31/1998	12/31/1999	12/31/2000
Statute Date	10/15/2002	10/15/2003	10/15/2004
Original Federal Income	100,000	100,000	(150,000)
Non-RAR US 1120-X Adj.	50,000		
Adj. Federal taxable income	150,000	100,000	(150,000)
Apportionment factor	0.50	0.50	0.50
Illinois net income/loss	75,000	50,000	(75,000)
Corrected carryback	(75,000)		75,000
Net income after carryback	-	50,000	-
Erroneous Refund		25,000	

Although there is still no tax due for 1998, there was an erroneous refund issued in 1999.

- EDA-25's and an IL-870 should be prepared to correct the application of the loss.
- Because the federal Form 1120-X for 1998 reduced the loss available to carry to 1999, the acceptance of the return by the IRS is a federal change for 1999
- IITA § 905(d) allows the issuance of an NOD at any time for the resulting deficiency in 1999 if the Department was not notified of the change within two years after the filing date of the report to correct the previously filed return(s).
- There are no changes to the loss year, thus IITA § 905(n) is not applicable.

<u>EXAMPLE</u> – UNREPORTED CAPITAL LOSS:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The taxpayer has an unreported capital loss for the 12/2000 return.
- There are timely waivers with the IRS holding open the statute for the 12/1997 return.
- US1120-X for the 12/2000 return to report the capital loss was filed on 12/30/2002.
- No IL-1120-X is needed for 12/2000 since the capital loss did not change federal taxable income in 12/2000.
- Amended returns to carry back the capital loss to 12/1997 were filed both federally and for Illinois.
- The original 12/1997 Illinois return has a substantial subtraction modification for US Government interest and after applying the capital loss to federal taxable income, the taxpayer now creates an INL.
- The taxpayer will be able to apply the capital loss and receive a refund for 12/1997;
- The taxpayer will be able to carry forward the newly created INL because it was created as a result of a federal change, per IITA § 911(b).
- If the IL-1120-X for 12/1997 is sent to the field for audit, the auditor can make any change to the return to reduce the claim to zero. Since these changes would also change the INL for 12/1997 tax year, any year to which the 12/1997 loss was carried should also be audited to reduce the INL.

EXAMPLE – TAXPAYER FILES AMENDED RETURN PAST 911(H) PERIOD

- The taxpayer timely filed an original return for 12/1995 reflecting a loss and an original 12/1996 return reflecting income with a loss carryforward from 12/1995.
- On 12/5/1999 (past statute), the taxpayer filed an amended return for 12/1995 to increase the loss by $(60,000) due to a missed subtraction modification.
- On 1/20/2003, a federal audit was completed on the 12/1996 return. The taxpayer reported the federal change on an amended return dated 2/10/2003 (within statute).

Tax Years	12/31/1995	12/31/1996
Statute Date	10/15/1999	10/15/2000
Original Return		
Income/Loss	(10,000)	20,000
12/95 INL to 12/96	10,000	(10,000)
Sub Total	0	10,000
Non RAR IL-1120-X	(60,000)	
RAR Change		30,000
Remaining Income(Loss)	(60,000)	40,000

- The auditor should allow the carry forward of $40,000 of the 12/1995 INL to 12/1996 (the original $10,000 plus $30,000 from the RAR Change),

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- The carry forward can only offset the balance due from the RAR.
- Since the 1995 IL-1120-X is past statute and the adjustment is non-RAR, the taxpayer cannot carry the increased INL forward for a refund in the carry year, even if the carry year is within statute.
- The taxpayer did not report the 12/1995 non-RAR changes to the loss year by filing an amended return within the required 3 years from the extended due date per IITA § 911(h).
- When carrying losses GenTax cannot keep track of the portion of overpayments that are nonrefundable; therefore the EDA-25 will have to indicate the portion of the refund that is non-refundable under IITA § 911(h).
- Also see example "NON-FILED LOSS YEAR PAST STATUTE"

B. When to Issue an EDA-143-LR Results – Net Loss Info

1. LR Letter Procedures

If the auditor is correcting an Illinois net loss (INL) or tax credits for a year in which there is no tax liability, and the taxpayer agrees with the changes, the auditor must obtain a signed amended return (not an IL-870) to correct the INL or credits. The taxpayer will then carry over the correct amount of INL or credit based on the amended return.

If the taxpayer does not agree with the auditor's changes for years in which there is no tax liability due, then the taxpayer must be given an EDA-143-LR Net Loss and Credit Reductions. This letter provides written notification to the taxpayer that the Department does not agree with the return(s) as filed. The taxpayer should understand that signing the letter does not indicate agreement with the Department's position; it is merely proof that the taxpayer was notified of the change that will be made to the INL or credit available for carryover. The taxpayer will have the right to protest any change in the carry year in which the adjustment to the loss/credit will create a deficiency.

This letter will be given to the taxpayer at the close of the audit in the event that Illinois net losses or credits have been reduced or eliminated and there was no signed, amended return or agreed auditor's report, or the audit resulted in no additional liability. The auditor must provide the taxpayer with a schedule showing the correct amount of Illinois net losses and/or credits available for carryover. Documentation is crucial given the long time frame allowed for carry over.

a) Separate Unitary

If the taxpayer files separate unitary returns (i.e. separate unitary IL-1120ST), a listing of all of the Illinois filers in the group should be attached to the EDA-143-LR.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

b) Combined Unitary

If the taxpayer files a combined unitary return, only the designated agent needs to be identified on the EDA-143-LR.

If the auditor knows at the time the audit is completed that the INL or credit carryover adjustments will have a tax affect in a subsequent period, then the auditor should extend the audit period to include that subsequent period or order a track for the subsequent period. If there is a gap year that will not be audited, then the auditor will have to request a separate track for that period. If there is no tax effect on a subsequent filed return, either due to negative base income or excess credits, then the subsequent period need not be examined. In that case the audit will be submitted as LR using the procedures outlined above.

Note: There is a taxpayer signature line on the EDA-143-LR; however the taxpayer does not have to sign the form. The taxpayer's signature only indicates proof of receipt. If the taxpayer will not sign it, then the auditor should add a notation at the bottom of the form indicating that the taxpayer received it, the date it was received and the auditor's initials. In addition, a comment should be added to the EDC-5 History Worksheet.

Specific instructions for the EDA-143-LR are found in Audit Manual Chapter 20, Audit Procedures. Refer to the Exhibits section under how to create audit completion letters.

C. Unitary Group Change

Prior to September 29, 2016, Departmental policy prohibited auditors from changing the unitary group as filed in the loss year, IF that year was out of statute to correct. With the revision of 86 IAC § 100.9320, auditors may change the filing status of an out-of-statute loss year if the taxpayer filed as a separate filer and the auditor believes the taxpayer should have been filing as part of a unitary group (or vice versa), or if the auditor disagrees with the unitary group as filed.

In some circumstances, the audit period may contain a current year federal net operating loss or Illinois net loss and the auditor disagrees with the group configuration as filed but a change to the group does not result in additional liability being proposed. (The change merely decreases the amount of applicable loss.) Taxpayer should be notified IN WRITING that the Department does not agree with the loss as calculated and the amount will be adjusted by the Department when it is carried to a succeeding year. An EDA-143-LR Net Loss and Credit Reductions letter will be provided per procedures previously outlined.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

VI. CAPITAL LOSSES

86 IAC § 100.2300(c), applicable to tax years ending December 31, 1986 and after, states that the treatment of capital losses is "separate and apart from the rules governing Illinois net losses and Illinois net loss deductions. Capital losses will continue to be governed by federal provisions." Federal capital loss rules in IRC § 1212 and Regulation 1.1502-22 govern the treatment of capital losses for Illinois, since capital losses are a component of federal taxable income.

Federally, capital losses cannot exceed capital gains for the year. Capital losses may be carried back 3 years and forward 5 years. There is no election to forego the carryback period. A capital loss carryback is limited to the extent of the capital gain in the carry year and may not be used to produce or increase a net operating loss (IRC § 1212(a)(1)(A) (ii)).

Capital loss carryovers are taken into consideration only to the extent that they reduce federal taxable income. They are considered a federal change and would not be allowed for Illinois unless the taxpayer had carried the loss on the federal return. The taxpayer must claim a capital loss carryover within 2 years and 120 days of the federal finalization date. (IITA §§ 506(b) and 911(b)).

If the loss carryback is not identical between federal and Illinois returns or, there is no capital loss for federal purposes, but due to the composition of the unitary group there is a capital loss for Illinois, the taxpayer has 3 years and 20 days from the end of the loss year or 2 years and 20 days from the federal finalization date to carry the capital loss. REF: 86 IAC § 100.2300(c) and 100.5030(b). A waiver on the loss year cannot extend the time frame for carrying an Illinois capital loss. However, if the carry year is still open by waiver, the Illinois capital loss can still be carried.

A. ADJUSTMENT TO CAPITAL LOSS

Capital loss carryback adjustments must be reported on amended returns and include verification of a federal adjustment via RAR and schedules such as Form 1139. Auditors must verify that the capital loss has not been previously carried. In cases where the capital loss was previously carried and the adjustment is changing the carry provisions, all periods that were impacted by the previous carry must be re-evaluated. Furthermore, auditors need to verify when the capital loss became available to be carried and determine what statute date is open to allow the claim.

Copies of federal returns including a Schedule D for both the carry to and from periods should be included in the audit file to verify capital gain/loss amounts.

1. <u>Federal Form 1139</u>

   The federal Form 1139 schedule is used to determine the amount of capital loss being allowed and from which period(s). These amounts are split from other RAR adjustments to differentiate the two from each other. The separation is necessary as any refund from a capital loss carryback claim will only receive refund interest from the date of request (rec'd date of amended return). This also means the capital loss credit will receive the date of request when posted to GenTax and if that credit is not within 120 days from the RAR finalization date, then it is possible that any RAR tax due will be assessed a late payment penalty. Balance due interest will be assessed on the full tax increase and will accrue from the date of underpayment through the date of capital loss credit and/or payment received dates.

B. Creating an INL By Carrying a Capital Loss

Capital losses can be carried back to offset capital gains, up to the amount of federal taxable income, even if an Illinois net loss results. Federally, capital losses are allowed to the extent of capital gains, but cannot increase or create a <u>federal</u> NOL in the carry year. An Illinois net loss can occur when a federal capital loss is carried back to reduce federal taxable income to zero and Illinois reductions to income exist (i.e. subtraction modifications, non-business income, partnership income, etc.).

C. Application of Capital Losses in Unitary Years

When a taxpayer has both separate company years as well as combined unitary carry years, and the members are the same in the unitary carry and loss years, the application of the capital losses can become confusing. Consider the following example.

EXAMPLE:

Capital (Losses)/Gains (Shown in millions)								
Separate			/-----------------**Combined Unitary**----------------\					
	3/12		**3/13**		**3/14**		**3/15**	
	NSI	32	NSI	(4.8)	NSI	27.60	NSI	(33.00)
			NHA	15.6	NHA	59.30	NHA	(25.70)
			NCRA	0.2	NCRA	2.06	NCRA	0.06
			NACC	0.0	NACC	9.80	NACC	0.80
			NGP	<u>2.5</u>	NGP	<u>0.80</u>	NGP	<u>1.00</u>
				13.5		99.56		(56.84)
FTI		10		2.8		194		25

For 3/12, NSI files as a separate non-unitary company. For 3/13 – 3/15, NSI files a combined unitary return with NHA, NCRA, NACC, and NGP. NSI and NHA incurred capital losses in 3/15.

According to 86 IAC § 100.5270(a)(3), unitary filing does not cause losses to become the property of the group. Therefore, several steps must be followed in order to determine the amount of the loss applicable to each company and to determine the amount to apply in each carry year.

- **Step #1:** In the capital loss year, determine the amount of net gains or losses for each member of the unitary group. Then, net the gains against the losses of all the unitary members to arrive at a net capital loss amount for the entire group. In the example this would be a net ($56.84m) for the group.

- **Step #2:** Pro-rate the capital loss among the loss members of the group. The losses belong to each company; the regulations on combined reporting do not change this. Therefore, each company would own its loss minus its allocated share of the group's gain from that year. Pro-ration is done according to IRS Regulation 1.1502-22(b)(3) (or 1.1502-79A(b)(2) for years prior to 1/1/97). For the example, this would be:
  NSI 33/58.7 x 56.84 = $31.95m
  NHA 25.7/58.7 x 56.84 = $24.89m

- **Step #3:** Carry back the loss to any separate-company years for the individual members that are unitary in the loss year. Three limits must be considered in carrying back the capital loss:
  - the total amount of loss available,
  - the total amount of gain in the carry year, or
  - the total amount of federal taxable income for the company in the carry year, whichever is smallest.

  For the example, NSI would carry back ($10m) loss to offset the 3/12 gain, since the FTI limit amount is the smallest of the three limits. This leaves ($21.95m) ($31.95m available – $10m applied to 3/12) available for NSI to carry forward into unitary years. The other members of the example did not have separate company years, so the first year to apply their losses would be 3/13.

- **Step #4:** Carry the remaining capital losses for the companies into unitary years. Again, three limits must be considered:
  - the amount of loss available for each company,
  - the gain amount for each company in the carry year, and
  - the total amount of federal taxable income for the group in the carry year, whichever is smallest.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

First look at each individual company in the unitary carry year, offsetting up to the limits. Then, look at the entire group, taking into consideration the federal taxable income limit for the group. Capital losses of one member can be offset against the capital gains of other members of the unitary group (following IRS Regulation Section 1.1502-22) as if the Illinois unitary group constituted a federal consolidated group. For the example, we first look at NSI and NHA. NSI has a capital loss for 3/13, so nothing would be offset from its 3/15 loss. The remaining ($21.95m) capital loss for NSI will be carried into the next available year, 3/14. NHA has a gain of $15.6m in 3/13, but the federal taxable income for the group is only $2.8m, so the $24.89m loss available is limited to a ($2.8m) carryback. The remaining ($22.09m) for NHA should be carried into 3/14. When applying the remaining 3/15 capital loss into 3/14, NSI has a gain of $27.6m, but only a loss available of ($21.95m). NSI is limited to the ($21.95m) loss it has remaining. NHA has a gain of $59.3m, but only a remaining loss of ($22.09m), so it is limited to carry only ($22.09m). After these applications, the 3/15 capital loss is absorbed in full. Below is the application in table form:

Application of 3/15 losses:

	NSI	NHA	Applied
Loss available	(31.95)	(24.89)	
Apply to 3/12	10.00	-0-	10.00
	(21.95)	(24.89)	
Apply to 3/13	-0-	2.80	2.80
	(21.95)	(22.09)	
Apply to 3/14	21.95	22.09	44.04
	-0-	-0-	56.84

1. Application Of Capital Losses When Members Are Not Common

Another difficulty arises in the application of capital losses when members are not common in the loss and carry years.

The following example illustrates how this is handled:

EXAMPLE:

3/12	3/13	3/14	3/15
A 32M	A 6M	A 26M	A (33M)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

		B 1M C 3M	B 20M	B (23M)
Total Gain/Loss	32M	10M	46M	(56M)
C's Separate Loss				C (4M)
FTI	10M	20M	197M	

In this example, for 3/12, company A files separately, and companies B & C do not exist. For 3/13, A, B, and C file as one unitary group. For 3/14 and 3/15, A and B are one unitary group and C is a completely separate company. The A/B unitary group and separate company C both incur capital losses in 3/15.

The members of the group do not have to be common in the loss and carry years. To carry the capital loss, the same steps would be followed as shown in the section above. However, when it comes to step #4, carrying the loss into the unitary years, some additional considerations have to be made. There are still three limits:

- the amount of loss available for each company,
- the gain amount for each company in the carry year, and
- the total amount of federal taxable income for the group in the carry year, whichever is the smallest of these three.

First looking at the common members between the loss and carry year, apply enough of each member's own losses to offset total gains. Then looking at the members who filed separately in the loss year, but unitary in the carry year, apply their capital losses to offset their gains. After these applications, look at the limits from a group perspective. If the group limit has not yet been reached with the individual company amounts, and more gain is available to be offset up to the limit amount, the gain is offset by other members' losses on a pro-rata basis.

For the example, A will carry back ($10m) to offset its separate company income in 3/12. Neither B nor C existed in 3/12, so their first year available to carry is 3/13. The common members between the loss year and the carry year are A and B. ($6m) would be applied from the ($23m) remaining for company A. ($1m) would be applied from the ($23m) available for company B. The separate company is C, and ($3m) would be applied from C's total ($4m) capital loss. The total federal taxable income is $20m, and the total amount of loss available for the group is ($50m) ($33m from A + $23m from B + $4m from C - $10m offset by A to 3/12), so the smallest limit is the $10m capital gain amount. The limit is met by the loss applications on an individual basis. After this application to 3/13, ($17m) capital loss would remain available to carry into 3/14 for A, ($22m) for B and ($1m) for C.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

To illustrate the pro-rata offset by other members, following are three additional scenarios:

Scenario 1
Assume the information above remains the same, except that company C had a loss of only ($2m) in 3/15. All the steps in the previous paragraph would be the same, except C would only be able to offset $2m of the $3m gain, leaving $1m which has not been offset. If we look at the limit amounts from a group perspective, the smallest of the three limits is the $10m group capital gain amount, and only $9m has been offset ($6m from A, $1m from B, and $2m from C) so far. An additional $1m offset would be made on a pro-rata basis from the other loss companies. (33/56 x $1m = $590,000 from company A, and 23/56 x $1m = $410,000 from company B).

Scenario 2
Assume that the information remains the same, except that company C has a gain instead of a loss in 3/15. Thus, C would not have any loss to offset against its 3/13 gain. Company A would offset its $6m gain and company B would offset its $1m gain in 3/13. Since the group limit is still the $10m capital gain, and only $7m has been offset on an individual basis, A and B would carry additional loss back to offset the $3m from C. (33/56 x $3m = $1,770,000 from A and 23/56 x $3m = $1,230,000 from B).

Scenario 3
Assume that the information remains the same, except that companies A and B have gains rather than losses in 3/15. Only C would have loss available to carry back. The entire ($4m) loss from C for 3/15 would be carried back to offset the group's gain in 3/13.

D. Capital Losses & NOL'S Carried to Same Year

Since both capital losses and net operating losses may be carried back and forward, there could be situations in which both types of losses are carried to the same year. Whether there is a federal net operating loss involved or an Illinois net loss involved, the following paragraphs will apply.

The capital loss even if it is not the earliest year's loss must be carried first since it is an adjustment to federal taxable income.

EXAMPLE:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Company A incurs a federal NOL in 2005, has an INL in 2006 and incurs a capital loss that cannot be absorbed by capital gains in 2008. None of these losses can be used in years prior to 2005 and there are no capital gains in 2005 and 2006 which can offset the capital loss. The 2008 capital loss would be applied to the 2007 capital gain. The FNOL from 2005 would be carried to 2007 and 2008. Illinois net income would be determined for 2008 and the 2006 INL would be carried.

	12/31/2005	12/31/2006	12/31/2007	12/31/2008
FTI (Loss)	(100,000)	(100,000)	100,000	200,000
Capital Gain (Loss)			15,000	(10,000)
C/B 2008 Cap Loss			(10,000)	10,000
FTI/(Loss)	(100,000)	(100,000)	90,000	200,000
C/F 2005 NOL	100,000		(90,000)	(10,000)
Remaining Inc(loss)	-0-	(100,000)	-0-	190,000
Apportionment		.90	.80	.75
IL Net Inc/(loss)		(90,000)		142,500
C/F 2006 I NL		90,000		(90,000)
Income after Loss		-0-		52,500

If an RAR is finalized, the losses would be reapplied after the adjustments for the RAR as follows:

	12/31/2005	12/31/2006	12/31/2007	12/31/2008
FTI (Loss)	(100,000)	(100,000)	100,000	200,000
RAR Change		25,000	10,000	50,000
Capital Gain (Loss)			15,000	(5,000)
C/B 2008 Cap Loss			(5,000)	5,000
FTI/(Loss)	(100,000)	(75,000)	105,000	250,000
C/F 2005 NOL	100,000		(100,000)	
Remaining Inc(loss)	-0-	(75,000)	5,000	250,000
Apportionment		.90	.80	.75
IL Net Inc/(loss)		(67,500)	4,000	187,500
C/F 2006 I NL		67,500	(4,000)	
				(63,500)
Income after Loss		-0-	-0-	124,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A federal capital loss carryback is considered before an INL carryback from the same year, since the federal capital loss would offset the capital gain changing the amount of Illinois net income available to be offset by the INL carryback. REF: 86 IAC § 100.2300(c).

A federal capital loss carryback may not increase or produce a federal net operating loss under IRC § 1212(a)(1)(A)(ii). However, it is possible that the capital loss carryback could create an INL in the carryback year.

E. Nonbusiness Income for Capital Gains/Losses

Federal income tax law requires capital gains and losses to be matched against each other in a manner that affects the determination of base income. However, even though capital gains and losses are netted together prior to Illinois line one, it is necessary to make a business/nonbusiness income determination for each separate item of gain or loss. Each item of gain or loss must be allocated or apportioned according to its Illinois characterization, without regard to whether it is used to offset another item in the computation of federal taxable income and Illinois base income. (REF: 86 IAC § 100.3010)

The determination of the business/nonbusiness nature of each separate capital gain or loss must be made in the year it was incurred. See Audit Manual Chapter 26 for further information on business/nonbusiness determination. Once the determination has been made, the gain/loss will retain that characteristic as it flows through the Illinois return. In addition, losses retain their classification in the carry years. If there has been a nonbusiness determination for a capital loss, then for the carry year it would remain a nonbusiness loss. The same applies to a capital loss that is found to be a business loss. No "re-determination" is made in the carry years.

Even though we make a determination of business/nonbusiness for the capital gains/losses, in computing Illinois line one, we still offset the full amount of capital gains against any available capital losses, regardless of their classification. Each item of capital gain or loss (including capital losses that have been carried back/forward from another year) that has been classified as nonbusiness will be deducted from base income. Any Illinois nonbusiness capital gain/loss will then be allocated back.

Often, there will be situations when both business and nonbusiness gains and losses net to a capital loss in the capital loss year. The question then arises as to how much of the remaining capital loss is business and how much is nonbusiness. Following are three examples detailing the pro-ration method:

Example:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In Year 2, Taxpayer (TP) has $300,000 taxable income that consists of the following items:

Ordinary income	$300,000
Capital gain (business)	$ 20,000
Capital loss (business)	$ 60,000
Capital loss (nonbusiness)	$ 40,000

Taxable income is $300,000 because of the limitation on capital losses as explained above. TP has a capital loss carryover of ($80,000). IITA § 301(c) provides for the allocation only of items "taken into account" in the computation of base income. We must figure out how much of TP's ($60,000) business capital loss and how much of its ($40,000) nonbusiness capital loss were "taken into account" in computing base income. This is when we must use the pro-rata method: 60/100 X 20 = 12; 40/100 X 20 = 8. The result is that TP has an ($8,000) nonbusiness loss in Year 2 that must be specifically allocated. TP's base income therefore consists of business income of $308,000 and a nonbusiness loss of ($8,000).

Next, assume TP has a $50,000 capital gain in Year 1 that TP offsets with the Year 2 capital loss carryback. By using the pro-rata method again, we can determine the business and nonbusiness portions of the carryback. Based on the same facts, the business income portion of the carryback would be calculated as follows: (60-12)/80 X 50 = 30. Likewise, the nonbusiness income portion would be calculated similarly: (40-8)/80 X 50 = 20.

Following is the impact on the Illinois returns for Year 1 and Year 2:

CAPITAL LOSS SCHEDULE	**Year 1**	**Year 2**		
	Gain	Gain	Loss(bus)	Loss(Nbus)
Capital Gain	50,000	20,000		
Capital loss (bus)			(60,000)	
Capital loss (nonbus)				(40,000)
Application of Cap Losses:				
Yr 2 to current yr Cap Gain		(20,000)	12,000	8,000
Remaining to carry		0	(48,000)	(32,000)
Yr 2 c/b to Yr 1	(50,000)		30,000	20,000
Remaining to carry	0		(18,000)	(12,000)

	Year 1	**Year 2**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Illinois Return:		
IL Line 1	100,000	300,000
Modifications	0	0
Base Income	100,000	300,000
Less: Nonbus Inc./(loss)	(20,000)	(8,000)
Business Income	120,000	308,000
Apportionment	X 1.0	X 1.0
Business Inc. appor. to IL	120,000	308,000
Nonbusiness inc alloc to IL	(20,000)	(8,000)
Base inc. allocable to IL	100,000	300,000

Example:

In Year 2, TP has $500,000 taxable income that consists of the following items:

Ordinary income	$500,000
Capital gain (business)	$ 40,000
Capital gain (nonbusiness)	$ 10,000
Capital loss (business)	($ 70,000)
Capital loss (nonbusiness)	($ 30,000)

Taxable income is $500,000 because of the limitation on capital losses as explained above. TP has a capital loss carryover of ($50,000). IITA §301(c) provides for the allocation only of items “taken into account” in the computation of base income. We must figure out how much of TP’s ($70,000) business capital loss and how much of its ($30,000) nonbusiness capital loss were “taken into account” in computing base income. This is when we must use the pro-rata method: 70/100 X 50 = 35; 30/100 X 50 = 15. The result is that TP has a ($15,000) nonbusiness loss in Year 2 that must be specifically allocated. TP’s base income therefore consists of business income of $505,000 ($500,000 ordinary income, plus $40,000 capital gain, minus ($35,000) capital loss) plus $10,000 in nonbusiness capital gains and ($15,000) in nonbusiness capital losses which must be separately allocated.

Next, assume TP has an $80,000 capital gain in Year 1. TP is limited to the remaining ($50,000) capital loss carryback for Year 2. By using the pro-rata method again, we can determine the business and nonbusiness portions of the carryback. Based on the same facts, the business income would be calculated as follows: (70-35)/50 X 50 = 35. Likewise, the nonbusiness income would be calculated similarly: (30-15)/50 X 50 = 15.

Following is the impact on the Illinois returns for Year 1 and Year 2.

CAPITAL LOSS SCHEDULE	**Year 1**	**Year 2**

	Gain(bus)	Gain(both)	Loss(bus)	Loss(Nbus)
Capital Gain (bus)	80,000	40,000		
Capital Gain (nonbus)		10,000		
Capital loss (bus)			(70,000)	
Capital loss (nonbus)				(30,000)
Application of Cap Losses:				
Yr 2 to current yr Cap Gain		(50,000)	35,000	15,000
Remaining to carry		0	(35,000)	(15,000)
Yr 2 c/b to Yr 1	(50,000)		35,000	15,000
Remaining to carry/offset	30,000	0	0	0

	Year 1	**Year 2**
Illinois Return:		
IL Line 1	100,000	500,000
Modifications	0	0
Base Income	100,000	500,000
Less: Nonbus Inc./(loss)	(15,000)	(5,000)
Business Income	115,000	505,000
Apportionment	X 1.0	X 1.0
Business Inc. appor. to IL	115,000	505,000
Nonbusiness inc alloc to IL	(15,000)	(5,000)
Base inc. allocable to IL	100,000	500,000

Example:

In Year 2, TP has $300,000 taxable income that consists of the following items:

Ordinary income	$300,000
Capital gain (business)	$ 20,000
Capital loss (business)	($ 60,000)
Capital loss (nonbusiness allocable to Illinois)	($ 30,000)
Capital loss (nonbusiness allocable to Indiana)	($ 10,000)

The amount of each capital loss taken into account is: 60/100 X 20 = 12; 30/100 X 20 = 6; 10/100 X 2 = 2. TP would have business income of $308,000; ($6,000) in nonbusiness

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

capital loss allocable to Illinois and ($2,000) in nonbusiness capital loss allocable to Indiana.

Following is the impact on the Illinois return for Year 2.

CAPITAL LOSS SCHEDULE	Year 2			
	Gain (bus)	Loss(bus)	Loss(Nbus-IL)	Loss(Nbus-IN)
Capital Gain (bus)	20,000			
Capital loss (bus)		(60,000)		
Capital loss (nonbus - IL)			(30,000)	
Capital loss (nonbus - IN)				(10,000)
Application of Cap Losses:				
Yr 2 to current yr Cap Gain	(20,000)	12,000	6,000	2,000
Remaining to carry	0	(48,000)	(24,000)	(8,000)

	Year 2
Illinois Return:	
IL Line 1	300,000
Modifications	0
Base Income	300,000
Less: Nonbus Inc./(loss)	(8,000)
Business Income	308,000
Apportionment	X .90
Business Inc. appor. to IL	277,200
Nonbusiness inc alloc to IL	(6,000)
Base inc. allocable to IL	271,200

VII. DISCHARGE OF INDEBTEDNESS

Under federal law, if a business cannot repay a debt, the borrower must pay tax on the “discharge of indebtedness” income. Because the business’s inability to pay the debt is almost always the result of losses that the business deducts and the discharge of the debt is also deductible by the lender, this rule is necessary to prevent the same economic loss from creating two deductions. When the business is bankrupt or insolvent, it is not required to pay tax on the income. Instead, the double deduction is eliminated by requiring the business to reduce its basis in assets, federal capital loss carryforwards and federal net operating loss (NOL) carryforwards. This is a fair solution, because no tax is payable unless the business

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

recovers and has income in future years. Reductions in asset basis and capital loss carryforwards automatically flow through to the computation of base income for all taxpayers, and reductions in NOL carryforwards flow through to the base income computation for individuals. However, reductions in NOL carryforwards do not affect base income of non-individuals because Illinois has decoupled from federal NOL carryovers. Nevertheless, the Department has taken the position that taxpayers were required by federal law to similarly reduce their state tax attributes.

A. IITA § 207

IITA § 207(c) provides that a taxpayer required to reduce a federal NOL or federal NOL carryover under IRC § 108(b)(2)(A), on account of discharge of indebtedness income excluded from gross income under IRC § 108(a) with respect to a taxable year ending on or after December 31, 2008, must reduce its INL incurred in the year of the discharge or any INLs carried over to that year.

B. 86 IAC § 100.2310

86 IAC § 100.2310(c)(2) states that the amount of a taxpayer's federal attribute reduction allocable to Illinois is computed by multiplying the reduction to the taxpayer's federal NOL or federal NOL carryover by the ratio of the excluded discharge of indebtedness income that would have been allocated and apportioned to Illinois but for the exclusion over the total amount of excluded discharge of indebtedness income.

For example, assume a taxpayer's apportionment factor is 50%, and that the taxpayer is required under federal income tax law to reduce a federal NOL from ($100) to $0 because it has excluded discharge of indebtedness income. In this scenario, the taxpayer would be required to reduce any INL for the same taxable year by the lesser of $50 or the amount of the INL for the year.

The regulations make clear that any reduction required to be made to an INL depends on whether the taxpayer was required to reduce a federal NOL, while any reduction required to be made to an INL carryover depends on whether the taxpayer was required to reduce a federal NOL carryover. See 86 IAC § 100.2310(c)(5)(C).

For example, assume a taxpayer has an INL for the taxable year of discharge, but no INL carryovers to that taxable year. Assume further that for federal purposes the taxpayer has positive federal taxable income for the taxable year of discharge, but is required under IRC § 108(b) to reduce a federal NOL carryover to that taxable year. Under IITA § 207(c), no reduction is required to the taxpayer's INL because no reduction was made to a federal NOL for that taxable year, even though the taxpayer was required federally to reduce a federal NOL carryover to that taxable year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Discharge of indebtedness is reported in Step 5 on Line 36 of the 2010 (and subsequent) IL-1120. Instructions on the form indicate that taxpayers are required to attach a federal Form 982, Reduction of Tax Attributes Due to Discharge of Indebtedness, when reporting amounts on this line.

VIII. HISTORICAL EXTRACTS

A. Federal Net Operating Losses

Illinois Net Losses were created by PA 84-1042 which added IITA § 207 effective for tax years ending on or after December 31, 1986. IITA § 207 resulted in Illinois completely decoupling from recognition of federal net operating losses incurred for tax years ending December 31, 1986 and after. 86 IAC § 100.2050 along with sections 100.2300 through 100.2350 were adopted October 16, 1987, setting forth the rules for applying the statute.

In computing a federal net operating loss (FNOL), there are certain limitations that apply and changes to limitations that normally apply when a FNOL is not involved:

- Net capital losses cannot be used in the computation of a FNOL just as they cannot be used to reduce taxable income.

- Charitable contribution limitations apply. Charitable contributions are limited to 10% of taxable income (5% for years ending on or before December 31, 1981) computed in accordance with IRC § 170 and, for members of a unitary group, 26 CFR § 1.1502-24. See Chapter 24 for further discussion of the charitable contribution limitation.

- A net operating loss deduction (NOLD) is not allowed. A net operating loss deduction occurs when a FNOL is carried to another year.

- The dividends received deduction is not limited when a NOL occurs. (Normally, this deduction is limited to 85% of taxable income for dividends received or accrued prior to 1987 and 80% for dividends received or accrued in 1987. For years after 1987, the deduction is limited to 80% for dividends received from corporations owned at least 20% by the recipient or 70% for dividends received from less than 20% owned corporations. Ref: IRC § 243.)

EXAMPLE:

Gross Profit	$500,000
Dividends	150,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Gross Income	650,000
Expenses	625,000
Taxable income before special deductions (Line 28)	25,000
Minus: Ded. for div. Received (NOT LIMITED TO 85% OF 25,000) (Line 29(b))	127,500 (85% of $150,000)
Net Operating Loss	($102,500)

For more information regarding the computation of FNOLs, refer to IRC § 172.

B. Illinois Treatment of FNOL'S

For tax years ending prior to December 1, 1983, the Department did not allow line 1 of the Illinois return to be less than zero. If the taxpayer reported a FNOL on line 1, the loss could be used to offset the excess Illinois addition modifications over subtraction modifications in the loss year and also carry the same loss either back or forward and offset income in another year. This created a double benefit.

As a result of various decisions in the Madison Park Bank and Chicago Title and Trust court cases, effective December 1, 1983 and after, an amendment to IITA § 203(e)(1) allowed line 1 to be negative and reflect the current year's NOL. See Chapter 49 for synopsis of the court cases. However, it is restricted by IITA § 203(e)(1) to the current year's NOL, which is computed by taking federal line 28 (federal taxable income (loss) before NOL deduction and special deductions) minus federal line 29(b) (special deductions).

EXAMPLE:

Federal 1120:

	1983	**1984**
L28	(10,000)	(9,000)
L29a	(15,000)	
L29b	(5,000)	(4,000)
L30	(30,000)	(13,000)

Illinois 1120:

	1983	**1984**

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

L1	(15,000)	(13,000)

Prior to 1983, the taxpayer could claim an NOLD on the federal return in a year in which there was an NOL. However, in 1983, the instructions to the federal return were changed to state that no NOLD is allowed in a year in which the taxpayer already has a loss. An NOL cannot reduce line 30 to less than zero. However, you may still see federal returns with an NOL and an NOLD as detailed in the above example.

1. Three Stages of Illinois Law Regarding Negative Line 1

The various cases and laws described in the preceding paragraphs can be summarized as follows:

a) FOR TYE ON OR AFTER 8/1/69 THROUGH TYE ON OR BEFORE 11/30/83:

- Federal taxable income (Line 1 of the IL-1120) can be reported as a negative amount in both the loss and carry year (result of Chicago Title court case).
- The federal net operating loss deduction must be decreased by the amount of excess Illinois addition modifications which were offset in the loss year by the federal net operating loss. This adjustment insures that double deductions (prohibited by IITA § 203(g)) do not occur.

b) FOR TYE ON OR AFTER 12/1/83 THROUGH TYE ON OR BEFORE 12/30/86:

- Federal taxable income (Line 1 of the IL-1120) can be a negative amount, but not in excess of the amount of the FNOL incurred in the current loss year only. (IITA § 203(e)(1))
- An addition modification must be claimed in the carry year for the amount of excess Illinois addition modifications (i.e. addition modifications less subtraction modifications) which were offset in the loss year by the FNOL. (IITA § 203(b)(2)(E))
  REF: PA 83-951

  For discussion of the NOL addition modification, please refer to Chapter 24.

c) FOR TYE ON OR AFTER 12/31/86:

- Federal taxable income reflected on Line 1 of the IL-1120 can be a negative amount in both the loss and carry year. (IITA § 203(e)(1))

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Federal NOLD from losses occurring in tax years ending December 31, 1986 and after must be added back to base income. (IITA § 203(b)(2)(D)) This adjustment is made on a worksheet in the instructions for Form IL-1120 and results in the federal NOLD to simply be deleted from the calculation of federal taxable income.

- Federal NOLD's carried forward from tax years ending prior to December 31, 1986 may be applied to offset excess addition modifications in the carry year, to the extent the FNOL has not previously been used for Illinois purposes and to the extent that the adjustment does not create negative Illinois base income. (IITA § 203(e)(1)) This adjustment is claimed on Line 5g, Part I of Form IL-1120 and must be supported by Schedule NL-5g (Schedule UB/NL-5g, for unitary filers).

- The federal NOLD must be reduced by the amount of excess addition modifications which were offset in the loss year. (IITA § 203(b)(2)(E)) This adjustment is also claimed on Line 5g, Part I of Form IL-1120 and is supported by Schedule NL-5g (Schedule UB/NL-5g, for unitary filers).

Note: Schedules NL-5g and UB/NL-5g are included in the Illinois Package X until 2000 which is available in each district office. These forms are not available on the internet.

2. Unitary NOL Regulations

On April 24, 1984, regulations were enacted describing Illinois' treatment of federal NOLs and NOLDs. The regulations encompass 86 IAC § 100.2200 through 100.2250 and are retroactive to August 1, 1969. REF: 86 IAC § 100.2210(b)(1). The main points of these regulations follow.

a) Current NOLs Offset Current Income

The current NOLs of members will be used to offset the current income of the other group members. REF: 86 IAC § 100.2220. To the extent the current loss is offset by current income, no carryback or carryforward of that loss is allowed. REF: 86 IAC § 100.2230(a).

EXAMPLE:

CORPORATION A	200,000
CORPORATION B	300,000
CORPORATION C	500,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

CORPORATION D	(150,000)
UNITARY INC	850,000

Corporation D's NOL for the year has been offset by the income of the other members of the unitary business group (UBG) and therefore, there is no NOL to be carried to another year.

b) Limitations 1 and 2

86 IAC § 100.2230(b) sets forth specific limitations to be applied to the amount of federal loss that the individual member can carryback or forward to any applicable year. These limitations are sometimes referred to as Limitation 1 and Limitation 2. Specifically, these regulations state that the individual member's losses that can be carried to another year are limited to the lesser of:

(1) The sum of the federal taxable income and NOLs in the year to which the loss is carried for the members that are the same in the loss year and the carry year (hereinafter referred to as the "common" members). OR

(2) The combined federal taxable income for the unitary group in the carryback or carryforward year.

EXAMPLE:

1983	**CO. A**	**CO. B**	**UBG**	
	(20,000)	(10,000)	(30,000)	
1984	**CO. A**	**CO. B**	**CO. C**	**UBG**
	10,000	5,000	1,000	16,000

Limitation 1 is 15,000.

Limitation 1 is computed using the income of Companies A and B in 1984 since they are the common members in the loss and carry year.

Company A	$10,000
Company B	5,000
Limitation 1	$15,000

Limitation 2 is 16,000, which is the income of the unitary business group in the carry year.

In this example, Companies A and B will be allowed to carry forward 15,000 of the 1983 NOL (the lesser of limitations 1 and 2).

86 IAC § 100.2230(c) further explains the above limitations. This section includes an explanation of the application of limitation no. 1 for years in which a separate basis loss is incurred. In this circumstance, the amount to be carried is limited to the income of that separate member in the carry year (since this company would be the only common member in the year of the loss and in the carry year).

EXAMPLE:

1980	Co. A
NOL	(30,000)

1981	Co. A	Co. B	Co. C	UBG
FTI	l,000	15,000	30,000	46,000

Under 86 IAC § 100.2230(b) and (c), Company A is limited to a carryforward of $1,000. Limitation 1 for Company A is $1,000 - since A is the only common member in the loss and carry year. Limitation 2 is $46,000 - the income of the UBG for the carry year. Limitation 1 is the lesser of these limitations - therefore, $1,000 may be carried forward.

A pre-12/31/86 NOL carried to a post-12/30/86 combined Illinois return will be allowed to offset the total base income of common members (as limited by 86 IAC § 100.2230(b))

c) 100% Unitary Business Groups

For years ending prior to December 31, 1986, companies involved in a unitary business relationship were not allowed to file a unitary tax return if 100% of their operations were in Illinois. For years ending December 31, 1986 and after, this section was amended to remove this restriction and allow these same companies to file a unitary return. The Department has taken the position that the proper method of determining the limitations of carryback or carryforward losses of these members is to apply Limitation 1 of 86 IAC § 100.2230(b). Limitation 2 would also apply in carrying losses of 100% Illinois unitary business groups.

EXAMPLE:

Company A and Company B meet all the criteria for a unitary business group. The operations of both companies are conducted entirely within Illinois. For the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

year ended 12/31/85, both companies were restricted by IITA § 1501(a)(27) from filing unitary returns

YR	CO A	CO B	UBG
85	(1,000)	400	N/A
86	200	500	700

Companies A and B would be considered common members in the loss and income year. Limitation 1 and 2 would both be $700 with ($300) of the net operating loss remaining to be carried to a subsequent year. (The total amount of the loss allowed to be carried forward is not restricted - the entire ($1,000) NOL can be carried forward to applicable years.)

The above application will ONLY be made in those situations where the SOLE reason a unitary return could not be filed was because of the 100% Illinois filer restriction of then Section 1501(a)(27). In circumstances where the unitary determination is difficult due to incomplete records or insufficient data, the auditor should seek further guidance from the supervisor. In some cases, the determination for the current years may be used as a guideline to the determination of the loss years. If, for example, the auditor has determined that taxpayers do NOT compose a unitary group for the current period, the same criteria should be verified for the loss years and the proper limitations applied depending on the outcome of this research.

EXAMPLE:

Companies A, B and C were 100% Illinois filers and filed separate Illinois returns in 1985. None of the companies had a common parent and no one individual or entity controlled or owned more than 50% of the companies in 1985. In 1986, Company P acquired 80% control in each company and all four companies filed a combined Illinois return in 1986. The federal taxable income of each company in the applicable years was as follows:

1985 Separate		1986 UBG	
Company A	$10,000	Company A	$20,000
Company B	(15,000)	Company B	3,000
Company C	(20,000)	Company C	(1,000)
		Company P	5,000
		Total	$27,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Since Companies A, B and C would not have been eligible to file a unitary return in Illinois as a result of not meeting the common ownership requirement, limitations 1 AND 2 are applicable. Company B's carryforward would be ($3,000) of its 1985 net operating loss to 1986 under Limitation 1. Company C's carryforward would be zero in 1986 due to Limitation 1 since Company C incurred a net operating loss in 1986.

The application of the limitations stipulated by 86 IAC § 100.2230(b) are shown in the paragraphs that follow.

d) More Examples Of Limitation 1 And 2

(1) Same Unitary Group Members In Loss And Carry Year

Calculate the amount of the current NOL. (Current NOLs offset current income). Compare the members that are in the group in the loss year to the members that are in the group in the carry year. If these members are the same, the amount of loss carried is limited to the income of the unitary group in the carry year (Limitation 2).

1983	**CO. A**	**CO. B**	**CO. C**	**UBG TOTAL**
FTI	(20,000)	10,000	(5,000)	(15,000)
1984				
FTI	10,000	10,000	1,000	21,000
NOLD				(15,000)
REMAINING 1984 INCOME				6,000

The members (A, B & C) in the loss year (1983) are the same in the carry year (1984). The unitary business group in 1984 has sufficient income to totally offset the NOL carryforward.

(2) Unitary Group Members Different In Carry Year

1983	**CO. A**	**CO. B**	**CO. C**	**UBG TOTAL**
FTI	(20,000)	10,000	(5,000)	(15,000)
1984				
GRP 1	**CO. A**	**CO. D**		**UBG TOTAL**
FTI	2,000	8,000		10,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

GRP 2	CO. B	CO. C	UBG TOTAL
FTI	4,000	2,000	6,000

The loss year members are not in the same unitary group in the carry year. Therefore, the loss must be prorated among the group members that incurred the loss as follows:

Companies A and C incurred the losses. These losses are added together.

Co. A	(20,000)
Co. C	(5,000)
TOTAL	(25,000)

Next, divide each company's individual loss by the total loss and multiply this percentage by the unitary group's loss:

Co. A (20,000)/(25,000) = 80% X (15,000) = (12,000)

Co. C (5,000)/(25,000) = 20% X (15,000) = (3,000)

Company A has a (12,000) NOL it can carry to another year and Company C has a (3,000) NOL to carry.

The two limitations should be applied to calculate the correct amount of NOL to be carried to each group. For Group 1 – Co. A is the common member. Limitation 1 is $2,000 and Limitation 2 is $10,000. Co. A can carry ($2,000) of its 1983 loss to offset Group 1's 1984 income. Co. A has ($10,000) of NOL remaining to carry to future years. The carryforward to 1984 for Group 1 would be:

GRP 1	CO. A	CO. D	UBG
FTI	2,000	8,000	10,000
NOLD	(2,000)		(2,000)
Remaining FTI	-0-	8,000	8,000

The carryforward for Group 2 would be calculated in the same way. Limitation 1 equals $6,000 (since B and C are common members in the loss and carry years) and Limitation 2 would equal $6,000 (the income of the unitary group in the carry year). Since there is only ($3,000) of NOL carryforward available and this amount is less than either limitation, the entire $3,000 can be carried to 1984.

GRP 2	CO. B	CO. C	UBG

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

FTI	4,000	2,000	6,000
NOLD			(3,000)
Remaining FTI			3,000

(3) Unitary Group Members Different In Carry Year

Using the same facts as shown above except in 1984 Company E was added to Group 2 with a NOL of ($5,000) in 1984. The NOL carryforward would be calculated as follows:

1984

GRP 2	**Co. B**	**Co. C**	**Co. E**	**UBG**
FTI	4,000	2,000	(5,000)	1,000
NOLD				(1,000)
Remaining FTI				0

Group 2 is limited to a ($1,000) carryforward under limitation 2 - the group's income in the carry year of $1,000 is less than the combined income of the "common" members of $6,000. Company C would have ($2,000) of remaining NOL to carryforward.

(4) NOL with Newly Created Subsidiary

In a situation where a parent incurs a FNOL in a pre-12/31/86 tax year and in the carryforward year a wholly-owned subsidiary has been created, Limitation 1 will be applied based on the net income of the newly formed subsidiary and the parent corporation. This special rule does not apply to an acquired subsidiary.

Corporation A files a separate return for tax year end 12/31/85 and incurs a FNOL of ($1,000). On 1/1/86, Corporation A forms wholly-owned Subsidiary B. For the tax year end 12/31/86, Corporations A and B file a combined Illinois return reflecting (Illinois equivalent) federal taxable income of:

1985 Separate		**1986 Combined**	
Corp A	($1,000)	Corp A	$300
		Corp B	200
		Total	$500

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

There are no addition or subtraction modifications on the Illinois return. ($500) of the pre-12/31/85 NOL will be allowed to carryforward and offset the total federal taxable income of Corporations A and B. The remaining ($500) is available to carryforward to the next year.

(5) Separate Filers Carrying Losses to Unitary Years

86 IAC § 100.2230(e)(5) discusses a formula to be used in situations where NOL's of two different filers are being carried to the same return. INSTEAD OF THE FORMULA SHOWN IN THE REGULATION, THE PRORATION SHOULD BE MADE BASED ON TAXPAYER'S LIMITATION 1 OR ACTUAL NOL, WHICHEVER IS LESS:

Corporation A incurred a ($1,000,000) NOL on its 1985 return.
Corporation B incurred a ($1,000,000) NOL on its 1985 return.
Each company filed a separate return in Illinois for 1985. In 1986, Corporations A, B and C file together as a unitary business group reflecting the following income:

1985 Separate		**1986 Unitary**	
Corp A	(1,000,000)	Corp A	$2,000,000
Corp B	(1,000,000)	Corp B	1,000,000
		Corp C	(1,000,000)
		UBG	$2,000,000

The 1985 federal NOL carryover (which is limited to ($2,000,000) by limitation 2) would be prorated between Corporations A and B based on the ratio of Limitation 1 for each corporation or the actual NOL whichever is less. In other words:

Corporation A $1,000,000/$2,000,000 = 50% X $2,000,000 = $1,000,000
Corporation B $1,000,000/$2,000,000 = 50% X $2,000,000 = $1,000,000

86 IAC § 100.2230(f)(3)(B)(iii) reflects a formula to be used in situations where the loss member's NOL being carried exceeds that member's taxable income in the carry year. This formula should only be relevant in those situations where the entire NOL being carried is less than the common member income (and the income of the entire UBG) in the carry year and a subsequent NOL is being carried to the same year. THE FORMULA SHOWN IN THE REGULATION'S EXAMPLE IS INCORRECT IN THAT IT MAY RESULT IN TOO MUCH LOSS BEING PRORATED TO ONE OR MORE COMMON MEMBER.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

EXAMPLE:

Loss Year, 1983:

Corporation A	(20,000)
Corporation B	30,000
Corporation C	5,000
Corporation D	(60,000)
Corporation G	5,000
Total UBG NOL	(40,000)

NOL Pro-Ration:
Corporation A 20,000/80,000 X (40,000) = (10,000)
Corporation D 60,000/80,000 X (40,000) = (30,000)

Carryback Year, 1980:

Corporation A	15,000 - 10,000 = 5,000
Corporation B	10,000
Corporation D	16,000 - 16,000 = -0-
Corporation F	20,000
Total UBG Inc	61,000

After the preliminary carryback of the loss member's prorated losses against their income in 1980, common members' (A,B & D) income remaining is 15,000 (A's income of 5,000 and B's income of 10,000). The remaining (14,000) of D's prorated loss will be divided between A and B using the following formula:

Common Member with remaining income
divided by
Total common member remaining income

Corporation A 5,000/15,000 X 14,000 = (4,667)
Corporation B 10,000/15,000 X 14,000 = (9,333)

Therefore, total 1983 NOL will be carried back as follows:

Corporation A	15,000 - 14,667 =	333
Corporation B	10,000 - 9,333 =	667
Corporation D	16,000 - 16,000 =	-0-
Corporation F	20,000 =	20,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Total 61,000 - 40,000 = 21,000

(6) Proration of Unitary NOL - Multiple Years And Groups

Proper proration of the net operating loss is important when the loss is being carried to multiple years and the group members change in the carry year.

EXAMPLE:

	Co. A	Co. B	Co. C	Co. D	Co. E	UBG
1983 FTI	(5,000)	(10,000)	(35,000)			(50,000)
1984 FTI	4,000	6,000				10,000
1984 FTI Separate			10,000			
1985 FTI Group 1	2,000			10,000		12,000
Group 2		3,000			1,000	4,000
Separate			10,000			

First, calculate each loss member's proportionate share of the 1983 loss under 86 IAC § 100.2230(b). Since all the members contributed to the loss in 1983, their proportionate share is as shown for their loss. In other words, A's share is (5,000), B's share is (10,000) and C's share is (35,000).

Next, compare the proportionate losses computed to limitations 1 and 2 for the common members of each of the groups in the carry year. Companies A and B are limited to a ($10,000) carryforward in 1984 based on both limitations. C will also be limited to a ($10,000) carryforward.

Next, determine the amount of the 1983 loss offset by each company in 1984 in order to compute the NOL available for carryforward to each company in 1985.

Under 86 IAC § 100.2230(e)(2)(B), the calculation is made by using the ratio "indicated by the relative amounts of their respective net operating losses originating" in 1983. In other words:

The common members in 1983 and 1984 are:

Company A	(5,000)	5,000/15,000 = 33%
Company B	(10,000)	10,000/15,000 = 67%
	(15,000)	

Company A contributed 33% to the total loss sustained by Companies A and B; therefore, Company A is deemed to offset 33% of the applicable income (based on the limitations) in the carryforward year. Company B is deemed to have offset 67% of the income.

In 1984, the UBG made up of Companies A and B had 10,000 in income; therefore, Company A is able to carryforward (3,300) of its NOL into 1984 and Company B carries forward (6,700) of its NOL. Company C is able to carryforward (10,000) of its NOL.

1984:

Group I	**Co. A**	**Co. B**	**UBG**
FTI	4,000	6,000	10,000
NOLD	(3,300)	(6,700)	(10,000)
			-0-

1984

Separate	**Co. C**
FTI	10,000
NOLD	(10,000)
	-0-

Company A now has (1,700) NOL carryforward available (5,000- 3,300) and Company B has (3,300) NOL carryforward available (10,000 - 6,700). Company C has (25,000) NOL carryforward available (35,000 - 10,000).

1985:

Group 1	**Co. A**	**Co. D**	**UBG**
FTI	2,000	10,000	12,000
NOLD	(1,700)		(1,700)
	300	10,000	10,300

For Group 1 in 1985, Company A is the only common member in the loss and carry year. Company A has (1,700) NOL available for carryforward. This amount is lower than both limitations because limitation 1 would be Company A's income in 1985 which is 2,000 and the UBG's income (for limitation 2) is 12,000. Therefore, the entire NOL for Company A may be carried.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

1985: **Group 2**	**Co. B**	**Co. E**	**UBG**
FTI	3,000	1,000	4,000
NOLD	(3,000)		(3,000)
	-0-	-0-	1,000

Company B is the only common member of Group 2. Company B has a (3,300) NOL available for carryover, but limitation 1 (Company B's income in 1985) is 3,000 and limitation 2 (the income of the UBG for 1985) is 4,000. Therefore, Company B's NOL carryforward is limited to (3,000) under limitation 1 and Company B has (300) NOL available for carryforward to another year. Company C may again carryforward (10,000) and has (15,000) NOL remaining to carryforward to another year.

(7) Additional Examples

	Co. A	**Co. B**	**Co. C**	**Co. D**	**Co. E**	**UBG**
1983						
FTI	10m	10m	10m	(40m)		(10m)
1984						
FTI	(5m)	(5m)	(5m)	10m	10m	5m

As a result of Limitation 1, none of the 1983 NOL may be carried forward to 1984 since the net income/(loss) of the common members (Companies A, B, C, D) for 1984 is (5m). REF: 86 IAC § 100.2230(b)(1).

EXAMPE:

	Co. A	**Co. B**	**Co. C**	**Co. D**	**Co. E**	**Co. F**	**UBG**
1983							
FTI	30m	60m	70m	(150m)	(50m)		(40m)
1984							
FTI	6m			7m	7m	30m	50m

As a result of Limitation 1, the carryforward to 1984 is limited to (20m). The common members in the income and loss years are Companies A, D and E, and their net income in 1984 is 20m. REF: 86 IAC § 100.2230(b)(1).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Company D and E's proportionate share of the 1983 NOL is calculated as follows:

D's NOL in 1983 + E's NOL in 1983:
150 + 50 = 200

Each loss member's NOL in 1983/Total loss members' NOLs in 1983:

D 150/200 = 75% X (40) = (30)
E 50/200 = 25% X (40) = (10)

This calculation shows that Company D is deemed to have provided 75% of the total loss incurred by the unitary group in 1983 and Company E is deemed to have provided 25% of the total loss. These percentages are then used to calculate each member's TOTAL proportionate share of the unitary group's loss in 1983. As shown, Company D's TOTAL proportionate share of the loss is (30m) and Company E's TOTAL proportionate share is (10m). This is the TOTAL amount of net operating loss each MEMBER may carry to another year.

REF: 86 IAC § 100.2230(b)s.

Proportionate share of carryforward loss:

D is deemed to have carried forward (15m) of its NOL:

75% X 20 = 15 (15 carryforward remaining)

E is deemed to have carried forward (5m) of its NOL:

25% X 20 = 5 (5 carryforward remaining)

When the amount of the loss carried to another year is less than the total loss available to be carried, a calculation must be made to determine the amount of loss carried to the income year by each loss member. The same percentages used to calculate the TOTAL proportionate share of the unitary loss in 1983 are used to calculate each loss member's portion of the loss carried forward to 1984. This calculation will be necessary in situations where a loss member leaves the group that incurred the loss. In this situation, the loss member's share of the unitary loss that has not already been carried to another year will continue with that member. If E were sold to Company X on January 1, 1985, E's (5m) NOL remaining

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

would be available for carryforward against E's income in 1985. This (5m) would NOT be available for carryforward into the 1985 unitary group consisting of Companies A, D and F.

REF: 86 IAC § 100.2230(e)(2)(B).

EXAMPLE:

	Co. A	Co. B	Co. C	Co. V	Co. W	Co. X	Co. Y	UBG
1983								
Group 1	20	80	(150)					(50)
Group 2					20	80	(150)	(50)
1984								
FTI	10	10	15	(40)		15	30	40

Group 1 has a (50) NOL to carryforward and Group 2 has a (50) NOL to carryforward. First, determine Limitation 1 for the groups:

Group 1		**Group 2**	
Co. A	10	Co X	15
Co. B	10	Co. Y	30
Co. C	15		
	35		45

Limitation 1 = 35 + 45 = 80

REF: 86 IAC §§ 100.2230(d) and 100.2230(e)(4)

Limitation 2 is 40 (total income of the UBG in 1984); therefore the TOTAL carryforward (for BOTH groups 1 and 2) to 1984 is limited to 40.

The next step is to prorate the 40 between the two groups in order to determine the amount of the NOL used by each group. This proration is calculated using the percentage of income the common members of each group contributed to the income of the UBG in the carry year (as shown above in the computation of Limitation 1).

(Limitation 1 for Group 1 (or 2) / Total Limitation 1) X Limitation 2:

Company C - 35/80 X 40 = 17.50
Company Y - 45/80 X 40 = 22.50

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Of the (50) NOL from 1983, Company C has absorbed (17.50) in 1984 and has (32.50) (50.00 - 17.50) available for carryforward. Company Y has absorbed (22.50) in 1984 and has (27.50) (50.00 - 12.50) NOL available for carryforward.

REF: 86 IAC § 100.2230(e)(4).

e) Non-Unitary Loss or Carry Year

86 IAC § 100.2230(c) also includes an explanation of the application of Limitation 1 for years in which a separate basis loss is incurred. In this circumstance, the amount to be carried is limited to the income of that separate member in the carry year (since this company would be the only common member in the year of the loss and in the carry year). Refer to the Limitations 1 and 2 section for an example of this regulation and further explanation.

The carryback or forward of a loss member's proportionate share of the unitary group's loss to a nonunitary year is also handled in accordance with the limitations discussed in the Limitations 1 and 2 section. The fact that the unitary group included loss or income members that were not Illinois filers in the carry year will not have a bearing on the computation of the loss member's proportionate share of the loss or the amount of loss allowed to be carried.

	Co. A	Co. B	UBG
1985	(10,000)	8,000	(2,000)
1982	12,000		

Whether or not Company B is an Illinois filer is irrelevant in the above computation. Company A is the only loss member and as such has (2,000) of NOL that it will be allowed to carryback to 1982.

3. NOL Addition Modification - In General

As a result of negative Line 1 being allowed by the Department, the taxpayer could have offset excess Illinois addition modifications in the year the NOL occurs and offset Illinois income again in the year to which the loss is carried thereby creating a double deduction. A double deduction is not allowable under IITA § 203(g). IITA § 203(b)(2)(E) was written to counteract this problem. This modification is often called the NOL addition modification or the excess addition modification.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Although this modification was not effective until December 1, 1983, its purpose is to guard against double deductions. Prior to December 1, 1983, the taxpayer would still not be allowed to offset Illinois income twice. In these prior years, a reduction may be made directly to the NOL allowed and the auditor's comments should reflect this adjustment as legislated by IITA § 203(g) regarding double deductions. REF: Madison Park Bank v. James B. Zagel, Illinois Appellate Court decision.

EXAMPLE:

Line 1	(10,000)
Add Modifications	8,000
Sub Modifications	2,000
Base Income	(4,000)

In this example, the (10,000) NOL is offsetting $6,000 in excess addition modifications over subtraction modifications.

Basically, IITA § 203(b)(2)(E) states:

> Taxable income may be less than zero (but not less than the NOL for the year) provided that when taxable income is less than zero, and addition modifications exceed subtraction modifications, an NOL addition modification must be made for any taxable year to which the NOL is applied.

In other words:

> **IF** taxable income is less than zero
> **AND** addition modifications are greater than subtraction modifications
> **THEN**: NOL addition modification in carry year.

This modification is limited under Sections 203(e)(2)(E)(i) and (ii) of the Act. Under subparagraph:

> (i), the total modification is reduced for any amount that has already been carried to another year.
>
> (ii), the NOL addition modification is never more than the amount of net operating loss carryback or carryforward .

In years with a NOL carryback or carryforward from more than one year, compute the modification for each loss year under the preceding rules and then add them together and this is the total modification for the year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

a) Examples - NOL Addition Modification

The following are possible situations dealing with negative Line 1 and the offset of excess addition modifications.

EXAMPLE:

	As Filed by Taxpayer 1979 IL-1120		**As Accepted By IDOR 1979 IL-1120**
F1120 Line 30	(13,000)	IL-1120 Ln 1	0
Additions	20,000	Additions	20,000
Subtractions	7,000	Subtractions	7,000
Base Income	0	Base Income	13,000

	As Filed by Taxpayer 1976 IL-1120		**As Accepted By IDOR 1976 IL-1120**
F1120 Line 30	13,000	IL-1120 Ln 1	0
Additions	20,000	Additions	20,000
Subtractions	7,000	Subtractions	7,000
Base Income	26,000	Base Income	13,000

As originally filed by the taxpayer, the 1979 federal NOL offset 13,000 of excess addition modifications (addition minus subtraction modifications) in the year of the loss (1979) and then also offset 13,000 of income in the carryback year (1976). The Department's position would adjust Line 1 to zero in the loss year and thus guard against this type of double deduction occurring. Double deductions are expressly forbidden under IITA § 203(g).

The circumstances in this example show that the taxpayer has actually used the loss to offset income twice. Unfortunately, the Department's position was not imposed only in these circumstances. When a return was filed reflecting a negative amount on Line 1 of the Illinois return, this amount was automatically increased to zero. Many times this would result in a situation where a taxpayer never used the net operating loss to offset income because there was no income to offset the loss either in carryback or carryforward years. This was not a very favorable position among taxpayers.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In the following examples, Line 28 of the federal Form 1120 represents taxable income before NOL deduction and special deductions. Line 29a represents the NOLD, Line 29b, special deductions and Line 30, taxable income. Line 3 of the IL-1120 reflects total addition modifications (other than the NOL addition modification), Line 6 reflects total subtraction modifications and Line 7 represents base income.

EXAMPLE:

	Federal 1120		IL-1120
Loss Year			
Line 28	(100)	Line 1 Income	(100)
Line 29a	-0-	Line 3 Additions	200
Line 29b	-0-	Line 6 Subtractions	50
Line 30	(100)	Line 7 Base Income	50
Carry Year			
Line 28	200	Line 1 Income	100
Line 29a	(100)	Line 3 Additions	130
Line 29b	-0-	NOL Add/Modification	100
Line 30	100	Line 6 Subtractions	80
		Line 7 Base Income	250

Taxpayer has incurred a (100) FNOL. In this loss year, addition modifications exceed subtraction modifications by 150. However, only 100 of Illinois income has been offset by the allowance of the negative Line 1; therefore, the NOL addition modification is 100 when the NOL is carried. Under the regulation, the NOL addition modification may not exceed the amount of NOL carried (and therefore, the NOL addition modification can never be greater than the total amount of the NOL). REF: IITA § 203(b)(2)(E)(ii).

EXAMPLE:

	Federal 1120		IL-1120
Loss Year			
Line 28	(100)	Line 1 Income	(100)
Line 29a	-0-	Line 3 Additions	50
Line 29b	-0-	Line 6 Subtractions	80
Line 30	(100)	Line 7 Base Income	(130)

Subtraction modifications are greater than the addition modifications in this example. Therefore, no NOL addition modification will be needed in the year to

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

which the loss is carried as no Illinois income has been offset in the loss year. REF: IITA § 203(b)(2)(E).

EXAMPLE:

	Federal 1120		IL-1120
Loss Year			
Line 28	(200)	Line 1 Income	(200)
Line 29a	-0-	Line 3 Additions	300
Line 29b	-0-	Line 6 Subtractions	50
Line 30	(200)	Line 7 Base Income	50
Carry Year 1			
Line 28	150	Line 1 Income	-0-
Line 29a	(150)	Line 3 Additions	300
Line 29b	-0-	NOL Add/Modification	150
Line 30	-0-	Line 6 Subtractions	50
		Line 7 Base Income	400
Carry Year 2			
Line 28	100	Line 1 Income	50
Line 29a	(50)	Line 3 Additions	300
Line 29b	-0-	NOL Add/Modification	50
Line 30	50	Line 6 Subtractions	100
		Line 7 Base Income	300

Addition modifications exceed subtraction modifications by 250 in the loss year; however, under IITA § 203(e)(2)(E)(ii) the NOL addition modification is limited to the amount of the NOL carryback or carryforward. Since there is only (200) NOL in the loss year, the TOTAL NOL addition modification carried cannot exceed 200. This is reasonable since only 200 of Illinois income (i.e. the excess addition modifications) has been offset in the loss year as a result of negative Line 1.

In the first carry year, only (150) of the NOL can be carried; therefore, only 150 of the excess addition modifications will be added in this year. At this point, only (150) of the NOL reflected as a negative Line 1 in the loss year is being carried to another year to offset income, so only 150 of the modifications already offset need to be added back.

In the second carry year, the remaining (50) of NOL is absorbed. Under IITA § 203(e)(2)(E)(i), the original 200 NOL addition modification is reduced for the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

amount already carried to the first carry year (150), therefore, the NOL addition modification in the second year is 50.

Notice that the NOL addition modification is NOT prorated based on the amount of NOL being carried. This modification is a dollar for dollar adjustment. If the total excess addition modifications in the loss year are 500 and the total net operating loss is (5) million, and (500) of the NOL is carried to another year, the NOL addition modification in that year will be 500. The taxpayer has already had the advantage of offsetting 500 of Illinois income in the loss year; therefore, this entire amount must be added back before taxpayer is allowed to offset more Illinois income in the carry year.

EXAMPLE:

	Federal 1120		**IL-1120**
Loss Year			
Line 28	(200)	Line 1 Income	(200)
Line 29a	-0-	Line 3 Additions	300
Line 29b	-0-	Line 6 Subtractions	200
Line 30	(200)	Line 7 Base Income	(100)
Carry Year 1			
Line 28	100	Line 1 Income	-0-
Line 29a	(100)	Line 3 Additions	300
Line 29b	-0-	NOL Add/Modification	100
Line 30	-0-	Line 6 Subtractions	200
		Line 7 Base Income	200
Carry Year 2			
Line 28	100	Line 1 Income	-0-
Line 29a	(100)	Line 3 Additions	300
Line 29b	-0-	NOL Add/Modification	-0-
Line 30	-0-	Line 6 Subtractions	200
		Line 7 Base Income	100

In this example, the entire 100 NOL addition modification is added back in the first year to which (100) of NOL is carried. In the second carry year, (100) of NOL offsets federal taxable income and there is no NOL addition modification remaining to be added back.

b) Quick Reference Points

The NOL addition modification is used to compensate for Illinois income offset by net operating losses. Therefore, if subtraction modifications exceed addition modifications, the net operating loss on Line 1 would have no effect on Illinois income and no NOL addition modification would be needed.

If the excess of addition over subtraction modifications exceeds the net operating loss, then that excess amount is already being taxed in the loss year and only the amount equaling the NOL needs to be recaptured in the carry year (or years).

If the NOL is never carried to another year, no NOL addition modification is necessary.

4. NOL Addition Modification - Unitary Filers

86 IAC § 100.2240 sets down rules for years (ending prior to December 31, 1986) in which unitary business groups incur net operating losses and the group's addition modifications exceed subtraction modifications in the loss years.

Each group member that carries a portion of the group's unitary FNOL to another year from a year in which that FNOL was used to offset the group's excess addition modifications, must take as an addition modification in the carry year, its respective share of the NOL addition modification.

Each loss member's respective share is determined in the same manner as its share of the combined FNOL was determined under 86 IAC § 100.2230(d).

The amount of the NOL addition modification required to be shown by each group member in the carry year is limited to the amount of loss actually carried to such year by the group member.

EXAMPLE:

Loss Year	**Co. A**	**Co. B**	**Co. C**	**Co. D**	**UBG**
Federal 1120					
Line 28	(20)	(5)	10		(15)
Line 29a					-0-
Line 29b					-0-
Line 30	(20)	(5)	10		(15)
IL-1120					
Line 1 Income	(20)	(5)	10		(15)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Line 3 Additions			10		10
Line 6 Subtractions	(2)				(2)
Line 7 Base Income	(22)	(5)	20		(7)

	Co. A	Co. B	Co. C	Co. D	UBG
Carry Year					
Federal 1120					
Line 28	20	30	(15)	15	50
Line 29a	12	3			15
Line 29b					-0-
Line 30	8	27	(15)	15	35
IL-1120					
Line 1 Income	8	27	(15)	15	35
Line 3 Additions	5				5
NOL Add Modification	6	2			8
Line 6 Subtractions				(5)	(5)
Line 7 Base Income	19	29	(15)	10	43

The group's unitary federal net operating loss for the year is (15) which is divided between Companies A and B (the loss members) using the following formula:

(Individual Loss Member's NOL/Total Loss Members' NOLs) X UBG NOL

Company A's share: (20/25) X 15 = 12
Company B's share: (5/25) X 15 = 3

The same proration is used to compute each loss member's share of the excess NOL addition modification:

(Individual Loss Member's NOL/Total Loss Members' NOLs)
X UBG Excess Addition Modification

Company A's share: (20/25) X 8 = 6.4
Company B's share: (5/25) X 8 = 1.6

The NOL addition modification of unitary group loss members is determined based on the excess addition modifications of the entire group. The excess is the sum of C's addition modification less A's subtraction modification. The companies to which the modifications actually apply are irrelevant. If a company is a "loss member" and the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

unitary business group's addition modifications exceed subtraction modifications in the loss year, the "loss member" company will have a prorated portion of the NOL addition modification in the carry year.

EXAMPLE:

1983	**Co. A**	**Co. B**	**Co. C**	**Co. D**	**UBG**
Federal 1120					
Line 28	20	50	(24)	(96)	(50)
Line 29a					-0-
Line 29b					-0-
Line 30	20	50	(24)	(96)	(50)
IL-1120					
Line 1 Income	20	50	(24)	(96)	(50)
Line 3 Additions			90		90
Line 6 Subtractions				(20)	(20)
Line 7 Base Income	20	50	66	(116)	20

1984	**Co. A**	**Co. B**	**Co. C**	**Co. D**	**UBG**
Federal 1120					
Line 28	10	40	60	130	240
Line 29a			(10)	(40)	(50)
Line 29b					-0-
Line 30	10	40	50	90	190
IL-1120					
Line 1 Income	10	40	50	90	190
NOL Add Modification			10	40	50
NOL Deduction			(10)	(40)	(50)
Line 7 Base Income	10	40	50	90	190

The NOL carryforward amount is 50, since the "common" members are the same in the loss year and in the carry year. The proration of the individual loss member's loss is calculated based on the following formula:

(C's Loss)/(C+D's Losses) = Proration % for C:
24/120 = 20% (Corporation C)

(D's Loss)/(C+D's Losses) = Proration % for D:
96/120 = 80% (Corporation D)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

NOL proration per company:

Corporation C = (50) X 20% = (10)
Corporation D = (50) X 80% = (40)

The addition modifications exceed subtraction modifications by 70 but the NOL is only (50); therefore, the NOL addition modification will also be 50 and the proration of the NOL addition modification is based on the same percentage used for prorating the net operating loss.

5. FNOL Carried to 12/31/86 AND AFTER

The statute was also amended to allow Federal NOL's incurred prior to December 31, 1986 to offset excess addition modifications in a carryforward year ending on or after 12/31/86. REF: IITA § 203(e).

EXAMPLE:

	12/31/1985	12/31/1986
Federal 1120		
Line 28	(8,000)	4,000
Line 29a	-0-	(3,000)
Line 29b	(1,000)	(1,000)
Line 30	(9,000)	-0-
IL-1120		
Line 1 Income	(9,000)	-0-
Line 3 Additions	-0-	2,000
Line 6 Subtractions	-0-	-0-
NOL c/f Offset		(2,000)

For the year ended December 31, 1985, taxpayer has a (9,000) FNOL. For the year ended December 31, 1986, taxpayer may carryforward and offset (3,000) of the FNOL against federal taxable income (Line 28 less 29b). Taxpayer also has 2,000 of excess addition modifications in 1986. Under the regulations, taxpayer may use (2,000) of the 1985 NOL to offset this excess amount.

This change was an expansion of the rationale in Chicago Title and Trust. The taxpayer maintained that by allowing Line 1 of the Illinois return to be a negative amount only in the year in which the FNOL was incurred meant that Illinois tax was still being paid on Illinois modifications even though FNOL deduction was available. With this change to the statute, the taxpayer will not pay Illinois taxes on Illinois modifications when there is a pre-12/31/86 NOL carryforward available, and will not be

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

double deducting any loss because the FNOL will be simultaneously reduced at the time of the offset.

A complete synopsis of Chicago Title and Trust is in Chapter 49.

In the above example, the taxpayer has offset (3,000) of the FNOL against federal taxable income, 2,000 against excess addition modifications and has (4,000) of FNOL remaining for carryforward for Illinois purposes. One very important limitation on this modification is that it may NOT create a negative base income. In other words, the carryforward of the pre-12/31/86 FNOL may not result in an Illinois net loss. (REF: IITA § 203(e)) This adjustment is made on Line 5g of the IL-1120. See the next section on Line 5g.

Excess addition modifications that were offset by pre-12/31/86 net operating losses must still modify Illinois income in the post-12/30/86 carry year. For the 1986 tax year, this excess is represented by the NOL addition modification on Line 2c of the IL-1120. For the 1987 tax year and after, this excess is incorporated into the calculation of the subtraction modification on Line 5g of the IL-1120. REF: Instructions to the IL-1120.

EXAMPLE:

	12/31/1985	12/31/1986
Federal 1120		
Line 28	(8,000)	4,000
Line 29a	-0-	(3,000)
Line 29b	(1,000)	(1,000)
Line 30	(9,000)	-0-
IL-1120		
Line 1 Income	(9,000)	-0-
Line 3 Additions	3,000	2,000
NOL Addition Mod		3,000
NOL c/f Offset	-0-	(5,000)
Line 7 Base Income	(6,000)	-0-

Taxpayer has incurred a (9,000) FNOL for the year ended December 31, 1985. The excess addition modifications being offset by negative Line 1 in this year are 3,000. In 1986, taxpayer carries the FNOL forward and offsets 3,000 in federal taxable income. Taxpayer has (6,000) of FNOL available for offset against Illinois modifications. The total NOL addition modification from December 31, 1985 is 3,000. If we add this amount to the 2,000 excess modifications in 1986, we see that taxpayer may carryforward (5,000) more of its 1985 FNOL into 1986. There remains (1,000) of 1985 FNOL for carryover.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The FNOL addition modification is limited to the amount of the FNOL carryforward and the FNOL carryforwards from pre-12/31/86 tax years will also offset excess addition modifications in post-12/30/86 carry years. This means that the NOL addition modification will be the lesser of the total excess modifications offset in the loss year (net of any NOL addition modification already added back in prior carry years for such excess modifications) or the actual net operating loss used in the current carry year.

The limitations stated in 86 IAC § 100.2240(b) and (c) will still apply to all FNOL carryforwards. See the Section Limitations 1 and 2 in this chapter for an in depth discussion of these limitations.

6. Line 5G of the IL-1120

The various adjustments that had to be made to federal taxable income and Illinois base income as a result of FNOL kept growing, therefore in 1987, the Department consolidated these adjustments onto one line, or rather expanded the purpose of Line 5g in Part I of the IL-1120. This was not a change to the law, but rather a change to the form and instructions.

In 1986, Line 1 of the IL-1120 included the NOL deduction offset against federal taxable income. Line 2c reflected any applicable NOL addition modification and Line 5g reflected the amount of the NOLD which was offsetting the current year excess addition modifications.

7. Schedules NL and NL-5G

Schedule NL

Schedule NL (Schedule NL-1 for unitary filers) is used for tax years ending prior to December 31, 1987 to calculate the amount of the Federal net operating loss deduction allowable on the Illinois return (in other words for losses occurring prior to years ending December 31, 1986). This schedule is also used to calculate the applicable NOL addition modification.

The main points to remember about Schedule NL are:

(1) Line 4 in Part I is to reflect taxable income (Federal Line 28 less Line 29b) for the CARRY year; and
(2) Line 5 is to reflect the lesser of either the net operating loss remaining to be carried or the taxable income computed on Line 4.
The lesser amount is used because Line 1 in the carry year cannot be less than zero.

Part II of Schedule NL calculates the NOL addition modification.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Lines 7 and 8 reflect the addition and subtraction modifications of the LOSS year.
Line 9 results in the entry of the lesser of the actual net operating loss for the loss year or the excess of the addition modifications over subtraction modifications (in the loss year).
Line 11 will reflect the lesser of the actual net operating loss deduction being taken in the carry year or the remaining excess addition modification.

In other words, the proper completion of this form will result in all applicable limitations being followed.

Schedule NL-5g

For tax years 1987 and up to 2001, all of the adjustments relating to pre-12/31/86 FNOL carryforwards are calculated on Schedule NL-5g (or Schedule UB/NL-5g for unitary filers) and the net is shown on Line 5g of Part I of the IL-1120. Schedule NL-5g is only to be used for losses arising from tax years ending PRIOR to December 31, 1986. Each column of the schedule represents a loss year and all three parts of the schedule should be completed for each loss year.

Part I determines the amount of FNOL remaining for carryforward to the current year. Taxpayer enters the entire FNOL on Line 1 (Line 28 of the F1120 less Line 29b). Line 2 removes any of the loss that has already been carried to another year. This amount includes any loss that has offset Illinois excess addition modifications in a December 31, 1986 or after carryforward year. See number 5, “FNOL carried to 12/31/86 and After,” in this section for an in depth discussion of this offset.

Part II of the schedule calculates any NOL addition modification applicable in the carryforward year (as mandated by IITA § 203(b)(2)(E)). This part MUST be completed if the taxpayer reported Line 1 of the IL-1120 as a negative amount in the loss year.

Lines 4 and 5 in Part II represent the addition and subtraction modifications (respectively) from the LOSS year.
Line 6 is merely the net of these two modifications.
Line 7 reduces the total NOL addition modification for any amount already carried to another year and
Line 8 reflects any remaining modification applicable.

Line 7 from Part II reduces Line 3 of Part I and the net amount is entered on Line 9 of Part III. Line 9 NL-5g reflects the total possible subtraction modification. The subtraction modification is limited in any given carry year to the total of Line 1 plus

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Line 2 less Lines 5a through 5f on the IL-1120. This limitation ensures that the taxpayer will not use unapportioned losses to create or increase a current year Illinois net loss. REF: IITA § 203(e).

Line 10 of the schedule represents the Illinois base income for the carryforward year before the Line 5g modification. This line relates to IITA § 203(e) which limits the pre-12/31/86 carryforward to an amount not to exceed the sum of the federal taxable income (before the net operating loss deduction), plus the excess of addition over subtraction modifications. If a taxpayer has a subtraction modification in the carryforward year that exceeds or equals federal taxable income and addition modifications (in other words, Line 10 is less than or equal to zero), no FNOL offset will be allowed in that carryforward year. To allow the FNOL offset in this circumstance would result in the creation of or increase to an Illinois net loss based purely on the fact that Illinois allowed a Federal net operating loss to be carried into the year.

Line 11 reflects the NOL offset allowed for the current year. The amount on this line is the lesser of Line 9 or 10 - the lesser of the actual NOL available for carryover (less the applicable NOL addition modification) or the Illinois base income before Line 5g modification. If either Line 9 or 10 is an amount less than or equal to zero, no NOL deduction will be allowed for that loss year.

If Line 10 is greater than Line 11, then there is base income remaining in the current year that is available for further offset by other NOL carryforwards. This net amount is reflected on Line 12 of the schedule. If Line 9 is greater than Line 11, then there is FNOL remaining from this loss year to be carried to another year. This amount is reflected on Line 13 of the schedule.

Schedule NL-5g will be used by separate apportionment filers and Schedule UB/NL-5g by unitary apportionment filers. These schedules replace former Schedules NL and NL-1.

8. General Carryback and Carryforward Periods

a) 12/31/1999 – 12/30/2003

For tax years ended on or after 12/31/99, all of the special federal carry back and carry forward provisions contained in IRC § 172 will not be followed on the Illinois return. This means that special losses such as bad debt losses for commercial banks, and specified liability losses cannot be carried back 10 years. They must be carried as was outlined in IITA § 207, back two years and forward twenty.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

b) Prior to 12/31/99

Federally, the carryback and carryforward periods for NOLs have changed numerous times since the inception of the deduction in 1918. Since the Illinois Income Tax Act was passed in 1969 up until the passing of Public Act 91-541 for tax years ended on or after December 31, 1999, Illinois generally followed the carry periods in IRC § 172. Following is a chart reflecting the general rule for the carry periods. These are used in most instances for both Federal NOL's prior to December 31, 1986 (when Illinois decoupled from Federal NOL's and created its own losses with PA 84-1042), and for Illinois NOL's from December 31, 1986 through December 31, 1999. Be aware, however, that certain taxpayers qualify for special carry periods during different time frames, or may elect to forego the carryback period all together. Refer to the chart of special carry periods found in the section titled SPECIAL CARRY BACK AND CARRY FORWARD PERIODS.

TAX PERIOD	CARRY BACK	CARRY FORWARD
1/1/58 – 12/31/75 *	3 YEARS	5 YEARS
1/1/76 – 8/5/97 **	3 YEARS	15 YEARS
8/6/97 – 12/31/99	2 YEARS	20 YEARS

* No election for this period to forego the carry back period

** For the tax years ended 1/1/76 – 12/31/81 the carry forward period was originally only seven years. However, PL 97-34 changed it to 15 years for any losses during this period that were still "alive" (able to be carried) in 1981.

In the application of the general rule, if a FNOL or IL NOL is carried back, it must be carried back to the earliest year of the carryback period. If it is not entirely offset by income in that year, it is carried to the next year of the carry back period and so on into the carryover period until the loss is absorbed or the carryover period expires.

EXAMPLE :

1983	1984	1985	1986
9,000	1,000	10,000	(10,000)

Company A has received a billing notice for 1985 stating that additional tax is due in that year. It would appear to be more advantageous for the company to carryback the 1986 FNOL to 1985 to offset the additional tax and not have to pay the tax out of pocket. However, this will not be allowed since 1983 is the third

preceding year and the Company <u>must</u> offset its income with the FNOL in 1983 first. The remaining ($1,000) could then be carried to 1984. Once these proper carrybacks are made, no NOL remains to carry to 1985.

c) Special Situations For The General Rule

An auditor may encounter special situations that require exceptions in applying the general rule. Following are several of those situations and the method of handling them:

<u>When a carry year is a loss year</u>, a net operating loss deduction (NOLD) cannot be claimed in the same year that a NOL is incurred. However, the NOL year is still included in the total of years allowed for the carry forward period. Ref: IRC § 172(b).

<u>When a taxpayer incurs a loss in its initial year of incorporation</u>, there will be no carry back period. The applicable carry forward period should be utilized.

EXAMPLE :

	1986	**1987**	**1988**	**1989**
Federal L28	(10,000)	8,000	(4,000)	4,000
L29a(NOLD)		8,000		4,000
L29b (Div)			2,000	
Federal L30	(10,000)	-0-	(6,000)	-0-
IL L1	(10,000)	8,000	(6,000)	4,000
IL Modifications	1,000	(500)	0	1,000
Base Income	(9,000)	7,500	(6,000)	5,000
Apportionment	1.00	1.00	1.00	1.00
IL Base Income	(9,000)	7,500	(6,000)	5,000
IL NLD 86 to 87 & 89	9,000	(7,500)		(1,500)
IL NLD 88 to 89			3,500	(3,500)
Remaining Base Income/(Loss)	0	0	(2,500)	0

The Illinois Taxpayer was incorporated in 1986. Since the audit period of 1986 – 1989 falls during the period covered by Illinois NOL's, we must use the IL NOL rules rather than FNOL rules. Because the taxpayer was incorporated in 1986, there are no years available for a carryback. The normal fifteen-year carry forward period starts with 1987, and all Illinois income will be offset with the 1986 loss. However, the 1986 loss cannot be carried into 1988 since the taxpayer incurred a loss in that year. Despite the fact that the 1986 loss was not applied

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

here, 1988 will be counted as the second year in the fifteen-year carryforward period for the 1986 loss. The remainder of the 1986 loss will be absorbed in 1989. The ($6,000) 1988 NOL cannot be carried back because there is no income remaining in the prior years. It must go forward to the first available year, which is 1989. After offsetting the remaining $3,500 income in 1989, ($2,500) loss remains available to carry forward from 1988.

If the taxpayer was not an Illinois filer in the carry back year for a FNOL, or had no Illinois liability in the carryback year, the FNOL must be carried back to the earliest year of the carry period if the taxpayer was in existence. An exception to this would be if a federal election were made to forego the carry back period.

EXAMPLE:

Corporation C incurs a FNOL for the year ended December 31, 1985. For Federal purposes, Corporation C carries the loss back to 1982. Corporation C did not have nexus in Illinois until 1984. However, no part of the 1985 NOL can be carried to the 1984 Illinois return until first being offset with the applicable federal taxable income for 1982 and 1983:

1982	**1983**	**1984**	**1985**
75,000	50,000	45,000	(100,000)

Corporation C must carry the loss back to 1982 and offset $75,000. The remaining ($25,000) FNOL from 1985 will offset half of the 1983 income. Since all of the loss is absorbed before 1984, none of the ($100,000) FNOL will be carried to the 1984 Illinois return. REF: *Bodine Electric Company v.Robert H. Allphin,* 81 Ill. 2d 502 (1980). Refer to Chapter 49 for a synopsis of this case.

If a corporation incurs a NOL, becomes inactive for a period of time, and subsequently resumes business, it may still be allowed to carry forward the NOL. For federal purposes, the carryforward would be allowed if the corporation remains in existence with "continuity of enterprise". Illinois will allow the carryover (for both pre-12/31/86, and 12/31/86 and after NOL), if continuity of enterprise can be shown. An example of continuity of enterprise would be where a corporation continued to pay required business taxes and license fees.

If a taxpayer has filed a short year return, each short year return is considered a tax year in itself. For example, Company ABC has filed returns for 12/31/95, 6/30/96, 12/31/96, and 12/31/97. The 12/31/98 return is a loss year. The loss must be carried back to the prior three years. Company ABC would be required to carry it back to 6/30/96, 12/31/96, and 12/31/97. No amount of the loss is

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

allowed to be carried to the 12/31/95 return because the 6/30/96 short-period return is considered to be a year by itself.

If a taxpayer filed with an election to use specific accounting, Schedule SA must be attached to the Illinois return. Schedule SA specifically allocates income and expense items to the portion of the tax year, in which they were paid, incurred or accrued. Detailed accounting records must be maintained to support the computations, and estimates are not permitted.

The following information was taken from SECTIONS 100.2000 THROUGH 100.2500 of the Regulations, which have been repealed.

Taxpayers electing to account specifically for items entering into the computation of base income must attribute to each portion of taxpayer's taxable year, only those items earned, received, paid, incurred or accrued for that taxable year. Certain items that reduce the taxable income of a corporation for federal income tax purposes are permitted in certain circumstances to be carried over from one taxable year to another such as:

1. Excess charitable contributions may be carried over pursuant to IRC Section 170(d)(2) subject, when appropriate, to the conditions and limitations of Section 381(c)(19);
2. Net operating losses may be carried over pursuant to Section 172(b) subject, when appropriate, to the conditions and limitations of Section 381(c)(1); and
3. Net capital losses may be carried over pursuant to Section 1212 subject, when appropriate, to the conditions and limitations of Section 381(c)(3).

Taxpayers making the election to use specific accounting must attribute the carryover items to the respective portions of their taxable year, exactly as though those respective portions were separate taxable years for federal income tax purposes. Also, the distributive shares of income from partnerships and Subchapter S corporations should be attributed exactly as though the respective portions of its taxable year were separate taxable years for federal income tax purposes. The distributive shares would be deemed received on the last day of the partnership's or Subchapter S corporation's tax year. REF: Sunshine Letter IT90-123.

Example:
Corporation A, a calendar year taxpayer, makes the election to specifically account for its income before and after June 30, 1984. In 1982, Corporation A made a charitable contribution, which exceeded the amount, deductible in that year pursuant to Section 170(d)(2) of the Internal Revenue Code. Under Section 170(d)(2), Corporation may, with certain limitations, use the excess contribution, until it is exhausted as a deduction, in the five succeeding taxable years.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Therefore, Corporation A could potentially use its excess charitable contribution from 1982 in each of its tax years through and including 1987. Since A has elected to use specific accounting, the contribution carryover is first applied to its income for the period of January 1 through June 30, 1984 and then to its income for the period of July 1 through December 31, 1984.

If a taxpayer has made the election to account specifically for items entering into the computation of base income and thereafter files a claim for refund for a year for which the election was made and if that claim is premised on the following grounds:

1. The carryback of a net operating loss,
2. The carryback of a net capital loss, or
3. The reduction of the amount of partnership income previously reported as distributable to the taxpayer, then the claim for refund should be made consistent with the principle that the taxable year for which the election was made is, in effect, two separate years.

Example:

Corporation A, a calendar year corporation makes the election to use specific accounting to prorate its 1984 income. Corporation A sustains a net operating loss in 1985. Under Sections 172(b) and 6411 of the Internal Revenue Code, Corporation A makes an application for a tentative refund on the carryback of the 1985 net operating loss to its calendar years 1982, 1983 and 1984. Upon receiving that refund, Corporation A, within the applicable period of limitations, files claims for refund of Illinois income taxes for these years. While Corporation A is not precluded from filing a claim for refund of Illinois income tax paid for 1984, it is required, in calculating the amount of the refund, to apply the net operating loss available for 1984 against the two specific accounting periods, January 1, through June 30, 1984 and July 1 through December 31, 1984 as if they were separate taxable years.

9. Special Carryback and Carry Forward Periods

Prior To 12/31/99

The 3 year carryback and 15 year carryforward for tax years ending on or before August 5, 1997 and the 2 year carryback and 20 year carryforward for tax years beginning after August 5, 1997 apply to most corporations. However, there are special rules for specific corporations or specific situations.

The following chart details the majority of the special carryback and carry forward periods found in IRC § 172. For further details about the losses, refer to IRC § 172. For tax years ended on or after 12/31/99, the Department decoupled from the special provisions found in IRC § 172. Consequently, on or after 12/31/99, these special periods are no longer in effect for Illinois purposes.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Special Loss Type	Tax Period Ending	Federal Code Effective Dates	Carryback Period	Carryforward Period
Financial Institutions	1/1/76 – 12/31/86	1/1/76-12/31/86 (Defined in IRC 585, 586, 593) 1/1/87-12/31/90 (Defined in IRC 582(c)(5))	10 years 10 years	5 years 5 years
Bad Debt Losses for Commercial Banks per IRC 585(a)(2)	1/1/87 – 12/31/93	1/1/87 – present version of code	10 years	5 years
Bank For Cooperatives	1/1/70 – 12/31/86	1/1/70 – 12/31/90	10 years	5 years
Thrift Institutions per IRC 593	1/1/82 – 12/31/85	1/1/87 – 12/31/90	10 years	8 years
Federal National Mortgage Association	Exceeding Mortgage Disposition Loss: 1/1/82 – 12/31/86 Mortgage Disposition Loss: 1/1/82 – 12/31/86	1/1/82 – 12/31/90 1/1/82 – 12/31/90	10 years 3 years	5 years 15 years

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Federal Home Loan Mortgage Corporation	Exceeding Mortgage Disposition Loss: 1/1/85 – 12/31/86 Mortgage Disposition Loss: 1/1/85 – 12/31/86	1/1/85 – 12/31/90 1/1/85 – 12/31/90	10 years 3 years	5 years 15 years
Statutory or Tort Liability Loss	1/1/84 – 12/31/90	1/1/84 – 12/31/90	10 years	15 years
Product Liability Loss	10/1/79 – 12/31/90	10/1/79 – 12/31/90	10 years	15 years
Specified Liability Loss	1/1/91 – 12/31/99	1/1/91 – 8/5/97 8/6/97 – present version of code	10 years 10 years	15 years 20 years
Foreign Expropriation Loss	1/1/59 – 12/31/90	1/1/59 – 12/31/90	0 years	10 years
Cuban Expropriation Loss	1/1/59 – 12/31/90	1/1/89 – 10/3/76 10/4/76 – 12/31/90	0 years 0 years	15 years 20 years
Regulated Transportation Corporation	1/1/56 – 12/31/75	1/1/56 – 8/15/93	3 years	7 years*
Real Estate Investment Trust (REIT)	10/5/76 – 12/31/99	10/5/76-8/5/97 8/6/97-present version of code	0 years 0 years	15 years** 20 years
General Stock Ownership Corporation	Chartered between 1/1/79 – 1/1/84	1/1/79 – 10/22/86	0 years	10 years

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

*NOTE: During the period 1/1/76 – 12/31/81 the carryback period for Regulated Transportation Corporations was increased to 9 years. PL 97-34 changed this back to 7 years for all losses that were still “alive” in 1981.

**NOTE: During the period 10/5/76 – 10/31/81, the carryforward period for REIT’s was only 8 years. PL 97-34 increased this to 15 years for all losses that were still “alive” in 1981.

10. Election To Forego Carry Back Period

For tax years ended after 12/31/75, the IRS made a federal provision for relinquishing the carryback period and carrying the loss forward. To make the election federally, either a statement must be attached to the loss year return (for years prior to 12/31/92) or the election box must be checked on Schedule K of the federal 1120 (for years ended on or after 12/31/92). This election must be made by the due date of the loss year return including extensions to indicate the taxpayer's intentions to forego the carryback period. Once the election is made, the loss can only be carried forward and the taxpayer cannot change the election for that loss year. The election is made independently for each year in which a loss is incurred. Ref: IRC § 172(b)(3)(C).

EXAMPLE:

1983	**1984**	**1985**	**1986**	**1987**	**1988**
4,000	500	1,000	(10,000)	2,000	(3,000)

In this situation, taxpayer may elect to carryforward the 1986 FNOL because of complications that may occur if it was carried back to 1983 (perhaps the investment credits would be wiped out). Taxpayer decides that a carryback of the 1988 FNOL to 1985 would be beneficial. Taxpayer is allowed to make the carryback/carryforward decision independently for each year.

The passage of PL 94-455 created a unique problem for Illinois in regards to filers that were members of a federal consolidated return. Since federal consolidated members were required to re-compute their Illinois income as if they had filed a separate federal return, a consolidated member could reflect a FNOL when the consolidated group reflected income (and vice versa). It became unclear how the “election” to forego the carryback could be made for these consolidated filers. According to Public Act 80-588 and Income Tax Information Bulletin 1977-1, Illinois REQUIRED that FNOL’s be carried forward as if the member of a federal consolidated return made the election to relinquish the carryback. They were not allowed to carry back their FNOL’s for the period 9/12/77 through 12/31/86.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Caterpillar Tractor Co. and Searle Pharmaceutical challenged this position taking their case before the Illinois Supreme Court. There, the Court ruled that the 1977 amendment by PA 80-588 was unconstitutional and in violation of the uniformity clause in the Illinois Constitution. Searle had argued that it was unconstitutional to treat taxpayers differently just because one taxpayer was a member of an affiliated corporate group that filed a consolidated federal return and the other taxpayer filed a separate federal return. The Court agreed with Searle when it determined that a "...classification must be based on a real and substantial difference between the people taxed and those not taxed, and that the classification must bear some reasonable relationship to the object of the legislation or the public policy." (See Chapter 49 for a synopsis of the Searle Pharmaceutical case.)

As a result of the Searle case, the following guidelines apply to what are termed **"pre-12/31/86" FNOLs**:

(1) Taxpayers that make a federal election must follow that election for Illinois purposes.

(2) Taxpayers that do not incur a NOL for federal purposes may make the election for Illinois purposes.

The Department took the position that the Supreme Court decision in Searle did NOT mean that taxpayers had to file amended returns to carryback losses that had already been carried forward. However, taxpayers still within the proper statutory period were allowed to file amended returns to change a carryforward to a carryback.

11. <u>Statutes of Limitation - FNOL Carryback</u>

For losses incurred prior to December 31, 1986, taxpayers had several separate statutory periods in which to file a claim for refund as a result of a carryback of a federal NOL. If ANY ONE of these statutory periods is open, the NOL may be carried.

The first two statutory periods are outlined in IITA § 911(a)(1).

First a taxpayer has the normal three-year statute for amending original returns for the year to which the loss is being carried.
Second, the taxpayer has one year from the date tax is paid to file a claim for refund of that tax. This refund would be restricted to the additional tax paid.

For example, if a taxpayer has a federal change increasing its federal taxable income and pays Illinois additional tax, that taxpayer would then have one year from paying that tax to file a claim carrying back a loss to offset this additional

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

income. The amount of tax that will be refunded, however, cannot exceed the amount of tax paid within that last year.

The third statutory period can be found under IITA §§ 911(b)(1) and 506(b), and deals with federal changes.

A taxpayer may file a claim for refund within 2 years and 120 days of a federal change being agreed to or finally determined for federal purposes (2 years and 20 days for federal changes finalized prior to July 1, 1986).

86 IAC § 100.5030(b) details another situation derived from IITA § 506(b). It deals with a federal change to a separate Illinois filer who is a member of a federal consolidated return. If a separate Illinois filer incurred a NOL as a member of a federal consolidated return and in that consolidated return year the loss was partially or completely absorbed federally by income of other members of the affiliated group, then a special statute period applies. In this circumstance, the Illinois taxpayer with a pro forma loss has 3 years and 20 days after the last day of the loss year to file a claim for refund reflecting the carryback of the loss.

There are several unique situations which require special consideration in determining the statute. They are as follows:

The first situation deals with FNOL carrybacks and investment credits. If a federal NOL carryback would cause unused investment credit to be carried forward, generating a federal refund in a credit carryforward year (and not the NOL carryback year), the federal finalization for the NOL carryback year would be the date the federal refund is issued for the credit carryforward year. If the resulting credit carryforward does not result in a federal refund, the federal finalization for Illinois purposes is the date taxpayer filed the federal NOL carryback claim.

The second situation concerns the Searle Pharmaceutical court case. When the Supreme Court decision was made in 1987 for Searle Pharmaceutical, many companies had filed protective claims reflecting the carryback of their net operating losses. If these claims were filed within the appropriate statutory periods as previously discussed, refunds were made. However, many taxpayers felt that the decision should automatically open the statutes for them to file claims to carry back their losses, even though they had not filed timely claims. This was not the case. All claims had to have been filed within the appropriate statutory period; otherwise, the loss had to be carried forward. Taxpayers that had already carried forward a loss were allowed to carry back the loss (if the appropriate statutory periods were still open to file the claim) and amend the carryforward year, but they were not REQUIRED to carry the loss back. This was left to the taxpayer's discretion. REF: Information Bulletin FY88-1.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If the statute was closed to amend a loss for the Searle Pharmaceutical decision, taxpayers were entitled to carry back the INCREASE to this FNOL resulting from a federal change. They would have the federal change statute of 2 years and 20 days designated by 86 IAC § 100.5030(b).

This rule would NOT apply to a federal change that increases an INL. In the situation of an INL, taxpayer making the election under 86 IAC § 100.2330(b) (to forego the carryback period), has made an irrevocable election for the taxable year. Therefore, any increase to the INL must also be carried forward.

The Department took the position that a carryback claim to the earliest carryback year would serve as a simultaneous protective claim for the other carry back years for statute of limitations purposes, to the extent that losses are not completely absorbed in the earliest year due to denial or partial denial by the Department.

EXAMPLE:

Corporation A timely filed an IL-1120-X to carry back a 1983 NOL to 1980. The 1983 NOL was the total of net income and losses of Corporation A and all of its subsidiaries. The 1983 NOL was completely absorbed in this amended filing. The group as filed was split into many smaller unitary groups in audit and the NOL carryback of each group to 1980 resulted in a portion of the 1983 NOL remaining for carryback to 1981. Under the Department's position, taxpayer would be allowed to carry the remaining portion of the 1983 NOL to 1981 even though a protective claim was not actually filed for 1981.

The final situation requiring special consideration is when a federal NOL is incurred or increased as a result of an Illinois audit. A signed IL-872 extending the statutory period for a loss year ending prior to December 31, 1986, does NOT extend the statutory period for filing the claim in the carryback year. The taxpayer must still be within the appropriate statutory period to receive a refund from carrying back the loss.

Refer to Chapter 21 for an in depth discussion of statutes and federal changes.

EXAMPLE:

	12/31/1986	12/31/1987
Federal 1120		
Line 28	3,000	3,000
Line 29a	-0-	(1,000)
Line 29b	(4,000)	(2,000)
Line 30	(1,000)	-0-

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IL-1120		
Line 1 Income	(1,000)	1,000
Apportionment	.50	.50
IL Net (Loss)/Income	(500)	500
Exemption	-0-	-0-

The (1,000) FNOL in 1986 has become an Illinois net loss (INL) of (500) in 1986. Under regulations, the (500) INL is carried forward to 1987 and offsets IL net income. For Federal purposes, taxpayer carries forward the (1,000) FNOL and offsets federal taxable income. For Illinois purposes, the specific instructions to the IL-1120 (for 1987 tax years and after) provide a worksheet for taxpayers to determine the amount to enter on Line 1 of the IL-1120. The worksheet results in all FNOL deductions being removed from the calculation of Line 1. A FNOL incurred in a year ending prior to December 31, 1986 will become part of the calculation allowed on Line 5g of the Illinois return. For more information on this issue, refer to the discussion of Line 5g of the IL-1120 in this chapter.

Once the calculation specified by the worksheet is made, taxpayer now reflects 1,000 of income on Line 1 of the IL-1120. This amount is apportioned to reflect 500 of Illinois income. The Illinois net loss deduction then offsets this Illinois income and results in -0- income for the year.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. PURPOSE

This chapter deals with the application of the various credits currently in effect. IITA §250, effective September 16, 1994 provides that all exemptions, credits, and deductions shall be limited by a reasonable and appropriate sunset date. If a reasonable and appropriate sunset date not specified in the Public Act, which creates the exemption, credit or deduction will automatically expire for tax years beginning on or after 5 years after the effective date of the PA's creation.

1299 – Schedule S (Enterprise Zones, Foreign Trade Zones, and Sub Zones)

III. REVENUE AGENTS REPORTS (RAR)

IITA § 506(b), added Illinois reporting requirements for federal changes which affect Article 2 credits. With this legislation, IITA § 506(b) states that changes to taxable income, any item of income or deduction, the income tax liability, or any tax credit which effect the computation of net income, net loss or any Article 2 credits are required to be reported within 120 days of the federal finalization date. This change in § 506(b) applies to any federal adjustments, which were finalized on or after January 1, 1998.

When reviewing Revenue Agents Reports (RAR), authority exists for the Department to recalculate the base period. The Auditor should look at the federal changes to the expenses and credits, which affect the Illinois credits and include them in the audit. If the federal audit is finalized prior to 1/1/1998, the federal changes to credits should be included if there is offset potential with other adjustments. After 1/1/1998, the RAR will open the statute to adjust the credits.

IV. REPLACEMENT TAX INVESTMENT CREDIT (RTIC)

IITA §201(e), IAC §100.2100, and §100.2101

Currently IITA § 201(e) states, in part, "A taxpayer shall be allowed a credit against the Personal Property Replacement Income tax for investment in qualified property ("the investment credit").

- For tax years ending on or after January 1, 1994, the credit is available to any person who is subject to Replacement Tax and who is primarily engaged in manufacturing, retailing or mining of coal or fluorite. REF: IAC § 100.2101.

- For tax years ending prior to January 1, 1994, this credit is available to any person who is subject to Replacement Tax and invested in qualified property used exclusively in manufacturing, retailing, or coal or fluorite mining.

The Replacement Tax credit is a two-part credit:

Part 1: Allowed a credit equal to .5% (.005) of the basis of qualified property placed in service during the taxable year, provided such property placed in service on or after: July 1, 1984. (IITA § 201(e) (1))

Part 2: An additional credit equal to .5% of the basis of qualified property placed in service during the taxable year, provided such property is placed in service on or after July 1, 1986, and the taxpayer's base employment in Illinois has increased by at least 1% (.001) over the preceding year.

- If, in any year, the increase in base employment within Illinois over the preceding year is less than 1%, the additional credit will be limited to one-half of the percentage of increase in the base employment. (IITA § 201(e) (1))

To claim the credit, a taxpayer must file Form IL-477 with their Illinois Income Tax Return.

A. PLACED IN SERVICE – ALL CREDIT YEARS

Properties placed in service the same taxable year in which used in determining the federal investment tax credit.

- "Placed in service" is defined as:
  - Condition or state of readiness; and
  - Available for a specifically assigned function.
    - REF: IRC § 1.46-3(d)(2)

Reasons for property not considered in computing the credit.

- disposed of;
- moved out of Illinois;
- ceases to be qualified for any reason during the same taxable year in which placed in service.

Note: For property, which is disposed of, moved out of Illinois or ceases to be qualified in subsequent years, please refer to the recapture requirements.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

B. BASIS (PART 1) – ALL CREDIT YEARS

- The basis of qualified property is the basis used to compute the depreciation deduction for Federal Income Tax purposes.
  - Basis used to compute depreciation does not include any amount for which an IRC §179 deduction was taken but does include amounts for which a bonus depreciation deduction was taken, including 100% bonus depreciation.
  - Any improvement or addition made is considered qualified property to the extent that it is of a capital nature.
  - If the basis of the property increases or decreases during the taxable year in which placed in service. The basis used for purposes of computing the credit is:
    - If the basis increases in a subsequent year, the increase in basis considered property placed in service on the date of such increase.
    - If the basis decreases in a subsequent year because of a redetermination of the purchase price, the recapture provisions of the credit will apply.

Example: if property is purchased and placed in service in a year and in a subsequent year. The vendor issues a refund to the taxpayer because of the reduction in the purchase price, the basis of that property has decreased, and recapture provisions would apply.

C. ADDITIONAL BASE EMPLOYEMENT CREDIT (PART 2) – ALL CREDIT YEARS

For purposes of calculating the additional investment credit, base employment in Illinois defined as:

- The average monthly total of individuals employed in Illinois by a taxpayer during the months of the taxable year in which the taxpayer was taxable in Illinois.

Therefore, to calculate base employment for a year, divide the total number of individuals employed in Illinois during each month of the taxable year (as reported to the Illinois Department of Employment Security on Form UC-3/40) by the number of months in the taxable year in which the taxpayer was in Illinois. REF: IITA § 201(e)(1).

Example:

During calendar year 2010, Corporation X reported 600 employees for the first six months of the year and 750 employees for the last six months. Corporation X's base employment for 2010 was 675, computed as follows:

((600 x 6) + (750 x 6))/12 = 675.

In 2011, X reported 660 employees for the first six months and 696 for the next six months. Therefore, X's base employment for 2011 was 678, computed as follows:

((660 x 6) + (696 x 6))/12 = 678.

Corporation X's percentage of increase in 2011 base employment over 2010 is .44%. This is computed by subtracting the 2010 base employment from the 2011 base employment and dividing the remainder by the 2010 base employment, computed as follows:

(678-675)/675) = .0044 or .44%.

Corporation X will be allowed an additional investment credit of .22% (one-half of the percentage of the increase since the increase was less than 1%) times the adjusted basis of qualified property placed in service in Illinois during the taxable year. If the increase in base employment had been 1% or greater, the taxpayer would have been allowed the full additional .5% credit.

IITA § 201(e)(1) states that taxpayers that are new to Illinois would be deemed to have met the 1%-growth in employment for the first year in which they file employment records with the Illinois Department of Employment Security. The provision applies retroactively to 1986 if all other qualifications are met. REF: Sunshine letter IT90-0059.

D. DEFINITION OF QUALIFIED PROPERTY:

1. Tangible

   Buildings and structural components of buildings and signs are considered tangible property for purposes of the credit.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- However, improvements to realty other than buildings and their structural components and signs do not meet tangible property for purposes of this credit, such as:

    - landscaping
    - sewer lines
    - local access road
    - fencing
    - parking lots
    - other appurtenances

<u>For tax years ending prior to January 1, 1994:</u>

- If a building used for both qualifying and non-qualifying operations, the cost needs apportioned. The apportioned cost is determined by multiplying the cost of the building by a fraction, the numerator of which is the total square footage devoted to qualifying operations and the denominator of which is the total square footage;

- When certain areas of the building used for both qualifying and non-qualifying operations (such as corridors, elevators, etc.), the square footage of these areas is eliminated from the numerator and denominator of the fraction. REF: IAC § 100.2100(f); Sunshine letter IT89-0301.

2. Depreciable Pursuant to IRC § 167

(1) Provides a depreciation deduction for the exhaustion and wear and tear (including a reasonable amount for obsolescence) of property which is used:
- In the trade or business
- Held to produce income

(2) The property must have a useful life of four or more years as of the date placed in service.

(3) Property depreciated under the Accelerated Cost Recovery System (ACRS) considered depreciable under the IRC.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

(4) Some examples of tangible property, which are not depreciable, are:
(a) Land,
(a) Inventories
(b) Stock in trade
(c) Natural resources

3. IRC § 179

(1) Allows taxpayers, under certain circumstances, to expense equipment purchased in a single tax year, which is ordinarily depreciated under IRC § 167.

(2) Commonly referred to as the "Section 179 Expensing Election", the amount expensed in each year shall not exceed the following amounts:

Tax Years Beginning In	Amount
1983 - 1987	$5,000
1988 - 1989	$7,500
1990 - 1992	$10,000
1993 - 1996	$17,500
1997	$18,000
1998	$18,500
1999	$19,000
2000	$20,000
2001 - 2002	$24,000
2003	$100,000
2004	$102,000
2005	$105,000
2006	$108,000
2007	$125,000
2008 – 2009	$250,000
2010 –2016	$500,000
2017	$510,000
2018 - 2019	$1,000,000

Property not fully expensed under IRC § 179 would qualify for the Illinois investment tax credit. The credits calculated based on the cost of the depreciable property reduced by the IRC § 179 deduction. REF: Sunshine letter IT88-0161.

Note: For further information regarding the effective dates and the limitation amount of the IRC § 179 Expensing Election, refer to the appropriate sections of the IRC.

4. IRC § 168
   - The credit specifically excludes "3-year property"
   - Defined as' "Section 1245" class property with a present class life of 4 years or less. IRC § 168(c)(2)(A)
   - Used in connection with research and experimentation
   - January 1, 1986, automobiles and light trucks considered 5-year depreciable property. REF: Sunshine letter IT88-0166.

E. CATAGORIES OF ASSETS

IRS Revenue Procedure 87-56 lists the class lives of assets. The following considered "3-year property" and would not qualify for the credit:

1. ASSET CLASS 00.26 - Tractor units for use over-the-road.

2. ASSET CLASS 20.5 - Manufacture of Food and Beverages - Special Handling Devices. This class includes such items as returnable pallets, palletized containers and fish processing equipment including boxes, baskets, carts and flaking trays.

   Note: This class does not include general-purpose small tools, both hand and power-driven and other general-purpose equipment such as conveyors, transfer equipment and material handling devices.

3. ASSET CLASS 30.11 - Manufacture of Rubber Products - Special Tools and Devices. This class includes such assets as jigs, dies, mandrels, molds, lasts, patterns, specialty containers, pallets, shells, tire molds, and accessory parts such as rings and insert plates used in the production of products from natural, synthetic or reclaimed rubber, gutta percha, balata or gutta sika, such as:

   - Mechanical rubber goods;
   - Tubes;
   - Heels and soles;
   - Rubber footwear;
   - Flooring;
   - Rubber sundries; and
   - Tires, including also recapping, retreading and rebuilding.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Note: This class does not include tire-building drums, accessory parts, general-purpose small tools and general-purpose equipment such as conveyors and transfer equipment.

4. ASSET CLASS 30.21 - Manufacture of Finished Plastic Products - Special Tools. This class covers special tools: which may include jigs, dies, fixtures, molds, patterns, gauges, specialty transfer, and shipping devices, used in the manufacture of plastic products and the molding of primary plastics for the trade excluding the manufacture of basic plastics materials and phonograph records.

5. ASSET CLASS 32.11 - Manufacture of Glass Products - Special Tools. This class covers special tools which may include molds, patterns, pallets and specialty transfer and shipping devices (such as steel racks to transport automotive glass) used in the production of flat, blown or pressed products of glass such as float and window glass, glass containers, glassware and fiberglass. This class does not include any special tools used in the manufacture of lenses.

6. ASSET CLASS 34.01 - Manufacture of Fabricated Metal Products - Special Tools. This class covers special tools which may include dies, jigs, molds, patterns, fixtures, gauges and returnable containers and drawings concerning such special tools used in the production of metal cans, tin ware, fabricated structural metal products, metal stampings and other ferrous and nonferrous metal and wire products not included in another asset class. This class does not include special tools used in the manufacture of non-electric heating apparatus.

7. ASSET CLASS 37.12 - Manufacture of Motor Vehicles - Special Tools. This class covers special tools which may include dies, jigs, molds, patterns, fixtures, gauges and specialty transfer and shipping devices, owned by manufacturers of finished motor vehicles and used in the manufacture and assembly of finished automobiles, trucks, trailers, motor homes and buses.

Note: the term "special tools" are tools specifically designed for the production or processing of particular parts. Have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced. It also does not include either hand or power-driven general-purpose tools or other general-purpose equipment such as conveyors, transfer equipment, and materials handling devices.

F. LEASEHOLD IMPROVEMENTS

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

IRC § 1.167(a)-4, governs the determination of whether a leasehold improvement is depreciable. REF: Sunshine letter IT86-0100.

G. ACQUIRED BY PURCHASE

The property can be new or used, but cannot have been previously used in Illinois, in such a manner and by such a person as would qualify for the RTIC, or for the IITA § 201(f) Enterprise Zone Investment Credit.

1. IRC § 179(d) defines the term "acquired by purchase" as property, which the taxpayer: constructs, reconstructs or erects, itself is generally considered acquired by purchase. A purchase is defined as any acquisition of property but only if:

   a) The basis of the property in the hands of the person acquiring it is not determined:

      (1) In whole or in part by its adjusted basis in the hands of the person from whom the property was acquired; or

      (2) Under IRC § 1014(a), which applies to property acquired from a decedent. Therefore, property acquired by a bequest does not qualify as acquired by purchase.

   b) The property is not acquired from a person whose relationship to the acquiring person is such that it would result in the disallowance of losses under IRC § 267 or 707(b).

2. IRC § 267 – disallowed relationships are as follows:

   (a) Members of a family - The members of a family of an individual are limited to the individual's spouse, ancestors, and lineal descendants. IRC § 267(c)(4) defines "family" to also include brothers and sisters, but IRC § 179(d)(2)(A) provides that only spouses, ancestors and lineal descendants are treated as family for purposes of § 179. For example, if a husband and wife jointly purchase property from the husband's father, the property is treated as not acquired by purchase only to the extent of the husband's interest in the property. (Ref: CFR § 1.179-4(c)(ii));

(b) An individual and a corporation of which the individual owns (or it is owned for him), either directly or indirectly, more than 50 percent of the value of the outstanding stock;

(c) Two or more corporations which are members of the same controlled group, as defined in IRC § 267(f)(1) (see below);

- A grantor and a fiduciary of the same trust;
- A fiduciary of a trust and a fiduciary of another trust if the same person is a grantor of both trusts;
- A fiduciary and a beneficiary of the same trust;
- A fiduciary of a trust and beneficiary of another trust, if the same person is a grantor of both trusts;
- A fiduciary of a trust and a corporation if more than 50% of the value of the outstanding stock of the corporation is owned, directly or indirectly by or for the trust or by or for a person who is a grantor of the trust;
- A person and an organization to which IRC § 501 (relating to certain educational and charitable organizations which are exempt from tax.) applies and which is controlled directly or indirectly by the person or, (if the person is an individual) by members of the family of the individual;
- A corporation and a partnership if the same person own:
    - More than 50% in value of the outstanding stock of the corporation, and more than 50% of the capital interest or the profits interest in the partnership;
- Two S Corporations if the same person(s) own(s) more than 50% in value of the outstanding stock of each corporation;
- An S corporation and C corporation, if the same person(s) own(s) more than 50 percent in value of the outstanding stock of each corporation; or

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- An executor of an estate and a beneficiary of such estate except in the case of a sale or exchange in satisfaction of a pecuniary bequest.

For purposes of IRC § 267, a controlled group has the same meaning as in IRC § 1563(a), except the stock ownership requirement is more than 50% (rather than 80%). The following discussion of IRC § 1563(a) has been adjusted accordingly.

IRC § 1563(a) lists the following four types of controlled groups:

1. Parent-Subsidiary - This type requires that one or more chains of corporations connected through stock ownership with a common parent if:

   a) More than 50% of the total of all outstanding voting stock or more than 50% of the total value of all shares of stock of each corporation, except the common parent, must be owned by one or more of the other corporations; and

   b) The common parent must directly own more than 50% of all outstanding voting stock (regardless of the class of stock) or more than 50% of the total value of all shares of stock of at least one of the other corporations.

2. Brother-Sister - This type of group involves two or more corporations, with five or fewer persons who are individuals, estates or trusts, who own stock possessing:

   a) More than 50% of the combined voting power of all classes of stock or more than 50% of the total value of all shares of stock (regardless of the class) of each corporation; and

   b) More than 50% of the total combined voting power of all classes of voting stock or more than 50% of the total value of all shares of all classes of stock of each corporation. This requirement limits the amount of stock, taken into account to that amount identically held for each corporation.

3. Combined Group - This type of group includes three or more corporations, each of which is a member of one of the two groups described above and one of which:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

a) Is a common parent corporation in a "parent-subsidiary" controlled group.

b) Included in a "brother-sister" controlled group.

c) Members of a combined return are allowed the credit, if all other requirements are met, when one member of the group purchases the property and another member uses the property.

4. Certain Insurance Companies – This fourth type of controlled group is one comprised only of life insurance companies, which IRC § 1563(a)(4) says cannot be combined with other types of business but instead must form a separate controlled group. IRC § 267(f)(1) states that § 1563(a)(4) does not apply.

a) As a rule, if a taxpayer is allowed a federal depreciation deduction on an asset, it is assumed that the asset was "acquired by purchase”.

b) It should also appear on the federal Schedule L Balance Sheet.

(1) If the taxpayer is attempting to claim an investment credit on an asset that is not included on the federal Schedule L, nor has a depreciation expense been claimed for the asset. It is taxpayer's responsibility to prove that the asset was "acquired by purchase" per the above federal regulation sections.

Note: An exception to the above rule exists for assets, purchased from another member of the controlled group. The federal regulations define a member of a controlled group for "acquired by purchase" purposes as one, which owned or own more than 50% of the voting stock of another corporation. This is also true for Illinois purposes because the stock ownership requirement is more than 50% for membership in a unitary group.

3 IRC § 707 - disallowed relationships are:

a) A partnership and a person who owns, either directly or indirectly, more than 50% of the capital interest, or the profits interest in the partnership.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

b) Two partnerships, in which the same person owns, either directly or indirectly, more than 50% of the capital interest or profit interest,

H. QUALIFIYING USE

The property must be physically located in Illinois and used by the taxpayer claiming the credit. When determining whether the property is being "used in Illinois", the following needs taken into consideration:

Note: Mobile property - considered predominantly used in Illinois if its usage in Illinois exceeds its usage outside of Illinois. When calculating the percentage of time, the equipment is "used" in Illinois, storage time needs eliminated from both the numerator and denominator. Storage time includes indefinite storage and overnight parking of a loaded vehicle. REF: Sunshine Letter IT92-0083

FOR TAX YEARS ENDING ON OR AFTER JANUARY 1, 1994

A taxpayer that is primarily engaged in manufacturing, retailing or in mining coal or fluorite must use the property; or property placed into service on or after 7/1/06 that is used in a River Edge Redevelopment Zone.

1. This determination is based on the primary occupation of the taxpayer, not on the specific use of the property. For example, if a taxpayer is determined primarily engaged in retailing, all property placed in service (if it meets the other qualifications for the credit) will be eligible for the credit, regardless of its specific use.

    a) An explanation of how to determine if a taxpayer is primarily engaged in manufacturing, retailing or mining of coal or fluorite can be found in the Section "Procedure for determining “primarily engaged”” below.

FOR TAX YEARS ENDING PRIOR TO JANUARY 1, 1994

The property must be used in Illinois by the taxpayer in manufacturing, retailing or mining coal or fluorite.

1. This determination is based on the specific use of the property, not the general occupation of the taxpayer. For example, the property does not qualify for the credit because the taxpayer is generally considered a retailer. The property itself must be used in a retailing activity.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

a) IAC § 100.2100(e)(7) states that the property must be used "exclusively" in manufacturing operations, retailing, coal mining, or fluorite mining. Incidental or de minimis use of a computer system in non-qualifying activities would not alone, disqualify the property for the credit. REF: Sunshine Letter IT91-0338.

I. PROCEDURE FOR DETERMINING "PRIMARILY ENGAGED"

A taxpayer considered to be primarily engaged in manufacturing, retailing or mining of coal or fluorite.

1. If over 50% of the taxpayer's gross receipts are from one or more of the qualifying activities.

   a) In the case of a combined group, the determination of eligibility shall be made for the combined group, rather than for any individual member.

2. To make that determination; the Auditor must perform the "Gross Receipts Test".

   a) Term "gross receipts" refers to gross receipts received by the taxpayer in the ordinary course of business.

   (1) Examples of gross receipts not received in the ordinary course of business would be a casualty loss or a sale of a fixed asset. If taxpayer suffers a casualty loss and compensated by insurance payment, the amount of money received will not be included in "gross receipts" received in the ordinary course of business. REF: IAC § 100.2101(f).

J. GROSS RECEIPTS TEST

Must be performed to determine if the taxpayer is engaged primarily (more than 50%) in a qualifying activity such as manufacturing, retailing, or in the mining of coal or fluorite (see note below on wholesalers).

1. To determine the percentage, we must divide the taxpayer's receipts from qualifying activity by the total receipts.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

a) If more than 50% of the taxpayer's gross receipts are from manufacturing, the taxpayer is primarily engaged in manufacturing. The same would apply for retailing and mining coal or fluorite. If a combination of manufacturing, retailing or mining coal or fluorite receipts total more than 50% of the gross receipts, a corporation is eligible for the credit.

2. The credit is limited to activities of Illinois taxpayers

   a) Only included are the gross receipts of eligible members of the combined group (Illinois nexus companies) when performing the test on a unitary group.

   b) In the case of a combined group, the denominator will be the total of the eligible members of the combined group's receipts and the numerator will be the total of the eligible member's receipts from qualifying activity. REF: IITA § 203(e)(2)(E). IAC § 100.5201 provides the definition of an eligible member of the combined group. IAC § 100.5270(d) defines the combined credits.

3. Gross receipts of corporations; which otherwise would be members of the combined group but have no nexus or which cannot be combined for another reason such as one factor with three factors, are not considered in this determination.

   - To be consistent, all receipts from lines 1c plus sales tax, shipping and handling, labor, etc. and lines 5 through 10 of the U.S. 1120 will be used for the denominator except for items not received in the ordinary course of business.

   - In determining the numerator for the gross receipts test, only receipts from the above lines received in the ordinary course of business from a **qualifying activity** will be used.

   - Non-business income will be excluded from the calculation.

   - In determining whether a combined group is primarily engaged in retailing. Gross receipts from transactions between eligible members of the combined group shall be eliminated from both the numerator and the denominator of the computation.

   - In determining whether a combined group is primarily engaged in manufacturing or in the mining of coal or fluorite, gross receipts from these activities will include gross receipts from the sales of products

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

manufactured, coal, or fluorite mined by one eligible member of the combined group to another eligible member. If including the gross receipts from the sales of products manufactured or coal or fluorite mined creates distortion, the amount can be adjusted under IITA § 404. REF: IAC § 100.5270(d)(3)

K. MANUFACTURING

Manufacturing operations are defined in IITA § 201(e) as the material staging and production of tangible personal property by procedures commonly regarded as manufacturing, processing, fabrication, or assembling which changes some existing material into new shapes, new qualities, or new combinations. (IAC § 100.2100(e)(8)).

- It is not necessary for the procedures to result in a finished consumer product.

Property used in the following activities **would** be considered being used in **manufacturing processes**:

- **Production machine testing equipment or quality control equipment** would generally qualify for the credit since used in operations, necessary to efficient manufacture of products that will meet quality standards.

- A process, which by the **introduction of chemical agents**, changing raw, non-drinkable water into purified, drinkable water.

- **Printing** has always been considered a manufacturing activity and therefore, any tangible property, which was used in the printing process, would have met this requirement of the credit. However, printing does not extend to activities considered Graphic Arts. See section below.

Property used in the following activities would generally **not** be considered being used in **manufacturing processes**:

- **Agricultural activities** including the raising and/or breeding of animals. Examples of agricultural activities would include cultivating the soil; raising or harvesting crops; producing seed or seedlings; and developing hybrid seeds, plants or shoots. Raising and/or breeding animals would include the raising and/or breeding of livestock, poultry, fish or any other animals, as well as commercial fishing or beekeeping. REF: Sunshine Letter IT95-0096;

- **Mining, quarrying, logging, drilling or any extractive process**.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- **The construction, reconstruction, alteration, remodeling or improvement of real estate;**

- **Research and Development**. However, Illinois has a Research and Development Credit, discussed in a later section of this Chapter. Please refer to the Table of Contents;
- **Managerial activities** such as waste disposal, inventory control, production scheduling, work routing, purchasing, receiving, accounting, fiscal management, general communications, plant security, or personnel matters;

- **Office equipment, telephone systems, and vehicles** used by sales representatives making sales calls and/or trucks used for delivery of a finished product, are some examples of non-qualifying property. REF: Sunshine letter IT85-0327 and IT88-0249. Delivery trucks used in a retailing activity qualify for the credit.

    - **CAD/CAM** (computer assisted design/computer assisted manufacturing) systems - considered manufacturing activities only when system is integrated into the manufacturing operations. If the CAD/CAM system were used only for design purposes, it would not qualify for the Investment Credit

- **Graphic Arts** is considered a sale of service and is therefore not retailing or manufacturing. This includes taxpayers that provide digital imaging prepress services without doing the actual printing. See Schawk, Inc. v. Kenneth Zehnder, DOR, Cite 2001 WL 1480829 (ILL. App. 1 Dist), Docket 1-00-1872 (2001).

L. RETAILING

Retailing is defined in IITA § 201(e)(3) as the sale of tangible personal property or services rendered in conjunction with the sale of tangible consumer goods or commodities. IAC § 100.2101(e)(9) states that the tangible personal property must be finished consumer goods, and the property must be sold to its ultimate consumer. Sales of tangible personal property for resale are not included in the definition of retailing.

1. SERVICES PROVIDED WITH SALE

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

a) Included in the definition of retailing, for purposes of this credit, are any services rendered in conjunction with the sale of tangible consumer goods or commodities such as uncrating, cleaning, assembling, delivery or installation, provided such services when are in conjunction with the retailing activities.

(1) Pursuant to Illinois, case law:

(a) Natural gas is tangible personal property. Therefore, sellers of natural gas <u>are</u> retailers and eligible for the credit.

(b) For decades, electricity was not considered tangible personal property. Exelon Corporation, parent of Illinois utility Commonwealth Edison, challenged that position, seeking millions of dollars for claims seeking the RTIC because the company was a retailer of electricity that should be considered tangible personal property.

The Illinois Supreme Court on February 20, 2009 issued its decision in *Exelon Corporation* reversing the Appellate Court and concluding that electricity is tangible personal property for purposes of the Corporate Income and Replacement Tax. In reaching, that conclusion the court not only reversed the lower courts' decisions but also 52 years of tax policy that assumed that electricity was an intangible.

For tax years ending after December 31, 2008, sellers of electricity do not qualify as retailers for purposes of the RTIC. REF: P.A. 96-115 (eff. July 31, 2009) REF: Keystone Consolidated v. Allphin, 45 Ill.App.3d 714 (1977) (Natural Gas), Farrand Coal v. Halpin, 10 Ill.2d 507 (1957), Exelon Corp. v. Dept. of Revenue (2009), 234 Ill.2d 266 (Electricity).

2. OFF-SITE WAREHOUSE, TRANSPORTATION AND OFFICE EQUIPMENT

a) The Department had taken the position that off-site warehouse; transportation and office equipment <u>was not</u> used either directly in the retail operation or in the performance of a service rendered in conjunction with a specific sale.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

(1) The Appellate Court allowed the equipment to qualify saying that the RTIC statute did not contain the “specific sale" requirement.

(a) The property was essential to the retailer's retail operations and without it the retailer could not conduct its sales of goods. REF: American Stores Company and Affiliates v. Illinois Department of Revenue.

Note: The Audit Bureau staff will follow the appellate court decision in American Stores. For tax years ending prior to 1/1/94, we will no longer rely upon the "specific sale" provisions of the regulations to disallow any warehouse, transportation or administrative property used in a retailer's business activities.

Since the decision involved only the definition of the term "retailing", it has no effect on the manufacturing or mining provisions of the credit. Only property used directly in the manufacturing or mining process qualifies during tax years ending prior to 1/1/94.

The other requirements that the property must meet to be "qualified" (i.e. acquired by purchase, depreciable, tangible, etc.) did not change nor did the recapture provisions.

The decision did not affect property used in service activities (as defined in the SOT regulations). For example, the equipment used in a pharmacy at a drug store will not qualify because it is a service activity rather than a retailing activity.

3. SALES OF CHEMICALLY TREATED WATER

a) The sale of chemically treated water by a privately-owned water treatment facility to a customer (i.e. a community) is also considered retailing.

4. ACTIVITIES NOT CONSIDERED “RETAILING”

The following are some additional examples of activities, which are **not** considered to be retailing activities:

- **Hotel or Motel Operations** - This only provides lodging facilities.
  - Hotels or motels which operate restaurants however would be allowed an Investment Credit on any property used in connection

with those activities if the property met all the other necessary qualifications (i.e. depreciable, not 3-year property, etc.). REF: Sunshine letter IT87-0158;

- **Equipment** such as room furniture and fixtures, fire safety equipment, and rehabilitations to locker rooms.

- **Service Professions** - where the transfer of tangible personal property is only an incident to the service being performed are not retailers. For guidance in distinguishing service professions from retailing professions, see IAC § 140.101 et. Seq. (SOT Code) REF: IAC § 100.2100(e)(9)(C).

- **Renters or Lessors** of Tangible Personal Property - The renting or leasing of tangible personal property is not considered to be a service rendered in conjunction with a sale of tangible personal property which would not in any way qualify rental inventory for this credit. REF: Sunshine letter IT88-0141.

M. MINING

Mining (as defined in IRC § 613(c)) includes not only extraction, but also treatment processes such as cleaning, breaking, sorting, sizing, dust allaying, and loading for shipment. REF: IAC § 100.2101(e) (10).

- The operation of a gravel pit does not qualify for the credit since the credit is specifically limited to activities involved in the mining of coal or fluorite. REF: Sunshine Letter IT93-0119.

N. RIVER EDGE REDEVELOPMENT ZONE – EFFECTIVE ON OR AFTER JULY 1, 2006

The RTIC is allowed to any taxpayer placing qualified property in service on or after 7/1/06 in a River Edge Redevelopment Zone created by the River Edge Redevelopment Zone Act.

1. This allows an exception to the requirement that the taxpayer must be primarily engaged in manufacturing, retailing, or mining coal or fluorite.

   Currently, the only River Edge Redevelopment Zones are in Aurora, East St. Louis, Elgin, and Rockford.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- For example, an accounting firm located in a River Edge Redevelopment Zone replaces its office computers and peripheral equipment. The RTIC could be claimed for the purchased equipment. REF: IITA § 201(e)(2)(D), IT 10-0007-GIL.

O. AGRICULTURAL CO-OPERATIVE ASSOCIATION

Prior to October 28, 1998, IAC § 130.1945(b)(2) could be read to hold that any equipment used by a seller of fertilizer and other farm chemicals in the spreading of such fertilizer and other farm chemicals was treated as being used exclusively in retailing. IAC § 130.1945(b)(2), as amended effective October 28, 1998, states that when Agricultural Co-operative Associations such as Farm Fertilizer Service Companies engage in selling services those receipts are subject to Service Occupation Tax. To avoid objection by JCAR, the Department agreed to apply this new regulation prospectively only.

Accordingly, for original returns filed on or after October 28, 1998, receipts from the spreading of such fertilizer and other farm chemicals will be considered sales of service for the gross receipts test. Companies with receipts from sales of service over 50% will not qualify for the credit.

P. REVISIONS FOR WHOLESALERS

On December 20, 2001, a revision was made to IAC § 100.5270(d)(3) that influences how the gross receipts test is calculated.

> **Note**: Paragraph B provides that sales made by a **wholesaler** of goods that it purchased from an eligible member of the combined group engaged in manufacturing or in coal/fluorite mining **would be** considered qualifying receipts. This provision was added to address a problem discovered by an auditor of a combined group that carried out its manufacturing business through several affiliated corporations, all of whom sold their output to a wholesaling affiliate. Because the wholesale affiliate resold the goods at a profit, its gross receipts exceeded the gross receipts from the manufacturing affiliates, disqualifying the group from the credit even though its only business was manufacturing. This new provision applies retroactively.

Q. EXAMPLES

Example 1 - Separate Company

Corporation A operates a hotel

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Total Gross Receipts = $100,000,000

$80,000,000	=	80%	Room rental
$15,000,000	=	15%	Restaurant and lounge operation
$ 5,000,000	=	5%	Gift shop operation

The renting of rooms is not considered retailing. Therefore, Corporation A is ineligible for the credit because it is not engaged primarily in retailing, even though it does engage in some retailing activities through the operation of the gift shop, restaurant and lounge.

Example 2 - Separate Return

Corporation B manufactures CD ROM Units for personal computers, which are sold to others for resale and sells canned software to end-users.

Total Gross Receipts = $100,000,000

$40,000,000	=	40%	retail sales of canned software
$40,000,000	=	40%	custom software development
$20,000,000	=	20%	manufacturing of CD ROM units

Corporation B is not engaged primarily in manufacturing and retailing, because sales of canned software are not sales of tangible personal property, even if the sales are subject to ROT under ROTA Section 2-25. That section overrules the holding in First National Bank of Springfield v. Dept. of Revenue, 85 Ill.2d 84 (1981), that computer software is not tangible personal property, but only does so for purposes of the ROTA. Accordingly, the total of its manufacturing and retailing operations is 20% of its gross receipts. Therefore, the Corporation is not eligible for the credit.

In determining whether a taxpayer is primarily engaged in an activity (Retailing, Manufacturing, etc.), the Department will consider the Gross Receipts of the taxpayer received in the ordinary course of business. If more than 50% of the taxpayer's gross receipts are from manufacturing, the taxpayer is primarily engaged in manufacturing. The same would apply for retailing and mining coal or fluorite. If a combination of Manufacturing, retailing or mining coal or fluorite receipts total more than 50% of the gross receipts, a corporation is eligible for the credit.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Example 3 - Separate Unitary Returns

(T) = Total Receipts (Q) = Qualifying Receipts

Co. A(IL)	Co. B(NY)	Co. C(IL)	Co. D(IN)
$10,000,000 T	$10,000,000 T	$10,000,000 T	$10,000,000 T
$ 9,000,000 Q	$ 3,000,000 Q	$ 6,000,000 Q	$ 5,000,000 Q

Companies A and C filed separate Illinois returns on a unitary basis. In this case the gross receipts test is applied as if the taxpayers were not members of a unitary group. Both the numerator and denominator are computed on a separate basis.

Company A – $9,000,000 / $10,000,000 = 90%

Company C – $6,000,000 / $10,000,000 = 60%

Both companies qualify for the credit since the percentage of qualifying receipts is more than 50%.

Example 4 - Combined Return

Co. A(IL)	Co. B(IL)	Co. C(NY)	Co. D(IN)
$10,000,000 T	$10,000,000 T	$10,000,000 T	$70,000,000 T
$ 6,000,000 Q	$ 2,000,000 Q	$ 4,000,000 Q	$65,000,000 Q

Total receipts of eligible members A and B = $20,000,000
Total qualifying receipts of eligible members = $8,000,000

Company A - $6,000,000/$20,000,000 = 30%
Company B - $2,000,000/$20,000,000 = 10%

$8,000,000/$20,000,000 = 40%

The combined group will not qualify for the credit since the total percentage of qualifying operations is less than 50%. However, Company A would have qualified on its own had it not been a member of the combined return.

Example 5 - Combined Return

Co. A(IL)	Co. B(IL)	Co. C(NY)	Co. D(IN)
$15,000,000 T	$10,000,000 T	$10,000,000 T	$10,000,000 T
$13,750,000 Q	$ 0 Q	$ 3,000,000 Q	$ 8,000,000 Q

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Total receipts of eligible members A and B = $25,000,000
Total qualifying receipts of eligible members A and B = $13,750,000

Company A - $13,750,000/$25,000,000 = 55%
Company B - $0/$25,000,000 = 0%

$13,750,000/$25,000,000 = 55%

The combined group would qualify for the credit since the total percentage of qualifying operations is more than 50%. Company A would have qualified for the credit on its own had it not been unitary. Company B would not have qualified on its own had it not been unitary.

Example 6 - Combined Return

Co. A(IL)	Co. B(IL)	Co. C(IL)	Co. D(IN)
$10,000,000 T	$5,000,000 T	$20,000,000 T	$5,000,000 T
$ 6,000,000 Q	$3,000,000 Q	$ 8,000,000 Q	$ 0 Q

Total receipts of eligible members A, B and C = $35,000,000
Total qualifying receipts of eligible members = $17,000,000

Company A $6,000,000/$35,000,000 = 17%
Company B $3,000,000/$35,000,000 = 8.5%
Company C $8,000,000/$35,000,000 = 23%

$17,000,000/$35,000,000 = 48.5%

The combined group does not qualify for the credit since the total percentage of qualifying operations is less than 50%. However, Companies A and B would have qualified if they filed separate returns and Company C would not have qualified if separate.

Example 7 - Combined Return

Co. A (IL) (retailer)	Co. B (IL) (retailer)	Co. C (NY)	Co. D (IN)
$10,000,000 T	$20,000,000 T	$30,000,000 T	$70,000,000 T
$ 2,000,000 Q	$16,000,000 Q	$25,000,000 Q	$55,000,000 Q

Company A, a retailer, had $5,000,000 of intercompany sales to Company C. Company B had $10,000,000 intercompany sales to Company D. In doing the gross receipts test, intercompany sales are not eliminated if the sale is made to a

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

non-qualifying member of the group. Although 100.5270(d)(3) allows for intercompany eliminations between “eligible members” that are retailers, Company C and Company D are not “eligible members” because they do not have Illinois nexus. However intercompany sales between Company A and Company B would be eliminated from both the numerator and denominator under 100.5270(d)(3) because they are retailers.

Total receipts of Illinois members A and B = $30,000,000
Total qualifying receipts of Illinois members = $18,000,000

Company A $2,000,000/$30,000,000 = 7%
Company B $16,000,000/$30,000,000 = 53%

$18,000,000/$30,000,000 = 60%

Both companies would qualify for the credit since the total percentage of qualifying operations is more than 50%. Company B would have qualified for the credit had it not been unitary, but Company A would not qualify had it not been unitary.

Example 8

The same facts as example #7 except for the fact that company A is a service company.

Both companies would qualify for the credit since the total percentage of qualifying operations is more than 50%. The fact that company A is a service company has no effect on the credit if the company is in the unitary group. If Company A was separate instead of unitary, it would not qualify for the credit since the qualifying receipts were less than 50%.

R. CHANGES IN UNITARY GROUP MEMBERS

IAC § 100.5270(d)(4) regarding a combined return state:

> “For purposes of determining the increase in employment in Illinois for a common taxable year, the Illinois employment of all taxpayers who are members of the combined group during that common taxable year shall be used; that is, both prior and current year Illinois employment of current members who were not members of the combined group in the prior year shall be included in the determination, while prior and current year Illinois employment of taxpayers who ceased to be members of the combined group during the current or prior year shall be excluded.”

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- Therefore, the auditor will have to adjust the base period so that like members of the group are included.

Example:

Corporations A, B and C were members of a unitary business group which filed a combined return for 2001. Corporation D was not a member of the ABC combined group in 2001 but became a member of combined group ABCD filing a combined return for 2002.

During 2001, Corporations A, B and C employed 150 people in Illinois and Corporation D employed 50 people in Illinois, for a total of 200. During 2002, Corporations A, B and C employed 100 people in Illinois and Corporation D employed 100 people in Illinois, again for a total of 200.

IITA § 201(e), which provides for a Replacement Tax Investment Credit for qualified property placed in service by the taxpayer during the year, allows an additional 0.5% credit for such property to a taxpayer whose Illinois employment has increased by at least 1% over its Illinois employment in the immediately preceding year. Combined group ABCD cannot qualify for the additional 0.5% credit during 2002 because the combined Illinois employment of Corporations A, B, C and D remained unchanged between 2001 and 2002.

S. CURRENT POLICY ON PASS-THROUGH CREDITS

PA 91-913 amended § 201(e) effective for tax years ending on or after 12/31/2000, to state that:

1. Partnerships may no longer make the election to flow through their investment credits to their partners.

2. Investment credits earned by the partnership or the S corporation that are allocable to their partners or shareholders subject to replacement tax automatically flow through to those partners or shareholders.

   a) The new automatic pass through applies only to the RTIC earned during the taxable year and does not apply to carry forwards.

For tax years ending prior to 12/31/2000, IAC § 100.2101(h)(1) allows a partnership or S corporation to elect to pass the RTIC through to its partners or shareholders. The election to pass through the credit may be made by filing an amended return.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- Once the election is made, it is irrevocable.
- The RTIC can only be carried forward 5 years from the year that it is earned. The auditor must verify when the entity earned the RTIC and how many years it carried the credit forward before passing it through to the partners.

T. CARRYOVER OF EXCESS CREDIT

The credit can never be used to decrease a taxpayer's liability below zero. Amendments were made to IITA § 201(e)(1) for tax years ending on or after December 31, 1987 to allow the carry-forward of any excess credit.

Any credit earned in a tax year after December 31, 1998, more than the Replacement Tax liability for the year in which the property was placed in service can be carried forward 5 taxable years following the year the credit was earned.

- The credit must be applied against the earliest carry-forward year for which there is a liability. If there is a credit from more than one tax year, the oldest credit will be applied first.

Any credits earned in tax years ending on or after December 31, 1987 and on or before December 31, 1988, a five-year carry-forward of any excess credit was only allowed if the taxpayer met all the following requirements:

- Located in an Enterprise Zone; and
  - Certified by DCCA (now DCEO, Department of Commerce and Economic Opportunity) as complying with the requirements set forth in a) and b) above by July 1, 1986. DCCA was required to notify the Department of all such certifications immediately.

Any person not meeting the above requirements of PA 84-165 would forfeit any investment credit more than the Replacement Tax liability for the same tax year.

Note: Diamond Star Motors Corporation was the only company that met the carry-forward criteria during that period. REF: PA 84-65 and 86-44.

U. RECAPTURE OF CREDIT – ALL CREDIT YEARS

Recapture is required and the Replacement Tax for such a taxable year shall be increased.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

1. Property ceases to be qualified if, within 48 months of placing it into service, the property is:

   a) Disposed of when:

      - Sold,
      - Exchanged or traded for new property,
      - Abandoned or retired from use.
      - Destroyed by casualty, stolen, or transferred as a gift
      - Transferred to a trustee in bankruptcy is considered disposed of in the year the property is transferred to the trustee. A transfer of property by foreclosure. REF: IAC § 100.2101(g)(2).

        Note: Mortgaged or used as security for a loan does not cease to qualify provided the taxpayer continues to use the property within Illinois.

   b) Moved outside of Illinois;

   c) Converted to personal use;

   d) For tax years ending on or after January 1, 1994, used by a taxpayer not primarily engaged in manufacturing, retailing or mining of coal or fluorite operations;

   e) For tax years ending prior to January 1, 1994, used in other than manufacturing, retailing, coal mining or fluorite mining activities;

   f) Reduced in basis. - The reduction of the basis of qualified property resulting from the redetermination of the purchase price is a disposition of qualified property to the extent of such reduction in the taxable year the reduction takes place. This occurs, for example, when property is purchased and placed in service in one year, and in a later year the taxpayer receives a refund of part of the original purchase price. See 26 CFR 1.47-2(c) (2010). REF: IAC § 100.2101(g)(3).

      - If the basis of the property is decreased, it will cause the replacement tax liability to be increased in the year that the basis decreased. To arrive at the correct investment tax credit allowable:

(1) Recalculate the investment credit allowable based on the decreased value of the property; and

(2) Subtract the recalculated credit from the amount of credit previously allowed.

- The difference between the recalculated credit and the credit used is added to the Replacement Tax liability in the year the basis is reduced.

RECAPTURE ISSUES

1. If the asset qualified under the pre-1994 law and regulations, but after 1994 the taxpayer is not engaged in a qualifying activity, there is no recapture unless the asset was disposed of within the 48-month period.

2. If a taxpayer qualifies under the new law, for example, as a retailer, and then in a later year within the recapture period, ceases to qualify as a retailer, the credit is subject to recapture.

V. SALE AND LEASEBACK

A sale-leaseback is a disposition, which triggers the investment tax credit, recapture because the property ceases to be “qualified property” because it is no longer depreciable and no longer acquired by purchase, but by lease.

- Neither the lessor nor the lessee of property, which could properly be considered "qualified", can claim this credit. The lessor who owns the property is not using the property in a qualifying manner and the lessee who is using the property has not acquired the property by purchase. REF: Sunshine letters IT83-1013, IT85-0460, IT85-0690, IT85-0881

- The federal treatment of sale/leaseback transactions in the Internal Revenue Code is irrelevant because the language in the Illinois statute is distinctly different. REF: May Department Stores vs. IDOR, Cook County Circuit Court, Dkt 96 L 50934 (1999).

W. IRC 338(H) (10) ELECTION

IITA § 201(e)(7) requires recapture of investment credit where "any property ceases to be qualified property in the hands of the taxpayer within 48 months after being placed in service."

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- Under IITA § 201(e)(2)(E), property that has been previously used in Illinois in such a manner and by such a person as would qualify for the 201(e) credit is not "qualified property" for purposes of the investment credit. Accordingly, a new taxpayer may not claim the investment credit with respect to that property deemed purchased that qualified for the investment credit in the hands of old taxpayer.

- Where an IRC § 338(h) (10) election is made for tax purposes the assets are deemed transferred from one taxpayer to a different taxpayer. Accordingly, the property deemed sold ceases to be qualified property "*in the hands of the taxpayer*" for purposes of recapture under IITA § 201(e)(7). Thus, recapture is required.

- Where a qualifying purchase of stock is made, and the purchaser and seller elect under IRC § 338(h) (10), the subsidiary whose stock was purchased by the old taxpayer is deemed to have sold all its assets in a single transaction to a new corporation (new taxpayer).

- Old taxpayer is then deemed to liquidate. In most cases, old taxpayer's tax attributes are acquired by its parent in the deemed liquidation pursuant to IRC § 381. New taxpayer is a new corporation for income tax purposes.

V. ENTERPRISE ZONE AND RIVER EDGE REDEVELOPMENT ZONE INVESTMENT CREDIT

IITA §201(f) IAC §100.2110

IITA § 201(f) provides for an Enterprise Zone Investment Credit and a River Edge Redevelopment Zone Credit (for property placed in service on or after July 1, 2006) which is available to individuals, corporations, trusts and estates. It is a .5% credit computed based on qualified property in use in an Illinois Enterprise Zone, or qualified property placed into service in a River Edge Redevelopment Zone on or after July 1, 2006. The basis of qualified property is the basis used to compute the federal depreciation deduction.

For partners and shareholders of subchapter S corporations, there shall be allowed an enterprise zone or river edge redevelopment zone investment credit to be determined in accordance with the determination of income and distributive share of income under IRC § 702 and § 704 and subchapter S.

Schedules used to compute the Enterprise Zone/River Edge Redevelopment Zone credits are listed in the Reference Sources Section (II).

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

A. RIVER EDGE – ADDITIONAL CREDIT FOR BASE EMPLOYMENT (INCREASE)

An additional credit of .5% of the basis of qualified property placed into a River Edge Redevelopment Zone on or after 7/1/06 is allowed where the Illinois base employment increased by 1% or more over the preceding year. If the base employment increases less than 1%, then the additional credit is the percentage increase multiplied by .5.

B. QUALIFIED PROPERTY

For purposes of this credit, to be qualified, the property:

1. Must be tangible (either new or used) including buildings and structural components of buildings;

Note: IITA § 201(f)(2)(A) does not have the provision contained in IITA § 201(e)(2)(a) stating that signs are qualified property, even if they would otherwise be considered real property. Accordingly, a sign might qualify for the RTIC but not for the enterprise zone credit.

2. Must be depreciable pursuant to IRC § 167 except that "3-year" property as defined in IRC §168(c)(2)(A) does not qualify;

3. Must be acquired by purchase per IRC § 179(d);

4. Must be used within an Enterprise Zone or River Edge Redevelopment Zone (after July 1, 2006) in Illinois by the taxpayer claiming the credit; and

    a) If an enterprise, which located in an enterprise zone, acquires adjacent property, which is outside the zone for expansion of its business activities, the new property will not be considered qualified for this credit since it is not placed in service within a zone. REF: Sunshine Letter IT93-0082.

    b) A lessor of otherwise qualified property, which it leases to another person for use in an enterprise zone can claim the Enterprise Zone Investment Credit on the leased property. REF: Sunshine letter IT86-0401.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

c) Storage of property is not considered use, as explained in IAC § 100.2110(e)(4)(A)(i):

- Storage of property in an enterprise zone or river edge redevelopment zone will not constitute use. The taxpayer must make use of, convert to its service, avail itself of, or employ the property in the enterprise zone or river edge redevelopment zone to demonstrate use of the property in the enterprise zone or river edge redevelopment zone.

5. Must not been used in Illinois previously in such a manner and by such a person as would have qualified it for the Replacement Tax Investment Credit or the Enterprise Zone and Rive Edge Redevelopment Zone Investment Credit, whether a credit had been taken for it. It will not, however, be disqualified if it was used before the time the credit came into effect.

   - This possible limitation is for previously used property only. A taxpayer who purchases new property for use in an Enterprise Zone and which also qualifies for purposes of the Replacement Tax-Investment Credit can claim both credits in the same year. REF: Sunshine letter IT90-0205, 95-0133.

Note: Refer to Replacement Tax Investment Credit Section for a discussion of the terms "tangible property", "depreciable", "acquired by purchase", "3-year property" and "used in Illinois".

Verification of Qualified Property

It is the responsibility of the auditor to verify each business location is within an Enterprise or River Edge Redevelopment Zone. The auditor will first analyze the maps provided at the DCEO website:

https://www2.illinois.gov/dceo/expandrelocate/incentives/taxassistance/pages/ezmaps.aspx

If a determination cannot be made, auditors will submit the inquiry and documentation to their supervisor including:

- the exact street address,
- local business name and
- any additional information

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

This information will then be:

- forwarded to the Technical Support Supervisor (TSS) for analysis,
- TSS will present to Audit Legal for review (if needed)
- IDOR's agency liaison will contact DCEO directly if needed
- final determination will be provided to the auditor by their supervisor

C. BASIS OF QUALIFIED PROPERTY

The basis of qualified property should be the basis used to compute the depreciation deduction for federal income tax purposes. Basis used to compute depreciation does not include any amount for which an IRC Section 179 deduction was taken but does include amounts for which a bonus depreciation deduction was taken, including 100% bonus depreciation. If the basis of the property for federal income tax depreciation increases after the property has been placed into service in an Enterprise or a River Edge Redevelopment Zone, the increase will be deemed property placed into service on the date of the increase in the federal basis. REF: IAC § 100.2110(f).

D. CARRYOVER OF EXCESS CREDIT

For tax years ending on or after December 31, 1985, if the amount of the credit exceeds the tax liability for the year, whether it exceeds the original liability, or the liability as later amended, such excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year.

- The credit applied to the earliest year for which there is a liability. If there is a credit from more than one tax year that is available to offset a liability, the oldest credit applied first.

- This credit cannot decrease a taxpayer's liability below zero.

E. RECAPTURE OF CREDIT

Recapture is required and the Income Tax for such a taxable year shall be increased, if during any taxable year, any property ceases to be qualified property in the hands of the taxpayer within 48 months after being placed in service. Any recapture of the credit is computed on Schedule 4255.

Property ceases to be qualified if, within 48 months of placing it into service, the property is:

- Disposed of (which means sold, exchanged, traded-in, abandoned, retired from use, destroyed by casualty, stolen, or transferred as a gift). Also,

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

property transferred to a trustee in bankruptcy and property transferred by foreclosure are dispositions of property.

- Moved outside of an Illinois Enterprise or River Edge Redevelopment Zone for other than a temporary or transitory purpose.

- Converted to personal use.

- Sold in a sale-leaseback transaction or in a deemed asset sale under an IITA § 338(h) (10) election. See comments under the Recapture section for Replacement Tax Investment Credits.

- Reduced in basis. A reduction of the basis of qualified property resulting from a redetermination of the purchase price shall be deemed a disposition of qualified property to the extent of such reduction. For example, this would occur when property is purchased and placed into service in one year, and in a later year, the taxpayer receives a refund of a portion of the original purchase price.

    - If the basis of the property is decreased, it will cause the Income Tax liability to be increased in the year that the basis decreased. To arrive at the correct Income Tax investment credit allowable:

The amount of recapture is computed as follows:

- Recalculate the investment credit allowable excluding the basis of the property that has ceased to qualify or by using the decreased basis of the property.

- Subtract the recalculated credit from the amount of credit previously allowed.

The difference between the recalculated credit and the credit used is added to the Income Tax in the year the basis is reduced.

Example: In 2010, Corporation A places qualifying property with a basis of $55,000 into service in an Enterprise Zone or River Edge Redevelopment Zone located in Illinois and computes an IITA § 201(f) Enterprise Zone or River Edge Redevelopment Zone Investment Credit of $275 ($55,000 x .5%). Corporation A's 2010 income tax liability is $420. After the application of the credit, Corporation A has remaining income tax liability of $145. In the following year, Corporation A moved a qualifying asset having a basis in 2010 of $5,000 from the Enterprise Zone or River Edge Redevelopment Zone to another location in Illinois. As a result, Corporation A is required to recapture

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

a portion of the Enterprise Zone or River Edge Redevelopment Zone Investment Credit that was applied against its 2010 income tax liability. To determine its additional income tax for 2011, Corporation A must recompute its 2010 Enterprise or River Edge credit by eliminating the disqualified property (($55,000 - $5,000) x .5%=$250). This recomputed credit is subtracted from the credit used in 2010 ($275 - $250= $25), and the difference is added to Corporation A’s 2011 income tax after application of the Investment Tax Credit. REF: IAC § 100.2110(g)(3).

VI. JOBS TAX CREDIT – ENTERPRISE/RIVER EDGE REDEVELOPMENT/FOREIGN TRADE ZONE (SUB-ZONE)

IITA §201(g) IAC §100.2120

Note: Repealed by PA 98-109 on August 16, 2013.

The Jobs Tax Credit, as previously appeared in IITA § 201(g) provides for a $500 credit per eligible employee hired to work in an Illinois Enterprise Zone or River Edge Redevelopment Zone, or for a High Impact Business located in a federally designated Foreign Trade Zone or Sub-Zone.

The credit is based on employees hired on or after January 1, 1986 in an Enterprise Zone, after June 30, 1986 for employees hired to work in a Foreign Trade Zone or Sub-Zone, and on or after December 31 and can be used to offset an Illinois Income Tax liability. The credit is available to individuals, corporations, trusts and estates who meet the employment requirements of the IITA.

The credit was expanded for eligible workers hired in River Edge Redevelopment Zones for taxable years on or after December 31, 2006.

The Jobs Tax Credit is computed using:

- Schedule 1299-D for corporations and fiduciaries
- Schedule 1299-C for individuals.

Note: The Jobs Tax Credit does not pass-through to shareholders of Subchapter S corporations or partners of partnerships.

For years ending on or after December 31, 1988, the credit is allowed for the tax year immediately following the year in which the eligible employees are hired.

For tax years ending on or after December 31, 1985 and prior to December 31, 1988, the credit is allowed for the year in which the eligible employees are hired.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

A. QUALIFYING EMPLOYERS

To qualify for the credit:

1. The taxpayer must hire five or more "eligible" employees to work in an Enterprise Zone or River Edge Redevelopment Zone, or a Foreign Trade Zone or Sub-Zone during the taxable year. An eligible employee:

   a) Must be certified by the DCEO as "eligible for services". Whenever an employee is certified, a voucher is completed by the applicant and approved by DCEO.

      (1) DCEO informs the taxpayers that they should keep these vouchers in their files in case verification is required. The vouchers are titled "Illinois Department of Commerce and Community Affairs (now the Department of Commerce and Economic Opportunity or DCEO), Enterprise Zone Program, and Jobs Tax Credit Certification Voucher".

      - The form number is IL 420-0544.

        - This form should be requested to verify that the employee is DCEO certified.

   b) Must be hired after the zone was created or after the business was in the zone, whichever is later;

      - The term "hired" means hired by the employer claiming the credit. Employees transferred from another facility of the employer to a facility located in an enterprise zone or federally designated foreign trade zone or sub-zone are not deemed "hired" upon transfer to a facility located in the enterprise zone or federally designated foreign trade zone or sub-zone.

   c) Must be employed in the zone. To be considered "employed in the zone", services must be rendered there, or it must be the base of operations of the services performed; and must be a full-time employee working 30 or more hours a week.

2. The taxpayer's total employment within the zone must increase:

   a) By five or more full-time employees beyond the total employed in that zone at the end of the previous tax year for which a jobs tax credit was taken,

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

b) Alternatively, beyond the total employed by the taxpayer on December 31, 1985, whichever is later.

c) If a taxpayer has had employees in the enterprise zone but has never claimed a Jobs Tax Credit, this calculation would be performed comparing the taxpayer's total employment within the zone by the total employed within the zone by the taxpayer on December 31, 1985. REF: Sunshine Letter IT93-0082.

Note: During the audit if there is a question on the status of a taxpayer's certification.

- Do not contact the agency directly; instead submit the inquiry and documentation to your supervisor.
- The information will be forwarded to the Technical Support Supervisor, where it is analyzed and presented to Legal for review, if necessary.
- The Department's liaison will contact DCEO personnel directly if needed. The requested information will then be provided to the auditor by the supervisor.

Example:

Company A was in the East St. Louis enterprise zone when the zone came into existence in 1985. Company A employed 30 people within the enterprise zone prior to and during 1985. Between 1986 and 1990, Co. A lost eight employees. In 1991, Co. A hired 10 qualified employees. Since Company A had never taken a Jobs Tax Credit, A's total employment within the zone for 1991 (32) is compared with its employment within the zone on December 31, 1985 (30). Since A's total employment with the zone did not increase five or more full-time employees, A is not eligible for the Jobs Tax Credit.

If the zone in which the taxpayer is located was created after 1985 and the taxpayer has never claimed a Jobs Tax Credit, the above computation would be computed by comparing the total employment within the zone by the total employed within the zone in the calendar year during which the zone was created. REF: Sunshine Letter IT93-0082, IT94-0031.

3. Eligible employees must be employed 180 consecutive days during the tax year to be "deemed hired".

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Example:

An otherwise eligible employee is hired to work in an Enterprise Zone on August 1, 1987. The employer's tax year ends December 31, 1987. The employee would have worked 153 days during the 1987 tax year and, therefore, would NOT be "deemed hired" in 1987. The employer would not be eligible for the Jobs Tax Credit for this employee for this year.

If, however, the employee in the above situation worked for the entire 1988 calendar year, the employee would meet the 180 consecutive day requirement and would be considered "deemed hired" in 1988. If all other requirements were met, the employer could claim the Jobs Tax Credit on this employee for the 1989 tax year. REF: Sunshine Letter IT94-0031 & IAC § 100.2120(b).

B. CARRYOVER OF EXCESS CREDIT

Any excess credit can be carried forward five years. If a credit carry-forward is involved:

1. The credit needs applied to the earliest year for which there is a liability.

2. If there is a credit from more than one tax year available to offset a liability, the oldest credit will need to be applied first.

VII. INVESTMENT CREDIT – HIGH IMPACT BUSINESS

IITA §201(h) IAC §100.2130

The current IITA § 201(h) allows a credit against Income Tax for investment in qualified property by a High Impact Business. The credit is available to individuals, corporations, trusts, and estates designated by Department of Commerce and Economic Opportunity (DCEO).

Originally, property needed to be placed in service on or after January 1, 1986 in a federally designated Foreign Trade Zone or Sub-Zone (January 1, 1987). For tax years ending on or after January 1, 1989, the requirement that property placed in a Foreign Trade Zone or Sub-Zone was eliminated.

The Investment Credit-High Impact Business is calculated using:
- Schedule 1299-D for corporations and fiduciaries

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

High impact business; was created to assist in encouraging development, growth, and expansion of the private sector through large-scale investment and development projects.

These businesses are qualified for the tax advantage because their investments or projects in Illinois are expected to cause or contribute in a significant and substantial way such things as:

- an increase in per capita income
- a reversal in the number of jobs lost
- a decrease in the unemployment rate

High impact businesses qualify for Income Tax credits once the minimum investments required under Illinois law have been placed in service in qualified property.

A. SECTION 5.5 OF THE ILLINOIS ENTERPRISE ZONE ACT

As of September 7, 1989, the credit is not available until the minimum investments in qualified property set forth in Section 5.5 of the Illinois Enterprise Zone Act have been satisfied.

- The credit applicable to such minimum investments shall be taken in the tax year in which the minimum investments have been completed.
- Any credit for additional investments beyond the minimum investment shall be available only in the tax year in which the property is placed in service

To be designated a High Impact Business, a business is required to apply to DCEO, which will certify the taxpayer if it qualifies.

The Department of Revenue is not required to decide regarding a High Impact Business. When conducting an audit, request to see the High Impact Business certification issued by DCEO.

Note: During the audit if there is a question on the status of a taxpayer's certification.

- Do not contact the agency directly; instead submit the inquiry and documentation to your supervisor.
- The information is then sent on to the Technical Support Supervisor, where it will be analyzed and presented to Audit Legal for review, if necessary.
- The Department's liaison will contact DCEO personnel directly if needed. The requested information then provided to the auditor by the supervisor.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

The High Impact Business Investment Credit does not pass-through to shareholders of subchapter S corporations or partners of partnerships.

B. QUALIFIED PROPERTY

The credit is computed based on the qualified property placed in service. To be qualified, property must:

1. Be tangible, new or used including buildings and structural components of buildings;
2. Be depreciable pursuant to IRC § 167 except that "3-year property" does not qualify;
3. Be acquired by purchase (as defined by IRC § 179(d));
4. Be used in an Illinois Foreign Trade Zone on or after January 1, 1986 (or Sub-Zone on or after January 1, 1987). Effective January 1, 1989, it is no longer a requirement that the property be placed in service in a Foreign Trade Zone or Sub-Zone; and
5. Not be eligible for the Enterprise Zone Investment Credit.

The terms "tangible" and "depreciable" have been previously defined in the Section on Replacement Tax Investment Credit. In addition, "Acquired by purchase", "3-year property", "placed in service", "basis" is also discussed in that section.

C. CARRYOVER OF EXCESS CREDIT

The credit cannot reduce a liability below zero.

Effective for years ending on or after December 31, 1987, excess credit can be carried forward to the five years following the excess credit year.

- The credit must first be carried to the earliest year for which there is an Income Tax liability.
- If an excess credit exists from more than one year, the credit from the earliest year is first used.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Prior to December 31, 1987, there were no carry-forward provisions for this credit.

D. RECAPTURE OF CREDIT

Recapture is required and the Income Tax for a taxable year shall be increased, if during any taxable year:

- Property ceases to be qualified property in the hands of the taxpayer within 48 months after being placed in service,
- The sites of any qualified property are moved outside the Foreign Trade Zone (or Sub-Zone) within 48 months after being placed in service (for years prior to January 1, 1989).

A reduction of the basis of qualified property resulting from a redetermination of the purchase price shall be deemed a disposition of qualified property to the extent of such reduction.

The recapture of any amount of credit is calculated using:
- Form 4255

VIII. INCOME TAX CREDIT FOR REPLACEMENT TAX LIABILITY

IITA §201(i) IAC §100.2140

Effective for years ending on or after December 31, 1986 through years ending prior to December 31, 2003, IITA § 201(i) provides a credit against Income Tax based on Replacement Tax liability. This credit was created to provide a single tax base for computing both the Income and Replacement Tax liabilities. The amount of Replacement Tax deducted in computing federal taxable income is added back under IITA § 203(b)(2)(B), but prior to the enactment of the IITA § 201(i) credit, was then subtracted for purposes of computing income tax.

The credit is calculated on the IL-1120, Part IV.

The Income Tax Credit for Replacement Tax Liability does not pass-through to shareholders of subchapter S corporations or partners of partnerships.

FOR TAX YEARS ENDING AFTER DECEMBER 31, 1988:

- The credit is calculated by dividing:

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- The Illinois base income from Part III of the IL-1120 by
- total base income from Part I.
- Multiply this percentage by the net Replacement Tax liability for the year.
- Then multiply this amount by the current Income Tax rate.

FOR TAX YEARS ENDING ON OR BEFORE DECEMBER 31, 1988:

- The credit is calculated by multiplying:
  - The net Replacement Tax liability for the year by
  - the apportionment percentage or
  - by one if it is a non-apportioning company.
  - This amount is then multiplied by the current Income Tax rate

CARRYOVER OF EXCESS CREDIT

Any credit earned on or after December 31, 1986, which is unused in the year earned because it exceeds the Income Tax liability for the year, may be carried forward for five taxable years. The credit must be applied first to the earliest year for which there is a liability. If there is a credit available from more than one taxable year, the oldest credit used first.

No credit may be earned or carried forward into a tax ending on or after December 31, 2003.

Note: If there is a reduction in the Replacement Tax liability for a year in review, the credit needs to be recalculated and reduced as necessary. If, after recalculating the credit; there is a reduction in the amount carried forward; the taxpayer is required to file an amended return to correct the amount.

IX. TRAINING EXPENSE CREDIT

IITA §201(j) IAC §100.2150

The current IITA § 201(j) provides a credit against Income Tax for certain training expenses incurred for tax years ending on or after December 31, 1986 and prior to December 31, 2003. This credit is available to individuals, corporations, trusts, and estates. A "pass-through" of the credit can partner and subchapter S Corporation shareholders according to their distributive share of income.

The Training Expense Credit is calculated using:

- Schedule 1299-A for partnerships and S corporations
- Schedule 1299-D for corporations and fiduciaries

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

A. QUALIFIED EXPENSES

IAC § 100.2150 states that all amounts paid for educational or vocational training in semi-technical or technical fields or semi-skilled or skilled fields are eligible for the credit.

The Department's position is that training does not require being in new technologies or any field needs exclusion from receiving training, which would qualify for the credit. Therefore, training can be provided to both "blue collar and white collar" employees, "professional" employees, included are doctors, lawyers, accountants, engineers, etc. and management employees.

The credit is for all amounts paid or accrued, on behalf of all persons employed by the taxpayer in Illinois, or Illinois residents employed outside of Illinois by a taxpayer. REF: IAC § 100.2150(a).

- The term "persons employed by the taxpayer in Illinois" shall include employees whose compensation is subject to withholding under IITA § 701 (including employees who are exempt from withholding pursuant to IITA § 701(d)).

- Sole proprietors, partners in partnerships, shareholders of corporations, beneficiaries of trusts or estates, or other individuals who own an interest in the employer are not employees for purposes of the credit unless they are able to demonstrate that they are also employees of the business. REF: IAC § 100.2150(e).

B. ELIGIBLE TYPES OF TRAINING

- Training an employee to improve that employee's job skills, which is directly related to his/her current employment. Job-linked training that offers special skills for career advancement or that is preparatory for, and leads to, a job with definite career potential.

- Training necessary to implement Total Quality Management for improvement systems within the workplace.

- Training related to machinery or equipment.

- Job-linked basic skills such as "English as a second language" or remedial training necessary for employees to function safely and effectively in the workplace or a prerequisite for other training. Some examples follow:

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

  - Training of a machine operator in skills necessary to operate a computer-assisted manufacturing machine.

  - Training of employees of a retailer in the operation of a cash register system that result in faster sales and greater inventory control because it is linked to the taxpayer's headquarters.

  - A required course for supervisors in how to supervise employees who work at home because of the installation of a computer system with linked terminals in the employees' homes.

- Self-study courses which meet the criteria of semi-technical, technical, semi-skilled or skilled. Self-study is contrasted with "down-time" reading which does not qualify

- Continuing education-type training.

Note: Training does not have to occur in a classroom or given by an employer. An employer may contract with a third party to provide training. Training does not have to occur on the taxpayer's premises or even in the State of Illinois.

Examples of occupations and the types of classes which would qualify for the credit:

- Class for welders on how to operate a new computer-controlled welder;

- Class for surgeons on how to use a new laser guided scalpel;

- Classes on desert building technologies for Illinois-resident architects sent to Saudi Arabia by their firm for 4-month shifts to build a new hospital;

- Classes for all administrative employees in Microsoft Office upgrades prior to the installation of the software on all their desk top computers; and

- Class on negotiation skills taken by middle managers charged with the responsibility of negotiating union contracts.

C. INELIGIBLE TYPES OF TRAINING

- Self-help classes such as "smoking cessation", "stress management" or "time management", etc.; and

- New employees' orientation or providing information on employee benefits, vacation and sick day policies, etc.

Examples of occupations and classes which would not qualify:

- Training on desert living and Islamic law for the architects assigned to Saudi Arabia; and

- Weight training for the star tackler of a professional football team.

Note: The above examples are attempting to demonstrate that the type of training and the occupation of the employee receiving it will have to be evaluated on a case-by-case basis to determine the eligibility for the credit.

To constitute eligible training under Section 201(j), there must be a direct connection between the training and a field of employment in which the employee engages in the sense that the training must be specifically designed to enhance the employee's ability to effectively engage in a field of employment.

Department regulations § 100.2150(c)(2) indicates that while the terms "semi-technical or technical fields or semi-skilled or skilled fields" do not refer to any occupation, the credit is intended for the costs of training designed to improve an employee's job skills within the scope of the employment. The regulations authorize the credit for "job-linked training that offers special skills for career advancement or that is preparatory for, and leads to, a job with definite career potential," and "job-linked basic skills … necessary for employees to function effectively and safely in the workplace, or as a prerequisite for other training." 86 Ill. Adm. Code § 100.2150(c)(2).

The requirement of a direct connection between the training and the employee's field of employment is consistent with the Legislative purpose in enacting the credit.

D. EXPENSES ELIGIBLE FOR THE CREDIT

1. Compensation of Employees
   Compensation is defined in IITA § 1501(a)(3)

   - For time spent in training others in in-house training. However, the compensation must be prorated based on the amount of time spent in conducting the training;

- For time spent in preparing for training as a student or an instructor; and

- For time spent attending classes.

2. Fringe Benefits

   When the regulations were adopted, it was the Department's position that fringe benefits were not eligible expenses. However, that position was reversed as the result of an administrative hearing decision in Abbott Laboratories, Inc. v. DOR, Docket 98-IT-0304 (Called Shanghai, Inc. v. DOR, IT 02-01, on the Department's web site)

   - As a direct result of the hearing decision, compensation of an employee as defined in IITA § 1501(a)(3) includes the employer's costs for that employee's:

     - life insurance;
     - medical insurance;
     - dental or disability insurance;
     - deferred compensation;
     - pension and profit-sharing plans;
     - dependent care assistance;
     - transportation fringe benefits; and
     - Other fringe benefits.

   - If these amounts are included in compensation of employees for time spent in training others in-house, the compensation must be pro-rated on the amount of time spent in conducting the training.

     Unemployment, payroll, and other taxes imposed on the employer are **not** eligible expenses because:

     a) Such amounts are not paid on behalf of the employee, even if computed as a percentage of an employee's wages or as a fixed amount per employee.

     b) Only amounts expended for eligible training and which are deducted in the computation of federal taxable income will qualify as eligible training expenses.

Note: Any fringe benefits that are allowed as eligible expenses **must** have been deducted in the computation of federal taxable income. REF: Abbott

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Laboratories, Inc. v. DOR (2001), Docket 98-IT-0304 (Called Shanghai, Inc. v. DOR, IT 02-01, on the Department's web site).

3. Costs of Materials

   The cost of materials used for in-house training classes such as slides, handouts, etc. will qualify for the credit because such costs are expenses of training.

4. Costs of Training Facilities

   Training facilities and equipment could be rented or owned by the taxpayer and some of the costs would be eligible expenses. The rent expense for the training facility is an allowable expense but it must be prorated based on the actual time spent in conducting eligible training and for other uses.

   The capitalized costs of training facilities or equipment owned by a taxpayer cannot be claimed for the credit. However, the depreciation expense associated with the capital expenditures for a training facility is an allowable expense. This expense must be prorated also based on the actual time spent conducting eligible training and for other uses.

5. Costs of Registration

   The costs of registration with state, federal or industry authorities may be eligible expenses, if such costs are related to eligible training. These costs could include allocable wages of employees performing the registration.

   For example, the employer is conducting a training course that qualifies for the employees' continuing professional education requirements. Since the course must comply with the continuing professional education criteria of the professional organization, the costs incurred in registering the course with that professional organization would be eligible for the credit.

6. Tuition Reimbursement

   Tuition reimbursement is an eligible expense if the training qualifies and the tuition amounts were deducted in determining the employer's federal taxable income.

7. Costs of Travel and Lodging

   Costs of travel and lodging expended to attend eligible training classes is an allowable expense if the costs were deducted in determining the employer's federal taxable income.

E. <u>INELIGIBLE TRAINING EXPENSES</u>

The following expenses are <u>not eligible</u> for the credit:

1. The cost of the training facility and equipment is not an eligible expense. Capital costs are not eligible for the credit. However, as noted above, depreciation expense is eligible;

2. Compensation of an employee for "down time" spent informally training. For example, a mechanic who has no machinery to work on spends that idle time reading about new equipment. The wages paid for that time would not be eligible for the credit;

3. Compensation of an employee for time spent supervising another employee is not an eligible expense. For example, the compensation for a supervisor moving from work station to work station answering questions and reviewing work would not qualify for the credit; and

4. The cost of meals provided to employees during training sessions is not eligible expenses.

F. <u>DOCUMENTATION STANDARDS – REVISED 10/2/2002</u>

IAC § 100.2150(d)(3) provides that:

Employers must maintain records enough to document that the training is eligible training and of the amounts expended for eligible training expenses. This documentation must include detailed information concerning the methodology utilized in determining any average or standard costs used by the employer to compute eligible costs. The documentation must be enough to demonstrate that the training is on behalf of persons employed by the taxpayer in Illinois, or Illinois residents employed outside of Illinois by the taxpayer.

The employer may use the documentation required for the Industrial Training Program of the Illinois Department of Commerce and Community Affairs (see 56 Ill. Adm. Code 2650.120), or in

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

compliance with the requirements of the Illinois Secretary of State's Workplace Literacy Program (see 23 Ill. Adm. Code 3040.220 and 3040.240.

Some of the documentation that should be requested from the taxpayer to verify the training expense credit claimed is listed below. This list should not be considered all-inclusive. The taxpayer may have other support for the credit that is acceptable. The Auditor should use judgment in determining if the support provided is adequate.

- List of personnel receiving training, name and job title.
- IL-941s or UC-3's to verify that employees are Illinois residents.
- Complete description of the training, i.e. syllabus, training objectives, etc.
- Job description of each employee to determine if the training is job-linked.
- Time Reports of employees or class attendance sheets documenting that they were in training.
- Time Reports of in-house trainers to document time spent preparing for training or putting on a class.
- Contracts with vendors providing training.
- Invoices and receipts to document expense of training materials.
- Travel vouchers or expense reports to document travel and lodging expenses to attend training classes.
- Federal returns and work papers for tracing expenses claimed.

Note: The importance of the taxpayer providing enough documentation to support the credit claimed cannot be overemphasized. If enough documentation is not provided, the credit will be disallowed.

There may be cases where the Computer Assisted Auditing (CAA) staff can assist the auditor with the review of information to support the credit. Contact your local CAA staff to request assistance using the current CAA referral procedures.

G. CARRYOVER OF EXCESS CREDIT

The credit is not allowed to the extent that it would reduce the Income Tax liability of any year below zero. Any excess credit can be carried forward for five taxable years following the year for which the credit is first computed to offset any Income Tax liability incurred. The credit must be applied first to the earliest year for which there is a liability. If there is a credit available from more than one taxable year, the earliest credit earned shall be applied first.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

No excess credits may be carried over to tax years ending on or after December 31, 2003.

X. RESEARCH AND DEVELOPMENT CREDIT

IITA §201(k) IAC §100.2160

IITA § 201(k) provides for a credit against Income Tax for qualifying research and development expenditures. The credit is in effect for tax years ending after July 1, 1990 through tax years ending prior to December 31, 2003; reinstated for tax years ending on or after December 31, 2004 through tax years ending prior to January 1, 2021. The credit is available to individuals, corporations, trusts and estates. The credit is equal to 6.5% of the qualifying expenditures for increasing research activities in Illinois.

Originally, the credit did not pass-through to partners of partnerships or shareholders of Subchapter S corporations. REF: Sunshine Letters IT91-0115, IT93-0157, IT94-0119 and IT95-0035. However effective 1/1/99, IITA, § 201(k) was amended to allow a pass-through of the R& D credit to partners of partnerships and shareholders of Subchapter S corporations. This includes the owners of limited liability companies, if the company is treated as a partnership for purposes of federal and state income taxation.

The Research and Development credit is calculated using:

- Schedule 1299-D for corporations and fiduciaries

A. DEFINITIONS CONTAINED IN SECTION 201(k)

- "Qualifying expenditures" expenditures that qualify under IRC § 41 for purposes of the federal credit for activities that are conducted in Illinois.
- "Qualifying expenditures for increasing research activities in Illinois" is the excess of the qualifying expenditures incurred for the taxable year over qualifying expenditures for the base period.
- "Qualifying expenditures for the base period" means the average of the qualifying expenditures for each year in the base period.
- "Base period" is the three taxable years immediately preceding the taxable year for which the determination is being made.

For purposes of determining whether an increase in research activities has taken place, the determination will be made with respect to the research activities in Illinois of all members of the combined Illinois return rather than an individual member's return.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

B. CARRYOVER OF EXCESS CREDIT

Any credit more than the tax liability for the taxable year may be carried forward to offset the Income Tax liability of the taxpayer for the next 5 years or until it has been fully utilized whichever occurs first.

- If an unused credit is carried forward to a given year from two or more earlier years that credit arising in the earliest year is applied first.

- If a tax liability for the given year remains, the credit from the next earliest year is applied.

- Any remaining unused credit or credits can be carried forward to the next following year in which a tax liability exists. However, the credit can only be carried forward 5 years from the year in which the taxpayer incurred the expense for which the credit was given. Any unused credit is then forfeited.

Important: The credit was reinstated for tax years ending on or after December 31, 2004, but no credit carryovers were permitted from tax years ending prior to that date. Therefore, the 5-year credit carryovers to future tax years will again start with credits earned in tax years ending on or after December 31, 2004.

No credit can be earned in tax years ending on or after December 31, 2003 and prior to December 31, 2004, so no carryforward from those years are possible.

Note: Form 1299-D applies the carryforwards by combining the excess of all credits with 5-year carryforwards earned in a tax year over the tax liability after applying carryforwards and treats this amount as a single carryforward. For tax years ending on or after December 31, 2003, the amount of any carryover should be computed as if the R & D credit had been applied before any of the other credits with 5-year carryforwards earned in the same year in order to determine what amount of the R & D credit carryforwards remained unused as of that year and were lost because of the repeal of the credit.

C. EXAMPLES OF R & D CREDIT

The following are examples of how to compute the Research and Development credit.

Example 1

Corporation A was in business in Illinois since 1980. Corporation A incurred the

following expenses for qualified research activities in Illinois for the calendar years 2006, 2007, 2008 and 2009.

	2006	2007	2008	2009
Wages for qualified services	$ 0	$ 50,000	$ 0	**$100,000**
Supplies	$ 0	$ 5,000	$ 0	**$ 8,000**
Contract research expenses (65%)	$ 0	$ 100,000	$ 0	**$ 200,000**
Basic research expenses paid to a qualified organization	$ 0	$ 20,000	$ 0	**$ 0**
Totals	**$ 0**	**$175,000**	**$ 0**	**$308,000**

The qualified expenditures for the base period would be:

Total qualified expenditures for 2006	$ 0
Total qualified expenditures for 2007	$ 175,000
Total qualified expenditures for 2008	$ 0
Total qualified expenditures for base period	$ 175,000
Average for base period	$ 58,333

The total qualifying expenditures for 2009 are then compared to the base period average and the excess qualifying expenditures for 2009 is computed.

Total qualified expenditures for 2009	$ 308,000
Average qualified expenditures for base period	$ (58,333)
Excess of 2009 expenditures over base period	$ 249,667

The $249,667 is then multiplied by 6.5% to arrive at a Research and Development Credit amount of $16,228 for 2009. If the tax liability for 2009 is only $10,000 then the taxpayer will have excess credit to carry forward of $6,228.

Example 2

Corporations A, B and C incurred the following expenses for qualified research activities in Illinois:

	2006	2007	2008	2009
Corp A	$ 50,000	$ 50,000	$ 50,000	$ 0
Corp B	$ 25,000	$ 25,000	$ 100,000	$ 200,000

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Corp C	$ 75,000	$ 125,000	$ 100,000	$ 100,000
Total	$ 150,000	$ 200,000	$ 250,000	$ 300,000

Corporations A, B and C filed a combined Illinois return for the calendar years of 2006, 2007, 2008 and 2009. The R&D Credit for 2009 is determined based upon the combined activities of the group and is calculated as follows:

Total qualified expenditures for 2009	$ 300,000
Average qualified expenditures of base Period (($150,000+$200,000+$250,000)/3)	$ 200,000
Excess of 2009 expenditures over base period	$100,000
R&D Credit for 2009 (6.5%)	$ 6,500

D. COMPUTATION OF THE CREDIT WHEN CHANGES IN ILLINOIS COMBINED RETURN MEMBERSHIP

If a corporation is a member of the combined Illinois return during the year in which the credit is being claimed but was not a member of the combined return during one or more of the base period years.

- The average qualified expenditures for the base period will be computed as if the corporation was a member of the combined Illinois return for the entire base period.

If a corporation is not a member of the combined Illinois return during the year, in which the credit is being claimed but was a member of the combined return during one or more of the base period years.

- The average qualified expenditures for the base period will be computed as if the corporation was not a member of the combined return for the entire base period. REF: IAC § 100.5270(d)(5).

Facts:

The following examples illustrate the computation of the credit when the membership of the combined Illinois return changes at some point during either the base period or the year in which the credit is being claimed.

Assume the following facts for both examples:

Corporations A, B and C incurred the following expenses for qualified research activities in Illinois:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

	2006	2007	2008	2009
Corp A	$ 50,000	$ 50,000	$ 50,000	$ 0
Corp B	$ 25,000	$ 25,000	$ 100,000	$ 200,000
Corp C	$ 75,000	$ 125,000	$ 100,000	$100,000
Total	$ 150,000	$ 200,000	$ 250,000	$ 300,000

Example 1

Corporations A and B filed a combined Illinois return for 2006. Corporation C filed a separate company return for 2006. Corporation A purchased the common stock of Corporation C on 1/1/07. Corporations A, B and C filed a combined return for 2007, 2008 and 2009.

The $75,000 of expenses for qualified research activities in Illinois incurred by Corporation C in 2006 would be included in the calculation of the average qualified expenditures for the base period.

The credit for the 2009-combined Illinois return would be calculated as follows:

Total qualified expenditures for 2009	$ 300,000
Average qualified expenditures of base period (($150,000+$200,000+$250,000)/3)	$ 200,000
Excess of 2009 expenditures over base period	$ 100,000
R&D Credit for 2009 (6.5%)	$ 6,500

Example 2

Corporations A, B and C filed combined Illinois returns for 2006, 2007 and 2008. On 1/1/09, Corporation A sold the common stock of Corporation C to Corporation P (an unrelated corporation). In determining the proper amount of the R&D Credit that can be claimed on the Corporations A & B combined Illinois return for 2009, the expenses for qualified research in Illinois incurred by Corporation C for 2006, 2007 and 2008 are disregarded when determining the average qualified expenditures for the base period.

The 2009 Corporations A & B combined return would be calculated as follows:

Total qualified expenditures for 2009	$ 200,000
Average qualified expenditures of base period (($75,000+$75,000+$150,000)/3)	$ 100,000
Excess of 2009 expenditures over base period	$ 100,000
R&D Credit for 2009 (6.5%)	$ 6,500

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.”

E. POLICY ON AUDITING R & D CREDITS

1. COMPLETED FEDERAL AUDIT

Since the Illinois Research and Development Credit is based on the Federal Research Credit (IRC § 41), expenses that qualify for the federal research credit will qualify for the R & D Credit if they are incurred in Illinois. Therefore, the results of a federal audit will most likely impact the Illinois credit.

However, we have encountered the situation where the IRS has closed an audit for the same period that we are currently auditing and made no adjustment to the research credit. When our Auditors reviewed the expenses claimed to verify that they were incurred in Illinois, they discovered expenses or projects that did not appear to qualify for the credit according to the IRS code and regulations.

A prime example is “internal use computer software projects”. When they contacted the IRS agent to determine the scope of the federal audit, the Agent indicated that even though the IRS audit plan included a review of the research credit, they performed only a cursory review and did not actually audit the credit.

The auditor will have to examine the projects and expenses claimed for the research and development credit unless the IRS has conducted an audit of these projects and expenses. If the IRS has audited the projects and expenses, then the auditor will need to verify that the expenses were incurred in Illinois. In addition, the auditor should verify calculation of the credit, the base period and the amount and year of the credit carryover.

2. FEDERAL AUDIT PENDING

If a taxpayer is currently under federal audit for the same period that is covered by the Department’s audit, the Auditor can delay the completion of that audit until the federal audit is finalized provided that the IRS confirms that they are auditing the Research Credit and the taxpayer is willing to extend the statute of limitations. This should only be done when the federal audit is within a year of completion and with the supervisor’s approval. All areas of the audit must be completed including verifying that the expenses claimed for the R & D credit were incurred in Illinois and all aspects of the credit were correctly computed. Once the RAR is finalized, the audit can be completed and turned in without further delay. If the

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

taxpayer informs the Auditor that the federal audit is going to be unagreed, the Illinois audit should be completed without further delay applying the federal changes. The Auditor may need to split the audit between agreed and unagreed portions.

3. NO FEDERAL AUDIT PENDING

The department will encounter taxpayers who are not under a federal audit for any period, have not been notified that they will be under audit or are years away from being under audit for the same period as the Department's audit.

For example, if the IRS is currently auditing 2002 and the Department is auditing 2006 through 2008, it will be many years before the 2006 through 2008 federal audit will be completed. Therefore, in these situations, the Auditor will perform a complete audit of the R & D credit that will include evaluating the projects to determine if they qualify under federal rules, verifying that the expenses are qualified and are incurred in Illinois.

As in other areas of the Department's audits, sampling techniques can be utilized to perform an audit of this area. If the Auditor determines that Computer Assisted Audit's (CAA) assistance is needed, CAA should be contacted using the current CAA referral procedures. If CAA cannot provide sampling assistance because of record incompatibility or the small volume of transactions, the Auditor can choose the option of completing a detail audit or a manual sampling audit to verify the veracity of the taxpayer's claimed R & D Credit.

F. AUDIT PLAN

1. REQUEST INFORMATION TO DETERMINE THE SCOPE OF THE AUDIT

a) Review Schedule 1299-D, section on the Research and Development Credit. Schedule 1299-D breaks down the credit into qualifying wages, supplies and contract research expenses.

- Reviewing the makeup of the credit, you can determine where you should spend most of your audit time.

- Review Federal Form 6765.

  - The taxpayer could possibly have the federal expenses broken down by state. It is a good idea to request the federal work papers and find out who prepared them.

- Ask to see any memos or guidelines used to collect this information.

Note: Generally, the bulk of the credit should consist of wages. If a high percentage of expenses is classified as supplies or contract research, you may want to devote audit time to those areas. If not, you may want to spend your time just reviewing salaries.

2. REQUEST ALL WORKPAPERS USED TO COMPUTE THE RESEARCH CREDIT

   a) These work papers should include all entities.

   b) Expenditures should be broken down into wages, supplies, and contract research expenses.

   c) Identify whether the taxpayer is computing the credit using a:

      (1) Cost center/departmental approach

         (a) Work papers should identify each cost center or department by its cost center or department number.

      (2) Project approach

         (a) Each project should be identified by name and cost component (wages, supplies, contract research).

         (b) Work papers should contain each wage, supply and contract research expense account by its appropriate name and account number.

3. PLAN THE AUDIT STRATEGY

   a) In auditing the research tax credit, the auditors should employ a "two-prong" approach.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

(1) Look at the activity that is being conducted by the taxpayer to determine whether it is a qualifying research activity as defined in IRC § 41(d).

(2) Determine whether the expenses claimed by the taxpayer are allowable under IRC § 41 and incurred in Illinois

4. REQUEST A MEETING WITH THE TAXPAYER TO EXPLAIN THE WORKPAPERS AND DISCUSS THE OVERALL RESEARCH ACTIVITY

- Presented an Information Document Request (IDR-70) prior to the meeting to inform the taxpayer what subjects and potential questions you would like to discuss at the meeting. The following are only suggested questions to ask the taxpayer. Auditors must determine what they need to ask depending on their situation to decide.

  - Does the taxpayer, in the preparation of the work papers used to compute the research credit, have a specific theory and methodology behind what expenses were included in the credit? If so, it would be beneficial for the auditor to understand this theory and methodology. The taxpayer should explain why certain cost centers or departments were included in the credit or why certain expenses, employees, contractors, etc. were included in the credit.

  - Who prepared the work papers and made the decisions about what research activity and what expenses qualified for the credit?

  - What documentation is available to support the qualified research activity?

  - What criteria did the taxpayer use to determine what research and expenses qualified for the credit?

  - Did the taxpayer send out surveys to employees? If the taxpayer sent surveys to specific employees to complete, submit an EDA- 70 requesting copies of these surveys and responses. Have the taxpayer show how these surveys were used in the calculation. Also, request the instructions that accompanied the surveys.

Ask as many questions, as you feel appropriate relating to the costs, activities etc. By doing this, it may eliminate the long process of having to ask these questions through an EDA- 70. Taxpayer responses to questions should be documented on the EDC-5. It will also identify specific documentation that the auditor may request to support the expenses or research activity. A tour of the

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

research facility may sometimes be beneficial, especially if the research activity will be reviewed.

G. BASE PERIOD COMPUTATION – GENERAL

A Word of Caution: The federal credit base period is completely different from the Illinois base period.

For purposes of this credit, the amount of qualifying expenditures for increasing research activities in Illinois is computed by taking the excess of the qualifying expenditures for the taxable year over the average annual qualified expenditures for the base period. Base period defined as the three tax periods immediately preceding the determination year.

H. SHORT BASE PERIOD OR SHORT DETERMINATION YEAR

One of the first steps to take in auditing the R & D Credit is verifying the base period. The term "base period" generally means the three taxable years immediately preceding the year for which the credit is being determined ("determination year").

However, the taxpayer could have a short base period year or a short determination year or both. Since the equitable comparison of the average base period expenses to the determination year expenses should be made using the same number of days, the short period or periods will need to be modified. (REF: Federal Regulations 1.41-3(d)) The federal regulation requires the modification be made by months. However, the Illinois return instruction uses the number of days.

To annualize a short base period year, the amount of the qualified expenditures must be multiplied by the total number of days in a full year and the result should be divided by the number of days in the short taxable year.

<table>
<tr><td>Qualified Expenditures</td><td>X</td><td>365 days</td></tr>
<tr><td colspan="3">Number of Days in the short taxable year</td></tr>
</table>

To de-annualize the average base period to compare with the short determination year, the average base period must be multiplied by the number of days in the short determination year and divide the results by the total number of days in a full year.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

Average Base Period Expense	**X**	**Number of Days in Short Determination year**
	365 Days	

1. Example: Base Period Calculation with Short Tax Year

The taxpayer had qualified research expenditures for calendar year 2011 of $200,000. The three taxable years immediately preceding, the determination year includes a short year as follows:

The short year 12/08 qualifying expenditures must be annualized as follows:

Year	Expenditures
7/1/08 - 12/08	$ 50,000
1/1/09 - 12/09	$ 200,000
1/1/10 - 12/10	$ 225,000

Qualifying expenditures	$50,000
Multiplied by the number of days in the year	365
Divided by the number of days taxable in IL	184
Annualized expenditures	$99,185

The base period is calculated as follows using the annualized expenditures:

Year	Expenditures
7/1/08 - 12/08	$ 99,185
1/1/09 - 12/09	$ 200,000
1/1/10 - 12/10	$ 225,000
Total of 3 Periods	$ 524,185
Divided by 3	$ 174,728

The determination year expenses of $200,000 reduced by the average base period expenses of $174,728 equals the credit base of $25,272. The amount of credit available to the taxpayer is $1,643.

2. Example: Base Period Calculation with Short Determination Year

When the determination year is less than 12 months, you must de-annualize the average base period to compare it with the determination year.

The taxpayer had qualified research expenditures for short year 1/1/11 through 6/7/2011 of $100,000. The three taxable years immediately

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

preceding the determination year reported Illinois qualified expenses as follows:

Year	Expenditures
1/1/08 – 12/08	$ 150,000
1/1/09 – 12/09	$ 200,000
1/1/10 – 12/10	$ 225,000
Total Expenses	$ 575,000
Divided by 3	$ 191,667

The average base period of $191,667 must be multiplied by 158 (number of days in the determination year) and divided by 365:

Base Period Average Qualifying Expenses	$191,667
Multiplied by 158	$30,283,386
Divided by 365 days	$82,968

The determination year expenses of $100,000 reduced by the de-annualized average base period expenses of $82,968 equals a credit base of $17,032. The amount of credit available to the taxpayer is $1,107.

3. Example; Base Period Calculation with Short Base Period and Determination Year

First, the short base period year must be annualized to calculate the average of the three base period years. Then, the average of the base period must be modified to compare to the short determination year.

The taxpayer had qualified research expenditures for short year 1/1/11 through 6/7/2011 of $100,000. The three taxable years immediately preceding, the determination year includes a short year as follows:

Year	Expenditures
7/1/08 - 12/08	$50,000
1/1/09 - 12/09	$200,000
1/1/10 - 12/10	$225,000

The short year 12/08 qualifying expenditures must be annualized as follows:

Qualifying expenditures	$50,000
Multiplied by the number of days in the year	365

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Divided by the number of days taxable in IL	184
Annualized expenditures	$99,185

The base period is calculated as follows using the annualized expenditures:

Year	Expenditures
7/1/08 - 12/08	$99,185
1/1/09 - 12/09	$200,000
1/1/10 - 12/10	$225,000
Total of 3 Periods	$524,185
Divided by 3	$174,728

The average base period of $174,728 must be multiplied by 158 (number of days in the determination year) and divided by 365:

Base Period Average Qualifying Expenses	$174,728
Multiplied by 158	$27,607,024
Divided by 365 days	$75,636

The determination year expenses of $100,000 reduced by the de-annualized average base period expenses of $75,636 equals a credit base of $24,364. The amount of credit available to the taxpayer is $1,584.

I. QUALIFYING EXPENDITURES

Qualifying expenditures or "qualifying research expenses" are the sum of the in-house research expenses and the contract research expenses paid or incurred by the taxpayer during the taxable year in carrying on any trade or business of the taxpayer. REF: IRC § 41(b).

Note: To be eligible for the Illinois research and development credit, the expenses **must** also be for research activities conducted in Illinois.

The Federal Tax Reform Act of 1986 amended the definition of the term "qualified research" for purposes of the credit computation. To be eligible for the research credit under the 1986 Act, research must satisfy not only the IRC § 174 definition of research and experimental expenditures but must be:

- Undertaken for discovering information that is technological in nature, the application of which is intended to be useful in developing a new or improved business component of the taxpayer. In addition, the research is eligible for the credit only if substantially all the activities of the research constitute

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

elements of a process of experimentation for a new or improved function, performance, reliability or quality.

Consistent with the objective of narrowing the scope of the credit to technological advances in products and processes, the 1986 Federal Act set forth several exclusions in IRC § 41(d)(4) from eligibility for the credit. H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess.68 (1986), 1986-3 (Vol. 4) C.B. 68, 74.

J. REVIEW OF PROJECTS

To be a qualified research expense, the taxpayer must be able to show the auditor that the research activity being performed meets all four tests below. The burden of proof is on the taxpayer to show that the research being performed represents qualified research. The taxpayer should identify each qualified business component and provide documentation supporting the four tests. The auditor must realize the research activities or projects being reviewed may be highly factual and technical.

A WORD OF CAUTION: This area can be very technical and time consuming. Do not spend a lot of audit time trying to disallow a research project unless the activity is blatantly non-qualifying, and your Supervisor agrees that this is a worthwhile use of audit time. The IRS has had little success in disallowing research projects and prevailing in court. However, if you and your Supervisor choose to spend time in reviewing the research projects, the following section will apply:

1. THE ACTIVITY OR PROJECT MUST MEET ALL OF THE TESTS OF IRC § 41(D).

The auditor should request a list of each qualifying project or activity along with a complete description of that activity or project. Projects or activities showing the highest audit potential should be selected for examination. Under IRC § 41(d) the term "qualified research" means these four requirements need to be met.

- *Decide which expenditures may be treated as expenses under section 174, REF: IRC § 41(d)(1)(A));*
    - The Section 174 Test

    Research expenditures must qualify as expenses under § 174. Section 174 generally allows research and experimentation expenditures as a current deduction that are paid or incurred by the taxpayer in connection with the operation of a trade or business.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

The phrase "carrying on a trade or business" has the same meaning for this credit as it does for IRC §162 (Trade or Business Expenses).

- Expenses paid or incurred "in connection with a trade or business" within the meaning of IRC § 174(a) (relating to the research and experimental expense deduction) do not necessarily meet the "carrying on a trade or business" requirement of the R&D Credit. REF: CFR § 1.41-2(a)(1).

  To qualify for the R&D Credit, research expenses must relate to a trade or business being carried on by the taxpayer at the time the expenses are paid or incurred.

  - Research expenses paid or incurred by the taxpayer in developing a product, the sale of which would constitute a new trade or business for the taxpayer (rather than an expansion of an existing trade or business), do not qualify for the credit. REF: CFR § 1.41-2(a)(2)

    If a corporation is a member of a unitary group filing a combined Illinois return, it will be carrying on a trade or business if any member of the combined return is carrying on the trade or business.

    Example: If one member is performing in-house research on behalf of another member, the member performing the work will be carrying on the trade or business of the member for whom the research is being conducted. REF: CFR § 1.41-8(a)(4) and (e)(2) except that the IRC Regulation discusses commonly controlled groups.

    - The expenses do not qualify if the product or result of the research is intended to be transferred to another entity in return for license or royalty payments and the taxpayer does not use the product of the research in the taxpayer's trade or business. REF: CFR § 1.41-2(a)(1).

    For tax years beginning after December 31, 1989, the "carrying on a trade or business" requirement is disregarded for in-house research expenses of certain startup ventures. In these cases, a taxpayer will be treated as meeting the trade or business requirement if, at the time such in-house research expenses are paid or incurred, the principal purpose of the taxpayer in making the expenditures is to use the results of the research in the active

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

conduct of a future trade or business of the taxpayer or of one or more other persons who, with the taxpayer, are members of the same unitary group. REF: IRC § 41(b)(4) The IRC section refers to members of a controlled group instead of a unitary group.

Final regulations under section 174 issued in October of 1994 define research and experimental expenditures as follows:

Expenditures represent research and development costs in the experimental or laboratory sense if they are for activities intended to discover information that would eliminate uncertainty concerning the development or improvement of a product. Uncertainty exists if the information available to the taxpayer does not establish the capability or method for developing or improving the product or the appropriate design of the product. Whether expenditures qualify as research or experimental expenditures depends on the nature of the activity to which the expenditure relates, not to the nature of the product or improvement being developed or the level of technological advancement the product or improvement represents. CFR §174-2 (a)(1).

- *Undertaken for discovering information which is technological in nature, REF: IRC § 41(d)(1)(B)(i);*
  - The Discovery Test

The discovery test requires that the research be undertaken for discovering information that is technological in nature. Discovering information means obtaining knowledge that expands or refines the common knowledge of skilled professionals in a field of technology or science. Research activities for purposes of the discovery process must fundamentally rely on the principles of the physical or biological sciences, engineering, or computer science. REF: IRC § 41(d)(1)(B)(i).

- *Intended to be useful in the development of a new or improved business component of the taxpayer, REF: IRC § 41(d)(1)(B)(ii)); and*
  - The Business Component Test

The business component test, which is part of the discovery test, requires that the research be undertaken for discovering information the application of which is intended to be useful in the development of a new or improved business component of the taxpayer.

The tests are to be applied separately to each business component of the taxpayer. The term business component is defined as any product, process, computer software, technique, formula, or invention to be held for sale, lease, or license, or used by the taxpayer in a trade or a business of the taxpayer. (See section below on internal use computer software)

There is a special rule for production processes. Any plant process, machinery, or technique for commercial production of a business component shall be treated as a separate business component (and not as part of the business component being produced). REF: IRC § 41(d)(2)(A) through (C).

- *Substantially all the activities of which constitutes an element of a process of experimentation for a permitted purpose described in IRC § 41(d)(3).*

  - The Process of Experimentation Test

The process of experimentation test requires that substantially all the activities that constitute elements of a process of experimentation relate to a new or improved function, performance, reliability or quality.

(a) CONSTITUTES ELEMENTS OF A PROCESS OF EXPERIMENTATION FOR A PERMITTED PURPOSE

- Process of experimentation

The taxpayer must show that substantially all its activities must constitute elements of a process of experimentation.

- For a permitted purpose

The final test is that the research must be performed for a permitted purpose. IRC § 41(d)(3)(A) states a permitted purpose must be related to:

- new or improved function; or
- Performance; or
- Reliability, or
- Quality

Note: The research is not qualified research if its purpose relates to style, taste, and cosmetic or seasonal design factors. IRC §. 41(d)(3)(B). The auditor should question the eligibility of qualified

research on consumer product development activities where style and taste factors are a significant part of the product.

- For research to be considered "qualified", the Illinois R&D Credit contains an additional requirement in that the research activities must be conducted within Illinois.

If the taxpayer can document that the project or activity meets ALL four of the above requirements, then it will qualify for the research credit. Issue an EDA-70 for each project or activity requesting documentation and/or other information establishing that each project or activity satisfies the above requirements.

K. EXCLUDED ACTIVITIES

There is certain research, research related and non-research activities that are excluded from qualifying for the research credit even though they may meet the general requirements of IRC § 41(d)(1). The activities for which the credit is not allowed are contained in IRC § 41(d)(4). They include the following:

1. Research after Commercial Production;

   Any research conducted after the beginning of commercial production of the business component.

2. Adaptation of Existing Business Component;

   Any research related to the adaptation of an existing business component to a customer's requirement or need.

3, Duplication of Existing Business Component;

   Any research related to the reproduction of an existing business component (in whole or in part) from a physical examination of the business component itself or from plans, blueprints, detailed specifications, or publicly available information with respect to such business component.

4. Surveys, Studies, such as:

   - Efficiency surveys;
   - Activities relating to management function or technique;

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- Marketing research, testing or development (including advertising and promotions);
- Routine data collection; or
- Routine or ordinary testing or inspection for quality control.

5. Computer Software;

- Except to the extent provided in regulations, any software with respect to computer software which is developed by (or for the benefit of) the taxpayer primarily for internal use by the taxpayer other than for use in:

- An activity which constitutes qualified research; or a production process.

See separate section below on Internal Use Computer Software.

6. Social Sciences, Etc.

- Any research in the social sciences, arts, or humanities include the development of a new life insurance contract, a new economic model or theory, a new accounting procedure or a new cookbook.

7. Funded Research

- Any Research to the extent funded by any grant, contract or otherwise by another person or governmental entity. This would include any research performed on behalf of other persons if the taxpayer does not retain substantial rights in the research. REF: CFR § 1.41- 2(a)(3)(i) and 1.41-5(d)(2).

8. Research Conducted Outside Illinois

- For Illinois purposes, any research conducted outside of this state would be excluded.

L. INTERNAL USE COMPUTER SOFTWARE

The IRS has issued two position papers based on the decisions issued in Norwest Corp., et al. v. Commissioner and United Stationers Inc. v. United States that provide guidance in auditing “internal use computer software” research projects. Ordinarily, software that is developed by or for the benefit of the

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

taxpayer primarily for internal use by the taxpayer does not qualify for the credit unless the software is for use as follows:

- In an activity which constitutes qualified research, or
- In a production process which meets the requirements of qualified research.

“Internal use computer software” defined as software developed by the taxpayer solely for its own internal business and management purposes. The software supports general and administrative functions such as payroll, bookkeeping, or personnel management or provides non-computer services such as accounting, consulting or banking services. The software must meet a “high threshold of innovation” to obtain the credit.

Research projects involving the development of “internal use computer software” **must** satisfy seven tests. The first four tests relate to all research and experimentation projects and the additional three tests were developed as part of the narrowing of the credit by the Tax Reform Act of 1986 for “internal use computer software”. The first four tests were explained in the Review of Projects section.

- The Section 174 Test
- The Discovery Test
- The Business Component Test
- The Process of Experimentation Test
- The Innovativeness Test

  The innovativeness test requires that the software be innovative “as where the software results in a reduction in cost, or improvement in speed, that is substantial and economically significant”.

- The Significant Economic Risk Test

  The significant economic risk test requires that the software development involve significant economic risk “as where the taxpayer commits substantial resources to the development **and** there is substantial uncertainty, because of technical risk, that such resources would not be recovered within a reasonable period”.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- The Commercial Availability Test

The commercial availability test requires that the software not be commercially available for use by the taxpayer "as where the software cannot be purchased, leased or licensed and used for the intended purpose without modifications that would satisfy tests 5 and 6".

The following two court cases have further defined the eligibility of "internal use computer software" for the credit for increasing research activities:

1. **United Stationers Inc. v. United States** – The United Stationers case dealt with eight software projects in which the taxpayer claimed credits for increasing research activities in developing various software projects for use in its office supply wholesale business. The case was decided in favor of the Internal Revenue Service. The taxpayer argued that the projects were not internal use software that is excluded from the credit because their customers had access to and benefited from the programs. The court stated that in viewing the projects in totality the taxpayer's programs were the types of internal use software that Congress meant to exclude from the research credit. The projects were developed to help the taxpayer track its huge inventory. There was limited customer access to the programs, but that access was a benefit to the taxpayer in aiding in streamlining its operation.

   After concluding that the software development was for internal use, the court denied the research credit because the projects did not meet all the 3 internal use software tests. The program development did not discover information that was technological in nature. The projects did not define or expand the principles of computer science but instead modified the taxpayers existing software to improve its inventory control system. Also, the software development did not involve a process of experimentation as envisaged by Congress. There was no technical uncertainty about the program development from the onset. In other words, there was no doubt that the programs could be developed.
   REF: United Stationers, Inc. v. United States, 982 F. Supp. 1279 (N.D. Ill. 1997)

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

2. **Norwest Corporation and Subsidiaries v. Commissioner of Internal Revenue** – The taxpayer, a Bank Holding Company, has affiliates that provide banking and other financial services. They developed or modified previously developed software for the internal management and administration of their businesses. The taxpayer had concluded that 67 of its 118 internal use software development activities qualified for the federal credit for increasing research activities. The IRS and the taxpayer selected eight software projects to serve as representative or sample activities to determine whether all or part of the 67 projects constituted qualified research for purposes of the tax credit. They also agreed that for the representative internal use software activities to constitute qualified research for purposes of the tax credit, all the seven tests must be satisfied.

   The tax court ruled that the three additional tests for qualified research in the development of internal use software enunciated in the conference report accompanying the TRA 1986 require a higher threshold of technological advancement and functional improvement than is necessary in other fields of research. One of the eight activities, the development of the strategic banking system's (SBS) customer module, satisfied all seven tests.

   The SBS discovered technological information by creating a customer-based system that could interact with other systems and handle large data amounts. Provided an improved taxpayer business component as to customer service and growth; involved an experimentation process by developing, testing and analyzing various approaches; was an innovative effort with potential for significant efficiency and economic benefits; involved significant economic risk due to its size and complexity; and was not commercially available when implemented. This software development project was a concerted effort at advancing the state of technology in the field of computer science and pushed existing technology to new heights in the opinion of the court. The remaining seven activities failed to satisfy the technical risk requirement of the significant economic risk test.
   REF: Norwest Corporation v. Commissioner, 110 T.C. 454 (1998)

M. IRS COORDINATED ISSUE PAPERS

The Internal Revenue Service issued two position papers on August 26, 1999 to provide guidance on auditing the Research Credit for federal purposes. These two papers will also be helpful in reviewing internal use software projects for Illinois purposes.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

1. UIL 41.51-10 – INTERNAL USE SOFTWARE

This paper deals with a taxpayer's activities related to the installation, customization, enhancement, and maintenance of a vendor-supplied software package and whether the costs incurred in this endeavor qualify for the Research Tax Credit.

The taxpayer purchased an administrative software package that was used by various competitors. The package provided an extensive list of standard features and provided the basic functions that the taxpayer needed. During the next 5 or 6 years, the taxpayer installed the package and initiated over 40 projects to maintain, customize and develop the system for use in its business. The software package was acquired for increasing corporate efficiency and reducing costs.

Before evaluating the projects for the three internal use software tests, the projects must meet the 4 tests for determining if the requirements for qualified research are met. Next it must be determined if the computer software has been developed by or for the benefit of the taxpayer primarily for its own use.

Once it was determined that the taxpayer for its own use developed the software, the three internal use software tests need applied.

a) **The Innovativeness Test** – The taxpayer had to show that it attempted to develop software that was innovative. The use of the software had to result in a reduction in cost, or improvement in speed that was substantial and economically significant. This can be demonstrated by the advantage that the taxpayer would gain over its competitors. In this case, the taxpayer reduced costs by 80%. However, this cost savings was not economically significant because it did not result in a competitive benefits or advantage. The software was new to the taxpayer but not new to the industry. Therefore, the taxpayer did not meet the first test.

b) **The Significant Economic Risk Test** – In order to satisfy this test, the taxpayer must show that the software development activities involved significant economic risk. Substantial resources must be committed to the development of the project and there is a substantial uncertainty because of the technical risk that the resources would be recovered within a reasonable period. To determine if the taxpayer has committed substantial resources to the software development, the following evaluation must be made:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- Compare the amount of money spent versus the taxpayer's net assets;

- Compare the number of hours that the computer programmers spent on the projects versus the total time spent on software development;

- Compare the amount paid or budgeted for the software project to the total annual information technology budget;

- Compare the amount paid or budgeted for the software project compared to the amount paid or budgeted for all its research projects during the same period;

- Determine the level of management approval, if any, required under its budgetary procedures before it committed funds to the project to the extent that the approval process defines the taxpayer's own assessment of what is a substantial commitment of resources.

The activities cited in this position paper did not meet the Significant Economic Risk Test because the taxpayer spent less than 1% of its net assets over the life of the projects, there was no uncertainty that the resources would be recovered, the taxpayer's programmers completed the tasks using standard software development techniques.

This position paper elaborates on the difference between a technical risk and a business risk. Substantial uncertainty for purposes of the "substantial economic risk test" is caused by technical risk, not business risk. Seven of the eight projects in the Norwest case failed the Significant Economic Risk Test because they incurred a business risk not a technical risk. The following examples illustrate this point:

A technical risk arises when there is some question whether the software can be developed. A business risk arises when there is a question whether the software once developed will achieve the desired efficiency and cost savings.

If there is substantial uncertainty that the taxpayer can recover the resources expended within a reasonable period, this is a technical risk. Whether or not the taxpayer can complete the project on time and within budget is a business risk.

Since evaluating a technical risk versus a business risk is more difficult than determining if the taxpayer committed substantial resources, the Auditor may want to test the amount of resources committed to the activity before

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

evaluating the risks. If the taxpayer fails to have committed substantial resources to an activity, it would fail the Significant Economic Risk Test.

c) **The Commercial Availability Test** – In order to satisfy the commercial availability test, the taxpayer must show that the software it developed was not commercially available as where the software cannot be purchased, leased or licensed and used for the intended purpose without modifications that would satisfy the first two requirements of the three-part test. Since the modifications made by the taxpayer to the purchased software package did not meet the first two tests, the commercial availability test was not met.

2. UIL 41.51-11 – QUALIFIED RESEARCH

This paper addresses the requirements for qualified research as to a specific business component and provides analysis that should be useful in determining what is qualified research.

The taxpayer, a kitchen designer and manufacturer, developed a new and improved toaster with a new "high tech" appearance that contained a new heating element. The taxpayer claimed all the costs of the development of the toaster as qualified research expenses. However, the requirements for qualified research will be applied to each business component of the taxpayer.

For purposes of this illustration, the first business component is the improved toaster. For the development costs of the entire toaster to qualify for the credit, the research activities in relationship to the toaster must meet the four tests. The development of the toaster did not meet the **discovery test** because all toasters in the taxpayer's product line contained heating elements. In addition, the **process of experimentation test** was not met because there was no uncertainty that the heating element could be integrated into the toaster. The costs to give the toaster a high-tech appearance would not be considered for the credit because activities relating to style, taste, cosmetic, etc. do not qualify.

Since the toaster viewed did not qualify for the credit, the "shrinking back" rule applies. The most significant subset of elements of the original business component should be tested to see if all the tests are met by the development of the subset. In this case, the new heating element will be treated as a separate business component. When all the four primary research and development tests were applied to the development of the new heating element, the requirements for qualified research were met.

The expenditures qualified under IRC § 174. The development of the material used in the new heating element involved discovery of information that was technological in nature and the application was useful in the development of the new product. The new heating element gave the toaster an enhanced performance because it heated up and cooled down more quickly than other heating elements. The process of experimentation test was met because the taxpayer was uncertain about the outcome and had to experiment to find a material to achieve the desired result.

Therefore, the costs of developing the new heating element qualified for the research credit.

In relation to internal use software, a total software development project may not qualify for the credit but if the shrink back rule is applied, a component of the project may meet all the tests.

N. REVIEW OF EXPENSES

1. **Request A Written Description of Each Cost Center** - If the taxpayer computes the credit under a cost center or department approach, request the written description or profile of the function of that cost center or department. Often, the description of the cost center or department will indicate that there are administrative or other non- qualified services being performed which should be disallowed. Pay special attention to cost centers or departments included in the computation of the research credit which are considered "outside" research and development such as manufacturing. If a written description is not available, request a narrative explaining the function of each cost center or department included in the computation of the credit.

2. **Request A Written Description of Each Account** - Regardless the methodology the taxpayer used to compute the credit, request a written description of each account included in the calculation of the credit. These descriptions should identify the function for each account. By reviewing the description or profile of each account, the auditor may find non- qualified accounts such as fringe benefits, travel, capital assets, etc. included in the computation of the credit.

3. **Examine the Wage Component of the Research Credit** - The term "wages" has the same meaning for purposes of this credit as it does for federal withholding purposes. In the case of a self-employed individual, the term "wages" includes the earned income of the individual as defined in IRC § 401(c)(2). The term " wages" does not include any amount

considered in determining the targeted jobs credit under IRC § 51(a). REF: IRC § 41(b)(2)(D). However, the term "wages" does include any wages of eligible employees for which the Illinois Jobs Tax Credit could be or is claimed. Jobs Tax Credit has since been repealed. Only the wages of employees performing qualified services would constitute qualified research expenses. IRC § 41(b)(2)(B) defines the "Qualified Services" as:

- Engaging in the actual conduct of qualified research. For instance, a scientist conducting laboratory experiments would be performing a qualified service if the research being conducted were qualified. REF: IRC § 1.41-2(1), or

- Engaging in the direct supervision or direct support of research activities, which constitute qualified research.

  (i) Direct Supervision - Direct means the immediate supervision (i.e. first-line management) of qualified research. For instance, a research scientist who directly supervises laboratory experiments, but who may not actually perform the experiments would be considered involved in direct supervision of research activities. The term "direct supervision" does NOT include supervision by a higher-level manager to whom first-line managers' report even if that higher-level management is a research scientist. REF: IRC Regulation § 1.41-2(2).

  (ii) Direct Support - means services performed in the direct support of persons engaged in qualified research or persons who are directly supervising persons engaged in qualified research. For instance, direct support of research would include the services of a:

    - Secretary for typing reports describing laboratory results derived from qualified research

    - Laboratory worker for cleaning equipment used in qualified research

    - Clerk for compiling research data

    - Machinist for machining a part of an experimental model used in qualified research

    The term "direct support" does NOT include general administrative services, or other services only indirectly of benefit to research

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

activities. Types of services, which would NOT be considered "direct support" services, would include the services of:

- Payroll personnel responsible for preparing salary checks of laboratory scientists
- An accountant for accounting for research expenses
- A janitor for general cleaning of a research laboratory
- Officers engaged in supervising financial or personnel matters
- Higher-level management

The fact that general administrative personnel are considered a part of a research department does not make their activities "direct support" of qualified research. REF: CFR § 1.41-2(c)(3).

Break down the wage component of the credit by individual employees. Identify each employee by name, job title, total wage and wage included in the credit. At a minimum, employees with questionable job titles and duties such as administrative, manufacturing, managerial, etc. The Human Resource or personnel department of the taxpayer may be able to assist you with obtaining the job descriptions and employee evaluations.

Items not considered qualified wages:

- Payments to a deferred compensation plan or trust such as an IRC § 401(k) plan and matching employer's contributions;
- Employee fringe benefits and other compensation not considered wages under IRC § 3401(a). AS A GENERAL RULE, ANYTHING NOT SUBJECT TO WITHHOLDING WOULD NOT BE CONSIDERED QUALIFIED WAGES FOR THE R&D CREDIT; and
- If an employee has performed both qualified services and non-qualified services, only the amount of wages allocated to the performance of qualified services constitutes an in-house research expense. In the absence of another method of allocation that the taxpayer can demonstrate to be more appropriate, the amount of in-house research expenses shall be

determined by multiplying the total amount of wages paid to or incurred for the employee during the taxable year by the ratio of the total time actually spent by the employee in the performance of qualified services for the taxpayer to the total time spent by the employee in the performance of all services for the taxpayer during the taxable year. REF: CFR § 1.41- 2(d)(1).

- If, however, "substantially all" of an employee's wages are incurred for the performance of qualified services for the employer, then all the employee's wages for the taxable year will be considered to constitute in-house research expenses. "Substantially all" of an employee's wages will be from qualified services for the employer if ratio described above equals or exceeds 80%. REF: IRC § 41(b)(2)(B) and CFR § 1.41-2(d)(2).

4. **Review the Accounts Claimed as Qualified Supplies** - Supplies are tangible property other than land, land improvements, or property on which depreciation can be claimed. To be considered a qualifying supply, the item must be tangible property and totally used or consumed in the qualified research activity.

   Expenditures for supplies that are indirect research expenses or general and administrative expenses do not qualify. REF: CFR § 1.41-2(b)(1).

   In general, amounts paid for tangible utilities (such as water and natural gas) used in a building in which qualified research activities occur, will be considered general and administrative expenses and will NOT qualify for the credit. However, if a taxpayer can prove that the special character of the qualified research required additional extraordinary expenditures for tangible utilities, the amounts paid can constitute in-house research expenses. REF: CFR § 1.41-2(b)(2).

   Supplies should represent a small percentage of the credit. A review of the taxpayer's business should suggest a reasonable percentage of qualified supplies. Generally, supplies should only represent the costs to build prototypes. If a taxpayer is involved in heavy manufacturing, the supply cost will probably be greater than a taxpayer in light manufacturing. Software developers should be claiming little or no supply costs. Review the supply portion of the credit for non-qualified items often claimed as supplies such as capital assets, purchased software, utilities and travel expenses.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

5. **Time-Sharing of Computers** - For any amounts paid or incurred to another person for the right to use computers (time-sharing) in the conduct of qualified research to be considered an in-house research expense:

   The computer must not be owned by the taxpayer, must be located off the taxpayer's premises and the taxpayer must not be the primary user of the computer. REF: CFR § 1.41-2(b)(4).

   Also, for purposes of the Illinois credit, the computer must be in Illinois.

   However, any amount which qualifies under this provision must be offset by any amount the taxpayer (or any member of the unitary group) receives as income for the right to use substantially identical property. IRC § 41(b)(2)(A)(iii). For example:

   Corporation A conducts qualified research and pays Corporation B for the use of its computer. Corporation B conducts qualified research and pays Corporation A for the use of its computer. These expenses ordinarily would be qualified and eligible to be included in the credit computation. However, both Corporations received income for the use of their computers, which offset their expenses. Therefore, they cannot include the expense for the use of the other corporation's computer in the credit computation.

6. **Review the Contract Research Portion of Research Credit** - A "contract research expense" is 65% of any amount the taxpayer pays or accrues to any person not an employee of the taxpayer for qualified research or for services performed which would, if performed by an employee of the taxpayer, constitute qualified services on behalf of the taxpayer. If some of the services performed are qualified and others are not, only 65% of the amount paid for the qualified services will be eligible for the R&D Credit. REF: CFR §1.41-2(e)(1).

   An expense is a qualified contract research expense only if it is paid or incurred for the performance of qualified research pursuant to an agreement that:

   - Is entered prior to the qualified research being performed;
   - Provides that research be performed on behalf of the taxpayer; and
   - Requires the taxpayer to pay for the research even if it is not successful.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

If payment is contingent upon the success of the research, then the expense is considered payment for the product or result rather than for the performance of the research and the expense is not a qualified contract research expense. REF: CFR §1.41-2(e)(2).

Qualified research is performed "on behalf" of the taxpayer only if the taxpayer has a right (although not necessarily an exclusive right) to the research results. REF: CFR §1.41-2(e)(3).

If contract research expenses paid or incurred during the taxable year are attributable to qualified research to be conducted after the close of the taxable year (prepaid expenses), such amounts would be treated as paid or incurred during the period during which the qualified research is conducted. REF: CFR §1.41-2(e)(4).

IMPORTANT: Contract Research must be performed in Illinois; however, the contractor does not have to be in Illinois. The contracts should be reviewed to determine if the research is conducted in Illinois. Even if the company has a 100% Illinois factor, this does not mean that the contract research is conducted in Illinois. The possibility exists that you might have to prorate the contract, based on what was conducted within Illinois.

O. INTERCOMPANY TRANSACTIONS BETWEEN UNITARY GROUP MEMBERS

For corporations who are members of a unitary group filing a combined Illinois return, transfers (or charges) between members of the combined return are generally disregarded for purposes of the R&D Credit.

If one member performs qualified research in Illinois on behalf of another member, the member performing the research will include in its qualified research expenses any in-house research expenses for the work. The member for whom the research is performed will not treat any part of any amount paid or incurred as a contract research expense.

If one member pays or incurs contract research expenses to a person outside of the group for costs incurred in carrying on another member's trade or business, the contract research expenses will still be eligible for the R&D Credit IF the member who is carrying on the trade or business to which the research relates reimburses the member who paid the expenses. REF: CFR § 1.41-8(e).

P. BASIC RESEARCH PAYMENTS

The term "qualifying expenditures" includes basic research payments. "Basic research payments" are defined in IRC § 41(e)(2) as any amount paid in cash during the taxable year by the taxpayer to any qualified organization for basic research if:

Such payment is pursuant to a written agreement between the taxpayer and the qualified organization; and

Such basic research is performed by the qualified organization. There is an exception to the requirement that research be performed by the organization in the case of scientific tax-exempt organizations and certain grant organizations. REF: IRC § 41(e)(2)(B)

A request should be made for a list of all contracts with research vendors. The list should be reviewed, and the contracts selected for the vendors that show audit potential. Request all agreements concerning the contracts. The contract must be reviewed to determine the following:

1. Who is at risk? Only the person who bears the risk of loss is entitled to the credit if the activity qualifies;

2. Who obtains substantial rights to the research? Only those who obtain the rights to the research may claim the credit; and

3. The specific activities performed by the contract researcher must be reviewed to determine if all activities constituted qualified research. It is possible that an allocation may be required to eliminate the non-qualified activities from the credit calculation.

These examples are based on examples provided in CFR §1.41-2(e)(5).

Example 1:

Corporation A is a calendar year taxpayer. In 2010 Corporation A enters into a contract with Corporation B to perform qualified research in Illinois on behalf of Corporation A. The contract requires Corporation A to pay Corporation B $300,000 for the research, regardless of its success. During 2010 Corporation B performs all the research and Corporation A pays Corporation B $300,000. $195,000 (65% of $300,000) is considered a contract research expense for purposes of the R&D Credit.

Example 2:

Corporation C is a calendar year taxpayer who conducts qualified in-house research in Illinois in carrying on its trade or business. During 2010, Corporation C contracts with Corporation D, a temporary services agency, and pays Corporation D $400 for D to provide the services of a secretary for one week. The secretary spends the entire week typing reports describing laboratory results derived from C's qualified research.

These services, if performed by an employee of Corporation C, would constitute qualified services. Therefore, 65% of the amount paid to Corporation D, or $260 would constitute contract research expenses for purposes of the R&D Credit.

Example 3:

Corporation E is a calendar year taxpayer who conducts in-house qualified research in Illinois. During 2010, Corporation E contracts with an outside accounting firm to keep Corporation E's books and records pertaining to a specific research project. Corporation E agrees to pay the firm $100,000 for their services.

The activity conducted by the accounting firm would not constitute qualified services if an employee of Corporation E were performing it since general administrative services are not qualified services. Therefore, none of the $100,000 paid to the accounting firm would qualify as contract research expenses for the R&D Credit.

Q. START UP OR SPIN OFF COMPANIES

If a new company is formed and begins performing qualified research in the first year of operation, the taxpayer will have base period expenses of zero for each of the three preceding years prior to the start of operations. In the second year of operation, it will have two base period years with zero qualified expenses and one with the qualified expenses claimed the first year of operation, etc. (Federal Regulation 1.41-3)

R. OWNERSHIP CHANGES / ACQUISTITIONS & DISPOSSITIONS

If a company is formed because of a spin-off of a portion of a taxpayer’s business, the new company will be considered a viable trade or business and will not qualify as a start-up company for R & D Credit purposes. It states under IRC § 41(f)(3)(A)

1. Acquisitions

Taxpayer acquires the major portion of a trade or business of another person (hereinafter in this paragraph referred to as the “predecessor”) or the major portion of a separate unit of a trade or business of a predecessor. Then, for purposes of applying this section for any taxable year ending after such acquisition happens, the amount of qualified research expenses paid or incurred by the taxpayer during periods before such acquisition increases by the amount expenses paid, incurred by the predecessor with respect to the acquired trade, or business as is attributable to the portion of such trade or business or separate unit acquired by the taxpayer. The gross receipts for the period increase by the amount gross receipts of such predecessor with respect to the acquired trade or business as is attributable to such portion.

This section prevents a taxpayer who begins business by buying and operating an existing company; from getting a credit if the amounts of qualified research expenses are not increased. The spun-off company must include its base period expenses for that division. The seller must provide that information to the spun-off company as explained below.

2. Dispositions:

If a taxpayer disposes of a major portion of a business, it should reduce its research expenses for periods prior to the date of disposition by the expenses of that business segment. This allows a taxpayer that operates two or more business, to sell one of the businesses and still be able to claim research and development credit on the business units that remain. REF: IRC § 41(f) (3)(B) However the seller does not get to reduce its predisposition expense amounts unless the seller gives the buyer the information that it needs to increase its base period amounts. REF: IRC § 41(f)(3)(B)(ii)

IAC 100.5270(d)(5) contains rules and examples for adjusting the base period for changes to the members of a combined group.

Example:

Company A, a farm machinery manufacturer, has a division that engineers and manufactures small farm tractors. This division conducted qualified research for which it had qualified research expenses. These qualified research expenses were included with Company A’s total qualified research expenses as follows:

	Year	Company A	Small/Trac
Qualified research expenses	12/08	10,000,000	1,000,000

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

	12/09	15,000,000	2,000,000
	12/10	17,000,000	2,500,000

On January 1, 2011, Small/Trac was spun off and sold to Company B. The base period for Small/Trac's YE 12/11 determination year will include the qualified expenses of Company A, which are attributable to Small/Trac in the base period.

	Qualified Expenses
Year End 12/08	1,000,000
Year End 12/09	2,000,000
Year End 12/10	2,500,000
Total of the Base Period Yrs.	5,500,000
Average of Base Period	1,833,333
Qualified Expenses 12/11	3,000,000
YE 12/11 Exp. minus Base Period Average	1,166,667
Credit Allowable	75,833

S. BASE PERIOD RECOMPUTATION

1. IN-STATUTE BASE PERIOD

In computing, the R & D credit for the determination year, the auditor/taxpayer may recalculate each year in the base period to reflect the correct qualified expenditures. If the statute of limitations has not expired for a base period year, the credit should be recomputed for that year to reflect the proper computation of qualified expenses, even if that year is outside the audit period.

Example

Your audit period is 2011 (the determination year). The base period is 2008, 2009, and 2010.

Statutes of limitations are still open for the base period of 2009 through 2010.

The wage expense as reported for 2008 through 2011 included the salary of the CEO, which does not qualify for the credit as follows:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

2008 - $50,000, 2009 - $80,000, 2010 - $90,000, 2011 - $100,000.

The auditor will decrease the wage expenses by the CEO's salary for each year and recompute the credit in the determination year of 2011. The credit should also be recomputed for each of the base period years for which the statute of limitations is still open.

T. RECOMPUTATION OF BASE PERIOD IN OUT OF STATUTE BASE PERIOD YEARS

To compute the qualified expenditures for the base period when the statute of limitations has expired for one or more of those years, the following procedures have been established by the Bureau of Audits.

1. If the qualified expenditures were understated for any base period year, the correct amount should be determined for purposes of computing the credit in any open year.

2. If the qualified expenditures were overstated for any closed base period year, and no credit was claimed for that year, the correct amount should be determined for purposes of computing the credit in any open year.

3. If the qualified expenditures were overstated for any closed base period year, and a credit was claimed for that year, the credit for any open year must be computed using the amount of expenditures claimed in computing the credit for that year under the duty of consistency. The duty of consistency prevents a taxpayer from receiving a double benefit from treating an item differently in a closed year from the way it treats the item in an open year. The duty of consistency was applied to the computation of the R&D credit in PLR 9040002. That PLR was overruled by Congress, which enacted IRC § 41(c)(6) in 1989, to require the recomputation of base period expenses to match the credit year computation in all cases. Treas. Reg. Section 1.41-3(d) states that IRC Section 41(c)(6) applies only to tax years beginning after December 31, 1989, indicating that the IRS would still apply the duty of consistency to earlier years. Because the IITA contains no similar provision, the duty of consistency should apply to all Illinois income tax cases.

   Example 1

   The taxpayer claimed the following qualifying expenses in the base period and the determination year:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

	12/08	12/09	12/10	12/11
Expenses	1,000,000	1,100,000	1,200,000	1,500,000

Total Base Period Expenses	=	$3,300,000
Average Expenses	=	$1,100,000
Qualified Expenses for YE 12/11	=	$1,500,000
Excess Expenses over Base Period	=	$ 400,000
Excess Expenses Times Rate (6.5%)	=	$ 26,000

The taxpayer has identified additional qualified expenses in 12/11 of $100,000 that is equal to an increase in the credit of $6,500. To quickly estimate the tax effect if we recomputed the base period, we would take the change in the base period expenses and divide that amount by 3 to determine an average change and compare it to the change in expenses in the determination year.

For example, the proposed changes to the base period is as follows:

12/08	12/09	12/10
50,000	75,000	90,000

The total of the changes for each year divided by 3 equals $71,666. ($50,000 + $75,000 + $90,000 = $215,000/3)

The change in expenses for YE 12/11 of $100,000 minus $71,666 equals $28,334. The tax effect if the base period were recomputed would be an increase in the credit by $1,842 instead of $6,500. The Auditor and Supervisor would need to evaluate whether the change in the credit is worth the audit hours and effort necessary to review the required records needed to recompute the base period.

Example 2

To accomplishes the application of the duty of consistency, the following example should be followed.

All years are closed, and the credit claimed for 2010 and 2011 cannot be recaptured. Therefore, the entire amount of the credit is frozen. The qualifying expenditures claimed on the original returns are as follows:
This example is much more complicated than it needs to be. Since 2008 and 2009 are out of statute and the credits claimed in those years were used in those years, the computation of the credit for any

year in which 2008 or 2009 is one of the base years must treat the qualified expenditures claimed for one of those years as the minimum expenditure for that year. If the taxpayer overstated qualifying expenditures in that year, the amount it claimed must be used. If it understated qualifying expenditures for that year, the correct amount must be used.

U. INFORMATION HELPFUL IN RESEARCH

A review of job descriptions and personnel reviews may give the auditor valuable information concerning the employees claimed for the credit. Additional information that may be available, which could help the auditor and the taxpayer support the research activities are as follows:

1. Organization charts or other similar documents describing the organization of the taxpayer. Organization charts should identify research personnel and where the research activities fit within the overall structure of the taxpayer. Reviewing the organization charts may identify the location of management and other administrative activities;

2. Accounting, financial, policy and other manuals that describe the research and development activity and the research tax credit. These should give the auditor a written description as to what the taxpayer included in the calculation of the research tax credit. This may not be needed if the taxpayer can explain to the auditor during the interview the methodology used to compile the accounts and numbers;

3. Materials explaining research activities, including brochures, pamphlets, press releases and other similar documents;

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

4. Submissions to management, the Board of Directors, review committees or other similarly situated individuals regarding research projects, activities, expenditures and the research credit;

5. Documents prepared by or on behalf of internal audit, including quarterly and annual reports that refer in any manner to the research activities;

6. Applications regarding requests for patents and copyrights for research activities;

7. Minutes, notes or other similar recordings from budget, board of directors', managerial or other similar meetings concerning research activities. Also, memoranda requesting budgetary authority for the project;

8. Project authorization, budget or work order that initiates the research and experimental project;

9. The internal authorization policy required by the taxpayer to approve a research project;

10. Project summaries and/or progress reports and project meeting minutes; and

11. Field and Lab verification data.

Items 3 - 11 should be reviewed when the auditor considers the research activity. This information may assist you in understanding what projects the taxpayer was involved in during the examined years.

V. POTENTIAL ISSUES THAT SHOULD BE CONSIDERED WHEN EXAMINING THE RESEARCH CREDIT

Certain issues have been identified as **non-qualified activities or expenses.** After a review of the work papers and your interview with the taxpayer, you may be able to identify these specific issues. Identify the issue to the taxpayer and request the costs associated with the issue. The issues are as follows:

1. Technical writers and other individuals who prepared the end user manuals or other instructive documents for the end user. This is a coordinated issue;

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

2. Payments to a deferred compensation plan or trust such as an I.R.C. Section 401(k) plan and matching employers' contributions;

3. Employee fringe benefits and other compensation not considered wages under IRC § 3401(a);

4. Managers above first line supervisors;

5. Purchased, licensed or leased software;

6. Utilities;

7. Overhead expenditures;

8. Travel; and

9. Research tax credit claimed on costs associated with the development of a generic drug.

XI. ENVIRONMENTAL REMEDIATION CREDIT

IITA §201(l) IAC §100.2163

For tax years ending after December 31, 1997, and on or before December 31, 2001, a taxpayer shall be allowed a credit against the tax imposed by IITA § 201(a) and (b) for unreimbursed environmental remediation costs incurred.

The credit is calculated using:

- Form IL-1299-D for Corporations and Fiduciaries
- Form IL-1299-C for Individuals
- Form IL-1299-A for Partnerships and S Corporation

The credit allowed shall be equal to 25% of the unreimbursed remediation costs incurred and approved by the Illinois Environmental Protection Agency more than $100,000 per cleanup site.

- The $100,000 deductible does not apply if the remediation site is within an enterprise zone. [IITA § 201(l)]

The credit is earned in the year the Illinois Environmental Protection Agency issues:

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights."

No Further Remediation Letter with respect to the site and may not exceed $150,000 per site.

The credit is not allowed to a person who is responsible for the pollution of the remediation site or who is related to the responsible person. A person is related to a responsible person if deductions for losses incurred on transactions between them would be disallowed under IRC § 267(b), (c), or (f)(1). [IITA § 201(l)]

CARRYOVER OF EXCESS CREDIT

The credit (including carryforwards) may not exceed $40,000 per year and may not reduce the taxpayer's liability for the tax imposed by IITA § 201 (a) and (b) below zero. Any credit more than the tax liability either for the taxable year or the $40,000 per year limitation may be carried forward to offset the income tax liability of the taxpayer for the next 5 years or until it has been fully utilized, whichever occurs first.

1. Credit more than the $150,000 per site limitation may not be carried over to another year.

    a) If a credit from more than one year is carried forward to a tax year, the credit arising in the earliest tax year is applied first.

2. If the site is sold, any unused credit passes to the purchaser, unless the purchaser is disqualified under subsection (d) of this Section.

3. In the case of a credit earned by a partnership or Subchapter S corporation, the credit passes through to the owners for use against their regular income tax liabilities in the same proportion as other items of the taxpayer are passed through to its owners for federal income tax purposes.

Note: A taxpayer claiming the credit who has deducted any of the expenses on which the credit is based for federal income tax purposes must add those expenses back in computing base income. (Source: IITA Section 203(a) (2) (D-10), (b) (2) (E-5), and (c) (2) (G-5))

XII. EDUCATION EXPENSE CREDIT

IITA §201(m) IAC §100.2165

The parents or legal guardians of one or more qualifying pupils are allowed an income tax credit for expenses incurred on behalf of qualifying pupils equal to 25% of qualified education expenses.

- The maximum amount of the credit is $500 for tax years prior to December 31, 2017.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- The maximum amount of the credit is $750 for tax years ending on or after December 31, 2017.
- No credit is allowed for any tax year beginning on or after January 1, 2017, to taxpayers with adjusted gross income more than $500,000 if married filing joint for federal income tax purposes or $250,000 for all other taxpayers

“Qualifying pupils” means full-time students enrolled in a kindergarten through grade 12 program at any public or non-public elementary or secondary school in Illinois. In addition, they are required to be under 21 years of age at the close of the school year for which a credit is sought. Qualifying expenses include tuition, book fees, and lab fees over $250 incurred on behalf of a qualifying pupil. See Regulation 100.2165 for more information.

EXCESS CREDIT

The credit may not reduce the taxpayer's liability to less than zero. Therefore, no part of the education expense credit is refundable. There is no provision for carryover of excess credits.

XIII. RIVER EDGE REDEVELOPMENT ZONE REMEDIATION CREDIT

IITA §201(n)

IITA § 201(n) provides a credit equal to 25% of unreimbursed eligible remediation costs more than $100,000 per site incurred to clean up sites within River Edge Redevelopment Zones

The credit is calculated using:

- Schedule 1299-D for corporations and fiduciaries

For tax years ending on or after December 31, 2006 and ends before July 12, 2016, allows for a credit on unreimbursed eligible remediation costs incurred in a Site Remediation Program under the Environmental Protection Act in a river edge development zone.

Any taxpayer cannot take the credit if:

- The taxpayer or any related party caused or contributed to a release of regulated substances on, in, or under the site at which the otherwise eligible remediation costs were incurred.

Note: The credit cannot be passed through by a partnership to its partners or by a subchapter S corporation to its shareholders.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

A. QUALIFICATIONS

To qualify for this credit, you must have:

1. Received approval of the eligible remediation costs from the Illinois Environmental Protection Agency (IEPA) on forms the IEPA will provide. The credit is 25 percent (.25) of the amount of unreimbursed eligible remediation costs that were:

   • More than $100,000;

   • approved by the IEPA; and

   • incurred in performing environmental remediation at a Site Remediation

2. Program site located within a river edge redevelopment zone for which a “No Further Remediation” (NFR) letter was issued by the IEPA during the taxable year and recorded by the recipient.

The seller must record the transfer of the credit in the chain of title of the site and notify the director of the Illinois Department of Revenue, in writing, of the intent to sell the remediation site and of the amount of credit to be transferred.

Note: In no event may a credit be transferred to any taxpayer if the taxpayer or a related party would not be eligible under the provisions of subsection (i) of IITA § 201 (n).

B. CARRYOVER OF EXCESS CREDIT

The taxpayer may carry any excess credit forward for five years following the year for which the credit first earned until it is used. This credit shall be applied first to the earliest year for which there is a liability. If there is a credit from more than one tax year that is available to offset a liability, the earliest credit shall be applied first.

Any unused credit and remaining carryforward period may be sold to a buyer as part of a sale of all or part of the remediation site for which the credit was granted.

XIV. COAL RESEARCH AND COAL UTILIZATION EQUIPMENT CREDITS

IITA §206 IAC §100.2170

IITA § 206 provides for two credits for Coal Research and Coal Utilization. The credits are available only to corporations and are applied against their Income Tax liability. The

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

first credit is based on qualified donations made. The second credit is based on the amount spent on qualifying property placed in service during the tax year.

The credit is calculated using:

- Schedule 1299-D for corporations and fiduciaries

Until January 1, 2005, each corporation subject to the Illinois Income Tax Act shall be entitled to a credit against the tax imposed under IITA § 201(a) and (b) in the amount:

- Equal to 20% of the amount donated to the Illinois Center for Research on Sulfur in Coal (IITA § 206).

- Equal to 5% of the amount spent during the taxable year by the corporation on equipment purchased for maintaining or increasing the use of Illinois coal at any Illinois facility owned, leased or operated by the corporation. Equipment shall be limited to:

    - direct coal combustion equipment

    - pollution control equipment

For purposes of this credit, the amount spent on qualifying equipment shall be defined as the basis of the equipment used to compute the depreciation deduction for federal income tax purposes.

- This amount spent is the adjusted basis of each item of equipment as determined pursuant to IRC § 167(g). Generally, the adjusted basis will be the purchase price of the property plus any capital expenditures less any rebates (IITA § 206).

- To show that the equipment was purchased with the intent to maintain or increase the use of Illinois coal at any Illinois facility owned, leased or operated by the taxpayer,

- The taxpayer must demonstrate that the equipment was used for the combustion of Illinois coal during the taxable year or could reasonably have been so used but was not due to circumstances beyond the taxpayer's control.

CARRYOVER OF EXCESS CREDIT

- For credits earned in tax years ending on or after December 31, 1987, a 5-year carry-forward is allowed. It must be applied to the earliest year for which there is a liability.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

XV. TECH-PREP CREDIT

IITA §209

IITA § 209 provides a credit for expenditures for TECH-PREP programs. The credit is available only to taxpayers that are primarily engaged in manufacturing and is an offset against the taxpayer's income tax liability.

The credit is equal to 20% of direct payroll expenditures to teachers and students who are an employee of the taxpayer, provided that no credit can be claimed for an expenditure for which the training expense credit is claimed under IITA Section 201(j).

The credit does not flow through partnerships or S corporations.

The credit is calculated using:

- Schedule 1299-D for corporations and fiduciaries

A. TECH-PREP PROGRAMS

A TECH-PREP program is a cooperative secondary school youth vocational program in Illinois which has been certified by the State Board of Education and the Department of Revenue (See Note 1 below) because the program prepares students to be technically skilled workers and meets the performance standards of business and industry and the admission standards of higher education. REF: IITA § 209(a).

Note: PA 92-846 (approved August 23, 2002) removed the requirement that IDOR certify education programs. The State Board of Education already certifies programs that qualify.

This credit does not apply to those programs with national standards that have been or in the future are approved by the US Department of Labor, Bureau of Apprenticeship Training or any federal agency succeeding to the responsibilities of that Bureau. REF: IITA § 209(d).

B. RECORDKEEPING

A taxpayer claiming this credit must record, maintain and provide such information regarding its participation in a qualifying TECH-PREP program as certified by the State Board of Education or by regulations, requires. REF: IITA § 209(c).

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

C. CARRYOVER OF EXCESS CREDIT

If the credit exceeds the amount of income tax liability for the year, the excess may be carried forward 2 years and applied to the earliest year for which there is an income tax liability. If there are credits from more than one tax year available to offset a liability, the earlier credit is applied first.

XVI. DEPENDENT CARE ASSISTANCE PROGRAM CREDIT

IITA §210 IAC §100.2195

IITA § 210 provides a credit for expenditures for qualifying dependent care assistance programs. The credit is available only to taxpayers primarily engaged in manufacturing and is an offset against the taxpayer's income tax liability. The credit is equal to 5% of the expenditures of the taxpayer that qualify under IRC Section 129(d)(7) for on-site day care facility at an Illinois workplace of the taxpayer. The credit cannot be claimed on expenditures for which the credit under IITA § 210.5 is claimed.

The credit does not flow through partnerships or S corporations.

The credit is computed using:

- Schedule 1299-D for corporations and fiduciaries.

A. DEPENDENT CARE ASSISTANCE PROGRAMS

To qualify for the credit the taxpayer must:

- Establish an on-site facility dependent care assistance program at an Illinois location of the taxpayer's workplace.
- The dependent care assistance program must qualify under IRC §129.
  - It is important to note that while a dependent care assistance program does not have to be established at an on-site facility to qualify under IRC § 129, it does have to be established at an on-site facility to qualify for the credit under IITA § 210.

B. IRC § 129

Defines a dependent care assistance program as one which is a separate written plan of an employer for the exclusive benefit of its employees to provide such employees with dependent care assistance which meets the requirements of

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

subsections (2) through (8) of Section 129. If a plan would qualify but fails to meet any of the requirements of these subsections, it will still be treated as a dependent care assistance program in the case of employees who are not highly compensated employees.

Subsections (2) through (8) of IRC § 129(d) provide that the dependent care assistance program:

- Must not discriminate in favor of highly compensated employees and allow all employees who meet the plans requirements to be eligible to participate;
- No more than 25% of the amounts paid or incurred by the employer for dependent care assistance may be spent for the benefit of individuals who are shareholders or owners who individually own more than 5% of the stock or interest in the employer;
- Must provide reasonable notification of the availability and terms of the plan to all eligible employees;
- Must provide each participant with a statement of expenses incurred for the benefit of that participant for the calendar year; and
- Qualifies if the average benefits provided to other than highly compensated employees are at least 55% of the average benefits provided to highly compensated employees.

C. QUALIFYING EXPENDITURES

For an expenditure to qualify for this credit it must be reported pursuant to IRC § 129(d)(7). REF: IITA § 210. IRC § 129(d)(7) provides that any employer providing a dependent care assistance program to its employees must furnish each employee who is a part of the plan with a written statement showing the amounts paid or expenses incurred by the employer in providing dependent care assistance to that employee during the previous calendar year. The statement must be provided to the employee by January 1 of the following year.

D. CARRYOVER OF EXCESS CREDIT

If the credit exceeds the amount of income tax liability for the year, the excess should be carried forward two years; then applied to the earliest year for which there is an income tax liability. If there are credits from more than one tax year available to offset a liability, the earlier credit is applied first.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

XVII. TAX CREDIT FOR EMPLOYEE CHILD CARE

IITA §210.5 IAC §100.2196

Corporate taxpayers are entitled to a tax credit for the cost of providing a childcare facility to its employees located in Illinois.

The credit is an amount equal to:

For taxable years ending on or after December 31, 2000 and on or before December 31, 2004, and for taxable years ending on or after December 31, 2007.

- 30% of the start-up cost of providing a child care facility for the corporate taxpayer's employees

For taxable years ending on or after December 31, 2000

- 5% of the annual cost in providing such child care facility.
    - If this credit is claimed, the dependent care assistance program credit under IITA § 210, explained above, cannot also be claimed.
    - A corporate taxpayer may provide and operate a childcare facility independently or in partnership with other corporations.

Start-up costs mean planning, site preparation, construction, renovation, or acquisition of a childcare facility. The credit is limited to a childcare facility in Illinois.

CARRYOVER OF EXCESS CREDIT

Any excess credit may be carried forward to the next five taxable years. The credit must be applied against the earliest year first.

XVIII. ECONOMIC DEVELOPMENT FOR A GROWING ECONONMY (EDGE) CREDIT

IITA § 211 IAC § 100.2198

Public Act 91-476 created the Economic Development for a Growing Economy Tax Credit (EDGE Credit) Act. The credit is allowed for tax years beginning on or after January 1, 1999 for taxpayers that have entered into an agreement with the Department of Commerce and Economic Opportunity (DCEO, formerly the Department of Commerce and Community Affairs or DCCA). The credit is for businesses located within or planning to locate within Illinois.

Each year, DCEO certifies the amount of credit earned by the taxpayer. When claiming the credit, the taxpayer must attach a copy of the certificate of verification received from DCEO to Form IL 1299-D.

According to 35 ILCS 10/5-5 the taxpayer or “applicant” must be engaged in the following interstate or intrastate commerce for:

- manufacturing, processing, assembling, warehousing, or distributing products,
- conducting research and development,
- providing tourism services, or
- providing services in interstate commerce, office industries, or agricultural processing.

Businesses not eligible for the credit include those that are engaged in “retail, retail food, health, or professional services”.

To claim the credit, the taxpayer is required to enter into an agreement with DCEO, which states the conditions of the program and is subject to the following limitations:

1. The credit cannot exceed the incremental income tax, which is the total amount of Illinois income tax withheld during the tax year from the compensation of new employees who are employed at a project that is the subject of the agreement.

Note: Although the EDGE Act specifically limits the credit to withholding from new employees, DCEO awards the credit for retained employees as well. See DCEO regulation 14 IAC § 527.20.

2. The amount of the credit allowed during the tax year plus the total of all amounts allowed in prior years cannot exceed 100 per cent of the total amount spent on approved costs (defined in the agreement) by the taxpayer during all prior tax years.

   a) The allowable credit is determined on an annual basis and cannot extend beyond 10 years after the project is first approved and cannot extend beyond the expiration of the agreement.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

b) For a taxpayer certified by the DCEO under the Corporate Headquarters Relocation Act, the credit may not:

(1) Extend beyond 15 taxable years and may not

(2) Extend beyond the expiration of the Agreement;

(a) Provided, that such taxpayer may not claim for any tax year during such period more than 60% of the credit otherwise allowed for such tax year under the EDGETCA (EDGETCA § 5-45).

c) The amount of the credit cannot exceed the amount of income tax for the tax year.

d) In the case of a credit earned by a partnership or Subchapter S corporation, the credit passes through to the owners for use against their regular income tax liabilities in the same proportion as other items that are passed through for federal income tax purposes.

Note: It is the responsibility of the auditor to verify the taxpayer has only claimed the amount of credit allowed by DCEO on the certificate of verification.

- During the audit if there is a question on the status of a taxpayer's certification do not contact the agency directly; instead submit the inquiry and documentation to your supervisor.
- The information will be sent to Technical Support Supervisor, where it will be analyzed and presented to Legal for review.
- The Departments liaison will contact DCEO personnel directly if needed. The requested information will be given to the auditor by their supervisor.
- If a notice of non-compliance is received from DCEO establish the taxpayer's liability for the credit as if an erroneous refund per IITA § 905(g).

CARRYOVER OF EXCESS CREDIT

The excess credit can be carried forward for five years. The excess credit must be used in proportion to its share of the total excess credit available for the year in which the credit was earned.

Note: Section 5-15 of the EDGE Tax Credit Act (35 ILCS 10/5-15) provides that certain taxpayers may elect to claim the credit against the WIT obligation (IITA § 704A) in lieu of the taxpayer's income tax obligation. The election is made for the first calendar year beginning after the end of the tax year in which the credit is earned. Once made, the

election may not be revoked. If a taxpayer is eligible to make this election, DCEO will indicate that eligibility on the credit certificate it issues to the taxpayer.

XIX. EARNED INCOME TAX CREDIT

IITA §212 IAC §100.2199

Beginning on or after January 1, 2017, the amount is 14% of the federal tax credit for taxable year 2017, and the amount is 18% of the federal tax credit for taxable year 2018. PA 100-22 effective 7-6-2017.

Beginning on or after January 1, 2013, the amount is 10% of the federal tax credit. (IITA § 212(a))

Beginning on or after January 1, 2012 and ending prior to December 31, 2012, the amount is 7.5% of the federal earned income tax credit allowed.

For taxable years beginning on or after January 1, 2000 and ending prior to December 31, 2012, an individual shall be allowed a credit against the tax imposed by IITA § 201(a) and (b) for the taxable year equal to 5% of the federal earned income tax credit allowed for such taxable year pursuant to IRC § 32.

For tax years beginning on or after January 1, 2003 if the amount of the credit exceeds the income tax liability for the applicable tax year, then the excess credit shall be refunded to the taxpayer. (IITA § 212(b))

For tax years beginning before January 1, 2003, the credit allowed for the taxable year may not reduce the taxpayer's liability under the IITA to less than zero. Therefore, no part of the credit is refundable in the event the tax liability of the taxpayer is reduced to zero. (IITA § 212(b))

In the case of a nonresident or part-year resident, the amount of credit shall be in proportion to the amount of income attributable to this State. (See IITA § 212(a).)

CARRYOVER OF EXCESS CREDIT

Excess credits that are not refundable may not be carried over to other tax years.

XX. FILM PRODUCTION SERVICES TAX CREDIT

IITA § 213 IAC § 100.2185

For taxable years Beginning on or after January 1, 2004

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

To qualify for the credit, taxpayers must apply with the Department of Commerce and Economic Opportunity, providing information necessary to calculate the credit.

- The DCEO then issues the taxpayer the "Final Film Tax Credit Certificate" that indicates the amount of tax credit the taxpayer is eligible for.

- If the taxpayer is a partner in a partnership or Subchapter S corporation, the credit can flow through to the partners or shareholders in accordance with their distributive share of income.

CARRYOVER OF EXCESS CREDIT

Excess credit can be carried forward 5 years. The credit cannot reduce the taxpayer's liability to less than zero. The person earning the credit may transfer the credit within one year after the credit is awarded. The transfer is made through DCEO, which will issue a certificate to the transferee stating the amount transferred and, if the transferor retains some of the credit, a certificate stating the amount retained.

XXI. TAX CREDIT FOR AFFORDABLE HOUSING DONATIONS

IITA § 214 IAC §100.2190

Beginning with taxable years ending on or after December 31, 2001 until taxable year ending December 31, 2021

Taxpayers subject to tax under IITA § 201(a) or (b) making donations to certain affordable housing projects under Section 7.28 of the Illinois Housing Development Act (20 ILCS 3805/7.28) are allowed:

- A tax credit for those donations equal to 50% of the value of the donation.

Partners, shareholders of Subchapter S corporations, and owners of limited liability companies that are treated as partnerships are also entitled to the credit.

Persons or entities not subject to tax under IITA § 201(a) or (b) and who donate under the Illinois Housing Development Act are entitled to receive and to transfer a tax credit for affordable housing donations.

This credit can be transferred in either of two ways:

1. to the purchaser of land that has been designated solely for affordable housing projects in accordance with Section 7.28 of the Illinois Housing Development Act

2. to another donor who has also made an eligible donation to the sponsor of an affordable housing project in accordance with the Illinois Housing Development Act.

If the credit may be claimed in the tax year in which the donation is made or in the tax year in which the administrative housing agency issues the reservation letter stating the amount of the credit allocated to the affordable housing project under 47 Ill. Adm. Code 355.209 (if it is later than the date of donation) or, in the case of a transferee, in the tax year of the transfer. Taxpayers claiming this credit are required to provide the following information with their Illinois Income Tax return concerning the credit they are claiming:

- for the taxable year for which the credit is allowed, a donor (or a partner or Subchapter S corporation shareholder of the donor) claiming the credit shall attach to its Illinois income tax return a copy of the reservation letter issued by the administrative housing agency stating the amount of the credit allocated to the affordable housing project under 47 Ill. Adm. Code § 355.209.

- for the taxable year in which a credit is transferred, the transferee (or a partner or Subchapter S corporation shareholder of the transferee) shall attach to its Illinois income tax return a copy of the certificate showing the names of the original donor and of the transferee, as provided in 47 Ill. Adm. Code § 355.309.

CARRYOVER OF EXCESS CREDIT

Any excess credit can be carried forward and applied to the tax liability of the five taxable years following the excess credit year.

- The tax credit is applied to the earliest year for which there is a tax liability, and the oldest carry-forward is to be used first.
- If a transferee elects to apply the credit in the tax year of the transfer, the carryforward period is limited to 5 years after the tax year of the donation.

XXII. TRANSPORTATION EMPLOYEE CREDIT

IITA § 215

Note: Repealed by PA 93-1033, effective July 1, 2004.

Each qualified employer (trucking company) is entitled to a credit of $50 per person for each eligible employee employed by the taxpayer as of the last day of the taxable year. Note that, because of the effective dates of the enactment and repeal, this credit can only be earned in a short taxable year that begins on or after January 1, 2004 and ends prior to July 1, 2004.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

A. QUALIFIED EMPLOYER

The term “qualified employer” means: (1) any employer who pays a commercial distribution fee under §3-815.1 of the Illinois Vehicle Code, or (2) any employer who has one or more employees whose compensation is subject to tax only by the employee's state of residence under 49 U.S.C. §14503(a)(1).

B. ELIGIBLE EMPLOYEE

An “employee” includes an individual who is treated as an employee of the taxpayer under Section 401(c) of the Internal Revenue Code and whose actual assigned duties are such that, if the individual were a common-law employee performing such duties in 2 or more states, the individual’s compensation would be subject to tax only by the individual’s state of residence. All the following additional criteria must be met by the employee to be an “eligible employee” for purposes of the credit:

- The employee must be an operator of a motor vehicle,
- The employee’s compensation, pursuant to 49 USC 14503(a)(1), must be subject to tax only by the employee’s state of residence, or would be subject to tax only by the employee’s state of residence if the employee’s actual duties were performed in 2 or more states,
- As of the end of the taxable year for which the credit is claimed, the employee must be a resident of Illinois, and
- The employee must be a full-time employee working 30 or more hours per week for 180 consecutive days; provided that such 180-day period may be completed after the end of the taxable year for which the credit is claimed

If the taxpayer is a partnership or Subchapter S corporation, the credit can flow through to the partners or shareholders in accordance with their distributive share of income.

XXIII. TAX CREDIT FOR HIRING EX-FELONS

IITA § 216

For tax years beginning on or after January 1, 2007, the Ex-Felons Jobs Credit is 5 percent (.05) of qualified wages paid during the taxable year to an employee who is a qualified ex-offender. The total credits for all tax years for wages paid to an ex-offender may not exceed $1500 ($600 for tax years ending prior to August 5, 2013 (the effective

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

date of Public Act 98-165)). Note that the 2012 forms were not amended to implement the changes enacted in Public Act 98-165, which apply to fiscal filers for their tax years ending on or after August 5, 2013 and before December 31, 2013, who would use the 2012 forms.

A. Qualified Wages

- Includes only wages that are subject to federal unemployment tax under IRC § 3306, without regard to dollar limitation.

- Does not include any amounts paid or incurred by an employer for any period to any qualified ex-offender for whom the employer receives federally funded payments for on-the-job training for that period.

- Includes only wages attributable to service rendered.

- For partners, shareholders of Subchapter S corporations, and owners of limited liability companies, if the liability company are treated as a partnership for purposes of federal and state income taxation, the credit is allowed in accordance with the distributive share of income under IRC § 702, 704, and Subchapter S.

B. Qualified ex-offender

1. Requirements for this credit, “qualified ex-offender” means any person who:

- for tax years ending prior to August 5, 2013, an eligible offender; as defined under section 5-5.5-5 of the Unified Code of Corrections, which provides that an eligible offender means a person who has been convicted of a crime in this State or of an offense in any other jurisdiction that does not include any offense or attempted offense that would subject a person to registration under the Sex Offender Registration Act, the Arsonist Registration Act, or the Murderer and Violent Offender Against Youth Registration Act. "Eligible offender" does not include a person who has been convicted of committing or attempting to commit a Class X felony, aggravated driving under the influence of alcohol, other drug or drugs, or intoxicating compound or compounds, or any combination thereof, aggravated domestic battery, or a forcible felony. “Forcible felony" means first-degree murder, second-degree murder, aggravated arson, arson, aggravated kidnapping, kidnapping, aggravated

battery that resulted in great bodily harm or permanent disability, and any other felony which involved the use of physical force or violence against any individual that resulted in great bodily harm or permanent disability.

- For tax years ending on or after August 5, 2013, an eligible offender is a person who has been convicted of a crime in this State or of an offense in any other jurisdiction, not including any offense or attempted offense that would subject a person to registration under the Sex Offender Registration Act.
    - Was sentenced to a period of incarceration in an Illinois adult correctional center; and
    - Hired; within one year (three years for tax years ending prior to August 5, 2013) after being released form an Illinois adult correctional center.

C. CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset a liability, the earlier credit shall be applied first. Note: In no event shall this credit reduce the taxpayer's liability to less than zero.

XXIV. TAX CREDIT FOR HIRING VETERANS

IITA § 217

For tax years beginning on or after January 1, 2010 through December 31, 2016, each taxpayer is entitled to a credit in an amount equal to 10%, but in no event to exceed $1200, of the grows wages paid by the taxpayer to a qualified Veteran during sustained employment during the taxable year.

For tax years beginning on or after January 1, 2007, and ending on or before December 30, 2010, each taxpayer is entitled to a credit in an amount equal to 5%, but in no event to exceed $600, of the gross wages paid by the taxpayer to a qualified Veteran during employment during the taxable year.

For partners, shareholders of Subchapter S corporations the credit flows through in accordance with the determination of income and distributive share of income under IRC Sections 702 and 704 and Subchapter S.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

This credit is not exempted from automatic sunset under IITA § 250 and will not be allowed for taxable years beginning on or after January 1, 2015, the fifth anniversary of Public Act 96-101.

Note that both the new provisions enacted by Public Act 96-101 and the old provisions literally apply for tax years beginning on or after January 1, 2010 and ending before December 31, 2010. The 2009 forms that would be used by these taxpayers provide that the new provisions apply in these cases.

A. Qualified Veteran

"Qualified veteran" means an Illinois resident who:

- Was a member of the Armed Forces of the United States, a member of the Illinois National Guard, or a member of any reserve component of the Armed Forces of the United States;
- Served on active duty in connection with Operation Desert Storm, Operation Enduring Freedom, or Operation Iraqi Freedom;
- Has provided, to the taxpayer documentation showing that he or she was honorably discharged
- Initially hired, on or after January 1, 2007

For partners, shareholders of Subchapter S corporations, and owners of limited liability companies that are treated as partnerships, if the liability company are treated as a partnership for purposes of federal and state income taxation, the credit is allowed in accordance with the distributive share of income provisions in IRC § 702, 704, and Subchapter S.

B. SUSTAINED EMPLOYEMENT

Defined as "a period of employment that is not less than 185 days during the year"

C. CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

that are available to offset a liability, the earlier credit shall be applied first. In no event shall this credit reduce the taxpayer's liability to less than zero.
Note: This credit cannot be used if IITA § 217.1 "Tax credit for hiring unemployed veterans" is used.

XXV. TAX CREDIT FOR HIRING UNEMPLOYED VETERANS

IITA § 217.1

For years ending on or after December 31, 2012 and on or before December 31, 2016, each taxpayer is entitled to a credit in an amount equal to 20%, but in no event to exceed $5,000, of the gross wages paid by the taxpayer to a qualified Veteran during sustained employment during the taxable year ending on or after the date of hire by the taxpayer. If the veteran was unemployed for an aggregate period of 4 weeks or more during the 6-week period ending on the Saturday immediately preceding the date, he or she was hired by the taxpayer.

For partners and shareholders of Subchapter S corporations the credit flows through in accordance with the determination of income and distributive share of income under IRC Sections 702 and 704 and Subchapter S.

A. Qualified Veteran

"Qualified veteran" means an Illinois resident who:

- Was a member of the Armed Forces of the United States, a member of the Illinois Nation al Guard, or a member of any reserve component of the Armed Forces of the United States.
- Served on active duty on or after September 11, 2001
- Provided to the taxpayer documentation showing that he or she was honorably discharged
- Was initially hired by the taxpayer on or after June 1, 2012.

B. SUSTAINED EMPLOYMENT

"Sustained employment" means:

- A period of employment that is not less than 185 days following the date of hire
- In the case of a veteran who was unemployed for an aggregate period of 6 months or more during the one-year period ending on the date the veteran

was hired by the taxpayer, a period of employment that is more than 30 days following the date of hire.

- The period of sustained employment may be completed after the end of the taxable year in which the veteran is hired.

C. UNEMPLOYED

A veteran is "unemployed" for a week if he or she:

- Received unemployment benefits, defined in § 202 of the Unemployment Insurance Act.
  - Including but not limited to federally funded unemployment benefits
- Has not been employed since being honorably discharged.

D. CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset a liability, the earlier credit shall be applied first. In no event shall this credit reduce the taxpayer's liability to less than zero.

Note: This credit cannot be used if IITA § 217 "Tax credit for hiring veterans" is used.

XXVI. STUDENT-ASSISTANCE CONTRIBUTIONS CREDIT

IITA 218 IAC §100.2193

For taxable years ending on or after December 31, 2009 and before December 31, 2020, each taxpayer is allowed a credit against the taxes imposed under IITA § 201(a) and (b) in an amount equal to 25% of each matching contribution made by the taxpayer during the taxable year.

A. MATCHING CONTRIBUTION

Means the total amount paid by the taxpayer during the taxable year to an individual Illinois College Savings Pool account or Illinois Prepaid Tuition Trust

Fund account for the benefit of a designated beneficiary to the extent the amount paid does not exceed the total contributions made by an employee of the taxpayer during the taxpayer's taxable year to the same account for the benefit of the same designated beneficiary.

B. LIMITATION

The maximum allowed by any contributing employee shall not exceed $500 per taxable year.

Example: Taxpayer is a calendar year taxpayer. Employee A is an employee of Taxpayer for the entire 2009 calendar year. During 2009, Employee A makes contributions totaling $6,000 each to three separate College Savings Pool accounts established for the benefit of each of Employee A's three children. During 2009, Taxpayer makes payments totaling $2,000 each to the same three accounts. Under subsection (a) of this Section, Taxpayer would be allowed a $500 credit for each of the three $2,000 matching contributions made during the taxable year, for a total credit of $1,500. However, under this subsection (c), Taxpayer may claim a maximum credit of only $500 in respect of the total of its contributions that match contributions made by Employee A. Therefore, the allowable credit is reduced from $1,500 to $500.

C. DOCUMENTATION REQUIREMENTS

Taxpayer claiming the credit allowed must maintain records enough to document the date and amount of each payment made to an individual College Savings Pool account or Illinois Prepaid Tuition Trust Fund account, as well as documentation regarding the contribution the payment matches. Documentation regarding the contribution the payment matches must include:

- employee's name,
- account, and
- amount and date of the employee's contribution.

D. PASS-THROUGH OF CREDIT

In the case of a partnership or subchapter S corporation, the credit passes through to the owners as provided in the partnership agreement under IRC § 704(a) or in proportion to their ownership of the stock of the subchapter S corporation under IRC § 1366(a).

- The credit earned by a partnership or subchapter S corporation shall be treated as earned by its owners as of the last day of the taxable year of

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

partnership or subchapter S corporation in which the matching contribution is made.

E. CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset a liability, the earlier credit shall be applied first. In no event shall a credit under this Section reduce the taxpayer's liability to less than zero.

XXVII. CREDIT FOR HISTORIC PRESERVATION EXPENDITURES

IITA § 219

Beginning with tax years ending on or after January 1, 2010 to on or before January 1, 2022*,* a taxpayer who qualifies for a credit under the Historic Preservation Tax Credit Pilot Program Act is entitled to a credit against taxes imposed.

HISTORIC PRESERVATION TAX CREDIT PILOT PROGRAM ACT (35 ILCS 30)

Allows a credit in the amount equal to 25% of qualified expenditures incurred on a hotel in Peoria, Illinois for restoration and preservation purposes pursuant to a qualified rehabilitation plan, provided the total amount of such expenditures must:

- Equal $5,000 or more
- Must exceed 50% of the purchase price of the property

The credit can the taxpayer earning the credit in the tax year in which qualified expenditures are made. The credit may be transferred, and the transferee may claim the taxable year of the transferee in which the property was placed in service or in the taxable year of the transferee in which the transfer occurred.

For partners and shareholders of Subchapter S corporations the credit flows through in accordance with the determination of income and distributive share of income under IRC Sections 702 and 704 and Subchapter S.

CARRYOVER OF EXCESS CREDIT

The person earning the credit may carry any excess credit forward for ten years following the year for which the credit first earned until it is used. A transferee may carry any excess credit back for three years or forward for ten years. Note: An application must be made to the Department no later than 6 months after the effective date of the Historic Preservation Tax Credit Pilot Program Act.

XXVIII. ANGEL INVESTMENT CREDIT

IITA § 220 IAC § 100.2171

For tax years beginning on or after January 1, 2011, and ending on or before December 31, 2021, this credit can taxpayers who make an investment in an innovative, qualified new business venture in Illinois. The credit is equal to 25% of investment (up to a maximum investment of $2 million); made directly into a qualified new business venture. To qualify for the credit, the taxpayer must have applied for and received a tax credit certificate from DCEO.

Note: After December 31, 2016 the taxpayer can still claim any distributive share of this credit passed through to Schedule K-1-P by reporting it on Schedule 1299-D, Line 41.

For partners and shareholders of Subchapter S corporations the credit flows through in accordance with the determination of income and distributive share of income under IRC Sections 702 and 704 and Subchapter S.

A. Eligible Qualified New Business Ventures

- Principally engaged in innovation
- Fewer than 100 employees at the time of original program certification
- Not been in operation in Illinois for more than 10 consecutive years prior to original program certification
- Headquarters located in Illinois
- At least 51% of employees are employed in Illinois
- Has the potential for increasing jobs or capital investments in Illinois, or both.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- Has not received more than $10,000,000 in aggregate private equity investment in cash or $4,000,000 in investments that qualified for tax credits under this section
- Must be in good standing with the Illinois Department of Revenue

B. CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, excess carried forward and applied to the tax liability of the five taxable years following the excess credit year.

C. RECAPTURE OF CREDIT

The credit must be recaptured if:

- The taxpayer holds its qualifying investment for less than 3 years; or
- The qualified new business venture is moved outside Illinois less than 3 years after the investment is made.

XXIX. RIVER EDGE HISTORIC PRESERVATION CREDIT

IITA § 221

For tax years beginning on or after January 1, 2012 and ending prior to January 1, 2022 credit equal to 25% of the projects qualified expenditures to owners of certified historic structures located within River Edge Redevelopment Zones who undertake certified rehabilitations during the taxable year.

This credit is awarded by the DCEO; you must have applied for and received a tax credit certificate from them before using.

Projects must meet the following requirements.

1. The structure must be located within a River Edge Redevelopment Zone.

2. The structure requires certification as historic, which mean that it must meet one of these three criteria:

a. listed individually on the National Register of Historic places, or

b. a contributing building within a National Register of Historic Places, or

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

c. a contributing building with a local historic district certified by the National Park Service for the purposes of taking the federal tax credit.

3. Qualified expenditures must equal or exceed $5,000 and must exceed 50% of the purchase price of the property when it last sold.

4. The structure must be used for income-producing purposes, such as rental-residential, commercial, agricultural, and/or industrial.

5. The qualified taxpayer/historic-structure owner must be in good standing with the Illinois Department of Revenue.

For partners and shareholders of Subchapter S corporations the credit flows through in accordance with the determination of income and distributive share of income under IRC Sections 702 and 704 and Subchapter S.

There is no exemption from Section 250; so, this credit will not be allowed in taxable years beginning on or after July 28, 2016, 5 years after the effective date of Public Act 97-0203.

CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the taxpayer's liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset a liability, the earliest credit applied first.

XXX. LIVE THEATER PRODUCTION CREDIT

IITA § 222 & 35 ILCS 17 Act

For tax years beginning on or after January 1, 2012 and before January 1, 2022, a taxpayer who has received a tax credit award under the Live Theater Production Tax Credit Act is entitled to a credit determined under the Act and determined by DCEO.

To qualify for the credit, taxpayers must apply with the Department of Commerce and Economic Opportunity, providing information necessary to calculate the credit.

- DCEO then issues the taxpayer a certificate that indicates the amount of eligible tax credit.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- If the taxpayer is a partner in a partnership or Subchapter S corporation, the credit can flow through to the partners or shareholders in accordance with their distributive share of income.

Credit is transferable by the person earning the credit within one year after the credit is awarded. The transfers are made through DCEO, which will issue a certificate to the transferee stating the amount transferred and, if the transferor retains some of the credit, a certificate stating the amount retained.

CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year.

XXXI. HOSPITAL CREDIT

IITA § 223

For tax years ending on or after December 31, 2012 and ending on or before December 31, 2022, a taxpayer that is the owner of a hospital licensed under the Hospital Licensing Act (Ref. 210 ILCS 85/), not including an organization that is exempt from federal income taxes under the IRC, is entitled to a credit in an amount equal to the Illinois real property taxes paid during the tax year on real property used for hospital purposes during the prior tax year or the cost of free or discounted services provided during the tax year pursuant to the hospital's charitable financial assistance policy.

For partners, shareholders of Subchapter S corporations, and owners of limited liability companies, if the liability company are treated as a partnership for purposes of federal and state income taxation, there shall be allowed a credit in accordance with IRC § 702, 704, and Subchapter S.

A transfer of this credit may be made by the taxpayer earning the credit within one year after the credit earned in accordance with rules adopted by the Department.

CARRYOVER OF EXCESS CREDIT

If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the five taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset a liability, the earlier credit shall be applied first. In no event shall this credit reduce the taxpayer's liability to less than zero.

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

XXXII. INVEST IN KIDS CREDIT

IITA § 224; IAC § 100.2175

For taxable years beginning on and after January 1, 2018, and ending before January 1, 2023, a taxpayer may claim a credit against the income tax imposed under IITA § 201(a) and (b) in an amount equal to 75% of the qualified contribution amount awarded under the Invest in Kids Act that is shown on the Certificate of Receipt issued by an approved scholarship granting organization under 86 Ill. Adm. Code 1000.500. The credit may not be applied against the personal property replacement tax imposed under IITA Section 201(c) and (d).

A. CARRYOVER OF EXCESS CREDIT

The credit may be taken in the taxable year that includes the date of the Certificate of Receipt issued by an approved scholarship granting organization under 86 Ill. Adm. Code 1000.500.

- The credit may not be transferred.
- The credit may not be carried back and may not reduce the taxpayer's liability to less than zero.
- If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the 5 taxable years following the excess credit year. The credit shall be applied to the earliest year for which there is a tax liability. If there are credits from more than one tax year that are available to offset a liability, the earlier credit shall be applied first. (IITA Section 224(c))

B. PARTNERSHIP OR SUBCHAPTER S CORP

In the case of a credit earned by a partnership or subchapter S corporation, the credit passes through to the owners as provided in the partnership agreement under IRC section 704(a) or in proportion to their ownership of the stock of the subchapter S corporation under IRC section 1366(a). The credit earned by a partnership or subchapter S corporation will be treated as earned by its owners as of the last day of the taxable year of the partnership or subchapter S corporation in which the Certificate of Receipt is issued by an approved scholarship granting organization under 86 Ill. Adm. Code 1000.500, and shall be allowed to each owner in the taxable year of the owner in which the taxable year of the partnership or subchapter S corporation ends.

Tax credits are capped at $1 million per taxpayer per year; a donor can contribute about $1.33 million to receive the maximum tax credit allowed. A credit awarded under the Invest in Kids Act may not be claimed for any qualified contribution for which the taxpayer claims a federal income tax deduction. (IITA Section 224(d))

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Documentation

A taxpayer shall retain and provide at the request of the Department the Certificate of Receipt issued by an approved scholarship granting organization and, in the case of a partner in a partnership or shareholder of a subchapter S corporation that earned the credit, a Schedule K-1-P or other written statement from the partnership or subchapter S corporation stating the portion of the total credit shown on the Certificate of Receipt that is allowed to that partner or shareholder and the taxable year of the partnership or subchapter S corporation in which the Certificate of Receipt was issued.

C. EXAMPLES

- EXAMPLE 1: Individual A contributes $5,000 to an approved scholarship granting organization on January 25, 2018. Individual A receives a Certificate of Receipt in the amount of $5,000. On April 1, 2019, Individual A files a 2018 U.S. Form 1040 with Schedule A Itemized Deductions. Individual A does not include any part of the $5,000 contribution under Gifts to Charity on Schedule A. Individual A is entitled to claim an Invest in Kids tax credit in the amount of $3,750 on Individual A's 2018 Form IL-1040, Schedule 1299-C. Deductions.
- EXAMPLE 2: Individual B contributes $5,000 to an approved scholarship granting organization on January 25, 2018. Individual B receives a Certificate of Receipt in the amount of $5,000. On April 1, 2019, Individual B files a 2018 U.S. Form 1040 with Schedule A Itemized Deductions. Individual B includes $1,250 (25% of the qualified contribution) under Gifts to Charity on Schedule A. Individual B is not entitled to claim any Invest in Kids tax credit on Individual B's 2018 Form IL-1040, Schedule 1299-C.

- EXAMPLE 3: Corporation C contributes $1 million to an approved scholarship granting organization on January 5, 2018. Corporation C receives a Certificate of Receipt in the amount of $1 million. On October 15, 2019, Corporation C files a 2018 U.S. Form 1120 and excludes the $1 million from the charitable contributions line of the return. Corporation C is entitled to claim an Invest in Kids tax credit in the amount of $750,000 on Corporation C's 2018 Form IL-1120, Schedule 1299-D.

- EXAMPLE 4: Corporation D contributes $5 million to an approved scholarship granting organization on January 5, 2018. Corporation D receives a Certificate of Receipt in the amount of $1,333,333.Tax credits are capped at $1 million per taxpayer per year; a donor can contribute about $1.33 million to receive the maximum tax credit allowed$1.33 million x .75% = $997,500). On October 15, 2019, Corporation D files a 2018 U.S. Form 1120 and includes $3,666,667 ($5 million less the maximum qualified contribution) on the charitable contributions line of the return. Corporation D is entitled to claim an Invest in Kids tax credit in

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

the amount of $1 million on Corporation D's 2018 Form IL-1120, Schedule 1299-D.

XXXIII. CREDIT FOR INSTRUCTIONAL MATERIALS AND SUPPLIES

IITA § 225

For taxable years beginning on and after January 1, 2017, a taxpayer shall be allowed a credit in the amount paid by the taxpayer during the taxable year for instructional materials and supplies with respect to classroom based instruction in a qualified school, or $250, whichever is less, provided that the taxpayer is a teacher, instructor, counselor, principal, or aide in a qualified school for at least 900 hours during a school year.

A. CARRYOVER OF EXCESS CREDIT

The credit may not be carried back and may not reduce the taxpayer's liability to less than zero. If the amount of the credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability of the 5 taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset a liability, the earlier credit shall be applied first.

B. DEFINITION

- "materials and supplies" mean amounts paid for instructional materials or supplies that are designated for classroom use in any qualified school.
- "qualified school" means a public school or non-public school located in Illinois.

Note: This Section is exempt from the provisions of IITA § 250

XXXIV. NATURAL DISASTER CREDIT

IITA § 226

For taxable years than begin on or after January 1, 2017 and begin prior to January 1, 2019, each taxpayer who owns qualified real property located in a county in Illinois that was declared a State disaster area by the Governor.

What is considered qualified real property for credit:

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

- Is located in a county in Illinois that was declared a state disaster area due to flooding in 2017 or 2018,
- Was damaged as a result of events related to this flooding, and
- Did not and will not receive a Natural Disaster Homestead Exemption on property taxes as a result of this flooding for 2017 or 2018.

DEFINITIONS

- "Qualified real property" means real property that is: (i) the taxpayer's principal residence or owned by a small business; (ii) damaged during the taxable year because of a disaster; and (iii) not used in a rental or leasing business.

- "Small business" has the meaning given to that term in Section 1-75 of the Illinois Administrative Procedure Act.

Deduction

The lesser of $750 or the deduction allowed under IRC § 165(h) Treatment of Casualty Gains and Losses.

Documentation

- The township assessor or, if the township assessor is unable, the chief county assessment officer of the county in which the property is located, shall issue a certificate to the taxpayer identifying the taxpayer's property as damaged because of the natural disaster.
- The certificate shall include the name and address of the property owner, as well as the property index number or permanent index number (PIN) of the damaged property. The taxpayer shall attach a copy of such certificate to the taxpayer's return for the taxable year for which the credit is allowed.

A. CARRYOVER OF EXCESS CREDIT

In no event shall a credit under this Section reduce a taxpayer's liability to less than zero. If the amount of credit exceeds the tax liability for the year, the excess may be carried forward and applied to the tax liability for the 5 taxable years following the excess credit year. The tax credit shall be applied to the earliest year for which there is a tax liability. If there are credits for more than one year that are available to offset liability, the earlier credit shall be applied first.

B. PARTNERSHIP AND SUBCHAPTER S CORP

If the taxpayer is a partnership or Subchapter S corporation, the credit shall be allowed to the partners or shareholders in accordance with the determination of

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

income and distributive share of income under IRC § 702, 704 and Subchapter S.

C. CREDIT DENIAL

A taxpayer is not entitled to the credit under this Section if the taxpayer receives a Natural Disaster Homestead Exemption under Section 15-173 of the Property Tax Code with respect to the qualified real property because of the natural disaster.

The township assessor or, if the township assessor is unable to certify, the chief county assessment officer of the county in which the property is located, shall certify to the Department a listing of the properties located within the county that have been damaged as a result of the natural disaster (including the name and address of the property owner and the property index number or permanent index number (PIN) of each damage property).

XXXV. ADOPTION CREDIT

IITA § 227

For tax years beginning with tax years ending on or after December 31, 2018, a taxpayer who received the federal adoption tax credit (IRC § 23) may claim an Adoption Credit. The maximum amount of qualified adoption expenses for all taxable years with respect to the adoption of a qualifying dependent child by the taxpayer shall not exceed:

- $2,000 ($1,000 married filing separate) per eligible child, or
- $5,000 ($2,500 married filing separate) per eligible child who is at least one year of age and a resident of Illinois at the time of adoption, or
- The federal adoption tax credit if less than $2,000 or $5,000 as defined above.

Taxpayer can claim the credit when the qualified expenses were paid or incurred:

- **Before** the taxable year in which the adoption becomes final, they you may claim this amount in the taxable year following the taxable year during which the expenses were paid or incurred.
    - **Example:** taxpayer incurred expenses in 2018; however, the adoption is not final, you may claim the expenses on the 2019 tax return
- **During or after:** the taxable year in which such adoption becomes final, then you may claim this amount in the taxable year in which the expenses were paid or incurred.
    - **Example:** the adoption was final in 2018; however, taxpayer has expenses in 2019, the taxpayer may claim the expenses in the 2019 taxable year.

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

Definitions

Eligible Child – any individual who has not attained age 18 or is physically or mentally incapapble of caring for himself or herself.

Qualified Expenses – as defined by IRC § 23(d), are any reasonable and necessary adoption fees, court costs, attorney fees, and other expenses which are:

- Directly related to, and the principal purpose of which is, the leagal adoption of an eligible child by the taxpayer,
- Not incurred in violation of State or Federal law or in carrying out any surrogate parenting arrangement,
- Not expenses in connection with the adoption by an individual of a child who is the child of such individual's spouse, and
- Not reimbursed under an employer program or otherwise.

These expenses are generally listed on Line 5 of the federal Form 8839, Qualified Adoption Expenses.

Additional Information

- No credit shall be allowed for any expense that received Federal, State or local funds.
- Spouses filing a joint return are considered one taxpayer.
- For nonresident and part-year residents, the amount of credit is proportionate to the amount of income attributable to Illinois.

A. CARRYOVER OF EXCESS CREDIT

The credit should not reduce a taxpayer's liability to less than zero. If the credit exceeds the income tax liability for the applicable tax year, the excess may be carried forward for five taxable years. The credit should be applied to the earliest year for which there is a tax liability.

XXXVI. FOREIGN TAX CREDIT

IITA § 601(b)(3); IAC § 100.2197

Excerpt shown below:

The aggregate amount of tax which is imposed upon or measured by income and which is paid by a resident for a taxable year to another state or states on income which is also subject to the tax imposed by subsections 201(a) and (b) of this Act shall be

credited against the tax imposed by subsections 201(a) and (b) otherwise due under this Act for such taxable year.

The above excerpt simply states:

If you're an Illinois taxpayer who works in Illinois or in another state and the other state taxes income, Illinois will provide a credit against the taxes paid in the other state. Also, nonresident working in Illinois will be taxed based on Illinois tax law instead of the nonresident state's law to determine the credit amount.

For taxable years ending on or after December 31, 2009, the credit provided under this paragraph for tax paid to other states shall not exceed that amount which bears the same ratio to the tax imposed by subsections 201(a) and (b) otherwise due under this Act as the amount of the taxpayer's base income that would be allocated or apportioned to other states if all other states had adopted the provisions in Article 3 of this Act bears to the taxpayer's total base income subject to tax by this State for the taxable year.

For taxable years ending prior to December 31, 2009, the aggregate credit provided under this paragraph shall not exceed that amount which bears the same ratio to the tax imposed by subsections 201(a) and (b) otherwise due under this Act as the amount of the taxpayer's base income subject to tax both by such other state or states and by this State bears to his total base income subject to tax by this State for the taxable year.

The credit provided by this paragraph shall not be allowed if any creditable tax was deducted in determining base income for the taxable year.

Any person claiming such credit shall attach a statement in support thereof and shall notify the Director of any refund or reductions in the amount of tax claimed as a credit hereunder all in such manner and when the Department shall by regulations prescribe.

XXXVII. NEW MARKETS CREDIT

20 ILCS 663/5

A person or entity that makes a qualified equity investment "QEI" as defined under 20 ILCS 663/5 earns a vested right to tax credits as follows:

- "Tax credit" means a credit against any income, franchise, or insurance premium taxes due under Illinois law.
- on each credit allowance date of the qualified equity investment, the purchaser of the qualified equity investment, or subsequent holder of the QEI, is entitled to a tax credit during the taxable year including that credit allowance date;

"This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers' Bill of Rights."

- The tax credit amount shall be equal to the applicable percentage of the purchase price paid to the issuer of the QEI:
  - 0% for each of the first 2 credit allowance dates
  - 7% for the third credit allowance date
  - 8% for the next four credit allowance dates

- the tax credit amount shall be equal to the applicable percentage for such credit allowance date multiplied by the purchase price paid to the issuer of the qualified equity investment; and

- the amount of the tax credit claimed shall not exceed the amount of the State tax liability of the taxpayer for the tax year for which the tax credit is claimed.

A company doing insurance business in this State claiming a tax credit against insurance premium taxes payable pursuant to Section 409 of the Illinois Insurance Code is not required to pay any additional retaliatory tax imposed pursuant to Section 444 or 444.1 of the Illinois Insurance Code related to that claim for a tax credit. REF: P.A. 95-1024, 20 ILCS 663/10.

Tax credits earned by a partnership, limited liability company, S corporation, or other “pass-through” entity may be allocated to the partners, members, or shareholders of that entity for their direct use in accordance with the provision of any agreement among the partners, members, or shareholders

The Illinois Department of Revenue has the right to recapture under the following provisions:

- Any amount of the federal tax credit available with respect to a qualified equity investment that is eligible under this program is recaptured under the federal NMTC program.

- The issuer redeems or makes principal repayment with respect to a qualified equity investment prior to the seventh anniversary of the issuance of such qualified equity investment.

- The issuer fails to invest at least 85 percent of the cash purchase price of the QEI in QLICI in the State of Illinois within 12 months of the issuance of the QEI and maintain such a level of investment in QLICI in Illinois until the last credit allowance date for such QEI.

XXXVIII. SMALL BUSINESS JOB CREATION TAX CREDIT

35 ILCS 25/Act

“This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the
Taxpayers’ Bill of Rights.”

The Illinois Small Business Job Creation Tax Credit is available for eligible businesses through tax years ending before June 30, 2016. Eligible businesses are entitled to a credit against withholding taxes in connection with the hiring of new full-time employees, so long as that hiring results in a net increase in full-time employees and that the increase is maintained for at least 12 months. This credit must be claimed in the first year ending on or after the day DCEO issues a tax credit certificate to the taxpayer.

To qualify for the credit, a new job must be sustained for at least one year and pay at least $18,200 annually (basic wage of $10.00 per hour for 35 hours per week).

CREDIT AMOUNT

For small businesses with less than 50 employees, the credit is $2,500 per job on withholding tax for employers who hire new, full-time Illinois employees during the 12-month period beginning July 1, 2010. Businesses hiring "Put Illinois to Work" worker-trainee are entitled to one-half of the credit, $1,250, allowable if that employee is employed for at least 6 months after the date of hire. The employer is entitled to the other half of the credit, $1,250, if that employee is employed for at least 12 months after the date of hire. (35 ILCS 25/25(d); 14 Ill. Adm. Code § 529.80) The program will be capped once a total of $50,000,000 in credits have been awarded. (35 ILCS 25/30)

XXXIX. UNITARY GROUPS FILING COMBINED ILLINOIS RETURNS

IAC § 100.5270(d) deals with the applicability and computation of credits for taxpayers that are members of a unitary business group filing a combined Illinois return. The designated agent will compute any credit allowed by the IITA based on the combined activities of the members of the combined group and such credit will be applied against the combined liability of the combined group. REF: IAC § 100.5270(d)(1).

The Replacement Tax Investment Credit, Enterprise Zone Investment Credit, High Impact Business Investment Credit and the Coal Research and Utilization Equipment Credit are all based on certain property purchased and placed in service by the taxpayer. The combined return members will be allowed the credits, assuming all other requirements of the credits are met, if one member purchases the property and another uses the property. In addition, the second part of the Replacement Tax Investment Credit and the Jobs Tax Credit, which involve specified increases in employment, will be determined to be applicable based on the group's combined employment increase and not each individual member's increase.

A. CARRYOVER OF EXCESS CREDITS

Any combined return credit carry-forward is available to the combined group for the next combined return year. If one member becomes ineligible to be included in the subsequent combined returns, the carry-forward continues to be available to the remaining members IF the remaining members continue to both own and use the property for which the credit was claimed in a qualified manner for 48 months after the placed-in-service date.

If the member that has become ineligible is the entity owning and using the property involved, then the carry-forward is available to that member if, again, the member continues to own and use the property in a qualified manner for 48 months after the placed-in-service date. The amount of carry-forward available to the now-ineligible member is computed as the combined unused credit multiplied by a fraction, the numerator of which is the total amount of the original combined credit attributable to the now-ineligible member and the denominator of which is the total original combined credit for the group.

- Refer to IRC § 100.5270(d)(4), which contains several examples.

B. RECAPTURE OF CREDIT

When the property ceases to be qualified property or is moved out of the state (or Enterprise Zone) within 48 months of the placed-in-service date, the members of the combined return are responsible for the recapture of any Income or Replacement Tax originally offset by the credit. The member (or group) who owns and uses the property when it becomes disqualified is responsible for the recapture.

Refer to IAC § 100.5270(d)(5), which contains several examples.

XL. ENTERPRISE ZONES

Enterprise Zones are economically distressed areas in Illinois, of up to ten square miles, which qualify for special tax incentives once they are designated by the state and participating local governments. An FY bulletin has been issued by the Department for each Enterprise Zone identifying, in addition to other information, its date of designation.

Section 5.3 of the Illinois Enterprise Zone Act provides that the zones will be in effect for a period of 20 years from the date of certification unless a lesser number of years are specified in the certified designating ordinance.

Boundaries within any specific Enterprise Zone are continually being amended. If there is any question whether an address is located within the boundaries of a zone, the

"This manual is not a statement of Department policy. Taxpayers' Bill of Rights."

administrator for that zone should be contacted. A complete list of enterprise zone administrators along with their phone numbers can be found under the web site for The Department of Commerce and Economic Opportunity (DCEO).

Refer to the DCEO website for up-to-date information.

XLI. FOREIGN TRADE ZONES

Foreign Trade Zones are secured areas legally outside a nation's customs territory. Their purpose is to attract and promote international trade or commerce.

> Requests for additional information regarding the Foreign Trade Zones should be directed to the contact person for the zone project. Refer to the DCEO website for up-to-date information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

I. PURPOSE

This chapter discusses the auditor's ability to make certain adjustments to a taxpayer's income or deductions to properly report Illinois base income where certain arrangements between taxpayers distort the allocable Illinois base income. The statutory authority to do so is found in IITA § 404. A proposed audit adjustment under this IITA section is often referred to as a "Section 404 adjustment" or simply a "404 adjustment".

This chapter provides a general background of Section 404 adjustments, the procedure to request such adjustment, and several alternative adjustments when a 404 adjustment is prohibited.

II. REFERENCES

The following is a general list of sources regarding Section 404 adjustments. Other and more specific references are made throughout the chapter. This list is by no means exhaustive.

- 26 CFR § 1.482-1
- Illinois Schedule 80/20

III. GENERAL INFORMATION

Under IITA § 404, income and deductions can be reallocated and any factor taken into account in allocating income to the state if it appears to the Director that, as the result of any agreement, understanding or arrangement between the taxpayer and any other person, they were reported improperly or inaccurately so as not to reflect the correct tax liability.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

> Note: This should not be confused with IITA § 304(f) that pertains to the Department's authority to apply an alternative apportionment method where the statutory formula fails to reflect the business activity or the market for the taxpayer's goods or services. (REF: Audit Manual Chapter 27).

Under P.A. 95-0948, effective August 29, 2008, the Department cannot make any Section 404 adjustments to base income which would have the same effect as retroactively applying the add-back provisions which were added to the Illinois Income Tax Act by P.A. 93-0840, 95-0233 or 95-0707. The add-back provisions involve modifications for interest, royalties and other intangible expenses paid to an 80/20 company (added by P.A. 93-0840) or to a company which is excluded from the combined return due to the noncombination rule (added by P.A. 95-0233) and dividends paid by real estate investment trusts (added by P.A. 95-0233 and P.A. 95-0707).

Because of this legislative change, audits which involve possible Section 404 adjustments are to be reexamined to determine if the facts support an adjustment that does not rely on Section 404.

If a taxpayer argues that its situation is the same as the fact situation involved in a private letter ruling, confirm that their facts are identical to the facts stated in the ruling before any decision can be made. Point to the following language which is included in all private letter rulings:

> The factual representations upon which this ruling is based are subject to review by the Department during the course of any audit, investigation, or hearing and this ruling shall bind the Department only if the factual representations recited in this ruling are correct and complete.

Even the taxpayer who receives a ruling cannot rely upon it if their factual representations were incorrect. If a taxpayer does not provide the documents needed to allow confirmation, assume that the facts per audit are not identical with the facts contained in the letter ruling.

P.A. 100-22, effective July 6, 2017, repealed the noncombination rule and expanded the definition of "United States" to include the outer continental shelf (OCS) for taxable years ending on or after December 31, 2017. Domestic unitary affiliates that apportion under different subsections of IITA § 304 will be able to be included in the same Illinois UBG. This eliminates the related-party expense modifications for noncombination companies for the applicable tax periods. Due to intercompany eliminations, many transactions that required 404 adjustments between unitary domestic companies should not be necessary for the applicable periods.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A. POTENTIAL AUDIT SITUATIONS TO REQUEST 404 ADJUSTMENT

Section 404 adjustments should not be proposed lightly, so remember the following four things:

- If any other statutory option exists to make the audit adjustment, pursue that option.
- There must be some type of arrangement between entities that improperly affects the base income allocated to Illinois, which can be documented and proven.
- 404 adjustments are not permitted for any adjustment that is covered by our 80/20 add-back provisions for any year. Also, with the elimination of the noncombination rule for taxable years ending on or after 12/31/17, this should reduce the need to pursue 404 adjustments between affiliated companies.
- While situations will arise where a Section 404 adjustment is warranted, these should be the exception, not the rule.

A 404 adjustment can be sought when the taxpayer has improperly shifted taxable income out of Illinois's reach through a transaction with an affiliate. Two principal ways this can be done is to create transactions, that either increase expenses paid by the taxable Illinois UBG or to reduce the income of the taxable Illinois UBG, with an affiliate not taxable by Illinois. Many of the common ways of using loans and intangible assets to reduce net income are dealt with by the 80/20 modifications. However, the area to consider that is not prohibited by P.A. 95-0948 and not remedied by 80/20 modifications is where the Illinois taxpayer is underreporting income.

An example of this would be a zero-interest loan to an affiliate that is not part of an Illinois UBG. In this scenario, the taxpayer would not be receiving the interest income that would normally be received from an arm's length transaction. Thus, Illinois base income is less than what would accurately be reported if the taxpayer provided the loans in an arm's length transaction. No other statutory remedy exists, as would be the case if the taxpayer had borrowed money from an affiliate and could be adjusted from an 80/20 addition modification. It would be possible to request that the Illinois taxpayer report imputed interest income through a Section 404 adjustment.

The following is a list of potential transactions where an Illinois taxpayer could underreport income allocable to Illinois from transactions not conducted at arm's length, and a 404 adjustment may be considered:

- Taxpayer makes a loan or advance to another entity and charges no interest or does not charge an arm's length interest rate,
- Taxpayer performs services for another entity without charge or at a charge which does not reflect an arm's length payment,
- Taxpayer leases property to another entity at a rental charge that is not an arm's length rental charge,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Taxpayer sells property to another entity at a sales price that is not an arm's length price.
- Taxpayer leases intangible property to another entity for no royalty fee or a fee that is not an arm's length fee.
- Taxpayer enters into a cost sharing arrangement with another entity to share costs to develop intangibles but all related costs are not shared.

In each transaction, the concern would be with the Illinois taxpayer and an affiliate that is not part of the Illinois UBG, due to the noncombination or 80/20 rules of IITA § 1501(a)(27). Intercompany eliminations or offsets would correct the imbalance if the affiliate were part of the Illinois UBG, but not when the affiliate is outside of Illinois's taxing authority. In each scenario, the Illinois UBG would underreport Illinois base income due to transactions that charge less than market rates. In these scenarios, it may be necessary to explore whether a 404 adjustment should be requested. For taxable years ending on or after December 31, 2017, the noncombination rule no longer applies. This means that some 404 adjustments between domestic affiliates will no longer need to be pursued, since the parties should be part of the same UBG and the transaction subject to intercompany elimination.

The taxpayer may attempt to argue that the transactions are conducted at arm's length. For example, if the taxpayer is attempting to argue that there is an arm's length transaction in a loan between the companies, then look to see if the companies are abiding by the terms specified in the loan agreement. For instance, are payments being made timely between the subsidiaries? Are penalties being charged for any late payments? Are fluctuations in the prime rate being adjusted in a timely manner? Obtain the recipient's bank account statements. Many interest or dividend payments are made by electronic fund transfer (EFT), and within hours or days an EFT sent back to the parent or domestic subsidiary, which does not qualify for the 80/20 test. If the taxpayer is not abiding by the terms of any contracts provided, then this would be a basis for claiming that the terms are not really arm's length.

IRC § 482 contains a provision for the IRS similar to IITA § 404. Federal regulations are in 26 CFR § 1.482-1 (Allocation of income and deductions among taxpayers). This federal regulation contains a lengthy discussion on arm's length transactions and the application of IRC § 482.

IV. PROCEDURES FOR REQUESTING A SECTION 404 ADJUSTMENT

A. DETERMINING VALIDITY OF 404 ADJUSTMENT

When encountering an audit situation where Section 404 might apply, collect the necessary documentation to support the adjustment.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Gather whatever documents the taxpayer has within its possession to support an audit position and include a copy in the audit file. Follow the guidance outlined in Audit Manual Chapter 20 under "Information Document Requests (IDRs) and Documenting Taxpayer Meetings". If documentation cannot be obtained, then identify in the Auditor's Comments what documents the taxpayer has in its files (correct document names, dates, etc.) so that Legal can request them during discovery.

Documentation Needed (not all-inclusive):

- All written agreements setting up the questionable transaction(s) or tax plan, such as:
  - stock purchase agreements
  - credit agreements
  - licensing agreements, etc.
- All written agreements evidencing intercompany loans and payments
- Any other documents that trace the exchange of funds, such as
  - books and records
  - wire transfers
  - transaction slips
  - journal entries, etc.
- Board of directors meeting minutes and resolutions approving the arrangement in question
- Accounting firm proposal, if any, explaining the arrangement to reduce/shelter taxes (the accounting firm's pitch for the created tax plan)
- Any tax department interoffice recommendations or correspondence regarding the approval or ideas for the tax plan at issue
- Any documentation evidencing the transfer of assets and cash to an 80/20 company to set up the arrangement, such as:
  - transfer of intellectual property
  - loans, etc.
- A detailed balance sheet matching up expenses with income. For example:
  - the royalty expense paid to a wholly owned 80/20 company for use of intellectual property
  - income received by the 80/20 for licensing the intellectual property
- If very complicated, any diagrams that would help to understand the transactions in question
- Any IDRs issued to the taxpayer with taxpayer responses attached
- Any information that shows where the work is actually being performed (in the US or overseas)
- Documentation evidencing property overseas, such as any lease for the following:
  - office space
  - computer equipment
  - telephones, etc.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Employment contracts for overseas employees
  - Is the foreign “employee” a true employee, or an independent contractor?
  - Who else does this person work for, if any one?
- Identification of the board of directors for the parties at issue. Identification of all employees, if a few employees exist.
- Corporate structure flowchart, including minority interest
- Intercompany eliminations details to identify the flow of values to affiliated companies

B. PRESENT SECTION 404 REQUEST TO IMMEDIATE AUDIT SUPERVISOR

If the audit supervisor determines that there is potential for a Section 404 adjustment, then take the following steps:

1. Clearly summarize the facts and adjustment in a memorandum, including the estimated tax effect
2. Email the memorandum with all supporting documentation to the Audit Supervisor
3. The Audit Supervisor will forward the request to the Income Tax Technical Support Supervisor for review.

C. TECHNICAL SUPPORT REVIEW

If Technical Support agrees with the auditor’s recommendation, it will be forwarded to the following management personnel who will confer and then decide whether a Section 404 adjustment is appropriate:

1. Technical Support Supervisor
2. Audit Division Manager
3. Audit Bureau Manager
4. Revenue Chief Counsel

D. 404 DECISION

If the above-mentioned Management determines that the 404 adjustment is appropriate, it will be presented to the Director for approval. If the Director approves the 404 adjustment, a Technical Response will be issued explaining the adjustment and communicating the approved adjustment.

If at any stage Technical Support, Management, or the Director do not approve, no Technical Response will be issued. An email will be sent to the auditor and auditor’s

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

supervisor to communicate the final decision if the Section 404 adjustment is approved or not. Technical Support will keep copies of the technical requests for future reference.

V. ALTERNATIVES TO PURSUING 404 ADJUSTMENTS

Many situations that involve the shifting of income and expenses between 80/20 companies and noncombination companies are addressed by the add-back modifications found in IAC § 100.2430. Because of P.A. 95-0948, effective August 29, 2008, the Department is prohibited from using Section 404 adjustments to retroactively apply those add-back modifications to periods before they were legally enacted:

- For 80/20 companies, taxable years ending prior to 12/31/04.
- For noncombination companies, taxable years ending prior to 12/31/08;
- For dividends paid by REITs, taxable years ending prior to 12/31/09.

If audits are being conducted on these older periods, while pursuing a Section 404 adjustment is prohibited, it may be possible to pursue alternative adjustments to correct the shifting of income or expenses. The discussion that follows addresses alternatives to consider for the following situations:

A. 80/20 Test, Financial Group
B. REIT, Financial Group
C. REIT, Three-factor Group
D. 80/20 Company Owning Capital or Intellectual Property
E. Noncombination Group, Captive Insurance

This analysis focuses on the possibility of disqualifying the 80/20, REIT, or insurance status of an entity. Remember, some of the transactions between noncombination companies will no longer need consideration for Section 404 with the repeal of the noncombination rule for taxable years ending on or after December 31, 2017.

One-Factor Financial Organizations

The Department has identified two main audit issues with respect to financial organizations that apportion their income under IITA § 304(c) that have subsidiaries in tax-haven countries:

1. A financial subsidiary that has minimal operations in a foreign country that receives interest income outside the U.S, and
2. A holding company in a foreign country that receives dividend income from a domestic real estate investment trust (REIT).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The taxpayer will attempt to claim that the 80/20 test has been met under IAC § 100.9700(c)(2) because the interest or dividends were received outside the U.S. In both cases the 80/20 company will probably be in the consolidated federal return so that its income is taxed federally, but since the 80/20 is excluded from the unitary group, its interest or dividend income is shifted off of the Illinois return.

The Legislature attempted to close this loophole for tax years ending on or after December 31, 2008, by expanding the use of Schedule 80/20 to include interest, royalties and premium expenses paid to an affiliated company that would have been included in the same unitary group if it were not for the noncombination rule. See IAC § 100.2430 for more information. Also, for tax years ending on or after December 31, 2009, IITA § 203(b)(2)(E-15) creates an addition modification for the REIT dividend paid deduction.

A. 80/20 TEST – FINANCIAL ORGANIZATIONS

For taxpayers that apportion their income under IITA § 304(c), the 80/20 test is based on the apportionment factor for financial organizations in IAC § 100.3400. The numerator of the 80/20 test is the financial organization's receipts in the U.S. and the denominator is total receipts worldwide. The taxpayer's 80/20 test is going to show that the receipts were received in a foreign country with little or no receipts received in the U.S. If Audit can prove that the 80/20 is not receiving dividends, interest and/or royalties in a foreign country, then the 80/20 company will not qualify as a foreign company under IAC § 100.9700(c)(2).

1. STEPS TO DISPROVE THE 80/20 TEST FOR A FINANCIAL ORGANIZATION

Secure the following documents:

- Records that show how the 80/20 was initially capitalized along with the dollar amount of the initial capitalization and any subsequent transfers of capital (to see if the 80/20 subsidiary is adequately capitalized)
- Sample journal entries of the domestic company's transactions with the 80/20
- Any flowcharts that may be helpful in showing the 80/20's transactions and interdependence with domestic subsidiaries
- Sample copies of the 80/20's bank statements
- Sample copies of wire transfers of funds
- Sample copies of pages of the 80/20's general ledgers (samples that can be faxed or scanned from the foreign country)
- A list of officers and directors of the 80/20 and where their offices are located
- Identify other employees who provide services for the 80/20, both domestic and foreign, including data processing, tax preparation, or bank services

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Copies of every written agreement between the parent and the 80/20 relating to services performed for the 80/20
- Copies of written agreements with third parties outside of the U.S. that provide services for the 80/20 (e.g., office space, storage space, acting as agent for service processing, etc.)
- Copies of any loan documents between the parent and the 80/20

Some of this information may already be in possession if persistent in obtaining documents requested on the EDA-132 Unitary Questionnaire. Any documents not in possession should be requested on an EDA-70. If the taxpayer refuses to furnish the information, then follow the Subpoenas Procedures in Chapter 20 of the Audit Manual. Every effort should be made to secure the documents on an EDA-70 before resorting to the issuance of EDA-11-A and subpoenas.

2. CHECK WIRE TRANSFERS WITH THE 80/20

If the 80/20 apportions its income under IITA § 304(c), then the 80/20 test is not based on property or payroll but on where the 80/20 receives its income. If the 80/20 is receiving income from a domestic affiliate, then there must be actual wire transfers of funds to a foreign bank account as opposed to just intercompany accounting entries. It is imperative to review fund transfers and bank statements of the 80/20 to assure that the funds were received by a foreign bank.

If the 80/20 is mostly inactive, then frequently the only thing that happens is that someone at the 80/20 company wires the money back to the parent the next day or even within a few hours. If that is the case, then the Department will not question the transaction if the taxpayer can show that they relied on one of the current public letter rulings that allow this as a foreign receipt. The taxpayer can demonstrate that they relied on the ruling by having a copy of the letter ruling in their books and records, email correspondence with their tax preparer dated to the time when the return was prepared, etc.

3. ARM'S LENGTH TRANSACTIONS

If the 80/20 made loans back to the parent or domestic subsidiaries, then verify that the transactions were at arm's length. Review the loan agreements to verify that the interest rates were similar to what a bank would charge, and if the interest rate was linked to the prime rate, then check to see if the interest rate on the loan fluctuated with the prime rate.

In addition, verify that the companies abided by the terms of the loan agreement. For example:

- Were payments made timely between the subsidiaries on the dates specified in the agreement?

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Were penalties charged for any late payments?
- Were fluctuations in the prime rate being adjusted in a timely manner?

Get the recipient's bank account statements. There is a lengthy discussion on arm's length transactions in 26 CFR § 1.482-1 (Allocation of income and deductions among taxpayers).

Again, if after reviewing the documents an argument can be made in this area, then discuss with the audit supervisor and then forward the documents to Technical Support along with a memo explaining the auditor's position. If the Department cannot challenge the 80/20 test and there is no REIT involved, then the transaction(s) with the 80/20 will be honored and no audit adjustment will be made.

For more information, refer to the section "Arm's Length Transactions" in Audit Manual Chapter 24.

B. REIT - FINANCIAL GROUP

If the financial organization owns a real estate investment trust (REIT), then trace the dividends paid by the REIT to see if it is being sheltered from Illinois tax. A REIT federally files a Form 1120-REIT and is not included in the consolidated federal return. IITA § 203(e)(2)(D) defines the taxable income of a REIT as "real estate investment trust taxable income" which is Line 22 on the federal 2017 Form 1120-REIT. Also see IAC § 100.2405(c)(4). That line is net of the dividend paid deduction that the REIT receives federally on dividends that are paid. When the REIT is being used to shelter income of a combined group, the vast majority of the dividends will be paid to a REIT holding company (RHC). Normally the REIT has positive taxable income before distributing its income as a dividend For example, the REIT reports its taxable income before dividend on Line 20 of the federal 2017 Form 1120-REIT, andthen distributes all of the income as a dividend on Line 21b, making its REIT federal taxable income zero on Line 22. Without any federal taxable income, many REITs do not file in Illinois even though they may have an Illinois factor.

On the receiving side the RHC reports the dividends from the REIT as subject to federal tax, which would also be subject to Illinois tax. No Illinois subtraction modification applies to the REIT dividends received by the RHC, and so the REIT gets to deduct all of the dividends it pays from its federal taxable income, but the dividends received by the owner of the REIT are taxed both federally and for Illinois purposes.

On a unitary basis REITs are treated the same as any other corporation and therefore must meet the same unitary criteria under IITA § 1501(a)(27) and IAC § 100.9700. If the parent is the ultimate recipient of the REIT dividends, then the ownership test in IAC § 100.9700(e)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

is probably met. Of course, the other unitary requirements of IAC § 100.9700 would also have to be met for the REIT to be included in the unitary group.

If the RHC is owned by a bank holding company so that its income is apportioned under IITA § 304(c), then the taxpayer may shield the REIT dividends from Illinois taxation by arranging for the RHC to receive the dividends in a foreign country.

If the 80/20 test of the RHC cannot be challenged using the procedures previously stated, then Audit can focus on whether or not the REIT dividend paid deduction is allowable under federal rules. The deduction would not be allowable federally if Audit can show that the REIT does not meet the federal definition of a REIT, in which case Audit would make a federal change to taxable income under IITA § 203(e). This is not an IITA § 404 adjustment nor is Audit challenging the 80/20 test. The RHC will remain an 80/20 company outside the unitary group, but federal taxable income of the REIT will be increased by the disallowed federal dividend paid deduction.

The following are basic REIT qualifications that the Department could challenge.

- A REIT must have at least 100 shareholders. When the REIT is being used to shelter income of a corporation, most of the shareholders are officers and directors of the corporation who collectively receive a small amount of the REIT dividends with the bulk of the dividends going to the RHC.

- Shares of stock in a REIT must be transferrable.

- At least 75% of a REIT's gross income must be derived from rents from real property, interest on obligations secured by mortgages on or interests in real property, and gains on the sale of real property. Also, 75% of a REIT's net assets must be invested in real estate assets, cash, receivables, and government securities.

- The assets must have been transferred to the REIT through a written, legal agreement.

- The REIT must pay the parent for the assets it receives either through the issuance of cash, loans, stock, etc.

The above requirements are explained in more detail below. Review the REIT qualifications to see if there are any federal requirements that the Department can challenge.

For tax years ending prior to December 31, 2008, if a case can be made for an audit adjustment, then discuss with the audit supervisor and after forward pertinent documents to

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Technical Support along with a memo explaining the auditor's position, a short calculation of the tax effect, etc. Technical Support will then consult with Legal Services on whether or not to go forward with the proposed audit adjustment.

For tax years ending on or after December 31, 2008 (December 31, 2009, if a REIT is involved), apply the expanded Schedule 80/20 provisions rather than an alternative method.

Request some or all the following documents concerning the REIT:

- Loan Participation Agreement (may also be called or include a "Master Deed") or other asset transfer agreement along with a description of property transferred
- A detailed description of the process by which loans or other assets were identified for transfer to the REIT along with a description of how the actual transfer was made
- Minutes of meetings of the shareholders and board of directors of the parent or other affiliate of the REIT discussing the formation or operation of the REIT and RHC.
- Articles of Incorporation of the REIT
- Documents, correspondence or emails that discuss the formation of the REIT
- General ledgers of the REIT for each month of the audit
- Samples of journal entries
- Shareholder agreements and other documents relating to the transfer of REIT shares to the individual REIT shareholders
- Identity of the officers of the REIT and which offices they work out of
- Copies of agreements where the parent or affiliates of the REIT provide services
- Copies of Agreements with third parties on the providing of services
- REIT Bank Statements
- Minutes of meetings of the shareholders and board of directors of the REIT and RHC

Note: See attached Exhibit A for a list of additional possible questions.

1. REIT QUALIFICATIONS

a) The 100-Shareholder Test

IRC § 856(a)(5) provides that a REIT is an organization "the beneficial ownership of which is held by 100 or more persons." IRC § 856(b) provides that this condition must exist during at least 335 days of a taxable year of 12 months. Accordingly, in order for a captive REIT to fail this test, it must have fewer than 100 shareholders for at least 31 days during the taxable year. Short taxable years are covered under 26 CFR § 1.856-1(c). In addition, 26 CFR § 1.856-1(d)(2) provides for no "rules of attribution". Check to make sure that the REIT met the 100 shareholder test for each taxable year under

these IRC sections. If the REIT fell short of the 100 shareholder minimum during the taxable year, it could be a basis for denying its REIT federal status.

b) Shares of REIT Stock Must be Transferable

IRC § 856(a)(2) provides that a REIT is an entity:

> The beneficial ownership of which is evidenced by transferable shares, or by transferable certificates of beneficial interest.

However, every captive REIT will probably have some provision in its charter or trust agreement, or in a separate shareholder agreement, restricting the transferability of its shares in order to prevent its failing the 100-shareholder test. The IRS has taken the position that restrictions on transferability that are intended to ensure that the 100-shareholder test is met will not disqualify the REIT. However, obtain that provision from the taxpayer and review it. Any restriction on transferability that is not expressly stated to be applicable only to prevent failing the 100-shareholder test could be a basis for holding that the captive does not qualify as a REIT. If it is believed that there is such a restriction, then a copy of the shareholder agreement, charter or trust agreement should be forwarded to Technical Support for consultation with Legal Services.

c) Obligations Secured by Mortgages on Real Property

IRC § 856(c)(3) provides that an entity may qualify as a REIT only if:

> (3) at least 75 percent of its gross income (excluding gross income from prohibited transactions) is derived from -
>
> (A) rents from real property;
> (B) interest on obligations secured by mortgages on real property or on interests in real property;
> (C) gain from the sale or other disposition of real property (including interests in real property and interests in mortgages on real property) which is not property described in section 1221(a)(1);
> (D) dividends or other distributions on, and gain (other than gain from prohibited transactions) from the sale or other disposition of, transferable shares (or transferable certificates of beneficial interest) in other real estate investment trusts which meet the requirements of this part;
> (E) abatements and refunds of taxes on real property;
> (F) income and gain derived from foreclosure property (as defined in subsection (e));
> (G) amounts (other than amounts the determination of which depends in whole or in part on the income or profits of any person)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

received or accrued as consideration for entering into agreements (i) to make loans secured by mortgages on real property or on interests in real property or (ii) to purchase or lease real property (including interests in real property and interests in mortgages on real property);
(H) gain from the sale or other disposition of a real estate asset which is not a prohibited transaction solely by reason of section 857(b)(6); and
(I) qualified temporary investment income[.]

In addition, IRC § 856(c)(4) provides that an entity may qualify as a REIT only if:

(4) at the close of each quarter of the taxable year –
(A) at least 75 percent of the value of its total assets is represented by real estate assets, cash and cash items (including receivables), and Government securities[.]

Briefly review the REIT assets to assure that the above qualifications were met.

d) Assets Must Have Been Transferred to the REIT

The assets must have been transferred to the REIT through a written, legal agreement (as opposed to an intercompany bookkeeping entry). Review the asset transfer agreement(s) to assure that there was a legal transfer of assets. It will be necessary to review the Loan Participation Agreement to see if this was done.

e) REIT Must Compensate the Parent for the Assets It Receives

When the REIT was originally organized it issued stock to the parent, and in return the parent transferred qualified assets to the REIT. The issue is subsequent transfers of assets after the initial REIT capitalization. When the parent transfers subsequent assets to the REIT, then the parent must receive some kind of compensation from the REIT. It could be additional shares of stock in the REIT, cash, loan, or notes receivable. If the parent transfers assets to the REIT for no compensation, then it could be argued that a sham transaction exists.

C. REIT – THREE-FACTOR GROUP

In this issue a three-factor unitary group establishes a REIT to own real estate for the unitary group. The REIT may not be a member of the consolidated federal return, but instead files a separate Form 1120-REIT. The REIT is owned by a REIT holding company (RHC) and receives the dividends issued by the REIT. The RHC is included in the consolidated federal return if it is incorporated in the U.S., but the issue is that the taxpayer

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

arranges for the RHC to have greater than 80% of its property and payroll outside the U.S. This may be done by transferring to the RHC a foreign disregarded entity, or by setting up the RHC in a tax-haven country with minimal property or payroll. The REIT receives a federal dividend paid deduction on dividends that it issues the RHC, but the RHC receiving the taxable dividends is not subject to Illinois tax. In the past, IITA § 404 was used to reverse the tax effect of the transaction.

In order to challenge the transaction, it will be necessary to either:

- disprove the taxpayer's 80/20 test, or
- prove that the REIT does not meet the qualifications of a REIT under IRS rules.
    - In order to challenge the federal qualifications of the REIT, follow the REIT issue in the section above.
    - If the REIT does not meet the federal qualifications, then the REIT federal dividend paid deduction can be denied under IITA § 203(e) without challenging the 80/20 test of the RHC.

The 80/20 procedures are below:

1. 80/20 TEST – THREE-FACTOR FILERS

Perform the 80/20 test to determine if the 80/20 has 80% or more of its total business activity outside the U.S. Under IITA § 1501(a)(27) the test is applied in the same manner as the apportionment factor. The numerator for the 80/20 test is comprised of the 50 states and District of Columbia; no territories or possessions are included. Puerto Rico is not included. REF: IAC § 100.9700(c)(2)(A);

The 80/20 test includes only the property and payroll for three-factor companies. One factor companies such as transportation, insurance, and financial organizations use the same 80/20 formula they use for apportionment.

For taxpayer's required to use three-factor apportionment under IITA § 304(a), the 80/20 test would be computed as follows:

Property within the US	Payroll within the US
-------------------------------------	-----------------------------------
Total Property Everywhere	Total Payroll Everywhere

If either the property fraction or the payroll fraction has a denominator of zero, the sum of the fractions will be divided by one. REF: IAC § 100.9700(c)(1) & (2)(B).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

No intercompany eliminations are made before the 80/20 test. REF: IAC § 100.9700(c).

a) 80/20 Test - Property Factor

In determining the property factor for the 80/20 test, the numerator will consist of real and tangible property owned or rented in the U.S. and the denominator will be property owned or rented worldwide. Included property in the test should be one of the following:

- used
- available for use
- capable of being used in the taxpayer's business

Property excluded from the test should be one of the following:

- used in the production of nonbusiness income
- construction in progressr
- property that is permanently withdrawn from use

REF: IAC § 100.3350(a) and (b).

In applying the 80/20 test it must first be determined if the 80/20 actually owns or rents any property in the foreign country or the U.S. This can be determined by reviewing the balance sheet of the 80/20 federal pro forma. Small items may be expensed and not listed on the balance sheet. Therefore, a review of the Schedule M-1, Schedule M-3, or other deductions taken should be conducted to detect the items that should be included with property, which have been expensed. Occasionally, rent is included in other items such as management fees.

If the taxpayer claims rent expense, verify that the 80/20 is the actual lessee of the property by reviewing the lease agreement. If the agent of the 80/20 actually rented the property, then that rent cannot be included in the property factor of the test.

The Department has the statutory authority to attribute property owned by others and used by the taxpayer at no charge, or rented for a nominal rate to the taxpayer under IAC § 100.3380(b)(2). A fair market value rental rate can be calculated for any property used in relation to the 80/20's operations such as preparation of 80/20's books and records, storage and safekeeping of records, tax return preparation, etc.

However, the argument that the taxpayer should be deemed to rent the equipment that another person uses to perform services for the taxpayer was rejected by the ALJ in *Abbott Labs*, 98-IT-0304.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

b) <u>80/20 Test - Payroll Factor</u>

The payroll factor for the 80/20 test will include all compensation paid by the 80/20 company during the taxable year. The figures for the payroll factor should come from the federal Forms 940 and 941. If the 80/20 has deducted or expensed any salaries and wages, verify that the individuals earning those salaries and wages are truly employees of the 80/20 as defined in IAC § 100.3100(b). If the taxpayer asserts that a foreign director or agent is an employee, it must be determined if they meet the definition of an employee. In order to be an employee, the individual performing services must have a legal relationship with the entity for which the services are being performed.

D. AN 80/20 COMPANY OWNING CAPITAL OR INTELLECTUAL PROPERTY

In this issue a unitary group composed of domestic retailers and/or manufacturers transfer substantial capital or intellectual property to a captive 80/20 company with minimal property and payroll located in a tax-haven country such as Bermuda. The 80/20 company and its federal taxable income are then excluded from the unitary group, but the interest and/or royalty payments made to the 80/20 are allowable federal expenses incurred by the unitary group which reduces unitary taxable income.

It is possible to disallow the 80/20 test for the captive recipient of the interest or royalty income and attempt to include the captive in the unitary group. Basically, if the captive 80/20 has minimal activity, then the taxpayer's 80/20 test can be disproven using the following methods:

- If the 80/20 is a three-factor company, then impute property of related domestic companies to the 80/20 captive under IAC § 100.3380(b)(2)
- If the 80/20 is a three-factor company, then attempt to show that officers or employees of domestic affiliates are providing substantial services to the 80/20, similar to the Illinois Appellate Court case in *Zebra Technologies Corp.*, 344 Ill. App. 3d at 481

1. APPLYING ZEBRA TECHNOLOGIES

In addition to applying the 80/20 rules discussed in the previous section, if the 80/20 is managing a substantial amount of intangible assets (i.e., trademarks and patents), then it may be possible to disprove the taxpayer's 80/20 test under *Zebra*.

With respect to intangible assets (i.e., trademarks and patents), certain actions are required in order to maintain these assets. In order for these assets to maintain their

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

usefulness and allow the taxpayer to exploit them, the taxpayer must monitor the use of patents and trademarks by the licensee. These assets must also be registered with the appropriate federal and state agencies and must be protected against unlawful use by unrelated parties. These functions require a commitment of time and money on the part of the licensor. It is necessary to determine if these responsibilities remain with the licensor (80/20 company) or were contracted to the licensee (parent and affiliates).

Once the responsibilities of the various parties are determined, it is necessary to find out where these activities are actually taking place. The inquiry can focus in part on the ability of the foreign subsidiary to perform these duties. If the foreign subsidiary is a shell corporation with no real employees or office, it is reasonable to assume (based upon documentary evidence gathered that reveal that information) that the activities needed to maintain and protect the taxpayer's intangible assets are being done in the U.S. by the parent company and/or its unitary affiliates. Thus, if it is determined that the unitary group is performing these activities, the Department could disqualify the foreign subsidiary's 80/20 status. The following are suggestions to help analyze the 80/20 status:

- Ask for license agreements that give rise to the royalty or interest income
- Obtain services agreements detailing what the employee(s) of the 80/20 and parent or other affiliate do with respect to the 80/20 company's activities
- Request copies of any W-2s issued by the 80/20 company for the audit period
- Obtain sample ledgers that show the exact flow of income among the subsidiaries, what type of income is paid, by what entity to which other entity, how much, how it is accounted for, what dates the income changed hands, etc. (e.g., royalties, dividends, etc.)
- Obtain bank statements of the REIT and wire transfers from all companies involved with the payment of royalties, interest, or dividends
- Determine which entity filed patent/trademark applications, followed up with annual registrations, performed quality control, and protected or defended the patents or trademarks. If an outside law firm was employed, which entity oversaw its activities and paid the legal bills? Which entity approved or authorized settlements with respect to patent/trademark litigation?
- Obtain the complete federal Forms 5471 plus attachments
- Obtain complete federal Forms 1118 plus attachments
- An organizational chart for each year of the audit cycle for both the domestic and foreign operations might also help to understand the structure and activities
- Review board of directors' minutes of 80/20 subsidiary, affiliated companies, and the parent to reveal facts about the organization and its structure as well as purpose, intent, and actual activities
- Note any foreign property listed on SEC Forms 10-K
- Obtain copies of the leases of the overseas subsidiaries offices

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If enough facts can be gathered to show that a domestic parent or subsidiary is managing the assets of the 80/20 company, then it may be possible to argue that the taxpayer did not meet its burden to prove it is an 80/20 company.

E. NONCOMBINATION RULE COMPANIES- CAPTIVE INSURANCE COMPANY

For taxable periods prior to December 31, 2008, where the add-back modification for insurance premiums paid to a captive insurance company is not available, examine the captive insurance company. If the company does not meet the IRC's insurance company criteria, then it could be reclassified a regular three-factor company and included in the three-factor unitary group. This adjustment would result in a reallocation of base income to Illinois, the same as would the prohibited Section 404 adjustment.

The issue of captive insurance companies is fully developed in Audit Manual Chapter 31. Please refer to the section "Captive Insurance Companies" for more information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

VI. EXHIBITS

A. EXHIBIT 1 – ADDITIONAL REIT QUESTIONS

The following are additional questions or follow-up questions on REITs.

1. Please provide the following documents and information about the REIT and REIT holding company (RHC):

- Is the REIT and RHC a corporation, trust, or association? Provide copies of the articles of incorporation and by-laws, trust instrument, or articles of association, whichever is applicable.

- Provide all documents that discuss, relate to, concern, or mention the tax and other business purpose attributed to the establishment of the REIT and RHC.

- Provide all minutes of any meetings of the incorporators, board of directors, and/or any executive committee that discuss the formation of the REIT and RHC or the transfer of assets to the REIT.

- Please identify all directors, officers, or trustees of the REIT and their relationship to the parent or other affiliates.

- Identify all employees of the REIT and provide their job description. If any of them are contemporaneously engaged by an affiliated company as either an employee, director, or officer, please state the same.

- Provide all minutes of any meetings of the board of directors and/or any executive committee of the parent corporation, REIT, or RHC concerning the declaration of dividends for REIT common and preferred shares.

- Provide a copy of the REIT's annual report and audited financial statements.

2. Please provide the following documents and **information about preferred and common shares issued by the REIT** for each year in the audit period unless otherwise requested:

- Describe the nature of the consideration received by the REIT for the preferred and common shares. Provide a copy of any written offers made to individual shareholders.

- Describe the rights obtained by each shareholder and any restrictions on transfer of ownership. Provide copies of any shareholders agreements.

- Identify the common and preferred shareholders of the REIT and state whether they were employed by or otherwise affiliated with the parent or its subsidiaries.

3. Please provide the following documents and information about the assets held by the REIT for each year in the audit period unless otherwise requested:

- List the assets owned by the REIT.

- List the holders of real estate mortgages in which the REIT owns an interest and the REIT's percentage interest in each.

- Did the REIT purchase loan participation interests from a related company? If yes, what was the nature of consideration paid by the REIT? Provide copies of any loan participation agreements.

- Describe in detail the process by which loan participation interests were identified for transfer to the REIT. Identify the individuals who made the decision to transfer the loan participations to the REIT.

- Did the REIT purchase loan participation interests from an unrelated third company? If yes, what was the nature of consideration paid by the REIT?

- Which entity managed the assets owned by the REIT?

- Which entity prepared the REIT's journal entries, financial statements, and tax returns?

4. Provide the following documents and **information about income and expenses reported in the REIT's federal income tax return** (Form 1120-REIT) for each year in the audit period unless otherwise requested.

- Describe all of the REIT's sources of income from related and unrelated parties.

- Describe any and all services provided to the REIT, including the identity of the service provider(s) and the service provider(s)'s relationship to the REIT. Include copies of service agreements.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- State the amount of consideration paid by the REIT for each of the services described in the preceding information request.

- State the amount of REIT distributions paid to each shareholder and list dates of distribution. Include copies of Forms 1099-DIV issued to each shareholder.

5. Provide the following documents and **information about the REIT's cash management system** for each year in the audit period unless otherwise requested:

- Provide a Statement of Cash Flows, which summarizes operating activities, investing activities, and financing activities.

- Who is responsible for making decisions concerning the REIT's operating cash flows? Specifically:

    - Cash Inflows - collections from customers, collection of interest and dividends, and collections of other operating receipts.

    - Cash Outflows – payments to suppliers, payments to employees, payment of interest, payment of taxes, other operating cash payments.

- Who is responsible for making decisions concerning the REIT's investing activities? Specifically:

    - Cash Inflows – sale of assets.

    - Cash Outflows – purchase of assets.

- Who is responsible for making decisions concerning the REIT's financing activities? Specifically:

    - Cash Inflows – borrowing cash from creditors and issuing shares of the REIT.

    - Cash Outflows – repayment of creditors, repurchase of REIT shares, and payment of dividends.

- How often did the REIT record loan participation interest income on its financial statements: daily, weekly, monthly, or annually?

- When the REIT recorded loan participation interest income on its financial statements, did it register an account receivable or cash? What percentage

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

of loan participation interest income was recorded as an account receivable and what percentage was recorded as cash?

- How often was cash transferred from the parent company to the REIT: daily, weekly, monthly, quarterly, or annually?

- How often was cash transferred from the REIT to the RHC: daily, weekly, monthly, quarterly, or annually?

- When the REIT receives cash, is it deposited into a central cash management system for the affiliated group, or into a separate bank account maintained by the REIT?

- How much time elapses between the receipt of cash by the REIT and the disbursement of that cash as payment to a related company for a loan participating interest or a cash dividend on common or preferred shares?

B. EXHIBIT 2 – LEGISLATIVE HISTORY

1. INITIAL 404 ADJUSTMENTS

The Audit Bureau started to slowly assert the authority to make the 404 adjustments in the late 1980s after approval and promised support from the Director. Initially, Audit restricted its pursuit to transactions between companies that were part of the same federal consolidated group, but under a different unitary group for Illinois purposes, since the transactions might not have been arm's length in nature. The first adjustments went after interest-free or minimal-interest loans between affiliated companies of separate unitary groups. As time passed, many of the 404 adjustments approved were for what would eventually be remedied by the 80/20 add-back modifications.

IITA § 404 Reallocation of Items originally contained only subsection (a) which states:

> (a) If it appears to the Director that any agreement, understanding or arrangement exists between any persons which causes any person's base income allocable to this State to be improperly or inaccurately reflected, the Director may adjust such items of income and deduction, and any factor taken into account in allocating income to this State, to such extent as may reasonably be required to determine the base income of such person properly allocable to this State.

Effective August 29, 2008, P.A. 95-0948 added subsection (b) to IITA § 404 which states:

> (b) The Director may not make an adjustment to base income under this Section that has the same effect as retroactively applying any amendments to this Act made by P.A. 93-0840, P.A. 95-0233, or P.A. 95-0707.

2. IMPACT OF P.A. 95-0948

In 2004, the Legislature attempted to close a number of tax loopholes by enacting P.A. 93-0840, which required the add-back of deductions for interest and intangible expenses paid to a person who would be a member of the same unitary business group as the taxpayer if not for the 80/20 test. The new provisions are implemented on Schedule 80/20 Related Party Expenses and are effective for tax years ending on or after December 31, 2004. P.A. 93-0840 contained language expressly stating that it did not preclude adjustments under IITA § 404 for years after its effective date, providing that those adjustments were made pursuant to regulations.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In 2007, the Legislature passed P.A. 95-0233 as amended by P.A. 95-0707, which expanded the use of the Schedule 80/20 form to include:

- interest and royalty payments made to domestic companies that apportion under different subsections of IITA § 304 (noncombination rule companies),
- premiums paid to captive insurance companies for tax years ending on or after December 31, 2008, and
- dividend payments made by a real estate investment trust (REIT) starting for tax years ending on or after December 31, 2009.

IAC § 100.2430 was amended effective January 23, 2009, for these new provisions.

For tax years prior to the effective date of P.A. 93-0840, the Department sometimes asserted its authority under Section 404 to close the same loopholes that the Legislature intended to close with the above acts. In effect, the Department was using Section 404 to apply certain provisions of Schedule 80/20 prior to its effective date, and doing so without regulations. Some taxpayers argued that these actions were contrary to P.A. 93-0840, and P.A. 95-0948 was enacted to clarify that the Department lacks authority to use Section 404 to make adjustments in situations similar to those addressed in P.A. 93-0840 and P.A. 95-0233 in years prior to their enactment.

3. EXPLANATION AND DIRECTION FOR 404 AUDITS GOING FORWARD

Under P.A. 95-0948, effective August 29, 2008, the Department cannot make any Section 404 adjustments to base income which would have the same effect as retroactively applying the add-back provisions which were added to the Illinois Income Tax Act by P.A. 93-0840, 95-0233 or 95-0707. The add-back provisions involve modifications for interest, royalties and other intangibles paid to an 80/20 company (added by P.A. 93-0840) or to a company which is excluded from the combined return due to the noncombination rule (added by P.A. 95-0233) and dividends paid by real estate investment trusts (REITs) (added by P.A. 95-0233 and P.A. 95-0707).

4. IMPACT OF P.A. 100-22

Effective July 6, 2017, P.A. 100-22 modified the unitary business group (UBG) definition in IITA § 1501(a)(27)(B). It repealed the noncombination rule and expanded the definition of “United States” to include the outer continental shelf (OCS) for taxable years ending on or after December 31, 2017. This is a major adjustment to how auditors determine the UBG and combined apportionment, and

This manual is not a statement of Department policy. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

eliminates the related-party expense modifications for noncombination companies for the applicable tax periods. Due to intercompany eliminations, many transactions that required 404 adjustments between unitary domestic companies should not be necessary for the applicable periods.

For more information, see Audit Manual Chapters 23 for UBGs, 24 & 25 for modifications, and 27 for apportionment.

B. Amended Forms Available

The appropriate form prescribed by regulation:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

IL-1040-X	Amended Individual Income Tax Return (for tax years ending 2007 or earlier use the 10/08 revision of Form IL-1040-X. For tax years 2008 or after use the Form IL-1040-X for the year you are amending.)
IL-1120-X	Amended Corporation Income & Replacement Tax Return (for a tax year ending on or after December 31, 1986. For tax year ending prior to December 31, 1986 use IL-1120-X-PY.)
IL-1041-X	Amended Fiduciary Income & Replacement Tax Return (for a tax year ending on or after December 31, 2007)
Il-1065-X	Amended Partnership Replacement Tax Return (for a tax year ending on or after December 31, 2006)
IL-1120-ST-X	Amended Small Business Corporation Replacement Tax Return (for a tax year ending on or after December 31, 2006)
IL-990-T-X	Amended Exempt Organization Income & Replacement Tax Return (for a tax year ending on or after December 31, 2007)
IL-941-X	Amended Illinois Withholding Income Tax Return
IL-1023-C-X	Amended Composite Income and Replacement Tax Return (for a tax year ending on or after December 31, 2007 through December 31, 2013)
IL-1000-X	Amended Pass-Through Entity Payment Income Tax Return (for a tax year ending on or after December 31, 2008 through December 31, 2013) **Per instructions on the IL-1000-X, claims for refunds for payments made that were reported (or should have been reported) to partners, shareholders, or beneficiaries as amounts paid on their behalf cannot be processed on this form. The partners, shareholders, or beneficiaries must claim these amounts on their own tax returns.

(For tax years ending prior to those noted above for IL-1041-X, IL-1065-X, IL-1120-ST-X, IL-990-T-X and IL-1023-C-X, use Form IL-843, Amended Return or Notice of Change in Income)

The above forms are valid for overpayments based on federal changes, payment of a tentative carryback adjustment and Illinois changes.

IV. APE SPECIFIC LAW APPLICATIONS

An amended return is filed to report changes to a previously filed, processable return. The changes can occur from a state or federal change that affects items used to compute Illinois net income, net loss or credits such as:

- Amendment of a federal income tax return
- An adjustment made by the IRS
- Any other recomputation or redetermination

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

A. Amended Return Handling

There are specific sections of the Illinois Income Tax Act that must be followed in the handling of amended returns contingent on whether the return reports additional tax due or an overpayment. If amended returns are filed reporting additional tax due and the liability is not fully paid, IITA §§ 902, 903 or 905(e) dictate when the statute expires for either issuing a notice of deficiency or notice and demand, contingent on the situation. The time period for issuing a notice and demand cannot be extended with a waiver of the statute of limitations. Also, a notice of lien must be filed within 3 years of assessment date, which is the date the amended return is filed or the IL-870 is signed (IITA § 1101(d)).

Amended returns are received by the Department reporting federal changes, carrying back losses, correcting errors on the returns, reversing adjustments from a completed audit, etc. They report additional tax due, claim a refund of tax paid or change some part of the return with no tax effect. If the amended returns cannot be verified by the Account Processing Bureau, they are forwarded to Audit Planning for determination on how to handle. Refer to Chapter 20 Income Tax Audit Procedure.

Amended returns claiming refunds are on occasion processed and the refunds issued prior to referral for verification. The refund is issued to limit the amount of interest paid to the taxpayer on the refund. These types of amended returns may be assigned as paid claim verification. If all or part of the refund is erroneous, the statute for erroneous refunds will apply (IITA § 912).

The auditor could receive large numbers of amended returns with some reporting overpayments and some reporting underpayments with a net overpayment or net balance due which may or may not be fully paid. Amended returns could be received from the taxpayer reporting RAR changes or carrying losses regarding periods for which the audit is still under appeal in Administrative Hearings, Tax Tribunal or Circuit Court.

1. Statute of Limitations

Refer to Chapter 21 Due Dates/Extensions/Statute Control.

The statutes of limitations never prevent the Department or the taxpayer from correctly computing any item of income, deduction, addition, subtraction, credits or payments for a taxable year. They only prevent one party from forcing the other party to make a payment.

2. Amended Returns Filed by the Taxpayer

At times, the taxpayer may file one or more amended returns for the years being audited. It is important for the auditor to be aware of any amended returns which have been filed since they will have to be incorporated into the audit file. Failure to

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

incorporate the amended returns may result in the audit being returned from Technical Review.

Once an audit has been assigned, the auditor should periodically check GenTax for work items related to the years that may impact the audit period. This check is necessary to determine if there have been amended returns attached to the audit for the years involved. Refer to Chapter 20 Income Tax Audit Procedure for more information.

For audit purposes, the processing of amended returns can fall into one of two categories.

a) Amended Returns Received by Account Processing

When Account Processing receives an amended return a work item is created in GenTax. If there is an audit indicator on the account, the hard copy of the return will be forwarded to Income Tax Audit Planning. Audit Planning will then contact either the Field Supervisor and/or the Auditor assigned to the audit and check on the audit progress. If the audit is in the early stages, the amended returns will be added to the current audit as attachments in GenTax. If the audit is in the final stages, a "new" audit will be created showing the attached amended returns.

Discovery-
Do not order work item before Planning receives it from Processing. Clerical will take to Planning and then it will be forwarded to the assigned auditor.

Refer to Chapter 20 Income Tax Audit Procedure, Reviewing Tax Returns for Column A Determination, Addressing Work Items (Section IV.C.1) for procedures.

b) Amended Returns Received by the Auditor

When an auditor receives amended returns from the taxpayer during an audit, any amended return that affects the audit period will be included in that audit. These amended returns should then be mailed to Income Tax Audit Planning where they will be scanned and added to the audit as attachments in GenTax. A file folder is created to hold these amended returns and sent to Files for storage.

3. Initial Review and Perfecting of Amended Returns

The following is a list of steps that should be taken when examining amended returns:

1. Verify that each amended return is signed by an authorized person.

   If not signed, return to taxpayer immediately for signature. Without information to the contrary, we presume the person who signs the return is authorized to do so pursuant to IITA § 503. Each return should also be dated by the taxpayer. The

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

auditor should inform the taxpayer of the amount of time left before the statute expires.

Cases where amended returns were received and not handled immediately have caused many problems. When the auditor reviewed them and discovered that they were not signed, the statute for amending the return had expired. Cases like this are not good for taxpayer relations.

2. Verify that each amended return downfoots correctly

   This can be accomplished by data-entering the amounts from the most recently filed or adjusted return for the year as reflected in GenTax in Column A of the Auditor's Report. The "As Corrected" line amounts should be entered in Column C of the Auditor's Report. If the amended return was properly completed, Column B of the Auditor's Report should match the reported changes. If the amended return downfoots and shows the correct amount of additional tax due, it can be processed under normal procedures with the audit file.

3. Confirm that the amended return does not contain any miscalculations, entries on wrong lines, or other obvious inaccuracies.

   Have the taxpayer make the necessary corrections to the amended return before you accept it. Verify that all the required schedules and supporting documentation are attached to the amended returns.

4. Verify that each amended return claiming a refund is filed within the statutory period.

   All amended returns claiming an overpayment should be analyzed to determine if they have been filed within the statutory period. Refer to Chapter 21 Due Dates/Extensions/Statutory Control. If the statute of limitation has expired for filing a claim for refund, the auditor should request that the taxpayer withdraw the original claim for refund by signing an EDA-153. If they will not, the amended return should be submitted with the audit file for the issuance of a formal claim denial.

5. Verify that each amended return reporting additional tax due is fully paid. If not, check to determine if the statute for issuing a notice and demand for payment has expired.

   - If a payment for the total liability, including tax, interest and applicable penalty, is remitted with the amended return, a Notice and Demand is not required.

   - If all of the tax, penalty and/or interest is not paid, the auditor should determine if the statute has expired for issuing a notice and demand for

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

payment. If the statute for issuing the Notice and Demand has not expired, refer to Notice and Demand Procedure for processing instructions. Refer to Chapter 21 Due Dates/Extensions/Statutory Control for determining Notice and Demand limitations.

6. Frequently, a change will encompass multiple tax years, and result in amended returns reporting both overpayments and underpayments. Refer to Chapter 42 Penalty and Interest, Offsets Between Years on how to process audits including tax years with underpayments and overpayments.

   Amounts offset between APEs not on the same IL-870 can only be offset at the discretion of the Department. A taxpayer who files multiple amended returns and offsets overpayments against underpayments without prior consent of the Department is not entitled to abatement of any penalty or interest that results from the Department's failure to comply with the request. If you agree to the taxpayer's request to offset in this situation, your consent should be noted in the auditor's comments.

7. Amended returns received from the taxpayer by the Field Auditor are considered officially filed when received by the auditor, since the Field Auditor is an agent of the Department. After perfecting the return, write "Received by IDOR" along with the date and the auditor's initials on the front page at the top right hand corner of each "original" and on the taxpayer's file copy. This is a very important step for statutory control purposes.

8. Keep a complete copy of the amended return(s) for the audit file. The auditor will work from this retained copy to verify line items and ensure the changes were properly reported on the amended return(s).

4. GenTax Information

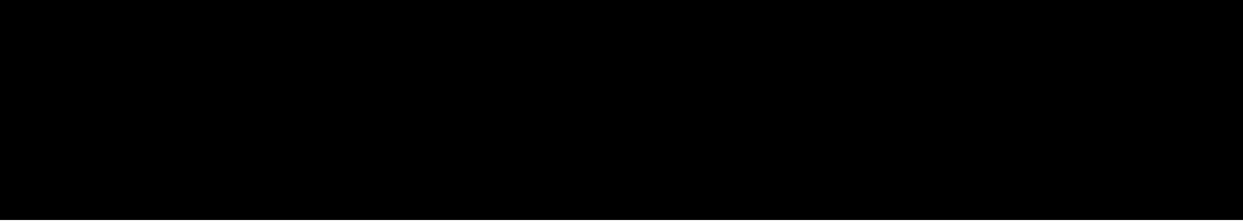
Amended Return Indicators

There may be information on GenTax indicating that amended returns require processing in the audit. An auditor should look at the Audit Springboard to search for key information pertaining to amended returns.

At the bottom of the Audit Springboard is the **TASK** tab. If amended returns are described in this field, they are to be addressed for possible inclusion in the audit.

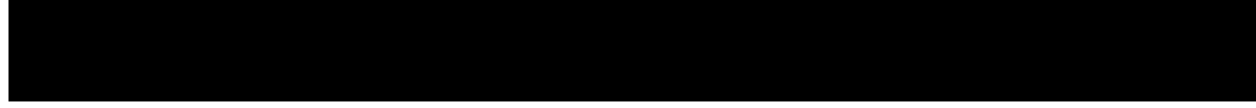
This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The auditor should also check for attachments in the **ATTACHMENTS** tab located under the **CRM** tab on the Audit Springboard. Select **ATTACHMENTS** to see if amended returns (or other important information) are displayed. Select the blue hyperlink, to view the attachment.



Then Select the **View File** tab or the blue hyperlink under History.

A box will then appear allowing you to Open or Save the file.



Once opened, the return can be printed to put in the audit file.

Amended returns are also referenced in **NOTES** located under the **CRM** tab on the Audit Springboard.

Additional information (attachments) could be present stating that the amended return has NOT been processed. Therefore, the return will not show on GenTax at the Return level, but such a return would be included as part of the audit.

Occasionally an amended return is so recent, or somehow has not yet been referred to Audit Planning, that information may not be found on the Audit Springboard. Audit Planning staff is responsible for entering the Description info and for scanning returns to create Attachments when unprocessed returns are referred to Audit.

One last clue that an amended return may exist is when another payment appears in the detail of transactions for any APE. This payment may represent the presence of an amended return.

The auditor should also look for **Work Items** on GenTax to see if these require addressing in the audit. Refer to Chapter 20 Income Tax Audit Procedure, Addressing Work Items.

5. Amended Return was not Properly Completed and Cannot be Processed as Filed.

a) Column A amounts on the Amended Return do not match Department records of return line items as last reported on or adjusted in GenTax.

This might occur:

i. if the original return contained a “math error” that was corrected during processing, but not reflected on the amended return; or

ii. if the taxpayer was previously audited by the Department, but the amended return starts with line entries from the original return instead of the audited amounts.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

In either case, it will be necessary to prepare an Auditor's Report starting with GenTax line amounts (i.e., Department records as last reported or adjusted) in Column A. Enter the reported changes in Column B. If the additional tax on the Auditor's Report matches the additional tax liability on the amended return, the correct statutory deficiency was self-assessed. Then, the Auditor's Report will serve as the processing document for the changes. Attach the Auditor's Report to the front of the amended return and write at the top "*For Processing Purposes only – Refer to amended return for taxpayer signature*".

However, if the results in Column C produce tax due or overpaid in addition to the tax shown on the amended return, only the difference between the statutory deficiency (Column B of the Auditor's Report) and the tax amount that was previously self-assessed on the amended return will be entered on Form IL-870. Form EDA-122 Notice of Proposed Deficiency must be issued with Form ICB-1. Remember to record additional tax resulting from RARs separately from other audit adjustments on the PROD-1. For federal changes where a Notice of Deficiency is required and the statute of limitations on the original return has already expired, the Notice of Deficiency must be issued within two years from the date the amended return was filed (IITA § 905(e)), and the amount of the deficiency is limited to the additional tax resulting from the federal changes.

b) Amended Return is Filed for a Tax Year with an Unagreed Audit that is Currently under the Jurisdiction of ICB, Administrative Hearings, Tax Tribunal or in Circuit Court.

Planning will notify the ICB conferee or the litigator in Administrative Hearings/Tax Tribunal/ Circuit Court that amended returns have been filed for a tax period under their jurisdiction. Since Column A of the amended return will probably not reflect the line amounts from Column C of the unagreed Auditor's Report, the amended return will most likely not be processable. Contingent on which audit issue(s) were not agreed, it may or may not calculate the true additional tax liability resulting from the changes. The auditor will prepare an Auditor's Report to compute the taxpayer's correct liability resulting from the changes. The previously audited figures from Column C of the unagreed Auditor's Report will be entered as the starting point in Column A of the Auditor's Report. (Refer to Chapter 20 Income Tax Audit Procedure on how to obtain figures from unagreed Auditor's Reports.) The reported changes from the amended return will be reflected in Column B. If the statutory deficiency on the Auditor's Report matches the increase in tax on the amended return, the correct additional tax was self-assessed on the amended return and a Notice of Deficiency will not be required.

If Column C results in tax due or overpaid in addition to the tax shown on the amended return, only the difference between the statutory deficiency (Column B of the Auditor's Report) and the tax amount that was previously assessed on the amended return will be entered on Form IL-870. Form EDA-122 Notice of Proposed

Deficiency must be issued with Form ICB-1. Remember to record the additional tax resulting from RARs separately on the PROD-1. For federal changes where a Notice of Deficiency is required and the statute of limitations on the original return has expired, the Notice of Deficiency is limited to the additional tax resulting from the federal changes. The Notice of Deficiency must be issued within two years from the date the amended return was filed (IITA § 905(e)). If the audit is currently in Administrative Hearings or Tax Tribunal on protest of a prior Notice of Deficiency, IITA § 906 prohibits the issuance of an additional Notice of Deficiency unless it is issued before the Administrative Hearing or Tax Tribunal decision becomes final. Consult with the litigator assigned to the case about issuing the Notice of Deficiency.

6. Notice and Demand Procedure

If the auditor determines that a manual Notice and Demand is required, the amended return must be referred to the Audit Perfection supervisor. If the amended returns are the subject of the entire audit and no further work is required by the auditor, the case should be closed as an admitted liability or admitted liability/paid and submitted to the Supervisor for review. The auditor and supervisor should make sure that a note is attached to the outside of the track folder that states “NOTICE AND DEMAND STATUTE RUNNING” (if less than 6 months remain) with the date the statute will run prominently displayed. The file should be tracked to Audit Perfection, Attention: Supervisor. These cases will be handled on a priority basis so that the notice and demand is issued on time.

If the audit is not near completion but a notice and demand must be issued to protect the admitted liability statute (IITA § 903) of amended returns, the auditor must do the following:

a. Obtain a new audit track for the amended return from Audit Planning. Transmit the amended return and supporting documentation to Audit Perfection, Attention: Supervisor. Prominently display the statute date and the words “NOTICE AND DEMAND STATUTE RUNNING” on the outside of the folder. The auditor should keep a copy of the amended return and any documentation sent to Audit Perfection for the file. Update the EDC-5 to reflect that the amended return(s) were sent to Springfield for processing.

b. If necessary, prepare an Auditor’s Report listing the correct numbers in Column A, the changes in Column B and corrected amounts in Column C. Compare those results with the amended return. If the amount of additional tax due agrees with the amount reported on the IL-1120-X, attach the Auditor’s Report to the amended return with a note instructing the adjuster to process the Auditor’s Report. A Notice and Demand can only be issued for the admitted liability. Therefore, the additional tax due reported by the taxpayer must agree with the additional tax calculated on the Auditor’s Report.

c. If the auditor determines that the amended return is correct as filed, an Auditor's Report is not required. A note should be attached informing Audit Perfection to process the amended return as filed and issue a Notice and Demand.

d. Once the amended return is adjusted in the system, Audit Perfection personnel should send an email to the auditor informing them of the adjustments.

e. If claims are going to be processed first, but there are errors on the claims, the auditor will have to perfect the claims. Refer to Initial Review and Perfecting of Amended Returns.

B. Amended Returns Reporting Federal Changes

A federal change may result from:

- An IRS adjustment to the taxpayer's federal return
- An IRS audit examination (RAR)
- The taxpayer filing a federal amended return that has been accepted by the IRS

IITA § 506(b) discusses federal changes and requires taxpayers to notify the Department of such changes by filing an amended return within 120 days after the change is finalized (agreed to, or finally determined) with the IRS. When the federal change results in an overpayment, IITA § 911(b) allows a refund claim to be filed for the overpayment that results from the federal change at any time within 2 years after the federal change notification is due.

Acceptable Proof of Federal Finalization includes, but is not limited to the following:

- Copy of a refund check received from the IRS
- Account transcript from the IRS or examiner's report
- IRS Letter 525 – Examination Report
- Form 886-A, *Explanation of Items* – used in all unagreed cases (optional for agreed cases). Form 886-A is an attachment to formal RAR.

Revenue Agent Report (RAR)

- Form 4549, *Income Tax Examination Changes* – for agreed cases for individuals and corporations
- Form 4549-A, *Income Tax Examination Changes (Unagreed and Excepted Agreed)* – for individual and corporation income tax cases. (NOTE: This form does not require the taxpayer's signature for consent to assessment and collection.)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Form 4605, *Examination Changes – Partnerships, Fiduciaries, S Corps, &Interest Charge Domestic International Sales Corporations* – for reporting examination changes in partnerships, fiduciaries, small business corporations and domestic international sales corporations.

- Form 4605-A, *Examination Changes – Partnerships, Fiduciaries, Small Business Corps. & Domestic Intl Sales Corp (Unagreed and Excepted Agreed)* – for unagreed and excepted agreed cases for partnerships, fiduciaries, small business corporations and domestic international sales corporations.

- Form 870, *Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment*.

Unacceptable Proof of Federal Finalization:

- Issue Resolution Agreement (IRA) – The IRA is issued during the Compliance Assurance Process (CAP). The form identifies tax issues prior to the filing of a return.

- Closing Letter – The Closing Letter is issued under The Mutual Agreement Procedure (MAP). Recommendations made in a closing letter will either be addressed in an amended return or included in the current years return. If an amended return is prepared, the normal post-filing examination procedures would apply.

A federal change opens a new statute of limitations period in Illinois for a tax year, even if the federal change is made too late for a federal deficiency to be assessed for the tax year. *Peoria and Pekin Union Railway Co. v. IDOR*, 301 Ill.App.3d.736 (1999).

The following procedures are to be followed when a taxpayer informs the auditor of a federal change that has been finalized with the IRS but has not yet been reported to the Department.

1. For Illinois purposes, the taxpayer is obligated to report the federal change, whether or not it creates a change in Illinois income tax liability.

2. The auditor should not accept the RAR or related summary workpapers. Instead the auditor should ask the taxpayer to report the federal change on the appropriate amended Illinois return. The auditor does not prepare the amended return. Notification as required under IITA § 506(b) occurs when the taxpayer files an Illinois amended return to report finalized federal changes. IAC § 100.9400(f)(6) expressly specifies the amended returns that refund claims must be filed on. **The federal change is considered unreported if no amended return has been filed**. When a federal change is unreported, a Notice of Deficiency (NOD) may be issued at any time (IITA § 905(d)).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. The taxpayer should give the amended return(s) directly to the auditor to expedite handling. A return is considered officially filed with the Department on the date it is presented to an auditor because he/she acts as an agent of the Department. The two-year statute of limitations to issue a Notice of Deficiency also commences to run on the “received date” of the return (IITA § 905(e)). An executed Form IL-872 may be obtained to extend the statute of limitations on a federal RAR, if necessary.

4. The auditor must “perfect” each amended return upon receipt. Refer to Initial Review and Perfecting of Amended Returns.

5. After perfecting the return, send the amended return(s) (taxpayer’s original signature affixed) with the attached remittance and a cover sheet to the appropriate section. (Refer to General Information section.) In addition, send the appropriate designee an email identifying the audit GenTax ID and list each of the documents by tax year. The email can be printed to serve as a cover sheet. A confirmation email will be returned to the auditor to acknowledge receipt. Refer to Chapter 20 Income Tax Audit Procedure, General Shipping/Mailing Procedures.

6. Payments will be posted to the taxpayer’s GenTax account. The amended returns will be visible on the Audit Springboard under “Attachments” after they are scanned into GenTax. The original document will be case filed and sent to Taxpayer Records for storage to comply with records retention requirement. **No amended return of any type that contains a taxpayer’s original signature should be left in an audit file under any circumstances**.

7. Each amended return for the audit period must be worked as a part of your audit assignment. Auditors must analyze each federal adjustment and its detailed explanation to ensure that all federal changes that impact the Illinois return were properly accounted for on the amended return. Be sure to focus on any federal adjustments that may impact any capital loss, an Illinois net loss (including both the loss year and the carry years), modification, apportionment, Illinois tax credits, etc.

8. Each amended return must be verified and either accepted as filed or adjusted as necessary. That also includes amended returns showing no tax change. If a claim was filed, the auditor must approve the refund in total, deny it or partially reduce it to reflect the allowable portion of the claim. The claim can also be withdrawn in writing by the taxpayer.

9. Examination technique, exceptions noted, and any adjustments made to the amended return must be fully explained in the Auditor’s Comments.

10. If the federal change encompasses tax years within or adjoining your audit assignment, the period can be expanded to include those tax years with your current audit. Be cognizant of the statute of limitations issues and prepare any necessary Form IL-872.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Discuss the matter with the RAS, who will approve and make the necessary changes to the period and statute on GenTax.

11. If the federal change year(s) is outside of the audit period or involves tax years preceding the audit period, complete Form SC-137 to request a new assignment.

1. Federal RAR Amended Return Examples

The following procedures apply if the amended return self-assessed an additional tax liability resulting from federal changes.

- **If the amended return can be processed as filed** and additional audit adjustments are required, the starting point for Column A of the Auditor's Report will begin with line amounts from the "As Corrected" column of the amended return. Necessary corrections to (or omissions of) federal changes reported on the amended return, along with audit adjustments, will be entered in Column B of the Auditor's Report.

- **If federal changes were underreported on the amended return**, line amounts from the "As Corrected" column of the amended return will be entered as Column A of the Auditor's Report. Any necessary corrections to the reported changes will be shown with other audit adjustments in Column B of the Auditor's Report. An IL-870 showing the statutory deficiency must be signed by the taxpayer to assess the additional tax and any applicable late payment penalty resulting from corrections to the federal change.

  Form EDA-122 Notice of Proposed Deficiency must be issued with Form ICB-1. Remember to record the additional tax resulting from the RAR separately on the PROD-1.

- **If the amended return incorrectly assessed more tax than was actually due**, the tax amount that was overassessed will be shown on Form IL-870 as a statutory decrease (if there are no other changes in the audit). Since this represents a reduction to the additional liability on the amended return but not a claim filed by the taxpayer, no proposed notice will be issued. If the total liability on the amended return remains overpaid after adjustments, the excess remittance can be applied to offset the liabilities for other tax years in the audit period, or refunded to the taxpayer after the audit is processed.

If the federal change produces a refund, confirm that the amended return was filed within the statutory period (2 years and 120 days of the IRS finalization date). If it was timely filed, the audit can be completed in a normal manner. Examine the federal changes to verify that all adjustments were properly reported. If it was filed after the statute had already expired, the claim will be totally denied. Select the situation below that is applicable to the audit and follow the process.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- **If the claim is totally allowable and approved by the auditor with no other audit adjustments**, the taxpayer's amended return will be processed as filed. No Auditor's Report or Form IL-870 will be prepared. The overpayment can be utilized to offset liabilities in other years in the audit period or refunded.

- **When issues reported on the taxpayer's claim are correct but other audit adjustments increase the tax liability**, the auditor must prepare an Auditor's Report to determine the correct amount that is overpaid and refundable to the taxpayer. Column A of the Auditor's Report will start with GenTax line items as last adjusted. The issues reported on the claim and the audit adjustments will be shown in Column B. The tax overpayment in Column C of the Auditor's Report reflects the allowable portion of the claim. The Auditor's Report is the processing document. The taxpayer's claim will not be processed because the auditor determined that the taxpayer is entitled to a lesser refund. Attach the Auditor's Report to the front of the amended return and write at the top "*For Processing Purposes – Claim Reduced".*

- **If the taxpayer agrees with the partial denial**, the auditor will prepare an EDA-153 for the taxpayer's signature. The EDA-153 will show the original amount of refund claimed, the amount of refund disallowed and the amount of refund allowed. Note: It is preferred that the taxpayer agrees with the partial denial of the claim rather than have the taxpayer withdraw the unallowable portion.

  Example: Taxpayer filed an amended return on 9/27/2007 to report a finalized RAR for the 2003 calendar year, claiming a refund of $100,000. The issues on the claim were allowable, but the auditor made adjustments that established additional tax of $25,000. The EDA-153 will show $100,000 as the amount of refund claimed, $25,000 as amount of refund disallowed and $75,000 as amount of refund allowed.

- **If the taxpayer disagrees with the partial denial of the claim**, the auditor will prepare a Notice of Proposed Claim Denial (EDA-125-I) to apprise the taxpayer of ICB rights, which the taxpayer can then exercise or await the formal Notice of Claim Denial (NOCD). For information on the ICB forms and procedures, refer to Chapter 20 Income Tax Audit Procedure.

- **If the claim is partially denied**, the Auditor's Report will reflect the allowable portion of the claim for refund. Column A of the Auditor's Report will start with GenTax line items as last adjusted, and the allowable adjustments will be shown in Column B. **If the taxpayer agrees with the partial denial**, the auditor will prepare EDA-153 for the taxpayer's signature. Note: It is preferred that the taxpayer agrees with the partial denial of the claim rather than have the taxpayer withdraw the unallowable portion.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- **If the claim for refund is denied in full,** no Auditor's Report is required. **If agreed**, the taxpayer may formally withdraw the claim in writing that specifically identifies the claim's tax year, dollar amount and the date it was filed. Alternatively, the auditor could prepare EDA-153 for the taxpayer's signature.

- **If the taxpayer disagrees with the claim denial**, the auditor will prepare a Notice of Proposed Claim Denial (EDA-125) to apprise the taxpayer of ICB rights, which the taxpayer may then choose to exercise or file a written protest after the formal Notice of Claim Denial is issued. For information on the ICB forms and procedures, refer to Chapter 20 Income Tax Audit Procedure.

If an additional liability (that exceeds the allowable claim amount) is established for the same tax year, the auditor will issue Notice of Proposed Tax Liability and Claim Denial (Form EDA-124) to apprise the taxpayer of ICB rights if the audit findings are unagreed. **If the taxpayer agrees**, the auditor will prepare an EDA-153.

If the federal changes and/or the tax liability were overstated on the amended return, a couple of options exist. The auditor, however, must be cognizant of the statute of limitations for filing a claim for refund. If the statute has not expired and the date of overpayment will not be impacted, the taxpayer may withdraw the initial amended return in writing and file a revised claim. If the statute has not expired but the withdrawal will change the date of overpayment, obtain a subsequent amended return from the taxpayer (beginning with Column C of the first amended return) showing only the difference between the amounts previously reported and the corrected amounts in Column B. Or, you can prepare an Auditor's Report showing the proper corrections and the change in tax liability on Form IL-870. If the statute has lapsed, the out of statute overpayment can only be used to offset an additional liability in the same tax year.

C. Amended Returns Reporting an Underpayment

Amended returns self-assessing additional tax

The amount of tax due could be correct but the amended return is not properly completed. If the period does not have an unagreed audit pending in Administrative Hearings, Tax Tribunal or Circuit Court, the auditor should prepare an Auditor's Report using the as filed figures from GenTax for Column A in order to determine the correct tax due. The change as reported by the taxpayer will go in Column B with the corrected figures in Column C.

The procedure to follow in processing the amended return will be contingent on the outcome:

a. Correct Tax Self Assessed

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Liability fully paid – If the correct tax is self-assessed and the tax, any applicable penalty and interest is fully paid, the amended return can be processed when the audit is completed in the normal manner.

Partial Payment or no payment received – If the correct tax is self-assessed and a partial payment or no payment is received, a Notice and Demand for the unpaid tax, penalty and interest must be issued within 3 years of the amended return received date. Refer to Notice and Demand Procedure section.

b. Incorrect Tax Self Assessed – More Tax Due than Self-Assessed

Reported RAR Change – A Notice of Deficiency must be issued for the additional tax due within 2 years of the amended return received date and the amount of the proposed assessment must be limited to the amount resulting from the RAR change (IITA § 905(a)). The period for assessing the additional tax due as a result of the RAR change can be extended by a waiver. However, a Notice and Demand must be issued within 3 years of the received date for the self-assessed tax, penalty and interest (IITA § 902). Refer to Notice and Demand Procedure section.

If amended returns are received reporting RARs for original returns which are out of statute and have not been audited, the auditor may correct the original return before applying the RAR change. A notice of deficiency can only be issued for the portion of the liability resulting from the RAR change. However, the liability resulting from the correction of the return can be offset by any overpayments, credit or loss carryovers.

Other Changes – A Notice and Demand must be issued for the additional tax due resulting from a mathematical error (IITA § 1501(a)(12)) within 3 years of the amended return received date (IITA § 903). The Notice and Demand for the penalty and interest must also be issued within three years of the received date. Refer to Notice and Demand Procedure section.

c. Incorrect Tax Self-Assessed – Less tax due than self-assessed

Incorrect Liability Fully Paid – If the taxpayer paid the incorrect liability in full and is overpaid after the amended return is corrected, the amount overpaid can be applied to the audit liability, if any, or refunded to the taxpayer after the audit is processed. An IL-870 must be prepared detailing the amount overpaid and signed by the taxpayer.

Partially paid or No Payment received – A Notice and Demand must be issued for the correct additional liability due within 3 years of the received date of the amended return. Refer to Notice and Demand Procedure section.

D. Amended Returns Reporting an Overpayment (Claims)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Definition of Claim

A claim is a notice to the Department, in writing, in a form prescribed by regulation, stating the specific grounds on which it is founded, requesting reimbursement or credit of all or a portion of taxes paid in prior years because of a mistake, correction or a credit or loss that can decrease an earlier year's tax liability.
http://www.businessdictionary.com/definition/claim-for-refund.html

A timely filed claim can be reduced or totally disallowed at any time and for any reason even if the statute has subsequently expired. The Department has the authority to examine any item of income, modification, allocation or apportionment (including unitary filing and group composition), whether first reported on a claim or on the original return, to determine the return's accuracy. The objective is to reach the correct amount of tax due. Any redetermination of these items may be used to reduce the overpayment requested by the taxpayer. This position is based on the decision in the case of Lewis v. Reynolds, 284 U.S. 281, 52 S.Ct. 145 (1932). This same court case also permits the taxpayer to reduce or eliminate any liability that may be established.

When an audit involves the examination of a claim which has been filed by the taxpayer, the claim will either be:

- Approved (allowed in full),
- Partially denied,
- Fully denied, or
- the taxpayer can sign a letter withdrawing the claim.

In any of these cases, an additional liability may be proposed.

If the overpayment is correct as claimed on the amended return, the audit can be completed in a normal manner. The overpayment can be reduced by other issues in the same year, offset against liabilities in other years in the audit period or refunded.

If the claim for refund is reduced for any reason, the taxpayer must partially or completely withdraw the claim contingent on the circumstances or a notice of claim denial must be issued.

Three events can result in not allowing a claim as filed:

- Claim is not timely filed
- All or some of the adjustments on the claim are not allowable
- Column A of the claim does not match figures on GenTax

An original return does not constitute a refund claim under IITA § 909(d) and (e).
A claim for refund of an overpayment may be filed only if a return for the taxable year for which a refund is claimed has been filed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If a return showing a tax liability for the tax year has been filed and the tax paid, and the due date prescribed for filing the return has not passed, any refund claim filed before that date is made by filing an amended return marked “CORRECTED” showing the overpayment to be refunded. (IAC § 100.9400(f)(3))

Separate claims must be filed for each taxable year for which an income tax overpayment was made.

A premature or incomplete claim is not considered a refund claim. The Department will notify the taxpayer as soon as practicable of a premature, incomplete or defective claim so that a proper claim can be timely filed (if possible).

1. Received Date of Amended Return

The date a claim is received is important for statute of limitations and interest purposes.

If Audit Planning receives amended returns through the mail, the received date will be the postmark date on the envelope, if legible. REF: 5 ILCS 70/1.25. If not legible, the date that the claim was received in the Department’s mail room shall be prima facie evidence that the postmark date on the claim was 10 days prior to that date. (IAC § 100.9400(f)(2))

If a taxpayer “files” a claim with an auditor, the auditor should indicate the date received on the amended return and make a notation of the claim receipt and date on the EDC-5.

2. Department Responsibility

The Department must approve or deny (partially or completely) any claims received before the end of six months from the date the claim was filed. If the Department fails to approve or deny the claim within that time period, the taxpayer can file a written protest.

3. Limitations on Claims for Refund

Claims for refund must be filed not later than three years after the date the return was filed, or one year after the tax was paid, whichever is later.

a) Amount of Credit or Refund

(1) When a claim is filed within the 3-year period

Credit or refund shall not exceed the portion of the tax paid within the 3 year period, plus any extension of time for filing the return, immediately preceding the filing of the claim.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

(2) When claim is not filed within the 3-year period

Credit or refund shall not exceed the portion of the tax paid during the one year immediately preceding the filing of the claim.

(3) When claim relates to net loss carryback

IITA § 911(g) states that the limitations set on the amount of refund allowable under IITA § 911(d) will not apply in instances of a net loss carryback. This means that the amount of the refund allowable under IITA § 911(g) will not be limited to the amount of tax paid in the 3-year (plus period for extension of time to file return) or 1-year period immediately preceding the filing of the return.

4. Claim for Refund Based on Net Loss
IITA § 911(h)

Any amended returns received reporting a refund (overpayment), are to be handled as detailed in Initial Review and Perfecting of Amended Returns and also examined for changes to the Illinois net loss deduction. If an Illinois net loss deduction is created or has been increased the following procedures apply.

The loss year IL-1120 or IL-1120-X reporting the loss must be filed before an IL-1120-X for the carryforward year can be filed. A completed Illinois Schedule NLD or UB/NLD must be attached to the IL-1120-X.

a) Loss Years Ending on or After December 31, 2002

For audits that include Illinois net loss carryovers from tax years ending on or after December 31, 2002, the Illinois net losses can be adjusted without regard to IITA § 911(h). For loss years ending on or after December 31, 2002, including years that are closed to statute, Illinois net losses on GenTax can be adjusted for the following reasons:

- Federal taxable income changes
- Nonbusiness income and modification changes
- Apportionment changes
- Unitary group member changes (if the loss year is within statute)

Taxpayers can increase or decrease their loss year return at any time if the loss is being carried forward, but if the carryforward year is expired, then in order for the statute to reopen on the carry year for refund, the increased INL has to be from an RAR that was reported under IITA § 506(b) on an IL-1120-X within 2 years and 120 days of the RAR finalization date. If the carry year is expired, the INL can still be carried to offset a liability, including an audit liability in the carry year, but no refund will be allowed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example: For 2006 the taxpayer timely files an IL-1120 showing an INL of $10,000 and carries that loss to its 2007 IL-1120 to offset Illinois net income of $20,000. At the time the audit is started the 2006 return is out of statute but the 2007 return is in statute. The auditor examines both years and determines that the taxpayer actually should have reported an INL of $15,000 for 2006 and Illinois net income of $30,000 for 2007. Nothing in the statute prevents the auditor from preparing an IL-1120-X for 2006 and increasing the amount of the INL, and then carrying that loss to another year. Even if the taxpayer does not agree to the audit, the increased $5,000 in INL for 2006 will still be carried forward and used as an offset against the 2007 NOD.

Example: In June of 2011 an audit is started on ABC Corp for calendar years ending 2007 and 2008. The taxpayer was not previously audited. GenTax shows that for 2008 the taxpayer carried over an Illinois net loss in the amount of $8,000. After reviewing the taxpayer's filing history, the auditor discovers that 2005, 2006 and 2007 are non-filed although GenTax shows that $3,000 in estimated payments had been made for both 2006 and 2007. There is no extension for any of these years, so the general 3-year limitations period for refund claims had expired for 2005 and 2006 before the audit commenced and the limitations period for 2007 will expire on October 15, 2011 unless an extension agreement is executed. The auditor determines the following amounts for 2005 through 2008:

ABC CORP				
	Non-Filed	**Non-Filed**	**Non-Filed**	**Per GenTax**
Description	2005	2006	2007	2008
Federal taxable Income	-200,000	120,000	60,000	300,000
Net modifications	20,000	-30,000	10,000	-20,000
Base Income	-180,000	90,000	70,000	280,000
IL Factor	40.0%	40.0%	40.0%	40.0%
Net Income	(72,000)	36,000	28,000	112,000
INL carryover to 2006	36,000	(36,000)		
INL carryover to 2007	28,000		(28,000)	
INL carryover to 2008	8,000			(8,000)
Subject to Tax	0	0	0	104,000
7.3% tax	0	0	0	7,592
Estimated payments	0	3,000	3,000	5,000
Other payments	0	0	0	2,592
Total Payments	0	3,000	3,000	7,592

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Pending Refund	0	(3,000)	(3,000)	0

- The auditor will prepare an original IL-1120 for 2005, 2006 and 2007 showing the above figures.
- The 2005 INL must be carried to 2006, 2007 and 2008 and will offset any balance due in the carry years.
- No refund of the estimated payments will be permitted for 2006 or for 2007 unless an extension agreement for 2007 is executed prior to October 15, 2011.
- The auditor will indicate on the IL-1120 for 2006 and possibly 2007 that the refund of $3,000 for each year is out of statute.
- For 2008 the taxpayer gets only $8,000 of the 2005 INL, because the remaining amount must be carried to 2006 and 2007 even if no refund can be allowed.

  Note: If there is a future underpayment from an RAR in 2006 and 2007, the $3,000 in estimated payments may be used to offset any additional liability for those years.

b) Loss Years Ending Prior to December 31, 2002

On and after August 23, 2002, no claim for refund shall be allowed to the extent the refund is the result of an amount of net loss incurred in any taxable year ending prior to December 31, 2002 under IITA § 207:

- that was not reported to the Department within 3 years of the due date (including extensions) of the return for the loss year on either the original return filed by the taxpayer or on amended return, or

- to the extent that the refund is the result of an amount of net loss incurred in any taxable year under IITA § 207 for which no return was filed within 3 years of the due date (including extensions) of the return for the loss year.

If the original return is filed more than three years after the extended due date, the INL would still be carried and can offset a balance due in the carry year or to offset an audit or federal change increase in net income, but not to generate a refund in the carry year.

c) Non-Filed Loss Year Returns

IITA § 911(h) requires that taxpayers report net losses to the Department within three years of the extended due date for the loss year return. If no original loss return is timely filed, the taxpayer cannot claim a refund in a carry year for any claims filed on or after August 23, 2002 based on applying the unreported loss.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Even though the loss year is past statute, an original return must still be secured to establish the past-statute filing on the system. The INL will be properly carried forward or back, but no refund of tax payments will be allowed in the carry year.

Example 1:

	~~	**As Filed**	~~~~~~	**As Filed**	~~~~~~
	2001	2002	2003	2004	2005
	Not Filed	Filed	Filed	Filed	Filed
IL net income/loss	(1,000,000)	(2,000,000)	500,000	1,300,000	800,000
2002 to 2003		500,000	(500,000)		
2002 to 2004		1,300,000		(1,300,000)	
2002 to 2005		200,000			(200,000)
Balances	(1,000,000)	0	0	0	600,000
Original tax paid at 7.3%					$43,800
	~~	**Per Audit**	~~~~~~	**Per Audit**	~~~~~~
	2001	2002	2003	2004	2005
	IL-1120	Filed	Filed	Filed	Filed
IL net income/loss	(1,000,000)	(2,000,000)	500,000	1,300,000	800,000
2001 to 2003	500,000		(500,000)		
2001 to 2004	500,000			(500,000)	
2002 to 2004		800,000		(800,000)	
2002 to 2005		800,000			(800,000)
Balances	0	(400,000)	0	0	0
Tax Overpayment					($43,800)

For 2001 the taxpayer failed to file its original IL-1120, and the year is now more than three years past the extended due date. On the original returns, as filed, the taxpayer carried forward the 2002 INL which is all used in 2005 resulting in tax paid in 2005 of $43,800.

The auditor prepares an original 2001 IL-1120, which the taxpayer signs, but it is past statute. The auditor will carry the 2001 loss to 2004, but the increased 2002 loss carryover to 2005 results in a refund in 2005. Although the 2005 refund is actually due to losses carried over from 2002, it is still the result of the increased loss being carried over from 2001 which is not subject to refund.

The auditor will include the $43,800 overpayment on the 2005 IL-1120-X, but will note in the comments section that the amount is out of statute for refund. An

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IL-1120-X is used because the EDA-125 and IL-870 are generally only used for an NOD or refund. Since there is no refund, the IL-1120-X for 2005 does not require taxpayer signature.

If the auditor is adjusting a specific year for an out-of-statute adjustment, that year must also be included in the GenTax audit period. If the taxpayer fails to sign the IL-1120 for 2001, the auditor should still carry the 2001 loss.

Example 2: The auditor is assigned an audit on 11/01/2004 for the tax years 12/2001 – 12/2002 with the following information on the original returns:

Tax Years	12/31/2000	12/31/2001	12/31/2002
Statute Date	Non-Filer	10/15/2005	10/15/2006
	Original Returns:		
Income/Loss	0	250,000	60,000
INL c/f 12/00 to 01	0	(30,000)	
Net Income(loss)	0	220,000	60,000
	As Audited:		
Income/Loss	(30,000)	250,000	60,000
INL c/f	30,000	(30,000)	
Balance	0	220,000	60,000

- The taxpayer did not file the 12/2000 return which had a loss of ($30,000);
- The 12/2000 INLD was claimed on the original 12/2001 return;
- Per IITA § 911(h), the auditor must secure the 12/2000 return prior to three years from the extended due date (10/15/2004), in order for the taxpayer to be able to claim a refund on the 12/31/2001 return;
- The INL for 12/2000 will still be carried to 12/2001, but no refund will be allowed for any estimated payments made in 12/2001. The 2001 loss is still carried if the taxpayer will not sign the 2001 IL-1120.

d) RAR Increase to a Loss

Example:

- For 12/31/1999, the taxpayer had income and it was the first year of operations;
- The taxpayer has a loss on the 12/2000 original return;
- Both original returns were filed by the extended due date;
- The 12/2000 INL was carried back to the 12/1999 return;

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- On 12/15/2004, the IRS completes an RAR on 12/2000 increasing their loss by ($50,000); and
- The RAR holds open the IITA § 911(h) requirement to adjust the loss year, allowing the taxpayer to file an amended return for the loss year.

Tax Years	12/31/1999	12/31/2000
Statute Date	10/15/2003	10/15/2004
Original Return		
Income/Loss	300,000	(100,000)
12/00 INL c/b to 12/99	(100,000)	100,000
	200,000	0
RAR change 12/15/2004		(50,000)

- IITA § 911(h) does not prohibit the RAR change to 12/2000 since the original return reporting the loss was filed within the required 3 years from the extended due date.

If the normal statute on the carryback year is expired, IITA § 911(g) allows the taxpayer to carry back the additional $50,000 to the 12/1999 return for a refund as long as the amended return is filed within the time period allowed under IITA § 506(b), which is 2 years and 120 days from the federal finalization date.

e) Misapplied Loss Carryforward

- A taxpayer has carried losses into the 12/2000 tax-year from two different tax periods: 12/1998 and 12/1999.
- The auditor has a waiver on the 12/2000 return to hold open the statute;
- The auditor agrees with the losses as filed for both years;
- The taxpayer has misapplied the loss for 12/1998 by not checking the box to forgo the carryback period.

Tax Years	12/31/1996	12/31/1997	12/31/1998	12/31/1999	12/31/2000
Original IL Inc	100,000	50,000	(150,000)	(50,000)	400,000
98 INL c/f 00			150,000		(150,000)
99 INL c/f 00				50,000	(50,000)
Inc/(loss) Remaining	0	0	0	0	200,000

- The 12/1998 loss should have gone back to offset income on the taxpayer's 12/1996 and 12/1997 returns as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Tax Years	12/31/1996	12/31/1997	12/31/1998	12/31/1999	12/31/2000
Original IL Inc	100,000	50,000	(150,000)	(50,000)	400,000
98 INL c/b 96	(100,000)		100,000		
98 INL c/b 97		(50,000)	50,000		
99 INL c/f 00				50,000	(50,000)
Inc/(loss) Remaining	0	0	0	0	350,000

In this example, no changes were made to the loss years. Therefore, IITA § 911(h) does not apply. Since the 12/2000 return is still in statute by waiver, the auditor may correct the 12/2000 return to remove the 12/1998 loss and allow only the carry forward from 12/1999. The statute will not be opened to allow the taxpayer a refund for carrying the loss back to 12/1996. However, EDA-25's should be prepared to show the application of the 12/1998 loss to 12/1996 and 12/1997. The taxpayer is not entitled to a refund for 12/1996 and 12/1997 because they are out of statute.

f) <u>Taxpayer files Amended Return past 911(h) period</u>

- The taxpayer timely filed an original return for 12/1995 reflecting a loss and an original 12/1996 return reflecting income with a loss carryforward from 12/1995.
- On 12/5/1999 (past statute), the taxpayer filed an amended return for 12/1995 to increase the loss by $60,000 because a subtraction modification was omitted.
- On 1/20/2003, a federal audit was completed on the 12/1996 return. The taxpayer reported the federal change on an amended return dated 2/10/2003 (within statute).

Tax Years	12/31/1995	12/31/1996
Statute Date	10/15/1999	10/15/2000
Original Return		
Income/Loss	(10,000)	20,000
12/95 INL to 12/96	10,000	(10,000)
Sub Total	0	10,000
Non RAR Il-1120-X	(60,000)	
RAR Change		30,000
Remaining Income(Loss)	(60,000)	40,000

- Auditor should allow the carry forward of $40,000 of the 12/1995 INL to 12/1996 (the original $10,000 plus $30,000 from the RAR change),
- The carry forward can only offset the balance due from the RAR.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

  - Since 1995 is past statute and the adjustment is from a non-RAR, the taxpayer cannot carry the increase INL forward for a refund in the carry year, even if the carry year is within statute.
- The taxpayer did not report the 12/1995 non-RAR changes to the loss year by filing an amended return within the required 3 years from the extended due date per IITA § 911(h).
- When carrying losses, GenTax cannot keep track of the portion of the overpayments that are nonrefundable; therefore, the Auditor's Report will have to indicate the portion of the refund that is non-refundable under Section 911(h).

Refer to the sections on Claim Allowed in Full or Claim Denials for procedures on issuing the documents required for a specific audit situation.

5. Deactivating Credits

If an original return is timely filed for a tax year and the taxpayer subsequently submits an amended return that is past statute, GenTax views the amended return as timely filed. If the amended return is reporting an overpayment, GenTax will automatically allow the refund to be issued (erroneously). In these situations, the auditor will notify Audit Review/Perfection, via a comment in the Auditor's Report, to deactivate the credit. Refer to Chapter 20 Income Tax Audit Procedure, Specific Processing Notes.

6. Abusive Tax Avoidance Transactions (ATAT)

In cases where an individual paid on a tax shelter and has now filed a claim to get a refund from the original payment, no refunds are allowed when there has not been a final federal change at the entity (IL-1065, IL-1120-ST) level. The entity must have filed an amended return based on the federal change to impact the individuals. The theory of equitable recoupment does not apply in these matters because the individuals come in with "unclean hands" when it relates to a tax shelter.

7. Refund of Overpayment of Interest

Amended returns can also be used to claim a refund where an excessive amount of interest has been charged.

The claim must be filed within the 60-day period for filing a protest, or within the three years after the return was filed or one year after the tax was paid, whichever is later.

8. Estimated Tax

Effective January 1, 2015, overpayments on Forms IL-990-T-X, IL-1120-X, IL-1065-X, IL-1120-ST-X, IL-1023-C-X and IL-1040-X can be credited against estimated tax (PA 098-0925).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The credit will be applied to the tax year for which estimated payments are **currently due** as of the date the amended return is filed, unless an election is made to apply the credit to a different tax year.

The overpayment shown on an amended return filed after the extended due date of the original return will be considered paid on the date the amended return is filed.

> Example 1: Corporate taxpayer files an amended return for TY 2015 on 12/1/16 requesting the overpayment of $500 be applied against estimated tax. The credit is considered paid on 12/1/16, because the amended return was filed after the extended due date of the 2015 calendar-year original return.

Overpayments from a Form IL-990-T-X, IL-1120-X, IL-1065-X, IL-1120-ST-X and IL-1023-C-X filed before January 1, 2015 cannot be credited to the following year's estimated tax, unless the amended return is filed before the extended due date of the original return.

Overpayments from Form IL-1040-X filed before January 1, 2015 cannot be credited to the following year's estimated tax.

9. Composite Returns

a) For Tax Years Ending on or After December 31, 2014

The IL-1023-C-X will be retired for tax years ending on or after December 31, 2014. Amounts previously reported on this form will be reported on Form IL-1120-ST or IL-1065.

b) For Tax Years Ending on or After December 31, 2007 and Before December 31, 2014

This section pertains to the IL-1023-C-X Amended Composite Income and Replacement Tax Return, since claims for refunds for payments made that were reported (or should have been reported) to partners, shareholders, or beneficiaries as amounts paid on their behalf cannot be processed on the IL-1000-X Amended Pass-Through Entity Payment Income Tax Return. The partners, shareholders, or beneficiaries must claim these amounts on their own tax returns. (Ref. IAC § 100.5180)

(1) Overpayments

A partnership or subchapter S corporation may claim a refund or credit of any amount it paid on behalf of its partners or shareholders but may not claim a

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

refund or credit of any amount paid to the Department by a partner or shareholder.

(2) Amounts collected more than once

If claims for refund or credit are timely filed by both a partner/shareholder *and* the authorized agent, for amounts collected more than once, any amount collected from the partner/shareholder in excess of the underpayment attributable to the partner/shareholder shall be refunded or credited to that partner/shareholder rather than to the authorized agent.

10. Erroneous Refunds

a) Electronic Filing

An overpayment of tax refunded to a taxpayer whose return was filed electronically shall be considered an erroneous refund if, after proper notice and demand by the Department, the taxpayer fails to provide a required signature document.

b) Interest Calculation

Any tax, interest or penalty that has been erroneously refunded bears interest from the date the refund is paid.

However, no interest is charged if the erroneous refund is for an amount less than $500 and is due to the Department's mistake (UPIA 3-2(e)).

11. Notice of Deficiency

Federal RAR – must be issued within two years from the date the amended return was filed (IITA § 905(e)). If the statute of limitations on the original return has already expired, the Notice of Deficiency is limited to the additional tax resulting from the federal changes.

12. Claim Allowed in Full

With the introduction of APT it is no longer necessary to issue an IL-870 Waiver of Restrictions for audits completed in APT. Throughout this chapter there are references to the issuance of the IL-870. Please remember that these references relate only to audits not completed in APT.

a) No Other Issues in Claim Year or Other Audited Years

Save amended return in "Processing Documents" folder in electronic audit file. No other processing documents are required.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

b) Additional Overpayment Established in Claim Year

Save amended return in "Processing Documents" folder in electronic audit file.

Auditor's Report prepared for additional overpayment amount. Column A figures will be from Column C of the amended return. Column B will be the additional overpayment amount. The refund from the amended return will be reflected as a pending refund on the Auditor's Report.

IL-870 issued reflecting the audit overpayment amount from the Auditor's Report. The refund from the amended return is not reflected on the IL-870.

Comments:

"The above amount reflects an increase of the claim filed on xx/xx/xx for the tax year ending xx/xx/xx in the amount of $xx,xxx. The total claim being allowed for this year is $xx,xxx."

If the statute has tolled, the out of statute overpayment can only be used to offset additional liability in the same tax year.

c) Other Liability Established in Claim Year Resulting in a Net Overpayment

Save amended return in "Processing Documents" folder in electronic audit file.

Auditor's Report prepared for liability established in audit. Column A figures will be from Column C of the amended return. Column B will be the liability established in audit. The refund from the amended return will be reflected as a pending refund on the Auditor's Report.

- Unagreed
  - EDA-122 is prepared for the liability amount.
- Agreed
  - IL-870 issued reflecting additional liability amount. The refund from the amended return is not reflected on the IL-870.

    Comments:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

"Execution of this form will allow approved claim filed for the Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability which will result in a net overpayment of $xx,xxx being refunded."

d) Other Liability Established in Claim Year Resulting in a Net Underpayment

Save amended return in "Processing Documents" folder in electronic audit file.

Auditor's Report prepared for liability established in audit. Column A figures will be from Column C of the amended return. Column B will be the liability established in audit. The refund from the amended return will be reflected as a pending refund on the Auditor's Report.

- Unagreed
    - EDA-122 is prepared for the liability amount.
- Agreed
    - IL-870 issued reflecting additional liability amount. The refund from the amended return is not reflected on the IL-870.

      Comments:

      Execution of this form will allow approved claim filed for the Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability and penalties (plus applicable interest) which will result in a net liability of $xx,xxx (plus applicable interest) being due.

e) Other Audit Years Also Result in Overpayments

Save amended return in "Processing Documents" folder in electronic audit file.

Auditor's Report prepared for other year's audit adjustments. Column A figures will match GenTax. Column B will reflect the audit adjustments.

IL-870 issued reflecting audit overpayment from other years. Refund from claim is not reflected on the IL-870. Since overall result on IL-870 is overpayment, no additional comments are required.

f) Other Audit Years Establish Audit Liability

Save amended return in "Processing Documents" folder in electronic audit file.

Auditor's Report prepared for other year's audit adjustments. Column A figures will match GenTax. Column B will reflect the audit adjustments.

- Unagreed
  - EDA-122 issued for other year's additional liability
- Agreed
  - IL-870 issued reflecting each of other year's audit adjustments, including applicable penalties. Refund from claim is not reflected on the IL-870. Since approved claim is not shown on IL-870 and if taxpayer wants to offset pending refund (i.e. make a net payment):
    - If audit liability on IL-870 exceeds approved claim amount: Include comment on IL-870: "Execution of this form will allow approved claim filed for the Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability and penalties which will result in a net liability of $xx,xxx (plus applicable interest) being due."
    - If approved claim amount exceeds audit liability on IL-870: Include comment on IL-870: "Execution of this form will allow approved claim filed for the Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability and penalties (plus applicable interest) which will result in a net overpayment of $xx,xxx (plus applicable interest) being refunded."

g) Increase Claim in Claim Year – includes instructions if other years also audited

Save amended return in "Processing Document's" folder in electronic audit file.

Auditor's Report prepared for audit adjustments to claim year. Column A of Auditor's Report should show figures from Column C of amended return. Auditor's Report will reflect audit adjustments only. Overpayment from amended return should be shown as pending refund on Auditor's Report. (Auditor's Report(s) will also be required for other years if there are audit adjustment(s)).

- Unagreed
  - EDA-122 issued, if audit adjustments for other years result in a liability.
- Agreed

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- IL-870 issued reflecting overpayment from above Auditor's Report, as well as any overpayment or underpayment from other audit years. Refund from amended return is not reflected on the IL-870. Since approved claim is not reflected on IL-870:

  - If overall audit results are liability which is less than the claim allowed:
    Include comment on IL-870: "Execution of this form will allow approved claim filed for the Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability and penalties (and applicable interest) which will result in a net overpayment of $xx,xxx (plus applicable interest) being refunded."

  - If overall audit results are liability which is more than the claim allowed:
    Include comment on IL-870: "Execution of this form will allow approved claim filed for the Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability and penalties (and applicable interest) which will result in a net balance still due of $xx,xxx (plus applicable interest)."

13. Claim Denials

a) Claim Not Timely Filed

Save amended return in "Federal & IL Returns" folder indicating do not process in electronic audit file.

- Unagreed
  - EDA-125-1 issued
- Agreed
  - EDA-153 issued, or
  - Taxpayer may formally withdraw the claim in writing that specifically identifies the claim's tax year, dollar amount and the date it was filed, or
  - IL-870 issued reflecting a zero increase and zero decrease in tax liability for the tax year including the following comments:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

"The above amounts reflect a total denial of the claim filed on xx/xx/xx for the tax year ending xx/xx/xx, requesting a refund of $xx,xxx. Execution of this Form IL-870 will constitute a formal withdrawal of the claim(s)."

b) Claim Fully or Partially Denied

(1) No Additional Audit Adjustment for Claim Year

Follow same procedures as Claim Not Timely Filed.

c) Claim Partially Denied

(1) Other Audit Adjustments to Claim Year

Auditor's Report prepared to reflect allowable amended return issues only. Column A figures are from GenTax. Column B figures are allowable adjustments only. Save Auditor's Report in "Processing Documents" folder in electronic audit file as process first. Save amended return in "Federal and IL Returns" folder as DNP.

Second Auditor's Report prepared to reflect audit adjustments for claim year. Column A figures will be from Column C of first Auditor's Report. Overpayment from first Auditor's Report (if applicable) should be reflected as pending refund. Save Auditor's Report in "Processing Documents" folder in electronic audit file as process second.

- Unagreed
  - EDA-125 issued if partial denial of claim is only unagreed issue, or
  - EDA-124 issued if partial denial of claim and proposed audit liability are unagreed, or
  - EDA-122 issued if proposed audit liability is unagreed.
- Agreed
  - EDA-153 issued for denied portion of claim, and
  - IL-870 reflecting audit results for claim year from last Auditor's Report and calculate penalty on net liability, if applicable.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(2) Additional Liability Proposed in Other Audit Year Resulting in a Net Overpayment

Auditor's Report prepared to reflect allowable amended return issues only. Column A figures are from GenTax. Column B figures are allowable adjustments only. Save Auditor's Report in "Processing Documents" folder in electronic audit file. Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP. (Auditor's Reports will also be required for other years if there are audit adjustment(s)).

- Unagreed
  - EDA-125 is issued, if the partial claim denial is the only unagreed issue, or
  - EDA-124 is issued, if the partial claim denial and additional liability is unagreed.
- Agreed
  - EDA-153 issued for denied portion of claim, and
  - IL-870 reflecting the allowable portion of the claim and the additional liability amount.

    Comments:

    "The above amount for the tax year xx/xx/xx reflects a partial denial of the claim which was filed on xx/xx/xx for that year in the amount of $xx,xxx. $xx,xxx of the claim was denied. Execution of the IL-870 will constitute a formal withdrawal for the denied portion of this claim.

    Execution of this form will also allow the approved portion of the claim to be used to offset the proposed liability for xx/xx/xx which will result in a net overpayment of $xx,xxx (plus any applicable interest) being refunded."

(3) Decrease Claim in Claim Year Resulting in Either Overpayment Still Existing or Liability for Claim Year - includes instructions for other audit year results

Auditor's Report prepared using figures from GenTax in Column A. Column B will reflect the allowable portion of the claim. Save Auditor's Report in "Processing Documents" folder in electronic audit file. Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP. (Auditor's Report(s) will also be required for other years if there are audit adjustment(s)).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Unagreed

  - EDA-124 issued:

    - If original claim is decreased and an additional liability is established in the claim year or other audit years, or

  - EDA-125 issued:

    - If the decrease in claim is the only audit adjustment and the result is a still a claim or a zero tax liability.

- Agreed

  - EDA-153 issued if the decrease in claim is the only audit adjustment and the result is still a claim or a zero tax liability.

  - IL-870 issued in conjunction with the EDA-153, if there are adjustments for other audit years that result in a tax liability. Refund from amended return is not reflected on IL-870.

    Audit tax results from Auditor's Reports(s) should be reflected on IL-870 since approved claim amount is not reflected on IL-870:

    - If overall result on IL-870 is a liability:
      Include comments on IL-870, "Execution of this form will allow approved portion of the claim filed for Y/E xx/xx/xx, in the amount of $xx,xxx to be used to offset the above proposed liability and penalties (and applicable interest)", and

    - Liability on IL-870 exceeds claim, also state: "Which will result in a net liability of $xx,xxx (plus applicable interest) being due", or

    - Claim exceeds liability on IL-870, also state: "Which will result in a net overpayment of $xx,xxx (plus applicable interest) being refunded."

  - If overall result on IL-870 is overpayment:

    - No additional comments on IL-870 are required

(4) <u>No Additional Audit Adjustment for Claim Year or Other Years</u>

Auditor's Report prepared using figures from GenTax in Column A. Column B will reflect the allowable portion of the claim. Save Auditor's Report in

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

"Processing Documents" folder in electronic audit file. Save amended return in "Federal and IL Returns" Folder in electronic audit file as DNP.

- Unagreed
  - EDA-125 is issued
- Agreed
  - EDA-153 is issued, or
  - IL-870 issued reflecting a decrease in tax for the amount of the claim that was approved.

    The Comments section will read:

    "The above amount reflects a partial denial of the claim which was filed on xx/xx/xx for the tax year ending xx/xx/xx, in the amount of $xx,xxx. $xx,xxx of the claim was denied. Execution of this IL-870 will constitute a formal withdrawal of the denied portion of this claim.

d) Claim Fully Denied

(1) No Additional Audit Adjustments for Claim Year

Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP.

(2) Additional Liability Established for Claim Year

Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP.

Auditor's Report prepared using figures from GenTax in Column A. Column B will reflect additional audit adjustments.

- Unagreed
  - EDA-124 is issued
- Agreed
  - EDA-153 is issued reflecting that the taxpayer's claim has been reduced to zero, and

- IL-870 issued reflecting an increase in tax liability for the year for which a claim was filed.

  The Comments section will read:

  "The tax liability shown above for the tax year ending xx/xx/xx reflects a total denial of the claim filed on xx/xx/xx for that tax year, in the amount of $xx,xxx. Execution of this IL-870 will constitute a formal withdrawal of this claim and an agreement to the additional liability proposed."

(3) An Additional Liability is Proposed for a Different Year

Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP.

Complete Auditor's Report for additional liability issue. Column A will reflect figures from GenTax.

- Unagreed

  - Issue EDA-124

- Agreed

  - Issue EDA-153 reflecting that the taxpayer's claim has been reduced to zero, and

  - IL-870 issued to reflect the additional liability.

    Comments:

    The IL-870 reflects an increase in tax for one year and a $-0- decrease in tax for the claim year.

    The Comments section will read:

    "The above amount reflects a total denial of the claim filed on xx/xx/xx for the tax year ending xx/xx/xx, in the amount of $xx,xxx. Execution of this IL-870 will constitute a formal withdrawal of this claim and an agreement to the additional liability proposed."

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

(4) Other Overpayment Allowable

If the taxpayer timely files an amended return claiming an overpayment but that overpayment is not allowable, the claim for refund would be denied. However, if in our audit of that claim, we discover another issue that results in an overpayment in the same year, that overpayment would be allowed up to the amount of the timely filed claim for refund, if the statute of limitations for filing a claim for refund has expired.

- Unagreed
  - EDA-125 issued for original claim denial
- Agreed
  - EDA-153 is issued for the amount of the overpayment that was not allowable, and
  - An amended return is prepared reflecting the new overpayment amount.

e) Notice of Claim Denial

A denial of a claim for refund becomes final 60 days after the date of issuance (150 days if the taxpayer is outside the United States) of the notice of such denial except for such amounts denied as to which the claimant has filed a protest, as provided in IITA § 909.

f) Amended return reflects additional tax due – Column A agrees with GenTax

- The amended return will be processed as is
- Save amended return in "Processing Documents" folder in electronic audit file
- Tax shown on amended return is not reflected on IL-870
- Complete an Auditor's Report for any audit adjustments:
  - Column A of Auditor's Report will reflect Column C figures from the amended return that is being processed
- Any applicable unpaid tax and any applicable penalty from the amended return must be collected
- If taxpayer did not already pay liability shown on the amended return, and since liability is not shown on IL-870:
  - The audit results in a net overpayment, then add comment to IL-870:
    - "Execution of this form will allow above overpayment to be offset by the tax and penalty (if applicable) of $xx,xxx (and applicable interest) due from the amended return filed for the Y/E xx/xx/xx."
  - The audit results in a liability, then add comment to IL-870:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- "In addition to the above audit liability, tax and penalty (if applicable) of $xx,xxx (plus applicable interest) is also due from the amended return filed for the Y/E xx/xx/xx."

g) Amended return reflects additional tax due – Column A does not agree with GenTax

Complete Auditor's Report correcting Column A figures to agree with GenTax. Column B should reflect only the issues included on the amended return.

Save Auditor's Report in "Processing Documents" folder in electronic audit file. Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP.

- If this Auditor's Report results in a higher additional tax due than shown on the original amended return:

  Only the additional amount should be reflected on the IL-870

- If this Auditor's Report results in a decrease in tax due as reported on the original amended return:

  Show this decrease on the IL-870

In both situations, complete an additional Auditor's Report for any audit adjustments. Column A of the second Auditor's Report will reflect figures from Column C of the first Auditor's Report.

If taxpayer did not pay tax shown due on the original amended return (since liability on amended return is not shown on IL-870) and:

- Audit results on IL-870 reflect a net overpayment, then add comment to IL-870:

  "Execution of this form will allow above overpayment to be offset by the tax and penalty (if applicable) of $xx,xxx (and applicable interest) due from the amended return filed for the Y/E xx/xx/xx."

- Audit results on IL-870 reflect a net underpayment, then add comment to IL-870:

  "In addition to the above liability, tax and penalty (if applicable) of $xx,xxx (plus applicable interest) is also due from the amended return filed for the Y/E xx/xx/xx."

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

h) Column A of Amended Return does not match figures on GenTax

(1) Adjustments on Amended Return Allowable

Prepare Auditor's Report to make the amended return processable.

- Column A of the Auditor's Report should reflect figures on GenTax.
- Column B of the Auditor's Report should reflect the adjustments on the amended return.
- Save Auditor's Report in "Processing Documents" folder in electronic audit file. Save amended return in "Federal and IL Returns" folder in electronic audit file, if column B equals the amended return.
- If Column B does not equal the amended return, then enter the difference on an IL-870.

(2) Adjustments on Amended Return Not Allowable

Prepare Auditor's Report if some of the adjustments on the amended return are allowable.

- Show results from Auditor's Report on an IL-870.
- Complete EDA-153, if agreed.
- Save amended return in "Federal and IL Returns" folder in electronic audit file as DNP.

(3) Additional Audit Adjustments to Claim Year

- Prepare Auditor's Report starting with Column C of the above Auditor's Reports
- Show overpayment (if applicable) from above Auditor's Report as pending refund
- Save Auditor's Report above in "Processing Documents" folder in electronic audit file as process first and this Auditor's Report in "Processing Documents" folder as process second. Enter additional audit adjustment from second Auditor's Report on IL-870

E. Multiple Amended Returns Filed Reporting Underpayment and Overpayments

The taxpayer may file separate unitary amended returns or combined amended returns reporting overpayments for some members and underpayments for other members. The overpayments reported on taxpayer's separate unitary or combined amended returns may be used to offset the liability of the underpaid taxpayers by completing an Offset Statement as shown in Chapter 42 Penalty and Interest - UPIA.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Also, a taxpayer may file several years of amended returns and report overpayments in some years and underpayments in others. The overpayments and underpayments are to be processed according to the instructions contained in Chapter 42 Penalty and Interest – UPIA, Offsets between Years.

In the above situations, any amended returns reporting underpayments must still have a notice and demand issued if not fully paid within three years of the date filed. A waiver of the statute of limitations does not extend this period. If the auditor does not have enough time left on the three-year notice and demand statute to fully complete the audit, offset the overpayments and underpayments and collect the net liability due, the underpaid amended returns must be referred to Audit Perfection for the issuance of a manual notice and demand in order to protect the statute of limitations. Refer to Notice and Demand Procedure section.

F. Processing Documents

Refer to Chapter 20 Income Tax Audit Procedure for creating audit letters and reports.

1. EDA-XX Auditor's Report

EDA-24 Individual
EDA-25 Corporate
EDA-26 Fiduciary
EDA-92 IL-1065
EDA-93 S-Corp
EDA-127 IL-1023-C (available in the CIT Standalone)

The Auditor's Report is prepared in most amended return audits. In some instances, multiple Auditor's Reports will be required. Exception would be amended returns that are correct as filed. No EDA-XX is required.

For additional information on how to prepare the EDA-XX in general and when an amended return reporting underpayments and overpayments has been filed and has not been processed refer to Chapter 20 Income Tax Audit Procedure.

2. EDA-122B & EDA-122B-APT Notice of Proposed Deficiency

Notice of Proposed Deficiency should be issued when the taxpayer has indicated lack of agreement with the audit results.

EDA-122XX is required for income tax deficiencies (amended returns with additional liability due) but is not issued when the taxpayer refuses to extend the statute of limitations, if it expires before the expiration of the 60-day period for deciding to seek ICB review.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Issued when an amended return is filed reporting an underpayment (additional tax due) or overpayment (claim for refund) and, during audit, an additional liability is proposed.

Form ICB-1, Request for Informal Conference Board Review, is issued at the same time.

3. EDA-124I & EDA-122I-APT Notice of Proposed Tax Liability and Claim Denial

Notice of Proposed Tax Liability and Claim Denial is issued when an income tax assessment and claim denial occur in the same track and the taxpayer has indicated lack of agreement with the audit results.

EDA-124XX is required for income tax deficiencies **and** full or partial claim denials that occur within the same audit track.

EDA-124XX is not issued when the taxpayer refuses to extend the statute of limitations if it expires before the expiration of the 60-day period for deciding to seek ICB review.

Issued when an amended return is filed reporting and overpayment (claim for refund) and, during audit, the original claim is fully or partially denied and an additional liability is proposed.

Form ICB-1, Request for Informal Conference Board Review, is issued at the same time.

4. EDA-125I & EDA-125I-APT Notice of Proposed Claim Denial

Notice of Proposed Claim Denial is issued when a claim has been partially or fully denied and the taxpayer has indicated lack of agreement with the audit results.

EDA-125XX is required only for full or partial income tax claim denials.

EDA-125XX is not issued when the taxpayer refuses to extend the statute of limitations if it expires before the expiration of the 60-day period for deciding to seek ICB review.

Issued when an amended return is filed reporting an overpayment (claim for refund) and, during audit, the original claim is fully or partially denied.

Form ICB-1, Request for Informal Conference Board Review, is issued at the same time.

5. EDA-143I & EDA-143I-APT Results-IL-870 Information

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The EDA-143I is a cover letter to be used whenever an IL-870 is issued providing instructions and explaining the taxpayer's rights. The EDA-143I letter will set all system required indicators and information transactions for the correct application of penalty.

6. EDA-143CA Results – Return Approval

On May 25, 2015 a new GenTax Audit letter became available for Income Tax audits. Up until that point, Income Tax auditors had no access to a Notice of Audit Results which could be used to cover an audit which contained both original and amended returns. The new EDA-143CA allows for this. In addition, the former results letter did not contain the required language for returns filed with unpaid balances which could be subject to additional penalty. The EDA-143CA "Results - Return Approval" replaces the EDA-143CA "Results-Amd Return Approval" and EDA-143CO "Results-Original Return Approval" letters.

The EDA-143CA is a cover letter to be used when a return is accepted as filed. The EDA-143CA letter will set all system required indicators and information transactions for the correct application of penalty.

7. EDA-143RR Notice of Audit Results Acceptance of Revised Claim for Refund

The EDA-143RR is a cover letter to be used with the EDA-153. It gives directions for completion and provides an explanation of taxpayer's rights. The EDA-143RR must be provided to the taxpayer at the same time as the EDA-153. The EDA-143RR will also set all system required indicators and informational transactions for the correct application of penalty.

8. EDA-153 Acceptance of Revised Claim for Refund

a) Purpose of the EDA-153

The EDA-153 is used:

- When one or more claims filed by the taxpayer have been reduced in audit and the taxpayer agrees to the reduction
- If the claim reduction results in a tax liability
- To expedite the processing of the claim since it clarifies for Audit Perfection what claims have been filed and what reductions have been agreed to by the taxpayer.

The EDA-153 applies to claims filed by the taxpayer on the following amended returns:

- IL-1120-X, Amended Corporation Income and Replacement Tax Return
- IL-1065-X Amended Partnership Replacement Tax Return

- IL-1120-ST-X, Amended Small Business Corporation Replacement Tax Return
- IL-1041-X, Amended Fiduciary Income and Replacement Tax Return
- IL-1023-C-X, Amended Composite Income and Replacement Tax Return
- IL-941-X, Amended Illinois Withholding Tax Return
- IL-990-T-X, Amended Exempt Organization Income and Replacement Tax Return
- IL-1040-X, Amended Individual Income Tax Return

b) When to Use the EDA-153

The EDA-153 is used when one or more claims filed by the taxpayer have been reduced during an audit, either partial or full claim denials. As long as the taxpayer signs the EDA-153, no IL-870 and EDA-125 Notice of Proposed Claim Denial is required. The Auditor's Report (i.e. EDA-25) is still required to support the claim reduction amounts on the EDA-153.

The EDA-153 is also used if the claim reduction results in a tax liability. The EDA-124 Notice of Proposed Tax Liability and Claim Denial and ICB-1 are presented to the taxpayer. If the taxpayer agrees to the tax, then the taxpayer will be provided both the EDA-153 and IL-870 for signature. The IL-870 will reflect the Column B amount on the EDA-25 and the EDA-153 will show that the taxpayer's claim has been reduced to zero.

The EDA-153 is issued when an amended return is filed reporting an overpayment (claim) and, during audit, the claim is fully or partially denied.

However, if the taxpayer does not agree to a claim reduction, execution of the IL-870 is required. The EDA-143-I, Results – IL-870 Information, should accompany the IL-870 explaining the taxpayer's options and protest rights.

c) When Not to Use the EDA-153

The EDA-153 is not used when:

- All claims have been accepted as filed
- The claim reductions are unagreed
- For any amended returns showing an underpayment
- Amended returns showing changes to an Illinois Net loss and credit carryovers that do not result in an actual reduction to the liability reported on an original or previously filed amended return
- Any claims prepared by the auditor
- Math error adjustments

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

d) Timeframe for Issuing the EDA-153

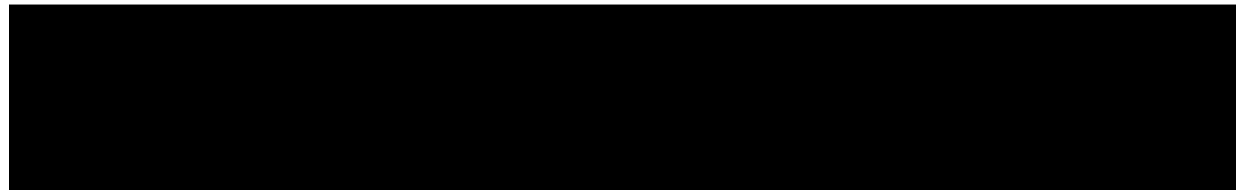
The EDA-153 will not be issued if the claim is not timely filed.

The Department must approve or deny claims within 6 months from the date the claim was filed.

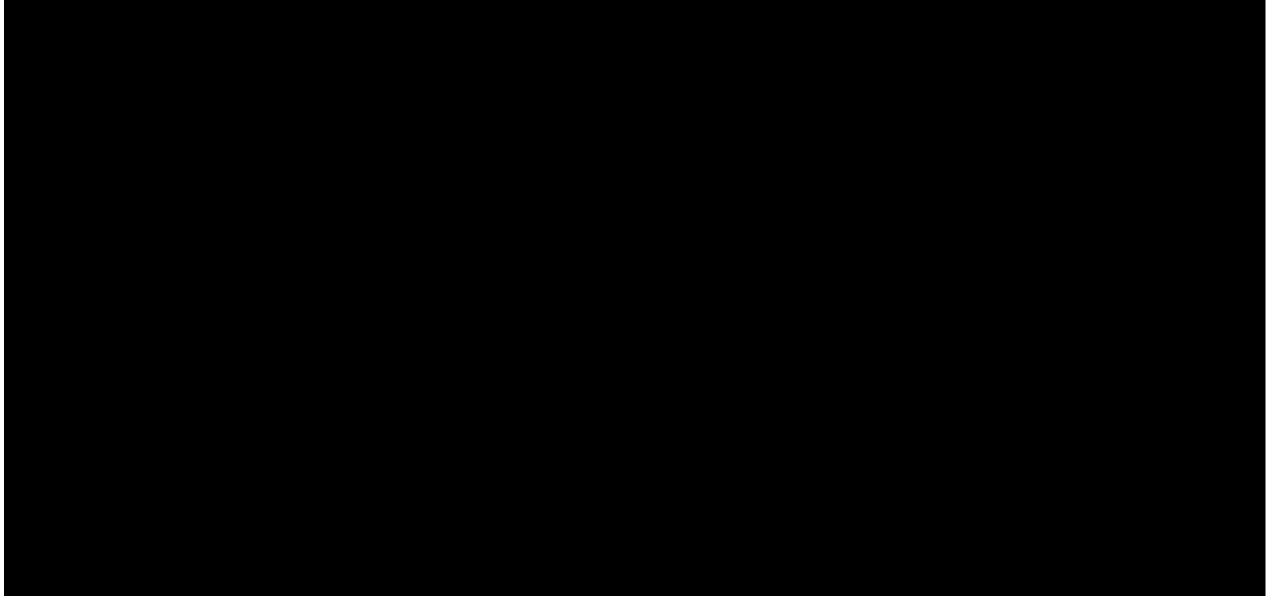
e) Completion of the EDA-153

Multiple claims can be listed on the same EDA-153. An EDA-153 must be prepared if at least one claim year is being reduced and the taxpayer agrees to the reduction. For any year in which the auditor is increasing the claim, that year is not shown on the EDA-153, as there is no language on the EDA-153 for claim increases.

While in the Audit View (GenTax), the EDA-153 can be accessed through the Letters sub-tab under the CRM Tab. Select the Add Tab to access the Mail Types (letters) listing.



Select the EDA-153 blue hyperlink in the *Type* column.



The Input screen (shown below) opens allowing for information entry. All figures are entered as positive amounts. There are five columns on the EDA-153.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

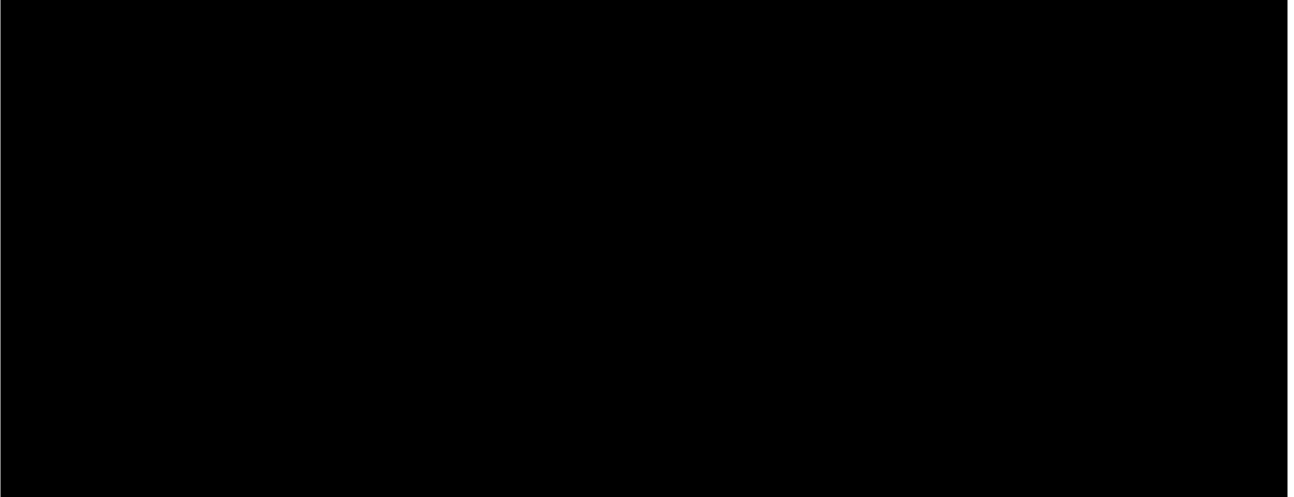
- Column (A) “Tax Year” (Year) is entered as xx/xx/xxxx.

- Column (B) “Date Claim Filed” (Claim Date) is the date that the Department received the claim, if mailed, or the date that the auditor received the claim if it came directly from the taxpayer.

- Column (C) “Amount of Refund Claimed” (Refund Claim) is the net refund claimed by taxpayer after applying all payments and credits. For example, on a 2010 IL-1120-X, the amount is Step 9, Line 60.

- Column (D), “Amount of Refund Disallowed” (Disallow) is the amount being disallowed. Any correction to the taxpayer’s payments and credits would be reflected in Column D.

- Column (E) “Amount of Refund Allowed” (Allow) is the correct amount of refund allowed from that amended return, and Column (D) “Amount of Refund Disallowed” is the difference between Columns (C) and (E).



Once info is entered, select the Preview Letter tab to review the letter, then select Save. The EDA-153 is required to be printed for the taxpayer’s signature. Two signature lines are provided on the EDA-153 in case of individual taxpayers.

Below is a screen print of an EDA-153 which shows the five columns referred to above.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Illinois Department of Revenue

EDA-153 Acceptance of Revised Claim for Refund

Taxpayer name: IMA TAXPAYER CORP
DBA:
Taxpayer address: 1000 Main Street
Everywhere, IL 60000

Taxpayer ID: 00-0000000
Account ID: 00-0000000
Audit ID: A123456789
Return Type: IL1120
Audit Periods: 01/01/2010-12/31/2011

I, the above named taxpayer, have previously filed a refund claim for one or more tax years included in the above audit. I hereby agree to the revised claim for refund amount as shown in column (E).

(A) Tax Year	(B) Date Claim Filed	(C) Amount of Refund Claimed	(D) Amount of Refund Disallowed	(E) Amount of Refund Allowed
12/31/2011	3/1/2013	$100,000.00	$40,000.00	$60,000.00

Once the audit has been submitted for processing, the taxpayer's account will be adjusted to the agreed amounts. If the taxpayer does not sign the EDA-153, the auditor should mark the EDA-153 as "VOID". This will alert Audit Perfection that claim reductions have not been agreed to by the taxpayer. The auditor should also document an explanation on the EDC-5 as to why the taxpayer did not sign the EDA-153 after it was generated.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Blank copy of the EDA-153:

Illinois Department of Revenue

EDA-153 Acceptance of Revised Claim for Refund

Taxpayer name:
DBA:
Taxpayer address:

Taxpayer ID:
Account ID:
Audit ID:
Return Type:
Audit Periods:

I, the above named taxpayer, have previously filed a refund claim for one or more tax years included in the above audit. I hereby agree to the revised claim for refund amount as shown in column (E).

(A) Tax Year	(B) Date Claim Filed	(C) Amount of Refund Claimed	(D) Amount of Refund Disallowed	(E) Amount of Refund Allowed

Sign below:
I hereby waive the requirement under statute that a notice of claim denial be sent to me for the amount of refund disallowed as shown in column (D). I understand that the filing of this waiver is irrevocable and fully resolves the above amended returns. I understand that this waiver will allow the department to process my claim for refund amount as shown in column (E).

- If you filed a joint return for the year involved, both you and your spouse must sign this waiver. If acting under a power of attorney, one may sign as agent for the other.
- If a corporate return was filed, this waiver must be signed with the corporate name followed by the signature and title of the officer(s) duly authorized to sign.
- If you are a taxpayer's attorney or agent, your actions must be specifically authorized by a power of attorney. If the power of attorney was not previously filed, it must accompany this waiver.
- If you are a person acting in a fiduciary capacity (e.g., executor, administrator, or trustee), Form IL-56, Notice of Fiduciary Relationship, must accompany this form, unless Form IL-56 was previously filed.

Corporate name

Taxpayer's signature Title Date

Taxpayer's signature Title Date

f) Examples of EDA-153 Use

Example 1: The taxpayer filed refund claims for 2010, 2011 and 2012. The auditor determined that the claims should be as shown:

Tax Year	2010	2011	2012
Claim	Reduced	Accepted	Increased

The auditor includes only the claims for 2010 and 2011 on the EDA-153. The auditor includes 2011 on the EDA-153 because at least one year (2010) is being reduced, but 2012 is not listed because it is a claim increase which is reportable on an IL-870.

Example 2: On March 1, 2013 the taxpayer filed an IL-1120-X for calendar year 2010 requesting a tax refund of $73,000. The auditor disallows $53,000 but allows $20,000 of the claim. If the claim is processable, then the IL-1120-X will be processed first so that Column B of the IL-1120-X becomes Column A of the EDA-25. Audit adjustments that reduce the claim by $53,000 will be reflected in Column B of the EDA-25 and explained on the EDA-25. Normally, the Column B tax change would be entered on the IL-870, but since the EDA-153 replaces the IL-870, the tax change of $53,000 will be entered in Column D of the EDA-153.

The EDA-153 will show:

I, the above named taxpayer, have previously filed a refund claim for one or more tax years included in the above audit. I hereby agree to the revised claim for refund amount as shown in column (E).

(A) Tax Year	(B) Date Claim Filed	(C) Amount of Refund Claimed	(D) Amount of Refund Disallowed	(E) Amount of Refund Allowed
12/31/2010	3/1/2013	$73,000.00	$53,000.00	$20,000.00

Note: if any audit change is made to the claim and that audit change increases the tax liability as shown on the claim, then the taxpayer's claim has been "reduced" for the year, and the taxpayer should be given the EDA-153.

Example 3: The taxpayer files an IL-1120-X for 2010 claiming a refund of $10,000. The auditor determines that the Column A figure is not correct because there was a previously filed claim that the taxpayer forgot to include thereby affecting the claim amount. The auditor still enters $10,000 in Column C because that's the refund the taxpayer requested. Any errors in Column A that result in a decrease in the refund will be part of the adjustment in Column E. If the auditor increases the claim, then that change will be reported on an IL-870 and not the EDA-153.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

9. PROD-1

Effective September 2019 the PROD-1 was introduced in APT Release 21, including new features and codes.

Refer to Chapter 20 Income Tax Audit Procedure for a more detailed explanation on how to complete the PROD-1 and associated codes.

The remainder of this section will be removed during the next chapter update.

The PROD-1 should be issued in all audits.

Liability Status Codes

Amended Returns reflecting an underpayment:

Amended Returns that indicate additional tax due should be coded as:

- AP- Agreed Paid, or
- AL- Agreed Liability

The results of the audit should be coded as:

- AP – Agreed Paid,
- AL – Agreed Liability, or
- CM – Credit Memo

Amended Returns reflecting an overpayment:

Whenever an original claim (OC) exists and the auditor determines that a reduction in the claim is required, either CR (claim reduction) or WC (withdrawn notice/claim) will be used:

- OC is the original amount of the claim filed
- CR is used when the taxpayer disagrees with the reduction
- WC is used when the taxpayer agrees with the reduction

In any agreed audit, any OC (original claim) or CL (claim) amount may be used to offset a liability established during the audit. The offset amount would be coded CM (credit memo). This code is used to indicate that all or a portion of the claim allowed is being used to offset part or all of the liability due.

When an additional liability is being offset with a pending refund, code CM (credit memo) should be used.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Note that all unprocessed claims for refund, whether received from Audit Planning, from the taxpayer, or generated in the audit should be coded on the PROD-1 as OC.

Amended returns within an audit are to be addressed whether the claim is denied, withdrawn or allowed.

Audits dealing only with claims for refund are never to be coded NL (no liability).

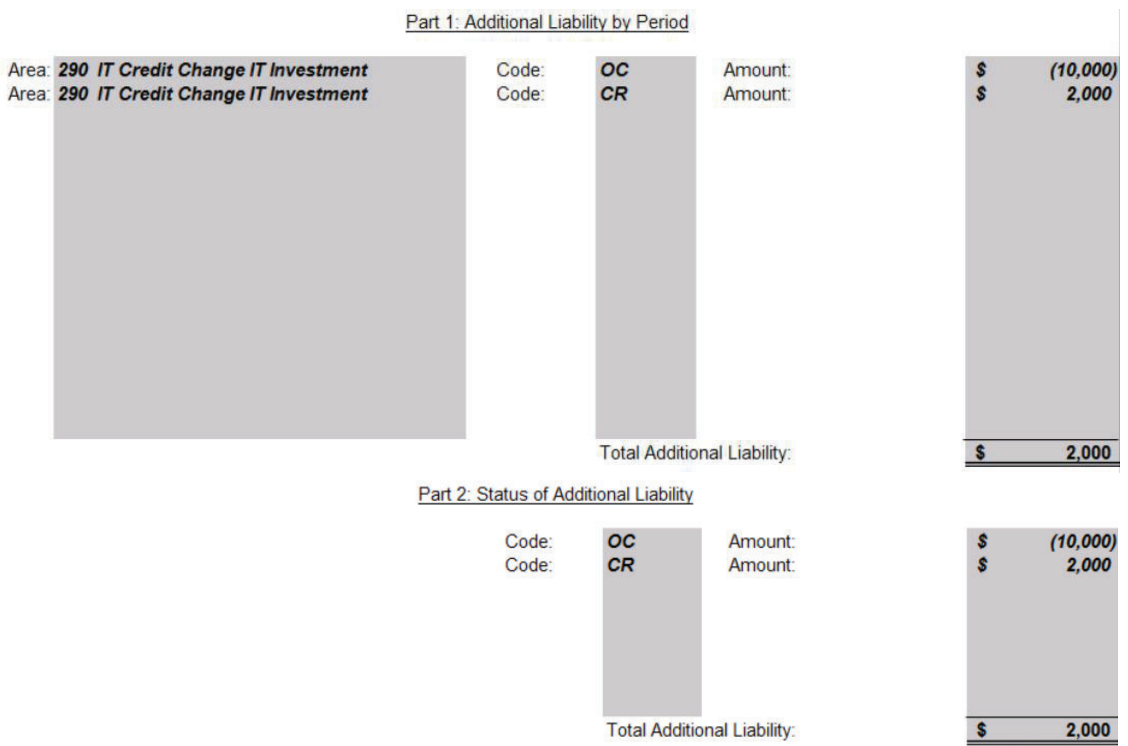
a) Examples

Claim Reduction (CR) – if reduction is unagreed or Withdrawn Notice/Claim (WC) if withdrawal is agreed

If an audit involves verifying a claim for refund, the amount of the original claim filed should be coded as OC (Original Claim). Whenever it is determined that a claim is to be reduced, then code CR (Claim Reduction) or code WC (Withdrawn Notice/Claim) is used to indicate the amount that the claim is **reduced by**. If the claim for refund covers more than one issue, the auditor should determine the principal issue of the claim for refund and use that liability code when posting the OC amount. The OC amount is entered as a negative number (-) and the CR or WC amount is always entered as a positive (+). The OC amount will not be reflected in the total for Part 1.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

CR: Taxpayer files a claim for refund in the amount of $10,000. This claim was the result of the taxpayer increasing the amount of the income tax investment credit claimed for the year. Per audit only $8,000 was allowable. Therefore the claim was reduced by $2,000. The audit was unagreed to on this issue by the taxpayer.



Part 1: Additional Liability by Period

Area	Code	Amount
290 IT Credit Change IT Investment	OC	$ (10,000)
290 IT Credit Change IT Investment	CR	$ 2,000
	Total Additional Liability:	$ 2,000

Part 2: Status of Additional Liability

Code	Amount
OC	$ (10,000)
CR	$ 2,000
Total Additional Liability:	$ 2,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

CR: Taxpayer files a claim for refund in the amount of $10,000. This claim was the result of the taxpayer increasing the amount of the income tax investment credit claimed for the year. Per audit this credit amount increase would not be allowed. The audit was unagreed to on this issue by the taxpayer.

Part 1: Additional Liability by Period

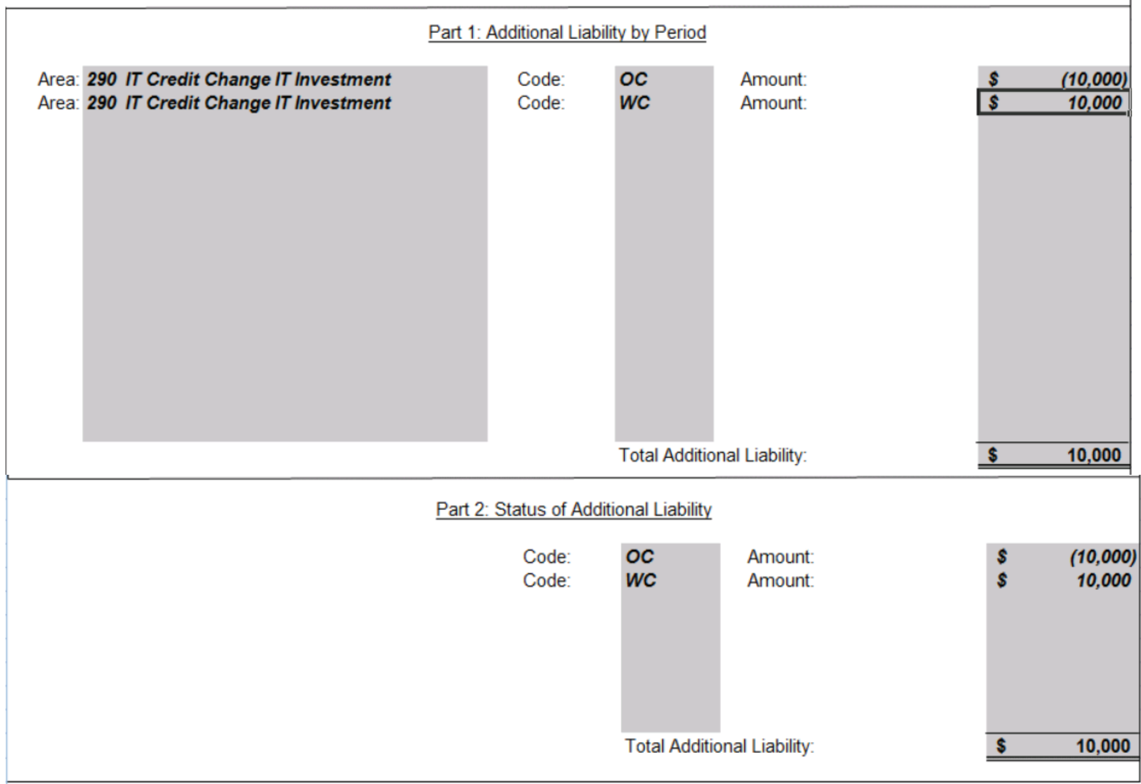
Area	Code	Amount
290 IT Credit Change IT Investment	OC	$ (10,000)
290 IT Credit Change IT Investment	CR	$ 10,000
	Total Additional Liability:	$ 10,000

Part 2: Status of Additional Liability

Code	Amount
OC	$ (10,000)
CR	$ 10,000
Total Additional Liability:	$ 10,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

WC: Taxpayer files a claim for refund in the amount of $10,000. This claim was the result of the taxpayer increasing the amount of the income tax investment credit claimed for the year. Per audit this credit amount increase would not be allowed. The taxpayer agrees to withdraw the claim and agrees to the audit findings.



Part 1: Additional Liability by Period

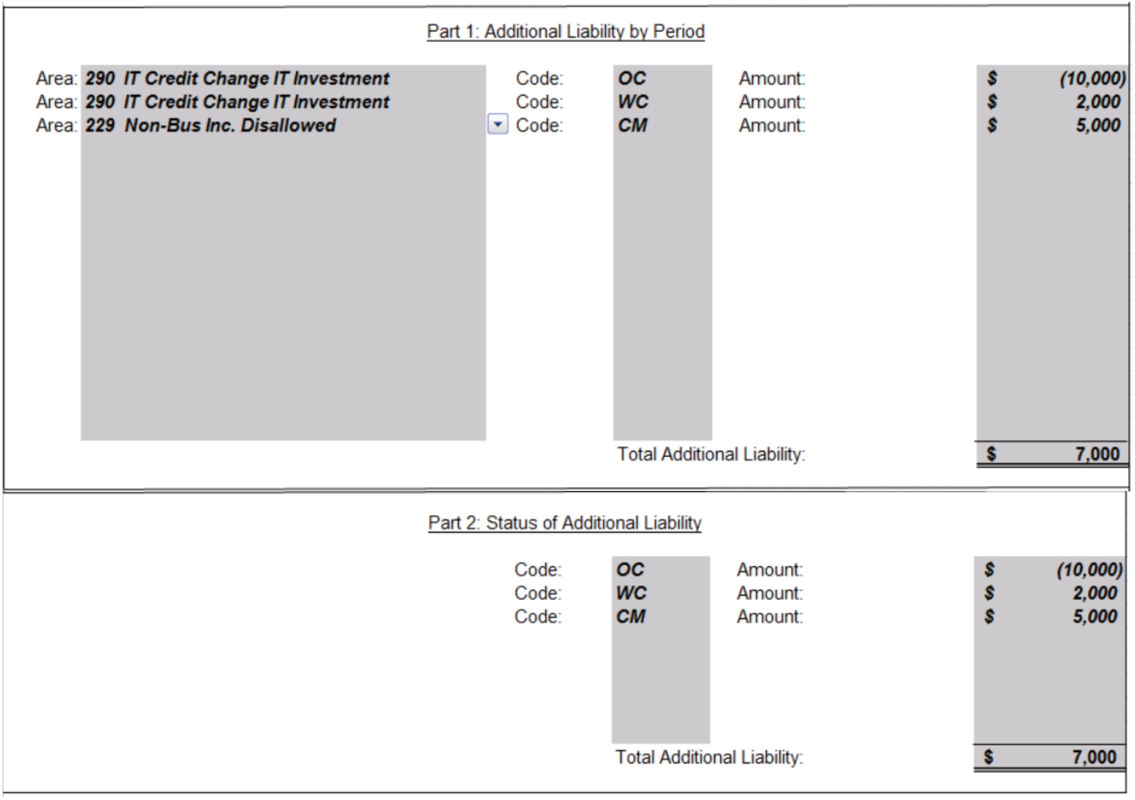
Area	Code	Amount
290 IT Credit Change IT Investment	OC	$ (10,000)
290 IT Credit Change IT Investment	WC	$ 10,000
	Total Additional Liability:	$ 10,000

Part 2: Status of Additional Liability

Code	Amount
OC	$ (10,000)
WC	$ 10,000
Total Additional Liability:	$ 10,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

WC: Taxpayer files a claim for refund in the amount of $10,000. This claim was the result of the taxpayer increasing the amount of the income tax investment credit claimed for the year. Per audit only $8,000 was allowable. Therefore, the claim was reduced by $2,000 which the taxpayer agreed to. An offset of $5,000 was agreed to by the taxpayer when the audit disallowed the Non-business income amount. The taxpayer requested the remaining $3,000 as a refund.



Part 1: Additional Liability by Period

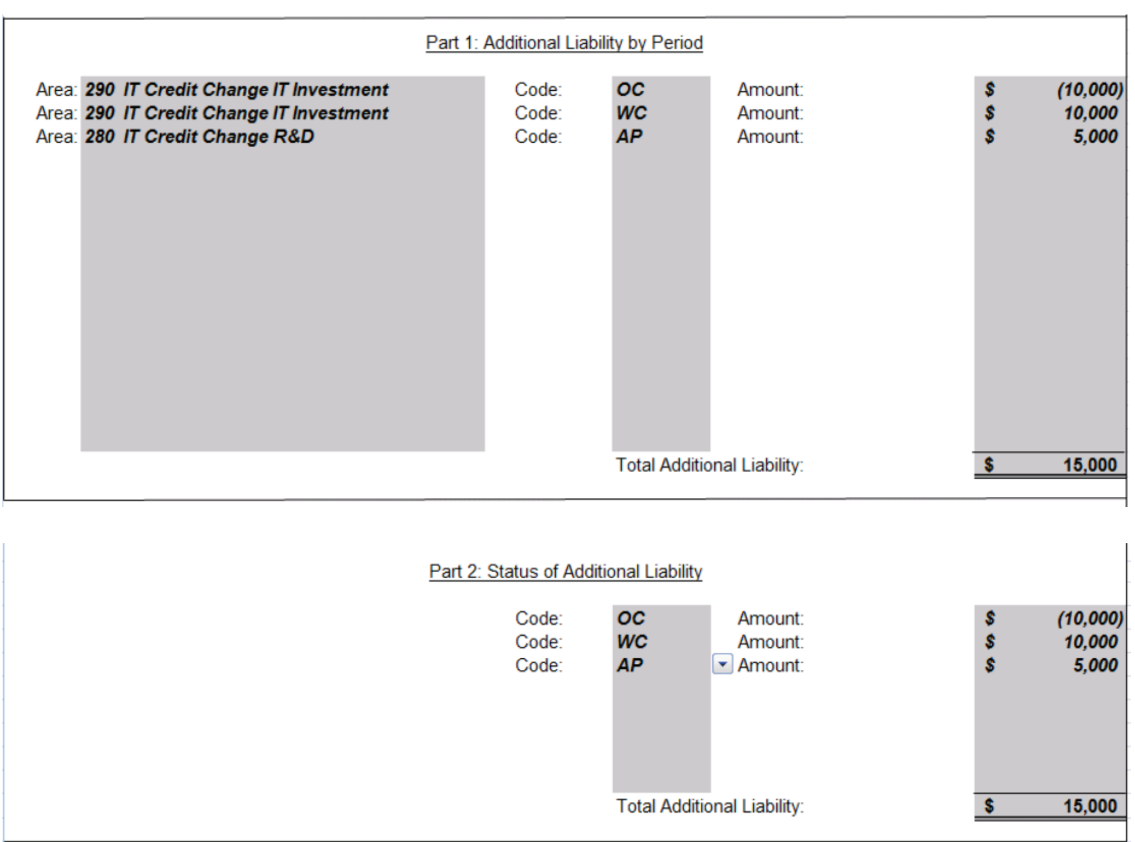
Area	Code	Amount
290 IT Credit Change IT Investment	OC	$ (10,000)
290 IT Credit Change IT Investment	WC	$ 2,000
229 Non-Bus Inc. Disallowed	CM	$ 5,000
	Total Additional Liability:	$ 7,000

Part 2: Status of Additional Liability

Code	Amount
OC	$ (10,000)
WC	$ 2,000
CM	$ 5,000
Total Additional Liability:	$ 7,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

WC: Taxpayer files a claim for refund in the amount of $10,000. This claim was the result of the taxpayer increasing the amount of the income tax investment credit claimed for the year. Per audit this credit amount increase would not be allowed. The taxpayer agrees to withdraw the claim. It was also determined in the audit that the R & D credit taken by the taxpayer was overstated. The additional liability was $5,000 which the taxpayer agreed to and paid with a check.



Part 1: Additional Liability by Period

Area	Code	Amount
290 IT Credit Change IT Investment	OC	$ (10,000)
290 IT Credit Change IT Investment	WC	$ 10,000
280 IT Credit Change R&D	AP	$ 5,000
	Total Additional Liability:	$ 15,000

Part 2: Status of Additional Liability

Code	Amount
OC	$ (10,000)
WC	$ 10,000
AP	$ 5,000
Total Additional Liability:	$ 15,000

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

WC: Taxpayer files a claim for refund in the amount of $10,000. This claim was the result of the taxpayer increasing the amount of the income tax investment credit claimed for the year. Per audit only $8,000 was allowable. Therefore, the claim was reduced by $2,000 which the taxpayer agreed to. An offset of $8,000 was agreed to by the taxpayer when the audit disallowed the Non-business income amount. A Federal RAR change creates a $1,000 claim, but this claim is offset when the auditor determines that the R & D credit taken by the taxpayer was overstated.

Part 1: Additional Liability by Period

Area:	***290 IT Credit Change IT Investment***	Code:	***OC***	Amount:	***$***	***(10,000)***

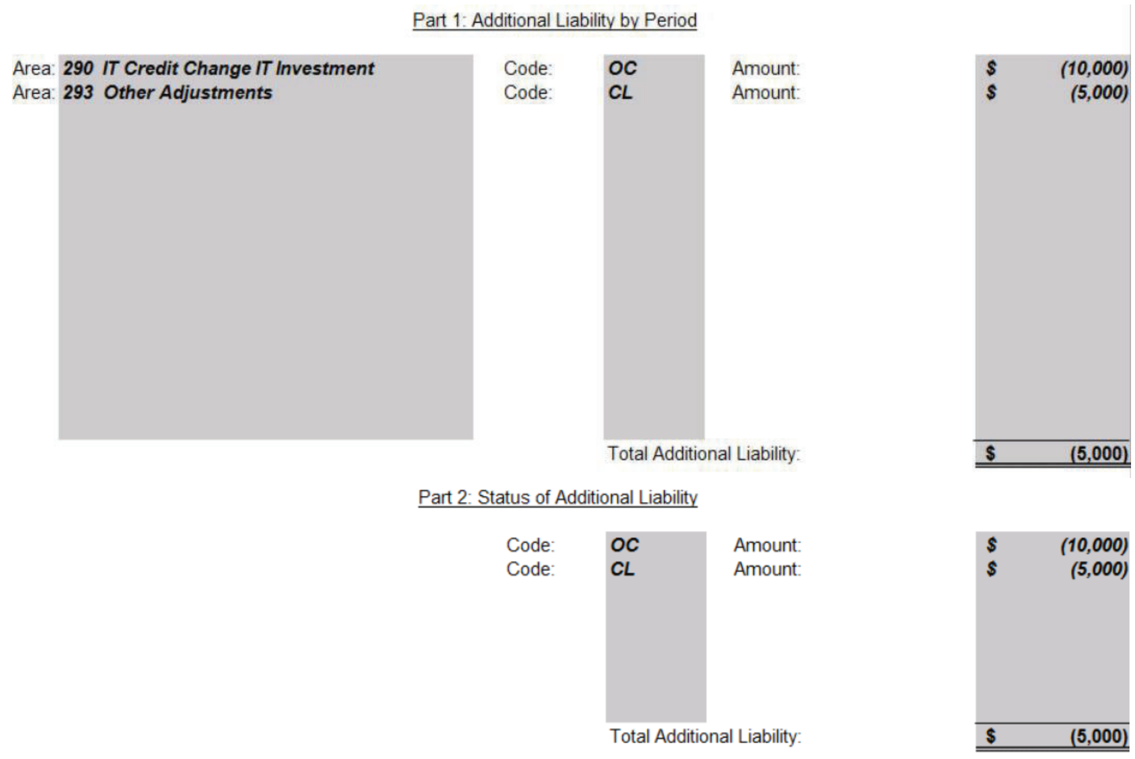
This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Claim Increase (CL)

If an audit includes changes due to an original claim for refund filed by the taxpayer, those changes are identified by the liability code OC (Original Claim). Whenever a claim for refund is the result of an audit, then CL (Claim Established) is used to indicate the amount of the claim. The OC amount is entered as a negative number (-) and the CL amount is entered as a negative (-) also.

Taxpayer files a claim for refund in the amount of $10,000. Per audit this amount was allowed, with an additional overpayment of $5,000 established in audit. Therefore, the taxpayer is entitled to the $15,000 overpayment. (For production purposes only, the CL increased claim is counted).



Part 1: Additional Liability by Period

Area	Description	Code	Code Value	Amount	$	Value
Area:	***290 IT Credit Change IT Investment***	Code:	***OC***	Amount:	***$***	***(10,000)***

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Claim Accepted as Filed

In certain audit situations, there may be zero tax impact per the audit findings, so the claim will be accepted as filed.

Taxpayer files amended returns for 2005, 2006, and 2007. The 2005 return shows a $20,000 refund, the 2006 returns shows and $8,000 refund, and the 2007 return shows a balance due of $6,000 for which the taxpayer has made a payment that has been posted. The only change that was made on these returns was to taxable income. Per the audit both the balance due and the claim amounts are correct.

	Total Additional Liability:		**$ 6,000**

10. IL-870 Waiver of Restrictions

Instructions for the preparation of an IL-870 refer to audits not part of APT, as well as audits involving issues prior to tax year 2000. It is no longer necessary to issue an IL-870 for audits being completed in APT. The IL-870M will remain in GenTax for those audits not yet part of the APT program. For audits prepared in APT refer to the New IL-870 Procedure in the APT Reference Guide.

The Waiver of Restrictions should be prepared in most audit situations. It is not required when the amended return is correct as filed or when a claim is withdrawn. An IL-870 is also not required when there is a signed EDA-153.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

It is important to remember that the IL-870 is not superseding the claim which is originally filed, unless the taxpayer formally withdraws the original claim. Generally, the IL-870 is proposing an adjustment to a previously filed claim. This is an important distinction since, at times, the “date of overpayment” is the date the claim was filed and, at other times, contingent on the date the claim was filed, the “date of overpayment” may be the end of the loss year.

The manner in which the IL-870 would be completed, and the types of statements which should appear in the Comments section in various situations, can be found in the Claim Allowed in Full and Claims Denial sections.

For more information regarding the IL-870 and the procedures for processing audits with agreed and/or paid liabilities, refer to Chapter 20 Income Tax Audit Procedure.

11. Withdrawal Letter

A taxpayer-prepared withdrawal letter is required when a claim is denied in full and the taxpayer agrees. The letter can be prepared in lieu of the EDA-153 or the IL-870.

12. Additional Amended Return

An additional amended return would normally be filed when an overpayment is greater than that claimed on the original amended return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

I. PURPOSE

This chapter contains a discussion of tax shelters, the penalties and policies the Department and Audit pursue regarding both taxpayers and promoters, and the Voluntary Compliance Program (VCP) that the Department conducted from October 15, 2004 through January 31, 2005.

- IRM 5.20.1 Abusive Tax Avoidance Transaction Program

Our tax shelter guidelines are based upon IRS determinations of reportable transactions. The IRS issues guidance regarding the transactions and whether they are abusive tax avoidance. This guidance has been issued since 1990 in the form of IRS Revenue Rulings, Notices, Regulations, and other publications. These eventually are included in the IRS's weekly Internal Revenue Bulletins and the semi-annual Cumulative Bulletins. Included in this chapter is the most recent IRS list of abusive and listed transactions, with links to the IRS summaries. The details and complexities of these transactions are not discussed in the chapter. If that is necessary, the auditor will need to research through the relevant IRS guidance. A good place to start would be the IRS website, then reviewing the issued notices, rulings, IRBs, and of course the respective regulation and code provisions.

III. GENERAL INFORMATION

As part of an ongoing effort with the IRS and nearly every state, Illinois passed P.A. 93-840 (effective July 30, 2004) to discourage participation in abusive tax avoidance transactions (ATATs). P.A. 95-707 (effective January 11, 2008) updated these provisions which reflected amendments to the IRC. In general, the laws mandate specific filing procedures and registration requirements for taxpayers participating in tax avoidance activities, as well as the promoters of ATATs.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Department sent out thousands of letters to taxpayers between October 15th and December 31st of 2004 alerting taxpayers of the Department's Voluntary Compliance Program (VCP) that ran from October 15, 2004 to January 31, 2005. Some of those letters were based on referrals received from the IRS as well as the states of California and New York that had identified certain individuals, corporations, partnerships and trusts as having potentially participated in an ATAT. Audit continues to compile ATAT information submitted by taxpayers and promoters.

The Department is responsible for conducting office or field audits on a certain number of these taxpayers that may have participated in an ATAT. Any adjustments made by the Department may be forwarded to the IRS as well as other states. Consequently, the Department will conduct audits regarding ATAT where there has been no prior contact by the IRS.

The IRS website for abusive tax transactions is at:

https://www.irs.gov/businesses/corporations/abusive-tax-shelters-and-transactions

After you are at this page, click on "Abusive Tax Shelters and Transactions".

A. BACKGROUND

Tax avoidance transactions have existed since the inception of the income tax, as taxpayers have sought avenues to avoid and evade paying taxes. In the landmark U.S. Supreme Court case Gregory v. Helvering, 293 U.S 465 (1935), the taxpayer used a series of transactions to understate her net capital gain on the sale of stock shares. The U.S. Supreme Court found that she had conducted a corporate reorganization, contributed stock to that new company, and then immediately dissolved the new company and sold the distributed shares on the same day with no other real purpose than to reduce her income tax on the sale of distributed stocks.

From this case came two important tax legal doctrines: the business purpose doctrine and substance over form doctrine. Courts applying the business purpose doctrine disregard a transaction where it had no business purpose other than to reduce federal income tax. Courts applying the substance over form doctrine recharacterize a transaction when the economic substance was different than the legal form of a transaction. Both doctrines are a means of combating ATATs.

During the 1970s there was a spike in federal tax avoidance schemes. In 1984, the IRS began requiring taxpayers to register tax shelters and promoters to maintain investor lists. Over time, Congress also implemented some other statutory procedures in the code. Some of those provisions were the following:

- IRC § 1281, Deferrals
- IRC § 1258, Conversion
- IRC § 246(c), Arbitrage
- IRC § 269, Carry-over basis
- IRC § 446, Method of accounting
- IRC § 482, Reallocation of items, related parties
- IRC § 7701(l), Multi-party transactions

The IRS implemented some key regulations in the 1990s to counter ATATs.

- Partnership anti-abuse rule (1994) – 26 CFR § 1.701-2(a)
- OID anti-abuse rule (1996) – 26 CFR § 1.1276-2(g)
- Consolidated return anti-abuse rule – Language included to prevent ATATs (e.g. 26 CFR § 1.1502-13(h))

The federal judiciary, in addition to the business purpose and substance over form doctrines, developed a third doctrine that confronted ATATs: the economic substance doctrine. This doctrine denies benefits to the taxpayer if the economic substance of a transaction is insignificant to the tax benefits obtained.

All of these developments were useful but did not eliminate taxpayer creativity and efforts to evade tax liability. On February 28, 2000, the IRS issued temporary regulation § 1.6011-4 which was finalized in 2003. This regulation prescribed the disclosure of reportable transactions, including listed transactions that the IRS has determined to tax avoidance transactions. In March 2003 the federal Form 8886, Reportable Transaction Disclosure Statement, was issued for taxpayers to disclose their reportable transactions. To deal with lack of compliance, Congress updated the IRC under the American Jobs Creation Act (P.L. 108-357, effective October 22, 2004) with several penalty provisions for failure to disclose reportable transactions and participation in ATATs. Lastly, in July 2007 the IRS amended regulations § 1.6011-4 by eliminating book-tax differences and adding transactions of interest to the category of reportable transactions.

B. DEFINITIONS

The Department's ATAT program uses the terms "reportable transaction" and "listed transaction" that are copied from the IRS definitions. These two terms are used throughout this chapter and are essential to the ATAT penalties imposed by the Department. IAC § 100.5060(a) defines them as follows:

Requirement to Disclose Participation in Reportable Transactions

1) In general. For each taxable year in which a taxpayer is required to make a disclosure statement under Treasury Regulations Section 1.6011-4 (26 CFR

1.6011.4 (2004)) with respect to a reportable transaction in which the taxpayer participated in a taxable year for which a return is required under IITA Section 502, the taxpayer shall file a copy of such disclosure with the Department. (IITA Section 501(b)) A copy of such disclosure shall be filed at the time and in the manner provided under subsection (b) of this Section.

2) Definitions. For purposes of this Section:

A) Reportable Transaction. A "reportable transaction" is any transaction that must be disclosed under Treasury Regulations Section 1.6011-4 and shall include any listed transaction that is required to be disclosed under Treasury Regulation Section 1.6011-4T or 1.6011-4 as of the earlier of the date disclosure is required under subsection (b)(1) of this Section or the date the taxpayer files its return to which such disclosure would need to be attached.

B) Listed Transaction. A "listed transaction" is any transaction entered into after February 28, 2000 that is the same as or substantially similar to one of the types of transactions that the IRS has identified by notice, regulation, or other form of published guidance as a listed transaction and that is required to be disclosed under Treasury Regulation Section 1.6011-4T or 1.6011-4.

The following definitions come from the Internal Revenue Manual (IRM 4.32.1-1) and are frequently used terms regarding abusive tax avoidance transactions.

1. Tax Shelter -- A tax strategy or promotion that "shelters" income from normal taxation. Depending on the facts and legal analysis, a specific transaction or promotion may represent either lawful tax avoidance or unlawful tax evasion. Those tax shelters resulting in tax evasion are known as abusive tax shelters. The term "tax shelter" is sometimes used to mean "abusive tax shelter" in common parlance.

2. Abusive Tax Shelter -- Specific tax transaction/promotion that "shelters" income from normal taxation by taking a tax position that is not supported by tax law or manipulates the law in a way that is not consistent with the intent of the law (tax evasion). The term "Abusive Tax Shelter" is commonly used to mean an abusive tax transaction or promotion that is highly technical and represents a strategy that is often marketed by an accounting or law firm. These transactions may sometimes be referred to as "abusive promotions." When IRS identifies an abusive tax shelter as a listed transaction, that shelter is then subject to disclosure requirements pursuant to Treas. Regs. 1.6011-4. See listed transaction below in this table for a complete description. Not all abusive tax shelters are listed transactions.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

3. Reportable Transactions -- Reportable transactions include the following:
   - Listed transactions
   - Transactions offered under conditions of confidentiality
   - Transactions subject to contractual protection
   - Loss transactions
   - Transactions of interest.

   See Treas. Reg. 1.6011-4(b) for more information regarding the types of reportable transactions. Just because a transaction is a reportable transaction does not make that transaction an abusive tax shelter. Taxpayers must disclose their participation in reportable transactions as provided in Treas. Reg. 1.6011-4(e). If taxpayers do not disclose their participation in the reportable transaction, they will be subject to penalty pursuant to IRC 6707A (up to $50,000 for non-listed reportable transactions or $200,000 for listed transactions). In addition, material advisors must maintain and furnish lists of certain investor information with respect to reportable transactions under IRC 6112 and Treas. Reg. 301.6112-1 or be subject to penalty pursuant to IRC 6708. Per the American Jobs Creation Act of 2004 (Pub.L. No. 108-357), material advisors must disclose reportable transactions pursuant to IRC 6111 and Treas. Reg. 301.6111-3 or be subject to penalty under IRC 6707.

4. Listed Transaction -- A transaction is a reportable transaction subject to disclosure pursuant to Treas. Reg. 1.6011-4(a) and (b)(1) and IRC 6111, and for which material advisor lists must be maintained pursuant to IRC 6112. A transaction is a listed transaction if it is the same as or substantially similar to a transaction the IRS has identified as a listed transaction by published guidance. A transaction is substantially similar if it is expected to obtain the same or similar types of tax consequences and is either factually similar or based on the same or similar tax strategy as that described in the published guidance. When the IRS identifies a transaction as a listed transaction, it considers the transaction to be an abusive tax avoidance transaction.

5. Frivolous Tax Promotion/Scam -- A transaction/promotion that is clearly unallowable or has no existing basis in law such as the slavery reparations credit or IRC 861 arguments (taxpayer claims that their income is not taxable or that withholding is not applicable).

6. Transactions of Interest -- A transaction of interest (TOI) is a reportable transaction subject to disclosure pursuant to Treas. Reg. 1.6011-4 and IRC 6111, and for which material advisors must maintain lists pursuant to IRC 6112. A transaction is a transaction of interest if it is the same as or substantially similar to one of the types of transactions that the IRS has identified by published guidance as a transaction of interest. A transaction is substantially similar to a transaction of interest if it is expected to obtain the same or similar types of tax consequences and is either factually similar or based on the same or similar tax strategy as that described in the published guidance.

TOIs are transactions that the IRS is interested in gathering more information about that could potentially be abusive tax shelters.

See the "EXHIBITS" section for more information from and links to IRS webpages regarding reportable transactions.

C. FEDERAL DISCLOSURE FORMS

The following describes some of the primary disclosure forms that are or were required of participants and promoters. The descriptions below will mention if the form has been replaced or not.

1. Participant Forms

A) Form 8886 Reportable Transaction Disclosure Statement

This form is for the taxpayer to disclose information for each reportable transaction in which they participated. The form applies to transactions entered into after December 31, 2002. Prior to that date, Treasury regulations prescribed the proper format for making disclosure. This form should identify the scheme, amount of benefits, as well as identify the promoter.

Generally, a separate federal Form 8886 must be filed for each reportable transaction, but more than one transaction may be listed on the form if the transactions are the same or substantially similar. The form instructions include a listing of the various reportable transactions. This is where an auditor can find most of the information to identify an ATAT.

B) Schedule M-3

Starting with taxable years ending on or after December 31, 2004, the IRS replaced Schedule M-1 with the Schedule M-3 for corporations with assets of $10 million or more. Schedule M-3 provides a detailed reconciliation from the taxpayer's financial accounting net income to its taxable income.

For tax year 2006, the IRS extended the filing requirement for Schedule M-3 to other returns, including partnerships, Subchapter S corporations, and insurance companies. These Schedules M-3 are based largely upon the format used for the Form 1120 and modified as appropriate.

The Form 1120 Schedule M-3 has three parts:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

- Schedule M-3, Part I, asks certain questions about the corporation's financial statements and reconciles financial statement net income (loss) for the corporation (or consolidated financial statement group, if applicable), as reported on Part I, line 4a, to net income (loss) of the corporation for U.S. taxable income purposes, as reported on Part I, line 11.

- Schedule M-3 Parts II and III reconcile financial statement net income (loss) for the U.S. corporation (or consolidated tax group, if applicable), as reported on Schedule M-3, Part I, line 11, to taxable income on Form 1120, page 1, line 28.

As explained in IRS Notice 2006-6, transactions with significant book/tax differences, are no longer reportable transactions.

C) Form 8271

Form 8271 Investor Reporting of Tax Shelter Registration Number was used to report the tax shelter registration number that the IRS assigns to certain tax shelters required to be registered under IRC § 6111. In 2007, the form was discontinued and now taxpayers can report the registration number on the Form 8886.

D) Form 8275

Form 8275 Disclosure Statement is used by taxpayers and tax return preparers to disclose items or positions, except those taken contrary to a regulation, that are not otherwise adequately disclosed on a tax return to avoid certain penalties. The form is filed to avoid the portions of the accuracy-related penalty due to disregard of rules or to a substantial understatement of income tax for non-tax shelter items if the return position has a reasonable basis. It can also be used for disclosures relating to the economic substance penalty and the preparer penalties for tax understatements due to unreasonable positions or disregard of rules.

E) Form 8275-R

Form 8275-R Regulation Disclosure Statement is used by taxpayers and tax return preparers to disclose positions taken on a tax return that are contrary to Treasury regulations. The form is filed to avoid the portions of the accuracy-related penalty due to disregard of regulations or to a substantial understatement of income tax for non-tax shelter items if the return position has a reasonable basis. It can also be used for disclosures relating to the economic substance penalty and the preparer penalties for tax understatements due to positions taken contrary to regulations.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2. Material Advisor/Promoter Forms

A) Form 8918

Form 8918 Material Advisor Disclosure Statement: This form replaced Form 8264 in 2007 and is used for material advisors (i.e. organizers, promoters) to disclose information about their participation in reportable transactions.

B) Form 8264

Form 8264 Application for Registration of a Tax Shelter was used by organizers of certain tax shelters to register the transaction with the IRS, and was replaced by Form 8918.

D. ILLINOIS DISCLOSURE REQUIREMENTS

IITA § 501(b) contains the requirements for the disclosure of reportable transactions. These requirements are further clarified in IAC § 100.5060. Basically, Illinois disclosure consists of providing the Department copies of whatever disclosure forms the IRS requires.

A check box was added to the Form IL-1120 starting in 2005 that taxpayers marked if they filed a federal Form 8886 or Schedule M-3 to disclose a reportable transaction, and instructions were added to Illinois tax returns requiring taxpayers to attach to their Illinois return whatever disclosure forms were required to be attached to their federal returns. The form instructions tell taxpayers to mail a duplicate copy of their federal disclosure form(s) to the following address:

Illinois Department of Revenue
P.O. Box 19029
Springfield, IL 62794-9029

Filing a duplicate copy was required by IAC § 100.5060(b). This was the same P.O. Box number used for our first Amnesty program.

Note: The taxpayer is only required to attach the federal Schedule M-3 to the Illinois return if it was used to disclose a tax shelter for federal income tax purposes. If the taxpayer's federal return has a Schedule M-3, then the auditor will have to check to see if it discloses a reportable transaction, and if so, check to see that a copy was attached to the Illinois return or mailed to the Department's P.O. Box number.

The taxpayer must file a copy of the federal disclosure form with the Department for each taxable year in which a taxpayer is required to make a federal disclosure statement under CFR §1.6011-4, even if it is for the same reportable transaction as in the prior year.

1. Participant Requirements

A) Disclosure Requirement

If you have Illinois nexus and are, or were, required to file federal Form 8886 (or a similar form prescribed by the IRS) with your federal income tax return, you are required to submit a copy of the federal form to the Illinois Department of Revenue for each taxable year that you are required to make a federal disclosure.

B) Due Date for Disclosure

Disclosure of participation in a reportable transaction (including listed transactions) must be made by the due date (including extensions) of the Illinois income tax return. If the federal due date is later than this date, the disclosure must be made no later than the federal due date.

C) Manner of Disclosure

Illinois requires that you submit two copies of the form used to disclose the transaction to the IRS: One copy of the federal disclosure statement (Form 8886 or a similar form prescribed by the IRS such as the Schedule M-3, or Form 8271) must be attached to your Illinois income tax return for the tax year that the IRS disclosure was required. In all cases, except the last situation outlined below, a second copy must be sent to the following address:

Illinois Department of Revenue
P.O. Box 19029
Springfield, IL 62794-9029

1) Current-year Disclosure, TYE on or after December 31, 2004

With respect to reportable transactions in which the taxpayer participated for taxable years ending on and after December 31, 2004, disclosure must be made at the time disclosure is required under CFR §1.6011-4(e). If the taxpayer discloses a reportable transaction on the federal return, a copy must be attached to the Illinois return for the same taxable year. Ref: IAC § 100.5060(b)(2)(B).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In addition, the taxpayer is required to mail a duplicate copy of the federal disclosure forms (not a copy of the Illinois return) to the following address:

Illinois Department of Revenue
P.O. Box 19029
Springfield, IL 62794-9029.

If no Illinois return is due under IITA § 502, then the taxpayer must mail one copy of the federal disclosure to this P.O. Box. However, at this time we will not penalize the taxpayer for filing only one copy of the federal disclosure forms.

2) Members of Combined Group

If any member of the combined group is required to file a disclosure statement for a taxable year taken into account in computing the group's combined net income, a copy must be attached to the Illinois combined return. If a member of a combined group is required to file a disclosure statement related to a taxable year for which it was not a member of the combined group, a copy should be filed with the combined return. The designated agent should indicate that such statement relates to a separate return year of the member and indicate the taxable year to which the disclosure relates. See IAC § 100.5060(c)(1).

3) Members of Unitary Business Group

If any member of a unitary business group is required to file a disclosure statement for a taxable year taken into account in computing the group's combined net income, a copy must be attached to the Illinois combined return. See IAC § 100.5060(c)(3).

4) Partner or Shareholder

If a taxpayer is required to make a disclosure with respect to a transaction engaged in during the taxable year by a partnership or Subchapter S corporation in which the taxpayer is a partner or shareholder, the taxpayer's obligation to make disclosure with respect to the transaction shall be met if the disclosure is made by the partnership or Subchapter S corporation on a timely composite return that includes the taxpayer. See IAC § 100.5060(c)(4)

The partner or shareholder may choose to fulfill disclosure requirements by mailing the federal disclosure form directly to the Department. The partner or shareholder is responsible for ensuring that the Department receives any required documents by the due dates indicated. For example, if a partnership indicates that the disclosure will be filed with the composite return, and

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

partnership fails to do so, the partner is ultimately responsible, not the partnership. Ref: Informational Bulletin FY 2005-17

For TYE on or after December 31, 2014, the composite return will be retired. Thus, presumably disclosure will be able to be done through the respective Forms IL-1065 and IL-1120-S, since these forms will be used to accomplish what was done through the retired Form IL-1023-C.

5) Protective Disclosure

Taxpayers that believe they do not have a filing requirement under IITA § 502 but have participated in a reportable transaction can still file the appropriate reportable transaction disclosure with Illinois and explain their lack of a filing requirement under IITA § 502. This will protect the taxpayer regarding the reportable transaction filing requirement under IITA § 501(b). See IAC § 100.5060(e).

6) Current-year Disclosure, TYE before December 31, 2004

As previously stated, Illinois disclosure consists of providing the Department copies of whatever disclosure forms the IRS requires. IAC § 100.5060 specifically refers to federal Form 8886 and the federal Schedule M-3.

IITA § 501(b) requires that taxpayers disclose to the Department any transaction entered into after February 28, 2000 that becomes a listed transaction at any time.

If the transaction is required to be disclosed for federal purposes on a return filed for a taxable year ending before December 31, 2004, then Illinois disclosure must be made by attaching a copy of the federal disclosure to the first Illinois return with an original due date (without regard to extensions) on or after July 30, 2004, the effective date of PA 93-840. For a calendar year taxpayer, this would be the 2004 return. Ref: IAC § 100.5060(b)(2)(A).

If disclosure is being made for an earlier taxable year, then copies of back federal disclosure forms had to be attached to the current Illinois return and clearly marked that the disclosure forms are for earlier years.

Example #1

The taxpayer filed its calendar year 2003 federal Form 1120 and attached Form 8886 and checked the box on line 2b for a “Confidential transaction”. The taxpayer neither discloses the transaction on its 2004 Form IL-1120

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

nor mailed the form to our P.O. Box number. The auditor discovers that the transaction was entered into on October 1, 2002. Since the transaction was entered into prior to February 28, 2003, and it was not a listed transaction, no Illinois disclosure was required.

Example #2

On the 2003 federal Form 1120, the taxpayer checked box 2a on Form 8886 for a listed transaction. The taxpayer failed to attach a copy to its 2004 Form IL-1120. Regardless of what the listed transaction was for or whether or not tax was owed on the transaction, the taxpayer will be subject to a $30,000 IITA § 1001(b)(2) penalty subject to the 10% limitation in IITA § 1001(c). Although the Form 8886 was attached to the 2003 federal return, the penalty is imposed for 2004 since that is the year when Illinois disclosure was required.

Example #3

Corporation A was required under CFR §1.6011-4 to disclose reportable transactions by attaching Form 8886 and/or Schedule M-3 to its federal income tax return for its taxable year ending March 31, 2003. Corporation A may elect to attach copies of Form 8886 and Schedule M-3 to its Illinois income tax return for its taxable year ending March 31, 2004. If it does not make this election, Corporation A is required to attach copies of Form 8886 and Schedule M-3 to its Illinois income tax return for the taxable year ending March 31, 2005, which is the first return for which the unextended due date falls on or after July 30, 2004. In either case, Corporation A must indicate that Form 8886 and Schedule M-3 relate to its March 31, 2003, taxable year. Ref: IAC § 100.5060(b)(2) example.

2. Material Advisor/Promoter Requirements

As a backstop to investor disclosure, the IRS requires that tax professionals that promote these potential ATATs file returns disclosing these transactions to the IRS and then keep a list of investors in the transaction. Illinois coupled onto this promoter disclosure beginning January 11, 2008.

Two new sections were added to the Act for this disclosure, IITA §§ 1405.5 (promoter's IRS transaction disclosure) and 1405.6 (promoter's IRS investor list).

IITA § 1405.5(a) states:

> Federal tax shelter. Any material advisor required to make a return under Section 6111 of the Internal Revenue Code with respect to a reportable transaction shall send a duplicate of the return to the Department not later than the day on which the return is required to be filed under federal law.

IITA § 1405.6(a) states:

> Federal abusive tax shelter. Any person required to maintain a list under Section 6112 of the Internal Revenue Code shall furnish a duplicate of such list to the Department not later than the earlier of the time such list is required to be furnished to the Internal Revenue Service for inspection under Section 6112 of the Internal Revenue Code or the date of written request by the Department.

IITA §§ 1405.5(c) and 1405.6(c) describe the transactions subject to promoter disclosure, which are reportable transactions that have nexus with Illinois. Department regulations were issued in 2009 that outline how promoters are to comply with promoter disclosure. IAC § 100.5080 pertains to IITA § 1405.5 and outlines the disclosure required by promoters for the tax shelter or reportable transaction. IAC § 100.5070 pertains to IITA § 1405.6 and outlines the disclosure of investor lists. Care should be applied when reviewing the disclosure requirements, which our regulations explain, because of federal law changes. Effective October 22, 2004, the term "tax shelter" was deleted from IRC §§ 6111 and 6112. IITA §§ 1405.5(b) and 1405.6(b) required disclosure for transactions that became listed until P.A. 95-707 repealed those subsections January 10, 2008. After January 10, 2008, returns and lists required to be filed with the IRS under IRC § 6111 must be provided to the Department.

A) Standard Disclosure Requirements

If a material advisor is required to file a federal Form 8918 Material Advisor Disclosure Statement (or a similar form prescribed by the IRS such as Form 8264) with respect to a reportable transaction having nexus with Illinois, it is required to submit a copy of that federal form to the Illinois Department of Revenue.

B) Due Date

For federal income tax purposes, the IRS requires material advisors to make disclosures by the last day of the month following the end of the applicable calendar quarter in which the advisor became a material advisor for the reportable transaction. Illinois requires that the copy of the federal form be filed with the Department on the same date as the federal filing. This means both the federal and Illinois due dates are January 31, April 30, July 31, or October 31.

C) Manner of Disclosure

1) Standard Disclosure Manner

A copy of the federal form (Form 8918 or similar form prescribed by the IRS) must be furnished to the Department at the following address:

Illinois Department of Revenue
P.O. Box 19029
Springfield, IL 62794-9029

2) Investor Lists for Reportable Transactions

Material advisors are also required to maintain a list under IRC § 6112 identifying each taxpayer for whom the person provided services as a material advisor with respect to a reportable transaction. A duplicate copy of the investor list provided to the IRS must be provided to Illinois when the reportable transaction has nexus in Illinois. It is to be furnished not later than the following dates: the same date as it is required to be furnished to the IRS, or the date that is specified in a written request by the Department.

IV. AUDITING ATAT ISSUES

A. REVIEWING AUDIT

On every audit the auditor will need to check if the taxpayer has disclosed a reportable transaction to the IRS either on federal Forms 8886, 8271 (prior to 8/2/07), 8264 (prior to 10/31/07), 8918 (replaced Form 8264), 8275, 8275-R or Schedule M-3. The principal federal form on which taxpayers disclose reportable transactions will be the federal Form 8886. Promoters ("material advisors") currently disclose on federal Form 8918. IITA § 501(b) requires Illinois disclosure of reportable transactions, whether or not tax is ever due from these transactions. Failure to make disclosure may subject the taxpayer to a flat $15,000 penalty on a reportable transaction or $30,000 on listed transactions subject to a 10% limitation under IITA § 1001(c).

The taxpayers do not owe federal or state tax just because they engaged in a listed transaction considered abusive by the IRS. In order to adjust federal taxable income, we would have to apply the criteria in IRS notices and publications regarding that transaction before determining if the transaction is abusive. Consequently, in most cases we are not going to adjust federal taxable income to reverse abusive tax shelters unless there is a federal RAR. When auditing returns that have not been federally audited, emphasis should be placed on the taxpayer properly disclosing any reportable transactions to Illinois.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

However, we can still audit the transaction and adjust federal taxable income, and then report that change to the IRS.

Refer to the section “ILLINOIS DISCLOSURE REQUIREMENTS”.

Next, the auditor will need to consider if any user penalties apply if the taxpayer underreported income to Illinois because of an ATAT. The applicable penalty rate is multiplied by the penalty base, which is basically the underreported income due to the ATAT times the applicable tax rate.

On all RARs the auditor will have to examine a detailed breakdown of the RAR adjustments and determine what portion, if any, was the result of a reportable transaction for purposes of assessing the IITA § 1005(b)(1) reportable transaction understatement penalty and IITA § 1005(c) 100% interest penalty. The ATAT adjustment to federal taxable income will have to be documented on a separate schedule, and applicable ATAT penalties computed on that tax.

Just because the taxpayer engaged in a listed transaction does not mean that tax or penalty is owed from it. Once the tax shelter has been identified, the auditor should refer to IRS notices and other published IRS guidance to determine if the shelter is abusive and whether or not the auditor should refer the case to the IRS.

Refer to the section “ATAT PENALTIES AND INTEREST”.

Lastly, the auditor will need to consider if promoter penalties are applicable. These penalties were created with the other ATAT legislation in 2004 and updated by P.A. 95-707 in 2008 to reflect IRS changes. They require the promoters to disclose the tax shelters and investor lists to the Department or face penalties.

Refer to the section ”PROMOTER PENALTIES”.

B. 6-YEAR STATUTE

Public Act 93-840 provides for a six-year statute for issuing notices of deficiency (NODs). IITA § 905(b)(2) states:

> Reportable transactions. If a taxpayer fails to include on any return or statement for any taxable year any information with respect to a reportable transaction, as required under Section 501(b) of this Act, a notice of deficiency may be issued not later than 6 years after the return is filed with respect to the taxable year in which the taxpayer participated in the reportable transaction and said deficiency is limited to the non-disclosed item.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The effective date of P.A. 93-840 is July 30, 2004. This gives the Department a six-year statute from the extended due date of the return or the date the return was filed, whichever is later, in order to assess tax from an undisclosed reportable transaction. Any deficiency under this statute is limited to the non-disclosed item. This statute however only applies to returns where the taxpayer has not disclosed involvement in a reportable transaction on an original return or an amended return. In addition, in order to apply this six-year statute, the normal statute of limitations could not have been expired as of July 30, 2004, the effective date of P.A. 93-840, unless the auditor had a waiver to extend the statute.

Example #4

The audit is for calendar years 2003 and 2004. The auditor discovers that the taxpayer never disclosed a listed transaction for the year 2001 that indicates tax due (no amended return was filed for 2001). The 2001 return was filed timely, so the normal three-year statute of limitations under IITA § 905(a)(1) is October 15, 2005. The statute on the 2001 return was open at the time P.A. 93-840 became effective; therefore the statute date under IITA § 905(b)(2) is six years from the extended due date of the 2001 return, which on an IL-1120 would be October 15, 2008. However, this extended statute can only be used to assess tax, penalty, and interest from the ATAT.

> Note: Even if the return is out-of-statute, it is possible that the 25% omission of income statute in IITA § 905(b)(1) could apply. This statute is discussed in Chapter 21 of the Audit Manual.

Example #5

The taxpayer filed a Form IL-1120-X, along with a VCP-1 on January 31, 2005 for calendar year 2001 to report tax due on a listed transaction that increased a federal capital gain. No amended federal return was filed and there is no Illinois waiver for this year; therefore, the normal statute of limitation in IITA § 905(a)(1) expired on October 15, 2005. The new six-year statute in IITA § 905(b)(2) does not apply since the reportable transaction was disclosed on an amended return.

If the new ATAT statute does not apply, then IITA § 905(a)(1) generally provides that a notice of deficiency shall be issued not later than three years after the date the return was filed. However, IITA § 905(b)(1) extends that limitation period to six years if a taxpayer omits from base income an amount properly includible therein which is in excess of 25% of the amount of base income stated in the return. In addition, IITA § 905(e)(1) states that where notification of a federal change is given, a notice of deficiency may be issued at any time within two years after the date such notification is given, provided that the notice is limited to the amount of the deficiency resulting from the recomputation of the taxpayer's Illinois net income after giving effect to the federal change.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Refer to Chapter 21 of the Audit Manual for more information on the statute dates for federal and state changes.

C. FORM EDA-130

When beginning any new audit, especially a case where an abusive tax shelter is suspected, the auditor should provide the taxpayer with Form EDA-130, Information Document Request for Tax Avoidance Transactions, intended to provide the auditor with information on any possible federal tax shelters. Also, in the case of a regular audit where no abusive tax shelter activity is suspected, there is a statement at the bottom of the first page of the form that the taxpayer can sign to indicate no involvement in any reportable transactions. This form will be mailed to the taxpayer at the start of every new audit including audits where there is no evidence of an abusive tax shelter. The EDA-130 may be attached to appointment initiation letters. The EDA-130 is available as a fill-in form on the intranet under "Audit" and then "Forms". The form has also been copied and is located in the "EXHIBITS" section of this chapter.

The document request Form EDA-130 lists the following items:

1. A description of all listed and reportable transactions including all of the material facts.

2. A description of the tax treatment of all listed or reportable transactions that resulted in a tax benefit.

3. Information identifying the amounts involved and the General Ledger accounts affected by any part of any listed or reportable transactions. Please trace all identified items and amounts as line items on the tax returns.

4. Copies of all contracts and other documents pertaining to any listed transaction.

5. The names and addresses of all parties who promoted, solicited, or recommended participation in any listed or reportable transaction, and to whom fees or other compensation were paid in connection with the transaction.

6. The details of any tax strategies that were disclosed to any other state.

7. Copies of requests made to the IRS to determine if any transaction you participated in should have been disclosed as a listed or reportable transaction. Include any responses you have received.

8. Details of any other state's tax shelter initiatives that you have responded to or entered into agreement with, including copies of signed agreements.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

9. Any federal Forms 8886 and 8271 that you filed with the IRS, but have not previously provided to the Illinois Department of Revenue.

At the opening conference with the taxpayer, there are additional questions that should be asked regarding abusive tax shelters:

- Are you currently under audit by the IRS?
  - For what years?
  - When do you expect it to be concluded?
  - Has the IRS requested any information regarding 'reportable transactions'? If so, please provide copies of all IDR requests made by the IRS.

- Have you filed amended returns with the IRS or any other taxing entity? If so, were any of those amended returns filed to correct items that the IRS considers 'Listed Transactions' or substantially similar transactions?

- Have you made any disclosures regarding tax-planning strategies to the IRS or any other state? Have you paid any fees for tax planning strategies?

V. ATAT PENALTIES AND INTEREST

A. USER PENALTIES

1. General Information – IITA § 1001(b), Failure To Disclose

If the taxpayer fails to properly disclose a reportable transaction, then the taxpayer may be subject to the non-disclosure penalty in IITA § 1001(b). The penalty has two rates:

- $15,000 for each failure to disclose a "reportable transaction"
- $30,000 for failure to disclose with respect to a "listed transaction"

Generally, the penalty applies to failure to disclose listed transactions entered into on or after February 28, 2000 and all other reportable transactions entered into on or after February 28, 2003. The penalty is deemed assessed upon filing the return. Both penalties are subject to a 10% limitation as explained later in this chapter. Assessing this penalty is explained later in this chapter.

Under IITA § 501(b) and IAC § 100.5060, the taxpayer is required to file with Illinois whatever disclosure forms the taxpayer filed federally under 26 CFR § 1.6011.4 (2004). IAC § 100.5060 along with the Form IL-1120 and form instructions specifically refer to federal Form 8886 and Schedule M-3, but other federal disclosure forms may apply.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

2. Assessing the IITA § 1001(b) Penalty

IITA § 1001(b) imposes a penalty for each failure to disclose participation in a reportable transaction as required under IITA § 501(b). The penalty is $15,000 for each failure to disclose the transaction ($30,000 in the case of a listed transaction). Both penalties are subject to the 10% limitation in IITA § 1001(c).

Example #6

The taxpayer attached three Forms 8886 to their federal return for 2004: one is for a listed transaction and the other two are for reportable transactions. If the taxpayer does not attach the Forms 8886 to their Illinois return or send copies to our P.O. Box number, then the combined IITA § 1001(b) penalty for 2004, subject to the 10% limitation, will be $60,000 ($30,000 + (2 x $15,000)).

The penalty will be imposed in the year that Illinois disclosure was required. For example, if the IITA § 1001(b) penalty is applicable for a transaction entered into in 2003 and disclosed on the 2003 federal tax return, then the penalty will be assessed on the first Illinois return due after July 30, 2004 (without extensions). On a calendar year filer this will be the 2004 Illinois return.

Currently there is no mechanism in the field for assessing the IITA § 1001(b) penalty. Since the penalty is deemed assessed, the penalty is not included on the IL-870 nor is it included on the EDA-122. The penalty must be assessed on a Notice and Demand issued by Technical Review.

The auditor will have to request a separate track for whatever year(s) we are imposing the IITA § 1001(b) penalty. GenTax will show the earliest extended due date as the statute date. The auditor will submit an audit report that will include the Prod-1, EDA-27, EDC-5, a calculation of the penalty on a separate worksheet, and the Auditor's Comments.

Note: IITA § 902(a) will not extend the time for issuing a Notice and Demand to the taxpayer on deemed assessed penalties. Consequently the IL-872 cannot be used to extend the statute on this penalty.

Example #7

The audit is for calendar years 2002 and 2003. If the auditor finds a federal Form 8886 attached to the 2002 federal return and it is for a "listed transaction" entered into after February 28, 2000, then the auditor will check to see if this form was attached to the 2004 calendar year Illinois return and whether or not the form was mailed to the P.O. Box number above. If there is no record that Form 8886 was filed with the Department,

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

then the $30,000 IITA § 1001(b)(2) penalty will be assessed on a Notice and Demand for 2004. However, the 10% limitation will be computed using the 2002 Illinois net income or Illinois net loss figures reported. The Notice and Demand will have to be issued before the IITA § 903(a) statute expires, which would be three years from the date the 2004 return was filed.

Note: There have been some cases where the Form 8886 has disclosed transactions that did not require disclosure under IITA § 501(b), so that no penalty was due from failure to file the Form 8886. If the taxpayer feels that the Form 8886 did not have to be filed with Illinois, the taxpayer will have to provide the auditor with a written explanation. The auditor will then submit it to Technical Support, and it will be forwarded to Legal Services for review.

Example #8

Taxpayer federally filed a 2012 Form 8886 disclosing a reportable transaction under protective disclosure. On audit, it is determined that Taxpayer was an Illinois nonfiler that should have filed a Form IL-1120. Taxpayer did not file any disclosure of the reportable transaction with Illinois. The auditor determines that federal disclosure was merely protective, and was not a reportable transaction required to be reported under CFR § 1.6011-4. As a result, Taxpayer had no disclosure requirement under IITA § 501(b), and no Illinois disclosure penalty will be applicable.

Example #9

Taxpayer federally filed a 2010 Form 8886 disclosing a reportable transaction, and on audit is found to have failed to have provided disclosure to Illinois. The transaction resulted in a $10,000,000 reduction in federal taxable income. Taxpayer has a 13% apportionment factor and reported Illinois net income of $15,000,000. Thus, the Illinois net income without the reportable transaction would have been $16,300,000 ($15,000,000 + ($10,000,000 x 13%)). The IITA § 1001(b) 10% limit, is (($16,300,000-$15,000,000) x 10%)), or $130,000. The penalty then is $15,000, as the 10% limitation exceeds the statutory penalty.

See the “10% Penalty Limitation” section for more explanation on this limit.

The IITA § 1001(b) penalty can be imposed in addition to any other ATAT penalty or UPIA penalty subject to the limitations above. Although UPIA penalty and interest are doubled for years that apply to the former Amnesty programs, none of the ATAT penalties are doubled for Amnesty periods.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

The reasonable cause provisions for the IITA § 1001(b) penalty, as amended by P.A. 95-0707 are as follows:

> **Section 1001(b)(3) Authority to rescind penalty.** The Department may rescind all or any portion of any penalty imposed by this subsection with respect to any violation, if:
>
> A. The violation is with respect to a reportable transaction other than a listed transaction, and
>
> B. Rescinding the penalty would promote compliance with the requirements of this Act and effective tax administration; or
>
> A determination made under this subparagraph (3) may be reviewed in any administrative or judicial proceeding.

Under these provisions the penalty cannot be abated on any listed transaction. Note that in IITA § 1001(b) the penalty is deemed assessed upon filing the return and is automatically imposed once the return is filed. Under the statute the penalty can only be “rescinded”. If the taxpayer feels that any penalty imposed should be rescinded under the statute, then the taxpayer will have to provide the auditor with a letter (preferably in electronic form) on why the penalty should be rescinded. This letter should then be emailed to Technical Support who will then forward it on to Legal Services for review.

Note: To date, regulations have been issued on different ATAT disclosure requirements and VCP, but not on any of these abusive tax shelter penalties.

3. 10% Penalty Limitation

There is a special 10% limitation unique to the IITA § 1001(b) penalty. This limitation does not apply to the other ATAT penalties listed in this chapter. IITA § 1001(c) states, in part:

> The total penalty... with respect to any taxable year shall not exceed 10% of the increase in net income (or reduction in Illinois net loss under Section 207 of this Act) that would result had the taxpayer not participated in any reportable transaction affecting its net income for such taxable year.

Before assessing this penalty the auditor should determine what the 10% limitation is under this section. Note that the limitation is not based on any tax computation, but upon the change to Illinois net income or Illinois net loss from reversing the ATAT. If

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

the auditor cannot determine what the tax effect of the ATAT is for purposes of determining the 10% limitation, then the auditor will inform the taxpayer that the 10% limitation may apply and then let the taxpayer prove that the 10% limitation is less than the penalty being assessed.

Example #10

The taxpayer filed its original return showing negative Illinois base income of ($100,000). The Illinois apportionment factor is 10%; therefore, the Illinois net loss under IITA § 207 is $(10,000) which includes the expected tax effect from a listed transaction. Form 8886 is supposed to list the federal tax benefit of the listed transaction, such as a change to federal taxable income, expense deductions, etc. If the federal tax benefit is a $50,000 deferred charge to income, then the correct Illinois net loss without the effects of the ATAT is $(5,000) [($100,000 – $50,000)] x 10%. Although the IITA § 1001(b)(2) penalty is $30,000, the 10% limitation is $500 [($10,000 - $5,000)] x 10%.

Example #11

For 2004 an individual reported negative adjusted gross income of ($100,000) which includes the tax benefits of an ATAT worth $200,000. So, without the ATAT, AGI would be a positive $100,000. The limitation is the change in net income or net loss due to the ATAT, times 10%. For a full-year resident net income is the amount subject to tax, which is base income less the standard exemption. Assuming that there are no modifications, the limitation is $20,000 [$100,000 – (-$100,000) = $200,000) x 10%]. If the taxpayer failed to disclose the transaction by attaching federal Form 8886 to his 2004 Form IL-1040, the taxpayer will owe an IITA § 1001(b) penalty of $15,000 if it was a reportable transaction or $20,000 penalty if it was a listed transaction ($30,000 penalty subject to the $20,000 limitation).

4. General Information – IITA § 1005(b), Underreporting Penalty

IITA § 1005(b)(6) states that the reportable transaction understatement penalty generally applies to taxable years ending on and after December 31, 2004. However, the paragraph contains a special rule for listed transactions:

> A reportable transaction understatement shall include an understatement (as determined under paragraph (1)) with respect to any taxable year for which the limitations period on assessment has not expired as of January 1, 2005 that is attributable to a transaction which the taxpayer has entered into after February 28, 2000 and before December 31, 2004 that becomes a listed transaction (as defined in Treasury Regulations Section 1.6011-4(b)(2)) at any time.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Therefore in order to assess the IITA § 1005(b) penalty for tax years prior to December 31, 2004, the tax due would have to be from a listed transaction.

The IITA § 1005(b) penalty base is the reportable transaction understatement which is defined under IITA § 1005(b)(1) to be the product of (i) the amount of the increase in Illinois net income that results from a difference between the proper tax treatment of an item to which this subsection applies and the taxpayer's treatment of that item (as shown on the taxpayer's return of tax, including an amended return filed prior to the date the taxpayer is first contacted by the Department regarding examination of the return), and (ii) the applicable tax rates under IITA § 201.

The penalty under IITA § 1005(b) is generally equal to 20% of the understatement, but increases to 30% if the taxpayer failed to disclose the transaction as required under IITA § 501(b). UPIA penalties will also be due on any ATAT liabilities unless the liability is from an RAR that was reported and paid within 120 days of the finalization date. This penalty is explained later in this chapter.

5. IITA § 1005(b) Reportable Transaction Understatement Penalty

It must be determined if the ATAT late pay penalty under IITA § 1005(b) is applicable to the year that you are auditing. This penalty generally applies to taxable years ending on and after December 31, 2004. However, a special rule applies this penalty to listed transactions entered into after February 28, 2000. Most of the amended returns that were filed under the VCP were for listed transactions, but not all of them. The auditor must determine if the tax due is from a listed transaction if it is for a tax year prior to December 31, 2004. Prior to this date, if the tax due is only from a reportable transaction (other than a listed transaction), then none of the ATAT penalties apply. If the tax is due from a listed transaction, then the auditor will need to determine if it was a transaction entered into after February 28, 2000.

Example #12

The taxpayer files an amended return for calendar year 2002 under the VCP program to reverse the tax effects of a Son of Boss transaction, a listed transaction. It is determined that the amended return does not qualify for penalty relief under the VCP program. Although 2002 is a year that we can impose this penalty, if the taxpayer can show that the transaction was actually entered into prior to February 28, 2000, then no IITA § 1005(b) can be assessed.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In order to calculate the penalty, the auditor must first determine:

- The penalty rate, and
- If an amended return was filed by the taxpayer to reverse the ATAT, determine if the original return or amended return will be used to calculate the penalty base.

Example #13

Taxpayer participated in a Lease In/Lease Out (LILO) transaction in 2005, which is a listed transaction. The transaction was properly disclosed to the Department in all applicable years. On federal audit, Taxpayer's federal taxable income was increased in tax years 2005 through 2010 as a result of the listed transaction. Taxpayer will owe an IITA § 1005(b) penalty for each period that Illinois net income was understated, and the penalty will be calculated at 20% due to proper Illinois disclosure.

6. Penalty Base and Rate

The penalty is generally equal to 20% of the reportable transaction understatement, but increases to 30% if the transaction was not disclosed as required under IITA § 501(b). The rules for making disclosure are stated in IAC § 100.5060, and were discussed previously in the "ILLINOIS DISCLOSURE REQUIREMENTS" section. The auditor should refer to that section to determine if the disclosure requirements under IITA § 501(b) were met. If not, then the penalty rate is 30%.

However IITA § 501(b) provides that no disclosure is required for transactions entered into after February 28, 2000 and before January 1, 2005 if:

- the taxpayer filed an amended Illinois income tax return which reverses the tax benefits of the ATAT transaction, or

- as the result of a federal audit the IRS has determined the tax treatment of the transaction and an Illinois amended return has been filed to reflect the federal treatment.

These exceptions to IITA § 501(b) disclosure apply to most of the amended returns filed under the VCP. Therefore, if we disqualify a taxpayer from the VCP and assess the IITA § 1005(b) penalty, the penalty rate will be 20% as long as the taxpayer met the above requirements.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #14

The taxpayer files an amended return to reverse the tax effect of an ATAT prior to the time disclosure is due under IITA § 506(b) (it does not matter if they filed under the VCP) and increases federal taxable income by reversing the ATAT. The Department determines that additional tax is owed on the amended return because the taxpayer did not use the proper apportionment factor. Even though the taxpayer did not pay all of the tax from reversing the ATAT, the taxpayer did disclose its reportable transaction under IITA § 501(b), so the IITA § 1005(b) ATAT penalty will be 20% instead of 30%.

The penalty base is the reportable transaction understatement and is defined in IITA § 1005(b)(1) as the product of

- the amount of the increase in Illinois net income that results from a difference between the proper tax treatment of an item to which IITA § 1005(b) applies and the taxpayer's treatment of that item (as shown on the taxpayer's return of tax, including an amended return filed prior to the date the taxpayer is first contacted by the Department regarding examination of the return), and

- the applicable tax rates under IITA § 201.

If the taxpayer or the auditor is making adjustments to an amended return that reverses the tax effects of an ATAT, then the auditor will have to prepare a separate worksheet that calculates the effect on Illinois net income after apportionment of only the ATAT adjustment.

If the auditor is assessing additional tax on an amended return filed by the taxpayer that reversed the tax effects of an ATAT, then the auditor must determine if the Department contacted the taxpayer about our VCP program prior to the taxpayer filing the amended return. This determines if the original return or the amended return is considered in computing the penalty base.

If the Department did contact the taxpayer about our VCP program prior to an amended return being filed, then in computing the penalty base, the correct amount of Illinois net income, after reversing the effects of the tax shelter, is compared to the taxpayer's original return. If we have evidence that the Department sent the taxpayer a VCP letter prior to the date that the taxpayer filed its amended return, then the penalty base will be the difference between the corrected amount of Illinois net income from reversing the ATAT, minus the total Illinois net income on the original return, times the tax rate. If the Department **did not** contact the taxpayer about reversing the effects of a reportable transaction, then the correct net income amount on the taxpayer's amended return will be used in place of the original return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

VCP law § 35-5(a) states that any correspondence mailed by the Department to a taxpayer at the taxpayer's last known address outlining the tax shelter voluntary compliance program constitutes a "contact" within the meaning of IITA § 1005(b)(6) and (c). IITA § 1005(b)(6) does not make reference to the term "contact," but does reference the definition of reportable transaction understatement under IITA § 1005(b)(1). Therefore, if a taxpayer receives a VCP letter prior to the time the VCP amended return was filed, and the taxpayer does not qualify for VCP because, for example, the VCP return was filed late, then the tax as shown on the amended VCP return is not considered in computing the reportable transaction understatement.

<u>Example #15</u>

IL-1120 Return	Original Return	VCP Amended Return	Corrected Return per Audit
Federal taxable income	10,000,000	15,000,000	20,000,000
Net subtraction modifications	(2,000,000)	(2,000,000)	(2,000,000)
Base Income	8,000,000	13,000,000	18,000,000
IL Factor	0.100	0.100	0.100
ILL Net Income	800,000	1,300,000	1,800,000
IL Tax Rate	0.073	0.073	0.073
Illinois tax	$58,400	$94,900	$131,400

A C-corp filed its original return taking advantage of an ATAT and pays $58,400 in Illinois income tax. The taxpayer was one of the thousands that received a VCP letter from the Department explaining the new VCP program. The taxpayer then files an IL-1120-X with the Department reversing the tax effects of the ATAT and reports total tax of $94,900, and pays $36,500 in additional tax ($94,900 - $58,400). The Department audits the amended return and determines that the taxpayer failed to properly report the ATAT and should have reported total tax of $131,400 and paid an additional $73,000 (131,400 - $58,400) with the amended return (Note: If the change is not ATAT related, then the taxpayer qualifies for VCP). If the taxpayer fails to pay the additional tax within 30 days, it will be disqualified from the VCP program. Since the taxpayer was contacted by the Department about the VCP, the penalty base is $73,000 ($131,400 - $58,400) and the IITA § 1005(b) penalty is $14,600 ($73,000 x 20%). In this example, if there is no evidence that we contacted the taxpayer about tax shelters, then the penalty base will be $36,500 ($131,400 – $94,900) and the IITA § 1005(b) penalty $7,300($36,500 x 20%)

Any penalty assessed is included on the IL-870.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

If reversal of the ATAT causes a reduction in a net loss or credit, the IITA § 1005(b) penalty may be applied in the carry year affected. IITA § 1005(b)(1)(B) states, in part:

> ...The penalty for an understatement of income attributable to a reportable transaction applies to any portion of an understatement for a year to which a loss, deduction, or credit is carried that is attributable to a reportable transaction for that year in which the carryback or carryover of the loss, deduction, or credit arises (the "loss or credit year").

<u>Example #16.1</u>

Taxpayer properly disclosed a listed transaction entered into in 2009. Under federal audit, the ATAT led to underreported federal taxable income. Taxpayer filed an amended return to report the Illinois liability due to the reversed ATAT, paying only the underreported tax. The 2009 amended return is set up to be audited. The auditor agrees with the underreported liability reported due to the reversed ATAT. The auditor must turn in the audit to Audit Perfection as quickly as possible to bill Taxpayer within the three year statute for any deemed assessed penalty and interest. Taxpayer will owe a 20% IITA § 1005(b) penalty. Below are Taxpayer's figures:

IL-1120 Return	Original Return	Amended Return per Audit
Federal taxable income	10,000,000	20,000,000
Net subtraction modifications	(2,000,000)	(2,000,000)
Base Income	8,000,000	18,000,000
IL Factor	0.100	0.100
ILL Net Income	800,000	1,800,000
IL Tax Rate	0.073	0.073
Illinois tax	$58,400	$131,400

Taxpayer's IITA § 1005(b) penalty base is $73,000 ($131,400-$58,400), so the IITA § 1005(b) penalty would be $14,600 ($73,000 x 20%).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #16.2

Same facts as in Example #16.1, but instead of a underreporting net income, Taxpayer overstated its net loss, and the reversal of the ATAT leads to a reduced Illinois net loss, which was carried into 2010. Taxpayer's figures for 2009 are shown below:

IL-1120 Return	Original Return	Amended Return per Audit
Federal taxable income	(10,000,000)	(5,000,000)
Net subtraction modifications	(2,000,000)	(2,000,000)
Base Income	(12,000,000)	(7,000,000)
IL Factor	0.100	0.100
ILL Net Loss	(1,200,000)	(700,000)
IL Tax Rate	0.073	0.073

Taxpayer had already claimed and used the $(1,200,000) loss in 2010. Taxpayer should provide auditor a 2010 amended return reporting the correct reduced Illinois net loss deduction. The IITA § 1005(b) penalty would be assessed in 2010, and would be $7,300 (($1,200,000-$700,000) x .073 x 20%). If an admitted liability, this penalty would need to be billed within three years of filing the amended return. If proposed, then the penalty would be included on the IL-870.

7. Reasonable Cause Exception - IITA § 1005(b)(4)

IITA §1005(b)(4) provides the provisions for reasonable cause. This statutory language resembles the IRS's reasonable cause language for accuracy-related penalties under IRC § 6664. To summarize, for any reportable transaction understatement, the penalty can be abated if reasonable cause existed and the taxpayer acted in good faith. This requires the taxpayer demonstrate three things:

- Disclosure per IITA § 501(b) of the reportable transaction (unless rescinded by the Department)
- Substantial authority for the transaction
- Reasonable belief that the transaction was more likely than not proper

Further provisions and definitions are provided in IITA § 1005(b)(4), which must be reviewed and applied in a reasonable cause situation.

Currently, there are no regulations regarding reasonable cause abatement of any ATAT penalties. Requests from the field for abatement of ATAT penalties should be treated according to our reasonable cause procedures in Audit Manual Chapter 3 in conjunction with the statutory guidelines of IITA § 1005(b)(4).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

8. IITA § 1005(c) - 100% Interest Penalty

IITA § 1005(c) imposes the 100% interest penalty where a taxpayer has been contacted by the IRS or the Department regarding the use of a "potential tax avoidance transaction" for a taxable year and has a deficiency (i.e. correct amount of tax exceeds amount of tax reported) attributable to such transaction. The penalty is equal to 100% of the single interest assessed under the UPIA (the interest penalty is not doubled for Amnesty periods) for the period beginning on the last date prescribed by law for payment of such tax and ending on the date of the notice of deficiency.

The 100% interest penalty under IITA § 1005(c) applies if the taxpayer fails to report a federal change after the taxpayer was "contacted" by the IRS or the Department. Section 35-5(a) of the VCP law states that any correspondence mailed by the Department to a taxpayer at the taxpayer's last known address outlining the tax shelter voluntary compliance program constitutes a "contact" within the meaning of IITA § 1005(b) & (c). There may be some question as to whether the deemed contact rule in Section 35-5(a) of the VCP law should apply to tax avoidance transactions entered into after the effective date of the VCP law. A literal application of the rule would mean that a taxpayer notified of VCP could never again avoid a reportable transaction understatement penalty by filing an amended return to reverse a tax avoidance transaction prior to the time the Department initiated an audit. Nonetheless, the Department should apply a literal interpretation and condsider taxpayers notified of VCP as having been contacted FOR ALL TAXABLE YEARS for purposes of IITA § 1005(b)(1) and (c).

The IITA § 1005(c) penalty base is the same as the IITA § 1005(b) penalty base, that is, the reportable transaction understatement which is defined under IITA § 1005(b)(1) as the product of (i) the amount of the increase in Illinois net income that results from a difference between the proper tax treatment of an item to which this subsection applies and the taxpayer's treatment of that item (as shown on the taxpayer's return, including an amended return filed prior to the date the taxpayer is first contacted by the Department regarding examination of the return), and (ii) the applicable tax rates under IITA § 201.

In general, IITA § 1005(c) applies to taxable years ending on and after December 31, 2004. However, under a special rule the penalty may be applied to any deficiency attributable to a listed transaction entered into after February 28, 2000 and before December 31, 2004.

The federal American Jobs Creations Act of 2004 (Jobs Act) repealed the registration rules under IRC § 6111. As a result, the concept of an IRC § 6111 tax shelter no longer exists. <u>This change in federal law, coupled with the fact that the special rule in IITA § 1005(c) for listed transactions applies only if the transaction is entered into after</u>

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

February 28, 2000 and before December 31, 2004, means that the 100% interest penalty will not apply to transactions entered into after October 31, 2004, unless the transaction is a listed transaction entered into before December 31, 2004. Any non-listed transaction entered into after October 22, 2004 will not be an IRC § 6111 tax shelter, and therefore will not be a potential tax avoidance transaction under IITA § 1005(c). Similarly, any listed transaction entered into after December 31, 2004, will not be an IRC § 6111 tax shelter, nor will the special rule in IITA § 1005(c) apply.

For example, consider an underpayment in TYE 2010 due to a LILO (listed) transaction. If the LILO transaction was entered into in January 2004, then an IITA § 1005(c) interest penalty could be assessed on the underpayment due to the LILO transaction. However, if the LILO transaction was entered into in January 2005, the 1005(c) interest penalty could not be assessed. Further, if the 2010 underpayment was due to any other type of reportable transaction entered into after October 22, 2004, the 1005(c) interest penalty could not be assessed.

Due to the restrictions on when the interest penalty can be assessed, it is less likely to be applicable in current audits than the penalties under IITA §§ 1001(b) and 1005(b).

Example #17

Taxpayer entered into a LILO transaction in March 2003 that was reversed under federal audit in 2010. This led to underreported federal income for calendar years 2003 through 2010. Taxpayer was already under audit in Illinois for calendar years 2011 and 2012. The audit will need to be expanded to include 2003 through 2010. Apart from other penalties and interest, Taxpayer will be subject to the IITA § 1005(c) interest penalty on the underreported liability in 2003 through 2010. To illustrate, the following shows the figures for 2010 needed to calculate the base on which to compute the penalty interest, which is the same base as for the IITA § 1005(b) penalty:

IL-1120 Return	Original Return	Amended Return per Audit
Federal taxable income	10,000,000	17,500,000
Net subtraction modifications	(2,000,000)	(2,000,000)
Base Income	8,000,000	15,000,000
IL Factor	0.100	0.100
ILL Net Income	800,000	1,500,000
IL Tax Rate	0.073	0.073
Illinois tax	$58,400	$109,500

Just like the § 1005(b) underreporting penalty base, the §1005(c) penalty interest base is $51,100 ($109,500-$58,400). The penalty interest would be calculated from the due date of the underpayment through the IL-870 date, if the underreported tax is also

proposed on the IL-870. If the IL-870 was to be issued on 8/11/15, then penalty interest would be calculated on $51,100 from 3/15/11 through 8/11/15, which equals $5,479.05. If a notice of deficiency or bill is issued, then the penalty interest would be calculated through the date of such notice.

B. PROMOTER PENALTIES

If the promoter fails to report, IITA §§ 1007 and 1008 penalties apply.

The first promoter penalty is IITA § 1007, which basically applies a $15,000 penalty to the promoter for a failure to disclose regarding a reportable transaction. When the failure to disclose regards a listed transaction, the penalty increases to $100,000. This applies both to registering the tax shelter and maintaining a list of investors.

Refer to IAC §§100.5080 and 100.5070 for more information.

The second promoter penalty is IITA § 1008, which couples to IRC § 6700 and assesses a penalty against the income the promoter receives from the client for the abusive transaction. The penalty is the greater of $10,000 or 50% of the gross income received from each client to whom the promoter organized, sold, made a statement, or somehow participated in the abusive transaction. For example, a promoter develops promotional materials such as a prospectus and other documents which explain the promotion, and those documents are used as the evidence supporting a penalty under IRC § 6700 for organizing and promoting an abusive tax shelter. The abusive tax shelter was marketed to 13 clients who paid the promoter $50,000 each. The IITA § 1008 could be assessed, which would be the greater of $10,000 or 50% of the gross income. Thus, the penalty would be 50% of $650,000, or $325,000.

Refer to IITA § 1008 and IRC § 6700 for more information.

Note that neither promoter penalty in IITA §§ 1007 and 1008 is eligible for reasonable cause consideration.

VI. VCP

Although the Voluntary Compliance Program (VCP) was temporary and ended in 2005, some of that information still provides useful illustration of ATAT penalty concepts and explanation of adjustments that may have been made in previous audits. It is possible that some audits will include periods where the taxpayer participated in VCP, so familiarity with the program will be useful to the auditor.

A. VOLUNTARY COMPLIANCE PROGRAM (VCP)

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

The Voluntary Compliance Program (VCP) ran from October 15, 2004 to January 31, 2005, and applied to all tax liabilities under IITA § 201 attributable to the use of abusive tax shelter transactions for taxable years beginning before January 1, 2004. IAC § 100.9900 gives the requirements for taxpayers participating in the VCP. Under this regulation, participation in the VCP was made separately for each year. Therefore, a VCP-1 form had to be attached to each amended or original return filed under the VCP and postmarked by January 31, 2005. If the taxpayer did not file an original return because it had no tax due because of the ATAT, then the taxpayer had to attach an original return with their VCP-1 computed without regard to the ATAT. This would include any composite return(s) filed on behalf of partners and S-Corporation shareholders. Taxpayers were to send their amended returns and VCP-1 forms to P.O. Box 19029, Springfield, IL 62794-9029.

In order to participate in the VCP the taxpayer was required to select one of two options on the VCP-1:

- Option 1 – Without appeal rights
- Option 2 – With appeal rights (Includes separate box for IRS Review)

1. VCP-1, Filed Under Option 1

Under Option 1 the taxpayer could never get a refund of the taxes paid that were attributable to an “eligible liability”. This includes an estimated RAR payment where the taxpayer overestimated its tax liability from the RAR. However, under Option 1, refunds are permitted for taxes paid that are not attributable to the tax avoidance transaction. For example, if the taxpayer filed a VCP-1 under Option 1 along with an amended return increasing the amount of tax from $10,000 to $15,000 by reversing the effects of an abusive tax shelter, the taxpayer could never get a refund of the $5,000 that was paid on the amended return. However, the taxpayer still could receive a refund of the $10,000 paid on the original return assuming that the claim was filed within the statute of limitations and the taxpayer was not seeking an Amnesty refund.

In addition to the ATAT penalties, the Department agreed to waive all UPIA penalties (except the non-filing penalty) if the taxpayer chose Option 1 on their VCP-1 form. This represented a considerable savings to the taxpayer, especially for Amnesty periods where the UPIA penalties are doubled. However, in return for this benefit the taxpayer agreed to forgo any possible claims for refund. Therefore, there are no refunds permitted under Option 1 as they relate to an ATAT liability except for interest computation errors.

If the IRS or the courts later determine that the ATAT is legitimate and allowable, there is still no refund of the eligible liability under Option 1. If the IRS later reduces federal taxable income, thereby reducing Illinois taxable income as it relates to a payment for an “eligible liability” made under Option 1, then the auditor or the taxpayer will prepare

amended returns to reflect the correct amount of federal taxable income, but the refund will be identified on the amended return or EDA-25 as non-refundable.

Note: Under Option 1 the taxpayer can receive refunds of adjustments unrelated to the ATAT eligible liability, as long as it was not a payment made under the former Amnesty program.

2. VCP-1 Filed Under Option 2

If the taxpayer chose Option 2 on their VCP-1 form, then the only penalties abated were the ATAT penalties, as long as the original or amended return qualified under the VCP, However, all applicable UPIA penalties will be assessed, including a doubling of the UPIA penalties for Amnesty years.

Under Option 2, all types of refunds were permitted assuming that claims were filed within normal statutes and the payments were not made under Amnesty. This includes claims for any tax, penalty and interest paid under the VCP. See the section below on RAR adjustments regarding statute dates.

Once the statute expires on a tax year, the taxpayer has one year from the date of payment to file a claim for refund. This presented a problem for taxpayers that were under IRS audit who wanted to participate in the VCP program and pay the tax in case the IRS disallowed their ATAT transaction. Since the IRS could take years to complete their audit, the taxpayer would not be able to get a refund of any overestimated taxes paid to Illinois since the claim would be filed more than one year after the payment of tax.

Therefore, on the VCP-1 form the taxpayer had the option to check the box entitled "IRS Review (option 2 only)". This was copied from California's version of the program. Under this option the taxpayer could file an Illinois amended return under the VCP based on an estimated change to federal income if they lost before the IRS. Checking the IRS Review box allowed the amended return (showing that they owe money) to also serve as a refund claim. This means that if the taxpayer prevailed over the IRS and did not owe anything, then they would not have to file a claim with Illinois to get the money back that was paid under the VCP. They would simply provide us with the IRS report showing that they owed no tax from the ATAT transaction and we could refund the money that they paid on the amended return. Since no amended return was required claiming an overpayment, the refund could be issued past the statute date for filing a claim.

3. Computing The Eligible Liability

IAC § 100.9900(c) sets forth the requirements for participation in the VCP. In order to participate in the VCP, a taxpayer must have, within the VCP period, (i) filed Form VCP-1 along with an amended Illinois income tax return that reports Illinois net income for the taxable year computed without regard to any tax avoidance transactions, (ii) paid the full amount of the "Eligible Liability" (plus interest), and (iii) made the election to participate either with or without appeal. IAC § 100.9900(c)(1)(E) states that failure to correct an underreporting of tax that is not attributable to participation in a tax avoidance transaction shall not preclude relief under the VCP.

IAC § 100.9900(c)(2)(A) defines "Eligible Liability" to mean the excess, if any, of:

(i) The Illinois tax liability for the taxable year properly computed without allowing the net tax benefits of any tax avoidance transactions, over

(ii) The Illinois tax liability for the taxable year properly computed allowing the net tax benefits of any tax avoidance transactions in which the taxpayer participated.

The "properly computed" language means that we had to allow any offsets against the eligible liability that the taxpayer was entitled to at the time the original return was filed, such as offsets discovered either by the taxpayer or the auditor upon audit.

This included the following:

- INL carryovers from earlier years (but not INL carrybacks)
- Capital loss carrybacks as long as the capital loss is not ATAT related
- Credit carryovers from earlier years
- Net adjustments for the current year (taxpayer or audit adjustments)
- RAR adjustments

With respect to computation of the eligible liability, all proper non-ATAT adjustments had to be made to a taxpayer's return in computing both the tax liability allowing the net tax benefits of the ATAT and the tax liability without allowing the net tax benefits of the ATAT transaction. The following examples illustrate the computation of the eligible liability under IAC § 100.9900(b)(2) (for simplicity the examples disregard the standard exemption and any credits, uses the appropriate 3% individual tax rate, and in the case of corporations assume all items are business income and the tax rate is 10%).

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Example #18

Taxpayer, an Illinois resident, timely filed his original 2003 Illinois income tax return reporting federal adjusted gross income of $100, $0 addition modifications and $0 subtraction modifications, for Illinois base income of $100. Taxpayer reported and paid the resulting $3 of Illinois income tax. During the VCP period, Taxpayer filed an amended return reporting federal AGI of $200 (i.e. Taxpayer reversed a loss of $100 from an ATAT). Taxpayer paid the additional $3 of Illinois income tax along with the amended return. Upon review of Taxpayer's amended return, the Department discovered that Taxpayer failed to report a $50 addition modification.

The eligible liability is computed as the difference between Taxpayer's Illinois liability properly computed without allowing the net tax benefits of the ATAT and the Illinois liability properly computed allowing the net tax benefits of the ATAT:

IAC § 100.9900(b)(2)(A)(i) Without ATAT		IAC § 100.9900(b)(2)(A)(ii) With ATAT	
AGI	$200	AGI	$100
Add	$ 50	Add	$ 50
Sub	$ 0	Sub	$ 0
Base	$ 250	Base	$ 150
Tax	$7.50	Tax	$4.50

Thus, the eligible liability is $3. Because Taxpayer reported and paid the eligible liability, Taxpayer qualifies for VCP relief provided all other requirements are met. It does not matter that Taxpayer failed to report and pay the additional tax attributable to the addition modification. Nevertheless, Taxpayer remains liable for the additional tax attributable to the addition modification (a non-ATAT adjustment), including applicable penalties and interest. The Department will therefore issue a notice of deficiency for $1.50 additional tax, plus applicable penalties and interest.

Example #19

Same facts as in Example #18, except that Taxpayer's VCP amended return properly includes a $100 subtraction modification that was not claimed on his original return. As a result, Taxpayer's amended return continues to show only a $3 tax liability, and no additional payment is included with the amended return. The computation of the eligible liability is as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IAC § 100.9900(b)(2)(A)(i) Without ATAT		IAC § 100.9900(b)(2)(A)(ii) With ATAT	
AGI	$200	AGI	$100
Add	$ 50	Add	$ 50
Sub	$100	Sub	$100
Base	$150	Base	$ 50
Tax	$4.50	Tax	$1.50

The difference between the proper tax computed without and with the net tax benefits of the ATAT transaction, or $3 (i.e. $4.50 - $1.50), is the eligible liability. Because Taxpayer failed to make any additional payment upon filing the VCP return, he has not paid the entire amount of the eligible liability as required to participate in the VCP. The Department will issue a notice of deficiency for $1.50 (i.e. correct tax $4.50 less tax shown on return of $3), plus applicable penalties and interest.

Example #20

Taxpayer, a corporation, timely filed its original 2003 Illinois income tax return reporting federal taxable income of $300 and $0 in modifications. The apportionment factor reported on the return consists of $1,000 total sales, $500 of which is sourced to Illinois, for a 50% apportionment factor. Taxpayer reported the resulting $150 Illinois net income, and (assuming a 10% rate) paid the $15 tax. During the VCP period, Taxpayer filed an amended return that reports federal taxable income of $400 (i.e. taxpayer reversed a loss of $100 from an ATAT), $0 addition and $0 subtraction modifications, for Illinois base income of $400. Based on a 50% apportionment factor, the amended return shows Illinois net income of $200 and total tax of $20. Taxpayer paid the extra $5 tax (i.e. $20 – $15) with the amended return. Upon review of Taxpayer's amended return, the Department discovered that Taxpayer failed to source to Illinois $250 of gross receipts. Taxpayer's properly computed apportionment factor is 75% (i.e. 750/1000) rather than 50% (i.e. 500/1000).

The eligible liability is computed as the difference between Taxpayer's Illinois liability properly computed without allowing the net tax benefits of the ATAT and the Illinois liability properly computed allowing the net tax benefits of the ATAT:

IAC § 100.9900(b)(2)(A)(i) Without ATAT		IAC § 100.9900(b)(2)(A)(ii) With ATAT	
FTI	$400	FTI	$300
Add	$ 0	Add	$ 0

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Sub	$ 0	Sub	$ 0
Base	$400	Base	$300
Factor	75%	Factor	75%
NI	$300	NI	$225
Tax	$ 30	Tax	$22.50

Thus, the eligible liability is $7.50. Because Taxpayer did not report and pay the entire amount of the eligible liability (only $5 of the eligible liability was paid), it does not qualify for VCP relief. The Department will issue a notice of deficiency in the amount of $10 (i.e. correct tax of $30 less tax shown on return of $20), plus applicable penalties and interest.

Example #21

Same facts as in Example #18, except that Taxpayer's VCP amended return properly includes a $100 subtraction modification that was not claimed on its original return. Therefore, Taxpayer's amended return continues to show only a $15 tax liability, and no additional payment is included with the amended return. The eligible liability is computed as follows:

IAC § 100.9900(b)(2)(A)(i) Without ATAT		IAC § 100.9900(b)(2)(A)(ii) With ATAT	
FTI	$400	FTI	$300
Add	$ 0	Add	$ 0
Sub	$(100)	Sub	$(100)
Base	$300	Base	$200
Factor	75%	Factor	75%
NI	$225	NI	$150
Tax	$22.50	Tax	$ 15

The eligible liability is equal to the difference between the tax properly computed without the tax benefits of the ATAT and the tax properly computed allowing the ATAT, here $7.50. Because Taxpayer failed to include any additional payment along with the VCP return, it has not paid the entire amount of the eligible liability as required to participate in the VCP. The Department will issue a notice of deficiency for $7.50, plus applicable penalties and interest.

The taxpayer is required to compute the tax as "properly computed" based on the last filed amended return. Therefore, if the taxpayer has been previously audited, then the taxpayer must have used in Column A of its amended return the previously adjusted figures even if those adjustments were unagreed. This would include what the Department determined to be the correct apportionment factor from an unagreed audit.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

Since reversal of the ATAT increases federal taxable income, any difference in the apportionment factor will directly affect the eligible liability that is paid under the VCP.

Example #22

The Department audited XYZ Corporation for 2001 and determined that the apportionment factor should be higher. Taxpayer disagreed with the audit results and protested the audit liability. Later, the taxpayer filed an amended return and VCP-1 under Option #2 and checked the box for IRS Review. The amended return reversed the tax effect of a listed transaction. However, Taxpayer used the original apportionment factor. Assuming that Taxpayer lost in court on the apportionment issue, it will have underpaid its eligible liability, and will be subject to ATAT penalties under IITA § 1005(b) and (c), assuming that the listed transaction was entered into on or after February 28, 2000. The ATAT penalties will have to be assessed by the auditor using the apportionment factor as previously audited.

Example #23

The auditor reviewed an IL1120-X reporting an ATAT and determined that Taxpayer made two adjustments to the amended return in addition to reversing the ATAT. On the original return as filed Taxpayer reported $1,000,000 in federal taxable income, an Illinois factor of 25% and had paid tax of $18,250. On January 31, 2005 Taxpayer filed a VCP-1 along with an IL-1120-X to report a $2,000,000 increase to federal taxable income due to a listed transaction, claim a capital loss carryback of $500,000 (non-ATAT related), and claim nonbusiness income everywhere of $500,000. Taxpayer paid additional tax of $18,250 plus estimated interest on the amended return.

The auditor was required to perfect the amended return and process it first. This made Column A of the EDA-25 Column C of the amended return. The auditor next determined that only $250,000 of the nonbusiness income was allowable and that the Illinois factor should be 50% instead of 25%. Neither adjustment was ATAT related.

For purposes of determining the Eligible Liability, all proper non-ATAT adjustments must have been made to a taxpayer's return in computing both the tax liability allowing the net tax benefits of the ATAT and the tax liability without allowing the net tax benefits of the ATAT transaction. Accordingly, the Eligible Liability is computed as follows:

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IAC § 100.9900(b)(2)(A)(i) Without ATAT		IAC § 100.9900(b)(2)(A)(ii) With ATAT	
FTI*	$2,500,000	FTI	$500,000
Add	0	Add	0
Sub	0	Sub	0
Base	$2,500,000	Base	$500,000
NB	(250,000)	NB	(250,000)
BI	$2,250,000	BI	$250,000
Factor	50%	Factor	50%
NI	$1,125,000	NI	$125,000
Tax rate	.073	Tax rate	.073
Tax	$ 82,125	Tax	$ 9,125
Credits	0	Credits	0
Tax liability	$ 82,125	Tax liability	$ 9,125

Note: Federal taxable income in each case takes into account the $500,000 capital loss carryback. Thus, FTI in the "Without ATAT" computation is: $3,000,000 - $500,000 = $2,500,000; and in the "With ATAT" computation is $1,000,000 - $500,000 = $500,000.

The Eligible Liability is the difference between the Illinois tax liability computed without the ATAT items and the Illinois tax liability computed with the ATAT items. In the above example, that difference is $73,000 (i.e. $82,125 – $9,125). Taxpayer did not qualify for the VCP because it only paid $18,250.

4. Statute Dates on VCP Amended Returns

IITA § 905(e) deals with limitations on issuing notices of deficiency for reported federal changes. IITA § 905(e)(2) provides that, "in any case where notification of an alteration is given as required by 506(b), a notice of deficiency may be issued at any time within 2 years after the date such notification is given for the taxable year for which the notification is given …" Therefore, if the taxpayer owes additional tax as a result of notification of a federal change required under IITA § 506(b), then we have two years from the date of the amended return to issue a notice of deficiency for additional tax, but we have three years to issue a notice and demand for admitted penalty and interest.

For more information on deemed assessed liabilities refer to the sections on "Deemed Assessed" and "Proposed Assessment/Liability" in Chapter 21 of the Audit Manual.

State changes will fall under IITA § 903(a), which provides that the amount of tax, which is shown to be due on the return, including an amended return showing an increase in tax, shall be deemed assessed on the date of filing the return. IITA § 1003(b) states that

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

interest prescribed under such section on any tax shall be deemed assessed upon the assessment of the tax or penalties to which such interest relates and shall be collected and paid on notice and demand in the same manner as tax. IITA § 902(a) provides that in the case of tax deemed assessed upon the filing of a return, the Department must issue a notice and demand for payment no later than three years after the date the "return" was filed.

5. VCP-1 – Amended Return Reporting a Liability – Listed Transaction

This section assumes that the taxpayer paid all of the eligible liability including tax and estimated interest shown on an amended return, that the VCP-1 has been completed properly (or the auditor was able to perfect the VCP-1) and filed by January 31, 2005, and that the taxpayer reported a "listed transaction" that falls under one of the categories on the IRS website.

If the taxpayer filed the VCP-1, the auditor had to compute the eligible liability to determine that the taxpayer qualified for VCP. Under Option 2, the taxpayers owed UPIA penalties on the liability whether or not they qualified for the VCP. No ATAT penalties would be due whether or not Option 1 or Option 2 was selected if the taxpayers properly computed and paid all of the eligible liability with interest.

Under Option 1, if the taxpayer did not pay all of the eligible liability, then the taxpayer was disqualified from the VCP, UPIA penalties will be applicable, and those amounts will be doubled if it is for a UPIA tax period eligible for 2003 Amnesty .

The ATAT adjustments as well as all other adjustments should be included in the audit workpapers and transferred to the EDA-25. Whether the amended return was processed or not, the figures in Column A of the EDA-25 should come from Column C of the amended return. If Column A of the amended return did not match BIT, then the auditor would have to correct the amended return using the procedures discussed in Chapter 20 of the Audit Manual under the section "EDA-25". .

The audit was to be completed in the normal manner. Under exchange agreements the Department is required to share the results of the audit with other states as well as the IRS.

As is often the case on tax shelters, there may be multiple taxpayers involved. The auditor is responsible for auditing all of the taxpayers that pertain to the ATAT. Each Illinois filer will require a separate track. The auditor will include comments in the Auditor's Comments stating what action was taken on the other tracks.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

6. UPIA Penalties

The Voluntary Compliance Program dId not affect the computation of any applicable UPIA penalties, and those penalties were still doubled if it was for an Amnesty year. The only thing that VCP did was abate the UPIA penalties, except for the non-filing penalty, if the taxpayer chose Option 1 on the VCP-1 and the taxpayer met all of the VCP requirements.

Under IAC § 100.9900(c)(2), the taxpayer was required to pay the full amount of the eligible liability plus interest. This includes a doubling of the interest and UPIA penalties for periods covered under the former Amnesty program. IAC § 100.9900(c)(2)(C) required that the taxpayer make a "good faith attempt" to compute the correct amount of eligible liability including penalty and interest and pay that amount during VCP. The taxpayer then had 30 days to pay any additional eligible liability plus penalty and interest when billed.

Audit requires that taxpayers file amended returns whenever they have a finalized RAR. If the EDA-24, EDA-25 or amended return includes an RAR, then it must have a schedule attached showing the tax effect of just the ATAT liability.

Under the first Amnesty program the taxpayer could make a payment within the Amnesty period without filing an amended return, and then that payment would qualify for Amnesty. However, that was not the case with the VCP program. Auditors cannot adjust for RARs (overpayments or underpayments) where the RAR has not yet been finalized. In order to participate in VCP, the taxpayer had to file a VCP-1, an amended return, and pay the tax due with estimated interest that was attributable to the abusive tax shelter. However, under the VCP taxpayers could estimate what they owed on an RAR and file an estimated Illinois amended return with the VCP-1 choosing Option 2, but if they chose Option 1 without appeal, they would not be entitled to a refund of any overestimated tax.

If the taxpayer made a valid VCP filing, then the taxpayer could receive a refund of an estimated RAR payment under Option 2 as long as the claim was filed within statute as noted below. Under Option 1, there was no refund.

If the taxpayer filed an estimated tax payment with or without an amended Illinois return and later wanted a refund or partial refund of that tax, the first thing that the auditor had to do was check to see that the claim was within statute. Under IITA § 911(b)(1), the taxpayer has two years to file a claim for refund for a federal change which starts at the time federal notification was due by means of an amended federal return or a completed federal RAR. If there was no federal amended return due or filed, and no completed federal RAR or final determination, then this two-year, 120-day federal change statute in IITA § 911(b) did not apply. If the normal statute of limitations period

on the year expired and there was no waiver to extend the statute of limitations on an IL-872, then the statute date under IITA § 911(a)(1) was one year from the date that payment was made. The statute dates on refund claims was explained in FY Bulletin 2005-10.

Example #24

A partnership filed its 1999 IL-1065 timely and paid $10,000 in replacement tax. Realizing that the partners were under IRS audit, the partnership made an estimated payment under Amnesty on November 13, 2003, for $200,000. The IRS completed an audit on the partners and reversed the tax effects of a Son of Boss transaction in which it determined that the tax attributes of the transaction affecting the partnership were "disregarded". This had the effect of creating large income for the partners, but the partnership itself ended up with zero federal income. On December 4, 2004, the partnership filed an IL-843 to claim a refund of the original $10,000 payment as well as the November 13, 2003 Amnesty payment of $200,000. Since there was no amended federal Form 1065 filed at the time the Amnesty payment was made, the taxpayer can only receive a refund of their original $10,000 payment since it is within 2 years and 120 days of the federal finalization date. The statute date on the $200,000 Amnesty payment expired November 13, 2004. In this situation, the auditor would prepare an amended IL-843 along with an amended IL-1065 to reflect the correct federal taxable income of zero. The auditor would have then marked the Amnesty payment portion of the claim as out-of-statute.

7. Processing Problems with VCP Amended Returns

If there were problems with the amended returns filed where the taxpayer had an admitted liability, then the auditor had to correct the original amended return. We could not get revised amended returns to correct the taxpayer's original changes without potentially creating a problem with the interest computation. The taxpayer's amended returns needed to be processed in the order in which they were received. If Column A of the first amended return did not match Gentax, but the tax was correct on the amended return, then the auditor should have perfected the amended return by transferring the amounts from the amended return onto an EDA-25 for processing. No IL-870 was needed if the tax was correct on the amended return.

If there were problems with the original amended return and there was tax due or overpaid from what the taxpayer's amended return showed, then it was necessary to get an EDA-24, EDA-25 with IL-870, or a new amended return showing only the difference from what was originally reported on the amended return. Then, the taxpayer's original amended return would still be processed. An IL-870 showing only the tax increase must have been signed by the taxpayer within statute or a notice of deficiency must have been issued within statute.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

IAC § 100.9900(c)(2) states that in order to qualify for the VCP taxpayers must have paid the full amount of the “eligible liability” during the VCP period that ended January 31, 2005. If there was a balance due from adjusting the amended return, and the auditor determined that it was additional tax due on the “eligible liability”, then the taxpayer would have been disqualified from the VCP for that particular year.

For example, the taxpayer underreported a capital gain from an ATAT that should have been included in the sales factor. If the taxpayer reversed the tax effect of the ATAT by including the proper gain in Illinois base income, but then did not include the gain in the Illinois sales factor (if it was an Illinois gain), then the taxpayer would have been underreported on its “eligible liability” and may have been disqualified from the VCP for that particular year.

Another example would be where the Department increased the sales factor in a prior, unagreed audit but the taxpayer used the original Illinois factor for its Column C on the amended return. In that case the eligible liability was understated.

8. Offsets

To participate in the VCP, taxpayers were supposed to report their correct liability without claiming any benefits for tax shelters. This allowed taxpayers to make any changes to the returns needed to arrive at the correct liability that included claiming credits and subtraction modifications not claimed on the original return. This allowed the taxpayers to mitigate the effects of their abusive tax shelter liability by claiming tax credits, making factor changes, claiming nonbusiness income, claiming capital loss carrybacks, etc., that were not claimed previously.

Consequently, there was no legal requirement for taxpayers to file two amended returns to reverse the effects of the tax shelter and to claim other adjustments. They could comply with the VCP requirements by filing one amended return for each year as long as the taxpayers explained what they were doing and realized that there would be restricted interest (and that they had to pay the interest when billed). A pro forma amended return computing the tax due without the abusive tax shelter could be attached to the amended return, or the taxpayers could attach a worksheet to the amended return showing the tax due from the tax shelter.

If the taxpayer filed a claim for credit for non-ATAT related liabilities, then it did not matter which option the taxpayer chose under VCP to get a refund of non-ATAT related adjustments, as long the claim was within statute and it was not an Amnesty payment. If the taxpayer also wanted a refund of the “eligible liability”, then the VCP-1 had to have been filed using Option 2. It was the “eligible liability” only that could not be refunded under Option 1. If the taxpayer filed a claim for credit after the VCP period

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

ended, and the taxpayer chose Option 1, then the auditor had to determine the portion, if any, of the claim related to the “eligible liability” which is defined in IAC § 100.9900(b)(2)(A) as the excess of:

(i) the Illinois income tax liability for a taxable year properly computed without allowing the net tax benefits of any tax avoidance transaction, over

(ii) the Illinois income tax liability for that taxable year properly computed allowing the tax benefits of any tax avoidance transactions in which the taxpayer participated.

Example #25

The taxpayer filed its original 2002 IL-1120 and reported a tax liability of $10,000. The taxpayer later filed a VCP-1 under Option 1 along with an amended return on January 31, 2005 reporting an additional $10,000 in tax from reversing the tax effects of a Son of Boss transaction. However, this was offset by $2,000 in investment credits that the taxpayer did not report on its original return. The taxpayer paid $8,000 with the amended return. After the VCP period ended, the taxpayer filed an amended return where the IRS allowed the transaction which caused an Illinois refund of $15,000. The taxpayer could not receive a refund of the “eligible liability” which is the difference between the tax properly due for the period without the ATAT or $18,000, and the proper amount of tax due with the ATAT which is $8,000 (the original $10,000 minus the $2,000 additional tax credit). The eligible liability was $10,000 ($18,000 – $8,000) which would be non-refundable. The auditor would prepare the EDA-25 or IL-1120-X allowing the capital loss carryback in full, but would mark on the amended return that $10,000 of the claim was non-refundable.

If the taxpayer selected Option 2, then an overpayment on one amended return could be used to offset the tax due on an underpaid amended return as long as the taxpayer received permission from the Department to make the offset. If the taxpayer selected Option 1, then no offsets would be permitted. This would be a problem where taxpayers sent in VCP-1s for multiple years with just a letter attached stating that they wanted an offset between the periods. Unless the taxpayer received permission from the Department, which could be verbal permission from an auditor, then there would be no offset against the liability unless the Board of Appeals granted the offset.

9. VCP-1 – Amended Return Shows an Overpayment

If there were problems processing an amended return that showed an overpayment, then the procedures in Chapter 21 of the Audit Manual should be followed regarding multiple EDA-25s or amended returns. In cases where the auditor was making changes to an unprocessed IL-1120-X, the first EDA-25 or IL-1120-X had to match the

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

BIT history. If column A of the first amended return did not match BIT, then the auditor would prepare an EDA-25 to correct Column A so that the return would process. The auditor then prepared a second EDA-25 or IL-1120-X in order to make the audit adjustments for the differences. An audit involving an IL-1120-X claiming an overpayment was coded OC or OC/CR.

Although the overall effect of an ATAT is to reduce federal and state income taxes over a period of time, reversing the tax effects of an ATAT often results in an overpayment in one year. If the taxpayer is overpaid from reversing the effects of an ATAT, the taxpayer will be entitled to a refund for that year, except for Amnesty payments*. If the taxpayer attached the VCP-1 to a group of amended returns reversing an ATAT, and one of those amended returns is an overpayment, then a refund will be issued on the overpaid year regardless of whether or not the taxpayer chose Option 1 or Option 2. This is because on an amended return showing an overpayment, there is no “eligible liability”. Under Option 1, it is the eligible liability that is not refundable.

If the taxpayer submitted a letter requesting that the overpayment on one amended return be used to offset the tax due for other periods, then the Department must have acted on that request for offset, in writing, prior to the time that the VCP period ended on January 31, 2005. Otherwise, the taxpayer would be billed for any deficiencies for the underpaid years, but would be issued a refund for the tax plus interest on the overpaid year. If the offset is permitted, then the offset will be made tax to tax, prior to any interest or penalty computation.

*Note: There are only two situations where the Department will refund tax in a year in which an Amnesty payment was made. Refer to Audit Manual Chapter 2 for information on the Amnesty Programs.

Unless extended by waiver, the taxpayer must file an amended return to claim a refund within:

- Three years after the due date of the return (including extensions),
- Three years after the date the original return was filed, or
- One year after the date the Illinois tax was paid, whichever is later.

Even if the normal statute of limitations is open or an auditor has a waiver to extend the statute, a claim for refund from an RAR must be filed within two years after the date that notification was required under IITA § 506(b), which makes it two years and 120 days from the RAR finalization date.

Note: Audit Manual Chapter 21 requires the taxpayer to report the RAR on an amended return. The auditor should not accept RAR workpapers in the absence of an amended return.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

If the taxpayer made an estimated payment based on an RAR that was not finalized and the finalized RAR results in an overpayment of the estimated payment, then the statute date is one year after the date of payment unless the auditor extended this one-year statute on an IL-872.

Under VCP Options 1 and 2, taxpayers could receive a refund of interest that was overpaid due to computational errors that were attributable to an abusive tax shelter liability reported under VCP.

If the IRS finalizes an audit that reduces tax in a year in which an Amnesty payment was made, any overpaid Illinois Income Tax could be refunded for that year.

If the finalized audit increased or created a federal net operating loss (FNOL) or an Illinois net loss (INL), the loss could be carried according to the rules set for in the IITA and used to offset taxable income in the year or years to which it was carried, regardless of whether or not an Amnesty payment was made in the year to which the loss was carried.

If a taxpayer was under audit and estimated the audit liability because the audit could not be completed prior to the close of Amnesty, a refund of any overestimated "Amnesty" tax paid as well as any other payments made in the year could be issued. However, the taxpayer MUST have agreed to the audit findings in order for the refund to be issued. No amended return should have been filed for the refund amount because the taxpayer must have signed an IL-870 agreeing to the audit findings. If the taxpayer failed to sign the IL-870 and agree to the audit findings, no refund would be issued. The taxpayer must have then protested the audit findings.

10. Carrying Losses under the VCP

Other than the restriction against the taxpayer receiving a refund under Option 1 of the eligible liability discussed below, the VCP program did not, by itself, have any effect on the carrying of Illinois net losses or federal capital losses. The limitations on changing Illinois net losses under IITA §§ 905(n) and 911(h) apply for loss years ending prior to December 31, 2002.

Reversing the tax effects of an ATAT can cause an INL, or increase an INL in a year that the taxpayer will want to carry to another year. However, many amended returns filed under the VCP contained estimated tax effects of future RAR changes that had not yet been finalized. If the taxpayer was carrying a capital loss, or an Illinois net loss, the taxpayer must have filed an amended federal return that caused a capital loss or the INL in the loss year. Illinois cannot process changes to federal taxable income without an amended federal return that has been filed and accepted by the IRS, or a final determination by the IRS or courts. Under the first Amnesty program, the taxpayer could make a payment without an amended return and apply it towards Amnesty, but

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

this was not the case under the VCP. If the taxpayer was carrying a capital loss, or an Illinois net loss, the auditor had to verify that the IRS accepted the amended federal return that created the Illinois loss.

If the taxpayer filed an amended return, along with a VCP-1 where **"Option 1"** was selected for a carry year, then the taxpayer would not be able to receive a refund of the "eligible liability" from the carrying of a capital loss or INL to that year. This included RAR changes that caused or increased a loss in the loss year. If the taxpayer filed the VCP-1 in the carry year under Option 1, then the auditor possibly had to prepare three EDA-25s or IL-1120-Xs for the carry year:

- The first EDA-25 would show the eligible liability from reversing the effects of the ATAT.
- The second EDA-25 would show the other audit adjustments not including the loss carryback.
- The third EDA-25 would show the carryback of the capital loss, or Illinois net loss, and no refund would be permitted of the eligible liability.

When the taxpayer was carrying back a capital loss to a year where the VCP-1 was filed under Option 1 and the refund exceeded the eligible liability, then the auditor needed to mark the excess as "non-refundable – VCP-1 filed under Option 1".

11. No VCP Filing – Amended Return Showing An ATAT– Tax Due

This was for situations where the taxpayer submitted an amended return where there was no VCP filing. The auditor would need to determine what ATAT adjustments were made and whether or not that change was one of the "listed transactions" per the IRS web site. If it was not a listed transaction, and it was a tax period ending prior to December 31, 2004, then the audit could be completed in the normal manner.

If the ATAT reported on the amended return was for a reportable transaction for tax years ending on or after December 31, 2004, or if it was for a "listed transaction" entered into after February 28, 2000, regardless of the year-end, then the auditor would need to determine the tax effect of reversing the ATAT apart from any other adjustments that were reported on the amended return, for purposes of computing the new ATAT penalties.

The audit would be completed in the normal manner.

See the sections "ILLINOIS DISCLOSURE REQUIREMENTS" and "ATAT PENALTIES AND INTEREST" in this chapter for more information.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

12. VCP Involving Composite Returns

IAC § 100.9900(c)(1)(C) permitted partnerships and Subchapter S corporations to file composite returns (IL-1023-C) under the VCP. This would include individuals not on the original composite return, if they could be included on a composite return under IAC § 100.5100 without asking for Department permission or if they had received permission.

However, if the composite return filer chose not to participate in the VCP, Legal Services determined that a nonresident individual who had been included in an original composite return could still file under the VCP. The taxpayer in this circumstance would file his own IL-1040-X. Still, the taxpayer had to indicate what his liability was and how much was paid on his behalf on the composite return, and then fully explain and document his or her calculations.

13. Unprocessable Returns

If the taxpayer has filed an unprocessable return, then IAC § 100.9900(c)(1)(D) states, in part:

> ... An unprocessable return filed during the Voluntary Compliance Program Period will qualify for relief under this Section only if a processable return is filed within 30 days after the Department has issued a notice to that taxpayer that the return filed was unprocessable.

In order to determine if the taxpayer has filed a processable return, the Department will use the definition of a processable return in UPIA § 3-2(d), which states in part:

> ...it must be in the form prescribed or approved by the Department, signed by the person authorized by law, and contain all information, schedules, and support documents necessary to determine the tax due and to make allocations of tax as prescribed by law.

As stated above, the taxpayer had 30 days to perfect an unprocessable return. The 30 days began when the Department issued the taxpayer a notice stating that the return was unprocessable. This would include a letter from an auditor stating that the return is unprocessable. If the auditor had amended returns in his possession that had not been processed, then the auditor should have reviewed those returns to make sure that they were processable. If not, then the auditor should have notified the taxpayer that the returns needed to be signed, the proper supporting schedules needed to be attached, or whatever else was needed to make the return processable. The auditor **must have** followed up on these requests made to the taxpayer. If the taxpayer failed to respond

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

to the auditor's request in a timely manner, then the taxpayer was disqualified from the VCP for that year and could be subject to penalties.

As long as a taxpayer filed an amended return within the VCP period indicating that the return was for the reversal of a tax avoidance transaction, and attached a properly completed VCP-1 along with full payment of the eligible liability, then the taxpayer would qualify for the VCP. In that case, the auditor would be allowed to correct the taxpayer's amended return in order to process it.

14. VCP-1 Filed Without Amended Returns

When the VCP began, the Department mailed thousands of information letters and brochures to taxpayers along with the VCP-1. However, many taxpayers used the VCP-1 as a means of informing the Department that they were not involved in any tax shelter. This was not an intended use of the form. In many cases, a letter was sent (identified in small print at the bottom as VCP-2) in which we notified the taxpayer that we had information from the IRS or other states that the taxpayer had participated in an ATAT. These referrals were based on audits on the ATATs themselves where Illinois was notified that certain participants might have participated in an ATAT.

If there were no amended returns filed with the VCP-1, then the taxpayers should have been notified in writing that they did not comply with the VCP rules and therefore were not entitled to any relief under the VCP. The Department had an obligation to verify taxpayers' claims that they did not participate in a tax shelter, however what action the Department would take was done on a case-by-case basis. Generally, the Department would not be auditing the following accounts:

If there was evidence of IRS activity on these cases, then we would wait until the RAR was received. If the taxpayer estimated the Illinois tax effect of the RAR and filed amended Illinois returns from an RAR that was not finalized, then we would process the amended returns. If the taxpayer underestimated the tax due and did not pay 100% of the liability under the VCP by January 31, 2005, then the taxpayer would be disqualified from the VCP and any applicable penalties would be due.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

In addition to the UPIA penalties, the auditor had to determine what ATAT penalties, if any, applied. Since there were nor are regulations on how to compute the ATAT penalties, the penalties had to be imposed based on the language in the statute.

15. Amended Returns Filed Under VCP

The last sentence of IITA § 501(b) allows an exception to the disclosure requirement for transactions entered into after February 28, 2000 and before January 1, 2005 where:

(i) the taxpayer filed an amended Illinois income tax return which reverses the tax benefits of the potential tax avoidance transaction, or
(ii) as a result of a federal audit the IRS has determined the tax treatment of the transaction and an Illinois amended return has been filed to reflect that treatment.

In order to come within this exception the Illinois amended return must have been filed prior to the time disclosure was otherwise due. This includes amended returns filed timely under VCP. IAC § 100.9900(e)(3)(B) states:

> Because the Voluntary Compliance Program Period will expire before the date the first disclosure of participation in a reportable transaction could be due under IITA § 501(b), filing of an amended return during the Voluntary Compliance Program Period reversing the tax benefits of a reportable transaction will avoid penalty under IITA § 1001(b) for failure to disclose a reportable transaction.

Therefore, there cannot be any IITA § 1001(b) penalty on transactions properly reversed under VCP.

Example #26

The taxpayer filed an amended return under the VCP for calendar year 2002 to reverse the tax effects of a listed transaction and paid additional tax due from the ATAT. However, the amended return and VCP-1 were filed on February 20, 2005, or twenty days after the VCP period that ended on January 31, 2005. Although the amended return properly computed the tax due from reversal of the ATAT, the auditor disqualifies the taxpayer from the VCP because the filing was late and assesses the IITA § 1005(b) ATAT reportable transaction penalty. Although the taxpayer did not qualify for the VCP, there is no IITA § 1001(b) penalty in this case. Under IITA § 501(b) disclosure was required by the due date of the first return due on or after July 30, 2004 (in this case the calendar year 2004 return). The amended return was filed by March 15, the due date of the 2004 return without extensions.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. VII. EXHIBITS

The IRS website provides useful information regarding abusive tax shelters and transactions, which can be found under the following link:

https://www.irs.gov/businesses/corporations/abusive-tax-shelters-and-transactions

That webpage would be helpful in conducting initial research into any audit ATAT issues. The first three exhibits in this section come from the IRS website and provide lists for they following types of reportable transactions: listed transactions, loss transactions, and transactions of interest.

The final exhibit is our Information Document Request (IDR) regarding tax avoidance transactions, the EDA-130.

A. LISTED TRANSACTIONS

The following IRS list can be linked to at the following link:

https://www.irs.gov/businesses/corporations/listed-transactions

Recognized Abusive and Listed Transactions

Listed Transactions in Chronological Order

1. Revenue Ruling 90-105 – Certain Accelerated Deductions for Contributions to a Qualified Cash or Deferred Arrangement or Matching Contributions to a Defined Contribution Plan
2. Notice 95-34 - Voluntary Employee Beneficiary Association
3. ASA Investering Partnership v. Commissioner -Transactions similar to that described in the ASA Investering litigation and in ACM Partnership v. Commissioner
4. Treasury Regulation § 1.643(a)-8 – Certain Distributions from Charitable Remainder Trusts
5. Notice 99-59 - Corporate Distributions of Encumbered Property (BOSS)
6. Step-Down Step Down Preferred/Fast Pay Stock §1.7701(1)-3
7. Revenue Ruling 2000-12 – Debt Straddles
8. Notice 2000-44 – Inflated Partnership Basis Transactions (Son of Boss)
9. Notice 2000-60 Stock Compensation Stock Compensation Transactions
10. Notice 2000-61 – Guam Trust
11. Notice 2001-16 – Intermediary Transactions
12. Notice 2001-17 - §351 Contingent Liability
13. Notice 2001- 45 - §302 Basis-Shifting Transactions
14. Notice 2002-21 - Inflated Basis "CARDS" Transactions
15. Notice 2002-35 - Notional Principal Contracts
16. Common Trust Fund Straddles (Notice 2003-54), Pass-Through Entity Straddle (Notice 2002-50), and S Corporation Tax Shelter Transaction (Notice 2002-65)
17. Revenue Ruling 2002-69 - Lease In / Lease Out or LILO Transactions
18. Revenue Ruling 2003-6 - Abuses Associated with S Corp ESOPs
19. Notice 2003-22 - Offshore Deferred Compensation Arrangements
20. Notice 2003-24 - Certain Trust Arrangements Seeking to Qualify for Exception for Collectively Bargained Welfare Benefit Funds under § 419A(f)(5)
21. Notice 2003-47 - Transfers of Compensatory Stock Options to Related Persons
22. Notice 2003-55 - Accounting for Lease Strips and Other Stripping Transactions
23. Notice 2003-77 - Improper use of contested liability trusts to attempt to accelerate deductions for contested liabilities under IRC 461(f)
24. Notice 2003-81 - Major/Minor Tax Avoidance Using Offsetting Foreign currency Option Contracts
25. Notice 2004-8 - Abusive Roth IRA Transactions
26. Revenue Ruling 2004-4 - S Corporations ESOP
27. Revenue Ruling 2004-20 - Abusive Transactions Involving Insurance Policies in IRC 412(i) Retirement Plans
28. Notice 2004-20 - Abusive Foreign Tax Credit Transactions
29. Notice 2004-30 - S Corporation Tax Shelter Involving Shifting Income to Tax Exempt Organization
30. Notice 2004-31 - Intercompany Financing Through Partnerships
31. Notice 2005-13 - Sale-In Lease-Out transactions

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

32. Notice 2007-57 - Loss Importation Transaction
33. Notice 2007-83 - Abusive Trust Arrangements Utilizing Cash Value Life Insurance Policies Purportedly to Provide Welfare Benefits
34. Notice 2008-34 - Distressed Asset Trust (DAT) Transaction
35. Notice 2015-73 - Basket Option Contracts
36. Notice 2017-10 - Syndicated Conservation Easement Transactions

---

Revenue Ruling 90-105 – **Certain Accelerated Deductions for Contributions to a Qualified Cash or Deferred Arrangement or Matching Contributions to a Defined Contribution Plan** (transactions in which taxpayers claim deductions for contributions to a qualified cash or deferred arrangement or matching contributions to a defined contribution plan where the contributions are attributable to compensation earned by plan participants after the end of the taxable year (identified as "listed transactions" on February 28, 2000)). See also Rev. Rul. 2002-46, 2002-2 C.B. 117 (result is the same, and transactions are substantially similar, even though the contributions are designated as satisfying a liability established before the end of the taxable year), modified by Rev. Rul. 2002-73, 2002-2 C.B. 805

- Revenue Ruling 2002-46– §401k Accelerators
- Revenue Ruling 2002-73 - modifies RR 2002-46 for taxpayers electing to change method of accounting.

Voluntary Employee Beneficiary Association

Notice 95-34 – **Certain Trusts Purported to be Multiple Employer Welfare Funds Exempted from the Lists of §§ 419 and 419A** (certain trust arrangements purported to qualify as multiple employer welfare benefit funds exempt from the limits of §§ 419 and 419A of the Internal Revenue Code (identified as "listed transactions" on February 28, 2000)). See also § 1.419A(f)(6)-1 of the Income Tax Regulations (10 or more employer plans)).

ASA Investering Partnership v. Commissioner **-Transactions similar to that described in the ASA Investering litigation and in ACM Partnership v. Commissioner,** 157 F.3d 231 (3rd Cir. 1998) (transactions involving contingent installment sales of securities by partnerships in order to accelerate and allocate income to a tax-indifferent partner, such as a tax-exempt entity or foreign person, and to allocate later losses to another partner (identified as "listed transactions" on February 28, 2000)).

Treasury Regulation § 1.643(a)-8 – **Certain Distributions from Charitable Remainder Trusts** (transactions involving distributions described in § 1.643(a)-8 from charitable remainder trusts (identified as "listed transactions" on February 28, 2000)).

Corporate Distributions of Encumbered Property (BOSS)

Notice 99-59 – **Transactions involving the distributions of encumbered property in which losses claimed for capital outlays have been recovered** (aka BOSS transactions) (transactions involving the distribution of encumbered property in which taxpayers claim tax losses for capital outlays that they have in fact recovered (identified as "listed transactions" on February 28, 2000)). See also § 1.301-1(g) of the Income Tax Regulations;

Step Down Preferred/Fast Pay Stock §1.7701(1)-3

Treasury Regulation § 1.7701(l)-3 – **Fast Pay or Step-Down Preferred Transactions** (transactions involving fast-pay arrangements as defined in § 1.7701(l)-3(b) (identified as "listed transactions" on February 28, 2000))

Revenue Ruling 2000-12 – **Debt Straddles** (certain transactions involving the acquisition of two debt instruments the values of which are expected to change significantly at about the same time in opposite directions (identified as "listed transactions" on February 28, 2000))

Notice 2000-44 – **Inflated Partnership Basis Transactions (Son of Boss)** (transactions generating losses resulting from artificially inflating the basis of partnership interests (identified as "listed transactions" on August 11, 2000)). See also § 1.752-6T of the temporary Income Tax Regulations and §§ 1.752-1(a) and 1.752-7 of the proposed Income Tax Regulations;

Son of Boss Settlement Initiative

Stock Compensation Transactions

Notice 2000-60 – **Stock Compensation Transactions** (transactions involving the purchase of a parent corporation's stock by a subsidiary, a subsequent transfer of the purchased parent stock from the subsidiary

to the parent's employees, and the eventual liquidation or sale of the subsidiary (identified as "listed transactions" on November 16, 2000));

Notice 2000-61 **– Guam Trust** (transactions purporting to apply § 935 to Guamanian trusts (identified as "listed transactions" on November 21, 2000));

Notice 2001-16 **– Intermediary Transactions** (transactions involving the use of an intermediary to sell the assets of a corporation (identified as "listed transactions" on January 18, 2001));

- Notice 2008-111 - (12/01/2008) – Clarifies Notice 2001-16 (2001-1 C.B. 730) that identified and described the intermediary transaction tax shelter as a listed transaction and supersedes Notice 2008-20 (2008-6 I.R.B. 406). The Notice defines an intermediary transaction in terms of its plan and of more objective components. Also, the Notice specifies when a person is engaged in a transaction as part of a plan and clarifies that a transaction may be an intermediary transaction for one person and not another.
- LB&I Industry Director Guidance - **Examination of Multiple Parties in Intermediary Transactions**

Notice 2001-17 **- §351 Contingent Liability** (transactions involving a loss on the sale of stock acquired in a purported § 351 transfer of a high basis asset to a corporation and the corporation's assumption of a liability that the transferor has not yet taken into account for federal income tax purposes (identified as "listed transactions" on January 18, 2001));

Notice 2001- 45 **– §302 Basis-Shifting Transactions** (certain redemptions of stock in transactions not subject to U.S. tax in which the basis of the redeemed stock is purported to shift to a U.S. taxpayer (identified as "listed transactions" on July 26, 2001));

Notice 2002-21 **– Inflated Basis "CARDS" Transactions** (transactions involving the use of a loan assumption agreement to inflate basis in assets acquired from another party to claim losses (identified as "listed transactions" on March 18, 2002));

- Appeals Settlement Guidelines (redacted)

Notice 2002-35 – **Notional Principal Contra**cts (transactions involving the use of a notional principal contract to claim current deductions for periodic payments made by a taxpayer while disregarding the accrual of a right to receive offsetting payments in the future (identified as "listed transactions" on May 6, 2002));

- Notice 2006-16, Tax Avoidance Using Notional Principal Contracts.
- Explanation of Notice 2006-16, Impact on Required Disclosures.

Common Trust Fund Straddles, Pass-Through Entity Straddle, and S Corporation Tax Shelter transaction

Notice 2002-50– **Partnership Straddle Tax Shelter** (transactions involving the use of a straddle, a tiered partnership structure, a transitory partner, and the absence of a § 754 election to claim a permanent noneconomic loss (identified as “listed transactions” on June 25, 2002)); Notice 2002-65, 2002-2 C.B. 690 (transactions involving the use of a straddle, an S corporation or a partnership, and one or more transitory shareholders or partners to claim a loss while deferring an offsetting gain are substantially similar to transactions described in Notice 2002-50); and Notice 2003-54, 2003-33 I.R.B. 363 (transactions involving the use of economically offsetting positions, one or more tax indifferent parties, and the common trust fund accounting rules of § 584 to allow a taxpayer to claim a noneconomic loss are substantially similar to transactions described in Notice 2002-50 and Notice 2002-65);

- Notice 2003-54 - Common Trust Fund Straddle Tax Shelter
- Notice 2002-65– Passthrough Entity Straddle Tax Shelter

Revenue Ruling 2002-69, **Lease In / Lease Out or LILO Transactions** (transactions in which a taxpayer purports to lease property and then purports to immediately sublease it back to the lessor (often referred to as lease-in/lease-out; or LILO transactions) (identified as listed transactions on February 28, 2000)

- **LILO/SILO SETTLEMENT INITIATIVE** - On August 6, 2008, IRS Commissioner Douglas Shulman announced that settlements would be offered to taxpayers who participated in Lease-In/Lease-Out (LILO) and Sale-In/Sale-Out (SILO) transactions. IRS sent out letters giving taxpayers 30 days to make a decision on whether to accept the offer terms.

Notice 2007-57 - **Loss Importation Transaction** (IRB 2007-29) (transactions in which a U.S. taxpayer uses offsetting positions with respect to foreign currency or other property for the purpose of importing a loss, but not the corresponding gain, in determining U.S. taxable income (identified as “listed transactions” on July 16, 2007)).

Notice 2007-83 - **Abusive Trust Arrangements Utilizing Cash Value Life Insurance Policies Purportedly to Provide Welfare Benefits** - 2007-45 I.R.B. 1 (transactions in which certain trust arrangements claiming to be welfare benefit funds and involving cash value life insurance policies that are being promoted to and used by taxpayers to improperly claim federal income and employment tax benefits (identified as “listed transactions” on October 17, 2007)).

Notice 2008-34 - **Distressed Asset Trust (DAT) Transaction** - 2008-12 I.R.B. 1 (transactions in which a tax indifferent party, directly or indirectly, contributes one or more distressed assets (for example, a creditor’s interests in debt) with a high basis and low fair market value to a trust or series of trusts and sub-trusts, and a U.S. taxpayer acquires an interest in the trust (and/or series of trusts and/or sub-trusts) for the purpose of shifting a built-in loss from the tax indifferent party to the U.S. taxpayer that has not incurred the economic loss (identified as listed transactions on February 27, 2008)).

Notice 2015-73 – **Basket Option Contracts** - This notice describes certain transactions involving a contract that is denominated as an option referencing a basket of actively traded personal property. The Basket Option Contract attempts to defer income recognition and convert short-term capital gain and ordinary income to long-term capital gain using a contract denominated as an option contract. This notice was published in the Internal Revenue Bulletin on November 16, 2015. This notice was previously listed under Notice 2015-47 which was revoked.

Notice 2017-10 – **Syndicated Conservation Easement Transactions** - This notice describes certain transactions in which some promoters are syndicating conservation easement transactions that purport to give investors the opportunity to obtain charitable contribution deductions in amounts that significantly exceed the amount invested. The promoters identify a pass-through entity that owns real property, or form a pass-through entity to acquire real property. Additional tiers of pass-through entities may be formed. The promoters then syndicate ownership interests in the pass-through entity or tiered entities that owns the real property, suggesting to prospective investors that they may be entitled to a share of a charitable contribution deduction that equals or exceeds two and one-half times the amount of the investor’s investment. The promoters obtain an inflated appraisal of the conservation easement based on unreasonable conclusions

about the development potential of the real property. The entity then donates a conservation easement encumbering the property to a tax-exempt entity. Investors then claim a charitable contribution relying upon the pass-through entity's holding period.

"De-Listed" Transactions

- Notice 2004-65 - De-lists Producer Owned Reinsurance Companies (PORC) as a listed transaction
- o News Release dated 09-24-2004

B. LOSS TRANSACTIONS

This information is taken from the IRS webpage that addresses disclosure of loss reportable transactions, which can be found at the following link:

https://www.irs.gov/businesses/disclosure-of-loss-reportable-transactions

Disclosure of Loss Reportable Transactions

Congress has enacted a series of income tax laws designed to halt the growth of abusive tax avoidance transactions. These provisions include the **disclosure of reportable transactions**. Each taxpayer that has participated in a reportable transaction and that is required to file a tax return must disclose information for each reportable transaction in which the taxpayer participates. Use Form 8886 to disclose information for each reportable transaction in which participation has occurred. Generally, Form 8886 must be attached to the tax return for each tax year in which participation in a reportable transaction has occurred. If a transaction is identified as a listed transaction or transaction of interest after the filing of a tax return (including amended returns), the transaction must be disclosed either within 90 days of the transaction being identified as a listed transaction or a transaction of interest or with the next filed return, depending on which version of the regulations is applicable. See the regulations under section 1.6011-4 for more information.

Material advisors with respect to any reportable transaction must also disclose information about the transaction on Form 8918. This requirement applies to material advisors who provide material aid, assistance, or advice on any reportable transaction after October 22, 2004.

One reportable transaction that must be disclosed is a loss transaction.

Losses that must be reported on Forms 8886 and 8918

If a taxpayer claims a loss under § 165 of at least one of the following amounts on a tax return, then the taxpayer has participated in a loss transaction and must file Form 8886. If an advisor provides material aid, assistance, or advice on a transaction that results in a taxpayer claiming a § 165 loss of at least one of the following amounts and meets other filing requirements; then the advisor is a material advisor and must file Form 8918.

- For individuals, at least $2 million in a single tax year or $4 million in any combination of tax years.
- For corporations (excluding S corporations), at least $10 million in any single tax year or $20 million in any combination of tax years.
- For partnerships with only corporations (excluding S corporations) as partners (looking through any partners that are also partnerships), at least $10 million in any single tax year or $20 million in any combination of tax years, whether or not any losses flow through to one or more partners.
- For all other partnerships and S corporations, at least $2 million in any single tax year or $4 million in any combination of tax years, whether or not any losses flow through to one or more partners or shareholders.
- For trusts, at least $2 million in any single tax year or $4 million in any combination of tax years, whether of not any losses flow through to one or more beneficiaries.
- A loss from a foreign currency transaction under Internal Revenue Code section 988 is a loss transaction if the gross amount of the loss is at least $50,000 in a single tax year for individuals or trusts, whether or not the loss flows through from an S corporation or partnership.

Taxpayers whose filed return does not reflect a section 165 loss that equals or exceeds the applicable threshold amount have not participated in a loss transaction. If you are a partner, shareholder, or beneficiary of a pass-

through entity, you have participated in a loss transaction if your tax return reflects a section 165 loss allocable to it from the pass-through entity that equals or exceeds the applicable threshold amount.

Losses that do not have to be reported on Forms 8886 and 8918:

- Losses from casualties, thefts, and condemnations
- Losses from Ponzi Schemes
- Losses from the sale or exchange of an asset with a qualifying basis
- Losses arising from any mark-to-market treatment of an item
- Certain Swap losses (see Notice 2006-16)

For additional information on losses that do not have to be reported on Form 8886, see Revenue Procedure 2004-66 and Revenue Ruling 2009-9

This information was last reviewed or updated by the IRS on 3/7/17.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers' Bill of Rights.

C. TRANSACTIONS OF INTEREST (TOI)

This information is taken from the IRS webpage that addresses disclosure of loss reportable transactions, which can be found at the following link:

https://www.irs.gov/businesses/corporations/transactions-of-interest

The new reportable transaction category Transaction of Interest (TOI) is defined as a transaction that the IRS and the Treasury Department believe is a transaction that has the potential for tax avoidance or evasion, but lack sufficient information to determine whether the transaction should be identified specifically as a tax avoidance transaction. The TOI category of reportable transactions will apply to transactions entered into on or after November 2, 2006.

The following transactions have been identified and classified by the Internal Revenue Service as “Transactions of Interest”. Transactions that are the same as, or substantially similar to, these transactions are subject to the disclosure requirements of § 6011 (§ 1.6011-4), the material advisor disclosure statement requirements of § 6111 (§§ 301.6111-1, 301.6111-2, 301.6111-3), and the list maintenance requirements of § 6112 (§ 301.6112-1).

Persons required to file material advisor disclosure statements under § 6111 who have failed to do so may be subject to the penalty under § 6707(a). Persons required to maintain lists of investors under § 6112 who have failed to do so (or who fail to provide such lists when requested by the IRS) may be subject to the penalty under § 6708(a). In addition, the IRS may impose penalties on parties involved in these or substantially similar transactions, including the accuracy-related penalty under § 6662.

Notice 2007-72 - August 14, 2007 Contribution of Successor Member Interest - This transaction involves a taxpayer directly or indirectly acquiring certain rights in real property or in an entity that directly or indirectly holds real property, transfers the rights more than one year after the acquisition to an organization described in § 170(c) of the Internal Revenue Code, and claims a charitable contribution deduction under § 170 that is significantly higher than the amount that the taxpayer paid to acquire the rights.

Notice 2007-73 - This transaction uses a grantor trust, and the purported termination and subsequent re-creation of the trust’s grantor trust status, for the purpose of allowing the grantor to claim a tax loss greater than any actual economic loss sustained by the taxpayer or to avoid inappropriately the recognition of gain.

Notice 2008-99 - October 31, 2008 - Potential for Avoidance of Tax Through Sale of Charitable Remainder Trust Interests - This transaction involves a sale or other disposition of all interests in a charitable remainder trust (subsequent to the contribution of appreciated assets to and their reinvestment by the trust), results in the grantor or other noncharitable recipient receiving the value of that person's trust interest while claiming to recognize little or no taxable gain.

This manual is not a statement of Department policy. The Department reserves the right to review and revise the work of any auditor and to order or approve procedures or methods that deviate from or are outside the scope of this manual. This manual is intended for internal use only and shall not constitute written legal advice or guidance to taxpayers for any purpose, including but not limited to, the Taxpayers’ Bill of Rights.

Notice 2009-7 - On December 29, 2008 IRS and Treasury identified a new transaction of interest that uses a domestic partnership to prevent the inclusion of subpart F income. In this transaction a U.S. taxpayer that owns controlled foreign corporations (CFCs) that hold stock of a lower-tier CFC through a domestic partnership takes the position that subpart F income of the lower-tier CFC or an amount determined under section 956(a) of the Internal Revenue Code (Code) related to holdings of United States property by the lower-tier CFC does not result in income inclusions under section 951(a) for the U.S. taxpayer.

Notice 2015-74 - Basket Contracts. This notice describes certain transactions denominated as an option, notional principal contract, forward contract, or other derivative contract to receive a return based on the performance of a basket of referenced assets (the “reference basket”). The assets that comprise the reference basket may include (1) interests in entities that trade securities, commodities, foreign currency, or similar property (“hedge fund interests”), (2) securities, (3) commodities, (4) foreign currency, or (5) similar property (or positions in such property). The Basket Contracts attempt to defer income recognition and may attempt to convert short-term capital gain and ordinary income to long-term capital gain. This notice was published in the Internal Revenue Bulletin on November 16, 2015.

Notice 2016-66 – Section 831(b) Micro-Captive Insurance. This notice describes transactions in which a taxpayer attempts to reduce the aggregate taxable income of the taxpayer, related persons, or both, using contracts that the parties treat as insurance contracts and a related company that the parties treat as a captive insurance company. Each entity that the parties treat as an insured entity under the contracts claims deductions for premiums for insurance coverage. The related company that the parties treat as a captive insurance company elects under § 831(b) of the Internal Revenue Code (the “Code”) to be taxed only on investment income and therefore excludes the payments directly or indirectly received under the contracts from its taxable income. The manner in which the contracts are interpreted, administered, and applied is inconsistent with arm’s length transactions and sound business practices.

Notice 2017-8 – Section 831(b) Micro-Captive Transactions, amends the due date for filing of a disclosure with the Office of Tax Shelter Analysis for Notice 2016-66 transactions.

This information was last reviewed or updated by the IRS on 1/25/17.

D. EDA-130

The EDA-130 fill-in form is available on the Intranet under “Audit” and then “Forms”. The pdf file can also be saved to your hard drive. For your reference, the form has been copied and pasted on the following two pages.

Illinois Department of Revenue

EDA-130 Information Document Request for Tax Avoidance Transactions

General Information

The purpose of this document is to identify if a taxpayer has directly or indirectly participated in any transaction that the Internal Revenue Service (IRS) may consider an abusive tax avoidance transaction. For more information, see Page 2, Abusive Tax Avoidance Transaction Information.

If you have not participated in any abusive tax avoidance transactions, please sign the declaration at the bottom of this form and return it to the auditor.

Identify the taxpayer and audit period (auditors)

Name: ______________________ Submitted to: ______________________

Address: ______________________ Date submitted: ______________________

______________________ Auditor's name: ______________________

FEIN: ______________________ Auditor's address: ______________________

Audit Period: ______________________ ______________________

____

Auditor's phone no.:______________________

Step 1: Provide the following documents for the entire audit period (taxpayers)

Documents Requested

1. A description of all listed and reportable transactions, including all of the material facts
2. A description of the tax treatment of all listed or reportable transactions that resulted in a tax benefit
3. Information identifying the amounts involved and the General Ledger accounts affected by any part of any listed or reportable transactions. Please trace all identified items and amounts as line items on the tax returns.
4. Copies of all contracts and other documents pertaining to listed transactions
5. The names and addresses of all parties who promoted, solicited, or recommended participation in any listed or reportable transaction, and to whom fees or other compensation were paid in connection with the transaction.
6. The details of any tax strategies that were disclosed to any other state
7. Copies of requests made to the IRS to determine if any transaction you participated in should have been disclosed as a listed or reportable transaction. Include any responses you have received.
8. Details of any other state's tax shelter initiatives that you have responded to or entered into agreement with, including copies of any signed agreements
9. Any federal Forms 8886 and 8271 that you filed with the IRS, but have not previously provided to the Illinois Department of Revenue

Step 2: Sign the declaration, if applicable (taxpayers)

If you have not participated directly or indirectly in any listed or other reportable transaction, please sign here.

Abusive Tax Avoidance Transaction Information

As part of a joint effort with the Internal Revenue Service, Illinois is taking measures to identify and eliminate any potential tax avoidance transactions. One way of preventing the use of such transactions is to require the submission of documents that were missing during the original filing of a return.

Specific Instructions

Step 1: Provide the following documents for the entire audit period (taxpayers)

Definitions

The following information will help you to define certain terms in the document list.

***"Reportable Transaction"* –**

A reportable transaction is one that warrants investigation because it possesses certain characteristics common in tax avoidance transactions. Listed transactions are included as one type of reportable transaction. Other reportable transactions include,

- confidential transactions
- transactions with contractual protection
- loss transactions
- transactions of interest

In general, a taxpayer has participated in a reportable transaction if the taxpayer's tax return reflects a tax benefit from the transaction. For more information, see Income Tax Act Section 1.6011-4(c)(3).

***"Listed Transaction"* –**

The IRS defines listed transactions as transactions that are the same as or substantially similar to one of the types of transactions that the IRS has determined to be a tax avoidance transaction. These transactions are identified by notice, regulation, or other form of published guidance as a listed transaction. For more information, see Income Tax Act Section 1.6011-4(b)(2).

***"Substantially Similar"* –**

A transaction is substantially similar to another transaction if it is expected to obtain the same or similar type of tax consequences and is either factually similar or based on the same or similar tax strategy. For more information, see Income Act Section 1.6011-4(c)(4).

For more information regarding reportable or listed transactions,

- see Treasury Regulation 1.6011-4.
- visit the IRS website at **www.irs.gov**
- read IRS Publication 550

What if I do not submit the required documents?

You are required to provide the documents that are requested on this form if you participated in any reportable transaction. Failure to disclose participation in a listed or other reportable transaction may result in the assessment of non-disclosure penalties. For more information regarding the penalties, see the Illinois Income Tax Act, Sections 1001(b), 1005(b), 1005(c), and 1005(d).

If you did not participate in any potentially reportable transaction, you must sign the declaration on this form and return it to the auditor.

Step 2: Sign the declaration, if applicable (taxpayers)

If you did not participate in any reportable transactions, you must sign the declaration at in Step 2.
